

Bigshot 601

Chapter 601: There Was a Problem

These workers were anxious. The manager of the Technical Department also called Fang Xuelin.

However, Fang Xuelin's phone was turned off.

There was no way to connect.

The technicians could only brace themselves and continue to repair the server.

Meanwhile, Qin Sheng's fingertips were still on the keyboard.

She looked at the computer screen very seriously. Lines of game code were still appearing on the screen.

For Qin Sheng, controlling the server was not enough.

What she wanted to do was to destroy all of Long Yue Technology's servers.

Long Yue Technology wanted Shengshi Technology to go bankrupt, so Qin Sheng naturally would not be lenient.

Moreover, if she showed mercy to Long Yue Technology, Long Yue Technology might cause some trouble in the future.

Fang Xuelin was not a well-behaved person.

Qin Sheng did not want to waste too much time on him.

What she wanted to do was to get it over with once and for all.

The corners of Qin Sheng's lips slowly curled up.

It was about 10 o'clock when Fang Xuelin finally arrived at Long Yue Technology's office.

One could even faintly smell the smell of alcohol on his body.

It was very obvious that Fang Xuelin had gone out for a drink last night.

He was only celebrating with a group of good friends because he was certain that he could defeat Shengshi Technology.

He had just arrived at the office.

The manager of the Technical Department came over without even knocking on the door.

He was panting heavily. It was obvious that he had run all the way here, and he had not rested at all.

"Chairman, Chairman, big, big trouble." The manager of the Technical Department could not even speak clearly.

Fang Xuelin frowned and said impatiently, "What else can happen now? Why are you in such a hurry?"

He took off his suit jacket and casually threw it on the sofa.

He returned to his desk and sat down.

“Tell me, what’s the matter?” Fang Xuelin asked.

The technical manager finally recovered. He quickly answered, “Early this morning, all the servers in our company were affected.”

When Fang Xuelin heard about the servers, he had a very bad feeling.

The technical manager continued speaking very quickly, “The game is experiencing a large-scale problem. Many players have been forced to go offline. They are unable to purchase equipment and their skills are ineffective. No matter how good the internet is, there are still problems with the server. There are also many players who have their game skins reset to zero. Now, they are complaining crazily.”

Fang Xuelin suddenly stood up from his seat. He was no longer calm.

“What’s going on?” he asked.

The technical manager replied, “I’m not sure either. It’s like we’ve run into a ghost. The server seems to have been controlled by someone.”

“Then why are you still standing here? Quickly think of a solution!!” Fang Xuelin was so angry that his chest was heaving up and down.

Even if it was a temporary malfunction, it would be a huge loss to the company.

A gamer’s temper was usually very bad. If such a bug appeared, they would uninstall the game.

After all, there were many games on the market. If they didn’t play one game, they would go to the next one.

In short, they wouldn’t stay in one game and suffer.

The technical manager wiped the cold sweat off his forehead. “Chairman, I’m sorry, we can’t solve it. This game server isn’t under our control at all! This is also the first time we’ve encountered such a situation.”

Fang Xuelin sat on his office chair as if he had lost all his energy.

Could it be that someone really wanted to deal with them? But who had the ability to make all of his servers go out of control?

1

Fang Xuelin’s mind was in a mess.

He could not understand what was going on.

The technical manager suddenly said, “However, we have discovered a very strange phenomenon.”

Chapter 602: Playing Tricks

Fang Xuelin frowned and glanced coldly at the technical manager.

The technical manager quickly told him what had happened. "I found that there are problems with other games, but they are not as serious as Three Realms Competition. The online players of Three Realms Competition are all offline and have no way to log back in!"

"I suspect that someone tampered with our server."

Fang Xuelin punched the office desk.

He gritted his teeth and said, "It must be Shengshi Technology!"

He had not offended anyone recently.

Other than Shengshi Technology, no one else had the ability to tamper with the server.

"How despicable!" Fang Xuelin's tone was resentful.

1

"Then, Chairman, what should we do now?" the technical manager asked.

"You have to clear the fault. You are the talents that I have poached from all over the world. How can you not be comparable to Shengshi Technology?" Fang Xuelin said in a deep voice.

The technical manager wanted to deny it and ask Fang Xuelin to think of another way.

After all, they had spent an hour without any progress.

If they continued, it would only be a waste of time. Time was precious.

