

Beast Tamer 781

Chapter 781 Hell Ghost Staff! _1

Fang Mu had previously focused on exploring the ancient battlefield, so he didn't pay much attention to the undead Guardian Beasts controlled by Yan Yubanruo.

But after seeing the new exclusive characteristic of the Grave Sacrifice Pregnant Mother—[Cruel Maternity]—

Fang Mu suddenly felt that the combination of the Grave Sacrifice Pregnant Mother, the Grave Sacrifice Father, and the Grave Sacrifice Child in the presence of a large number of Undead Guardian Beasts' remains—

essentially constitutes a devastating Vicious Beast!

According to the effect of the exclusive characteristic [Cruel Maternity], whether the Grave Sacrifice Father is alive or dead,

as long as the Grave Sacrifice Pregnant Mother consumes the Grave Sacrifice Father, it can produce offspring endlessly.

Most of these offspring are Grave Sacrifice Children, but these Grave Sacrifice Children have the chance to mutate into Grave Sacrifice Fathers.

Although among the produced Grave Sacrifice Children, the number that mutate into Grave Sacrifice Fathers is only one,

this constitutes a closed infinite cycle.

Of course, the combination of the Grave Sacrifice Pregnant Mother, the Grave Sacrifice Father, and the Grave Sacrifice Child still has a certain gap compared to a real Vicious Beast.

After all, when a Vicious Beast begins to take form, it doesn't need a large number of Undead Creature's remains or this kind of environment limit.

It can freely use its own abilities to establish its presence.

The Death Ritual Suit Spore shows different performances on different Undead Guardian Beasts.

The Death Ritual Suit Spore grown on the Grave Sacrifice Pregnant Mother is pure white.

The previous Grave Sacrifice Pregnant Mother looked like a strangely posed mummy wearing a wedding dress, with one hand on the bulging belly.

Now, due to this pure white Death Ritual Suit Spore becoming more mature, with a red tip,

the Death Ritual Suit Spore on the Grave Sacrifice Pregnant Mother looks like a wedding dress stained with blood, giving off an unspeakable ferocity and terror.

Beast Masters who contract Undead Guardian Beasts play cruel beauty to the extreme in battles, which is extremely entertaining.

Watching a Beast Master who specifically contracts Undead Guardian Beasts fight is much more exciting than a horror movie!

However, there are few such styled players in the Dragon Rising Federation's Club Guild.

After all, contracting Undead Guardian Beasts requires much more resources than contracting Dark-element Guardian Beasts on a daily basis.

Fang Mu examined the state of the Grave Sacrifice Pregnant Mother and found that in terms of bloodline, the Grave Sacrifice Pregnant Mother was only one step away from evolving into the Burial Kind Mother.

If continued to be fed with pure Dead Qi and Soul of Death,

by the time Fang Mu becomes a Biprong Star Beast Master and the Grave Sacrifice Pregnant Mother is eligible to be promoted to the Gold stage,

chances are high that the bloodline evolution can be completed at the Gold stage.

The Grave Sacrifice Pregnant Mother, Grave Sacrifice Father, and Grave Sacrifice Children, these three Undead Guardian Beasts, all evolved from the Tomb Hunting Corpse, thus hold similar foundations.

The resources that Fang Mu provides to them are also nearly the same.

The Grave Sacrifice Father and the Grave Sacrifice Child have also been promoted to the Legendary Quality.

Fang Mu summoned the Grave Sacrifice Father and the Grave Sacrifice Child and examined them.

[Beast Name]: Grave Sacrifice Father

[Beast Species]: Corpse Family/Hunter Corpse Species

[Beast Level]: Silver (10/10)

[Beast Element]: Undying

[Beast Potential]: Gold

[Beast Quality]: Legendary

Skills:

[Spine Lock]: The spine is stimulated with Dead Qi to grow outside the body and bind the target as a chain. When the Spine Lock is stretched to the breaking point, the Dead Qi inside the Spine Lock will be transformed back into chains for a second restraint.

[Swift Rend]: Claw attacks will continuously enhance the slashing speed; the faster the speed, the stronger the tearing effect.

Exclusive Characteristics:

[Bones of Same Cold]: When an undead creature related to its bloodline is attacked, it enhances its own ferocity, causing it to enter a furious state. When an undead creature related to its own bloodline dies, it can swallow the undead creature to breed it again with Dead Qi.

[Sacrifice Armoured Gesture]: Specializes a bone structure at its shoulder. When a life linked to its bloodline is attacked, it will use its specialized bone to block. In a state of impending death, it can sacrifice itself to explode.

[Brutal Paternity]: Fatherly love bursts out in situations where it can't defend against the enemy by itself. It can greatly enhance its own defensive effect by sacrificing Grave Sacrifice Children. Each sacrifice of a Grave Sacrifice Child enhances its own defense and strengthens the next attack.

Evolution Path:

①: Coffin Carrying Violent Father, ②: Shrine Grave Corpse Eating Monster, ③: Corpse Hunting Strong Man.

...

[Beast Name]: Grave Sacrifice Child

[Beast Species]: Corpse Family/Hunter Corpse Species

[Beast Level]: Silver (10/10)

[Beast Element]: Undying

[Beast Potential]: Gold

[Beast Quality]: Legendary

Skills:

[Spine Lock]: The spine is stimulated with Dead Qi to grow outside the body and bind the target as a chain. When the Spine Lock is stretched to the breaking point, the Dead Qi inside the Spine Lock will be transformed back into chains for a second restraint.

[Swift Rend]: Claw attacks will continuously enhance the slashing speed; the faster the speed, the stronger the tearing effect.

Exclusive Characteristics:

[Bones of Same Cold]: When an undead creature related to its bloodline is attacked, it enhances its own ferocity, causing it to enter a furious state. When an undead creature related to its own bloodline dies, it can swallow the undead creature to breed it again with Dead Qi.

[Corpse Spirit Fire Seed]: The Soul Flame can be peeled off and conducted into the target, causing the target's Soul Flame to rekindle.

[Twisted Filial Piety]: Each time it is killed, an extra layer of resentment is added to itself. Each sacrifice adds three layers of resentment to itself.

When the resentment reaches ten layers, it can choose to trigger the resentment to purify the Grave Sacrifice Pregnant Mother and the Grave Sacrifice Father, collectively strengthen the duplicated units of their own individuals, induce individual units to mutate, and briefly form new undead units.

Chapter 782 Hell Ghost Staff!_2

Upon further exploration, Fang Mu gained a whole new understanding of the terms "Father's Words, Child's Filial Piety" and "Boisterous Filial Piety".

The internal relations within this family are simply too discordant!

Previously, Fang Mu always thought that the Grave Sacrifice Protective Dad's love was boundless, and that he had specially hardened his bones to protect the Grave Sacrifice Pregnant Mother and Grave Sacrifice Child from harm using the exclusive trait [Sacrifice Armoured Gesture].

But now, it seems that this is not the case.

The exclusive trait [Brutal Paternity], gained by the Grave Sacrifice Protective Dad upon his promotion to Legendary Quality, allows him to angrily sacrifice the Grave Sacrifice Child when unable to resist enemy attacks, thereby enhancing his own defense.

In combination with the exclusive trait [Cruel Maternity] of the Grave Sacrifice Pregnant Mother, each sacrifice of the Grave Sacrifice Child can further strengthen the defense of the Grave Sacrifice Protective Dad.

And each time the Grave Sacrifice Child is sacrificed, it strengthens the next attack.

This excessively enhances the attack power and defense of the Grave Sacrifice Protective Dad.

With the exclusive trait [Brutal Paternity], the Grave Sacrifice Protective Dad is more than capable of challenging higher ranks.

The Grave Sacrifice Pregnant Mother and the Grave Sacrifice Protective Dad possess [Cruel Maternity] and [Brutal Paternity] respectively.

Under their education, the Grave Sacrifice Child is anything but modest.

With the exclusive trait [Twisted Filial Piety], for each time the Grave Sacrifice Child is killed by an enemy, hatred accumulates by one layer, and each time it is sacrificed, this hatred accumulates by three layers.

Once the hatred accumulates to ten layers, it can be triggered.

Once the hatred is triggered, the Grave Sacrifice Pregnant Mother and the Grave Sacrifice Protective Dad will be absorbed by the Grave Sacrifice Child, becoming a part of it.

By that time, all Grave Sacrifice Children given birth by the Grave Sacrifice Pregnant Mother will be enhanced and mutate, temporarily forming a special type of undead unit.

Fang Mu was completely unfamiliar with this combat mode.

Due to the exclusive trait [Corpse Spirit Fire Seed], the Grave Sacrifice Child isn't good at combat and is more of a supplementary healing unit.

But the mutated Grave Sacrifice Child should be quite good at combat.

Although the Grave Sacrifice Child will consume the Grave Sacrifice Pregnant Mother and Grave Sacrifice Protective Dad when implementing the exclusive trait [Twisted Filial Piety].

