- Chapter 41 – 50

: Iron-eating Beast's Lightning Training Roads

Chapter 41: Iron-eating Beast's Lightning Training Roads

“Oh, number one in the rankings has finally changed.”

In the main monitoring room, the five professional Beast Tamers were enjoying the air conditioner and started commenting on the real-time points.

They weren't directly responsible for the security work. Generally speaking, the security company's personnel were still in charge of rescuing the candidates.

“I think they hunted five Longthorn wild boars. Good lord, they look like a rather energetic combination of Beast Tamers and pets.”

With just a slight evaluation, they changed the topic. They didn't pay too much attention to this change. After all, only a few hours had passed, and it was still a long way before the end of the assessment...

...

Professional Beast Tamers were undoubtedly Beast Tamers who had transcendent pets. However, those security personnel who had yet to pass the vocation assessment might not necessarily have transcendent battle power.

The Beast Tamer's Beast Taming Space, upon reaching level two, will result in the spatial crystal wall turned from colorless to gray. The pet's growth level would also have reached transcendent level. This was the basic condition for participating in the vocation assessment.

And the so-called professional Beast Tamer were elites selected from thousands of Beast Tamers who had fulfilled this requirement. They had to have theoretical knowledge, survival skills in the wild, and combat ability. They had to be very outstanding in all aspects.

Therefore, these Beast Tamers who were qualified to participate in the vocation assessment but didn't pass it didn't necessarily mean they were as lousy as most Beast Tamer trainees. Compared to them, the title of quasi-Class Beast Tamer was more suitable for the assessment qualifiers.

For example, Yan Qi, one of the security personnel this time, was a quasi professional Beast Tamer. His level was enough, and his pet level was also enough, but he just didn't pass the vocation assessment and couldn't sweep up others. That was why he didn't get that certificate.

Yan Qi was a native of Ping Cheng. His initial pet was an Iron-eating Beast. He had entered the Iron-eating Beast's base, Bamboo Stone Dojo, to learn. Therefore, he understood the Iron-eating Beast pretty well.

From the first moment he saw Shi Yu's Iron-eating Beast's performance through the surveillance cameras, he realized that Shi Yu and Eleven weren't simple.

After staying in the Iron-eating Beasts' headquarters Bamboo Stone Dojo for so long, he had never seen an Iron-eating Beast that mastered expert level hardening when it was still a cub. This was ridiculous.

After all, his Iron-eating Beast was already at the transcendent level. It had been cultivated for five to six years... The current hardening proficiency level had only just reached the expert level.

In short, Shi Yu was definitely not simple. Out of curiosity, when he changed shifts to rest, he used his private cell phone to call Bamboo Stone Dojo and found Hall Master Lin, who was a disciple in the dojo.

"Master Lin, do you remember me? I'm Little Qi, that Yan Qi with the nickname Little Bear."

The other side of the phone said, "That Little Bear Yan Qi who participated in the two-year vocation assessment, hasn't passed, and went to work at a security company?"

It hurt.

Yan Qi smiled bitterly. "Sorry, I've embarrassed our Bamboo Stone Dojo..."

"Master Lin, I'm currently in charge of security at the training base of Mt. Tian Mang. I encountered a very interesting Beast Tamer."

"His Iron-eating Beast is only about two years old, but it has mastered expert level hardening. It's so ridiculous. Isn't this our Bamboo Stone Dojo's new junior brother?"

"I really don't have any impression of him, nor have I heard of him before, so I came over to ask you. By the way, his name is Shi Yu."

Inside the Bamboo Stone Dojo...

In a very elegant room with mountains and rivers, a middle-aged man with a meticulous expression fell silent.

An iron-eating beast about two years old, expert level in hardening?

Was this Yan Qi sure that he wasn't kidding? How was this possible?

It could be said that all the iron-eating beasts in the entire Icefield City were from the Iron Bamboo Breeding Base. If there were such a talented iron-eating beast, it was impossible for him not to know.

"What did you say his name was?"

"Shi Yu. His name is Shi Yu."

Shi Yu!

"It's him?" Lin Hongnian recalled that a few days ago, Dr. Lu from the Ancient Capital University came to visit him at Bamboo Stone Dojo.

The other party seemed to be saying that she had entrusted him to help nurture a distant relative... That relative was called Shi Yu?

Because Shi Yu's initial pet was an Iron-eating Beast, she had found him.

Moreover, she even used a high-level resource obtained from the ruins as a reward.

Towards this Shi Yu, Lin Hongnian also investigated the situation of the pet collection in the Iron Bamboo Breeding Base. The result of the investigation was that... Shi Yu's information was very ordinary. The pets were all bought with loans. He was a native of Ping Cheng. He had no idea how Shi Yu was related to Lu Qingyi, who was considered a proud daughter of heaven in the country.

However, he couldn't not sell Dr. Lu a favor, not to mention that the other party had also given him a sufficiently precious reward.

"This Shi Yu, the iron-eating beast he received is clearly only a year old. Moreover, the time he received the iron-eating beast didn't exceed a month, right?"

"Expert Level Hardening?" Lin Hongnian discovered the blind spot and his expression became serious.

"Did Dr. Lu help him nurture it using a special method?"

Otherwise, Lin Hongnian couldn't imagine how a Beast Trainer could cultivate the racial skills of an Iron-eating Beast cub to expert level in such a short period of time...

Perhaps Lu Qingyi had given Shi Yu some rare cultivation resources.

“Master Lin, Master Lin...” Realizing that there was no sound for a long time, Yan Qi spoke again.

“Yan Qi, you mean that Shi Yu is training at Mt. Tian Mang, right?”

“Yeah.”

“Yes, I understand.”

“You do? So is he really an apprentice of our Bamboo Stone Dojo...”

Lin Hongnian said, “Not yet, maybe later. By the way, since his Iron-eating Beast’s hardening has reached the expert level and he is also coincidentally at Mt. Tian Mang with you there... Guide him to the magnetic mountain area. Let him mainly train there, even if it’s to lay the foundation for him to learn dojo skills in advance.”

“Huh?” Yan Qi had yet to react.

Damn it, what was going on? He hadn’t even entered the sect, and he was already teaching the unique skills of the dojo? He was so jealous...

...

At the safe area.

Shi Yu finished his hot instant noodles and ate two ham sausages. Only then was he barely not hungry.

After preparing to rest for a while, he went straight to the magnetic mountain area to find the Electric Slime to play with.

As for the five Longthorn wild boars, there was finally no need to continue dragging them. It was fine to leave them here.

“Shi Yu.”

While Shi Yu was quietly resting in the corner of the straw shed, the security guard who was in charge of registering his points came over again.

“What’s wrong?”

Shi Yu opened his eyes and turned to look at him.

Yan Qi chuckled and said, “It’s nothing. Let’s get to know each other. I’m Yan Qi.”

“Are you still planning to continue hunting in the afternoon?”

Shi Yu nodded.

“Then I suggest going to your magnetic mountain area. There’s electric ore there. It’s considered a level-one energy iron ore resource, one of the recipes for iron-eating beasts.”

“Electric iron ore?” Shi Yu recalled. This did indeed seem to be a recommended food in the Iron-eating beast cultivation manual, but the recommendation priority was not very high.

Compared to the Iron Bamboo, it was not very useful for hardening skills and its own growth. At most, it could be said to just fill one’s belly.

“Come with me.”

Yan Qi called for Shi Yu and planned to talk in a relatively empty place.

“What does this person want?” Shi Yu was stunned. He followed and decided to see what this security guard was up to.

“I’m actually an apprentice of Bamboo Stone Dojo. My initial pet is also an Iron-eating Beast. By the way, do you know what the two great mysteries of Bamboo Stone Dojo are?”

After leaving the straw shed, Yan Qi said.

“I remember that it’s a skill called Thunder Palm and a skill called Cannon Fist, right?” Shi Yu recalled.

So this guy was an apprentice from Bamboo Stone Dojo... No wonder he was so interested in him and the Iron-eating Beast.

The Iron-eating Beasts taught by the Bamboo Stone Dojo were famous for their ability to control fire and lightning. Their unique skills were the Thunder Palm and Cannon Fist. Of course, Shi Yu knew this. After all, he still had to go to the dojo to learn later.

“Well, it’s the Thunder Palm and Cannon Fist. With special cultivation methods, there’s a chance that the Iron-eating Beast can awaken the ability to control fire and lightning.”

“For example, if you want to control lightning, one of the basics is for the Iron-eating Beast to eat some metal minerals with the nature of electricity, like electrical minerals.”

“Why are you telling me this?”

If a pet wanted to master skills other than species, it had to undergo targeted cultivation. Food was a very important part of it, and Shi Yu knew this.

However, just eating electric ore was definitely not enough. Otherwise, this would not have become the unique skill manual of the Bamboo Stone Dojo.

Even if the evolution method wasn't as complicated as the Green Silkworm to the Goddess of Light Butterfly, it was impossible for only one food to be enough.

"I heard from Master Lin of Bamboo Stone Dojo that you might be going to the dojo to learn later, so I greeted you in advance."

"The minimum requirement to eat an electric ore is for the Iron-eating Beast's hardening to reach the expert level. Your Iron-eating Beast's hardening has already reached the expert level. It definitely won't be a problem to perfectly absorb the nutrition of the electric ore."

"If you plan to enter Bamboo Stone Dojo to learn in the future, the most suitable training environment for you at Mt. Tian Mang is actually the magnetic mountain area. There are many electrical ores there, and many thunder-element creatures..."

"Eating electric ores and letting the body constantly receive lightning attacks is actually the basic training to master the Thunder Palm. I think you can come into contact with it in advance."

Skill: Thunder Palm

Skill Level: Intermediate

< Introduction > It's a thunder-type skill. It gathers high-intensity electricity in the palm, making the palm like a sharp blade with strong penetration power. It has a paralyzing effect.

Yan Qi said with a smile, but he sighed in his heart. This was because his Iron-eating Beast was already at the transcendent level and had yet to successfully master the Thunder Palm. It could only have a tiny electric current lingering around its palm, unable to form a skill at all.

If he could master the Thunder Palm, he would have long passed the vocation assessment.

The Thunder Palm alone was already powerful. If it was a combination skill of Hardening and Thunder Palm... That power was something Yan Qi looked forward to.

"Is that so, thank you."

Shi Yu did not expect that before he even went to visit Bamboo Stone Dojo, there would already be apprentices from the dojo who knew him.

Was this the first lesson that Hall Master Lin had taught him?

Initially, he had planned to go to the magnetic mountain area to replicate the multiplication skill. Now, it seemed that there were other reasons why he had to go.

When it came to food... Shi Yu felt that the electric ores in the magnetic mountain area no longer needed to be exchanged for points. If Eleven's combat and training intensity were too high, the ores would probably enter Eleven's stomach for the next three days.

Chapter 42: Electric Ore

Yan Qi didn't chat with Shi Yu for too long. After all, he still had work to do next.

"Eleven, I'll take you to eat good food."

In the afternoon, Shi Yu called Eleven out of the Beast Taming Space.

Eleven was exhausted from the battle and travel in the morning. It had only slept and rested in the Beast Taming Space for a while before it was almost completely recovered. This was the power of the Beast Taming Space.

On Shi Yu's side, he rested a little and was rather energetic.

With a new goal, Shi Yu didn't want to delay any longer and planned to continue setting off with Eleven.

"Wuu—"

In the outside world, Eleven's figure slowly appeared. When it heard the word 'eat', it subconsciously wiped its mouth with its arm.

...

Due to the skill index, Shi Yu's physique should be relatively outstanding among Beast Tamers of the same level.

When he prepared to set off again, the other candidates, regardless of whether they arrived at the safe area first or later, were still resting.

When these people saw Shi Yu and the Little Iron Eating Beast leave the safe area, they looked at each other... Didn't they just hunt five Longhorn wild boars in the morning?

He actually went to hunt again in the blink of an eye. Was his liver alright???

If Chen Kai were here, he would definitely say, "As expected of you guys, you're simply our role models."

In the magnetic mountain area.

This was actually a mountain covered by a special electromagnetic field. The special environment made many magnetic metals known as electric ore appear here.XZ

Electric ore was very dangerous. It would suddenly release electricity, but this kind of electricity was also a favorite snack for many thunder-element creatures.

The map in the booklet marked that the magnetic mountain area was one of the most dangerous areas of Mt. Tian Mang. There were tenth-level ferocious beasts living there.

