

## Bigshot 491

### Chapter 491 There Was An Accident

Hong Yuan, who was standing at the side, looked at Yu Bei with a headache.

Why was Yu Bei so talkative?

It was still fine when he first came to the company. Now, Yu Bei was more and more talkative. In the company, he would chat with whoever he caught.

In front of Qin Sheng, his talkative and sarcastic personality did not change.

Was Yu Bei not afraid of being slapped in the face?

He remembered that every time Yu Bei questioned Qin Sheng, he would be slapped in the face.

Hong Yuan suddenly wanted to see Yu Bei being slapped in the face.

Yu Bei crossed his arms and kept talking. "Boss, you should take it slow. With your standard, you should be able to solve it in a week. After all, we still have more than three weeks before the game is released. There's no need to rush."

Qin Sheng did not say anything.

Hong Yuan only felt a buzzing sound in his ears. It was very annoying. He did not want to listen to Yu Bei talk anymore.

He frowned and said, "If you talk again, your workload in a day will double."

Hearing that, Yu Bei quickly covered his mouth. He stretched out two fingers and guaranteed that he would not speak again.

At this moment, Qin Sheng had already found the mistake. She was the one who had switched the two English letters. This became a completely different English word, and it affected the entire program code.

She changed it.

Then, she pressed the enter key.

Yu Bei continued to watch the show. In Yu Bei's opinion, it was still impossible for Qin Sheng to complete the compression of the memory. After all, Qin Sheng had only modified one word.

Qin Sheng switched to the display of the memory.

It was still 10 GB.

Hong Yuan frowned.

Yu Bei couldn't control himself and said, "Boss, one word can't affect anything. You'd better check it again."

Qin Sheng raised her eyebrows and smiled. "Yu Bei, have you forgotten the lesson from the

past?”

This lesson was naturally referring to how Yu Bei had been slapped in the face by Qin Sheng time and time again.

Hearing this, Yu Bei’s body trembled and he did not dare to speak anymore.

If Qin Sheng did not say anything, he would still dare to continue ridiculing Qin Sheng. However, if Qin Sheng opened her mouth personally, he would be terrified.

From the bottom of his heart, he still did not believe that Qin Sheng would be able to solve this memory problem today.

Qin Sheng only checked the code once and simply modified a word. There was nothing else. Even if a word was useful, it would not affect the entire code.

The memory did not decrease at all just now. Clearly, it was not just because of one word.

A few minutes had passed, but there was still no movement.

Yu Bei thought that Qin Sheng had failed again.

Qin Sheng could guess that although Yu Bei did not dare to criticize her on the surface, he must be cursing her in his heart.

Qin Sheng did not expose Yu Bei. She preferred to convince Yu Bei with actions.

She lazily leaned against the back of the chair and gently tapped on the table with her slender fingers.

Soon, two minutes passed.

There was still no change in the memory displayed on the computer.

Yu Bei wanted to complain again, but when he caught a glimpse of Qin Sheng from the corner of his eye, he quickly covered his mouth.

Forget it, he had to endure it.

Anyway, Qin Sheng would not be able to complete it today. It was better for him to give Qin Sheng face. Otherwise, he would not be able to withstand the retaliation when the time came.

“Boss, this...”

Hong Yuan suddenly looked at the computer screen in surprise. He was stunned, so shocked that he couldn’t speak.

“What’s wrong?” Yu Bei was very puzzled. Could it be that something happened to the memory?

Chapter 492 I Am a Dog

Yu Bei looked at the computer.

Then, he was also stunned. His mouth was wide open, and his eyes were filled with disbelief.

What did he see?

The memory displayed on it was declining at a crazy speed.

7 GB, 6 GB, 5 GB, 4 GB...

When the memory dropped to 3 GB, the speed started to slow down.

When it reached 2 GB, it did not stop.

Yu Bei's mouth was wide open, but he did not shut it for a long time. "It, it's possessed?"

Qin Sheng smiled faintly and looked at Yu Bei without saying a word.

Finally, when the memory was reduced to 1.3 GB, it stopped.

At this time, Yu Bei was so shocked that he could not speak. He did not know that a simple English letter could have such power!

Qin Sheng raised her eyebrows. "Yu Bei, how is it?"

Yu Bei swallowed his saliva and felt his face hurt badly.