Nevertheless, after the Grave Sacrifice Child reverts from its mutated state, it can transmit its Soul Flame to the Grave Sacrifice Pregnant Mother and the Grave Sacrifice Protective Dad through [Corpse Spirit Fire Seed] to resurrect them.

Alternatively, they can be resurrected through the exclusive trait [Bones of the Same Cold].

These two resurrection methods ensure that the "Grave Sacrifice Trio" remains a happy and prosperous family after combat.

The Death Ritual Suit Spores on the Grave Sacrifice Protective Dad are blackish-brown, mainly concentrated on the specialized bone plates.

The Death Ritual Suit Spores of the Grave Sacrifice Child are yellowish-brown and evenly spread all over its body, each one more terrifying and ferocious than the other.

Each of the "Grave Sacrifice Trio" on their own can only be considered as an ordinary undead unit, but when the three are combined, their combined value is comparable to that of a special grade undead unit!

Fang Mu was extremely satisfied with the exclusive traits obtained by the "Grave Sacrifice Trio" upon their promotion to Legendary Quality.

Fang Mu didn't immediately test the new exclusive traits of the "Grave Sacrifice Trio", but planned to experience their power during actual combat when he takes on the Battle Network as Yan Luo.

The Ghost Fish Princess, as the only Ghost Servant of Yan Yubanruo and also possessing the mermaid bloodline.

Although Yan Yubanruo never treated the Ghost Fish Princess with a pleasant face, she always prioritized giving resources to the Ghost Fish Princess.

Fang Mu instructed Yan Yubanruo to summon the Ghost Fish Princess.

Upon the outside, the Ghost Fish Princess still looked the same, except that her head was a beautiful woman, while the rest of her body was that of a fish.

Due to the constant absorption of the Soul of Death recently, Fang Mu could noticeably feel that the body of the Ghost Fish Princess was a bit fatter than before.

Even though the Ghost Fish Princess was not able to advance to Legendary Quality, she has already been upgraded from Perfect Quality to Epic Quality.

Fang Mu used actual data to investigate the Ghost Fish Princess.

[Beast Name]: Ghost Fish Princess

[Beast Species]: Corpse Carp Family / Ghost Carp Genus

[Beast Level]: Silver (10/10)

[Beast Element]: Undead Species

[Beast Potential]: Gold

[Beast Quality]: Epic Quality

Skills:

[Ghost Soul Stinger]: Using fish bones interwoven with dead Qi from its body, it attacks directly at the soul of the target. If the target resists, the fish bones would shatter with dead Qi in the target's soul.

[Soul Absorbing Hook]: Devour and absorb wandering souls, refining them into souls of death.

Exclusive Traits:

[The Affectionate Princess]: Can bewitch living things. Once the bewitched being starts to nurture feelings of affection, they will merge with its own entity and be completely controlled. When the target is harmed, the damage and pain will transform into nourishment for the dead Qi.

[The Heartless Princess]: Can trample on the mind, spirit, and soul of the living. Upon reaching the limit of tormenting the feelings of a living being, it makes them produce self-destructive thoughts, thereby influencing the unit with which they have a contract.

Evolutionary Path:

①: Ghost Soul Mermaid, ②: Jealous Soul Fish Princess, ③: Rotten Corpse Bone Catfish.

After inheriting the exclusive trait of [The Affectionate Princess], the Ghost Fish Princess gained another exclusive trait called [The Heartless Princess].

Fang Mu was somewhat at a loss about how to evaluate this exclusive trait of [The Heartless Princess] for a moment.

Fang Mu didn't know if it was because of the mermaid bloodline in the Ghost Fish Princess or because the Ghost Fish Princess had absorbed ghost blood.

Clearly, this exclusive trait of [The Heartless Princess] is somewhat overachieving!

For the first time, Fang Mu saw an ability that could directly influence the Beast Master through the Guardian Beast.

In a battle, the Ghost Fish Princess becomes the ultimate tormentor, causing a Guardian Beast to self-destruct by tormenting its inner heart, thereby damaging the spiritual power of the Beast Master.

In any battle, the Beast Master is the core of the battle situation.

Once the Beast Master's spiritual power is damaged, it would be hard to manage the ensuing match.

This skill is extremely sinister, making it difficult for Beast Masters to resist.

Currently, after the Ghost Fish Princess has advanced to the Epic Quality, even if it devours a large number of souls of death every day, it still shows no sign of advancing to the Legendary Quality.

Fang Mu said to himself that if he wants to upgrade Ghost Fish Princess to Legendary Quality, he may have to wait until it upgrades to Gold and needs to be fed Blood Aged Wine!

Just like the Ghost Fish Princess, her master, Yan Yubanruo, also struggles to upgrade her quality.

Yan Yubanruo is now at the Epic Quality level, consistent with before but has gained an additional exclusive trait.

But it seems that there is still a long way to go to upgrade to Legendary Quality.

It's much more difficult for Ghost System Beasts to improve their quality than it is for Dead Creatures.

However, Yan Yubanruo, who has just gained a new exclusive trait, has made a qualitative leap in her abilities!

[Beast Name]: Yan Yubanruo

[Beast Species]: Ghost King Order/Glamour Ghost Species

[Beast Level]: Silver (10/10)

[Beast Element]: Ghost System

[Beast Potential]: Silver

[Beast Quality]: Epic Quality

Skills:

[Golem Paper Control]: You can control undead creatures by planting a white paper man inside them. The control cannot be taken away before the soul flame of the undead creatures goes out.

Attach a red paper man to the enemy's body, bind it with one of the white paper men. When the target attached with the white paper man is injured, the damage is also endured by the target attached with the red paper man.

[Execution Chains]: When the target's life energy and vitality are less than 35 percent of its own, the execution chains will bind the target and inflict heavy damage, causing the target to suffer multiplied damage when attacked, and the energy it consumes also doubles.

Exclusive Traits:

[Master of Underworld]: Before the soul flame of the undead creature attached with the white paper man goes out, it will not suffer any damage.

[Hell Ghost Staff]: Using ghost flames to solidify a scepter, possessing the effect of collecting the energy of undead creatures under its control for its own use. After each deployment, the undead creatures it controls will fall into a weak state for some time.

Chapter 783 Evolve, Rotting Nightmare Stiffness!_1

Everyone is aware of the strength of a Heavenly Disaster Level Ghost System Summoning Beast, yet few would engage in a contract with them.

This is partly because nurturing such a beast consumes more resources than other types of Ghost System Beasts.

Only a handful of powerful factions can afford this.

On the other hand, the power of summoning beasts lies not in themselves, but in the many entities they can control. This makes them easy targets in battles.

Assassinating a commanding general who controls an army is much easier than killing a top-tier warrior.

A top-tier warrior can easily protect themselves, while a general can do so only through others' protection.

Such is the current predicament faced by Fang Mu's Yan Yubanruo.

The Bronze-rank skill [Golem Paper Control] is a summoning skill that controls the creatures of the dead, and [Execution Shackles] is a controlling skill that inflicts heavy damage and doubles energy consumption.

It requires the coordination of many summons to bring out the advantages of these skills.

The Perfect Quality exclusive trait [Master of Underworld] is to use summoned creatures to ensure its survival, an exclusive self-defense trait.

Both the skill and the exclusive trait rely on summons for their use.

Hence Yan Yubanruo is significantly restricted when it comes to individual combat.

However, the exclusive trait [Staff of Hell] gained upon ascending to the Epic Quality perfectly solves this problem.

With the exclusive trait [Staff of Hell], Yan Yubanruo can take the life energy of all the dead creatures it controls to enhance its own power.

The dead creatures under the control of Yan Yubanruo will increase, and their strength will steadily improve under Fang Mu's nurturing.

As Yan Yubanruo absorbs the energy of these powerful undead, it effectively becomes a boss capable of easily overcoming creatures of higher ranks.

With this exclusive trait alone, as long as Fang Mu properly nurtures the summons of Yan Yubanruo.

Yan Yubanruo can easily batter Ghost System Beasts of the same Heavenly Disaster level with its own combat power.

Yan Yubanruo seems somewhat aggrieved at Fang Mu's look.

It is not the first time it received a new exclusive trait by ascending to Epic Quality, but its master is only now paying attention to its exclusive traits.

Yan Yubanruo feels like a neglected kitten, miffed and frizzly.

Of course, Yan Yubanruo wouldn't vent its grievances on Fang Mu.

Looking at the Ghost Fish Princess crouching at its feet, Yan Yubanruo stomped on it hard with its left foot.

At Yan Yubanruo's stomping, the Ghost Fish Princess responded by happily swishing its tail as if receiving a reward.

Yan Yubanruo's grievances dissipated quickly at Fang Mu's words.

"Yan Yubanruo, retain more souls, to ensure that you and your summons could steadily improve in rank and quality."

"Once the souls you need are enough, I will use the remaining souls to train Liu Xi and those evil spirits with barrier abilities!"

Yan Yubanruo had been feeling a sense of urgency.

