

## Beast Tamer 681

Chapter 681: Flowers Bloom in the Clear Spring! \_3

“There is a high probability that it can allow a Seams Terrors to gain the ability to sneak into a wall from the body of Wall-cutting Shadow Corpse, then suddenly jump out of the wall to attack the target.”

“Unfortunately, this Wall-cutting Shadow Corpse is not an Undead Species guardian beast under the Silver Stage.”

“If it were, this Wall-cutting Shadow Corpse could at least be rated as a top-quality beast according to the Beast Controlling Force’s rating system!”

Fang Mu raised his eyebrow upon hearing this, surprised at Shu Liangjun’s high praise for the Wall-cutting Shadow Corpse.

Fang Mu believed that a big reason for Shu Liangjun’s high appraisal of the Wall-cutting Shadow Corpse was due to its rarity and its role in specific environments.

But no matter how he looked at it, Fang Mu felt that the Wall-cutting Shadow Corpse was inferior to the Stealthy Hidden One.

In spacious and open environments, the Wall-cutting Shadow Corpse would lose its effectiveness.

But the Stealthy Hidden Ones could sneak around, ambushing targets from all directions.

Even so, using a Wall-cutting Shadow Corpse to train Seams Terrors definitely made it a good choice.

Qin Shao didn’t allow this stalemate to continue.

A small snake, its body enveloped in a weird grey mist and its color a mix of black and red, bit into the Soul Flame of the Wall-cutting Shadow Corpse.

Dragging the Soul Flame out of the corpse.

The moment the Soul Flame was entirely separated from its body, the corpse of the Wall-cutting Shadow Corpse fell to the ground with a thud, stirring up clouds of dust.

Fang Mu didn't hesitate to continue collecting the corpse of the Wall-cutting Shadow Corpse.

The group continued on, encountering many spirits along the way.

Inside the large ancient battlefield, the Dead Sea pervaded, and in no time, Qin Shao, Shu Liangjun, and Shui Miao had helped Fang Mu collect millions of souls of the dead.

If this had happened when Fang Mu had just signed a contract with Yan Yubanruo, millions of souls of the dead would certainly have thrilled him.

But now, not only does Fang Mu have Liu Xi, an Earth Evil Spirit, he also wants to cultivate another General-level Evil Spirit with Barrier Ability.

Fang Mu's shortage of souls of the dead is just too great!

Along the way, Fang Mu did encounter some powerful spirits, like the Wall-cutting Shadow Corpse met just now.

The power of the Wall-cutting Shadow Corpse reached the fifth rank.

These powerful spirits like to hide in the dark and launch sudden attacks; other forces encountering such powerful spirits are bound to suffer losses.

Fang Mu was quickly reaching a place marked as a source of spiritual energy in the ancient books.

Looking at the ancient book in his hand, Fang Mu suddenly thought of a problem.

This ancient book must have been drawn by people of the Fifth and Sixth Eras.

This large ancient battlefield seems to have been carefully arranged by the person who drew the ancient book.

Spiritual energy was a very common energy in the Fifth and Sixth Epochs, but the person who drew the ancient book specifically marked the spiritual energy out.

This made Fang Mu suspicious. Could it be that the person who drew this ancient book already knew that Spiritual Energy would disappear in the Seventh Era!?

Only this speculation could reasonably explain the original reason.

If so, Fang Mu could not help but wonder, what exactly did the Sixth Era go through to lead to this situation!?

As Fang Mu contemplated, fierce fighting broke out among the various major forces outside the ancient battlefield.

Even within Rock Peak City, conflict continued unabated, despite the Qingdian Clan trying to suppress it under the name of the Ten-thousand Nations Federation.

With no restrictions upon entering the ancient battlefield, those forces that entered the ancient battlefield earlier became the punching bags of the powerful forces.

Some powerful forces wanted to quickly enter the interior of the ancient battlefield to gather resources.

Some forces, confident of their own strength and not wanting to compete with these powerful forces, started to “harvest” and raid other forces in the outer area of the ancient battlefield.

These forces were completely unaware that Huang Yuan had let in a group of beast controlling forces.

As the Beast Controlling Forces entered the scene, they quickly clashed with these human forces that were lingering in the outer area of the ancient battlefield.

Liu Xi devours the souls of the dead on one hand and the powerful souls on the other.

Ordinary life souls don't interest him, but the life souls of the powerful are exquisite delicacies to Liu Xi!

On the way, Fang Mu encountered many diverging roads. These roads were branched.

Every diverging path was filled with traps and dead ends.

Bizarrely, the entrances to these trap-filled and deadly divergent paths were laden with many mineral-like resources.

This struck Fang Mu as odd.

The creator of this ancient battlefield must have had a black heart!

Only a completely heartless person would use human nature to entice other creatures into danger.

Fang Mu originally thought that the place marked with spiritual energy would be where epoch relics were placed.

When you open an epoch relic, it contains a bottle of spiritual energy, or some special guardian beasts and items that can produce spiritual energy.

Fang Mu did not expect that the first place marked with Spiritual Energy would be a green grassland covering an area of about ten square meters.

Under the grass, green springs gushed out, and there were serpentine streams around the grassland.

The gushing green spring water entered the stream as soon as it left the grassland.

And then flowed back underground from the other end of the stream.

A lush floral-class guardian beast grew on the green grassland, about a meter high.

The light purple double petal flowers on its top were extremely beautiful.

The entire plant seemed like it sprouted from the ground, with flower buds all over its branches.

Only a portion of the flowers on the branches were blooming.

When the previously opened flowers withered, the other buds on the branches would continue to bloom.

Witnessing this situation, Fang Mu wondered whether this was a characteristic of this floral guardian beast, or if the energy in the grassland wasn't sufficient to allow all the flower buds on this floral guardian beast to bloom.

In any case, this floral guardian beast is an outright old fellow with an age spanning at least one epoch.

This seemed quite strange to Fang Mu.

Normally, a plant-type beastmaster should not have such a long life span.

Could it be that this floral guardian beast's longevity is related to the green spring water gushing from the ground!?

Fang Mu immediately used the Fool's Shadow's Innate Divine Ability [Eye of Omniscience] to investigate the spring water in the stream.

The Eye of Omniscience could inspect life forms as well as non-living entities.

As Fang Mu cast the Eye of Omniscience, the moment his gaze fell on the green spring water, his soul involuntarily trembled.

There are indeed such strange things in the world!

Fang Mu truly felt enlightened!

Chapter 682: Yunque Hibiscus and Sun and Moon Jellyfish!\_1

[Spiritual Spring]: Plant Spring

The waters of the Plant Spring provide strong nourishment for plant-type Guardian Beasts, allowing them to absorb the spring's essence daily to offset the loss of their lifespan.

Plant Spring water can nourish dying plant-type Guardian Beasts, with a high probability of restoring them to health (there is often a Plant Spring Eye in places where Plant Spring water flows).

With the probing of the Eye of Omniscience, Fang Mu learned the name of this green Spiritual Spring.

The name Plant Spring itself seemed to carry a healing undertone.

Through a data-driven introduction to the Plant Spring, Fang Mu understood why that plant was able to grow all the way to the present without dying out.

It turned out to be all because of the Plant Spring!

The Plant Spring was truly a wonderful thing!

For plant-type Guardian beasts, the nourishment of The Plant Spring was like a magic potion.

The Plant Spring which has been flowing since the fifth and sixth epochs indicates that there must be a Plant Spring Eye underneath this green landscape!

Shu Liangjun, Shui Miao, Qin Shao, and Jin Ya were all greatly intrigued by this scene, realizing the extraordinary nature of the spring water gushing from beneath the green terrain!

