

## **Beast Tamer 68**

Chapter 68 A lack of reciprocation is not courteous! 1

Fang Mu pulled out a brocade box of velvet texture from his Mirror Turtle

Pendant.

The fabric of this brocade box was meticulously spun by weavers from the finely crushed down of Liu Feng Cui Que feathers, mixed with silk threads.

The blue-green intertwined with understated yet luxurious pale gold, was often made into custom-made outfits by high-star weavers.

Fang Mu had spent four hundred and fifty thousand Dragon Rising Coins just on this brocade box.

All for the elixir contained within it.

“Elder Ah Shui, these are the six elixirs that my master asked me to give you!” Shui Miao accepted the brocade box but didn’t check the elixirs inside yet.

Instead, he handed Fang Mu a card made of black crystal stone.

On this black crystal card was a golden dragon, its wings spread wide, ready to fly.

There was a knight kneeling on one knee next to the golden dragon.

The Dragon Cavalry Black Gold Card was the universal bank card for all banks in the entire Dragon Rising Federation.

Only those who deposit more than one billion Dragon Rising Coins can apply for it.

The transaction between Fang Mu and Shui Miao was as high as one billion two hundred million Dragon Rising Coins.

Just enough to be eligible for the Dragon Cavalry Black Gold Card.

Fang Mu calmly accepted the Dragon Cavalry Black Gold Card from Shui Miao.

Shui Miao also opened the brocade box on his side.

Six test tubes made of white crystal were each filled with a different brightly colored liquid.

Just by looking at the color of the elixirs, Shui Miao knew their purity was sufficient.

Having accomplished his mission, Shui Miao prepared to say goodbye to Fang

After all, the Starwheel would hold a gathering from time to time, and he would be reminded when the time comes by the messenger.

He would probably meet Jianmu again in a short while.

Just as Shui Miao was about to leave, Fang Mu directly took out the Life Elixir that was ninety-two percent pure.

He handed it to Shui Miao.

“My master gave me this elixir when he came, fearing that you might give me a present.”

“My master said that if I accepted your gift and felt that you were very kind to me,”

“I should give you this elixir.”

It’s true that the status of a Forging Spirit Grandmaster is not as high as that of a Grandmaster Creator.

But for a Spirit Forging Master to become a Forging Spirit Grandmaster, it’s no easier than for a Master Creator to become a Grandmaster Creator.

If counted, there wouldn’t be more than twenty Forging Spirit Grandmasters.

Compared to concocting Spiritual Liquid, creating a Sequential Spiritual Instrument undoubtedly requires more effort and time.

The value of the elixir he took out might not match that of the Sequential Spiritual Instrument – the Purple Ice Crystal Ring.

But it could demonstrate the character of [Stellar Start] to Shui Miao, letting him know that [Stellar Start] is someone who can be trusted.

At the same time, it was also a signal to Shui Miao.

To encourage Shui Miao to continue being good to him.

But soon, Fang Mu realized that he may have underestimated the value of this ninety-two percent pure Life Elixir.

Because he noticed a change in Shui Miao’s expression.

Fang Mu indeed found that there was a significant difference between the ninety-two percent pure Life Elixir and the ninety percent pure one.

The ninety-two percent Pure Life Elixir had a jade-like luster, making it look even more glorious.

But Fang Mu hadn't given it much thought.

However, Shui Miao's expression now forced Fang Mu to explore the difference in value between the two.

It was then that Fang Mu heard Shui Miao earnestly say. "Tell your master when you go back, that I owe him a favor, and you too!"

After saying this, Shui Miao left the Creator's Guild.

Confidently ascertaining the value of the Life Elixir, Fang Mu knew he certainly couldn't ask Shui Miao.

A disciple of a Grandmaster Creator couldn't possibly be ignorant of the value of the Life Elixir.

So, in this respect, Fang Mu could only slowly investigate further in the future.