Moreover, most of them were thunder-element ferocious beasts known for their skill, attack power and destructive power.

Apart from that, the special magnetic field here, although not very strong, was also not suitable for Beast Tamers with weak physiques to stay long.

If too much time passed, it might have a certain impact on the Beast Tamer's liver and brain, causing the Beast Tamer to hallucinate.

However, despite the danger, Shi Yu still had to come. Compared to the ruins, this place was already very friendly, and it even produced food.

"That's the electric ore?"

With a clear target, Shi Yu, Eleven, and the others avoided some ferocious beasts to avoid wasting unnecessary physical strength. They only spent half an hour on the road before arriving at the edge of the magnetic mountain area.

At the border between the mountain and the ground, Eleven quickly discovered a special blue and white mineral. It howled and reminded Shi Yu.

The electric ore was a prismatic mineral, sandwiching between the ground and the magnetic mountain like a protruding rock. Electricity shot out from time to time. From the surrounding black scorch marks, the current strength didn't seem to be low.

"In your hardened state, go break a piece to eat?" Shi Yu encouraged.

“Σ (° △ °III) Well...”

To be honest, Eleven had never eaten electric ore before, just like how it had never eaten a Green Silkworm. Therefore, when it encountered such novel food, it would always doubt whether it could be eaten.

Foodies were also very particular. They didn't eat everything.

If it ate something bad, it would affect his training.

“Don't worry, it's edible.”

The basic requirement for the Iron-eating Beast to eat a level-one thunder-element metal mineral resource was expert level hardening. Since Eleven was at that stage already, digestion would definitely be no problem.

“Wuu...”

When Eleven heard that, it reluctantly approached the electric ore carefully. It hardened its palm and pried with all its might.

Bang!

When the Electric Mine was pulled out, the lightning suddenly cracked, and the sound shocked Eleven, causing it to sit on the ground.

Shi Yu :”...”

How could it be so stupid? It was so fierce in battle, how could it explode from digging ore?

“Wuu!” Eleven also felt very embarrassed.

It hurriedly crawled up and picked up the fallen Electric Mineral again.

At this moment, the electric current stimulated Eleven's entire body, making it feel numb. Its hair stood up, and it was very uncomfortable.

Whether it was before it ate the iron bamboo or before it ate the iron heart wood, Eleven could smell the fragrance of the food in advance.

However, this thing didn't! Instead, it looked and felt very dangerous. Could it really be eaten?

Eleven turned around and handed it to Shi Yu. Maybe it would be better for the Beast Tamer to eat it first?

“It’s alright, eat it first. You don’t have to worry about your body getting injured. Your high-speed healing is already proficient, and the electrical burns in your body can also heal on their own.”

What Shi Yu said made sense.

He wanted the Iron-eating Beast to master proficient level hardening that allowed it to be fully armed before it ate the Electric Mine, so that the electric current wouldn’t hurt the fragile cells in the Iron-eating Beast’s body.

However, it was actually fine even if Eleven was injured.

The entry-level healing speed could heal external injuries. The proficient level healing speed could also heal the injuries in the body.

Therefore, there was no problem at all. Shi Yu was very relieved. Even with such a healing skill, Eleven could still eat a large amount of Electric Mineral in the short term. He did not have to worry about his body being burdened, and from that, he could awaken his thunder talent faster.

Expert level healing at a high speed... This was also why Shi Yu thought that Eleven could eat such big amounts of food in three days...

“Wuu—” Since the Beast Tamer had said so, Eleven showed a determined expression.

Crack!

It hardened its entire body and bit at the Electric Mineral in its mouth with its hardened teeth.

Crack! Crack!

Eleven tried hard to chew the electric ore. Under the pulsing current, it ate the electric ore like a candy.

After the chewing was completed, Eleven tried hard to swallow the Electric Mineral Fragment.

“Wu—”

As Eleven swallowed the electric ore, the electric current spreading in its body made it numb again. Then, Eleven was extremely shocked.

Although it couldn’t be said to be delicious, the numbing feeling after swallowing the Electric Mineral made it feel as if lightning had exploded in its body, making it feel very strange.

It didn't reject this feeling. It even felt that it was as comfortable as during the special training. It seemed that it could really eat this?

"Burp ~" Eleven opened its mouth and spat out a weak electric arc. Then, it patted its stomach and looked at Shi Yu.

Anything else?

"Well... looks like there's no problem. Then, let's continue looking for more electric ore to eat," Shi Yu said.

According to the description of the apprentice from the Bamboo Stone Dojo, after the Iron-eating Beast ate a large amount of electric ores, it would produce a certain amount of lightning affinity and accumulate a certain amount of lightning talent.

During this process, being struck by lightning more could also accelerate the development of thunder-element talent.

These were the basic conditions to master thunder-type skills.

In fact, Shi Yu was still very interested in thunder-element skills. If there were any fire ores or cold iron ores here, he definitely wouldn't be so interested.

With the limited number of skills recorded in the skill index, compared to the Fire-Attribute Cannon Fist, he was more inclined to let the Iron-Eating Beast learn thunder-type skills.

The reason was very simple. Metal and thunder types were more compatible than metal and fire types.

For those powerful Beast Tamers, a single skill was only the foundation.

Only by combining different basic skills and forming a combination skill could one truly be considered to have entered the door of the pet taming industry.

Combination skills were very difficult for ordinary Beast Tamers because it tested the proficiency between different skills. If the proficiency was not high enough, the skills could not be perfectly combined and connected.

In a situation where the skill proficiency was really difficult to train, there were very few Beast Tamers who could have results that exceeded the original combination. It was basically something that only master-level Beast Tamers could do, but for Shi Yu, it might not be that difficult.

Because he could quickly increase his proficiency.

For example, he could upgrade Hardening to perfection. This skill could even form a long-range combination skill with thunder-type skills.

The perfect level symbol for Hardening Skill was flowing and superimposing. As for above that, the transcendent level symbol, it was releasing and applying. It was said that in the entire Icefield City, only one Iron-eating Beast had reached this level.

It meant that the Iron-eating Beast could use hardening substances to condense weapons that left its body, or stack a layer of hardening on other external items.

Shi Yu found this effect very interesting.

Therefore, Shi Yu was thinking about how violent it would be if Eleven condensed a metal cannonball in front of his palm after mastering Perfect Level Hardening and used the electromagnetic force to accelerate and throw it.

The Hardening skill at close range directly turned into a double-element high destructive long-range combination skill, Electromagnetic Cannon!

Metal and thunder types were the main cultivation routes for iron-eating beasts that Shi Yu had temporarily set.

Most pets only had one main attribute, and in order to form powerful combination skills, some powerful Beast Tamers liked to teach their pets skills with other attributes to assemble. The attributes of this secondary cultivation were usually called secondary attributes.

Shi Yu planned to focus on metal supplementary lightning. The main reason was that these two attributes were easier to form a combination skill. Compared to them, metal and fire elements weren't that compatible.

"This is an Electric Scorpion?"

As they continued searching for the electric ore and Electric Slimes, Shi Yu and the others were the first to discover new electric ore. This time, the electric ores were not alone, but three or four combined.

However, unlike before, there was a ferocious beast guarding the side of the electric ore this time. The Electric Scorpion, which was the size of two forearms and had lightning patterns on its purple body, was absorbing the Electric Qi leaking from the Electric Mine.

[Name]: Electric Scorpion

[Attributes]: Thunder

[Race Level]: Low-level transcendent

[Race Skill]: Electric Thorn

Electric Scorpion can absorb lightning and store it in its body. Then, it will input poisonous electric currents into the enemy's body with its tail thorn, killing the opponent.

Although its race was a low-level transcendent, on the same level as the green worm, it was much more threatening than the green worm.

“Zi!!”

At this moment, seeing other creatures approaching, the two Electric Scorpions, whose growth levels were around level five, seemed to be facing a great enemy.

But before they could react, they were held in Eleven's hands. As for their electric spikes, they couldn't penetrate Eleven's hardening at all...

“Wuuuuu!!” Eleven's arm shook like a windmill. It spun a few times and threw the Electric Scorpion far away.

Because the target was three level-ten Electric Slimes, Shi Yu simply ignored these minor characters.

After chasing away the competitors, Eleven started to dig these electric ores. Their goal... was to eat all the electric ores in the magnetic mountain area!

Since the registration fee had been paid, there was no need to save resources at all. Presumably, the Beast Tamer Association of Ping Cheng wouldn't really mind the disappearance of these Electricity Ores either...

If you find any errors (broken links, non-standard content, etc..), Please let us know < report chapter > so we can fix it as soon as possible.

Chapter 43: Replication and Multiplication

“What are these two guys doing?”

The magnetic mountain area was clearly also an area focused on by the staff.

In the monitoring room of the training base headquarters, as Shi Yu temporarily obtained first place in points through the five Longthorn wild boars, he also became the main focus of the five professional Beast Tamers.

On a whim, a professional Beast Tamer searched for Shi Yu's figure on the surveillance cameras, but he really found him.

However, Shi Yu's current behavior was really unfathomable.

On the screen, Shi Yu and the Iron-eating Beast were like bullies, charging into the territories of thunder-element ferocious beasts.

Then, the little Iron-Eating Beast defeated the thunder-element ferocious beast in a few moves. Then, a turning point came.

Shi Yu and the Iron-eating Beast did not have the slightest mentality of participating in the assessment. They directly threw the ferocious beasts far away, looking like they did not feel the value at the points they represented.

In addition, they had unearthed the Electricity ore that represented points, but they had no intention of exchanging points.

Instead, the iron-eating beast opened its mouth and eliminated them with a crack.

It was simply walking all the way and snatching all the way...

“Expert Level Hardening. There’s something wrong with this Iron-eating Beast.”

A professional Beast Tamer leaned over to look at the scene. He opened his mouth slightly and said, “Where did this monster newcomer come from?”

Real outstanding Beast Tamers and pets couldn’t be hidden. Shi Yu and the others could easily kill the ferocious beasts blocking the way because they relied on their expert level Hardening and proficient level super vision.

They were completely invincible.

The group of professional Beast Tamers naturally sensed Shi Yu and Eleven’s extraordinariness, and they spoke in shock.

“No wonder they could hunt five wild boars. When I was an apprentice, I was far inferior to them.”

“This candidate clearly can’t be bothered with these small points. His target is definitely a level-ten creature.”

“From the performance of this Iron-eating Beast in the image, fighting a level-ten creature is not a problem at all.”

“The level ten creatures in the magnetic mountain area... are those three Electric Slimes imported from outside, right??”

The person in charge of training, Zhou Wanshan, said, “It’s the slime. I wonder if they can handle it.”

“But even if they can’t deal with it, it won’t be a problem to retreat unscathed.”

Slimes were creatures with relatively slow movements. As long as they passed the high school physical test, they wouldn’t be caught up by the Slimes jumping around.

However, on the contrary, even if Shi Yu and his panda could defeat the Electric Slime, they would probably have to pay a price.

The main reason was that the Electric Slime’s Electric Release Skill was a thunder-element skill. Its penetration power was very strong according to its power. In addition, there was a four-level difference between the two, so even if it was expert level in Hardening, it might not necessarily be able to deal with it unscathed like dealing with low-level ferocious beasts.

Mt. Tian Mang, Magnetic Mountain, Electric Cave.

After eating a pile of electric ores, Eleven successfully imprinted the taste of the electric ores in his mind.

Then, with its sensitive sense of smell, they found this place.

“I’ve finally discovered the first Electric Slime.”

Outside the small cave, Shi Yu’s expression was excited. He had finally discovered an Electric Slime.

The Electric Slime was a blue-purple mud-like creature, very similar to an electric ore. Electric currents shot out from its body from time to time.

At this moment, it was in a shrunken state, lying in the middle of a pile of electric ores. It was not afraid of the electric current around it. Instead, it looked very comfortable.

After all, with their attributes and physiques, they could be immune to weak corresponding elemental powers. Lightning was nourishing to them, not harming.

“They found the Electric Slime.”

Shi Yu and the Iron-eating Beast finally arrived at the Electric Cave. The few professional Beast Tamers watched with interest.

Although this Iron-eating Beast looked agile and had astonishing strength, it clearly didn’t have long-range skills.

As long as he fought, he would definitely come into contact with the slime.

