

## ALL-MIGHTY GIRL GETS SPOILED BY A BIGSHOT

# All-Mighty Girl Gets Spoiled by A Bigshot

1241 3-7 Split, Unwilling

Feng Shuo took a sip of coffee and glanced at the manager. "But what?"

"President Feng, our share with Shenghe Entertainment is 30-70. It's two levels lower than the average movie." The manager analyzed, "I have a feeling that the total box office earnings of the Three Realms will exceed 8 billion yuan. If that's the case, we'll lose 1.8 billion yuan."

Feng Shuo: "..."

His smile froze on his face.

If the manager had not mentioned it, he would have forgotten about it.

He finally understood why Qin Sheng had proposed a 30-70 split. It turned out that she was waiting for him here.

Feng Shuo's face darkened.

Taking a deep breath, he forced himself to comfort himself. "It's fine. If it weren't for Qin Sheng, Feng Entertainment would have gone bankrupt by now. Besides, Shenghe Entertainment is strong enough. A 30-70 split would be more beneficial to maintaining our cooperation."

These words were said very reluctantly.

However, he could only let Qin Sheng be.

He had to support a person like Qin Sheng.

Feng Shuo did not doubt that if he and Qin Sheng were to fight, Qin Sheng would create a cinema to push Feng Film and Television out of the picture.

He waved his hand weakly. "You can leave."

After the manager left, Feng Shuo picked up the box office records of the Three Realms that his subordinate had handed over.

His mood improved a lot.

This was all money.

Every show was packed to the brim. On the first day of the broadcast, the box office sales were scheduled to be a week later. This was a first.

No, he had to increase the screening rate of the Three Realms.

He picked up his phone and ordered, “Doesn’t Teng Yunlong have a movie? Lower its filming rate to 5%. Give the vacant films to Three Realms.”

“But, President Feng, Director Teng is a well-known director. If we squeeze the screening rate, I’m afraid it will cause him to be dissatisfied.”

“As for his next movie, we don’t have to worry that he will come to our cinema to play it. After all, Longfei Film and Television has fallen. The biggest cinema is our Feng Corporation.”

The subordinate felt that Feng Shuo’s words made sense.

He nodded in agreement. “Alright, I’ll make the arrangements right away.”

Teng Yunlong was furious when he found out that his movie’s screening rate had been squeezed.

He called Feng Shuo and questioned him.

He was furious. “President Feng, my movie has only been released for 13 days and you’ve already reduced the screening rate to 5%. What do you want others to think of me?”

Feng Shuo smiled and said, “Director Teng, you can’t blame me for this. It’s all because your movie’s results aren’t good. The total box office earnings so far are only a little over 100 million yuan. The daily box office earnings of Three Realms are comparable to your current total box office earnings. I have to take care of Three Realms, right?”

Teng Yunlong was holding back his anger.

He could tell that Feng Shuo was mocking him and looking down on his box office earnings.

“President Feng,” Teng Yunlong gritted his teeth and said, “I’m a famous director. How dare you treat me like this?”

Teng Yunlong had failed three movies in a row.

The others only mocked him in private. Feng Shuo was the first person to mock him in front of him.

Feng Shuo smiled and said nothing.

Teng Yunlong clenched his fists. “President Feng, aren’t you worried that my movie won’t be screened at your place?”

## Chapter 1242 - 1242 There’s No Piracy Of The Movie

1242 There’s No Piracy Of The Movie

Feng Shuo didn’t think much of it. “Do whatever you want, Director Teng. Our cinema doesn’t care about you. I hope you can find your own position. You have no right to threaten me.”

After saying that, he hung up the phone.

Teng Yunlong’s expression was very ugly.

Indeed, Feng Film and Television did not need to put him in their eyes. As for him, he had to be with Feng Film and Television at the moment...

Three days passed.

The popularity of the Three Realms had yet to die down. The top three trending searches were all about the Three Realms.

The netizens who didn’t want to spend money and those who couldn’t wait went to look for pirated versions.

But the strange thing was...

Piracy?

They had discovered that none of Shenghe Entertainment’s movies and TV series were pirated.