Fang Mu walked forward and instructed the Rainy Doll, a half-elf evolved from Pure Water, to merge with the stream.

Fang Mu quickly located the position of the Plant Spring Eye.

The Rainy Doll transformed into a chain intending to pull the Plant Spring Eye out of the ground.

Although the Rainy Doll exerted all its might, it couldn't move the Plant Spring Eye.

Luckily, the Plant Spring Eye wasn't deep. Fang Mu punched the green ground, shattering it.

He then jumped into the opened crevice, pulled out the Plant Spring Eye like pulling a radish, and immediately stored it in the Purple Ice Crystal Ring.

At the moment when Fang Mu applied force, a blood-red fog lingered around him for a moment but disappeared instantly.

Fang Mu was slightly surprised. The Spiritual Spring Eye, which only looked the size of a basketball, actually weighed tens of thousands of tons!

If it were someone else, it would be really difficult to extract the Plant Spring Eye from the ground.

The moment the Plant Spring Eye was removed by Fang Mu, all the Plant Spring water in all the creek channels retreated back into the Spring Eye, leaving none wasted.

Fang Mu, who emerged from the ground, lightly shook off the dirt on his body.

Due to the moisture on his body, the dirt stuck to him, making Fang Mu look rather disheveled.

But this slightly disheveled appearance of Fang Mu had Jin Ya's eyes bulging out in awe.

Oh my god! Could one watch such distressing beauty of a noble son without paying any money!?

It was as if a delicately pampered aristocrat was whipped and sent to a construction site to move bricks for a month.

Before Jin Ya could fully appreciate this scene, the Rainy Doll descended a curtain of rain over Fang Mu's head, washing away the dirt from his body.

Immediately after, the Rainy Doll circled around Fang Mu, taking away the moisture from his body.

Fang Mu was once again spotless.

At this moment, Fang Mu turned his gaze to the plant-type beast that has survived from the fifth and sixth epochs to this day.

Previously, in the Cleaner Division of JA City, Fang Mu had seen the Hundred Lilies Flower Child that Feng Lin raised as her daughter.

However, the Hundred Lilies Flower Child didn't come from the Guardian Beast of the fifth and sixth epochs, but was a bloodline inheritance of a succulent Guardian Beast named Lily Lily.

Now Fang Mu genuinely crossed over the epochs, witnessing the Guardian Beast from the previous epoch!

Who could have planted this Yunque Hibiscus? They even generously left such a treasure as the Plant Spring Eye here!

But only the combination of the two could leave this gift spanning epochs.

Under Fang Mu's probe, the data of the Guardian Beast known as Yunque Hibiscus appeared before Fang Mu's eyes.

[Beast Name]: Yunque Hibiscus

[Beast Species]: Hibiscus of Malvaceae family

[Beast Level]: Bronze Level (7/10)

[Beast Element]: Wood

[Beast Potential]: Silver

[Beast Quality]: Perfect

Skill:

[Bud Exhaling Spirit]: Each bud, when blooming, will release spiritual energy into the environment, nourishing itself to bloom more buds whilst enhancing the concentration of spiritual energy in the surrounding environment.

Exclusive Feature:

[Many Buds]: It stores as much energy as possible at its roots to strengthen itself, increasing the number of buds it can produce. When injured, it can absorb the energy in the buds to recover its health.

Evolutionary Path:

①: Huai Spirit Hibiscus, ②: Spirit wave Hibiscus, ③: Sword Leaf Hibiscus.

The bronze level skill of the Yunque Hibiscus, [Bud Exhaling Spirit], is the fundamental reason why the Yunque Hibiscus can produce spiritual energy.

The Yunque Hibiscus has so many buds, each bloom releases spiritual energy into the surrounding environment.

It not only nourishes itself but also enhances the concentration of spiritual energy in the surrounding environment.

The spiritual energy produced by a single Yunque Hibiscus was too sparse to evoke any reaction from Fang Mu.

However, the JuYang Giant Clam in Fang Mu's hand greedily gulped the surrounding air, clearly intending to absorb the spiritual energy.

This indicated that spiritual energy is of great benefit to Guardian Beasts.

Without conducting specific experiments, Fang Mu could not confirm the specific benefits.

Even if Fang Mu doesn't obtain other Guardian Beasts that can produce spiritual energy or another method to produce spiritual energy, relying solely on the combination of Yunque Hibiscus and the Abdominal Territory Worm.

Once the Abdominal Territory Worm binds spiritual energy with the skill [Secret Realm Energy], it can produce spiritual energy in its abdominal sanctuary.

Thinking of this, a smile couldn't help but curl at the corners of Fang Mu's mouth.

The exclusive characteristic of the Yunque Hibiscus, [Many Buds], is the weakest exclusive feature for combat class Guardian Beasts.

Chapter 683: Yunque Hibiscus and Sun and Moon Jellyfish!\_2

However, for the Guardian Beast, Yunque Hibiscus, which is responsible for producing Spiritual Energy, it was a divine feature, greatly enhancing the value of the Yunque Hibiscus.

As for the three evolutionary directions of the Yunque Hibiscus, Huai Spirit Hibiscus and Spirit wave hibiscus, they should all be related to the production of Spiritual Energy.

Without knowing which of these two evolutionary paths is better, Fang Mu was more inclined to trust the order of the Fool's Shadow.

The third evolutionary path, Sword leaf hibiscus, turns the Yunque Hibiscus that can produce Spiritual Energy into a combat Guardian Beast that fights through its leaves.

Only a fool would make such a choice!

Since Fang Mu had previously agreed with Shui Miao, Shu Liangjun, and Qin Shao that all gains within the ancient battlefield belonged to him.

So, just like the Vegetation Clear Spring Eye, Fang Mu put the Yunque Hibiscus into his Purple Ice Crystal Ring.

Although the three people of Shui Miao were somewhat tempted by these items, they didn't find anything wrong with it.

Especially Qin Shao, who was eager for Fang Mu to make a big gain.

In this way, Fang Mu could provide the opportunity to prolong the life of the Glorious Clan a few more times!

According to the map in the ancient books, the second marked place of Spiritual Energy was not far from here.

Just as Fang Mu was about to gesture for everyone to continue their exploration, Shu Liangjun suddenly said.

“According to the restriction I set up, someone has already crossed the stone gate and entered the interior of the ancient battlefield!”

“We were attacked by an Evil Spirit at the stone gate, leaving a lot of traces.”

“The other party must have known that someone has entered here first.”

Fang Mu nodded at his words. Based on the timing, those capable forces should have crossed the outer area of the ancient battlefield.

Fang Mu left a lot of traces without wasting time cleaning up after each fight.

But in Fang Mu’s mind, blatantly leaving traces is not necessarily a bad thing!

Shui Miao asked Shu Liangjun.

“Elder Shu, what would you feel if you found out somebody entered before you when you crossed the stone gate?”

Shui Miao blurted out when he heard this.

“I would feel anxious about someone outpacing me but also wonder if the opponent’s strength was strong enough to get ahead of me.”

Fang Mu nodded, then smiled at Shu Liangjun and said.

“Elder Shu, would you choose a road that has obviously been explored by others without knowing the map?”

Shu Liangjun laughed, looking at Fang Mu with some surprise and amusement.

What a little fox!

Fang Mu had thought of this!

No wonder he refused when Shu Liangjun suggested slowing down and cleaning up traces.

The interior of the entire ancient battlefield is like a maze with numerous forked paths.

If it were him, he would definitely not want to compete with other forces as soon as he entered the ancient battlefield.

It’s a situation of two dogs fighting for a bone and a third running away with it. If one doesn’t understand this principle, they wouldn’t be trusted by the organization to lead the exploration of this massive ancient battlefield.