He regretted it. If he had known earlier, he would not have doubted Qin Sheng. What could she not do? A pervert like Qin Sheng?

He had really been slapped in the face time and time again.

He quickly nodded. "Boss, the next time I dare to doubt you, I will be a dog."

Then, he kept glancing at the computer.

He really wanted the code that Qin Sheng had just written.

Although the code might not be useful for other games, it was still full of dry goods. When he fully studied it, he would definitely learn a lot from it.

However, Yu Bei did not dare to speak. He did not forget how he had doubted Qin Sheng just now.

In Yu Bei's impression, Qin Sheng was very vengeful and petty.

Anyway, every time he offended her, nothing good would happen, and he was also a person who did not learn his lesson.

Qin Sheng smiled. "You want it?"

Yu Bei could see the malicious intent on Qin Sheng's face. He really wanted to say no.

However, his actions had already surpassed his rationality back then. He nodded eagerly. "I want it, Boss. I want to take this code back and study it properly. When my skills improve, it will also be helpful to the company, right?" "That's good." Qin Sheng curled her lips. "I'll arrange a task for you." Yu Bei's face stiffened. There was indeed a condition. He knew that his boss was very stingy.

Yu Bei braced himself and nodded. "Alright, I'll accept it."

Yu Bei gritted his teeth as he said this.

“Pay attention to Long Yue Technology’s movements in the past month. You can hack into their company’s surveillance computer and report their movements towards the new game and our company every five days,” Qin Sheng instructed.

This was not a small amount of work.

However, Yu Bei had no choice. If he wanted the code, he had to agree.

Yu Bei closed his eyes, nodded his head, and went all out.

Yu Bei thought of something and rubbed his hands. “Boss, look, my phone number and Penguin number are still on your blacklist. How am I going to report to you?”

Yu Bei had wanted to leave Qin Sheng’s blacklist for a long time, but he did not have the chance.

Occasionally, Qin Sheng would let him out because of something, but after the matter was completed, Qin Sheng blacklisted him again.

Now, he needed to monitor Long Yue Technology for almost a month, which meant that he could leave Qin Sheng’s blacklist for a month.

Thinking of this, Yu Bei felt that the task given by Qin Sheng was not so difficult to accept.

Upon hearing this, Qin Sheng generously expressed that she would pull Yu Bei’s cell phone number and Penguin number out of the blacklist when she returned.

She asked Yu Bei to export the code himself.

Yu Bei did not stay any longer. He carried the code back to his desk happily.

#### Chapter 493 Was Set Up

In the office, only Qin Sheng and Hong Yuan were left. “Boss.” Hong Yuan’s tone was very respectful. Qin Sheng looked up and asked casually, “How’s the matter with Long Yue Technology?”

“I’ve already asked Liu Cheng to bring the information over as you instructed.”

Hong Yuan asked in puzzlement, “Boss, why did you give the game to them? Moreover, it’s not difficult to prevent Long Yue Technology from stealing the game from the company.”

Qin Sheng smiled. “If I don’t do that, how can I help you teach Long Yue Technology a lesson?”

Hong Yuan quickly understood. “Is there something wrong with the information you gave us?”

“Yes.” Qin Sheng nodded and tapped the table with her fingertips, “The code inside is hiding a virus. As long as I activate it, it will attack Long Yue Technology’s server. At that time, not only will the game crash, but the other games under Long Yue Technology will also inevitably be attacked.”

Hong Yuan was stunned. “There’s such an effect?”

Qin Sheng’s lips curled into a smile as she looked at Hong Yuan. “Uncle Hong, you can take revenge now.”

Hong Yuan’s eyes were moist. “Thank you, Boss.”

It was Qin Sheng who pulled him out of the abyss. He had become the general manager of Shengshi Technology and had very high decision-making power. However, he had never thought of using Shengshi Technology to deal with Du Kaifeng and Long Yue Technology. Qin Sheng had already given him enough benefits. He couldn't be ungrateful. He wanted to take revenge, but this was only his personal problem. Hong Yuan didn't want to involve the company.

He didn't expect Qin Sheng to take the initiative to help him take revenge.

Long Yue Technology was currently the best gaming company in H City. The other gaming companies didn't dare to offend him, but Qin Sheng's actions could be considered to have completely offended Long Yue Technology.