Ever since Fang Mu contracted Liu Xi, Yan Yubanruo had an extra competitor for souls.

With the intelligence of Ghost System Beasts, Yan Yubanruo could easily compare its value with Liu Xi.

As contracted creatures of Fang Mu, they were compared on equal footing.

Yan Yubanruo has been too fearful to broach the matter of soul distribution due to its perceived lesser value when compared to Liu Xi.

Now that Fang Mu raised the issue, his words hinted at considering and protecting Yan Yubanruo's interests.

Yan Yubanruo felt elated.

Every Beast Master certainly has favorites among their guardian beasts, particularly Beast Masters with scarce resources.

But Fang Mu has ample resources and can treat all his beasts equally.

Moreover, the numerous beasts under Fang Mu formed a small society.

They all received the same resources, which inevitably led to comparisons and competition.

This situation will become more serious as the intelligence of the beasts increases.

Fang Mu was unaware of this, which is a sweet burden for a powerful Beast Master.

At present, Yan Yubanruo controls seven Undead Species Beasts in total.

They are the Giant Brutal Butcher, Grave Sacrifice Pregnant Mother, Grave Sacrifice Father, Grave Sacrifice Child, Hook Heart Grub Infant, Stealthy Hidden One, and the Rotting Nightmare Stiffness.

The Ghost Fish Princess, a Ghost Servant with absorbed ghost blood, is not counted in this list.

The identity of Fang Mu Yama holds nine beasts, an unimaginable number for the average Beast Master!

Even She Wan, a noble lady from the Lu Dushe clan, has merely contracted four beasts.

Both the Hook Heart Grub Infant and the Stealthy Hidden One had their qualities improved through earlier nurturing by Fang Mu, although their ranks still lacked.

However, both of them have been promoted to Silver Rank Level Ten.

As the Stealthy Hidden One has already advanced to the Silver Rank Level Ten Legendary Quality, it has no room for further improvement before Fang Mu ascends to Biproong Star Tamer.

The Rotting Nightmare Stiffness, a special undead creature, could be considered as Fang Mu's second territorial beast.

Initially obtained in an ancient battlefield, Fang Mu had no opportunity to nurture the Rotting Nightmare Stiffness.

Due to the Rotting Nightmare Stiffness exhibiting a trend for quality upgrade at Bronze Rank Level Nine, Fang Mu planned to hold its power at Bronze Rank Level Ten, continuously nourishing it with souls.

Chapter 784 Evolve, Rotting Nightmare Stiffness!_2

Striving to make the Rotting Nightmare Stiffness reach the legendary quality level as soon as it evolves to silver, just like the Stealthy Hidden One.

Right now, the Rotting Nightmare Stiffness has reached its limit in terms of the ability to bear the souls of the dead and it is already difficult to absorb more.

Limited to this level, there is only harm but no benefit to the Rotting Nightmare Stiffness!

Fang Mu is prepared to assist the Rotting Nightmare Stiffness to take the final step with the help of Blood Aged Wine.

Fang Mu had Yan Yubanruo to summon the Rotting Nightmare Stiffness.

The Rotting Nightmare Stiffness emitted a mournful howl from its mouth.

Its rigid limbs twisted in a creepy way, and its bloodshot eyes chilled people's heart.

If Yan Yubanruo hadn't controlled the Rotting Nightmare Stiffness, the Death Ground Nightmare would quickly spread out from the center of the corpse and pollute the ground beneath its feet.

In a battle, the Rotting Nightmare Stiffness is a weapon of mass destruction that can alter the environment, which is extremely unfriendly to the living.

In terms of strategic significance, it is even more critical than the Stealthy Hidden One.

Fang Mu took out a cup of Blood Aged Wine and handed it to the Rotting Nightmare Stiffness.

As a humanoid undead creature, it can handle containers and drink the Blood Aged Wine itself.

The Rotting Nightmare Stiffness could feel the benefits of the Blood Aged Wine and began to sip it heartily after raising the container.

Given the strategic importance of the Rotting Nightmare Stiffness, Fang Mu was very generous in providing the Blood Aged Wine.

Otherwise, given his current shortage of Covenant Blood Essence, he would not be so generous to an undead creature.

As the one thousand milliliters of Blood Aged Wine were consumed, the gray-white Death Ground Nightmare on the Rotting Nightmare Stiffness began to darken, gradually turning to a gray-black.

The gray-black Death Ground Nightmare now has an even stronger effect of blocking vision than before.

Furthermore, the festering sores on the Rotting Nightmare Stiffness's gray-black body began to heal.

The pus was separated from the body and dropped to the ground.

Luckily, everyone did not find this disgusting, and the ground was immediately cleaned up.

The body of the Rotting Nightmare Stiffness changed from black with pus-filled blisters to a greyish white with a creepy blue gleam.

Its bulging red eyes turned into a turbid dark red.

Fang Mu originally wanted the Rotting Nightmare Stiffness to reach legendary quality when it evolved to silver, but he didn't expect the Rotting Nightmare Stiffness to give such a solid response.

It evolved into a Dead Territory Zombie while upgrading to silver, and even metamorphosed its
bloodline.

Fang Mu investigated the advanced Rotting Nightmare Stiffness through the Eye of Omniscience.

[Beast Name]: Dead Territory Zombie

[Beast Species]: Walking Corpses/ Nightmare Corpses

[Beast Level]: Silver (1/10)

[Beast Element]: Undying

[Beast Potential]: Silver Stage

[Beast Quality]: Legendary Quality

Skills:

[Land Contamination]: Infuses the qi of corpses into the ground, transforming the environment with
corpse qi. Can heal undead on the polluted land and affect the living with corpse qi.

[Death Ground Silkworm]: Creates silkworms from polluted land. The silkworms gnaw at the living causing paralysis and exacerbating the sensation of pain.

Exclusive characteristics:

[Death Ground Nightmare]: The nightmare engulfs the land corrupted by its own corpse qi, obscuring the vision of the living. When the living use spiritual power to investigate the situation under the nightmare, the nightmare will pollute their spiritual power.

[Split-body Expansion]: When it maximizes the area of death land conversion, it can split its body enabling it to move and pollute more land, expanding the death field.

[Shaping Armor with Death's Field]: The energy of the death land can shape armor on the chosen undead creature, significantly increasing the defensive effect. It can also shed the armor to escape certain types of control.

Evolutionary Path:

①:Undead Domain, ②:Giant Bone Zombie, ③:Six-Armed Zombie.

The new skills and exclusive characteristics attained by the Rotting Nightmare Stiffness upon evolving to a Dead Territory Zombie seem plain in description.

But they prove to be very effective when utilized by the Dead Territory Zombie.

The silver-grade skill [Death Ground Silkworm] gnaws at the living causing paralysis and exacerbating pain sensation.

This can be considered as a control type skill, and it can also be linked with the exclusive feature [Death Ground Nightmare].

The enhancement of pain perception will increase the effect of spiritual pollution on the living.

Rotting Nightmare Stiffness can drastically expand the area of the dead ground with its exclusive feature [Split-body Expansion].

As the Corpse Worms proliferates on the dead ground, anyone stepping on it can be suddenly attacked by them.

The exclusive attribute [Death Ground Shaping Armor] obtained from the promotion to Legendary Quality, is a boost to the defensive capabilities of all the undead under Fang Mu's command.

This skill further amplifies the strategic significance of the Dead Territory Zombie.

The armor that could transform dead energy not only enhances defensive capabilities, but also provides immunity to control effects such as immobilization and binding.

It prevents the scenario where undead creatures lose their combat capabilities due to the enemy's control in combat.

Looking at these cultivated Undying Beasts, Fang Mu felt the urge to go to the Battle Network and fight.

Ever since his last competition as Jianmu, Fang Mu hasn't had a Battle Network confrontation for quite a while.

Fang Mu spent so much effort to cultivate his Beasts, naturally, he hopes to improve his own combat skills in battles with others.

Combat skills need to be constantly honed to improve, no one can achieve this overnight.

When Fang Mu prepared to log in to the Battle Network, there was a knock on his door.

Fang Mu tapped the table three times, and Jiang Weng pushed the door open and came in with Jiang Tuo.

In Jiang Tuo's hands was a pile of snacks, he came to Fang Mu with a smile on his face.

"Fang Mu, taste these!"

"My grandfather just took me to the night market, these are the ones that tasted best!"

When Jiang Tuo first joined Fang Mu, he always addressed him as his master.

This made Fang Mu very uncomfortable and he managed to correct Jiang Tuo's address to him.

Fang Mu and Jiang Tuo are of the same age, so it's more comfortable for Jiang Tuo to call him by his name!

Fang Mu is a bona fide glutton; due to the Royal beast blood abundance, he eats more food in a day than others in a month!

This caused Fang Mu, for convenience, to choose to fill his stomach with stored nutritional meals.

But he has long grown tired of these nutritional meals.

If not for the urgent call to Fang Qin and the need to cultivate his Beasts,

He would surely have disguised himself and feasted in the food street!