Shu Liangjun silently lit a candle in his heart for those forces that crossed the stone gate in the second batch.

Not wanting to compete and not choosing this path, choosing other paths will only lead to traps and dead ends.

There will definitely be some small gains along the way, but compared to Fang Mu's gains, they are like sesame seeds compared to watermelons!

When the third batch of forces arrives and finds traces on all the paths, they might choose the correct path that Fang Mu has taken!

So many forces have been schemed by a young man, Shu Liangjun would not believe it if he didn't see it with his own eyes!

Qin Shao looked at the time.

"We are nearly forty minutes ahead of the second batch, there must have been intense conflict outside."

"With so many forces pouring in, there will definitely be surveillance between them."

"The third batch will arrive within five minutes, it seems we are ahead of the third batch by about thirty-five minutes."

"With such a time difference, it will be hard for the forces behind to catch up."

"Along the way, I attracted many undead to block the roads. These undead will surely cause great trouble to the following forces!"

As he spoke, Qin Shao removed his mask, revealing a charming pink glow in his eyes.

A large number of undead came from the entrances of the forked roads and dead ends around them, crowding this correct road.

A few undead are easy to clear, and the members of the forces can cooperate to kill the undead at the smallest cost.

But once a powerful undead swarms, they will immediately pounce on the living as soon as they smell a living scent.

These undead will immediately rush toward the living in order to tear them apart and eat fresh flesh!

The undead in this ancient battlefield have not tasted meat or blood for at least tens of millions of years.

On the road, he continued to reap Souls of Death, and Shu Liangjun helped Fang Mu collect some precious spiritual materials along the way.

At this time, Fang Mu had as many as fifteen Epoch relics in his hand, all of which were collected in the Purple Ice Crystal Ring after he obtained them.

Because Fang Mu also kept the Abdominal Territory Worm in his Purple Ice Crystal Ring, She Wan, Fang Mu's personal bodyguard, voluntarily became the assistant to Lu Xiaoyin when she could not perform her guard duties.

Fang Mu poured a large number of Life Elixirs into a large basin.

She Wan and Lu Xiaoyin were responsible for sorting the resources Fang Mu had put into his Purple Ice Crystal Ring while dealing with the Epoch relics that were tainted with Dirty Energy, Curses and Dead Qi, soaking them in the basin filled with Life Elixir.

She Wan and Lu Xiaoyin were under Fang Mu's control, they were truly Fang Mu's people.

Chapter 684: Yunque Hibiscus and Sun and Moon Jellyfish!\_3

In terms of the harvest, Fang Mu saw no need to hide it from the two.

If Fang Mu brought them along, they would also be able to know what Fang Mu had obtained!

As for using a barrel of Life Elixir to soak Epoch relics, Lu Xiaoyin was quite surprised.

However, She Wan could understand this.

She Wan had heard that when a Grandmaster Creator obtained Epoch relics, they would use the rare and valuable Grandmaster level life potion to temper the relics in order to quickly open the wooden box and discover what was inside.

While such a thing is hard to come by in the outside world, to a Grandmaster Creator, this was something they could produce themselves.

She Wan was a Weaving Grandmaster and hence to her, the notion that Grandmaster-level custom clothing was extremely precious, had never crossed her mind.

Fang Mu was certainly doing this under Qixing's instruction.

It seems that Fang Mu's master Qixing places great importance on this exploration of the ancient battlefield. Otherwise, he wouldn't have sent Fang Mu in person!

Very quickly, Fang Mu arrived at the next location related to spiritual matters.

The second location had a pool, the water in the pool was clear and transparent.

It was like groundwater that had seeped out from a water pit over a long period of time.

Upon careful observation, Fang Mu could faintly feel that there was an almost transparent thing slowly moving in the water pit.

This swimming method was not like that of a fish, but a way of pushing the water forward.

Fang Mu immediately used the Eye of Omniscience to investigate the pond.

Upon investigation, a row of data appeared before Fang Mu's eyes.

[Beast Name]: Sun and Moon Jellyfish

[Beast Species]: Tentacle Jellyfish family/Bowl Jellyfish genus

[Beast Level]: Silver (4/10)

[Beast Element]: Water System

[Beast Potential]: Silver

[Beast Quality]: Perfect Quality

Skills:

[Daylight Spirit Release]: In the presence of sunlight, each underwater undulation will emit a burst of spiritual energy,

[Moonlight Water Refining]: Refine the surrounding water area by absorbing moonlight, improve the purity of the water elemental energy in the environment.

Exclusive Traits:

[Rings of Reincarnation]: Every time a certain amount of solar and lunar rotation passes, as its lifespan is about to end, it separates a part of the new and reborn cavities in the body. These new-born cavities absorb water elemental energy and grow into new individuals in a short amount of time.

Evolutionary Path:

①:Day and Night Jellyfish, ②:Azure Wave Jellyfish, ③:Giant Voracious Jellyfish.

So this semi-transparent Guardian Beast is called the Sun and Moon Jellyfish!

It's a Guardian Beast from the Tentacle Jellyfish family/Bowl Jellyfish genus!

The Sun and Moon Jellyfish, just like the Yunque Hibiscus that Fang Mu had just seen, are both entities that span Epochs.

The Yunque Hibiscus spans Epochs thanks to the spring of the Plant Spring, while the Sun and Moon Jellyfish spans Epochs solely on its abilities.

Its exclusive trait, [Rings of Reincarnation], revealed to Fang Mu the lifespan of the Sun and Moon Jellyfish.

The Sun and Moon Jellyfish is an annual Guardian Beast, from its birth to death it doesn't get to experience a second year.

But it's this annual Guardian Beast that divides a part of its body cavity before its life ends.

Then this part of the cavity absorbs water elemental energy, and in a short amount of time grows into a new Sun and Moon Jellyfish!

It's this method that allows the Sun and Moon Jellyfish to continue to this day and become a Guardian Beast of spiritual inheritance.

To some extent, the Sun and Moon Jellyfish is pursuing longevity in its unique way, and has been successful so far.

It's much stronger than those in the Eternal Alchemy Association!

Fang Mu took a deep breath and widened his eyes, hoping to get a clear view of this miraculous creature in the water.

Shui Miao, Shu Liangjun, and Qin Shao all noticed the presence of the Sun and Moon Jellyfish, while Jin Ya saw nothing, blinking at Fang Mu confusedly.

The innate divine ability [Eye of Omniscience] of the Fool's Shadow, lets Fang Mu's visual ability far surpass those of normal people.

After observing the exclusive traits of the Sun and Moon Jellyfish, Fang Mu attentively looked at the two skills of the Sun and Moon Jellyfish.

The Sun and Moon Jellyfish is like a "Big Band-Aid" that can be used during the day and night, having different abilities in the morning and evening.

[Daylight Spirit Release] allows the Sun and Moon Jellyfish in the daytime to generate thin spiritual energy with every forward push of its tentacles when absorbing sunlight.

[Moonlight Water Refining] is when the Sun and Moon Jellyfish absorbs moonlight at night to refine the surrounding water area, improving the purity of water elemental energy in the water area.

Any living thing has inertia, none would want to work day and night.

But the Sun and Moon Jellyfish happens to have the trait of a "workaholic".

Working from sunrise to sunset and then from sunset to sunrise.

Having only one year lifespan, it couldn't possibly die from overwork, right!?

But the Sun and Moon Jellyfish has no choice.

If it doesn't use [Moonlight Water Refining] at night to increase the purity of the water elemental energy around it,

When the Sun and Moon Jellyfish separates its new-born cavity, there will not be enough pure water elemental energy for the new-born cavity to absorb, so it can grow into a new Sun and Moon Jellyfish!