It was hard to guarantee that Long Yue Technology would not trip up Shengshi Technology

Hong Yuan's tone was filled with guilt. "Boss, will Fang Xuelin go against our company?"

This Fang Xuelin was the chairman of Long Yue Technology.

Qin Sheng smiled nonchalantly. "He doesn't have the ability to want something to happen to Shengshi Technology. After this, it will be a heavy blow to him. I think he doesn't have the energy to deal with us."

She comforted him, "Uncle Hong, you don't have to blame yourself. Long Yue Technology will definitely target our company's game. It's only a matter of time. We might as well take the initiative."

"Besides, we can use Long Yue Technology to promote our game. This will save us a lot of publicity money, and the effect will be better than normal. Why not?"

Having said that, Hong Yuan was still very grateful to Qin Sheng.

With Qin Sheng's ability, he would definitely be able to deal with Long Yue Technology's methods easily. Qin Sheng must have done this largely because of him.

Hong Yuan choked.

"Uncle Hong, do you have a USB drive?" Qin Sheng asked.

"Yes."

Hong Yuan took out a USB drive from the drawer and handed it to Qin Sheng.

Qin Sheng copied the program she had just written and put it into a document.

Her slender and good-looking fingers rapidly tapped on the computer keyboard.

Some things were inserted into this program.

The whole process only took less than four minutes.

Qin Sheng pulled out the USB flash drive and handed it to Hong Yuan. "Give this to Long Yue Technology."

Hong Yuan knew that Qin Sheng was adding fuel to Long Yue Technology.

"Okay, I'll make the arrangements today." Hong Yuan agreed.

## Chapter 494 Face Smacking

Qin Sheng stood up from her seat and said in a cold voice, "Uncle Hong, I'll have to trouble you to take care of the company's matters in the future. You can start preparing to move the company to the imperial capital during this period of time."

"It's no trouble at all. This is what I should do," Hong Yuan said hurriedly.

Qin Sheng did not stay in the company for too long. After dealing with these matters, she returned to Fu Garden.

Yu Bei sat in his office, studying the code that Qin Sheng had left for him.

His eyes were almost glued to the computer. He could not bear to blink, and he rarely drank water.

When it was lunchtime, Yu Bei was still sitting in his seat.

Zheng Yan, the hacker friend that he had tricked into coming to the company, brought him a lunchbox. "It's time to eat, Brother Bei."

Yu Bei was focused on programming and ignored Zheng Yan.

Zheng Yan thought that Yu Bei did not hear him clearly, so he repeated, "Brother Bei, eat, eat. Otherwise, the food will get cold."

Yu Bei frowned and waved his hand. "You guys go ahead and eat. Don't worry about me."

Zheng Yan was very curious. Usually, Yu Bei was not willing to let his stomach suffer. No matter how busy he was, he would always find time to eat.

He was actually not in a hurry now? Zheng Yan came over and placed one hand on the back of Yu Bei's chair. He looked at the computer screen and was quite curious about what Yu Bei was doing.

When he saw a series of codes on the computer that covered an entire page of documents, he had a terrible headache.

"Brother Bei, what are you doing?" "Boss gave me the code. I'm going to study it," Yu Bei answered casually. "Boss gave it to you?" Zheng Yan's interest was piqued when he heard Yu Bei's words. "What kind of code is it about?"

Zheng Yan was well aware of Qin Sheng's strength. She was an existence that could crush Yu Bei. Qin Sheng was almost the only one who had contributed to the company's research and development of this all-intelligent game.

At this moment, it must be extremely good that this code could make Yu Bei forget about lunch.

Zheng Yan was eager to try it out. He also wanted to study the code.

Yu Bei replied, "Memory compression."

Zheng Yan frowned, "Memory? Didn't we study it for a few days without any ideas, so we went to ask Boss yesterday?"

At this point, Zheng Yan's eyes widened. If he was drinking water, he would definitely spit it out.

He asked in disbelief, "Brother Bei, don't tell me that Boss used less than a day to complete the compression of the memory!?" "Could it be that Boss came to the company for the first time today just for the memory matter?"

The more Zheng Yan thought about it, the more he felt that it was possible.

The other two hackers in the office heard Zheng Yan's words and came over.