Jiang Tuo didn't know what Fang Mu liked to eat, so he bought a bit of everything he himself found delicious.

Ordinary people would never be able to finish all this, but none of it would go to waste in Fang Mu's hands.

Using the resources of the Founding Sect that Jiang Tuo obtained from Fang Mu, he has begun to integrate with his Destiny Guardian Beast, Bingxiao.

It will take a few more days before Jiang Tuo and Bingxiao's integration is fully complete.

By that time, Jiang Tuo will be a normal person, who can improve his own strength!

"Young Master, I haven't made much headway in researching the spatial equipment you gave me."

"I need to try mastering the ability to blend spiritual materials, to achieve perfect unity."

"I need more time."

"If I'm sure I can't recreate this spiritual instrument, I will tell you immediately!"

Fang Mu nodded at this.

He didn't think Jiang Weng would immediately crack the method to build spatial equipment from the Fifth and Sixth Era.

Equipment of this level, Fang Mu believes, must have been very difficult to like for Fifth and Sixth Era.

If the products of the Fifth and Sixth Era were so easily recreated, the life of the Seventh Era humans should have long been filled with artifacts from the Fifth and Sixth Era.

But in reality, the products of the Fifth and Sixth Era are difficult to apply in the Seventh Era.

What exactly happened during the Sixth Era that caused such a drastic shift in human heritage!?

Fang Mu received a message from Jin Ya via the Communication Beast last night.

The Glorious Tribe will arrive in the Dragon Soaring Federation after seven days, providing Fang Mu with the agreed Catastrophe-Class Ice Attribute Undying Beast and a large amount of Glorious Gold Honey for trade.

Chapter 785 Yan Luo's journey!_1

The specific location of the transaction would be communicated to Fang Mu once the people from the Glorious Clan arrived.

Fang Mu didn't hide this information, instead, he immediately shared this good news with Jiang Weng and Jiang Tuo.

"Xiao Tuo's body should recover in about a week."

"A week later, the Glorious Clan will visit the Dragon Rising Federation to offer Xiao Tuo two ice attribute Heaven Calamity Ghost Series Beasts for a contract."

"I have here plenty of pure Dead Qi, Soul of Death, and Ice Elemental Energy, Xiao Tuo's strength can quickly increase!"

"I will also set aside some of the Glorious Golden Honey, which I traded with the Glorious Clan, for Xiao Tuo."

"Not only that, but Xiao Tuo can also stay by my side and share the spirit refining properties of the Sacred Relics, the Falling Cherry Essence Carp!"

Jiang Tuo, being young, was overjoyed by what Fang Mu had said but didn't quite understand the weight of his words.

However, Jiang Weng understood the weight of these words.

As a Forging Spirit Grandmaster, Jiang Weng had seen and heard much, yet he couldn't help but tremble at this time.

Fang Mu's original promise to Xiao Tuo was already substantial, and now Fang Mu was adding more to it.

For Xiao Tuo to stick by Fang Mu was undoubtedly the best choice!

Even the prodigies of top-tier forces wouldn't have better resources!

Glorious Golden Honey is extremely precious, as it can directly refine the spiritual power of a Beast Master.

Fang Mu not only supplied Xiao Tuo with this precious resource, but he was also willing to share his Sacred Relics with him."

Fang Mu treats Xiao Tuo like a confidante, and the resources he provides for Xiao Tuo will only increase in the future.

And Fang Mu actually has a relationship with the Glorious Clan!

The Glorious Clan, an Ancient Heritage Clan, is a massive presence in the world.

Jiang Tuo had once again recognized the energy that Fang Mu possessed.

Jiang Tuo knelt on one knee and gave Fang Mu a serious bow.

"Young Master, I will not let you down. I will grow quickly!"

After thinking it over, Jiang Tuo still thought it was most appropriate to call Fang Mu 'Young Master'.

After seeing off Jiang Weng and Jiang Tuo, Fang Mu began to enjoy the snacks Jiang Tuo had brought.

Lu City's specialty candies were made by coating fruits with syrup, similar to the candied hawthorns Fang Mu had eaten in his previous life.

However, unlike candied hawthorn, the candies were not frozen and lost some of their flavor.

Fang Mu didn't own any Ice Type beasts, otherwise he would definitely freeze these candies before eating them.

In addition to candies, Fang Mu also loved the various fried snacks found on the streets of Lu City.

These fried snacks could be anything from fungi to vegetables, to chicken tenders, chicken hearts, or offcuts from some animals.

Lu City is famous for its sweet peppers, which are dried and ground into powder as seasoning for the fried snacks, making them taste exceptional.

The Dragon Rising Federation has very high standards for food safety and strict regulations.

Therefore, even the street food is very healthy.

Fang Mu ate all of these snacks and still felt he hadn't had enough.

Fang Mu rubbed his stomach, took out his phone, and instructed Xiao Yin to stock up on some local snacks from Lu City in his Spatial Equipment.

These local snacks added some flavor when Fang Mu was gobbling up nutritional meals on a daily basis.

Fang Mu sighed to himself, he was becoming more and more like a foodie!

Fortunately, all these nutrients could be digested by the Blood Aged Wine, and his bowel movements were no different from ordinary people.

Otherwise, in addition to being a glutton, Fang Mu would also be clogging up the toilet.

Upon receiving a call from Fang Mu, Xiao Yin immediately went to the snack street in Lu City for shopping.

Fang Mu had given Xiao Yin a supplementary Dragon Cavalry Black Gold Card, with which she could use the Dragon Soaring Coins in the primary card.

Ever since she became Fang Mu's personal housekeeper, Xiao Yin had always been able to experience this extravagant spending.

She Wan had just handed over the Demon Silk Scorpion-Lion to Xiao Yin.

Xiao Yin had never encountered a Guardian Beast like the Demon Silk Scorpion-Lion that suited her so well in her life.

Without She Wan's deliberate help to take this beast out from She Family, even if Fang Mu had helped her search, she might not have found it.

Because it was clear that the Demon Silk Scorpion-Lion had mutated from some kind of lion-scorpion-type beast.

These Guardian Beasts with special mutations were full of randomness and not common.

In addition to the joy of obtaining a guardian beast she could contract with and was suitable for her,

Xiao Yin was even more touched by the fact that She Wan had thought of her!

While She Wan wanted to befriend Xiao Yin, Xiao Yin also planned to befriend She Wan.

Like Xiao Yin, She Wan was someone Fang Mu cherished. As a personal housekeeper, if she didn't get along well with these people, it would be difficult to do a good job.

Fang Mu glanced at the time and saw that there was about an hour and a half left before Fang Yuan finished attending the Commerce Festival.

During this remaining time, Fang Mu didn't use the Heart of the Elf from the Lan River Rain Mother to strengthen the Rainy Doll.

Now was not the best time to use the Heart of the Elf to strengthen Rainy Doll.

After Rainy Doll underwent transformation into Lake Flame Gemini, strengthening the Lake Flame Gemini could help the bloodline transformation of the Lake Flame Gemini.

This would further enhance the Lake Flame Gemini's bloodline when they advanced to the platinum rank.

Fang Mu planned to use this time to participate in a few duels on the Battle Network using his identity as Yan Luo.

The itch to fight was great in Fang Mu who had just finished cultivating his guardian beasts.

Whether it was the Battle Network or Beastmaster Web, it was always bustling. Combined, they could be considered the second world of the Dragon Rising Federation.

Chapter 786: Yan Luo's Journey!_2

At least half of the citizens of the Dragon Rising Federation earn their income by working on the Beastmaster Web.

Essentially all Beast Masters register and log into the Beastmaster Web and Battle Network.

However, instead of seeking the resources they need on the Beastmaster Web, Beast Masters prefer to contend with each other on the Battle Network, honing their battle skills.

The ranking on the Battle Network displays the strength of a Beast Master. Because the Battle Network offers fair matchmaking, all officials of the Dragon Rising Federation acknowledge the ranks on the Battle Network.

Fang Mu never had the habit of checking for trendy news on the Battle Network.

If Fang Mu were to probe around, he would certainly find that his alternative identity, Jianmu, is still the hottest topic on the Battle Network.

He is avidly discussed by the users on the Battle Network.

[Maple Shadow Shang]: No, I must watch Jianmu's competition video in the Silver Palace once more! Why is a Beast Master with a Guardian Beast not beyond the Silver Stage so powerful!? It doesn't make sense!

[Floating Tu Bai Ye]: He has high-level Creator resources backing him, cultivating his beasts, what's so strange about that? If I had Master Creator resources, I could be that powerful too!

[Forget Xiangnan]: You can't just blabber! Jianmu's Guardian Beasts are not something that can be cultivated by Master Creator resources! The Master Creators I know can't cultivate a Half-Elf at the Silver Stage!

The account, Forget Xiangnan, is quite famous in the forum section of the Battle Network.