In such a case, the rotation formed by the exclusive trait [Rings of Reincarnation] will fail!

When Fang Mu cultivates the Sun and Moon Jellyfish, he will only let the Sun and Moon Jellyfish use the skill [Daylight Spirit Release].

Fang Mu can use elixirs to supplement the water elemental energy of the Sun and Moon Jellyfish.

If the Sun and Moon Jellyfish really can't stay idle, Fang Mu can find some Guardian Beasts that can simulate a daytime environment.

So that the Sun and Moon Jellyfish can use the skill [Daylight Spirit Release] 24 hours a day, producing as much spiritual energy for Fang Mu as possible.

The Sun and Moon Jellyfish has three evolutionary paths: Day and Night Jellyfish, Azure Wave Jellyfish, and Giant Voracious Jellyfish.

The Azure Wave Jellyfish and the Giant Voracious Jellyfish are one Guardian Beast that uses water elemental energy to fight, and another is a Guardian Beast that relies on the devouring of water elements or other things to enlarge its physical body and fight through its physical body.

These two evolution directions are likely to cause the Sun and Moon Jellyfish to lose its ability to produce spiritual energy.

So among these three best evolution paths, Fang Mu can only choose the Day and Night Jellyfish as the evolution direction of the Sun and Moon Jellyfish.

But Fang Mu feels that not evolving the Sun and Moon Jellyfish might be better for extracting spiritual energy than evolving it into the Day and Night Jellyfish.

Chapter 685: Cold Drawing Master Fish!\_1

The Sun and Moon Jellyfish enhance their purity of water elemental energy by absorbing sunlight and releasing spiritual energy, then absorbing moonlight.

When they evolve into Day and Night Jellyfish, they produce spiritual energy during the day and enhance the purity of water elemental energy in their surroundings at night.

This path of evolution seems to upgrade the Sun and Moon Jellyfish, so they no longer require the sun and moon.

They can still function on cloudy days.

However, Fang Mu only wants the Sun and Moon Jellyfish to release spiritual energy, which does not align with his purpose.

To achieve his goal, Fang Mu has to compromise the Sun and Moon Jellyfish, forbidding them from evolving in their bloodlines for a lifetime!

Shui Miao looked at the pool for a while, then unsurely spoke to Fang Mu.

“The creature in this pool is most likely a guardian beast called the Sun and Moon Jellyfish. It’s not the first time this type of beast has appeared.”

“The Ten-thousand Nations Federation has Sun and Moon Jellyfish, and the Witch School seems to have two of them!”

“However, Sun and Moon Jellyfish can’t breed the next generation artificially. To enable the jellyfish to breed artificially, the Witch School intentionally sought help from a Grandmaster Creator for research.”

“As a result, the Sun and Moon Jellyfish were killed in the research by that Grandmaster Creator, and its body was given to the Witch School.”

“The Witch School had to suffer this loss silently, and they were reluctant to fall out with this Grandmaster Creator who had a good relationship with them.”

Hearing this, Fang Mu’s mouth twitched slightly.

Since Sun and Moon Jellyfish could survive to this day and be acquired by humans, their exclusive feature should be the [Rings of Reincarnation] in every case.

[Rings of Reincarnation] enables Sun and Moon Jellyfish to breed their offspring for eternal life.

But it was killed by forced study, resulting in the death of the Sun and Moon Jellyfish.

Fang Mu carefully scooped the Sun and Moon Jellyfish out with a ceramic plate.

After leaving this large ancient battlefield, Fang Mu plans to remodel the abdominal space of the Abdominal Territory Worm.

He will create a stream in the abdominal space of the Abdominal Territory Worm from the spring eye of the Plant Spring, and then let the Sun and Moon Jellyfish live in the Spiritual Spring.

He will plant the Yunque Hibiscus on the edge of the Spiritual Spring so that the root whisker of the Yunque Hibiscus can directly absorb the Plant Spring.

The total area of the abdominal space of the Abdominal Territory Worm has reached two thousand square meters, which is enough for Fang Mu to make great changes.

Fang Mu feels like he's returned to his grandfather's house in his previous life, arranging the yard in the countryside.

Seeing Fang Mu put away the Sun and Moon Jellyfish, Shui Miao continued speaking.

"Even if the rank of the Sun and Moon Jellyfish increases, the spiritual energy produced is still very sparse."

"Just like the beautiful and useless Spirit Absorbing Goldfish, its value for cultivation is not significant!"

While speaking, Shui Miao sounded a little regretful.

If only they could find some high-quality guardian beasts that produce spiritual energy during this exploration of the large ancient battlefield!

"Those beasts are worth studying by a Grandmaster Creator!

Maybe Qixing can figure out something, then I can trade some spiritual energy from Qixing based on my relationship with Fang Mu!"

All the current Grandmaster Creators want to study this energy of spiritual energy, but they desire to do so without something to study.

In the entire human world, there is not much insight into the use of spiritual energy.

Facing the hard-to-get spiritual energy, no power is willing to use it to cultivate guardian beasts.

Fang Mu heard the regret in Shui Miao's words, which showed that Shui Miao genuinely cares about him!

However, Fang Mu did not regret that the spiritual energy produced by the Sun and Moon Jellyfish was sparse.

Because in Fang Mu's view, the real source of spiritual energy has always been the diamond-ranked Abdominal Territory Worm, not the Sun and Moon Jellyfish and Yunque Hibiscus.

The reason Fang Mu decided to cultivate the Sun and Moon Jellyfish and Yunque Hibiscus is that these two guardian beasts span epochs, and they have great research value.

After collecting the Sun and Moon Jellyfish, Fang Mu did not waste time and continued on his journey quickly.

While flipping through the ancient books in his hand, Fang Mu found that the location of an Epoch relic was at a fork in the road from a place where things related to spiritual energy were stored.

Between these two forks, Fang Mu can only choose one.

With many powers competing on the ancient battlefield, Fang Mu could not split his current forces.

Fang Mu already has more than twenty Epoch relics on hand, so compared to Epoch relics, the things related to spiritual energy are definitely more precious.

Moreover, there are always powerful undead guarding the surroundings of the Epoch relics, and fighting with them will waste more time.

After understanding the interest relationship, Fang Mu decisively led the way to the next storage place for things related to spiritual energy.

When they were about three or four kilometers away from this storage place, Fang Mu sensitively felt the temperature dropping sharply.

Qin Shao released his aura, covering Fang Mu and Jin Ya.

After advancing a kilometer, Qin Shao said,

“The temperature has dropped by thirty-seven degrees in a kilometer. Although the temperature drops slower as it gets closer to this creature, it can drop by about eighty degrees in total.”

“If this guardian beast’s strength isn’t at the eighth rank, it shows that the talent of this guardian beast is exceptional!”

Shu Liangjun said lightly.

“There are faint psychic waves in the air, if I’m not mistaken, this guardian beast should be a dual-system guardian beast of ice and psychic!”

Jin Ya asked curiously after hearing this.

“Don’t the undead also use Ice Elemental Energy!?”

Chapter 686: Cold Drawing Master Fish!\_2

“Why are you certain that this is a Guardian Beast and not an undead!?”

Qin Shao gently touched Jin Ya’s head as he spoke.

“If Shui Miao, as an undead creature, were to use her skill to draw on the ice elemental energy, it would be mixed with a trace of dead qi.”

“But now there is not a single trace of dead qi in the ice elemental energy.”

Fang Mu secretly rubbed his hands together. Could it be that the ranking of this beast that produces spiritual energy had reached sequential?

If that's the case, the production speed of the spiritual energy must be quite fast!

Icy mist diffused into the air, and with a wave of Shui Miao's folding fan...

The icy mist immediately transformed into falling ice rain.