These netizens posted on Weibo and asked, [Isn’t Shenghe Entertainment very evil? You can find pirated copies of movies on the entire internet, except for Shenghe Entertainment.]

A marketing account with a high number of Weibo fans saw it and copied it.

He also posted it on Weibo.

Soon, this topic was at the top of the trending searches again.

[They must have used some kind of technology to create the 5D glasses. The special effects are so good. I've asked around. Shenghe Entertainment doesn't outsource the editing of their movies and dramas. They edit them themselves. It's so scary. I really wonder if this is an entertainment company or a technology company.]

[I have a feeling that the behind-the-scenes boss of Shenghe Entertainment and Shengshi Technology is the same person. Perhaps they have a very close relationship.]

[Shengshi Technology has also developed an all-intelligent mobile game before. They should have the ability to do so.]

[If Shengshi Technology develops a fully intelligent mobile game and now has 5D glasses, I'm afraid they'll be in the sky.]

[...]

All kinds of guesses came out.

Many people started to suspect that Shengshi Technology was Fu Hanchuan as well. They ran over to Fu Hanchuan's Weibo to ask, but Fu Hanchuan ignored them.

Those companies that specialized in pirated goods looked at this trending topic.

They really wanted him to reply.

They also felt that it was strange. They did have pirated films, but they could not send them out at all. There would always be errors.

They couldn't post it on Weibo or QQ.

However, they didn't dare to reply to these netizens. In this line of work, they didn't dare to casually expose their identities for fear of being targeted.

At night, after school, Lu Ming ran over to look for Qin Sheng.

He wanted to get a free meal.

Of course, with Fu Hanchuan around, he didn't get what he wanted.

He sat alone in the living room and picked up an apple to eat to satisfy his hunger.

Her resentful eyes kept drifting to the dining room.

In order to freeload, he deliberately skipped dinner and came over. He did not expect his brother to be so cold-blooded. There was clearly a table full of dishes, but he lied through his teeth that he did not get a share.

At this moment, he was starving.

Lu Ming had thought about finding snacks to eat, but Qin Sheng and Fu Hanchuan, these two perverts, did not have a single bag of snacks at home.

Lu Ming ate two apples.

Fu Hanchuan and Qin Sheng walked out of the dining room.

“Brother, Sister-in-law,” Lu Ming shouted obsequiously.

Fu Hanchuan glanced at him indifferently. “What’s up?”

Lu Ming rubbed his hands together. “There is indeed something. Sister-in-law, didn’t you invest in Shenghe Entertainment? Um, can you get me a few movie tickets?”

“Alright, how many do you want?” Qin Sheng asked.

“Ten.” As soon as he said that, Lu Ming immediately changed his mind. “No, twenty tickets. Of course, Sister-in-law, the more tickets, the better.”

## All-Mighty Girl Gets Spoiled by A Bigshot

1243 Stingy Fu Hanchuan

Lu Ming wanted to go to the movies, but he couldn’t get the tickets.

However, he also wanted to make a profit from it. He thought that 1,000 yuan for a ticket should be very popular. After all, his price was half of the price of the scalpers.

Lu Ming’s little plan was very loud.

He was doing everything he could to make money.

Fu Hanchuan narrowed his eyes and said, “I’ll only give you five tickets.”

“Brother, there are only five. Is that enough?” Lu Ming retorted.

Fu Hanchuan was expressionless. “Three.”

Lu Ming: “...”

He was afraid that Fu Hanchuan would continue to decrease it, so he quickly raised his hand and surrendered. He said, “Brother, Brother, stop talking. Just three. Three is enough.”

“Yes, give 360 yuan to Sheng Sheng.”

Lu Ming: “!!!”

He still had to pay!

One ticket was 120 yuan. Wouldn’t the three tickets add up to 360 yuan?

Lu Ming was speechless. “Brother, aren’t you being too stingy?”

The president of HD Group was asking his younger brother for 360 yuan?

Fu Hanchuan glanced at him. “We’ll settle accounts with each other.”

Lu Ming: “...”

He was speechless again.