Firstly, because Forget Xiangnan's personal strength has already reached Diamond I (90/100) victory points, he has had many opportunities to advance to Starlight!

But Forget Xiangnan, for the effect of his live streaming, has become a gatekeeper at the Starlight rank.

He has blocked many Beast Masters dreaming of sprinting to Starlight, including some formal members of the Club Guild.

Secondly, because Forget Xiangnan himself is an assistant to a Master Creator, every word he says seems to have a Master Creator backing him.

If Forget Xiangnan were to talk nonsense on the Battle Network, it would affect the reputation of the Master Creator behind him.

Therefore, many people in the Battle Network forums trust Forget Xiangnan's words.

Many people on the Battle Network have watched Jianmu's Silver Palace videos.

Many more were there at the performance games to watch it firsthand.

However, the vast majority of people were just there for the excitement and could not understand the real situation.

Now that Forget Xiangnan has revealed the truth, the Battle Network users who were watching the excitement now know what Jianmu's Guardian Beasts represent.

Jianmu's popularity on the Battle Network had already fermented earlier.

However, for some unknown reason, Jianmu's battle videos would be deleted as soon as they were posted.

Because there were no videos to watch, the popularity could not explode.

Earlier, the battle videos of Jianmu were deleted by the Three Principal Archbishops of the Street Cleaner, the Ninth Sacrifice.

Later, when Fang Mu voluntarily participated in the public performance competition of the Silver Palace, the Ninth Sacrifice did not do so anymore.

Now with videos readily available for viewing, more and more people on the Battle Network started to focus on Jianmu.

Originally, because of Fang Mu, Huan Wang became a loser in life.

The match he lost to Jianmu in the age division shattered Huan Wang's persona.

However, from the time Huan Wang repeatedly challenged Fang Mu and they were paired up into a strange CP, Huan Wang's live stream audience skyrocketed.

In just a month, Huan Wang's current income is even higher than what he previously earned in the age division!

Every live stream Huan Wang does now has a seven-figure audience, and whenever Jianmu is mentioned, he receives an overwhelming amount of gifts.

This has led Huan Wang to no longer focus on his spiritual instrument shops.

The income from the spiritual instrument shops cannot be compared to what he earns from live streaming.

Huan Wang believes that with the improvement of Fang Mu's strength, Fang Mu's popularity on the Battle Network will explode!

By then, the popularity of his own live stream will also continuously rise, drawn by the allure of Fang Mu!

He just needs to manage his CP with Jianmu effectively!

The only thing that frustrated Huan Wang was the host, Heartfelt, who had previously matched with Jianmu.

Because she spent a huge sum to buy the broadcasting rights to Jianmu's performance match, Heartfelt quickly rose to fame.

Because Heartfelt revealed that she was a fan of Jianmu before the performance match, she was able to easily establish herself as a fangirl of Jianmu.

If it wasn't for Heartfelt, his income could at least have doubled!

Thinking about this always made Huan Wang feel jealous and helpless.

Heartfelt used her good looks to attract a portion of fans, and she was also a female host.

Huan Wang lost to Heartfelt on both of these points.

With Jianmu's continuous rise in rank, Huan Wang was no longer able to match with him, ending their strange relationship.

Before Jianmu participated in the performance match, there were always people comparing Yama with Jianmu.

But now, even the fans who liked Yama could only keep to themselves, daring not to compare Yama with Jianmu anymore.

Even so, because of the past comparisons with Jianmu, Yama had attracted many critics.

Whenever someone praised Jianmu, they would always pull out the younger generation who had been compared with Jianmu for a walk.

The younger generation was mostly proud and arrogant, and in the past, those who were paraded around would definitely openly challenge Jianmu.

But now, these people didn't even dare to speak.

First, they were afraid of the powerful forces behind Fang Mu. There were indeed precedents on the Battle Network where people sought revenge in reality because of online fights.

Second, they simply didn't have the ability to compare themselves with Jianmu.

They had all become Biprong Star Tamers, and a Biprong Star Tamer wouldn't be proud even if they defeated a One-point Stars Tamer.

The gap in age was there for all to see, and only Yama and Jianmu were of a similar age.

Yama had contracted so many Undead Species Beasts that it was probably difficult for him to comprehend the Mysterious Pattern.

Although Jianmu also used three Beasts, the netizens on the Battle Network believed that someone with a Grandmaster Creator behind them would definitely have other ways to comprehend the Mysterious Pattern.

Fang Mu was completely unaware of the ripples caused by his two performance matches on the Battle Network.

Fang Mu Yama's rank had risen to Silver One, and at this rank, he could basically match up with Gold Tier Beasts.

Previously, high-quality Gold Tier Beasts could pose significant difficulties for Fang Mu. But now, as Fang Mu's Undead Species Beasts had been upgraded in large numbers to Silver Rank Level Ten Legendary Quality.

A Silver Rank Level Ten Legendary Quality Beast could compete with a Gold Tier Five Perfect Quality Beast in terms of strength.

Now, even without revealing the existence of the Ghost Type Beast Yama Pragya, Fang Mu Yama could defeat Platinum Tier Beasts.

Fang Mu had already clicked on the matchmaking button, ready to start matching with opponents.

It had been a very difficult month for Cai Boshen, during which he went from being a crown prince in the clouds to mud under a tree root.

Cai Boshen was from a big family, and joining the Soul Rain Club was just for fun.

Cai Boshen valued his reputation very much.

But in the Duel Arena of the Silver Battle Hall, his reputation was completely shattered.

He had used a special method, which allowed his Beasts to advance in rank when he was a Biprong Star Tamer.

Yet, his two Platinum Tier One Legendary Quality Sub-Dragons were killed instantly by the two-tailed tiger-like Beast summoned by Jianmu!

Zhang Kai, that garbage, even held out against Jianmu for so long, which naturally led others to believe that he was inferior to Zhang Kai.

If he were to fight Zhang Kai, he would easily defeat Zhang Kai's Beast.

It cost Cai Boshen a lot of effort and family resources to cultivate his two Platinum Tier Legendary Quality Sub-Dragons.

Jianmu's tiger-like Beast's bloodline suppression of his two Sub-Dragons still made them somewhat scared of battles to this day.

Cai Boshen had lost a huge amount of fans, with some even switching to become fans of Zhang Kai.

Chapter 787:

Cai Boshen, who was usually high-profile, had been unusually low-key recently.

Planning to find an opportunity to wash away his humiliation and prove himself.

Normally, Cai Boshen didn't live-stream, but now, to prove himself, he started live-streaming on the Battle Network.

Cai Boshen's idea was simple, to defeat opponents stronger than Zhang Kai in a live-streamed Battle Network game, which would make those who doubted him reconsider.

But Cai Boshen was obviously too naive.

The live-streamers on the Battle Network were no different from the internet celebrities in Fang Mu's previous life.

The purpose of these internet celebrities was to entertain the users of the Battle Network.

The more Cai Boshen tried to prove himself, the more people would bring up the fact that he had lost to Jianmu.

Cai Boshen had just defeated an opponent with a Platinum-grade Guardian Beast, ready to see the audience's reaction in the live streaming room.

The fight was very tough for Cai Boshen.

The Broken Rock Tyrant Dragon had died in the battle because its skull was shattered by the opponent's Guardian Beast.

The Mist Wind Arthurdactylus, after having one of its wings broken, managed to kill the opponent's Guardian Beast using its Tornado Positioning and Fall-Wing Sickle skills.

The quality of this fight was extremely high, qualifying it to be included in the Gold Palace.

But Cai Boshen almost jumped up in anger when he saw the comments in his live stream.

Cai Boshen was the young master of the Cyan Stone Business Association, which was ranked among the top thirty business associations in the Dragon Rising Federation.

It could easily be ranked among the top 500 powers in the Dragon Rising Federation in terms of financial resources.

The Po Yu Club Guild was a casual investment by the Cyan Stone Business Association, and Cai Boshen had been nurtured by people from the Po Yu Club, ensuring his smooth entry into the industry, receiving praises wherever he went.

Cai Boshen had never suffered this kind of hardship before!

During this period, the coach who had been helping Cai Boshen build his public image in the Po Yu Club Guild was quite nervous.

He was afraid that Cai Boshen would blame him for his troubles.

Cai Boshen was now being backlashed because of his rich young man persona.

Whether it's by age group or rank, the last thing people with a rich young man persona want to do is lose a match.

Even more so for Cai Boshen, who had been defeated in a matter of seconds.

Under the attack of Jianmu's Tiger Type Familiar, Cai Boshen's two Sub-Dragons, who he was so proud of, with the Primary Dragon Bloodline, didn't even have the will to fight back.

Fortunately, Cai Boshen didn't blame the persona he had created.

Liu Hang, as a coach of the Po Yu Club Guild, had also secretly checked the comments in Cai Boshen's live stream.

Almost every comment was trolling Cai Boshen.

[Brother Luka]: What's so great about winning one fight? If you dare, rematch Jianmu and win against him!