Fang Mu reflected on the expression Shui Miao had when he accepted the Life Elixir with a purity of ninety-two percent.

A warning bell rang in his heart!

It was that no matter what, he should not consider Creator resources too lightly just because he could obtain them very easily.

Moreover, he should not underestimate the value of the high-star Creator resources.

Also, when he is not certain of the value of Life Elixir and Elemental Potion with purity exceeding ninety percent, he should not casually bring them out. After understanding this, Fang Mu did not rush to leave the Creator's Guild.

He planned to immediately begin the Marrow Pact for the Sequential lower-grade spiritual instrument – the Purple Ice Crystal Ring – in the working room.

Needle Mosquitoes could be employed to extract Heartblood, and Guardian Beasts could assist in extracting bone marrow.

This type of Guardian Beast was sold inside the Creators Guild.

The price was much more expensive than in Dinghai Mall.

However, the Bone-sucking Blood Leech sold inside the Creators Guild was safer to use because a low-level creator personally cultivated it, as compared to the ones sold in Dinghai Mall.

Fang Mu directly called Lu Xiaoyin, asking her to bring a Bone-sucking Blood Leech and fifty Needle Mosquitoes.

With the Purple Ice Crystal Ring, which could arbitrarily store living beings, Fang Mu finally wouldn't have to replenish the Needle Mosquitoes constantly. Money is no longer a problem for Fang Mu now; he doesn't need to care about money spent.

Just to let Xixi handle a pile of Alien Beast Corpses, and then he would have everything.

When Lu Xiaoyin received the call from Fang Mu, she was extremely surprised and delighted.

This was the first time Fang Mu went out of his way to ask her for a favor apart from when she voluntarily led him to renew the room after bumping into him at the door.

Fang Mu was willing to bother her instead of bothering others.

It signifies that Fang Mu considered her as one of his own.

At the very least, she is now the attendant who is given the most importance by Fang Mu in the entire JA City Creators Guild.

Lu Xiaoyin hurriedly proceeded to the storage room, carefully choosing Needle Mosquitoes and Bone-sucking Blood Leeches.

The blood pouch of each Needle Mosquito accurately reached one hundred milliliters, as required by Fang Mu.

After receiving the Needle Mosquitoes and Bone-sucking Blood Leech that Lu Xiaoyin had delivered,

Fang Mu casually handed the newly acquired Dragon Cavalry Black Gold Card from Shui Miao to Lu Xiaoyin.

Instructing Lu Xiaoyin to settle the bill.

Seeing the bank card handed over by Fang Mu, Lu Xiaoyin took a sharp intake of breath.

This cold breath rushed into Lu Xiaoyin's nostrils, causing them to ache and making her head feel cool.

The Dragon Cavalry Black Gold Card, it was that Dragon Cavalry Black Gold Card that would need at least ten targets to be initiated!?

Lu Xiaoyin had a new understanding of Fang Mu's wealth.

To have a cash flow of more than a billion Dragon Rising Coins and to own an industry of a billion Dragon Rising Coins are two different things.

Even large corporations with a scale of tens of billions of Dragon Rising Coins may not be able to spare a disposable sum of billion Dragon Rising Coins.

After all, most of the company's money is invested in goods.

Fang Mu noticed the change in Lu Xiaoyin's expression, a faint hint of a smile appeared at the corner of his mouth.

Compared to before, after meeting with Shui Miao, he increasingly resembled a genuine disciple of a Grandmaster Creator.

Just like Lu Xiaoyin understood the meaning of the Dragon Cavalry Black Gold Card,

A Beast Master of a certain level could also discern the meaning of the Purple Ice Crystal Ring in his hand.

With this representative symbol on hand, Fang Mu no longer has to be prepared to make a big scene at all times!

Once Lu Xiaoyin had left the working room, Fang Mu caught the wriggling Bone-sucking Blood Leech.

He was ready to begin extracting the marrow!