As for the slime, its entire body was wrapped in electricity. As long as one touched it, they would be hit by its discharge. It was very unsolvable.

Therefore, in their opinion, this battle might be quite interesting. It was a brilliant battle between evenly matched opponents.

In the Electric Cave, the Electric Slime sensed that an enemy was approaching. It immediately woke up from its meal and bounced out to look at Shi Yu and the others cautiously.

A huge battle was about to break out.

At this moment, an unexpected development occurred.

Shi Yu quickly opened his backpack and threw the high-pressure insulation rubber gloves he bought to Eleven. "Put it on, catch it, and squeeze out all the electricity in its body."

"Wuu—!"

Eleven put on the insulation glove skillfully. Obviously, this was a battle strategy arranged in advance by Shi Yu and Eleven.

Right on the heels of that, under the stunned expressions of the professional Beast Tamers, the little Iron-Eating Beast wearing insulation gloves charged towards the Electric Slime.

At the same time, the Electric Slime's entire body was filled with electricity as it bounced and hit Eleven under the discharge state.

Electricity was a low-level skill that could only release electricity through contact. Moreover, this skill's control over electricity was not high, so it was very easy to crack.

Without a doubt, the power of the Slime was not very strong. What was strong was its electrical current strength.

However, before it reached the transcendent level, its thunder-element skill facing the high-pressure insulation rubber gloves was like a son meeting his father, immediately getting shut down.

Eleven caught it in its hand like it was picking up a baseball.

Crack...

The Electric Slime kept releasing electricity in mid-air, and at the same time, it was stunned.

Eleven, who was wearing an insulation glove to catch the slime, turned its head sideways and didn't dare to look at the electric current shooting out of the slime's body.

This is so scary. It doesn't look like it can be eaten like an electric ore...

"Holy shit." This development directly made the professional Beast Tamers in the control room widen their eyes.

What was going on?

It could even be done this way?

"The base store sells insulation gloves?"

"It does, right?"

"But before this, no Beast Tamer was so clear-headed as to put them on a pet to challenge thunder-element ferocious beasts... Usually, they wear it themselves?"

"It's mainly because the power of the Electric Slime is all in its discharge and defense. Its other qualities are ordinary, and it happened to be countered by the insulation glove!"

"Who captured the slimes and set such a high number of points for them?"

The professional Beast Tamers were stunned. The level-10 creature slime with the highest points in the training was being controlled just like that?

Oh no, the other two Slimes were probably going to be killed by this strange Beast Tamer.

12,000 points was equivalent to a free gift?

"Don't worry... It's not that simple," Zhou Wanshan said with a complicated expression.

...

"Yes, Eleven, pinch it and let it continue to discharge and release electricity..."

When Eleven and the Slime were "fighting", Shi Yu was fanning the flames beside them.

Apart from releasing electricity, the strength of the Electric Slime's body was trash. There was no possibility of it breaking free.

Its defense was strong, because the Slime's soft mud-like body could withstand a huge impact. Even a hard punch might not be able to instantly kill it.

However, there was no need for Shi Yu and the others to waste their energy hitting it.

It could just pinch it with the insulation glove and wait for it to release all the electricity in its body.

This was called Tactics.

“Hu!!!”

The Electric Slime was very aggrieved and angry.

The current was released even more fiercely, but it still couldn't affect the insulation glove.

In fact, facing a level ten Boss, it was really not that easy to cheat through the fight.

Even in this situation where it was restrained, the slime still had a chance to resist.

However, unless it was desperate, the Electric Slime was very unwilling to use this skill.

High-level skill, multiplication!

If it used this skill to multiply its size, its strength would increase, and the electric current in its body could be stimulated at a greater limit. But the side effect... would make it exhausted for a long time.

The purpose of the Slimes was to shrink and act cute if possible. Unless there were special circumstances, they would never multiply their size into giant, scary demon king slimes.

And now, the Electric Slime that had encountered a desperate situation clearly encountered a special situation.

“Wu!!!!”

It cried out in extreme anger and its size began to increase continuously. At this moment, no matter how strong Eleven was, it definitely couldn't pinch it with its two hands and could only retreat.

Rip!!!

As the Electric Slime rapidly enlarged, Shi Yu's eyes lit up.

I'm not afraid of you becoming bigger. This is what I've been waiting for.

“Eleven, harden your whole body,” Shi Yu immediately instructed.

During the Electric Slime's transformation, Eleven's entire body hardened.

In the next second, the Electric Slime, which had finally escaped its control, launched a counterattack and directly bumped into it with its electrifying body.

After enlarging to a huge Electric Slime with a diameter of 1.5 meters, the impact power and the current strength of the Slime were much higher than before.

Bang!!!

Eleven also slapped him. In an instant, neither side won.

The huge Electric Slime was sent flying by Eleven, but due to its soft physique, it did not suffer much damage.

Although Eleven was wearing an insulation glove, the current released by the huge slime was too much. After all, Eleven was only wearing gloves and not an insulation suit, so he couldn't completely defend.

The other parts of his body were still accidentally invaded by the electric current. Even the hardening of the metal attribute couldn't completely defend. The combination of multiplication and discharge had already begun to take shape.

"It's reversed."

"Although the energy consumption of the Electric Slime is huge, that Iron-eating Beast definitely won't feel good either."

"It's probably a situation where both parties are injured."

The professional Beast Tamers watched the show.

However, the reversal occurred again. Eleven finally used the skill of high-speed healing.

Although it couldn't be seen from the outside, the place where Eleven's body was paralyzed and burned by the electric current was immediately healed by a green wave of life.

"Wuuu, wuu, wuu, wuu!!!" After being cured, Eleven became braver the more he fought. Like a bear, it continued to charge at the huge Electric Slime.

This scene directly shattered the views of the professional Beast Tamers.

"Is Expert Level Hardening that strong? It can even defend against a huge discharge?"

“Or is that Iron-eating Beast’s willpower strong? It resisted the stimulation of the current and counterattacked forcefully?”

After all, Eleven had a history of eating electric ores as candy.

At this moment, the slime was stunned again because after that attack, it completely lost its energy.

When it was first captured, it wasted too much electricity, causing it to be unable to counterattack after multiplying..

“Capture it and continue to squeeze it dry.” Shi Yu’s evil command came from the side.

...

Meanwhile, outside the Electric Cave...

The Electric Slime, which had all its energy drained, dimmed significantly. There was really no electricity at all, and it returned to its normal size.

It was hugged by the excited and panting Eleven and fell asleep.

At this moment, Shi Yu began to approach with a smile. He touched the slime with his loving hand.

In the initial five skill sections of the skill index, upon contracting the first pet, Eleven, there were five new skill sections.

Next, the index was about to record the seventh skill, multiplication.

Discharge wasn’t worth it, however. The skill level was too low, so it was inferior to the Thunder Palm. Shi Yu chose to give up.

When he touched the slime, Shi Yu recalled the scene when he saw the multiplication skill. At the same time, he activated the skill index.

In the next moment, the seventh page of the stone illustrated handbook flipped open in Shi Yu’s mind.

The image of the thunder-element pet Electric Slime appeared.

Skill: Multiplication

[Skill Level]: Advanced

< Introduction > It's a special ability. It can shrink and expand the body. Under a shrunken state, the strength will decrease and the energy recovery speed will increase. Under the enlarged state, the energy consumption will increase and the strength will increase.

He had obtained the all-purpose skill!

Great!

When Shi Yu ravaged the level-ten creature Electric Slime in his hand like it was made of rubber, all the professional Beast Tamers in the control room fell silent.

Not only did he defeat it, but he even dared to personally destroy a level-ten creature? This was so scary for Beast Tamers and pets. Was this really a newbie intern??

Chapter 44: Forget the Skill Index

Next, the Electric Cave occupied by the Electric Slime was undoubtedly taken over by Shi Yu.

There were many electric ores here, enough for Eleven to feast on.

In addition, Shi Yu was not in a hurry to exchange this Electric Slime for points.

"I'll give you two electrical ores every day as food, but no matter how much electricity you eat, you have to release it."

Shi Yu communicated with the blurred Electric Slime telepathically.

This guy was a very good generator. The discharge skill could train Eleven's lightning resistance and increase its thunder affinity.

It was roughly equivalent to lightning forging the body.

Ordinary pets definitely couldn't go about it like this, but Eleven was an exception.

A trace of thunder-element talent and proficient level high-speed healing could recover the damage caused by the lightning stimulation at the fastest speed, allowing Eleven to train with lightning without restraint.

Electric Slime: I might not be human, but you're really not.

Just like that, the drained Electric Slime directly became the second training tool after the Green Silkworm.

“Wuuu!”

After hearing the new training content from Shi Yu, the Little Iron Eating Beast danced around.

Eleven was still very interested in this new training method.

Eating electric ores and being electrocuted by a weakened version of the discharge skill seemed to be no worse than jumping off a building.

It was just that after training like this, Eleven’s hair became fluffy, causing it to look fat.

“This...”

In the safe area, Little Bear Yan Qi, who had told Shi Yu that he could come to the magnetic mountain to train, fell into deep thought.

He looked at the Iron-eating Beast carrying the Electric Slime running in the image with a question mark on his head.

Although he had told Shi Yu that allowing the Iron-eating Beasts to undergo the lightning baptism after eating the electric ore could also increase their thunder-element talent...

He didn’t expect Shi Yu to directly take down the Electric Slime as a tool pet.

His telepathy talent was so overpowered...

Shi Yu’s even more inhumane actions didn’t stop there. Using the insulation glove, they quickly found another companion for the first slime.

The Electric Slime resting in another Electric Cave in the Magnetic Mountain was also captured by Shi Yu and the others.

The next day, the third Slime couldn’t escape either. It was captured by Shi Yu and the Iron-eating Beast.

In the end, the situation clearly evolved into the three Slimes helping Eleven train.

The three exhausted Electric Slimes were surrounded by Shi Yu in a triangle, with Eleven in the middle.

Shi Yu provided an electric ore. The Slime that absorbed a little energy had to release some electricity and let the little Beast in the middle train its body.

Although the Slimes were unwilling, they could only surrender due to the power of Shi Yu and the Iron-eating Beast.

It couldn't be helped. Shi Yu's control was too good. He definitely didn't give the Slimes too much food. He had been keeping their battle power at the level of electric rubber, causing them to be unable to resist at all.

Regarding controlling food, because of Shi Yu's rich experience with the green worm, the Electric Slimes were simply miserable.

Just like that, Shi Yu and the others only stayed in the magnetic mountain for a day before reaping the harvest from the large amount of Electric Ores and the slime's discharge forging.

29th, noon.

At this moment, after a day, Shi Yu and the others had already gotten all the ores that were easier to find in the magnetic mountain area.

Eleven ate crazily while undergoing lightning training... Then, something went wrong.

"Wuuu!"

After being electrocuted once, the fluffy Eleven stretched out its palm.

In the next second, a blue and white electric current shot out of its palm and entangled crazily!

Intermediate-level skill, Thunder Palm!

"Holy shit."

This change made Shi Yu, who was resting beside him, nearly fall.

What was going on?

Eleven... comprehended the Thunder Palm on its own???

Shi Yu hurriedly put the three Slimes in the Worm Silk Sack and returned to the previous safe area.

He found Yan Qi to register again and called out Eleven.

“Mr. Yan Qi, is the Thunder Palm you’re talking about referring to this?”

Bzzt.

The Little Iron Eating Beast stretched out its palm with an extremely serious expression. A second later, more than ten blue and white electric arcs shot out of its palm.

Amazing. There was no need for the skill index.

“Wuu.” This time, it had successfully learned a new skill without Shi Yu’s addition!

“Holy shit.”

Yan Qi exploded on the spot.

“How is that possible?”

“This doesn’t make sense.”

He looked at Eleven, the iron-eating beast cub that could already be filled with electricity, dumbfounded, and fell into deep thought about life.

“It’s only been a day. How can your Iron-eating Beast awaken its thunder talent so quickly?”

At the moment, his own Iron-eating Beast’s control over lightning seemed to be even inferior to this little Iron-eating Beast!

This was ridiculous. In general theory, it was impossible to awaken lightning talent so easily with just the electric ore and Electric Shock.

Otherwise, there wouldn’t be so few Iron-eating Beasts who mastered the Thunder Palm in the Bamboo Stone Martial Arts Hall...

He should still need the support of other steps. Why did Shi Yu and the others rely on simple materials to complete all the training in a day?