"A day's time? It must be fake." One of the hackers furrowed his brows tightly.

Even if Qin Sheng was a genius, she would not have compressed the memory so easily. He would still believe it in a week. To complete it in less than a day, this speed was unbelievable.

"That's right. If it's true, then our boss is too amazing."

Yu Bei's gaze finally shifted away from the computer screen.

He raised his eyebrows. "Otherwise, why would I still be studying programming here?"

"No, I have to calm down." Zheng Yan clutched his chest, looking as if he had suffered a huge blow.

The other two hackers were also stunned.

They looked at each other and could see disbelief in each other's eyes.

This, this was real?

A hacker reacted in advance and asked, "Brother Bei, how much memory did Boss compress?"

Chapter 495 Mutiny?

Yu Bei's fingers that were tapping on the computer paused. Since they had asked, he would tell them.

As good brothers, they naturally had to take this blow together.

"We just tested it. 1.3 GB." In the office, other than Yu Bei, the other three people were all stunned when they heard this.

1.3 GB? Did they hear wrongly?

Seeing their shocked expressions, Yu Bei was very satisfied. He raised his eyebrows and continued, "The subsequent memory usage will not exceed 3 GB."

"F\*ck!" Zheng Yan was completely shocked.

He almost choked on his own saliva. "Brother Bei, are you kidding me? The initial memory download is 1.3 GB, and the subsequent memory usage was less than 3 GB? How is this possible?"

"Our mobile game has more content than all the games on the market, and the characters are even more complicated. It's already pretty good that we were able to reduce the memory to 10 GB, but Boss

was able to reduce it to less than 3 GB? No, this must be fake. Otherwise, how could it be so heaven-defying?”

Zheng Yan really felt that it was unbelievable.

Qin Sheng’s memory had been compressed too much. No wonder he couldn’t believe it.

“If you don’t believe it, you can go to the general manager and take a look.”

Yu Bei sighed. “Some people are born freaks. We can’t compare to them.”

Zheng Yan and the rest were really curious. The three of them went to Hong Yuan’s office together.

Hong Yuan switched the computer interface and showed them the memory.

The bright 1.3 GB was displayed on the computer screen.

It really was!

The truth was right in front of them. No matter how much they questioned it, they had no choice but to believe it.

Hong Yuan said, “This is what Boss came up with. The memory problem has been solved. Our game has basically been completed, which is a few weeks less than the original time.”

Zheng Yan was the first to react. He asked, “General Manager, when are we going to start the game’s internal test? Will we follow the original schedule?”

Hong Yuan thought of Long Yue Technologies. He narrowed his eyes. “There’s no rush. We still have a good show to watch.”

Zheng Yan was very curious. “What good show?”

Hong Yuan glanced at Zheng Yan but did not answer.

Zheng Yan knew that this matter that Hong Yuan mentioned was very important, and it was not convenient for him to tell him, so he did not ask further.

Hong Yuan instructed Su Yixiu, who was standing at the side, “Yixiu, tell the team leaders in the company that the meeting will start at 2:30 pm.”

Su Yixiu agreed. It was not time yet, so Su Yixiu continued to process the documents in his hands.

Su Yixiu was personally arranged by Qin Sheng to enter the company. In addition, Su Yixiu was indeed very talented. He had only been in the company for three days, and he had already started working.

Therefore, Hong Yuan valued Su Yixiu very much and arranged many important jobs for him.

Hong Yuan was not worried that Su Yixiu would threaten his position in the company.

Hong Yuan only wanted to help Qin Sheng handle the company’s affairs. He did not care about his position. After Zheng Yan and the others left the general manager’s office, they returned to Yu Bei’s place.

They coaxed and coaxed. In addition to Yu Bei's conditions, Zheng Yan and the others copied the programming written by Qin Sheng on the computer. Now that the company's game was basically completed and no new game had been developed yet, they had time to study the code.

—

—

At a bar in H City.

Du Kaifeng sat at a table and looked at the door from time to time. He was waiting for someone.

When Liu Cheng came in, he looked around before coming to the opposite side of Du Kaifeng.

Chapter 496 Bribery

Du Kaifeng couldn't wait to ask, "Liu Cheng, why are you looking for me so urgently?"

"Something that you should be very interested in. It's about the game." Liu Cheng deliberately kept him in suspense.

