

## **Beast Tamer 92**

### Chapter 92: Ling Poison Dark Lotus\_I

A light blue lotus, no larger than a bowl, bloomed accompanied by a lotus leaf, on the display stage.

The dance of flowers and leaves seemed to transform into a shadow, hiding its figure.

Fang Mu has obtained the domain-type Wood Beast Eden GreenLand.

Although he couldn't establish a contract with Eden GreenLand because he hadn't condensed any new Covenant Blood Essence,

Fang Mu had already begun to prepare for the Wood Beast that is suitable for planting on the exclusive characteristic of Eden GreenLands, [Above the Green Field].

Undoubtedly, the best choice would be a Wood Beast that can stimulate Eden GreenLand and lead to a joint operation with Fang Mu's only combat-focused Clean Water Spirit.

The gap between high-star Beast Masters is not entirely due to the wide differences in beast strength.

A significant reason is that the various beasts under a Beast Master's contract cannot effectively cooperate.

Once the two beasts of a Beast Master can work together, they often produce an effect where one plus one is greater than two.

Fang Mu didn't have a good choice for this kind of Wood Beast.

The diversity of beasts is first and foremost based on the continuous evolution of life.

Even a genuine Grandmaster Creator wouldn't dare say they have seen all beasts.

Fang Mu's knowledge comes from the Library of Jinghai Beastmasters High School.

Although Fang Mu has studied many topics related to Beast Mastery, it was based on his previous understanding of the essential evolutionary process.

It wasn't Fang Mu that had such a wide-ranging understanding of Beast species.

Looking at the pale blue lotus flowering under the Eye of Omniscience,

Fang Mu felt that nothing is more suitable for him than this Wood Beast called the Ling Poison Dark Lotus!

[Beast Name]: Ling Poison Dark Lotus

[Beast Species]: Nymphaeaceae / Dark Lotus Genus

[Beast Level]: Bronze (3/10)

[Beast Element]: Wood

[Beast Potential]: Silver

[Beast Quality]: Epic Quality

Skill:

[Poison Gathering]: It can gather the toxins nearby Roots through root system, lock in the range of roots, and has a minute healing effect on the area covered by the roots.

Exclusive Characteristics:

[Leaf Lotus Dance]: The lotus leaf will spontaneously resist external attacks, unleash the stored severe poison, enhance its own defense, and the lotus flower can combine the severe poison collected during the battle, and condense the severe poison into a lotus heart to attack the target.

[Cicada, Frog, Lodging on Lotus]: For each new lotus leaf grown, choose to let a frog's life soul of no more than its own stage parasitic on it. For each new lotus flower, choose to let a cicada's life soul of no more than its own stage parasitic on it. (The parasitic spirits live in a symbiotic relationship with the Ling poison Dark Lotus; to continue to increase the strength requires a portion of the energy from Ling Poison Dark Lotus.)

Evolutionary Path:

(1): Ling Poison King Lotus, (2): Ling Poison Expelling Dark Lotus, (3): Frog Breeding Dark Lotus.

The Ling Poison Dark Lotus, like the Frost Language Snow Dragon, has been upgraded in quality.

The resources the Lionheart Brigade invested in this Ling Poison Dark Lotus, however, are clearly more numerous.

Because the Frost Language Snow Dragon only made it to Perfect Quality, This Ling Poison Dark Lotus has been upgraded to Epic Quality.

One cannot imagine how much the Lionheart Brigade had spent to pile up the quality of the Ling Poison Dark Lotus!

However, this Ling Poison Dark Lotus that Fang Mu considered to be extremely suitable for him might not necessarily be liked by others! Even if they do like it and are willing to buy it for a large sum,

They might not dare to sign a contract with it!

The exclusive characteristics of the Ling Poison Dark Lotus after being upgraded to the Epic Quality, [Cicada, Frog, Lodging on Lotus], is very strong.

The Ling Poison Dark Lotus can lodge the souls of frog and cicada creatures within its body, cooperating with them in battle.

But the price to pay is to establish a symbiotic relationship with those spirits residing in its body,

Sharing energy to increase their strength together.

The Ling Poison Dark Lotus currently in Bronze stage has only one lotus flower and one leaf.

If calculated based on growing only one lotus leaf and flower for each major level upgrade,

By the time it progresses to Diamond rank, with ten spirits residing in its body, the Ling Poison Dark Lotus's rate of growth would be about ten times slower than that of other beasts of the same rank.

Not everyone can be like Fang Mu, cultivating beasts without worrying about the resources involved.