Just as the ice rain touched the ground, it immediately splattered into ice flowers.

Before the splattered bits could fall, they froze again!

It happened to be right when Fang Mu and his group were passing by, providing a slip-resistant function.

In the distance, there was a frozen lake, with the ice surface blocking the vitality beneath, keeping the nearby undead from making any moves on the lake.

Qin Shao cleared the undead around the lake first, then took out a pendant from his spatial equipment. The pendant was inlaid with a crimson crystal, with a four-winged angel embracing it on the outside.

The moment Qin Shao injected energy into the pendant, the wings of the four-winged angel flared up in crimson flames.

The pendant was thrown onto the lake, and instantly, the entire lake's water melted.

If Qin Shao hadn't known that a Guardian Beast that could produce spiritual energy was hidden within this lake, he could have instantly boiled the lake water or even had the pendant evaporate it entirely.

The moment the lake water began to melt, a thin ice plate like a cicada's wing shot towards Qin Shao.

Just as Qin Shao was about to summon a small snake by lifting his sleeve, Shui Miao rushed to stop his action.

The JuYang Giant Clam in Fang Mu's hand sprayed out a gentle stream of water that caught the ice plate.

The force stopped the ice plate's forward motion.

The moment the water stream from the JuYang Giant Clam tilted the ice plate, for an instant, Fang Mu thought he was immersed in splendor.

It was actually a fish!

For a while, Fang Mu didn't know whether to exclaim that this fish was too thin or to marvel at the beauty of the patterns on the fish's scales.

The scales of this fish were actually etched with rippling glaciers, piled layer upon layer like the magnificent polar landscapes Fang Mu had seen in his previous life.

Now, Fang Mu understood that the drop in temperature in this environment was mostly related to this fish.

When Fang Mu faced an enemy, he was afraid of attracting the enemy's attention.

When he knows that the enemy's Guardian Beast's power surpasses the diamond rank, he won't probe the enemy's Guardian Beast.

But when facing a trapped Guardian Beast, Fang Mu didn't care whether this beast noticed him or not.

[Beast Name]: Linghan Painting Master Fish

[Beast Species]: Fairy Fish Family/Panli Fish Genus

[Beast Level]: Diamond Rank (6/10)

[Beast Element]: Ice Type/Spirit Series

[Beast Potential]: Diamond

[Beast Quality]: Legendary

Skills:

[Ice Scale Painting]: Sketches patterns of solid ice on its scales, releasing the power of extreme cold to protect its body through the painted ice on its scales, effectively blocking physical and elemental damage.

[Ice Plate Slash]: The power of extreme cold condenses on the body's surface, freezing the body and launching a slash at the target. During the slash, the patterns on the scales come to life.

[Extreme Ice Brewing Water]: Can absorb chill in an extremely cold environment, converting the chill into fish oil through its glands, which contains relatively pure water elemental energy.

[Colorful Scale Healing]: Nourishes the target's spiritual power by changing the color of its scales, healing the spiritual damage suffered by the target.

[Scale Tail Fairyland]: Unleashes the patterns on the scales and tail to form a domain. Within the domain, the offensive power of ice attribute beasts is enhanced, and water attribute beasts receive protection.

Exclusive Traits:

[Worry-free Ice Sealing]: Uses the power of extreme cold to freeze the target. During the freezing process, the target's lifespan and physical states are halted in a relatively stationary state.

[Spirit Possession]: When forming a contract with other creatures, the pressure of the contract is fully borne by its own spiritual power, causing no impact on the targeted creature of the contract.

[Ice-Water Fusion]: Uses its own bloodline to temper a single water attribute beast, with a certain probability that the tempered beast will be transformed into a creature with both water and ice attributes. However, it cannot coexist with a creature that harbors dragon race aura. When coexisting with a life form with a dragon race aura, it will have a severe stress response, making it unable to control its own energy.

Evolutionary Path:

①: Linghan Painting Fairy Fish, ②: Boundless Ice-sealed Fish, ③: Cold Arrow Netspan Fish.

An inspection revealed a major surprise to Fang Mu.

He hadn't expected the instigator of the cold environment to be a sequential Guardian Beast!

Its ranking was only Diamond Rank Six, but its quality had actually reached legendary quality!

What Fang Mu primarily noticed was the exclusive trait "Spirit Possession" that this Linghan Painting Master Fish had acquired upon upgrading to the epic quality.

"Spirit Possession" allows this Linghan Painting Master Fish, which has already reached diamond rank, to form a contract with humans without occupying the Beast Master's spiritual power.

The contract's spiritual pressure is all borne by the Linghan Painting Master Fish.

This equates to scoring a Diamond Ranked Guardian Beast without spending any spiritual power!

Fang Mu has the Innate Divine Ability “Covenant Blood Essence” belonging to the Royal Beast Blood Abundance, and he doesn’t have to worry about contracted beasts occupying his spiritual power.

Rather than high ranked Guardian Beasts, Fang Mu prefers contracting with lower-ranked ones, then enhancing their power in the most optimal way.

Chapter 687: Cold Drawing Master Fish!\_3

Just on account of this, the Cold Drawing Master Fish did not quite meet Fang Mu’s contractual requirements.

The unique attribute “Ice-Water Fusion” that the Cold Drawing Master Fish gained upon reaching legendary quality allows it to temper water attribute beasts with its bloodline.

Transforming water attribute beasts into dual ice and water attribute beings.

This is a divine skill for masters who have contracted beasts with water attributes!

But alas, the Cold Drawing Master Fish could not coexist with Guardian Beasts possessing dragon’s aura, while the Subduing Dragon Nightmare Tiger contracted by Fang Mu carried the primary dragon’s aura.

It’s feared that as soon as it is brought before the Cold Drawing Master Fish, it would likely cause an uncontrolled energy reaction in the Cold Drawing Master Fish due to the stress response.

A diamond-ranked Beast losing energy control would be terrifying for Fang Mu at his current stage!

It could cause extremely serious damage to both Fang Mu and the Guardian Beast.

Fang Mu suddenly thought that Shui Miao appears to be compatible with water-associated fish beasts, and the Cold Drawing Master Fish’s “Scale Tail Fairyland” ability seems to be a territorial ability.

It can amplify both ice and water attribute beasts within its territory.

The skill “Extreme Ice Brewing Water” is a resource-producing ability that can produce fish oil containing water elemental energy under extremely cold conditions.

The stronger the Cold Drawing Master Fish, the purer the water elemental energy contained in the fish oil will be.

Shui Miao 淼 is a significant consumer of water elemental energy. If he were to contract the Cold Drawing Master Fish, he would be able to continuously receive relatively pure water elemental energy for his Guardian Beast to consume on its own in the future.

The platinum-grade skill “Colorful Scale Healing” can also heal the wounds inflicted by Mirror God.

The Cold Drawing Master Fish is a versatile all-rounder Guardian Beast.

The skill “Ice Scale Painting” is the source of the numerous glaciers on the scales of the Cold Drawing Master Fish.

This is a dual-defense ability that can resist both physical and elemental damage.

The tactic that the Cold Drawing Master Fish used to attack Qin Shao just now was the silver-grade skill “Ice Plate Cutting”.

After reviewing the data on the Cold Drawing Master Fish, Fang Mu confirmed in his heart that the Cold Drawing Master Fish is not the kind of beast that can produce spiritual energy in this place.

The beast that can produce spiritual energy in this place is something else!

The fact that that Guardian Beast could survive across epochs, might mostly be due to the unique attribute “Worry-free Freezing” of the Cold Drawing Master Fish.

“Worry-free Freezing” freezes life instantly with the power of extreme cold. During the freezing process, the body’s condition and lifespan will be in a relatively static state.