[Moon Not Only Sets]: Just give it up! Even if you fight Jianmu again, those two large guys of yours will still cower like ostriches, not daring to make a sound!

[Yami Yami]: I was a fan of Cai Boshen before, but now I wish I could slap myself twice! How did I ever become a fan of someone like Cai Boshen!? It feels so disgusting!

[Ji Chuan]: Cai Boshen was so cocky before, and what came of it? Jianmu is just a One-point Star Beast Master, and he's only about sixteen or seventeen years old. Cai Boshen's already buried up to his neck in dirt!

Cai Boshen had seen plenty of such comments.

Indeed, Jianmu was a One-point Star Beast Master, who was very young.

But what did that mean? Was he already buried in dirt up to his neck?

He was barely over twenty years old himself, and that was why he could have so many fans in the first place.

Was this person cursing him not to live past thirty?

The angrier Cai Boshen thought about it, the more he realized that if he wanted to become a star player in the Club Guild, he absolutely couldn't quarrel with his fans.

Those who get into serious conflicts with fans can be banned.

Cai Boshen still had dreams of becoming a star and didn't want to ruin his dream because of a moment's anger!

With that thought, Cai Boshen could only secretly report [Ji Chuan], stating personal attack and malicious curse as the reasons.

Cai Boshen snorted in his heart, tomorrow or the day after you'll wake up with laryngitis, and you won't be able to comment in the live stream for at least a week!

Seeing that there were no good comments in his live streaming room, Cai Boshen hired a troll farm using his Cash Ability to control the comments in his live stream.

Because he paid well, these comments didn't show any flaws at all.

During the live stream, Cai Boshen would only read those comments that were good for him.

“Thanks for your support, everyone. I’ve played four games today, and I’ll be offline after one more game.”

“I’ll be back on air around eight o’clock tomorrow night. Don’t miss it in the live stream!”

While speaking, Cai Boshen pressed the matching button, planning to vent all his frustration on his next opponent.

Cai Boshen soon found a match.

Cai Boshen had heard the name Yan Luo before, as people often compared him with Jianmu.

Cai Boshen had watched Yan Luo’s matches and didn’t think Yan Luo was qualified to be compared to Jianmu.

A Beast Master who had only contracted a few high-quality Silver Stage Undead Species Guardian Beasts, he could take on ten such opponents!

Cai Boshen hoped he could get matched with strong opponents to prove his worth through them.

Obviously, Yan Luo did not meet Cai Boshen's requirements, which led to Cai Boshen losing some of his enthusiasm.

However, the viewers in Cai Boshen's live-streaming room clearly didn't agree.

Chapter 788 A Battle About to Start! _2

Yan Luo had always been very mysterious, reaching the Silver One rank as soon as he appeared.

A Guardian Beast of epic silver quality was not simple at all, and Yan Luo being able to enjoy high-level Creator resources at a young age implies that Yan Luo must be either rich or noble in reality.

However, considering Yan Luo's previous demonstrated strength, no fans in the live stream room really believed that Yan Luo could defeat Cai Boshen.

But this didn't hinder the audience in the live chat from using Yan Luo to mock and irritate Cai Boshen.

[Naming is Hard]: Cai Boshen has matched again with an opponent who only has a silver-stage Guardian Beast. This time, he must not fail again! If he loses again, he should just quit the Battle Network! I will not watch the Soul Rain Club Guild's games anymore!

[Fickle Carrot]: Isn't this my ex-husband Yan Luo! Although I'm a fan of Jianmu now, I have to say Yan Luo's three Guardian Beasts are absolutely powerful! Tonight I'll grudgingly be the unfaithful wife, supporting my ex-husband!

Besides these fans who were keen on mocking Cai Boshen, the majority of the audience were rather rational.

[O Bear Not Cat O]: I haven't seen Yan Luo's battles, but I think Yan Luo probably can't beat Cai Boshen! After all, the age of Yan Luo is evident, not everyone is Jianmu!

[Shili]: I think so too! However, I don't know why, but watching Cai Boshen win feels even worse than losing a high rank myself! I wish to exchange my ex-girlfriend's lifetime happiness for Cai Boshen to lose a game!

[Laugh for Whom]: Your ex-girlfriend is really lucky. Unlike me, who is constantly trading my ex-boyfriend's lifespan for a better mood tomorrow!

Cai Boshen ignored all the negative comments, and had no mood to read those comments posted by the paid trolls he had hired.

Right now, Cai Boshen just wanted to defeat Yan Luo as soon as possible, and then log off.

After live streaming for a few days, Cai Boshen felt that he should consider if continuing to live stream was necessary.

Discover hidden content at [Freewebnovel](#)

Using live stream to defeat as many powerful opponents as possible didn't seem to have any effect.

The only way for him to wash away his disgrace was to defeat Jianmu fair and square.

However, not only did Cai Boshen's two Guardian Beasts feel fear toward Jianmu's tiger-type Guardian Beast, but similar emotions were also festering within Cai Boshen.

He was just not willing to admit it.

While Cai Boshen was observing Fang Mu, Fang Mu was surprised to find out that he had matched up with Cai Boshen.

Fang Mu fought two exhibition matches in the Silver Palace half a month ago and one of his opponents was Cai Boshen.

At that time, he was not using the identity of Yan Luo, so Fang Mu wasn't sure whether to feel that he and Cai Boshen were fated or that the world was simply too small.

Cai Boshen had no intention of wasting time talking to Fang Mu and directly summoned his platinum rank one, Legendary Quality Broken Rock Tyrant Dragon, and platinum rank one, Legendary Quality Mist Wind Arthurdactylus.

Fang Mu was able to match Cai Boshen because Fang Mu's hidden rating was very high.

Fang Mu's Yan Luo account had been on a winning streak and hadn't lost a single game yet, otherwise, there's no way a silver rank Beast Master could match with a Beast Master who owned a platinum rank Guardian Beast.

Once both parties complete their matchmaking, the summoning of a Guardian Beast signifies the start of the battle.

Fang Mu enjoyed being matched with strong opponents, otherwise, he would lose the opportunity to improve his combat skills.

Fang Mu directly summoned the Giant Brutal Butcher and also the Ritual Cemetery Three Treasures.

Fang Mu hadn't summoned the Grave Sacrifice Pregnant Mother in his previous fights.

The appearance of the four undead species Guardian Beasts in front of Fang Mu caused the audience in Cai Boshen's live stream to boil with excitement.

[A touch of crimson]: What? Yan Luo actually contracted four undead species Guardian Beasts! What was he thinking, not planning to comprehend the Mysterious Pattern at all!? Speaking of which, the combination of the undead species Guardian Beasts with the Mysterious Pattern is not worse than the combination of Guardian Beasts of other elements with the Mysterious Pattern at all!

[Moonlight Heaven]: Damn! Haven't you guys noticed? The three Undead species Guardian Beasts from the Corpse Hunting subspecies are all wearing Death Ritual Suit Spores, plus these Death Ritual Suit Spores all have mature tendencies. How much Dead Qi and Wood System energy must have been used to feed them!?

[Wang Tieniu]: The younger generation nowadays is too incredible! I think anyone who can plant Death Ritual Suit Spores on their Guardian Beasts definitely won't give up their future. Is there a method to still comprehend Mysterious Patterns after contracting with multiple Guardian Beasts?

Wang Xiangnan had just finished traversing the Battle Network's comment section and had conducted a deep analysis of Jianmu's situation in the Skin Peeling House.

Within just a few days his fans increased by nearly three hundred thousand!

However, as an assistant to a Master Creator, Wang Xiangnan had little regard for these fans on the Battle Network.

Because in reality, Wang Xiangnan is a big shot and even some Sequential experts have to be quite respectful towards Wang Xiangnan.

Wang Xiangnan has helped the Master Creator he's following to maintain customers on the Beastmaster Web.

With nothing to do, Wang Xiangnan randomly picked a livestream room and happened to see the four Undead Species Guardian Beasts that Jianmu summoned.

Wang Xiangnan almost thought he was seeing things.

This, this, this... Yan Luo actually has three Silver Stage Legendary Quality Undead Familiars! That Giant Brutal Butcher also reached Epic Quality level!

Wang Xiangnan was certain that Yan Luo could certainly enjoy resources from a Grandmaster Creator.

Because it was difficult for a Master Creator to cultivate Silver Stage Legendary Quality Guardian Beasts.

At the very least, the Master Creator he was following didn't have this capability!

Wang Xiangnan previously found it laughable when people compared Yan Luo with Jianmu.

But now, Wang Xiangnan felt that Yan Luo could absolutely be mentioned in the same breath as Jianmu!

Both had Grandmaster Creators behind them, and both had unlimited potential for the future.

Jianmu's Grandmaster Creator was willing to provide him with Grandmaster resources, why wouldn't the same be for Yan Luo?

Looking at the four Undead Species Guardian Beasts beside Yan Luo, Wang Xiangnan vaguely guessed something.

If it was really as he suspected, then Yan Luo was simply astonishing!

