

Beast Tamer 88

Chapter 88: Frost Language Snow Dragon! 1

This little snake first bowed to Luo Su's fingertip when it appeared.

Then it swiftly coiled around Fang Mu's wrist, its tail drawing a line across Fang Mu's palm.

With the knowledge of a Beast Master that Fang Mu possessed, he knew that this was a friendly gesture from a serpent beast.

The rank of this snake beast contracted by Luo Su must be high!

Although, other than mechanical beasts, other kinds of Guardian Beasts are non-sequential and cannot communicate with humans in their language.

But aside from plant-type beasts and a few insect beasts.

Most Guardian Beasts possess intelligence equivalent to a normal person after stepping into the platinum rank.

Luo Su's snake beast knows its own identity, so it makes a special effort to please him.

It hopes to upgrade its bloodline with his help.

The high intelligence of high-rank Guardian Beasts makes Fang Mu cautious.

Fang Mu grips the cool body of this little snake, tentatively probed it with the Eye of Omniscience.

Upon examination, Fang Mu discovered the small snake in his hand is a Diamond Rank Shimmering River-Swallowing Python!

Its quality has been raised by Luo Su to an epic quality, and it possesses two special characteristics!

The second of these special characteristics is known as [Snake Control].

It has the ability to control wild snake beasts weaker than itself.

It can also exert a certain amount of suppression against snakes beasts that have already been contracted by Contractors.

This kind of unique characteristic of a king of the same race is exceptionally domineering and excellent.

Few beasts can master this when upgrading their quality.

The current Shimmering River-Swallowing Python has clearly mimicked.

The Shimmering River-Swallowing python without mimicry is a truly enormous creature!

In terms of size, it's far beyond a thirty-meter Giant Scorpion Lion!

It is said that after the Shimmering River-Swallowing python advances to sequentials, it can open its mouth and directly drain a large river!

Luo Su is obviously not satisfied with this.

He wants the Shimmering River-Swallowing Python to step into the sequential rank after upgrading its bloodline.

Fang Mu can achieve this situation simply by consuming Blood Aged Wine.

As for consumption, firstly it's related to the rank and quality of the Shimmering River-swallowing Python.

Secondly, it's related to the current state of the Shimmering River-Swallowing Python.

Normally, the colour of the Shimmering River-Swallowing Python's scales should be tricolour.

Five colours is already a sign of the maturity of the Shimmering River-Swallowing Python's bloodline.

Seven colours is evidently one step away from bloodline transformation!

Luo Su is a bit nervous watching Fang Mu staring at Shimmering River-swallowing Python.

He's afraid that Fang Mu would shake his head and refuse him.

At this time, Luo Su heard Fang Mu say hesitantly.

"My master might possibly accept this commission, but you need to provide your own materials!"

Luo Su was overjoyed and quickly said.

"Of course!"

“Just tell me what materials you need to upgrade the Shimmering River-swallowing Python’s bloodline!”

Fang Mu nodded and did not immediately disclose his material needs.

He planned to pass the message to Luo Su tomorrow through Lu Yuyu.

Otherwise, it would be a bit inappropriate for him to start arranging materials before master’s consent!

As to what materials a normal Grandmaster Creator would need to purify the Shimmering River-Swallowing Python’s bloodline.

Fang Mu does not know!

For Fang Mu, a high-schooler, the books in the Library do not cover such high levels!

But Fang Mu has already figured out what he needs.

A pot of Diamond-Level Sleepy Moss and a hundred kilos of Deep Pool Heavy

Water.

Sleep Moss is a production-type plant beast that possesses no offensive abilities.

But once a beast consumes it, it will immediately fall into a deep sleep!

Body, spirit, and soul, all three layers lose their sense of perception.

Diamond-ranked Sleep Moss can make any beast below sequential lose consciousness.

With this pot of Diamond-Level Sleep Moss, Fang Mu no longer needs to worry about exposing his secret as long as he doesn't upgrade the sequential beasts! Things like Life Elixir and Element Potions, Fang Mu can trade directly.

But not the Blood Aged Wine!

He can only use Blood Aged Wine privately.

As for Deep Pool Heavy Water, it is prepared for the Clean Water Spirit.

Deep Pool Heavy Water contains a massive amount of Water Elemental Energy, its only disadvantage is that it contains a similar amount of impurities!

Deep Pool Heavy Water is the main ingredient for creators preparing high-purity Water Element potions.

With these hundred kilos of Deep Pool Heavy Water.