Lu Ming could only transfer the money to Qin Sheng with a sullen expression.

Qin Sheng looked at the money transfer in QQ and accepted it. Then, she said, “I’ll give you the movie tickets tomorrow. Come to Professor Gao’s laboratory around 10 o’clock.”

Feng Shuo had reserved some movie tickets for her.

If she wanted it, she could take it anytime.

“Alright.”

Lu Ming was no longer in the mood to stay in Fu Garden.

He waved his hand and left. Lu Ming held his fingers together, thinking that he could take one to watch a movie and give the other one to Xie Hen. As for the last one, he could still earn a thousand yuan.

This time, he did not lose anything.

Lu Ming was also an optimistic person. He liked to think in the positive direction. At this moment, his mood was much better.

--

Another month passed.

Shengshi Technology held a press conference to release their second game, the Three Realms virtual online game.

Shengshi Technology rarely released games.

However, once it was released, it would be very popular.

Shengshi Technology had released a total of three games. Other than Three Realms, the rest were all mini games. However, each mini game's daily revenue could reach 10 million. This was considered a very good result.

At this moment, Shengshi Technology was releasing a new game, and many people were paying attention to his live broadcast.

Hong Yuan stood on the stage.

“Shengshi Technology spent a year and three months to develop a new game.”

The reporters held their breaths.

They had a feeling that the game released by Shengshi Technology this time was not simple.

After all, it had only taken them four to five months to develop a fully intelligent mobile game. This time, they had actually spent three times the time to develop it.

It wasn't that they hadn't inquired about Shengshi Technology's research and development.

However, Shengshi Technology's employees were unwilling to say anything, so they stopped thinking about it.

“It's a holographic virtual reality game,” Hong Yuan continued. “It has the same name as the full-intelligence mobile game. It's also called Three Realms.”

Boom!

The audience exploded. They were doing a live broadcast, and the comments on the internet were also flooding in like crazy.

Holographic virtual reality, these three words had a huge impact on them.

Holographic virtual games added a three-dimensional effect, focusing on realistic effects. It could make people feel like they were there, and the scene was smooth. Through brain waves, human brain activity could control the game characters.

## Chapter 1244 - 1244 The Arrogant Shengshi Technology

### 1244 The Arrogant Shengshi Technology

In other words, netizens did not need to do anything and could play the game directly. Moreover, it would give people the feeling that they were in the game world.

This was only a theoretical assumption at the moment.

In the world, there were many people who had conducted research, but they were all in vain.

With the current level of technology, it was far from being able to develop a game.

Now, Shengshi Technology had announced that they had developed a holographic virtual reality game.

Many people couldn't help but wonder.

Was this really true?

The development of a holographic virtual reality game was much more difficult than the development of a fully intelligent mobile game!

The reporters came back to their senses and began to ask questions.

“General Manager Hong, are you sure it's a holographic virtual reality game? Isn't it a gimmick?”

“Director Hong, in a year and three months, you've developed a holographic virtual reality game in such a short period of time. Are you sure that the effects are really as described on the internet? The effect won't be very sloppy, right?”

“General Manager Hong, I hope you won't let everyone down.”

“..”

The reporters were all doubtful. After all, this was hard to accept.

Before Shengshi Technology developed a fully intelligent mobile game, there was at least some research, but the results were extremely poor.

Holographic virtual reality games were different.

There was no progress in this research.

After all, it was difficult to obtain human brainwaves, let alone control the game with brainwaves.

Hong Yuan answered a few questions.

“Our company is indeed developing a holographic virtual reality game. The company has experimented with it internally and the results are very good.”

The reporters were speechless.

Hong Yuan’s last sentence was very arrogant, but they could not refute it.

After all, the speed at which they were developing mobile games was unimaginable.

They wiped their sweat and continued to ask, “Then, General Manager Hong, can you tell us why you want to develop a holographic virtual online game? After all, this is something that many game companies don’t even dare to think about. The amount of manpower, resources, money, and time required is immeasurable, and it is difficult to succeed.”