However, facing Fang Xuelin's angry and warning eyes, he could only brace himself and say, "Alright, I'll try my best."

The Technical Department manager left the office in a hurry.

Fang Xuelin's hands trembled as he picked up the coffee.

With a bang, the coffee cup fell to the ground again, splashing all over the floor.

Fang Xuelin couldn't care less. He fell onto the office chair, his face pale.

He was very uneasy.

He didn't understand how things had developed to this point.

Everything was clearly under his control.

Why?

Could it be that Shengshi Technology had been enduring all this time and only acted now? Just to put him to death?

1

Thinking of this, Fang Xuelin quickly denied his own thoughts.

He now had the patent certificate in his hand. Just This alone could bring Shengshi Technology to the high court.

Fang Xuelin barely managed to calm himself down.

He picked up his coat and walked quickly to the Technical Department.

The Technical Department was very quiet. There was only the sound of typing on the keyboard.

Fang Xuelin had been watching them the whole time. Half an hour later, he could not help but ask, "Still not working?"

The technical manager wiped the cold sweat off his forehead.

"Chairman, this server seems to have been infected with a virus. The other party used the virus as a method to control our server. We can't find a way to crack it."

"What about the game players?"

"They're still complaining, and many players are threatening to delete the game if we don't fix it quickly."

Fang Xuelin clenched his fists.

He took out his phone and wrote a Weibo post.

[Long Yue Technology: Everyone, calm down. Our server has been attacked, and there's a problem with the game. Our Technical Department is working hard to fix it. In addition, I want to tell some companies that it's better to have a fair competition and play tricks. The company is destined not to last long @Shengshi Technology]

Those irascible gamers saw Long Yue Technology's Weibo post.

They changed their views and expressed their understanding of Long Yue Technology.

Long Yue Technology's game would sometimes crash, but it would be fixed very quickly.

This time, they believed that this abnormality was done by Shengshi Technology.

After all, plagiarism had happened before, and after that, Long Yue Technology's server crashed.

It was hard not to think of Shengshi Technology.

Chapter 603: Went To Look For Long Yue Technology To Scam Money

After transferring their anger onto Shengshi Technology, these gamers ran to Shengshi Technology's Weibo and started cursing wantonly.

[The game can't compete with them, so they went to touch other people's servers. Tsk tsk, how despicable.]

[Trash company, hurry up and close down!]

[Using underhanded methods to suppress your peers, your abilities can only go so far.]

After Qin Sheng finished her breakfast and read the medical book, she turned on her phone.

She browsed through Shengshi Technology's official Weibo.

Seeing the comments below, Qin Sheng smiled indifferently.

She logged into Shengshi Technology's official Weibo. This was the account and password Hong Yuan had told her.

Her fingertips tapped lightly on the phone screen, and she edited a Weibo post.

[Shengshi Corporation: It's time to close the net @Long Yue Technology]

It was a very cold and aloof sentence, but it showed Qin Sheng's attitude.

She had completely made a move on Long Yue Technology.

After it was posted, many people cursed under Weibo, saying that Shengshi Technology was rampant.

Qin Sheng logged out of Weibo.

Originally, she wanted to further destroy Long Yue Technology's server at this time.

But... she didn't mind waiting a little longer.

Kill with a single strike.

She could let Long Yue Technology toss around for a while. After they had some clues, it wouldn't be too late for her to make a move.

Long Yue Technology's Technical Department.

Another hour had passed, but there was still no progress.

The Technical Department manager was so anxious that his forehead was covered in sweat.

Fang Xuelin's brows were tightly knitted.

He took out his phone. He had followed Shengshi Technology's Weibo.

He glanced at Qin Sheng's words, 'pull in the net'.

Fang Xuelin tightened his grip.

He gritted his teeth and said word by word, "Sheng! Shi! Technology!"

"Chairman, we really can't solve this. If this goes on, we're just wasting our time." The technical manager lowered his head.

He was already prepared for Fang Xuelin to get angry.

However, Fang Xuelin only ordered in a deep voice, "Find a skilled person to come over. Once it's solved, I'll give them 10 million."

"Yes."

The technical manager was usually on Black Emperor. He knew that the Black Emperor talents were gathered, so he posted the post on the forum.

10 million was not a small amount. Many people wanted to go over and try.