“Perhaps we worked very hard?” Shi Yu pretended to be in deep thought.

Yan Qi was suddenly speechless. Because every time he noticed Shi Yu and this iron-eating beast, they were definitely fighting, training, and eating!

It was rare to see them rest. They only rested for a while before quickly moving again.

He wasn’t afraid that he had seen a fake Iron-eating Beast. Are you sure that this was an Iron-eating Beast and not a hyperactive husky?

“It still doesn’t make sense...” Yan Qi looked at the little Iron-eating Beast. Even so, this talent was too strange.

“So this is the Lightning Palm, right?” Shi Yu chuckled. It was indeed unscientific.

However, he should know what was going on. Perhaps it was because of the high-speed healing.

The high-speed healing of wood-type skills was a form of use of one’s life force, representing growth.

In the system of the five elements and eight trigrams, lightning was also connected with wood. The damage caused by lightning forging the body was healed by wood-element skills. Not only did it increase the efficiency of training, but there was also probably some magical reaction between the two, which accelerated Eleven’s mastery process.

This didn’t make sense, but it was very surreal.

“I...” Yan Qi still doubted life.” Although its power seems a little weak, it’s indeed the Thunder Palm...”

“Well, the strength isn’t enough. At most, it touched the entry criteria. When the palm can withstand high-intensity electric currents and let the condensed lightning have a strong numbing penetrating effect, that’s when the Thunder Palm’s true power is.”

“I understand.” Shi Yu nodded, feeling happy.

This came without any effort. He originally thought that he would have to go to the dojo to replicate it before Eleven could master the Thunder Palm, but Eleven actually learned it himself. It was a complete surprise for Shi Yu.

From the looks of it, there seemed to be a certain connection between the different skills.

After learning one skill, learning another skill would be much easier.

For example, the Thunder Palm could actually be seen as a high-level skill for discharge. Since it could even use the Thunder Palm, it was actually equivalent to being able to use discharge as well.

However, although Eleven had learned it on its own, Shi Yu still decided to record the Thunder Palm in the index later.

In Shi Yu’s opinion, the skill proficiency function of the index was also very important. When a mid-level skill was maxed out, the effect was not necessarily worse than a super-level skill.

“Then can I trouble Mr. Yan Qi to help me register the Slime’s points?”

“Are you still going to the magnetic mountain area next?”

“No, there aren’t many electric ores over there anymore.”

Yan Qi :”...”

Beast!!!

The accumulated points of the electric ores were probably more than the three Slimes. These guys ate it all?

After Shi Yu left, Yan Qi still couldn’t calm down. He stiffly called Master Lin of Bamboo Stone Dojo.

“Yan Qi? What’s wrong?” Lin Hongnian’s master said.

“Master Lin, that Shi Yu indeed went to the Magnetic Mountain to train as I said.”

“Oh? How’s the effect?”

“The effect was very good. His Iron-eating Beast ate all the electric ores in the mountain. Then, they captured three Electric Slimes to assist in training. Now, it has successfully mastered the Thunder Palm.”

Lin Hongnian was speechless.

What was going on?

If you find any errors (broken links, non-standard content, etc..), Please let us know < report chapter > so we can fix it as soon as possible.

Chapter 45: End of the Training

After Eleven mastered the Thunder Palm, Shi Yu felt that it was time to change places to train.

Although he could continue to look for electric ores to strengthen the thunder-type skills Eleven had just learned in the magnetic mountain, it was not very meaningful.

Electric ore was only a level-one resource, not very expensive and rare. Its value was not much different from iron bamboo. When he returned, it was better to purchase or buy higher-level resources in bulk.

The more exposed electric ores in the Magnetic Mountain area, such as the three Electric Caves, had basically been searched by them. The remaining were hidden and difficult to find. If they searched again, the efficiency wouldn't be very high.

It was better to take advantage of the remaining time to earn some other resources.

“Eleven, let's help the green worm find some nutritious food.”

After thinking about it, Shi Yu said to Eleven, “The Green Silkworm has followed them for so long, but it seems like it hasn't eaten anything decent.”

The Green Silkworm had also helped a lot these two days. Even if it didn't contribute much, it had worked hard. It was time to reward it.

“Yes!!!”

Eleven nodded indifferently. Of course, of course!

Every day, Buggy looked like he was about to die after training. Eleven was really afraid of losing this little partner.

“Ji ji!!!” The green worm in the backpack cried.

Generally speaking, the evolution materials that were prepared for the Green Silkworm were only used when it was approaching cocoon transformation at level nine or ten.

At other stages of growth, the value of using rare materials was not very high. After all, only at the cocoon transformation stage, with the nourishment of the cocoon, would the Green Silkworm have a high chance of comprehending new racial skills.

In other stages, it seemed that only the worm silk was worth strengthening.

At this moment, Shi Yu also started to consider what direction he should nurture the Green Silkworm in.

It was very important to determine the direction of a pet in order to train it.

For example, Eleven and Shi Yu were cultivated according to the standard battle pet template. It was fine as long as they were good at fighting and were all-rounded.

As for the Green Silkworm, Shi Yu did not want it to be like a traditional battle pet. After all, he had the skill index, so it was relatively easy for him to DIY it.

It was better to choose some rare and more practical evolution directions.

Healing butterfly?

This way, it might be able to learn a skill that could help him, a Beast Tamer, recover his physical strength and energy in the future, and use it with the skill index.

Support butterfly?

For example, the Goddess of Light Butterfly, which had light control and illusion abilities, was a very good personal bodyguard of the Beast Tamer. Its abilities were very widely used.

Or... nurture it in the direction of mythology?

Traditional Mythical creatures, such as dragons and phoenixes, were all naturally noble races.

For example, the first Ice Phoenix Moth in the country to master the evolution of a transcendent-level worm silk that Lu Qingyi mentioned was an evolution completed after integrating the Ice Phoenix bloodline during the evolution process.

It was also because it possessed the Mythical Bloodline that this Green silkworm could directly become an honorable monarch-level race from the lowest position in the pet world.

Also... if the compatibility was enough, he could choose some rare attributes.

For example, space and time!

If he had a pet that could master Instant Transmission, its escape skills would be considered full. It would basically be fearless if it encountered danger.

Moreover, these rare attributes might not be weak in other aspects.

With this concept, Shi Yu realized that there were simply too many evolution paths for the Green Silkworm. It was so dazzling that he had no choice.

“The key is still skills and materials!”

“It’s not that easy to obtain rare skills and materials. For example, where can I find the evolution materials used by the Ice Phoenix Moth? I guess I can only use Bureau 11’s channels.”

“Forget it, it’s too early to think so much. I’ll see what materials I can find first.”

“At the moment, the most important thing is to nurture the worm silk to the highest level!”

Shi Yu flipped through the booklet and found a spiritual plant that was very suitable for the Green Silkworm as food.

Dragon Whiskers Grass.

A level-one spiritual plant was named after its beard that looked like an Eastern dragon.

It was the favorite food of pets who had mastered silk skills. It could effectively increase the tenacity and sharpness of the worm silk.

“This is it.”

During the search for the Dragon Whiskers Grass, he brought Eleven along to challenge powerful ferocious beasts. The next day would be used for this.

Collecting Dragon Whiskers Grass was actually much easier because the spider-type ferocious beasts around the Dragon Whiskers Grass were basically not that powerful.

The most powerful one was a level ten awakened ferocious beast, the Ghost-Faced Wolf Spider. It was worth 4,000 points.

But in the end, it was still killed by Eleven.

Although the battle process was a little more difficult than fighting an Electric Slime, it did prove that Eleven's current battle power was stronger than these untrained wild level ten ferocious beasts.

The reason was very simple. Even if these wild creatures grew at a higher level, their skill proficiency was too low. They basically relied on instinct. Very few creatures would train independently.

For example, that slime. Be it its discharge or multiplication skills, they were both initial-level.

The race skill of the more difficult Ghost-Faced Wolf Spider that Shi Yu encountered later was only at the proficient level, so when it faced Eleven, who had multiple proficient and even expert level skills, the difference in level was not that obvious.

In fact, Shi Yu hoped that the nearby spider-type ferocious beasts were more powerful. It would be best if he could master a premonition danger skill like spider sense... Then, he would be very happy.

Shi Yu wanted Eleven to use the Haki of the famous comic One Piece on Earth. Now that he had Armament Haki Hardening and Conqueror's Haki, he was just short of Observation Haki.

But so be it. Since it had super vision, it could pretend to make do with it.

A proficient level super vision could allow Eleven to have extremely strong dynamic vision. It was already very impressive that he could clearly lock onto his target like a fog in various extreme environments.

In the future, when he reached the expert and perfect level, according to the information Shi Yu found on his cell phone, he could even have a 360-degree perspective and see the effect of the energy flow.

As for the transcendent level... he wasn't sure, but the effect would definitely be stronger. When the time came, with perfect super vision as a reconnaissance skill, the effect wouldn't be too bad.

In short, the green worm was very happy on this last day. It felt that its trip this time was not in vain. This Dragon Whiskers Grass was much more delicious than Shi Yu's leftovers.

In less than three days, Shi Yu, Eleven, and the Green Silkworm had different gains.

Shi Yu obtained the multiplication skill. Eleven learned Thunder Palm on its own, and the Green Silkworm had an extra meal... It was obvious who was the one who profited the most.

In the blink of an eye, the three-day training event at Mt. Tian Mang was about to end.

In the training base.

The five professional Beast Tamers carefully looked at the final points displayed on the big screen.

First place, Shi Yu, 20,000 points.

Apart from the four level-10 creatures and five Longhorn wild boars, Shi Yu also collected some resources on the way and handed them in, gathering 20,000 points.

"He's indeed in first place."

"Although hunting the Slimes was a cheap trick, hunting the Ghost-Faced Wolf Spiders alone later undoubtedly proved their true strength."

The one in-charge, Zhou Wanshan, listened to the evaluations of his surrounding teammates and silently looked at Shi Yu's information.

"The average level of the pets of the Beast Tamers in charge of this training base is low. None of the Beast Tamers have reached level ten."

“Level ten is the strongest ferocious beast in Mt. Tian Mang at the moment. It’s indeed very impressive for him to be able to control a level-six Iron-eating Beast to defeat four level ten ferocious beasts. He deserves to be first.”

“It’s rare to see such a Beast Tamer who can fight above his level in Ping Cheng... I wonder how his performance in the ruins will be next.”

With Shi Yu’s current results, he had undoubtedly obtained the qualifications to enter the ruins!

...

“It’s over!!”

“It’s finally freaking over. I ate tree fruits for two whole days. I vomited.”

“I want to shower, I want to shower. I’m going to die if I can’t shower anymore!”

“Am I that popular with the mosquitoes? I’ve gotten 49 bites in less than three days.”

After the training base announced the end of the assessment through the mechanical bird, the Beast Trainers on Mt. Tian Mang went down the mountain and complained.

As for Shi Yu, he looked at the sky with a calm expression as he walked. It had been tough on him this time. Maybe he should take out a portion of the 10,000,000 yuan to reward himself? It was time to buy some high-end supplements.

If you find any errors (broken links, non-standard content, etc..), Please let us know < report chapter > so we can fix it as soon as possible.

Chapter 46: Purchasing Supplement

At the training base of Mt. Tian Mang was a huge field. On the huge field, miserable Beast Tamers stood.

In the beginning, a total of 100 people entered Mt. Tian Mang, and now only 73 were left standing here.

As expected, the 27 who were missing withdrew midway.

Perhaps it was because they couldn’t tolerate the wild environment, or because they were injured during the training process and had no choice but to stop the assessment.

“The fact that you can still stand here means that you still have some qualifications. Mt. Tian Mang is just an artificial training environment. If you can’t even stand here, don’t

talk about exploring ruins, let alone participating in the vocation assessment in the future. It's better to go home and raise pets obediently!"

The person in charge of the training, Zhou Wanshan, stood on the platform and said impolitely.

Below, the Beast Tamers were silent. This guy was the boss here, so they let him say whatever he wanted.

However, compared to this nonsense, these candidates wanted to know what rank they could get in the assessment this time.

Although they could roughly calculate their points during the training process, they didn't know anyone else's at all, so the ranking was a mystery.

"Alright, if you want to know your specific points ranking, you can look at it yourselves. The results have been pasted on that wall."