“We have the ability,” Hong Yuan answered honestly. “The funds we’ve obtained through the full-intelligence mobile game are enough to support our research and development.”

“Of course,” he said with a smile, “another important reason is that my boss suggested developing it.”

Hearing Hong Yuan mention the word ‘boss’, the reporter’s interest was piqued. “Then, may I ask, General Manager Hong, how much of a role does your boss play in the development of the game?”

Hong Yuan’s serious expression could no longer be maintained. His tone carried a hint of resentment. “She likes to do nothing. She won’t come to the company once a week.”

The reporter was speechless.

Shengshi Technology had created a lot of value. Their daily income was almost over 100 million yuan, yet they could still be so casual?

The reporters doubted Hong Yuan’s words.

“Then, General Manager Hong, do you have any opinions about your boss?” asked another reporter.”

“Of course there is.”

Yu Bei, who was standing at the side, couldn’t hold it in anymore. He stood up and started to complain crazily, “It should be hard not to complain. Tell me, with such a strong ability, she actually doesn’t use it. Isn’t this a waste? Moreover, this is her own company. She doesn’t care as much as us employees.”

## All-Mighty Girl Gets Spoiled by A Bigshot

1245 Holographic Virtual Glasses

“Oh, what do you mean?”

The reporters pricked up their ears, feeling that this was big news.

Yu Bei replied, “Boss’s computer skills should be hard to compare to. Usually, I need to spend three or four days to solve the programming problem. She only takes a second to know how to deal with it. If she helps us develop it, this time will be reduced by at least half.”

The reporters looked at each other.

Was he that powerful?

As far as they knew, Yu Bei could be considered a core figure in Shengshi Technology. He was very capable, but his boss was actually stronger than him?

Moreover, from Yu Bei’s description, the person behind Shengshi Technology was more than twice as powerful as him.

Their curiosity was piqued. Who was the person behind Shengshi Technology?

Of course, they didn’t dare to ask directly. They knew that Yu Bei and Hong Yuan wouldn’t tell them.

A male reporter asked again, “Then, General Manager Hong, there’s been a lot of discussion about Shenghe Entertainment’s 5D glasses on the internet recently. Moreover, the movie that Shenghe Entertainment is filming is called Three Realms, and your companies are next to each other. May I ask if the boss of Shenghe Entertainment and Shengshi Technology is the same person?”

Hong Yuan knew that this matter could not be hidden for long.

He simply nodded. “It’s the same. The 5D glasses and the special effects of the movie were also developed by Shengshi Technology.”

The reporters were stunned.

This, this, this Shengshi Technology was really going to soar to the heavens?

The netizens were also stunned.

The bullet comments started spamming crazily again.

[Shengshi Technology is awesome!]

[Shengshi Technology 666!]

[Prince Charming Fu is amazing!]

[I’m uncultured, so I can only say, f\*ck!]

The reporter was shocked, but he also had some doubts. “Then, General Manager Hong, aren’t you guys developing a holographic virtual online game? Then you still have time to study 5D glasses?”

Hong Yuan replied again, “Our holographic virtual online game requires 5D technology. It just so happens that the entertainment company might use this technology. We also made 5D glasses by the way.”

The reporter was speechless.

He could actually say it so easily.

The reporters were speechless. Even if they had 5D technology, it would take a lot of effort to develop 5D glasses.

Moreover, those glasses were very thin and light. It was almost impossible to feel its presence when they wore them. They must have used many methods to do so.

The reporters once again felt that Shengshi Technology was a fantasy.

Hong Yuan didn’t answer the reporters’ questions for the time being and started to introduce the holographic virtual online game.

“The holographic virtual online game that we developed mainly uses all-intelligent technology, 5D technology, and holographic virtual technology. Because it’s an online game, the scene content and characters of this game are much more than all-intelligent

games. It's also more exquisite. I believe it will bring an excellent gaming experience to everyone."

"Will you be using a virtual reality helmet?" a reporter asked curiously.

At present, someone had proposed to use a holographic virtual reality helmet to read brainwaves and control the game.

Hong Yuan curled his lips and denied, "No, it's the holographic virtual reality glasses."