Fang Mu would be able to quickly boost the strength of the Clean Water Spirit by absorption.

It would not be necessary as it is now; each day only processing the trash containing weak water elemental energy to condense the Water Element Crystal.

Though Lu Yuyu asked for other spirit materials for raising the Shimmering River-swallowing Python, which he didn't have,

He only needed to say he got it from his mentor!

If Lu Yuyu and Luo Su wanted to trade for long-term, they certainly would assure that he didn't suffer loss.

At that time, the value difference of those materials would be compensated by them in other ways.

“Tomorrow morning, I will contact Brother Lv for your reply.”

“Before sending Shimmering River-Swallowing Python over, you could feed it some Diamond -Level Sleepy Moss first.”

None of these demands from Fang Mu were unreasonable.

Other high-starred creators asked for much more when it came to helping enhance beasts’ bloodline.

“No problem, if possible, I hope Lincai can evolve according to the current bloodline.”

“I’m worried that any mutations in Lincai’s bloodline will not be compatible with my Mystery Chapter [Water System Poison].”

Luo Su felt slightly embarrassed right after he finished his sentence.

Usually, one can’t add conditions when asking a Grandmaster Creator to help enhancing a beast’s bloodline.

What he was doing now was really ungrateful.

However, he had paid a heavy price to fuse the runes into chapters!

If they did not work after the beast's bloodline had been enhanced, he would surely be at a loss!

Fang Mu took a surprised look at Luo Su after hearing him.

Fang Mu had only known about runes, not chapters.

It was Feng Lin who first mentioned chapters to him.

Being able to understand one rune based on any property was already a big fortune for ordinary Beast Masters.

While fusing runes into chapters required the combination of four runes of the same property.

It was said that the enhancement that runes and chapters brought to the beast was simply unquantifiable.

Lu Yuyu's brows wrinkled up tightly after Luo Su finished his words,

Luo Su's words somehow seemed to violate the etiquette of asking a high-starred creator for help.

To Lu Yuyu's surprise, Fang Mu didn't refute, but instead seriously responded,

"If my mentor takes it, I'll mention it to him!"

Hearing this, Lu Yuyu, if not for the consideration of Jianmu's identity, would definitely pat Fang Mu's shoulder hard,

And then he would drag him out not to return until they were drunk!

Jianmu was truly considerate!

Luo Su was also a little surprised by Fang Mu's response.

Not only Luo Su, but even the Shimmering River-Swallowing Python coiled around Fang Mu's wrist was being gracious for Fang Mu's words.

On the spot, Luo Su took out a spirit tool from his wrist-mounted Space Spirit

Tool and handed it over to Fang Mu, saying,

“Regardless of whether this thing can be done, this Golden Top Class Spirit Tool, the Sea Heart Pendant, is my gratitude gift to you.”

The Eye of Omniscience can not only inspect beasts, but also spirit tools.

Luo Su definitely came to ask Fang Mu for help with absolute sincerity. The jewellery type of golden spirit tools was very rare to begin with, More importantly, this golden spirit tool has an extremely strong healing function.

Once oneself or those in the vicinity are injured,

By activating the Sea Heart Pendant, the spirit of the gold-ranked Moist Rain Jellyfish can be summoned within.

This being is capable of healing oneself and others within the vicinity.

This kind of spirit tool is equal to having a logistical support in a fight.

This Gold Class Spirit Tool is not yet usable by Fang Mu at his current Beast Master level.

It will only be appropriate to use the Sea Heart Pendant when he reaches the peak of the Two Mang Star.

His older sister, Fang Qin, always encounters danger when she goes out on missions.

Even though his older sister is already a Four-pointed Star Beast Master, This Sea Heart Pendant is still a great thing for her to keep herself safe.

If his older sister had had the Sea Heart Pendant earlier, maybe her finger would not have been broken!

Fang Mu did not bother being polite with Luo Su and directly accepted the Sea Heart Pendant.

The resources of a Grandmaster Creator are considered top-tier in the World of Beast Masters.

Just agreeing to help Luo Su already equalled giving Luo Su and Lu Yuyu a huge favor.

If he does not accept Luo Su's gratitude gift, Luo Su and Lu Yuyu might feel uneasy instead.

Having checked the time, Lu Yuyu spoke up,

“We should be leaving.”

“I heard that in order to attract people to participate in this trade conference,”

“Liu Jihui has specially taken out an extremely rare Dragon Species Frost Giant Dragon for auction!”