"Among them, the top 20 can obtain the qualifications to explore the ruins. A week later, I'll lead you into the ruins for the first time in a week. Be mindful of the association's notification regarding the specific situation."

"This assessment is over. You can leave after exchanging your points."

After a simple announcement, the person in charge of the training base, Zhou Wanshan, turned and left, leaving behind the noisy crowd.

Unsurprisingly, everyone rushed to the wall beside the platform.

Ten copies of the same score list were printed in the training base. They were spread out on the wall and could be clearly seen by everyone.

In the crowd, Shi Yu went over with the main group and looked down directly.

This feeling... How should he put it? It made him feel like he was returning to high school in a dream. Every time he finished his monthly exam, he would be surrounded by his classmates to look at his grades.

"First place, Shi Yu, 20,000 points? Who's Shi Yu?"

"No... It's not our school."

"Not from our school either."

Most of the Beast Tamers present were still students. After all, the average level was not high.

The older batch of Beast Trainers with average pets at level ten were all assigned to another training base.

At this moment, the candidates at the scene started discussing among themselves.

As for Shi Yu himself, he turned around and left the moment he saw his name, hiding his merits and reputation.

The first place in the assessment was nothing much.

It was better to quickly exchange points for real money to heal his bank account...

Although that was the case, he was still betrayed.

“Holy shit, Shi Yu.”

In the crowd, Chen Kai, the top student, looked at the name in the first place of the points and had a special feeling.

Although he knew that Shi Yu was very strong, he still felt a faint sadness when he saw that Shi Yu had taken first place.

20,000 points was equivalent to five awakening level ten ferocious beasts...

He looked at his ranking again. Why did he feel that after working hard for a week, he was getting further and further away from Shi Yu?

Was he not working hard enough?

“You know this person??”

After Chen Kai exclaimed, his classmates asked one after another.

“Who is this person?”

“Uh, a Beast Tamer from a key school in the city. I bought the Refreshing Capsule under his suggestion to train my pets. As expected, he’s still impressive.”

Chen Kai’s classmate was stunned. No wonder Chen Kai’s Ice-Armored Beast had broken through again and its strength had improved at lightning speed. It turned out that it had received guidance from an expert.

Was it the capsule that Chen Kai often ate during his training?

They took note of it and looked into it immediately when they returned.

...

Then, Shi Yu ran to exchange points.

He encountered someone familiar.

Yan Qi looked at Shi Yu with a smile and said, "I'll help you exchange it."

"By the way, I've told Master Lin about your Iron-eating Beast mastering the Thunder Palm."

"Oh? What did Hall Master Lin say?"

Yan Qi chuckled in his heart. What else could he say... Yan Qi could even guess Hall Master Lin's doubtful expression.

This apprentice might not be teachable anymore!

"Master Lin asked you to make a trip to the dojo when you're free. There are some special nutritional supplements, food, and insights on Thunder Palm. He's planning to give them to you."

"Alright." Shi Yu nodded.

This Lin Hongnian, head of the dojo, was probably that panda senior's father. He didn't know if this man had any other high-level skills other than the Thunder Palm... After all, he was one of the most powerful Beast Tamers in Ping Cheng. He should have some heritage.

After exchanging the points, Shi Yu went home directly.

He missed home, the soft bed, the hot shower, and normal food.

In short, the wilderness was really not a place for humans to stay.

"When I have money in the future, I must form a Mechanical Life Contract and become a Mechanic."

"I want those that are like Transformers. They can turn into Gundams, planes, cars, and people, and houses."

In this way, when he went to the wilderness in the future, it seemed that he would be able to live a modern life?

After returning home, Shi Yu stretched before lying down.

He turned around, picked up his cell phone, and logged on to the website that that person had given him.

The other party said that if he wanted to buy resources, he could just buy them from this website. There seemed to be a discount and they were delivered to his door. It was just nice, it saved him the trouble of going out to buy them.

“If I’m bringing this candidate to the ruins in a week... Isn’t the scheduling a little tight?”

Shi Yu wanted to develop steadily first... But his suicidal spirit seemed to be restless again.

Damn... I can’t control myself... I want to go take a look.

“Forget it. I heard from Lu Qingyi that this ruin isn’t dangerous. It’s a training-type ruin. I’ll just take a look and not court death. It’s not a big problem.”

“But no matter what, I should squander my resources first.”

After all, he was also a rich man now. As long as he didn’t buy high-level evolution materials for the Green Silkworm, he could squander for a long time and buy many things...

As expected, for the happiness of the whole family, it was better for the green worm to explore the evolution path on its own.

If it went smoothly, perhaps he could find suitable evolution materials in the ruins?

All of this was reasonable investment.

Shi Yu was not searching for resources for pets, but for Beast Tamers. Those supplementary resources that could allow Beast Tamers to fight for ten days and ten nights without any worries.

It was still alright at the Beast Tamer stage. Some Beast Tamers with enhanced talent still couldn’t use their talent in combat and could only use it for training.

However, after leaving the initial level, the advantages of those Beast Tamers who had mastered enhanced battle-type talents became apparent.

One Beast Tamer with a special telepathy talent, compared to a Beast Tamer with an enhancement talent... As the levels of both parties increased, the latter would only widen the gap between the former in terms of actual combat.

However, in contrast, after a battle, the energy consumption of a Beast Tamer with the battle enchantment talent would definitely be greater.

These supplements were prepared for them.

“Uh...”

Unlike medicine synthesized with a certain component of low-level materials like the Refreshing Capsule, most of the resources sold on this special website were purely natural.

Of course, the price was even more expensive, but Shi Yu felt that it didn't matter if it was expensive. As long as it was effective.

Plant-type transcendent creature ginseng baby's whiskers?

Centaurea Queen Bee's Honey?

The frog oil of the Dragon Swallowing Frog?

The divine beans produced by the mystic realm of the divine tree. It could restore the Beast Tamer's physical strength and energy in the shortest time possible under the Beast Tamer's extreme fatigue state... And adjust his body to its optimal state?

Why did it look so familiar? The strange but extremely familiar supplements had increased.

“This divine bean is not bad, but the lowest quality is still 100,000 yuan per bean. It's a little expensive... But I can buy one to see its effect. With this, I might be able to try teaching high-level skills. Multiplication, Absolute Sleep, Deterrence... I can arrange for one first.”

If you find any errors (broken links, non-standard content, etc..), Please let us know < report chapter > so we can fix it as soon as possible.

Chapter 47: The First Advanced Skill

As he did not know the exact effect of each supplement, Shi Yu did not dare to buy too much at once.

After careful selection, he chose three supplements and bought some each.

Five ginseng baby whiskers were worth 250,000 yuan (minimum five units per purchase).

A small bottle of Centaurea Queen Bee's Honey was worth 300,000 yuan.

Five divine beans that probably wouldn't fill his belly were worth 500,000 yuan (minimum five units per purchase).

He spent 1,050,000 yuan in one go... Including the discount, nearly one tenth of the initial 10 million yuan was gone.

Shi Yu felt the pinch. How could he squander like this?

However, when he thought that he might be able to teach Eleven all the high-level skills with these supplements and max out the proficiency of a few skills, he gave in.

Money was meant to be spent!

Moreover, using this million yuan to buy food and nutritional supplements for Eleven might not necessarily be as useful as buying supplements for himself.

“This is still the cheapest batch of supplements...”

Shi Yu sighed. After placing the order, he fell asleep again.

When he woke up, it was already night.

At night, if he stayed up late to meditate and play with his cell phone, it might affect his state during the day.

Shi Yu decided to continue sleeping, but the problem was that after sleeping for a while, he wasn't that tired anymore.

Therefore, after preparing dinner for the two pets, Shi Yu could only teach the worm silk skill to the Green Silkworm in the birdcage in the courtyard.

After his stamina fell, sleepiness returned.

This skill index seemed to have the ability to treat insomnia. Not bad.

The next day, the sun was shining brightly.

Shi Yu woke up feeling refreshed. Today, he had planned to go to Bamboo Stone Dojo to take a look, but a cell phone message made him change his mind.

The supplements he bought yesterday were already in the midst of distribution and had arrived at Icefield City. They could reach today.

“How efficient...”

“In that case, I'll just wait at home today.”

In the morning, Eleven was pondering about the Thunder Palm in the courtyard. The Green Silkworm continued to sleep, while Shi Yu was meditating.

About noon when Yu was about to go prepare lunch, there was a knock on their door.

“There’s a delivery for you.”

“Coming.”

As he had experienced being given warmth by the community the last time, Shi Yu hurriedly replied, afraid that his house would be destroyed again.

He opened the door and saw a young man in a blue delivery suit. Beside him was a two-meter-tall, weaponized giant bird.

The giant bird had strong muscles, gorgeous golden-brown feathers, and sharp eyes. However, although it looked domineering, it was only doing the work of a tool pet for the time being. A huge delivery box was hanging on it.

[Name]: Wings of Wind

[Attributes]: Wind

[Race Level]: High Transcendent

[Race Skill]: Wind Wings, Ripping Claw, Super Sight, Wind Blade

The young man took out the box containing the supplements from the delivery box hanging on the Wings of the Sky and handed it to Shi Yu.

“Please sign here.”

Shi Yu :”...”

They actually used transcendent-level creatures to deliver packages.

The Wings of Wind was the bird pet with the highest overall strength among transcendent-level creatures.

“Little Brother, you’re a professional Beast Tamer?”

When Shi Yu signed it, he asked casually.

“Yes, I just joined this year. If there’s anything I’m not doing well, please inform me,” the young man said.

After Shi Yu received the goods, he felt extremely stifled.

In this day and age, even the threshold of the delivery industry was so high. Though... the salary must be very high. After all, the resources assigned to that website were all high-end goods.

After signing the letter, Shi Yu handed it over.

The delivery man took the delivery order and looked at Shi Yu.

This little guest... was a Beast Tamer intern, right?

Speaking of which, why did he buy so many high-level supplements... Even as a professional, he himself didn't need so many.

He decided to forget it.

"Good luck. Have a good day."

"Thank you."

After the delivery boy and Shi Yu thanked each other, the bill was completed.

Then, in the courtyard, Shi Yu began to take out tonics one by one. He was very careful, afraid that it would break.

He first took out a bottle with five green beans. After looking at the accompanying manual, Shi Yu called Eleven over.

"Eleven, come here."

"Huh?"

Eleven, who was playing Electric in the courtyard, ran over.

At this moment, with higher-level supplements, Shi Yu's heart surged.

Skill: Multiplication

Skill Level: Advanced

< Introduction > It's a special ability. It can shrink and expand the body. Under a shrunken state, the strength will decrease and the energy recovery speed will increase. Under the enlarged state, the energy consumption will increase and the strength will increase.

Status: Can be taught

Shi Yu planned to teach Eleven the multiplication skill first.

As for why it wasn't the deterrence skill that allowed Eleven to have the aptitude of a king, or even the absolute sleep that could increase the efficiency of his and Eleven's training, it was very simple... Because the multiplication skill was more interesting!

In any case, with so many supplements, there were still only three high-level skills in total. It was the same whether he taught them early or late. Shi Yu first chose the multiplication skill that he found relatively interesting.

In the enlarged state, Eleven could increase his battle power. In the shrunken state, he could accelerate the recovery of his physical fitness. Learning this skill first was not a loss.

Shi Yu took out a divine bean and placed it in his mouth.

"Skill Index!"

As Shi Yu chose to teach, his right hand suffused with a white halo again.

At this moment, Eleven was stunned to see this familiar scene.

It panicked.

This Beast Tamer... was he going to make it reap the benefits without working for them again?

"Wuu!"

He had just learned the Thunder Palm on his own, and the Beast Tamer was going to use cheats to invade its mind again... This wasn't good...

Eleven stretched out its head. Since it couldn't resist, it chose to enjoy it.

He would double his efforts later.

Just like that, the white light that represented the multiplication of skill experience flowed into Eleven's body, and Shi Yu's legs started to soften.

Cooldown Time: 168 hours

The levelless worm silk skill was about eight hours.

Low-level skills were about 24 hours.

The intermediate skills were about 48 hours.

Shi Yu originally thought that the high-level skill was 72 hours, but in the end... it was more than doubled.

In his extremely weak state, Shi Yu felt that he was about to die. He hurriedly swallowed the divine bean.

In the next second, energy began to flow in Shi Yu's body.