'Frog Breeding Dark Lotus' has been planted on [Above the Green Field], allowing Eden Greenfield to gain its exclusive traits, [Leaf-Lotus Dance] and [Cicada, Frog, Lodging on Lotus].

When the Clean Water Spirit evolves into 'Rainy Doll' and releases a poisonous rain.

The Eden Greenfield underneath Fang Mu's feet can absorb this poisonous rain, transforming it into Fang Mu's defensive and offensive weapon. The exclusive trait [Leaf-Lotus Dance] can collect the intense poison it absorbs during battle and condenses it into a lotus heart to attack the enemy.

The strength of the lotus heart depends on the intensity and quantity of the absorbed poison.

If the intensity and quantity of the poison being offered are high enough.

It can become a kind of explosive offensive weapon!

This pairs up perfectly with the mysterious pattern [Wood System: Eruption] Fang Mu has comprehended.

Not only Fang Mu was attracted to the Ling Poison Dark Lotus, but also Lu Yuyu and Luo Su also had their eyes drawn to it.

“Liu Jihui actually had this trick up his sleeve!”

“The quality of Ling Poison Dark Lotus wasn’t specified on the auction list!”

Saying this, Lu Yuyu was a little puzzled.

“Has Liu Jihui gone mad!”

“Even though the Ling Poison Dark Lotus’s skill [Poison Gathering] can prevent the spread of the poison, it’s not worth raising its quality to Epic, is it!” Upon hearing this, Luo Su glanced at Lu Yuyu.

“Ah Yu, you’ve been too comfortable in the Beastmaster Alliance all these years!”

“You haven’t faced different beasts on the battlefield for a long time now, have you?”

“The skill Poison Gathering of the Ling Poison Dark Lotus can certainly prevent the internal spread of ingested toxins.”

“But the value of Poison Gathering is far less than the exclusive trait Leaf-Lotus Dance.’

“Leaf-Lotus Dance allows Ling Poison Dark Lotus to collect toxins during battle.”

“After Ling Poison Dark Lotus has grown strong enough, it can clean up land contaminated by different beasts, reclaiming precious land resources for us humans.”

“This is why this Ling Poison Dark Lotus was promoted to Epic quality.”

Hearing this, Lu Yuyu could not help but feel embarrassed and rubbed his hair

a bit.

Mindset determines the level!

I have indeed been too comfortable for a long time, too comfortable to immediately think of the first exclusive trait of Ling Poison Dark Lotus, Leaf-Lotus Dance, and its effect on cleaning up land contaminated by different beasts.

From the look Luo Su gave him, Lu Yuyu felt a faint sense of disdain.

This made Lu Yuyu instantly realize why Luo Su had been unwilling to marry him for so long.

Having spent too much time in the Beastmaster Alliance and dealing with affairs as an Executor.

It seems I’ve become more and more mercantile, eroding the spirit within me.

As Lu Yuyu was reflecting on himself, he heard Luo Su continue.

“I’ve heard about this Ling Poison Dark Lotus before. It wasn’t grown by Lionheart Brigade.”

“It was only after Lionheart Brigade spent a large sum of money a few years ago that they could get it.”

“Now that they’re auctioning it off, it probably has to do with Lionheart Brigade urgently needing to transform!”

“Even if the second exclusive trait of this Ling Poison Dark Lotus [Cicada, Frog, Lodging on Lotus] might deter Beast Masters who lack resources.”

“But many large forces wouldn’t mind spending double the resources to promote Ling Poison Dark Lotus.”

“I heard that the Scavengers also sent people to the scene, mainly for this Ling Poison Dark Lotus.”

“For a beast that can clean up contamination caused by different beasts, the scavengers are sure to get it!”

“Most likely, this Ling Poison Dark Lotus will be taken by the Scavengers!”

If the Scavengers do join the competition, it is almost certain that this Ling Poison Dark Lotus will be taken by them.

Although there is no Grandmaster Creator in the Scavengers.

But, as an official force of the Dragon Rising Federation, the Scavengers have close ties with the Creator’s Guild and the Dracoid Research Institute.

The two Grandmaster Creators in the headquarters of the Creator’s Guild and the Dracoid Research Institute wouldn’t hesitate to provide high-star creators resources to the Scavengers.

Moreover, it is said that one of the three Bishops Flowers in the Scavenger,

“Dragon Mother”, is just one step away from becoming a Grandmaster Creator.

“Dragon Mother” is likely to become the Dragon Rising Federation’s third official Grandmaster Creator in the coming years!