The Cold Drawing Master Fish must have frozen itself previously, otherwise, it would not have survived until now!

During Fang Mu’s examination of the Cold Drawing Master Fish, he could keenly sense that Shui Miao 水淼’s breathing had quickened.

Being a Forging Spirit Grandmaster also requires an understanding of relevant knowledge.

Shui Miao 水淼 discerned the extraordinary nature of the Cold Drawing Master Fish, and must have also discovered how well-suited the Cold Drawing Master Fish was for him.

However, considering the agreement before the exploration that all discovered items would belong to him, he could not ask for it outright.

Under normal circumstances, some tug of war would be necessary to make others accept his request.

But Fang Mu chose not to play this tug of war with Shui Miao 水淼.

Shui Miao 水淼 had treated him sincerely, and for him to pick a fight with Shui Miao 水淼 over this would simply not do!

Shui Miao 水淼, Qin Shao, Shu Liangjun have all lived for over a hundred years and have a deep understanding of the ways of the world.

Even Jin Ya, a noble lady from an ancient legacy family, has clear thoughts.

If he were to try to take advantage of Shui Miao<sub>水妖</sub>, Shui Miao<sub>水妖</sub> may not see his true intentions clearly due to being in the thick of things.

However, Shu Liangjun and Qin Shao would be able to see it crystal clear.

His advantage-taking would be equivalent to pushing Qin Shao and Shu Liangjun away, telling them that he is not a person worthy of their friendship.

Because befriending him would not garner them sincere reciprocation.

Fang Mu didn't want this outcome at all.

Moreover, Fang Mu is also a very genuine person; he always reciprocates those who treat him well!

Fang Mu directly said to Shui Miao<sub>水妖</sub>.

“Ah Shui, this fish beast that has survived across epochs is very suitable for you.”

“Its skills are comprehensive. Forming a contract with it does not require consuming your spiritual power and can produce elemental resources for you.”

“It can also make the attributes of your beasts undergo change.”

“You keep it for contracting!”

Fang Mu could clearly feel Shui Miao<sub>水妖</sub> pausing in surprise at his words, but Fang Mu didn't give Shui Miao<sub>水妖</sub> a chance to react.

Instead, he came to the small lake carrying the JuYang Giant Clam.

The lake water was crystal clear, casting a faint shimmer.

Looking up, Fang Mu saw a plump goldfish. It swam towards Fang Mu without fear, probably sensing someone standing by the lake.

This reminded Fang Mu of the fat goldfish raised in park ponds.

Those fat goldfish would actively beg for food from people!

Fang Mu used the innate divine skill “Eye of Omniscience” of the Fool’s Shadow to investigate this uninhibited, colorful fat goldfish.

Beast Name: Five Blessings Orchid Longevity (Absorbing Spirit Goldfish)

[Beast Species]: Carp Subfamily/Soft Scaled Fish Suborder

[Beast Level]: Gold Stage (7/10)

[Beast Element]: Water

[Beast Potential]: Platinum

[Beast Quality]: Legendary

Skills:

“Draw Spirit”: Attracts spiritual energy to the vicinity, thereby enhancing the concentration of spiritual energy in the surrounding area.

“Liquid Spirit Compression”: Compresses spiritual energy into liquid form and swallows the liquefied spiritual energy. It can purify liquid spirit energy through its body.

“Fish Heal”: Administers blessings to fish creatures, healing potential ailments and enhancing the happiness of the fish creatures.

Exclusive Trait:

“Strong Gill Body”: Strengthened gills allow for faster gathering of spiritual energy and body optimization.

“Ultimate Affinity with Water”: In the presence of Pure Water Elemental Energy, it can use pure water elemental energy as a source of energy for maintaining its life and enhancing its strength. In an environment with high purity water elemental energy, it can speed up the recovery of its own injuries.

“Blessing in Streams and Lakes”: Living in a small body of water, its presence makes other aquatic beasts in the body of water comfortable, enhancing the vitality and growth rate of other water-elemental beasts.

Chapter 688: The Truly Beautiful Waste!\_1

Upon closer examination, Fang Mu found that this multicolored fat goldfish was known as the Five Blessings Orchid Longevity, a type of Spirit Absorbing Goldfish.

Just now, Shui Miao had just disdainfully dismissed the Spirit Absorbing Goldfish as a “beautiful piece of garbage”.

Normally, Spirit Absorbing Goldfish is a type of Guardian Beast that can release Spiritual Energy, but this particular Five Blessings Orchid Longevity Goldfish does not possess the ability to emit Spiritual Energy.

Instead, it gathers Spiritual Energy and enhances its concentration.

This ability somehow surprised Fang Mu.

But Fang Mu wasn't disappointed, instead, he felt quite delighted.

After all, he wasn't a traditional Creator, and didn't possess the ability to mix Spiritual Liquid.

He could prepare pure Life Energy and Elemental Energy, but had to consume garbage with this energy to purify it.

Spiritual Energy, which is pervasive in the air, cannot be classified as garbage.

After all, no special impurities can be found within diluted Spiritual Energy.

This Five Blessings Orchid Longevity Absorbing Spirit Goldfish could enhance the density of its own Spiritual Energy through its skill [Draw Spirit].

It allowed Fang Mu to acquire an environment with a high concentration of Spiritual Energy.

Moreover, the skill [Liquid Spirit Compression] allowed the Five Blessings Orchid Longevity Absorbing Spirit Goldfish to compress Spiritual Energy into liquid form and purify the liquid Spiritual Energy through its body.

If there were other Guardian Beasts in this world who had abilities similar to those of the Five Blessings Orchid Longevity.

Then these Guardian Beasts capable of purifying Life Energy or Elemental Energy would most certainly be cherished by all major Guardian Beast forces.

The Abdominal Territory Worm became stronger, and the Spiritual Energy it produced became increasingly plentiful.

What Fang Mu needed most was this Five Blessings Orchid Longevity, a Guardian Beast capable of purifying Spiritual Energy.

Originally, Fang Mu thought that all the marked points contained Guardian Beasts capable of generating Spiritual Energy, but now he realized it was not the case.

Somehow, Fang Mu felt increasingly that this large ancient battlefield was created for the purpose of leaving behind a legacy.

In the process of exploration, Fang Mu inherited the method to prepare relatively pure Spiritual Energy.

The skill [Fish Heal] made the Five Blessings Orchid Longevity Absorbing Spirit Goldfish worthy of its name "Five Blessings". Just this skill alone could classify the Five Blessings Orchid Longevity Absorbing Spirit Goldfish as auspicious.

It bestows blessings on other Fish Beasts, enhancing their sense of happiness.

This allows even the most pampered Fish Beasts kept by the Five Blessings Orchid Longevity's side to live happily and without illness.

Afterward, Fang Mu will keep the Five Blessings Orchid Longevity in Plant Spring and need not worry about the health status of other Fish Beasts in Plant Spring.

The Five Blessings Orchid Longevity's exclusive attribute [Strong Gill Body] made it breathe faster in water, increasing its consolidation speed of Spiritual Energy.

The robustness of its gill body made the Five Blessings Orchid Longevity different from the short-tailed traditional Orchid Longevity Goldfish.

The tail of the Five Blessings Orchid Longevity Goldfish is very large, looking like a swaying multicolored lotus in the water.

The enhancement of its breathing ability not only enlarged the tail of the Five Blessings Orchid Longevity but also its body significantly larger compared to ordinary Spirit Absorbing Goldfish.

The role of the Five Blessings Orchid Longevity is to gather Spiritual Energy, so its exclusive attribute [Strong Gill Body] enhances its strategic significance.

An ability that was likely useless on another Guardian Beast might produce amazing results when implemented on another one.