He asked his secretary to bring him a pair of glasses.

The reporters and netizens tightened their glasses.

The glasses looked no different from normal glasses.

Hong Yuan explained, "The weight of this pair of glasses is almost the same as 5D glasses. You won't even be able to feel its existence. Even if you're short-sighted, no matter how high your degree is, you'll be able to see very clearly when you wear it. Moreover, it won't cause any damage to your eyes."

## Chapter 1246 - 1246 The Company Is Sister Sheng's

1246 The Company Is Sister Sheng's

The reporters: "..."

This was too magical. It could actually be used as a pair of glasses for short-sighted people.

Hong Yuan continued, "There's a special chip hidden in the glasses. This is the key to obtaining brainwaves and controlling the game. Basically, you can play games whenever you want with the glasses on."

The reporter was very surprised. Was it so magical?

"Then, General Manager Hong, I would like to ask if the chip in these glasses will cause damage to the skin and brain?" asked a reporter.

"Don't worry about that," Hong Yuan answered honestly. "The outer surface of the chip and the frame of the glasses are made of special materials."

The reporters did not know what to ask next.

At this moment, they were completely in a state of shock.

They kept suspecting that they had entered a sci-fi world.

And this, was it certain that it would only take one year and three months to complete? Wasn't this a little too magical?

A pair of small glasses contained so much technology.

Any other company would not be able to complete any of them even if they spent five to six years.

The reporter wiped their sweat.

Shengshi Technology looked as if it had accomplished three impossible things.

They really wanted to know if there was anything that Shengshi Technology couldn't do.

On the live broadcast screen, the netizens started spamming 6666 again.

They also began to comment crazily below the video.

[Shengshi Technology, are you still hiring? I want to go in. Thinking about being able to develop these creative technologies, my heart is filled with pride.]

[This is too awesome. I'm afraid even the technology companies in G Country can't compare to Shengshi Technology.]

[F\*ck, what kind of godly company is this!]

[Shenghe Entertainment belongs to Prince Charming Fu, while Shenghe Entertainment and Shengshi Technology share the same boss. This means that Shengshi Technology also belongs to Prince Charming Fu.]

[Wait, didn't Hong Yuan say that Shengshi Technologies' boss isn't a girl? Could it be Prince Charming Fu? F\*ck, could it be that we're all wrong? The boss of Shenghe Technology isn't Prince Charming Fu?]

These netizens became detectives again and began to guess if Shenghe Entertainment was Fu Hanchuan's.

Someone suggested.

[I have a guess. This company can't be Sister Sheng's, right?]

When the netizens saw this comment, they were stunned for a second and then began to object.

[How is this possible? It can't be her, right? She's already very good at painting, medicine, and computers. If the bosses of Shenghe Entertainment and Shengshi Technology were to join in, how would ordinary people like us live?]

[Yes, yes, yes. It shouldn't be her. I won't believe it even if you beat me to death.]

[She doesn't have so much energy to do all this alone. It takes a lot of time to start a company, right? Although I'm just an ordinary person, I've heard a lot of things about the chairman.]

Of course, these netizens were also refuted.

[No time. Are you sure? Didn't you hear what Hong Yuan said? She's a hands-off manager and doesn't even go to the company once a week. Moreover, she could see the solution with just a glance. Sister Sheng Sheng should have enough time.]

The netizens were not convinced by the other party and began to quarrel. They could not be bothered to watch the live broadcast.

Hong Yuan held a pair of holographic glasses and asked, "Anyone want to try?"

As soon as he finished speaking, a reporter immediately raised his hand. "Let me do it. I've played Three Realms, an all-intelligent mobile game."

"Alright."

## Chapter 1247 - 1247 Worried That I Can't Sell Glasses

### 1247 Worried That I Can't Sell Glasses

Hong Yuan handed him the glasses. "After you put them on, you can operate them according to your own wishes. There's no need for any switch. As for the appearance of your character, it's also formed according to your wishes. However, the character has already been designed. You can enter the game directly later."

"If there's a problem with the heart, it's not recommended."