Yu Bei saw the post, and because Qin Sheng had temporarily pulled him out of the blacklist, he used his cell phone to call Qin Sheng.

He said smugly, "Boss, it looks Long Yue Technology has no way to solve it. They actually offered a reward of 10 million yuan to let the hackers help them. Hahaha, do they think it's so easy to solve?"

Qin Sheng had planted the virus herself.

Unless she did it herself, no one else could solve it.

"10 million?" Qin Sheng was very interested in this amount. She liked money. She naturally would not let go of such an easy sum of money.

Her fingertips tapped lightly on the table.

Her red lips opened slightly. "Yu Bei, you should also accept this mission."

Yu Bei was stunned. He did not understand what Qin Sheng meant. "Boss, what are you doing?"

Qin Sheng curled her lips. "I'm helping Long Yue Technology solve the server problem. You only need one person. As for the operation, I'll handle it. If it succeeds, you can take 5 million. In addition, you can go over later and bargain with them. Raise the price by a notch. 15 million."

Yu Bei finally understood. Qin Sheng was trying to trick them again.

She wanted to profit from Long Yue Technology.

Yu Bei was excited. He promised, "I promise to complete the mission!"

Chapter 604: 15 Million

By 2 o'clock in the afternoon, there were already quite a few hackers who had arrived at Long Yue Technology, but there was still no progress at all.

Fang Xuelin was very anxious.

If this continued to drag on, many players would give up on Long Yue Technology's game.

As a result, there were already quite a number of players who had gone to download the three realms of heroes.

The technical manager walked in with a man. This man was Yu Bei. He was wearing a black mask.

"Chairman, he said that he can help us solve the problem with the server," the technical manager said respectfully.

Fang Xuelin did not have much hope in this matter.

After all, there were quite a few people who had come, but they could not do anything about it.

He waved his hand impatiently. "Go ahead. Once it's settled, you won't be short of money."

"Chairman Fang, my fee isn't low. If you want me to help you settle it, it's worth more than 10million," Yu Bei said with a smile.

Fang Xuelin frowned. "10 million isn't enough?"

Only then did he begin to seriously size up the man in front of him. He felt that he looked very familiar, as if he had seen him somewhere before.

This thought only flashed through his mind.

If he had seen him before, it was impossible for him not to recognize him.

Yu Bei said straightforwardly, "I want 15 million."

"You're asking for too much!"

Fang Xuelin was no longer calm. 10 million was already as uncomfortable as digging up meat, not to mention 15 million.

"Whether it's worth it or not, Chairman Fang, you know very well in your heart. If you can't even bear to part with this bit of money, I won't force you. It's just that next time, if you want to go back on your word, I won't come over," Yu Bei said with a smile.

The technical manager advised in a low voice, "Chairman, we can give it a try. As you can see, those people just now didn't have any solutions. If he really can solve it, it would be a huge loss for us if we miss it."

"Moreover, Chairman, if it's not solved properly, it wouldn't be a huge loss for us, would it?"

Fang Xuelin weighed the pros and cons in his heart.

He finally let go. "Then I'll give you a chance. If it's resolved properly, I'll give you 15 million."

Yu Bei stretched lazily. "Chairman Fang, can't you just be straightforward earlier?"

The technical manager brought Yu Bei to the computer.

After introducing him, he said, "Sir, you can start now."

Yu Bei glanced at Fang Xuelin and the technical manager. "Both of you, get out. I don't like people watching me while I'm working."

"Chairman, this?" The technical manager hesitated.

Fang Xuelin frowned. "Get out."

He was worried that Yu Bei would do something, so Fang Xuelin went to check the surveillance footage.

Yu Bei first took out his phone. After looking at it for a while, he started working.

There was nothing out of the ordinary.

Qin Sheng received a message from Yu Bei. Half an hour later, she removed her control over Long Yue Technology's server.

During this half an hour...

Yu Bei pretended to type on the computer keyboard and occasionally clicked the mouse. However, on the computer screen, there were only very messy words and numbers.

Yu Bei was unrestrained. The surveillance cameras on both sides could not see what he wrote.

After he saw Qin Sheng deactivate the control, he walked out of the Technical Department.

When Fang Xuelin saw that he had come out early, he thought that he could not solve it.

He questioned, "Didn't you swear that you would be able to handle it?"