Wang Xiangnan decided to carefully watch Yan Luo's performance.

Wang Xiangnan didn't share what he saw in the livestream chat, but there were still discerning viewers in the room.

The quality of Undead Species Guardian Beasts was not as difficult to discern as Silver Stage Half-Elves like the Rainy Doll; the quality of Undead Species Guardian Beasts was easy to see from their appearance.

[Lin]: I can confirm that all three of Yan Luo's Corpse Hunters have reached Legendary Quality. My eyes are feasting today, seeing three Silver Stage Legendary Quality Guardian Beasts!

[Thousand Year Flute]: Yan Luo's Undead Species Familiars are simply too cool! I really like this style of Familiars! Only that I can't bring out Life Energy to wash my body to prevent it from being corrupted by Dead Qi, otherwise, I would also want to contract some Undead Familiars!

[Willow shore by the lake]: Nah, even though you can contract an Undead Beast, it's better not to do it unless your Undead Species Familiar doesn't upgrade its Rank, otherwise the consumption of Life Energy will greatly increase!

[Fickle Carrot]: From this moment on, I declare that Yan Luo is no longer my ex-husband. Yan Luo and Jianmu are both my husbands! I marry two at once!

Cai Boshen originally didn't have the slightest desire to compete against Yan Luo at all.

But after Cai Boshen saw the Familiars that Fang Mu summoned, excitement flashed in his eyes.

Cai Boshen could figure out the ins and outs of the Familiars that Fang Mu had.

Cai Boshen had already confirmed that Yan Luo, like Jianmu, was also a genius who had a Grandmaster Creator behind him.

Yan Luo showed his Guardian Beasts, not many people knew this news right now, but it would be spread soon.

If he defeated Yan Luo, he would definitely be able to get out of the current awkward situation and let others recognize his strength.

Thinking of this, Cai Boshen directly ordered the Broken Rock Tyrant Dragon.

"Broken Rock, display the Tyrant Rock Armor, then perform Shatter Smash, followed by Spine-breaking Triple Attack!"

Cai Boshen had watched Yan Luo's previous fights and knew that Yan Luo's Giant Brutal Butcher had the ability to limit the front row Guardian Beasts.

But Cai Boshen wasn't afraid of the Giant Brutal Butcher's restriction on the Broken Rock Tyrant Dragon.

Cai Boshen planned to let Broken Rock Tyrant Dragon directly deal with Giant Brutal Butcher, then cooperate with Mist Wind Arthurdactylus to handle those three Silver Stage Legendary Quality Corpse Hunters.

Chapter 789 The 5th Undead Species Guardian Beast!_1

A Guardian Beast of legendary quality at the Silver Rank Level Ten was almost on par with a Gold Tier Five Perfect Quality Beast in terms of power.

Not to mention, his two Sub-Dragons had reached the platinum rank, and their qualities had been elevated to the legendary stage.

They all had the same quality, and thus, there was no advantage to be gained from their qualities in combat anymore.

His two Sub-Dragons were two whole major stages higher than Yan Luo's three Corpse Hunters. This gap was simply unbridgeable!

Yan Luo was destined to lose; it could only be blamed on his low Star Level for a Beast Master!

Cai Boshen didn't underestimate Yan Luo. Given a few years to improve his Beast Master abilities, Cai would be at a serious disadvantage.

But for now, he was the "Daddy"!

"Son" Yan Luo, come and feel the paternal love from Daddy's two Sub-Dragons!

In his efforts to prove himself, Cai Boshen didn't show any intention of holding back.

The colossal Broken Rock Tyrant Dragon rushed towards the Giant Brutal Butcher.

Against the Broken Rock Tyrant Dragon, the Giant Brutal Butcher seemed like a dwarf.

The skill, [Tyrant Rock Armor], activated Earth Element that adhered to the Broken Rock Tyrant Dragon's body, enhancing its defensive abilities.

It also boosted its attack power, particularly in the claws and teeth.

The Broken Rock Tyrant Dragon, clad in [Tyrant Rock Armor], was a merciless killing machine.

[Shatter Smash] and [Vertebrae Sever], as regular bronze and silver rank skills of the Broken Rock Tyrant Dragon, were often its go-to deadly moves.

[Shatter Smash] was a leaping attack with dragon claws, relying on its powerful force to shatter the target.

[Vertebrae Sever], however, used the specialized hard scales underneath the dragon tail to inflict tremendous damage, causing the opponent's bones to crumble with its vibration amplitude. Explore new worlds at NovelBin.Côm

Given the suppression of the stag, Cai Boshen had mostly predicted that a single strike from the Broken Rock Tyrant Dragon would instantly kill the Giant Brutal Butcher.

He suddenly saw Yan Luo raise his hand, calling forth a terrifying ghost-like baby – the Hook Heart Grub Infant.

It was almost impossible for a Silver Rank Level Ten Epic Quality Hook Heart Grub Infant to control a Platinum Rank Beast under normal circumstances.

But this was Star Web, where the guardians pushed their energy further than they usually would, without facing any real consequences.

This is why beasts with sacrificial abilities often seem so powerful in the Battle Network.

The Hook Heart Grub Infant, just upon being summoned, raised both its hands that were adorned with elongate nails.

Its tentacles then elongated from behind it, sneaking about the body of the Giant Brutal Butcher.

The Hook Heart Grub Infant used its tentacles to pull itself onto the neck of the giant butcher, activating its tentacles.

The tentacles, which were initially coiled within the Hook Heart Grub Infant, stretched nearly ten meters. Most of them were shattered by the flailing claws of the Broken Rock Tyrant Dragon.

But a small number still managed to land on the dragon's body.

The Hook Heart Grub Infant let out a shrill scream as its tentacles were destroyed, yet, at the same time, it managed to inflict a heart tag on the Broken Rock Tyrant Dragon.

While damaging the dragon's spirit, it also eradicated its mental defenses.

The dragon's actions were, therefore, momentarily slowed down.

The torment of the spirit kindled the Broken Rock Tyrant Dragon's fear of the Subduing Dragon Nightmare Tiger.

Following the success of its first move, the Hook Heart Grub Infant, using the Giant Brutal Butcher's shoulder as a springboard and its remaining tentacles, hooked itself onto the dragon's neck.

The moment the grub's body touched the dragon's neck, the dragon began to violently shake its body in an attempt to throw the grub off.

It was then that the Hook Heart Grub Infant executed its skill [Chaotic Heart Claw].

The sharp claws hit the dragon's psyche, sending it into confusion. This confused state not only lowered the dragon's mental defenses, making it easier for the grub to torment its spirit and inflict the Heart Tag, but it also induced the dragon to indiscriminately attack anything but the grub.

Once the dragon stopped attacking the grub, the grub, at the cost of its life, executed the skills [Chaotic Heart Claw] and [Heart Touching Whip].

It also tried to infuse its psychic energy into the dragon's body using its unique property [Corpse Puppet].

The chaotic and evil psychic energy of the Hook Heart Grub Infant wasn't capable of controlling the Broken Rock Tyrant Dragon, yet it managed to further affect its psyche.

The Hook Heart Grub Infant's self-destructive series of moves bought the Giant Brutal Butcher an opportunity.

The Giant Brutal Butcher came in front of the dragon, grabbing its claws and embedding the dragon's short claws within itself.

The Giant Brutal Butcher executed the skill [Flesh Erosion Trap], turning its flesh into a mire that trapped the dragon's claws.

The sequential beast corpses that Fang Mu allowed the Giant Brutal Butcher to devour acted like sturdy frames, supporting the butcher's flesh.

They ensured that the dragon, despite its violent struggles, couldn't tear the Giant Brutal Butcher into pieces.

The Giant Brutal Butcher's ability to swallow sequential beast corpses completely relied on its unique property [Flesh and Blood Armament].

Fang Mu glanced at the wide-open mouth that was about to take a bite of the Giant Brutal Butcher's skull.

He commanded the Giant Brutal Butcher to move all its skeletons along with the two dragon claws downwards.

Chapter 790 The 5th Undead Species Guardian Beast!_2

Then, its body leapt high, thrusting the mouth of the Broken Rock Tyrant Dragon towards the chest of the Giant Brutal Butcher.

This bite caused a violent crashing sound, the teeth of the Broken Rock Tyrant Dragon evidently unable to sever the Sequential Guardian Beast's bones.

Under great force, the Broken Rock Tyrant Dragon instead had the sensation of biting into a steel plate.

The Giant Brutal Butcher employed the newly acquired Epic Quality trait exclusive to its advanced stage, "Bones of the Same Cold", which wrapped its flesh and blood around the head of the Broken Rock Tyrant Dragon.

The Soul Flame of the Giant Brutal Butcher began to burn. Until the Giant Brutal Butcher died, the Broken Rock Tyrant Dragon would be completely unable to break free from its constriction.