"Don't worry, no problem." When the reporter heard this, he put it on.

There was a computer in front of him.

The other reporters came over and looked at him with envy. This speed was too fast. They also wanted to give this game a try.

Everyone's eyes fell on the reporter, staring at him nervously.

Not long after the reporter put on his glasses, he was immersed in the game.

Not long after, he became very emotional.

"F\*ck, why is this person's IQ so high? Why did you get me involved? I can't compare to you in terms of IQ, so why would I be afraid of not having enough strength?"

Then, he danced and did all kinds of martial arts moves.

The other reporters were speechless.

He had scratched their hearts so hard that they were itching for it, yet he still had such a big reaction?

The reporter's movements were too big. Just as he almost hit the reporter beside him, the system prompt sounded in time. "Pay attention, pay attention. Don't hurt others."

Only then did the reporter come back to his senses. He still wanted more and reluctantly took off his glasses.

The other reporters didn't ask the reporter how he felt when he used it. They could tell from his movements.

It was the reporter who said it himself, "This is too amazing. It's indeed as General Manager Hong said. That character speaks and moves according to my will. I also feel like I'm in the game world. This is the first time I've played such a fun game."

"General Manager Hong, how much are these glasses? I'll buy them."

Hong Yuan curled his lips. "50,000."

"50,000!" The reporter was stunned and felt a little afraid.

This 50,000 yuan was his salary for several months.

However, when he thought about the game experience just now, he could guess that this game would definitely be popular. It would be difficult for him to buy it in the future.

He hardened his heart. "Isn't it just 50,000? I'll buy it!"

The reporter was stunned and could not believe it. "Really?"

Hong Yuan smiled. “With so many people watching, I can’t go back on my word.”

The reporter reacted and quickly thanked him. “Thank you, General Manager Hong.”

When the other reporters saw this, they were jealous again. If they stood up and suggested playing games, wouldn’t the holographic glasses be theirs?

This was 50,000 yuan!

The reporter naturally felt everyone’s envious gazes on him. He straightened his back and was very proud.

One of Shengshi Technology’s employees followed Hong Yuan’s instructions and came up with a gift bag, handing it to the reporter.

“There are user and maintenance instructions inside.”

“Alright.” The male reporter took it.

The reporter continued to stay there. If it wasn’t for the mission, he would have gone back to play this online game.

A reporter asked, “General Manager Hong, the price of the holographic glasses is 50,000 yuan. Isn’t that too expensive?”

“The cost is very high.” Hong Yuan replied.

“Then how many will you sell the first time?” the reporter asked.

“5,000.”

The reporter frowned. “This price is very high. General Manager Hong, aren’t you worried that you won’t be able to sell it?”

Hong Yuan smiled. “Let’s wait and see. Tomorrow, the official website will be selling the holographic glasses for the first time. As for online games, they can also be downloaded directly from the internet. However, the experience is not as good as wearing the holographic glasses.”

## All-Mighty Girl Gets Spoiled by A Bigshot

At this moment, the live broadcast screen was filled with bullet comments again.

[50,000 dollars, this price is not low. Although I am also very tempted, poverty limits my actions. Forget it, I won't buy it.]

[Hehehe, Shengshi Technology must be crazy about money. Who else would buy a pair of glasses priced at 50,000 yuan?]

[Let's go.]

[...]

After the press conference, the topic of the holographic glasses became a hot topic.

This included the topic of the high price of the holographic glasses. Most netizens said that they would not buy the holographic glasses.

Many media and gaming companies were waiting for Shengshi Technology to fail.

Who would be willing to buy a pair of holographic glasses that cost 50,000?

However, the holographic glasses were sold on Shengshi Technology's official website at 9 o'clock sharp the next morning.

In less than ten seconds, they were all snatched up.

Those netizens who were still hesitating: "...!!!"

They all went to Weibo to complain.

[F\*ck, they're all demons!]

[You're all tycoons, aren't you? 50,000 yuan?]

[I've already prepared 50,000 yuan and was ready to snatch it, but it's gone in just ten seconds? F\*ck!]

The reporters were stunned.