Du Kaifeng was confused. "Something that I'm interested in?"

He couldn't figure it out. "What?"

Liu Cheng smiled. He bent down and moved closer to Du Kaifeng. Du Kaifeng also hurriedly stretched his ear over.

"The programming code to solve the memory problem."

Du Kaifeng was stunned. He had never thought that this would be the case. After that game was developed, it was indeed top-notch in every aspect. The only flaw was that it took up too much memory.

Long Yue Technology had also been pondering over this problem.

After spending a long time, there was still no progress.

And Shengshi Technology had solved it just like that?

Du Kaifeng was very excited. "Then where's the code? Liu Cheng, hurry up and give it to me."

In the past few months, because Long Yue Technology's backer had fallen, Fang Xuelin had blamed him for everything. From time to time, he would target him. Du Kaifeng's days were not easy.

However, after Fang Xuelin had set his eyes on Shengshi Technology's game, he had given him the task of stealing Shengshi Technology's game.

Meanwhile, he looked for quite a few individuals from Shengshi Technology, but none of them agreed to help him.

Only this Liu Cheng agreed.

Du Kaifeng's life would be better because he wanted to steal the game from Shengshi Technology.

With all the information provided by Liu Cheng, the programming code, and the ideas, as well as the hundreds of employees of Long Yue Technology, they were in a hurry and didn't pay much attention to quality, so they completed the game development earlier than Shengshi Technology.

"Manager Du." Liu Cheng picked up the red wine and shook it by his hand. "I can't give this to you for free."

Du Kaifeng finally understood. "How much do you want?"

Liu Cheng stretched out three fingers.

"300,000?" Du Kaifeng felt that this price was acceptable, so he nodded. "Okay, I'll transfer it to you right away."

Liu Cheng smiled and shook his head. He withdrew his hand and said in a mocking tone, "300,000? Manager du, are you trying to send a beggar away?"

"3 million?" Du Kaifeng suddenly stood up from his seat. "3 million? Liu Cheng, don't push your luck!!!".

Liu Cheng leaned back on the sofa. "3 million is just a small amount to your Long Yue Technology. It's not a lot. Moreover, this programming is not worth 3 million?"

Du Kaifeng was so angry that his face turned red.

"Liu Cheng, 3 million. You can say that. The memory programming is worth 3 million, but you're not worth it."

Liu Cheng's expression did not waver at all. "If it's not 3 million, then forget about it."

He held the USB in his hand and sized it up.

Then, he said, "The contents of this USB are extremely important to your Long Yue Technology. If you and Shengshi Technology's game were to be released at the same time, many game players will switch to Shengshi Technology just for the memory alone. You guys don't have any chance of winning. All the hard work Long Yue Technology has put in these past few months will be in vain."

"Manager Du, whether you can make a comeback depends on this game. If you lose to Shengshi Technology, your chairman won't let you off."

Du Kaifeng's thoughts were exposed, but he was still unwilling to let go.

Although this money was from Long Yue Technology, Du Kaifeng wanted to make a large sum of money from it. Liu Cheng asked for 3 million, and the money he got from it was greatly reduced.

Du Kaifeng threatened, "Liu Cheng, I'll give you 1 million at most. Otherwise, I'll expose the fact that you stole Shengshi Technology's information for Long Yue Technology."

Chapter 497 Eat Rice

Liu Cheng was originally sent by Hong Yuan, so he naturally didn't have to worry about Du Kaifeng's threat.

He said mockingly, "As you wish."

Liu Cheng's expression showed that he didn't care much about Hong Yuan's words.

Du Kaifeng choked and couldn't say anything.

Liu Cheng stood up from his seat. "Since Manager Du doesn't want this, I won't force it. I can also strengthen it and find the chairman of Long Yue Technology."

He turned around and was about to leave.

"Wait." Du Kaifeng stopped Liu Cheng.

Liu Cheng stopped and raised his eyebrows. "Manager Du, do you want to give me money?"

"I will." Du Kaifeng said through gritted teeth.

"Isn't that right? Why struggle for so long?"

Liu Cheng and Du Kaifeng went to the bank together, and Du Kaifeng transferred the 3 million yuan to Liu Cheng.

Then, he took the USB back to Long Yue Technology.