Just as the introduction said, in an extremely short period of time, the divine bean erupted with immense nutrition and began to nourish Shi Yu's body.

One second, two seconds, three seconds... Shi Yu's body suddenly surged with power.

[Cooldown Time]: 48 hours.

Although it didn't completely allow Shi Yu to recover, the consumption was reduced to an acceptable range.

In an instant, Shi Yu felt as if he had not just taught a high-level skill, but just an intermediate-level skill.

Judging by his experience with getting weak after teaching a skill, Shi Yu felt that he could do it again.

It looked like... advanced skills were the current limit of his teaching. Before his physique improved by a lot, even if he had stronger supplements, he definitely couldn't touch super skills...

"This is killing me..."

Shi Yu let out a long sigh and ignored the dirt on the ground. He sat down on the spot and looked at Eleven.

At this moment, Eleven was closing its eyes and digesting the experience from the advanced level multiplication skill.

Shi Yu stared at it for nearly a minute before Eleven returned to its senses.

"You've mastered it?" Shi Yu asked.

Eleven nodded hard.

"Then let's see how big you can get."

As Shi Yu finished speaking, the round Eleven nodded seriously and used the multiplication skill with a serious gaze.

In the next second...

Buzz!

Ripples seemed to spread out from Eleven's body. Accompanied by the ripples, its body began to tremble slightly. Then, as the transparent ripples vibrated, its body began to expand in circles!

Buzz!

Buzz!

It didn't suddenly become bigger, but its body gradually enlarged in proportion. Its limbs, torso, head, and hair were all changing at this moment!

"Wuu!!!"

A moment later, a round Eleven that was still no different from before but had doubled in height and size appeared in front of Shi Yu.

At this moment, Eleven slowly waved its arm, but it still wasn't used to it. It felt that the energy in its body was being consumed rapidly, but at the same time, its strength seemed to have increased by more than just a little.

It was probably the difference in strength between a young panda and an adult panda in reality.

In this state, Eleven felt that if it encountered those long-spined wild boars again, it could send them flying more than ten meters with a slap!

Eleven's eyes were filled with battle intent.

"Gulp..."

However, there was no battle intent in his stomach.

Eleven:... @_@ |||

In less than ten seconds, Eleven started to feel dizzy. After all, it had consumed a lot of its physical strength just now.

"Alright, alright, quickly shrink and show me."

It was called multiplication. There was the option of double and triple... Naturally, there was also one-fifth, one-fourth... That was the so-called shrinking state.

As a Beast Tamer, Shi Yu hurriedly made it shrink and recover its strength after sensing the power of the transformation.

In the next second, Eleven looked like it was leaking air. It first quickly circled and shrunk to the size of an ordinary person, which was about a meter tall.

Then, it continued shrinking. Soon, it shrank into a real round ball half a meter tall, round, and short.

In this state, it was closer to how it looked when it was eleven years old. It looked harmless, and its big eyes revealed innocence.

“Sob.” Eleven touched its stomach and let out an aggrieved cry.

It had become smaller, but it was still hungry.

“Cough, looks like for the initial level multiplication, doubling in volume and shrinking to half, is already the limit.”

It was still lacking some proficiency compared to the Ultraman-sized huge Iron-eating Beast in Shi Yu’s mind, as well as the mini Iron-eating Beast that could stand on his shoulder.

But it was also very good. After all, he had just learned it.

“Alright, let’s eat.” Shi Yu was in a good mood as he looked at the little iron-eating beast.

“Let’s have you eat like this in the future. I think we can save a lot of food expenses,” he joked.

Eleven: (ε ε ε ε?)?! What!!

If you find any errors (broken links, non-standard content, etc..), Please let us know < report chapter > so we can fix it as soon as possible.

Chapter 48: Always Making Money

Shi Yu was very pleased that Eleven had finally learned the first high-level skill.

Although it was still far from the legendary surmounting skill with the ability to move mountains and drain seas, or the divine skill that could change the world that was recorded in myths and legends... It was still a huge improvement.

However, looking at the “cooldown time: 48 hours”, Shi Yu fell into deep thought.

He didn't prepare lunch for Eleven and the others immediately. Instead, he picked up the bottle with the divine beans.

One divine bean canceled out the 120-hour weak period. If another one came, could it immediately revive him to full health and even make things better than before?

The manual said that... the divine beans could be eaten in a large amount in a weakened state until the user recovered to their perfect state.

He bought the lowest-grade divine beans, so he didn't have to worry about overdosing on this. Therefore, eating two or three in one go shouldn't be a problem.

Amazing!

This was a joy that couldn't be enjoyed with the Refreshing Capsule, which was a synthetic medicine.

However, Shi Yu, who was about to eat a second divine bean, quickly hesitated.

The effect of the divine bean was clearly greater than the 48-hour weak period. Wouldn't it be a loss to directly eat it?

The manual didn't say if he could split half of it and eat it. If he ate it like this, he would waste tens of thousands of yuan.

"The price of a divine bean is 100,000 yuan per grain."

"Baby Ginseng's whiskers are 50,000 yuan each."

"So, maybe I can use another supplement next."

"No, even the roots of a ginseng baby aren't safe."

Shi Yu took out the Centaurea Queen Bee's Honey and placed it in a small bottle.

Although the Queen Bee had the word Queen, it wasn't a monarch-level creature. It was just a commander-level creature.

This kind of creature grew by absorbing the nectar of different strange flowers.

There were also many other titles such as royal honey jelly and king bee jelly. They were supplements even in his previous life.

As for this world, the nourishing effect was even greater.

Shi Yu found his red date cup, poured out the contents, and poured in the supplement.

Although this small bottle of honey was worth 300,000 yuan, it could be used multiple times. It would be fine after warm water was poured into the inner pocket.

Therefore, theoretically speaking, using this supplement first was the best way to control the amount and strive to not waste anything.

Shi Yu soaked a third of the honey in a large cup.

After mixing it fully, he took a sip and waited.

This effect was much slower than the Divine Bean. Shi Yu waited for a few minutes before his body reacted.

Cooldown Time: 46 hours

After taking a small sip, his weakness period was reduced by two hours.

Shi Yu was excited on the spot.

“It’s so good to be rich!!!”

People got what they paid for, after all. The Refreshing Capsules he could buy outside the pharmacy didn’t have such an effect at all!

The Refreshing Capsule only relied on the effect of the medicine to forcefully restore his spirit. The cooldown time was even more impossible to directly jump up and down on a large cooldown number like this. At most, it was only a support recovery.

It was nowhere like the honey, which was greatly influencing the cooldown time... Shi Yu seemed to see a new life.

It would be fine if he didn’t go to this pharmacy in the future. He wouldn’t have to suffer the strange looks of the employees anymore.

He gulped it down.

Shi Yu took another sip and brought a cup with him.

He planned to clear the cooldown time today and teach skills again at night.

It was really good to spend money. His teaching efficiency increased immediately.

It seemed like the 10,000,000 starting capital wouldn’t be given for Eleven and the Green Silkworm to enjoy too much. It was better to use them to buy supplements for himself at a higher price.

He was probably the only Beast Tamer who could use these supplements to such an effect.

...

That night, Shi Yu drank almost half a cup of Happy Water.

His teaching cooldown was finally cleared.

Shi Yu was happy, but not too happy either.

Because he used a third of this honey to make this cup of Happy Water, half a cup was about 50,000 yuan.

However, he had only recovered 48 hours of weakness.

The divine bean worth 100,000 yuan recovered a full 120 hours.

The difference in cost-effective ratio was immediately obvious.

“It’s not quite right to calculate it this way. After all, the divine beans are mainly supplements to recover physical strength and energy, and apart from similar effects, the honey can also prevent diseases.”

Shi Yu couldn’t be bothered to count it. The problem now was that he had eaten supplements for the whole day and was a little too awake. It would probably be very difficult for him to sleep again.

“As expected, worm silk should still be the first choice for tonight’s teaching skills.”

“The eight-hour cooldown period of teaching the worm silk skill is suitable for sleeping.”

Shi Yu decisively went to look for the Green silkworm and taught it the fourth time. It was still at the expert level.

The proficiency level increased, but there was no qualitative change.

It looked like he still had to continue teaching if he wanted to reach the perfect level of the worm silk.

“It’s alright. In the future, I’ll just rely on teaching worm silk at night to tire myself and sleep. It’ll probably max out soon.”

“Not only can it increase the proficiency of the worm silk, but it can also prevent insomnia. It can promote sleep and ensure mental health. It’s amazing.”

...

August 2.

Morning.

Shi Yu took out another divine bean and half a bottle of Happy Water, planning to teach Eleven another high-level skill.

“Eleven.”

After Eleven’s morning training and breakfast, it was called over by Shi Yu again, which made it a little nervous.

To be precise, it had a bad premonition.

As expected, under Eleven’s gaze, Shi Yu’s right hand lit up again.

“Wuu!”

What was it this time?

The Little Iron Eating Beast covered its eyes.

“This time, it’s a skill that can increase the efficiency of training.”

Skill: Absolute Sleep

Skill Level: Advanced

< Introduction > It’s a spiritual skill that can allow one to enter a super deep sleep and quickly recover their various states.

Status: Can be taught

Absolute Sleep looked like it didn’t have much effect, but it was actually very strong.

In fact, after the pet entered the Beast Taming Space, its state was similar to this absolute sleep.

It could be said that if a wild pet mastered this skill, it was equivalent to carrying a partially functioning Beast Taming Space with them.

Moreover, it was a high-level Beast Taming Space.

Generally speaking, even if it was initial-level absolute sleep, the effect on the physical recovery of the pet should be greater than the Beast Taming Space of the Beast Trainer trainee.

If Eleven learned this, apart from some special circumstances, it basically didn't need to return to Shi Yu's Beast Taming Space to rest at all.

Unless Shi Yu could increase the level of the Beast Taming Space.

However, Shi Yu kept feeling that the speed at which he increased the level of the Beast Taming Space might not necessarily be faster than the speed at which Eleven increased the absolute sleep proficiency.

In short, after teaching Eleven this skill, as long as he had enough food to ensure its nutrition, coupled with absolute sleep and high-speed healing... Eleven could completely train on his own, and the training efficiency would be very high.

At the same time, if Eleven didn't rely on the Beast Taming Space to rest, Shi Yu, the Beast Tamer, would have more time and energy to strengthen the Beast Taming Space and increase his Beast Tamer level.

This felt very right... Beast Tamers should grow up along with their pets.

Otherwise, when Eleven was already at the transcendent level, his Beast Tamer level would still be that of an apprentice. That would be awkward.

“Wuu—”

After Shi Yu introduced the skill, Eleven opened its eyes.

This skill was good!

“Not only that, after this skill's proficiency is higher, it can be used in battle.”

The absolute sleep recovery speed of low proficiency was relatively slow, and the recovery efficiency was low. However, the absolute sleep of high proficiency might only require a short nap to recover a lot of physical fitness.

“At that time, when we encounter the enemy, we can directly multiply, harden, and charge forward with Thunder Palms.”

“If you're injured, heal yourself with high-speed healing.”

“When you run out of stamina, quickly shrink and sleep. Continue fighting after being woken up. Have you learned it?”

Eleven nodded crazily.

Eleven understood! This strategy was pretty good.

That day, Shi Yu ate divine beans and drank Happy Water. He watched Eleven train on its own and recuperate.

He also concluded a life realization: It was awesome to spend money all the time.

...

With money, both Shi Yu and his two pets were clearly more comfortable.

He had taught two high-level skills in two days. He could still use his energy to teach worm silk every night. This was something Shi Yu did not dare to imagine.

On the third of August, Shi Yu originally wanted to repeat yesterday's routine and continue teaching Deterrence. However, although there were supplements, Shi Yu couldn't help but feel a little uncomfortable letting his body be put through this stress for two consecutive days.

Psychological factors were his concern.

"Forget it, I'll take a day off today to teach a low-level skill to relax."

In addition, he had previously promised to pay a visit to the Bamboo Stone Dojo when he was free. In the end, it had been two days and he had yet to leave. It was time to take a look.

After all, the dojo seemed to have prepared training resources for the iron-eating beasts. It would be a waste not to.

Bamboo Stone Dojo was also in Ping Cheng. If Shi Yu took a taxi, he could reach it in half an hour. However, before going, Shi Yu first investigated Bamboo Stone Dojo's phone number.