They wiped their sweat.

Most of the comments yesterday were about not buying the holographic glasses, and the moment they were sold, they were gone. Was this the so-called saying that one's integrity was not respected?

Those who didn't manage to get the holographic glasses went to Shengshi Technology's official Weibo to ask when they would sell the next batch.

Hong Yuan replied that he would sell another 5,000 pairs of holographic glasses a week later.

However, many people couldn't wait any longer. Shengshi Technology's limited sales made the holographic glasses popular. Many people began to ask for the holographic glasses at high prices online. The highest price was 200,000 yuan per pair.

Most of the people who were willing to spend 50,000 yuan to buy the holographic glasses were not short of money.

Therefore, very few people were willing to sell them. Instead, they went to Weibo every day to share their experiences and brag about the holographic glasses.

This made those who did not manage to buy the holographic glasses even more tickled.

Shengshi Technology had developed a holographic virtual reality game, and even the country was shocked.

The technology involved could help the country develop better.

After some negotiations, the country finally spent more than 1 billion yuan to buy the technology for the holographic virtual game from Shengshi Technology. However, Shengshi Technology had a condition that the country had to be responsible for confidentiality and not tell the technology to private companies.

As for the Three Realms movie, the box office sales were a little weak because it had been screened for a long time.

However, once the holographic virtual reality online game was released, the popularity of the movie rose again!

Very soon, the game spread overseas.

The business leaders were speechless.

China actually had such ability?!

Even the Minister of Science and Technology of G Country, Major, was shocked by the holographic virtual online game and called an emergency meeting on this matter.

He sat on the main seat and said coldly, "We have to take this holographic virtual reality game seriously."

One of his subordinates frowned and said, "Isn't it just a small China? We don't have to take them seriously."

"But in a small country like China, a gaming company called Shengshi Technology first developed an all-intelligent mobile game, then 5D glasses and holographic virtual

netizens. There are many companies in our country that have developed these, right?" Major asked.

The subordinate fell silent.

## All-Mighty Girl Gets Spoiled by A Bigshot

"If this holographic virtual technology is controlled by China, it will be a great harm to our country. We can't let this happen."

"Then, Minister, what should we do?" asked another subordinate with a frown.

"Send someone to negotiate with Shengshi Technology immediately and see if we can buy the technology. If it doesn't work, we'll have to use some unconventional methods," Major said in a deep voice.

He was very fast and immediately sent someone to contact Shengshi Technology.

Shengshi Technology's attitude was very firm.

Even when G Country offered a high price of 5 billion, Shengshi Technology did not agree.

The people from G Country were still persuading them.

Hong Yuan was getting impatient and said directly, "Shengshi Technology's technology will definitely not be sold to G Country, not even if it's 100 billion. You'd better give up on this idea."

The man had no choice but to leave.

When he returned, he reported the matter to Major and even added fuel to the fire.

"Minister, when the general manager of Shengshi Technology spoke to me, he was very disdainful. It's obvious that they don't take us seriously."

"Since I'm giving them face, don't blame me if they don't want it. Let Francois come over."

Francois came over very quickly.

After listening to Major's instructions, a smile appeared on his face. "Don't worry, Minister. I can definitely complete this matter perfectly for you."

He was very confident.

After all, he had done this kind of thing many times, and none of them had failed.

On the third day, he spent a lot of money to buy holographic glasses from someone else and took out the chip inside.

"Shengshi Technology isn't willing to give us the technology. Do they really think that we have no choice?" The assistant smiled.

"They should be confident." Francois said disdainfully.

He could still crack the technology developed by Shengshi Technology.

However, after a week, there was still no progress.

Francois frowned.

"If we continue like this, I'm afraid we're wasting time." The assistant frowned.

Francois sneered, "It's okay, we have other ways. Aren't Chinese people most concerned about benefits? I don't believe that they won't obediently hand over the technology after giving them the money."

In the past, he would often use this method.

He had never hit a wall.

It was probably the same this time.

"Get someone to contact one of Shengshi Technology's higher-ups immediately. Tell them to teach us the technology. As long as the conditions aren't too much, we can give them anything."