Fang Xuelin was reprimanding his subordinates in the office, "It's been ten days, and you've only compressed less than 1 GB of memory. Did the company invite you here for nothing?"

His voice was very loud, obviously angry.

Long Yue Technology did not have a technician like Yu Bei, and its memory could not be compressed as well as Shengshi Technology. After ten days of hard work, the initial memory was still 15 GB.

Fang Xuelin was anxious. 15 GB of memory. Many mobile phones could not afford it.

In this way, the game between his company and Shengshi Technology was a huge gap.

Fang Xuelin saw the potential of this game. In the past few years, there had not been any new blockbuster games in the company, so Fang Xuelin had turned his attention to the games of Hong Yuan's previous company.

The two games that Hong Yuan had developed were good, but they could only be considered above average in the market.

Long Yue Technology was currently in a slight decline, and they urgently needed a blockbuster game.

As such, after hearing about the game that Shengshi Technology was developing, Fang Xuelin decided to focus on that game.

Over the past few months, the entire company had been developing this all-intelligent game. For this, he had even specially hired a few programming experts.

Every day, the amount of money he spent was in the hundreds of thousands.

If he failed, it would be a huge blow to the company.

Fang Xuelin paced back and forth in his office. He was very anxious. "If the game doesn't go on sale soon, Shengshi Technology will beat us to it."

He then looked at the two managers. "In five days, I want your memory to be compressed to 13 GB. Can you do that?"

The two managers looked at each other and did not say a word.

Obviously, it was very difficult to do that.

In ten days, they had only compressed less than 1 GB of memory. In five days, it was almost impossible for them to compress it to 13 GB.

One of the managers said very softly, "Chairman, I'm sorry. We can't do that."

Fang Xuelin was furious. "You can't even do such a simple thing? Aren't you high-tech talents? I spent tens of thousands of a month's salary to hire these people, and they're so useless?"

The two managers lowered their heads, not daring to answer Fang Xuelin's words.

Fang Xuelin pointed at the door and said fiercely, "Scram, all of you scram."

The two managers heaved a sigh of relief and quickly left the office.

Fang Xuelin had a temperamental temper. Now, they had angered him again.

They did not want to stay with Fang Xuelin anymore.

"All of you are idiots. You're just a bunch of freeloaders."

With a clear 'bang' sound, the cup on the table was swept to the ground by Fang Xuelin.

Although the two managers had already walked out of the chairman's office and closed the door, they could still hear the movements coming from the office.

They hastened their steps.

#### Chapter 498 Theft

Du Kaifeng returned. When he saw the two managers' unpleasant expressions, he gloated, "Manager Chen, Manager Li, have you been scolded by the chairman?"

The two managers' expressions were not very good. They said in a deep voice, "Du Kaifeng, it has nothing to do with you."

They knew very well that after Du Kaifeng bankrupted Feiyuan Technology, he jumped to Long Yue Technology.

They looked down on Du Kaifeng, so they naturally wouldn't treat him well.

Du Kaifeng sneered, "Why are you so arrogant? You can't even solve a small memory problem, and you still have the face to look down on me!"

"How can you solve it?" a manager said unwillingly.

Du Kaifeng smiled and said, "Of course I'm not as useless as you guys."

"Who are you lying to?" The other manager also did not believe Du Kaifeng's words.

"Then we'll just wait and see!" Du Kaifeng raised his head high and walked into the chairman's office.

The two managers looked at each other. It was obvious that they could see the other's doubts.

Du Kaifeng really had a solution?

In the office, Fang Xuelin was still angry.

When he heard a knock on the door, he said impatiently, "Come in."

Du Kaifeng pushed the door open and walked in. His movements were very careful. "Chairman."

"What do you want to say?" Fang Xuelin's tone was very unpleasant. Du Kaifeng took out the USB.

"Chairman, this is for you."

Fang Xuelin frowned. "This is?"

Du Kaifeng answered very proudly, "This is the code that Shengshi Technology used to solve the memory problem. I just got it from Liu Cheng."

"Memory compression." Fang Xuelin was very surprised. "Shengshi Technology actually developed how to compress memory?"

"Yes." Du Kaifeng nodded, "I heard from Liu Cheng that Shengshi Technology developed this morning and stole this code. Our games were developed according to Shengshi Technology's ideas. I think this code can also be used in our games."