He planned to make an appointment before visiting, in case the one in-charge wasn't around when he arrived. That would be boring...

...

Inside the Bamboo Stone Dojo...

Was one of the iron-eating beasts' headquarters in Donghuang.

The owner of the dojo, Lin Hongnian, was a rare master-level Beast Tamer in Icefield City.

Although he didn't become an expert-level title because of an Iron-eating Beast, nor was his strongest pet... his representative pet was undoubtedly the Iron-eating Beast.

The Iron-eating Beast was the first pet Lin Hongnian had contracted. Because of this relationship, he had always hoped to find a better cultivation method or even an evolution method for the Iron-eating Beast.

Unfortunately, due to race restrictions, it had always been difficult for the Iron-eating Beast to break through a certain bottleneck.

It was the same even if he had developed two skills of other races that were very suitable for the iron-eating beasts to learn.

Over time, even if Lin Hongnian contracted a stronger pet, he couldn't let go of this thought.

In the end, Lin Hongnian did not give up. On the basis of inheriting the Iron Bamboo Breeding Base of the family, he chose to open a Bamboo Stone Dojo and recruit disciples widely.

As long as it was a Beast Tamer who contracted an Iron-eating Beast, they could join the Bamboo Stone Dojo to learn.

Talented apprentices even had the chance to come into contact with Thunder Palm and Cannon Fist manuals.

He hoped to use this method to nurture more powerful Iron-eating Beast Tamers. At that time, more people would nurture Iron-eating Beasts. Perhaps, there would be people more talented than him who could find a better cultivation route for Iron-eating Beasts.

In the training ground of Bamboo Stone Dojo, ten apprentices of different ages were undergoing training with their Iron-eating Beast.

Bamboo Stone Dojo only accepted initial level apprentices and provided basic training content.

After becoming a professional Beast Tamer, one was almost considered to have graduated. However, there were also apprentices like Little Bear Yan Qi who gave up halfway after failing the vocation assessment.

Of course, this was only for ordinary apprentices. For talented apprentices, Hall Master Lin Hongnian would take them in as his personal disciples and teach them seriously without holding back.

Unfortunately, apart from his own daughter, no Iron-eating Beast Tamer had been able to enjoy the teachings as a personal disciple.

Although he had cultivated a bunch of professional Beast Tamers, Lin Hongnian still couldn't find a disciple worth teaching with all his might.

Until Lu Qingyi found one and entrusted Lin Hongnian to help take care of him.

Since he had agreed to the request, no matter how talented or untalented that person was, Lin Hongnian would definitely do his best to teach him. After all, his two mid-level skill manuals were nothing compared to someone like Dr. Lu.

Then, Lin Hongnian heard Little Bear Yan Qi mention Shi Yu.

In less than a month, he had reached expert level Hardening.

Genius!

Moreover, if it was related to a genius like Dr. Lu, his future was immeasurable. It was entirely possible to nurture the iron-eating beast to the level of a monarch.

Such a genius Beast Tamer, even if he had no relationship to Lu Qingyi... He had to teach with all his might.

Lin Hongnian thought so at the start.

However, when Yan Qi, the little bear, told him that Shi Yu and the others had learned the Thunder Palm in a day, Lin Hongnian understood.

Sorry, he didn't deserve to teach this person.

He himself also wanted to know how to rely on the Electric Slime and Electric Mineral to learn the Thunder Palm in a day.

"Father."

On the high platform of the training ground, Lin Xiuzhu looked at his father, who was looking at the training ground below, and said in a low voice, "Let's eat outside at noon, we'll go to the Dragon Palace Fish Plant."

Lin Hongnian frowned and said, "Have you completed your daily training?"

"Ah..." Lin Xiuzhu was speechless.

Lin Hongnian looked at his disobedient daughter and felt a wave of regret.

Originally, under his guidance, Lin Xiuzhu had a great prospect of passing the professional Beast Tamer assessment at the age of 18. Perhaps she could surpass him and nurture the iron-eating beast to the level of a monarch.

However, who knew that Lin Xiuzhu would actually choose the Feeding specialization and even choose to study the evolution research department of the Iron Eater?

At that time, he didn't know what had gotten into him to agree. As for the outcome... Lin Xiuzhu didn't get on either side. Her strength fell, and she didn't research any results on the evolution path.

"We'll talk about it after your training is completed," Lin Hongnian said seriously and meticulously.

"But mom wants to eat fish," Lin Xiuzhu said. "Not me."

Lin Hongnian was silent for a moment.

"Just this time, then. You can't waste your training in the future."

Lin Xiuzhu : "..."

Just as the father and daughter were discussing what to eat for lunch, a dojo apprentice rushed over.

"Master Lin, a Beast Tamer named Shi Yu said that he might come to visit today and ask if you're free."

If you find any errors (broken links, non-standard content, etc..), Please let us know < report chapter > so we can fix it as soon as possible.

Chapter 49: Visiting Bamboo Stone Dojo

"Shi Yu?"

"Yes, that's the name," the apprentice said.

"Let him come over," Lin Hongnian said. This boy was finally willing to come to the dojo.

The apprentice nodded and immediately left.

At this moment, Lin Xiuzhu, who was beside Hongnian, vaguely felt that this name was a little familiar.

"You know this Shi Yu, right?" Lin Hongnian was the first to ask his daughter.

“I remember you previously mentioned to me that a very disciplined iron-eating beast was taken away by a person called Shi Yu.”

The first time Lin Hongnian heard the name Shi Yu, it wasn't from Lu Qingyi, but from Lin Xiuzhu.

However, because Shi Yu was only a Beast Tamer intern, he didn't deliberately remember it.

It was only when Lu Qingyi mentioned it and he investigated again that he realized and remembered that it was the same person.

Lin Xiuzhu said, “It's really him? Father, you still remember. What's wrong... Is he going to enter the dojo?”

Lin Hongnian shook his head and said, “No, I was entrusted by someone to guide his growth.”

“By the way, after he left, do you know the growth of that Iron-eating Beast?”

Lin Xiuzhu also shook her head and said, “I'm not sure, but I told them that if they have any problems, they can come to the Iron Bamboo Breeding Base to consult at any time. Since he didn't come again... Everything should be normal, right?”

How could it be normal... It was too abnormal.

After a moment of silence, Lin Hongnian said, “That Shi Yu and that Iron-eating Beast participated in the assessment at Mt. Tian Mang was organized by the Beast Tamer Association a few days ago and took first place.”

Lin Xiuzhu was stunned and had yet to react.

Then, her beautiful eyes widened. “Impossible. That Iron-eating Beast only awakened level three a month ago...”

At this level, he probably couldn't even defeat a wild boar.

Even if she thought very highly of that Iron-eating Beast and thought that the self-disciplined Little Iron-eating Beast Eleven would definitely be able to do something, she clearly didn't believe what her father said.

How could there be such a speed of growth...

“It's hard for me to believe too, but he'll come to visit later. We'll know then.” Lin Hongnian looked at the group of useless apprentices on the training ground.

If only this group of people were half as outstanding as the rumors said.

Level 6 growth... Mastery Level Hardening... Learning Thunder Palm... was simply unbelievable.

“Then, then what about the fish??” Lin Xiuzhu asked another key question. The ridiculous thing about Shi Yu was put aside for the time being. Eating was the most important thing.

“No,” Lin Hongnian said.

It was better to wait for this Shi Yu.

Although he had yet to meet Shi Yu, this genius Beast Tamer, he found Shi Yu more pleasing to the eye than his own daughter.

This was like some parents always comparing their own kid to other people’s children.

He could not wait to see who this Shi Yu and that iron-eating beast were.

“But I’ve already told mom that you’ll go together.”

Lin Xiuzhu looked at her father strangely. Her father actually stood up today? He dared to disobey his wife? Wasn’t he afraid of going back to sleep on the bamboo board at night?

Lin Hongnian turned around calmly.

“Where to?” Lin Xiuzhu asked.

“Tell that Shi Yu to come in the afternoon. I’m suddenly a little hungry.”

...

...

“In the afternoon?”

On Shi Yu’s side, he heard from the apprentice of the dojo that Hall Master Lin Hongnian would be at the dojo in the afternoon. After arranging that, he stretched in anticipation.

He decided to find a place to eat lunch before going.

At about ten in the morning, Shi Yu started to move. In order to save time, he still chose a taxi.

After arriving near the dojo, he casually found a high-level restaurant and ordered a bunch of dishes, including the wild boar meat he didn't eat last time.

After eating and drinking to his heart's content, Shi Yu glanced at the time. It was getting closer to the appointment time, so he headed straight for Bamboo Stone Dojo.

Outside Bamboo Stone Dojo.

"Excuse me, is anyone here?"

Shi Yu knocked on the door.

A moment later, the door was opened, and a person in a familiar costume opened the door.

Shi Yu looked down and subconsciously said, "Panda senior..."

"No... Breeder Lin Xiuzhu?"

The person who opened the door was Lin Xiuzhu, who was wearing panda-style shorts and a T-shirt.

"Hello, we meet again." Lin Xiuzhu smiled at Shi Yu.

"Yeah." Shi Yu nodded. When he bought the Iron-Eating Beast, he felt that there was something wrong with this Lin Xiuzhu. Later on, he learned that she was actually Lin Hongnian's daughter.

In short, she was another rich heir.

He wanted to sigh. He had just gotten 10,000,000 from Lu Qingyi, and now he wanted to collect cultivation resources from this girl. As expected, he was someone who relied on women to get him stuff...

Speaking of which... he hadn't finished repaying his loan. He had originally planned to return it monthly, but now... was there a need to return it??

"Follow me, Father is inside." After Lin Xiuzhu finished speaking, he started to lead the way.

A moment later, Shi Yu was invited into the waiting room of the dojo.

At this moment, Shi Yu finally saw Lin Hongnian. Chen Kai, Zhuang Yue, and the others had said this man might be the number one Beast Tamer in Ping Cheng.

“Sit.” In the room, Lin Hongnian, who was wearing a gray battle suit, extended his hand and invited Shi Yu to sit.

Sensing the aura of Hall Master Lin Hongnian, Shi Yu thought to himself that this person was obviously an expert. Since he was an expert, he wondered if his pets had any rare skills...

Shi Yu sat down cautiously, and Lin Xiuzhu, who had brought him over, naturally sat opposite him.

Lin Xiuzhu still didn't believe the battle results of Shi Yu that Lin Hongnian mentioned just now. After all, she could also claim that she took care of Eleven... How could she not know Eleven's strength a month ago?

Moreover, during the meal, she also asked her father what was going on. However, Lin Hongnian himself was ambiguous and couldn't answer. He only said that Shi Yu had a special opportunity... Ridiculous!

“Dr. Lu already told me.”

“If you plan to come to Bamboo Stone Dojo to learn, I'll teach you everything.”

“However, according to my understanding, there seems to be a limit to what I can teach you in the cultivation of iron-eating beasts.”

Among the training methods of Bamboo Stone Dojo for Iron-eating Beasts, the most precious were undoubtedly the skill manuals of Thunder Palm and Cannon Fist.

Apart from that, although special nutritional supplements and food were also very expensive, they were clearly still a little inferior to the value of skill manuals. There were also many substitutes.

Shi Yu and Eleven had already learned the Thunder Palm Skill. It was no wonder Lin Hongnian said that there was not much left to teach.

“You're too polite.” Shi Yu expressed that he was just a newbie.

“How about this? Next, the three training grounds of the Bamboo Stone Dojo are open to you. You can use the training equipment as you wish. In terms of the cultivation resources of the iron-eating beasts, the Bamboo Stone Dojo will also provide them all.”

“Xiu Zhu should have given you the basic cultivation manual of the Iron-eating Beast, right? I'll give you a cultivation method for advancement later for your reference.”

“If you have any problems with training, you can come to me anytime to ask. You don't have to undergo training in the dojo like other apprentices.”

“What do you think?”

There should be a special treatment for geniuses.

Shi Yu's Iron-eating Beast had already mastered mastery level Hardening and Thunder Palm, so there was no need for it to do the daily training of ordinary apprentices.

Therefore, Lin Hongnian gave Shi Yu a lot of convenience. This was something other apprentices, even his own daughter, couldn't enjoy in the beginning.

“Thank you, Hall Master Lin,” Shi Yu said. “This is pretty suitable for me.”

Food and drink were managed, freedom was not restricted, and a master-level Beast Tamer who he could ask questions to at any time. This treatment... was perfect.