Francois did not know that Qin Sheng had already predicted his intentions and had already arranged everything in advance.

The employees of Shengshi Technology did not dare to betray the company.

They stayed in the company and knew how capable Qin Sheng and Yu Bei were. If they dared to betray Shengshi Technology, they would definitely not end well. Moreover, they would return the benefits they had obtained from it.

They didn't have the guts to offend the company.

With Qin Sheng's arrangements, after Francois contacted the executives, the executives immediately called Hong Yuan to ask for his opinion. "General Manager, someone from G Country contacted me."

Hong Yuan narrowed his eyes. "Alright, we'll follow the original plan. Give them the things we prepared and ask for another 3 billion."

The executive was very excited.

He knew that Qin Sheng was going to mess with G Country. He could predict that Qin Sheng's methods would not be bad this time.

## Chapter 1250 They Want 3 Billion

He rubbed his hands and promised, "General Manager, don't worry. I'll definitely complete the task perfectly."

The executives came to the hotel to meet the people sent by G Country.

"Hello, Mr. Chen." Lin Yuanren extended his hand and spoke politely.

The executive shook his hand and raised his eyebrows. "You came because of the holographic virtual reality game?"

Lin Yuanren nodded. "Indeed, Mr. Chen. I won't beat around the bush. As long as you give us the technology and conditions, you can state them."

"Condition." The executive chuckled and continued to ask, "Are you sure you can do anything?"

"As long as it's not too much."

"Alright, then I want 3 billion," the executive said directly.

Lin Yuanren frowned. He did not expect the other party to demand such an exorbitant price.

"Don't you think your appetite is a little too big?" Lin Yuanren said coldly.

"Sorry, we can't afford that much money."

"This technology is worth this price." The executive said casually, "If you don't give me enough of this 3 billion, then there's no need for us to cooperate. After all, I'll be taking a lot of risks in there. If the money is too little, I won't do it."

Lin Yuanren sneered. "Mr. Chen, you're not the only person in Shengshi Technology who has this technology."

"Alright, you guys go find someone else. I won't accompany you anymore."

The executive stood up.

He was certain that Lin Yuanren would give him the money.

Qin Sheng had already arranged everything. It was impossible for Francois to find anyone else.

Just as the senior manager was about to leave, Lin Yuanren's voice sounded again. "Wait."

"Mr. Lin, is there anything else?" the executive asked with raised eyebrows.

Lin Yuanren held his breath and suppressed his anger toward the executive.

"3 billion is not a small amount. I can't make the decision. Mr. Chen, wait for me to ask my boss."

"Sure."

The executive returned to his seat and began to pick up the dishes on the table. He ate with relish.

Meanwhile, Lin Yuanren reported the situation to Francois.

Hearing this, Francois immediately stood up from his seat, "3 billion!"

"Yes, 3 billion." Lin Yuanren answered honestly, "If he doesn't have the money, he probably wouldn't hand over the technology."

"He's not the only employee of Shengshi Technology."

Lin Yuanren wiped his sweat and replied, "There's nothing I can do about it. The technology included in these virtual reality online games is definitely confidential. The employees with lower status don't know at all. As for the other higher-ups, they all rejected me."

Francois' voice was very deep. "Is there no other way?"

"No, there isn't." Lin Yuanren nodded.

Francois gritted his teeth. "Alright, go and negotiate with him. Make him obediently teach us the technique."

The technology involved in this virtual reality game was very important. It would be better for the country's development if they studied it earlier. Francois didn't want to waste time.

"Alright." Lin Yuanren agreed and returned to the hotel room.

Lin Yuanren left for more than ten minutes, and the executive was almost done eating.

Seeing Lin Yuanren return, he grabbed a tissue and wiped his mouth. Then, he raised his eyebrows and asked, "Mr. Lin, what do you think?"

"As long as you can guarantee that your technology is the core technology of the holographic virtual online game, we will give you the money."

The executive chuckled. "Then you're being unfair. My condition is that you pay me and I deliver the goods. Otherwise, there's no need to talk."