"Yes, I've solved it. If you don't believe me, you can go over and take a look." Yu Bei held his phone and spoke nonchalantly.

The manager of the Technical Department came in front of the computer.

He operated the computer.

Chapter 605: Sued Shengshi Technology

Three minutes later, his furrowed brows relaxed.

"Chairman, it has indeed been resolved," the technical manager said respectfully.

Fang Xuelin heaved a sigh of relief. "Alright, give him 10 million yuan."

Yu Bei's gaze was sharp. "Chairman Fang, you said 15 million yuan. Is that fake?"

Fang Xuelin looked troubled. "Recently, the company has been nervous. 15 million yuan. There's really no way to take it out."

Yu Bei smiled. "Since I have the ability to solve it for you, I can also restore it to its original state. Chairman Fang, you can choose for yourself."

Fang Xuelin's expression froze. He did not expect it to be like this.

The technical manager was very nervous. He advised in a low voice, "Chairman, the other party is very strong. We can't provoke him."

No matter how much Fang Xuelin felt pained, he could only reluctantly agree. "Okay, 15 million."

Yu Bei took out his bank card. "Transfer it to this bank card. I want to see it within half an hour."

After Long Yue Technology had memorized the bank card number, Yu Bei left Long Yue Technology.

Long Yue Technology's speed was very fast. Ten minutes later, Yu Bei received a payment.

Yu Bei then transferred 10 million yuan to Qin Sheng with a pained expression.

He regretted that he did not ask for more money back then.

Qin Sheng only stayed at home and removed her control over the server. The main point was that this was originally created by Qin Sheng. It would only take her a minute to remove it.

In just a minute, she had already earned 10 million yuan.

Yu Bei felt very uncomfortable in his heart.

He had been so busy but he only had 5 million yuan.

Yu Bei grumbled. Of course, he did not dare to bargain with Qin Sheng anymore.

Long Yue Technology's game had already returned to normal.

However, Three Realms Competition had already lost over 100,000 users. These users were all transferred to Three Realms.

When Fang Xuelin received this news, he slapped the table and gritted his teeth. "I'm not waiting anymore. Since Shengshi Technology dares to do this, don't blame me."

Du Kaifeng was delighted. "Chairman, are you preparing to make a move on Shengshi Technology?"

A flash of scheming appeared in Du Kaifeng's eyes.

Actually, he had long wanted Shengshi Technology to go bankrupt. Hong Yuan had become the general manager of Shengshi Technology, and Du Kaifeng was very concerned about this.

Fang Xuelin's gaze was heavy.

He ignored Du Kaifeng and picked up his phone.

He instructed his secretary, "Sue Shengshi Technology immediately. Tell them that Three Realms plagiarized the Three Realms Competition and used all-intelligent technology without permission."

Du Kaifeng listened from the side with a hint of disdain on his lips.

'Hong Yuan, oh Hong Yuan, so what if you become the general manager? You still won't be able to turn things around!'

—

Fu Garden.

Qin Sheng received a call from Hong Yuan.

Hong Yuan reported the progress over here. "Boss, I've received a court summons. It seems that Long Yue Technology is suing us for plagiarism and infringement."

"Okay, I got it."

Qin Sheng answered the phone while turning on her computer.

Apart from this, Hong Yuan had nothing else to do. He was worried that he would be blacklisted by Qin Sheng, so he didn't pester Qin Sheng anymore.

He hung up the phone.

Qin Sheng opened a document. On the document were lines of densely packed code that she had written in the morning.

Qin Sheng lazily leaned against the office chair and looked at the code with cold eyes.

After drinking a cup of tea.

She sat up straight.

She copied and pasted the code. Then, she smiled and pressed the enter key.

Chapter 606: Had Completely Collapsed!

At the same time!

Long Yue Technology's servers had all collapsed, unable to operate!!!

The players in the game were all forced to go offline!

The players were all in an uproar, each and every one of them frantically giving Long Yue Technology feedback.

The first time was fine, they could tolerate it.

But this was already the second time!

Those players were unhappy, and they did not care that Long Yue Technology had been schemed against by Shengshi Technology.

They all ran to Long Yue Technology and cursed.

[Even if Shengshi Technology was the one who set you up, we can understand why you were not prepared the first time. However, this is already the second time. You were not prepared at all before this happened. Aren't you an established gaming company? Can't you even solve such a small problem?]