The Grave Sacrifice Pregnant Mother, the Grave Sacrifice Father, and the Grave Sacrifice Child were not idle. The three of them seized this opportunity to cast the Skill "Swift Hunting Claw" on the Broken Rock Tyrant Dragon, continuously opening one gash after another.

The defense of the Broken Rock Tyrant Dragon was strong, but all three of the Ritual Cemetery Three Treasures had reached Legendary Quality, equal to a Silver Rank Level Ten Guardian Beast.

And they were capable of cracking the defense of the Broken Rock Tyrant Dragon!

Dead Qi seeped into the Broken Rock Tyrant Dragon's body through the wounds, and the Giant Brutal Butcher also started to implement the Ordinary Quality Ability ["Gluttony"].

Tearing at the flesh of the Broken Rock Tyrant Dragon's neck, it is recovering its own injuries through the flesh of the Broken Rock Tyrant Dragon.

Originally, Cai Boshen's script was for the Broken Rock Tyrant Dragon to kill the Giant Brutal Butcher in an instant and then launch an attack directly at Yan Luo.

The three Corpse Hunters alone would not be enough to block the path of the Broken Rock Tyrant Dragon, but the result was that Yan Luo summoned another Guardian Beast.

This Guardian Beast led the Broken Rock Tyrant Dragon into a state of chaos, mental affected.

Inconceivably, the Giant Brutal Butcher managed to control the Broken Rock Tyrant Dragon!

Due to the continuous assault on the Broken Rock Tyrant Dragon by the Hook Heart Grub Infant through Skills ["Heart Touching Whip"] and ["Chaotic Heart Claw"], Cai Boshen was unable for a while to issue effective commands to the Broken Rock Tyrant Dragon.

The body of the Giant Brutal Butcher did not have oxygen to supply the Broken Rock Tyrant Dragon, which already had a massive demand for oxygen due to its enormous size.

In the process of vigorous struggling, it would consume large amounts of oxygen.

Cai Boshen knew that he had to free the Broken Rock Tyrant Dragon from control as soon as possible.

The three Corpse Hunters' assault would not threaten the life of the Broken Rock Tyrant Dragon, but over an extended period, even ants could bite an elephant to death.

Just as Cai Boshen was directing the Mist Wind Arthurdactylus to implement the Skills ["Wind Slash"], ["Wind Roar Stab"], and ["Tornado Positioning"] to attack the three Corpse Hunters, the barrage of comments in Cai Boshen's live streaming room was as dense as a summer rainstorm, making it hard to read clearly.

[Ink Snow Azure Pine]: What is this? Cai Boshen wants to prove himself every day and ended up in this state? He was really too haughty! Knowing about Yan Luo's Guardian Beast ability, why didn't he let Mist Wind Arthurdactyl directly get rid of Yan Luo's Guardian Beast from a distance?

Ink Snow Azure Pine is a long-time fan of Cai Boshen.

When Cai Boshen faltered in facing Jianmu previously, Ink Snow Azure Pine not only did not blame Cai Boshen but also consoled him.

Since Cai Boshen started streaming, Ink Snow Azure Pine had been sending many gifts to Cai Boshen.

Because Ink Snow Azure Pine knew very well that Cai Boshen could not beat Jianmu because Jianmu's Guardian Beast was extremely potent.

The two Guardian Beasts of Cai Boshen possessed the bloodline of the Main Dragon Species, which was already considered outstanding.

You can't abandon your idol just because they are at their lowest.

But seeing Cai Boshen being so arrogant, Ink Snow Azure Pine just couldn't stand it anymore.

A person who does not respect battles is not worth being idolized!

Compared to Ink Snow Azure Pine's attention, which was all on Cai Boshen, the vast majority of the audience in Cai Boshen's live streaming room was focused on Fang Mu.

[Fickle Carrot]: Hahaha! My husband Yan Luo is simply awesome! When can my husband Yan Luo start a live streaming room? I don't want to send gifts in Cai Boshen's live streaming room! If I send gifts in Cai Boshen's live streaming room, my husband will not receive it!

Read new adventures at NovelBin.Côm

[Little White Good Little White]: Am I the only one who noticed that Yan Luo still has Guardian Beasts? Actually contract five of them! Can a One-point Stars Beast Master really contract so many Guardian Beasts?! Can anyone explain what the hell is going on?

Nobody in the live streaming room responded to Little White Good Little White's questions.

Because except for people like Wang Xiangnan who gradually guessed the truth, the vast majority of people could not comprehend it.

The number of Guardian Beasts that Yan Luo contracted had clearly exceeded many viewers' knowledge.

The comments kept flickering across the screen, and the battle did not stop.

The Mist Wind Arthurdactylus excelled both in close combat and ranged elemental attacks.

Its ranged elemental attacks were extremely fierce.

[Tornado Positioning] allowed the Mist Wind Arthurdactylus to target an individual and launch consecutive tornado attacks.

These tornadoes have the ability not only to interrupt attacks but also significantly reduce the enemy's movement speed.

Since Grave Sacrifice Pregnant Mother attacked the Broken Rock Tyrant Dragon most aggressively, Cai Boshen chose Grave Sacrifice Pregnant Mother as the target for his Tornado Positioning skill.

Intense tornadoes originated in front of the Broken Rock Tyrant Dragon and continuously surged towards Grave Sacrifice Pregnant Mother.

Grave Sacrifice Pregnant Mother was directly bound midair by the tornado.

With the strength of Grave Sacrifice Pregnant Mother, it simply couldn't escape from the tornado.

The Grave Sacrifice Child used the skill [Spinal Lock], forcefully dragging the Grave Sacrifice Pregnant Mother who was controlled by the tornado, allowing it to narrowly dodge the [Wind Slash].

However, it was still shot into a sieve by the [Wind Roar Stab].

[Wind Slash] is a skill where the Mist Wind flaps its wings creating a wind blade, the wind blade provides a strong tearing effect when hitting the target.

And [Wind Roar Stab] compresses wind into a wind stab by roaring, initiating an attack on the target.

The high-frequency formation of wind stab has a certain invisibility effect.

As the old saying goes, it's easy to dodge an open spear, but it's hard to avoid a hidden arrow.

This invisible skill [Wind Roar Stab] is extremely difficult to avoid.

Because Fang Mu was able to see through the data of the Mist Wind Arthurdactylus, he commanded the Grave Sacrifice Pregnant Mother to hide behind the Giant Brutal Butcher when the Mist Wind Arthurdactylus took action.

It didn't matter whether the Grave Sacrifice Child or Grave Sacrifice Pregnant Mother was dead or alive.

As long as the Grave Sacrifice Pregnant Mother remained alive, the team Grave Sacrifice Three Treasures could continue operating.

This is the power of Fool's Shadow's Innate Divine Skill [Eye of Omniscience]!

During battles with others, Fang Mu was able to gain prior understanding of their Beast Masters' abilities, preventing himself from falling into a pitfall.

However, the opponent was completely unaware of the Escort Beasts' abilities on Fang Mu's side.

If Cai Boshen also had the ability to see through the opponent's Beast Masters, he certainly would not have let the Broken Rock Tyrant Dragon collide with the Giant Brutal Butcher at the very beginning.

Instead, he would prioritize finding ways to kill the Grave Sacrifice Pregnant Mother.

The Grave Sacrifice Pregnant Mother, who was shot into a sieve by the Mist Wind Arthurdactylus's skill [Wind Roar Stab], was already dead.

At this moment, the Grave Sacrifice Pregnant Mother rushed out.

Grave Sacrifice Pregnant Mother did not implement the exclusive trait [Bone of the Same Cold], but instead activated the exclusive trait [Cruel Maternity] that was obtained from the legendary promotion.

She hunkered down and used her sharp claws to rip the body of Grave Sacrifice Pregnant Mother into pieces, then quickly swallowed it into her belly.

The abdomen of Grave Sacrifice Pregnant Mother visibly swelled up at a speed observable to the naked eye, and then a Grave Sacrifice Child was born from Grave Sacrifice Pregnant Mother through the exclusive trait [Flesh Newborn].

By this time, the battle had lasted more than two minutes.

Cai Boshen seemed to have ignored the Hook Heart Grub Infant, and did not attack it once.

However, the Hook Heart Grub Infant did not stop implementing the skills [Touch New Whip] and [Chaotic Heart Claw].

The thoughts of the Broken Rock Tyrant Dragon were becoming more and more chaotic, and the Heart Strike mark within its body had reached its limit.

The Hook Heart Grub Infant crossed its claws and stabbed its slender fingers into the shoulder of the Broken Rock Tyrant Dragon, implementing the exclusive trait [Life-Burning Slavery].

Although the Broken Rock Tyrant Dragon's rank was two levels higher than the Hook Heart Grub Infant, even if the Heart Strike mark had reached its limit, it still could not take control of the Broken Rock Tyrant Dragon.

Nonetheless, it was able to completely restrain the movements of the Broken Rock Tyrant Dragon and prevent it from becoming an enemy of its own.

But for the undead species, if a living being was not an enemy, it could only be bait.