Thus, there are no useless exclusive attributes, it all depends on whether the attribute is compatible with the Guardian Beast.

The second exclusive attribute of the Five Blessings Orchid Longevity is called [Ultimate Affinity with Water].

Nourished by a pure water Elemental Energy, the Five Blessings Orchid Longevity can utilize pure water Elemental Energy in place of Spiritual Energy to sustain life and enhance its strength.

This is unquestionably good news for Fang Mu.

The Spirit Absorbing Goldfish naturally absorbs Spiritual Energy to enhance its power at a slow pace, and Fang Mu does not have a large amount of Spiritual Energy to feed the Five Blessings Orchid Longevity.

But it's a different story if the Five Blessings Orchid Longevity Absorbing Spirit Goldfish can substitute with Water Elemental Energy.

Fang Mu has more than enough Water Elemental Energy in a pure form.

As for the ability to accelerate physical recovery in a high purity water Elemental environment, Fang Mu saw no use for it.

Firstly, Fang Mu would keep the Five Blessings Orchid Longevity Absorbing Spirit Goldfish in Plant Spring, sparing it from any harm.

As a result, the Five Blessings Orchid Longevity wouldn't have any opportunity to recover from injuries.

If the ability [Fish Heal] allows the Five Blessings Orchid Longevity to be defined as auspicious, then the exclusive attribute [Blessing in Streams and Lakes] that the Five Blessings Orchid Longevity gained when upgrading to Legendary Quality can elevate it to the realm of High Grade Auspicious.

Because of the exclusive attribute [Blessing in Streams and Lakes], the water area where the Five Blessings Orchid Longevity inhabits would become fertile land.

All other Water System Beasts living in this water area would be at ease and have their vitality and growth rate heightened.

For resource-producing Guardian Beasts, enhancing their vitality is equivalent to enhancing the yield of resources.

Increasing the growth rate enables the Guardian Beasts to quickly increase their rank and quality.

Fang Mu plans to later keep the Ten Longevity Carp and the Falling Sakura Whirl Carp in the Plant Spring, staying by the side of the Five Blessings Orchid Longevity Absorbing Spirit Goldfish.

As for the Origin Blood Wad Carp, it is most suitable to remain in the Under the Blood of Abundance's blood pool.

The Ghost Fish Princess who is being nurtured into the Undead Species Guardian Beast should likewise stay alongside Yan Yubanruo.

While the Ghost Fish Princess was bred from the All-Kinds Carp, Fang Mu felt that she could no longer be classified as a Fish Beast now.

Usually, when it came to the direction of a Guardian Beast's evolution, Fang Mu never hesitated or fretted.

Chapter 689: The Truly Beautiful Waste!\_2

However, right now, Fang Mu was pondering over the evolutionary direction of the Five Blessings Orchid Longevity.

The third evolution direction of the Five Blessings Orchid Longevity is Pure Water Orchid Longevity.

No one can purify water better than the Spirit Absorbing Goldfish, and Fang Mu does not need a high-quality water purifier.

So, he directly eliminated the third evolution direction.

Fang Mu is greatly interested in both the first evolution direction, Fudian Lanshou, and the second evolution direction, Ling Neng Lanshou!

The evolutionary path of Fudian Lanshou enhances the Five Blessings Orchid Longevity's ability to gather spiritual energy, transforming its surrounding environment into a blessing field.

This evolution direction will inevitably enhance the skills of the Five Blessings Orchid Longevity Spirit Absorbing Goldfish such as "Draw Spirit", "Fish Heal", and its exclusive characteristic "Blessing in Streams and Lakes".

However, there is a high probability that the evolutionary path of Ling Neng Lanshou will allow the Five Blessings Orchid Longevity to generate spiritual energy after evolution.

It will become a producer of spiritual energy resources.

This ability is also very attractive to Fang Mu.

Finally, Fang Mu considered the exclusive characteristic “Blessing in Streams and Lakes”, which could enhance the growth speed and vitality of other Fish Beasts, and the Abdominal Territory Worm could produce spiritual energy.

Ultimately, Fang Mu decisively chose the evolution path of Fudian Lanshou.

While Fang Mu was observing the Five Blessings Orchid Longevity, the Five Blessings Orchid Longevity Absorbing Spirit Goldfish had already swam to the edge of the lake.

It quickly opened its mouth to Fang Mu, making a light “plop” sound on the water surface.

One could see that the Five Blessings Orchid Longevity Absorbing Spirit Goldfish, which had been continuously frozen by the Cold Drawing Master Fish through the exclusive characteristic “Worry-free Freezing,” was most likely famished!

Although goldfish have a very short memory, repeated short-term memories can leave a lasting impression in the mind of a goldfish.

It seems that the previous owner of this Five Blessings Orchid Longevity Absorbing Spirit Goldfish must have been very good to it!

If not so, the Five Blessings Orchid Longevity wouldn’t dare to come directly to the feet of humans without any fear.

Since the Five Blessings Orchid Longevity likes to absorb pure water elemental energy, Fang Mu simply took out a bottle of Water Elemental Potion, squatted down, and poured it near the mouth of the Five Blessings Orchid Longevity Absorbing Spirit Goldfish.

The pure water elemental energy entered the water, and the Five Blessings Orchid Longevity Absorbing Spirit Goldfish stretched its lotus-like tail out of the lake and splashed water.

Then, it cheerfully flexed its gills, absorbing the water elemental energy into its body.

Because it was not solid food, there was no need to worry about the stomach condition of the Five Blessings Orchid Longevity.

The Five Blessings Orchid Longevity Absorbing Spirit Goldfish, which hadn't had food for a long time, must have had its stomach in a terrible state!

This water elemental energy would nourish the stomach of the Five Blessings Orchid Longevity Absorbing Spirit Goldfish.

After being nourished for a while, the Five Blessings Orchid Longevity Absorbing Spirit Goldfish could eat solid food without worrying about overloading its stomach!

It seemed as if it was expressing its gratitude to Fang Mu, the Five Blessings Orchid Longevity Absorbing Spirit Goldfish swam cheerfully by Fang Mu's hand, nibbling on his fingers while absorbing the water elemental energy.

The nibbling caused a tickling sensation on Fang Mu's fingertips.

In this large artificial lake, the Five Blessings Orchid Longevity was so relaxed, suggesting that there were no other living creatures around.

Otherwise, other aquatic creatures could not resist the lure of 90% pure water elemental energy and would have rushed to compete with the Five Blessings Orchid Longevity!

In his previous life, Fang Mu had kept a tank of goldfish, which he had bought from a morning stall for three yuan each, four for ten yuan.

Fang Mu had dry rhinitis, so needed a certain level of humidity at home.

Fang Mu's father had specially made a two-and-a-half-meter fish tank for him.

With a tank so large, it was impossible to keep just a few fish, so Fang Mu bought all the goldfish from the fish vendor at the morning market, totaling fifty-five!

The woman didn't expect to have such a successful day at the stall, and only charged Fang Mu one hundred and twenty yuan, even giving him the water basin.

Fang Mu cared for these stall fish regardless of the fact they were discarded by fish farms.

As long as a life entered Fang Mu's hands through his choice, he would take responsibility for it.

Of the more than fifty goldfish, only six died during their care.

At first, more than fifty 3-5cm small goldfish placed in a 2.5-meter fish tank seemed sparse.

But with Fang Mu's good care and frequent feeding, these small 3-5cm goldfish grew into 16-17cm big guys in a year!

In order to reduce the density in the fish tank, Fang Mu had his father make another two-meter fish tank, which was placed side by side at home.

He put those gossiping goldfish together in one tank.

Only when a person feeds goldfish for a long time can they become friendly towards humans.

