

Beyond Deep Space

Chapter: 9

Wang Xuan hasn't left yet, because his home is in a small neighboring town, very close. If he can't go to Xinxing, he will stay and work in the city where he went to school.

Qin Cheng has disappeared for a few days. He is from the city and has been looking for exact news recently.

His family's business is related to deep space trade. Of course, it is only one of the many suppliers below, but there are quite a few connections.

A few days later in the early morning, Qin Cheng appeared at the campus.

"Wang Xuan, I finally understand why the old art experiment class was established in the first place, and it has something to do with the special 'situation' discovered by Xinxing!"

Qin Cheng came running early in the morning, his face was red and hot, but he was not out of breath, it was entirely due to excitement.

His family has a wide range of connections, and he just got a piece of news that several mysterious phenomena discovered by Xinxing are suspected to be related to supernatural forces!

"There may be supernatural forces in the world!" he shouted.

How can this not make people feel ups and downs and produce many associations? !

Qin Cheng is usually an emotional person, and now his mood fluctuates a bit, but when he saw Wang Xuan's situation clearly, he was in a daze immediately.

"You actually practiced such a big 'movement'?!"

Although he already knew that Wang Xuan had successfully gathered Qi, he was still quite surprised when he saw the scene ahead.

The sun is rising, and everything is full of vitality. Wang Xuan seems to be shining, and the morning glow on his body is extraordinarily "intense", like a layer of faint flames flowing.

Wang Xuan stopped, full of energy, and in better condition than the previous few days.

"You wait a moment."

Just now, facing the morning glow, he nourished his body internally and expelled the "turbid fog" in his body, which made his body sticky, so he quickly took a cold shower.

Wang Xuan changed into clean clothes and came out, saying: "I have already had some associations. Some old people with deep backgrounds believe in occultism more and more in their later years, and finally put it into action. They come to the old soil to dig myths and invest in old art research. The project must have been discovered at the beginning."

Although those people are getting old, they were all once human beings, and they will not be so stupid as to make low-level mistakes.

In addition, some students with different identities and backgrounds came from Xinxing and joined the experimental class, which also proved something.

"In the early days, they probably wanted to touch supernatural power by studying old techniques." Wang Xuan said, but frowned again: "However, the situation seems to have changed now."

His intuition is very keen. He saw Xu Wenbo, Su Chan, Zhou Kun, and Li Qingzhu a few days ago. Through their words and deeds, he has already guessed part of the truth.

Several people have said that the old technique is outdated and outdated. Xinxing's side...seems to be despised!

Moreover, when Xu Wenbo inadvertently looked towards the end of the sky, his eyes were very bright, it was a kind of longing and excitement, as if eagerly longing for something.

"Supernatural power... maybe there is another way, and the old technique has been abandoned." This is the conclusion Wang Xuan came to after observing the performance of several people.

...

There are updates tonight.

Thanks to: Shepherd Boy Listening to Bamboo Sound, Taishang Commoner Deity, Irena Wants to Go Ashore, Flying Fish Deity, Pig King Deity, LaSSong, =Lonely=, Thirty Feathers, Sanshengyuan Knife, Sanshengyuan Lonely, Shenchao_Window Uncle, Life Picker, Prodigal Son Sitting on the Wall, Funny Recently, Meng Nine Years Old, Yangcun, Midnight, Book Friends 130717171023160, Eagle Climbing a Tree, Yuan Changjiu, Waner*.

Thank you above allies.

I also thank all book friends who collected, voted, and spent money in deep space, and thank you for supporting the new book.

Qin Cheng was stunned. It took him a long time and a lot of energy to find out some secrets through his family relationship.

But now, through his own observation, Wang Xuan has deduced more

Things, suspecting that there is another way to touch the supernatural.

"So, the old technique was abandoned like this?!" Qin Cheng was very unwilling.

When he found out those secrets, he was still very excited, thinking that he had finally discovered the truth, and that the purpose of studying the old arts was to touch supernatural power.

It was also at that moment that he strengthened his belief that he would start to seriously study the old techniques from now on, and overcome all difficulties on this road.

But now he heard that there seemed to be another way to get close to the supernatural power, which immediately poured cold water on his newly heated heart.

It took Qin Cheng a long time to come back to his senses, a little bit shocked.

What exactly did Xinxing discover, apart from mysterious phenomena, he also found a real path to the extraordinary?

Obviously, if it is true, this will trigger unimaginable shocks, including some changes in concepts and in the real world.

Qin Cheng is serious and serious: "Right now, the opportunity to go to the new star is becoming more and more precious. If you can touch the supernatural power and be at the forefront, everything you think is possible!"

The two chatted while eating breakfast.

"The special food transported from the deep space is really less than one meal. At first, I thought the taste was bad, but now I feel a little bit reluctant."

The two were quite emotional.

Although these ingredients are very rare and expensive, the taste is really not very good when all kinds of ingredients are combined together.

Qin Cheng asked Wang Xuan if he had a chat with the old professor who taught them old techniques to see if there was any way to solve the problem of going to the new star.

Wang Xuan shook his head. Although the old professor liked him very much, he didn't have that much power. In this old art research project, he was only invited to teach the old art, and he didn't participate in other things.

"What are their criteria for selecting people?" Qin Cheng was dissatisfied, feeling that it was unfair to Wang Xuan.

Wang Xuan thought for a while, and said: "I guess it should be related to the sharp mind and the release of potential far beyond ordinary people. In short, it has slightly touched the mysterious field."

He had seen the first list of picks and made that inference.

For example, there is a pair of twin sisters in the class. They often have inexplicable feelings for each other. The younger sister is frightened unexpectedly, and the older sister also has palpitations at the same time.

And once, when my sister was peeling an apple, she left a deep gash on her finger. At that time, my sister was in another city. Although the distance was far away, the corresponding finger also hurt.

There is no explanation for this phenomenon.

When selecting students for the experimental class this time, the two of them were selected immediately.

"Then what's going on with He Qing?" Qin Cheng asked puzzled.

In his impression, He Qing in the experimental class was introverted and simple, and he didn't talk much on weekdays.

It is reported that He Qing was not interested in old arts at the beginning, and he signed up only when he heard that he could guarantee a decent job with a high salary after graduation.

So Qin Cheng couldn't figure it out. He Qing was obviously resistant, so why was he selected in the end?

"A thing happened to He Qing. When he was fourteen years old, he saw his younger brother was about to be hit by a speeding car. He rushed over and pushed his younger brother away. However, he was run over by a car, but he was not injured, only black marks from being run over by tires were left on his body."

Everyone was shocked at the time, and some couldn't figure it out. In the end, they could only think that some mysterious potential of the human body broke out at the moment of life and death.

The investor of the old art research project has dug up and investigated the incident of He Qing's youth, which shows how deep he knows them.