Fang Xuelin was excited. "Okay, then we'll go take a look immediately."

Thus, the two of them went to the technical department.

A technician inserted a USB drive into the computer. Fang Xuelin and Du Kaifeng stared at the computer screen.

The technician followed the code on the document and entered it into the computer one by one.

For two whole hours, Fang Xuelin and the others stood behind the technician.

After spending some time to check again, the technician confirmed that there were no mistakes. He said, "Chairman, I've already recorded everything."

"Okay, okay, okay." Fang Xuelin was very anxious. "See if you can compress the memory immediately."

"Yes."

The technician pressed the enter key and then switched the computer page to the display of the game's memory.

After waiting for two minutes, the memory did not decrease at all.

Fang Xuelin was drenched in cold sweat. He looked at Du Kaifeng and asked in a deep voice, "What's going on? Didn't you say that the memory could be compressed?"

Du Kaifeng's forehead was covered in cold sweat. "Chairman, I don't know how this happened either. Liu Cheng gave it to me. I thought he wouldn't lie to me. I'm sorry."

"Du Kaifeng, it seems like I've been too good to you." Fang Xuelin's face was gloomy.

"Chairman, I'll go and ask Liu Cheng about the situation now."

Du Kaifeng wiped the cold sweat off his forehead. He was very flustered. Fang Xuelin took the memory very seriously. If anything went wrong, Fang Xuelin wouldn't let him off.

His situation in the company would definitely be very difficult.

If it was serious, Fang Xuelin would chase him out of the company.

He had finally gotten the chance to enter Long Yue Technology with great difficulty. He could not let it go just like that.

Chapter 499 Explosive Game

"Chairman, I will definitely give you a satisfactory answer."

After Du Kaifeng said that, he rushed to the door.

Suddenly, the technician exclaimed, "Chairman, look!"

Fang Xuelin quickly looked over.

Du Kaifeng, who had just arrived at the door, also stopped. Could it be that there was a turning point?

Du Kaifeng did not dare to approach Fang Xuelin. He only stood at the door and watched.

Fang Xuelin had personally witnessed the continuous decline of his memory until it reached 2 GB. Only then did it stop. The technician was also shocked when he saw such a large decline. He was worried that there would be an accident. He said, "Chairman, let me check first to see if this is real."

Fang Xuelin also felt that it was unbelievable, so he nodded.

The technician checked the game inside and out, but he didn't find anything unusual.

He nodded. "Chairman, this memory should be really compressed."

Fang Xuelin was relieved. Since it was real, he didn't have to worry about the memory problem anymore. He could also arrange for the game to be released as soon as possible to seize the market.

This game would definitely become a blockbuster.

Long Yue Technology could make a fortune.

As for Shengshi Technology's game, he would not even give it a chance to be released.

He did not forget that Shengshi Technology had removed the connections that he had painstakingly cultivated for many years.

A sinister look flashed across Fang Xuelin's eyes.

Hearing the technician's words, Du Kaifeng was completely relieved. He returned to Fang Xuelin's side.

"Chairman."

Seeing Du Kaifeng, Fang Xuelin's expression became much better. He nodded. "Mm."

Du Kaifeng heaved a sigh of relief.

The technician had personally seen how the 15 GB of memory had been reduced to 2 GB of memory.

He was also shocked for quite a while.

He sighed. "To be able to compress the memory to this extent, their strength must be very good. This is the first time I've seen this. I'm afraid this person is incredible."

Hearing this, Fang Xuelin's face darkened.

It seemed that Shengshi Technology could not be kept.

First, it was an all-intelligent game, and now it had a memory.

If it was allowed to develop, it would probably bring a lot of hidden dangers to the company. He absolutely would not allow such a situation to happen.

After this game stabilized, he would definitely let Shengshi Technology go bankrupt and close down.

However, what Fang Xuelin didn't expect was that soon, Long Yue Technology would no longer have the energy to deal with Shengshi Technology.

The technician smiled and said, "Chairman, if this game goes on the market, I can already imagine what kind of sensation it will cause. I'm afraid it will become an unprecedented blockbuster."

Fang Xuelin's expression became a little better.

He walked out of the technical department. Suddenly, he stopped and looked back at Du Kaifeng.