Otherwise, the goldfish would be frightened and run away when a person approached.

Fang Mu didn't want to give away any of the goldfish he raised at that time, and he didn't know why the former owner of the Five Blessings Orchid Longevity would leave it here!

Fang Mu lifted up the Five Blessings Orchid Longevity with his hand and incorporated it into his Purple Ice Crystal Ring.

She Wan and Lu Xiaoyin were preparing to take over the Five Blessings Orchid Longevity that was put into the Purple Ice Crystal Ring and place it in the Plant Spring.

However, the Five Blessings Orchid Longevity suddenly started to go wild, thrashing its tail and fins quickly.

At first, She Wan and Lu Xiaoyin just thought that the Five Blessings Orchid Longevity Absorbing Spirit Goldfish felt uncomfortable because it had switched environments, which was why it was acting this way.

But even after putting the Five Blessings Orchid Longevity in the Plant Spring, it still behaved this way.

More than once, it rammed against the stream course that She Wan and Lu Xiaoyin had just repaired, causing its scales to fall off.

She Wan hurriedly took out a bottle of Water Elemental Potion, trying to calm the Five Blessings Orchid Longevity down with it.

Chapter 690: The Truly Beautiful Waste!\_3

Unexpectedly, even after the Water Elemental Potion had been poured into the Plant Spring, Wufu Lancun remained in a state of frenzy.

Fearing that any mishap might injure or kill Wufu Lancun, She Wan and Lu Xiaoyin hastily informed Fang Mu.

A thought crossed Fang Mu's mind upon receiving the news.

Wufu Lancun's exclusive trait [Extreme Affinity with Water] must have played a role in the rapid healing of its wounds.

Isn't that exactly what's needed right now!?

While it was still perfectly fine when he held it in his hand earlier, why did Wufu Lancun suddenly start acting as if it had gone berserk after being placed in the Purple Ice Crystal Ring?

Hurriedly, Fang Mu took Wufu Lancun out of the ring.

Once in Fang Mu's palm, Wufu Lancun leapt straight back into the lake and swam to the center, repeatedly looking back at Fang Mu while fluttering its lotus-like tail.

It clearly wanted Fang Mu to follow it.

Holding the JuYang Giant Clam, Fang Mu summoned the Rainy Doll.

Instead of jumping directly into the lake, Fang Mu allowed the Rainy Doll to dissolve into the water.

Using the Rainy Doll's perspective, he followed Wufu Lancun to explore.

He wanted to see what the hell Wufu Lancun was up to!

Thanks to the Rainy Doll's viewpoint, Fang Mu quickly noticed an extraordinarily beautiful algae under Wufu Lancun.

The algae's leaves were a pale milky blue.

The blue color was found mainly at the edges of each leaf, while the body of the leaf was predominantly white, and each leaf resembled a gown.

These abundant leaves looked like a blooming skirt underwater.

But evidently, the focal point wasn't this wedding-dress-like water weed.

Wufu Lancun burrowed into the algae, indicating that what it was really interested in was concealed by these seaweed leaves.

Following closely behind Wufu Lancun with the Rainy Doll, Fang Mu abruptly noticed a cluster of yellow fish eggs at the base of the weed.

These eggs had also been frozen beforehand.

Now that the exclusive trait [Worry-free Ice Sealing] of the Cold Drawing Master Fish had been removed, these fish eggs were all in a lively state.

Wufu Lancun didn't consume all the water's Elemental Energy it had ingested but instead pulled water laden with pure water elemental energy near the fish eggs and expelled it, allowing the eggs to absorb it.

However, these fish eggs did not seem to particularly fancy the pure water elemental energy.

Compared to pure water elemental energy, they seemed to have a stronger craving for spiritual energy!

These fish eggs were likely to be those of the Spirit Absorbing Goldfish.

Looking at the number of eggs, if all of them were to hatch, Fang Mu could easily get two to three hundred Spirit Absorbing Goldfish.

Although Fang Mu was unsure if these eggs were laid by Wufu Lancun, only the eggs of its own kind could make Wufu Lancun so dedicated!

Fang Mu hastily commanded the Rainy Doll to manipulate the water to gently lift these fish eggs and transfer them toward the shore.

This tall wedding-dress-alike Water Algae was certainly a creature from another epoch.

Fang Mu also had the Rainy Doll lift the lake bed so that the roots of this algae remained intact, and then brought the plant over.

While Wufu Lancun could sense the presence of the Rainy Doll, its action of moving the fish eggs enraged Wufu Lancun.

Wufu Lancun relentlessly chased after the Rainy Doll.

Despite Wufu Lancun reaching the Gold Rank, it possessed no attack capabilities and was a production type Guardian Beast.

It was incapable of imposing any restriction on the Rainy Doll!

Fang Mu reached into the water, scooping Wufu Lancun and the fish eggs held by the Rainy Doll into the Purple Ice Crystal Ring.

After She Wan and Lu Xiaoyin arranged the fish eggs and Wufu Lancun in the Plant Spring, Wufu Lancun finally calmed down.

It began absorbing the Water Elemental Potion that She Wan had poured into the water, repairing the injuries on its scales and fins.

Using the Eye of Omniscience, Fang Mu gazed at the wedding-dress-like algae. The name 'Fish Tail Veil Algae' popped up before his eyes.

But evidently, the Fish Tail Veil Algae could not be considered a Guardian Beast.

Compared to the Spirit Absorbing Goldfish, this Fish Tail Veil Algae was an utterly beautiful waste!

However, for the layout of the Plant Spring, a beautiful waste like the Fish Tail Veil Algae was simply irresistible!

After collecting the Fish Tail Veil Algae, She Wan carefully planted it in the stream bed dug for the Plant Spring.

The stream was one and a half meters deep, just enough to cover the Fish Tail Veil Algae.

Upon seeing the Fish Tail Veil Algae, Wufu Lancun immediately moved the fish eggs to the center of the algae.

It continued to use the recently absorbed water elemental energy to nurture these fish eggs.

Watching this display, Lu Xiaoyin couldn't help but express her admiration.

"The maternal love this goldfish is showing is deeper than that of any terrestrial creature!"

Upon hearing this, She Wan picked up Wufu Lancun, gently groped its tail, and put Wufu Lancun back into the Plant Spring.

Her lips twitching, she said,

"This is a male fish. It's a dad-mom!"

After speaking, She Wan went to help Fang Mu organize his Soul of Death, leaving Lu Xiaoyin alone beside the Plant Spring, feeling at a loss.

The sensation of continuous harvests in a large-scale ancient battlefield was simply exhilarating!

Fang Mu discovered that the deeper he ventured, the richer his harvests became!

Just as he turned around, he saw Shui Miao looking at him with awe.

As a Forging Spirit Grandmaster, Shui Miao knew the value of a Cold Drawing Master Fish.

A diamond-ranked legendary quality Guardian Beast that transcends epochs, with highly versatile abilities and no spiritual power required for forming contracts.

It was an irresistible benefit for anyone who bonded with fish Guardian Beasts!

Although he was reluctant to ask Fang Mu for it, Fang Mu had directly handed it over to him.

This Cold Drawing Master Fish was an offer Shui Miao simply couldn't refuse.

Moreover, the favor he owed Fang Mu made Shui Miao unsure of how he could ever repay him!

Upon recruiting Jiang Weng, Fang Mu no longer needed Shui Miao's abilities as a Forging Spirit Grandmaster.

Shui Miao knew Jiang Weng; he had the potential to become an Advanced Spirit Forger with solid fundamental skills.

That's why Shui Miao felt even more touched.

Taking a deep breath, Shui Miao carefully took out an item from his Spatial Equipment and handed it to Fang Mu with great solemnity.