Alright, looks like that 10,000,000 yuan could only be used to buy supplements without any reservation. Wouldn't Eleven's cultivation resources be resolved if he did this? It was just that Eleven's appetite was a little big, and he didn't know if the dojo could handle it... It was alright under normal circumstances, but he was afraid that Eleven would eat more after getting into the habit.

As for the food of the green worm... it was everywhere outside.

It seemed that joining this Bureau 11 was indeed the right choice. Otherwise, he might still be recuperating at this time.

“If I'm not wrong, your Iron-eating Beast has already learned the Thunder Palm, right?”

“In addition, the proficiency of Hardening has also reached mastery level.”

Shi Yu nodded. “Yes.”

Lin Xiuzhu: (^ _ ^)?

These two were getting more and more ridiculous.

“Then let's focus on training the Thunder Palm skill first. The learning difficulty of the Thunder Palm is slightly lower than Cannon Fist. Don't bite off more than you can chew. If you want to learn Cannon Fist, my suggestion is to master the Thunder Palm first.”

Shi Yu nodded. Indeed, one shouldn't bite off more than one could chew. He couldn't even level up the current Iron-eating Beast skills comfortably right now.

As for the cannon fist... forget it.

Ordinary Iron-eating Beasts might lack this skill, but he didn't lack Iron-eating Beasts at all. A similar skill was enough with the Thunder Palm, there was no need for a fire-element cannonball fist to increase the attack power.

Even if there was such a requirement, he still would definitely use that slot for higher-level skills in the future.

"There are very few records regarding the Thunder Palm in the outside world. Next, I'll bring you to the training ground and explain the Thunder Palm in detail."

"Before that, I'll also introduce you to other apprentices. In the future, when you come to the dojo, you'll inevitably come into contact with them."

"As for the various training facilities in the dojo, I'll let Xiu Zhu bring you around to familiarize yourself."

Lin Xiuzhu had many questions, but he didn't dare to interrupt when his father was speaking.

In the family hierarchy, she was below her father, who was below her mother.

"Speaking of which..." Lin Hongnian looked at Shi Yu.

"Although I heard about you from Yan Qi, I still don't seem to know much about your situation."

"Do you mind having a battle with the apprentices of our dojo to let me understand your specific situation?"

"That's good." Lin Xiuzhu answered for Shi Yu. Combat was good, and she also wanted to see how Shi Yu and the others were currently doing.

(ω • ω • ω •) Fighting time!

Shi Yu was extremely calm. He was invincible, so they could do whatever they wanted.

If you find any errors (broken links, non-standard content, etc..), Please let us know < report chapter > so we can fix it as soon as possible.

Chapter 50: The Might of the Thunder Palm

The Bamboo Stone Dojo was very large. There were three training grounds the size of a stadium alone, but there were very few apprentices in the dojo at this time.

"Under normal circumstances, only trainee-level apprentices will often stay in the dojo to undergo strict training."

Lin Hongnian brought Shi Yu to the rooftop of a training ground and said, "This is the basic training ground. It's used for after-dinner activities between the apprentices of the dojo and the iron-eating beasts."

Below, Beast Tamers and the Iron-eating Beasts beside them were jogging and warming up on the fake lawn.

The Beast Tamers were alright, but the giant pandas looked reluctant and kept crying.

They had just finished lunch and it should be lunch break. Running directly after a meal was too much for a panda.

However, with the Beast Tamers' forced orders, they had no choice.

"Iron-eating beasts have lazy personalities. This had to be changed slowly in daily training. Otherwise, when it comes to battle, it's very easy for big problems to arise," Lin Hongnian said.

Lin Xiuzhu said, "But Eleven should be very self-disciplined, right?"

Shi Yu nodded. "Yes. Generally speaking, it won't eat until it has completed a certain amount of training. Otherwise, it won't feel at ease eating."

Lin Hongnian: "?"

He looked at Lin Xiuzhu. There was such an Iron-eating Beast?

Lin Xiuzhu also turned her head in surprise. Why did this sound even more ridiculous than when it was at the breeding base!

What exactly did Shi Yu do to Eleven after that? She looked at Shi Yu.

"Cough." Shi Yu had an innocent expression. Perhaps he had helped Eleven cheat too much and stimulated its desire to train?

Eleven: (*+ ¥+*~ It was disgraceful to reap without sowing. The Beast Tamer gave too many cheats, so it has to recover its sweat even if it had to train hard.

"After the warm-up, they will undergo basic hardening training here. In pairs, they will practice with each other."

Lin Hongnian looked down again. Hardening versus hardening had saved him the cost of a batch of steel plates. Unlike Eleven, who could only rely on gravity and steel plates to train the hardness.

“Their iron-eating beasts are basically between level eight and ten. I’ll randomly choose the strongest one for you,” Lin Hongnian continued.

Pick the strongest one? Sorry?

Right now, the ten dojo apprentices in the training ground had just finished warming up. They were about to start the basic hardening training in pairs.

Under the organization of a tall young man with a crew cut, they quickly divided into teams.

“Jiang Rui.” At this moment, Lin Hongnian shouted.

The tall youth with the crew cut, Jiang Rui, who had just organized the other apprentices into groups, looked up.

“Let’s go down,” Lin Hongnian said.

A moment later, they arrived at the training ground below.

“Master Lin, what’s wrong?” Jiang Rui and the other apprentices looked over.

His gaze looked at Lin Hongnian and Shi Yu, but he quickly looked away. All his attention was focused on Panda senior.

Great, she came to the dojo again today. Training suddenly became more energetic!

Youths at this age were at the stage where they were extremely hazy about the opposite sex. After days of boring training, they indeed needed something to heal their hearts.

As Lin Hongnian’s daughter, a famous genius, Lin Xiuzhu’s looks were also very outstanding. In addition to that giant panda T-shirt that showed off her assets, she was completely the goddess of all apprentices.

Even the two young girls among the ten apprentices secretly envied Lin Xiuzhu’s figure. They looked down at themselves and couldn’t help but feel sad.

“Your training will be suspended for now,” Lin Hongnian said. “Let me introduce you. This is Shi Yu. He will come to the dojo to learn next.”

Swoosh! Swoosh! Swoosh! Swoosh!

Everyone looked at Shi Yu.

They were wondering who it was just now. So it was a newbie from the dojo.

Newbies were good. With newbies, the ones who were scolded by the head were the newbies who couldn't quickly adapt to the intensity of the training, and no longer them.

This was called transferring firepower, and the status of everyone's dojo instantly increased by one!

Everyone found Shi Yu pleasing to the eye. The environment of the dojo was harmonious.

"Hello, everyone." Shi Yu's expression was also kind.

Everyone nodded. That Jiang Rui said, "My name is Jiang Rui. If you have any questions later, you can look for me."

"Jiang Rui, don't organize training first. Have a battle with Shi Yu," Lin Hongnian said.

Jiang Rui was the most outstanding of the ten apprentices, so when Lin Hongnian and the other teachers of the dojo were not around, the basic training was basically led by Jiang Rui.

"Me?" Jiang Rui pointed at himself and said surprisingly.

"That's you. If you lose, your training with the Iron-eating Beast will double."

Jiang Rui's heart skipped a beat, but he quickly realized that it was just teaching a newbie. How could he lose?

"Alright." He nodded quickly.

As for the other apprentices, they showed an "why not me" expression.

They understood what Master Lin meant. Wasn't it to give the newbie a show of strength and let him understand the strength of the apprentices in the martial hall?

At the same time, Master Lin might also want to know about this newbie's situation.

They could do it too!

How could Jiang Rui snatch away such an opportunity to show off his training results in front of his master and senior sister? How come he got to show off his mighty image in front of the newbie?

They were quite envious.

...

Because Shi Yu and Jiang Rui were going to battle, everyone's training temporarily stopped. This made the apprentices and the iron-eating beasts secretly rejoice.

At Lin Hongnian's signal, unrelated people scattered and went to the side to watch the battle, leaving the battlefield for the two of them.

"Shi Yu, send your pet out."

After saying that, the Iron-eating Beast beside him walked out. Because it was warming up just now, the Iron-eating Beast had been outside the whole time.

This was a big panda that was 1.45 meters long. Its growth level should be much higher than Eleven.

"Alright."

Shi Yu nodded and communicated with the Beast Taming Space.

Fwooo...

In the next second, because of the ripples in the surrounding space, a weak airflow blew nearby, and the fake grass on the ground swayed.

Under the outline of the light spots that appeared out of thin air in front of Shi Yu, the transparent summoning array revealed its full appearance. Amidst the water-like ripples, Eleven walked out in a daze.

It came outside and looked up at the big guy in front of it.

Eleven's current normal height, without multiplication, was only 1 meter. Compared to Jiang Rui's Iron-eating Beast, he was clearly still a child.

"A cub?"

At this moment, as Eleven appeared, these martial arts apprentices who cultivated iron-eating beasts immediately judged Eleven's growth level.

It was only around level six. He was indeed a newbie.

Jiang Rui's Iron-eating Beast that had awakened to level ten and mastered proficient level hardening... This cub might not be able to win easily.

"You guys attack first," Jiang Rui said after a moment of silence.

If they directly attacked, Master Lin wouldn't be able to examine this newbie's strength very well. It was better to let the newbie do it.

“Eleven.” Shi Yu didn’t stand on ceremony and directly ordered Eleven to attack.

“Ow.”

In an instant, Eleven attacked the iron-eating beast opposite him fiercely.

“Block it.”

Jiang Rui was very confident in the hardness of his Iron-eating Beast.

Although this little Metal-eating Beast’s explosive power looked very strong, it was still in its infancy, after all.

Jiang Rui’s Iron-eating Beast stood still as if it was showing off its skills.

Buzz!

It directly chose to harden its entire body and wait for the Little Iron Eating Beast’s arrival.

With the strength and hardness of the Little Iron Eating Beast... It was impossible to hurt it. Jiang Rui was very certain.

In fact, it was indeed so. Even though Shi Yu knew that Eleven’s hardening strength was definitely above this iron-eating beast’s hardening strength, he wasn’t sure if Eleven could heavily injure it with hardening.

The reason was that although Eleven’s skill proficiency was very high, its strength was definitely inferior to this level-ten Iron-eating Beast.

Even though he had the Hardening Strength, if its strength couldn’t keep up with the opponent, the attack clearly wouldn’t cause too much damage.

However, at this moment, Eleven wasn’t only hardened to fight enemies.

Zi Zi Zi Zi Zi!!!

When Jiang Rui and his Iron-eating Beast were extremely confident and planned to use proficient level Hardening to check the strength of the “newbie” in front of them, Eleven, who pounced nearby, didn’t Harden the sharp claws attack or harden the head impact as everyone imagined.

Instead... After it approached its opponent, it immediately raised its arm backward. In the next instant, a blue and white light intertwined and shot out of its palm.

A high-intensity electric current filled Eleven's palm, forming a chaotic and violent electric current.

Zizizizi—!!!

The voice was like the cry of a thousand birds.

Intermediate-level skill, Thunder Palm!

Under the illumination of the lightning, Eleven's entire body was still in the dazzling light, looking especially dazzling.

This scene made Jiang Rui lose his ability to think on the spot, and also made the other apprentices lose their ability to think.

This was...???

They widened their eyes and found it unbelievable. Because this skill definitely couldn't appear on Iron-eating Beasts below the transcendent level...

Under the condensation of the high-intensity electric current, Eleven's palm had an extremely strong penetrative force like a sharp blade. It was more suitable to attack than using hardening!

At this moment, because the proficient level Hardening could not allow the panda to be moved, Jiang Rui's Iron-eating Beast could only watch as the Thunder Palm with electricity passed through.

It was already too late to cancel Hardening and dodge.

With a bang, under the thunder roar, the blue and white interweaving lightning surged into Jiang Rui's Iron-eating Beast's body, passing through the hardening crazily and corroding its body.

Bang bang bang bang bang!!

In the next second, electric currents shot out from its entire body. This iron-eating beast's entire body was directly paralyzed, and its body subconsciously leaned down. Although it hadn't lost its battle ability, it clearly suffered heavy injuries.

Apart from the silent Lin Hongnian, all the other apprentices, including Lin Xiuzhu, opened their mouths and looked at the Little Iron Eating Beast, who was cautiously retreating. They couldn't believe it!