Du Kaifeng immediately smiled in a fawning

**manner.**

Fang Xuelin gave Du Kaifeng a rare compliment. "You did well this time. If the game succeeds, your position will be promoted."

Du Kaifeng was very excited. "Thank you, Chairman."

"You can go back to work first."

After Fang Xuelin finished speaking, he went back to his office.

He called his secretary in.

"Chairman, what's the matter?" The secretary's tone was very respectful.

Fang Xulin's expression was very cold. "Contact the major platforms and ask them not to cooperate with Shengshi Technology."

"Alright, I'll make the arrangements right away," the secretary replied. "Shengshi Technology's development prospects are indeed very good. It's their fault for offending you, Chairman. They even made Hong Yuan the general manager. Isn't this a slap in the face to you, Chairman?"

Chapter 500 Single Dogs Don't Understand

The secretary was very good at reading Fang Xuelin's thoughts. "Why don't they take a look at the gaming companies in H City and see who's number one? Chairman, they really don't know what's good for them. It's only right for you to teach them a lesson."

Fang Xuelin was in a very good mood from his secretary's words.

He waved his hand and said, "Go do your work."

After the secretary left, Fang Xuelin wrote the words 'Hong Yuan' on the paper with great force.

He smiled disdainfully.

Shengshi Technology was a gaming company that had just appeared. Even the game they had developed was taken away by him. How could they be worthy of fighting with him?

—

On this side, Qin Sheng returned to Fu Garden.

A handsome man was standing in the living room. He was wearing a flashy red suit.

He was looking around the villa with a pair of amorous eyes.

He touched his chin and shook his head. "Hanchuan, why does your house look so lived in? It's not as cold as before. By the way, what have you experienced in the year I've been away?"

Fu Hanchuan picked up a cup of steaming tea and sipped it carefully. When he heard Lin Haocheng's words, the corner of his lips lifted slightly.

"Wait." Lin Haocheng suddenly frowned. "Why do I feel like there are two people living in this house? Hanchuan, aren't you living alone?"

Fu Hanchuan still did not answer.

Fortunately, Lin Haocheng was already used to his dull personality.

He did not expect Fu Hanchuan to pay attention to him.

He was able to become friends with Fu Hanchuan because he shamelessly wanted to get close to him.

Lin Haocheng met Fu Hanchuan in the capital. Later, when Fu Hanchuan returned to H City, Lin Haicheng would occasionally go to H City to look for Fu Hanchuan.

However, Lin Haocheng had stayed abroad for the past year.

He only came to H City today.

Lin Haocheng was walking in the living room. When his gaze fell on the lady's slippers at the entrance, his eyes widened.

"This, this, this..." Lin Haocheng pointed at the pair of slippers and said incoherently, "Han, Hanchuan, don't tell me you're living with a woman? Do you have a girlfriend now?!"

"Yes." Fu Hanchuan agreed this time.

"Wait, let me digest it properly."

Lin Haocheng supported himself against the wall with one hand. He could not accept the fact that Fu Hanchuan already had a girlfriend.

He did not even have a girlfriend, but Fu Hanchuan, this cold person, had one first.

He thought that he would not be able to get married before the age of 30.

Fu Hanchuan actually had a crush on a woman.

Lin Haocheng was very curious. What kind of woman could catch Fu Hanchuan's eye?

He leaned over and sat beside Fu Hanchuan.

"Hanchuan, how old is your girlfriend? What's her name? Is she beautiful? What's her personality like?"

Lin Haocheng was really curious and asked a few questions in a row.

Fu Hanchuan's eyes were full of affection. "She's very good."

Lin Haocheng touched the goosebumps on his

**arm.**

If it weren't for Fu Hanchuan being unwilling to talk to him like before, he would really think that Fu Hanchuan had been switched.

"Hanchuan, I'm not used to you being like this," Lin Haocheng said under his breath.

Fu Hanchuan glanced at Lin Haocheng and said in disdain, "You're a single dog. You don't understand."

Lin Haocheng: "..."

He had actually been ridiculed by Fu Hanchuan as a single dog one day?!

However, he could not refute it. After all, he was indeed single.

Lin Haocheng: "Fu Hanchuan, it's just that I don't like those women. As long as I hook my little finger, they will come over. Isn't it easy to get a girlfriend?"