[F*ck, I really want to bankrupt this trash company. They can't even deal with a small company.]

[Looks like Long Yue Technology's technology isn't good enough. I'm very suspicious. Is it really Long Yue Technology that Shengshi Technology copied? I actually feel that Shengshi Technology is very capable now.]

Even though Fang Xuelin had hinted before that it was ShengshiTechnology's doing, this also made those game players very suspicious. Long Yue Technology couldn't compare to Shengshi Technology?

The second time, they were on guard. No matter what, it was impossible for Shengshi Technology to succeed.

The only explanation was that Shengshi Technology was so powerful that Long Yue Technology could not stop them at all.

The technical manager could not even put his finger on it.

They had indeed urgently modified the firewall, but it was impossible to guard against. He did not know why the server would crash.

This time, it was much more serious than the day before.

All the servers had been shut down!

He had no idea how to solve it now.

The technical manager ordered the staff, "Quickly think of a way to solve it."

He ran to the chairman's office again and told the server the situation.

"What? It crashed again!?"

Fang Xuelin, who was drinking his coffee, spat out a mouthful.

He couldn't believe it. "Wasn't it solved already?"

The technical manager replied, "This is another server crash. It's far more serious than the previous one. Now, all the server systems have been damaged and shut down. I can't fix it."

Fang Xuelin paced back and forth in the office.

He thought of something and stopped. "Where's the man who came this afternoon? Find him to resolve it."

The technical manager lowered his head. "I did, but the phone number he left behind was fake. There are two possibilities. One is that he was sent by Shengshi Technology. The second possibility is that he simply doesn't want anyone to find him."

The technical manager continued to analyze, "If the first possibility is true, then our company's server crash this time was caused by him."

After saying that, the technical manager didn't dare to say anything.

After all, he was the one who found that person.

Back then, he was also in a hurry to deal with the server, but he forgot that someone could do something to it.

Fang Xuelin stared at the technical manager gloomily.

However, now was not the time to deal with him. At least, he had to wait until this matter was resolved.

"What solution do you have?" Fang Xuelin asked.

The Technical Department manager replied, "The only solution I can think of is to replace all the servers."

When Fang Xuelin heard this, his face completely darkened.

Replacing the servers was not a small amount of money. It would cost several hundred million.

Moreover, it would take a long time.

Replacing the servers and reinstalling the game system would take more than two weeks.

Chapter 607: States That the Compensation Is High

If the game doesn't operate for two weeks, it was basically useless.

Those game players didn't have the patience to wait for you for a month. They would turn around and play other games.

Almost all of Long Yue Technology's games had substitutes.

Even Three Realms Competition has a similar game, Three Realms. Moreover, the game experience of Three Realms was far better than Three Realms Competition.

Long Yue Technology had no way to keep those players.

This was undoubtedly a devastating blow to Long Yue Technology.

It was likely that Long Yue Technology would have a hard time standing up again after this.

Moreover, Long Yue Technology had invested a lot of time and money in Three Realms Competition.

Fang Xuelin was so angry that he spat out a mouthful of blood and fainted on the ground.

"Chairman!"

Fang Xuelin entered the hospital.

Long Yue Technology was still looking for a solution.

One day, two days, three days had passed.

There was still no response from Long Yue Technology's server.

They had looked for quite a few experts and all of them said that there was no solution because it was irreversible after being attacked by a virus.

Fang Xuelin lay on the hospital bed. His hair had turned white for the past few days.

His wife was taking care of him.

The secretary walked in and reported the situation of the company to Fang Xuelin.

"Chairman, all the games under our company have been suspended. The number of users uninstalling the games has reached 40%. For the past three days, our company's revenue has been zero."

Fang Xuelin leaned against the head of the hospital bed and asked, "How much money is left in the account?"

"Less than 200 million."

Fang Xuelin's face was extremely pale, without a trace of blood.

He asked again, "What about Shengshi Technology?"

“Shengshi Technology.” The secretary’s brows were tightly knitted. “They didn’t do much, but the number of users of Three Realms is increasing. The number of downloads on the self-created platform has already reached 8 million.”

Hearing this, Fang Xuelin’s face turned ashen.

His wife hurriedly patted his back.

She analyzed, “Hubby, have you ever thought that the more people download, the more they will be able to plagiarize and use your patent without permission? Won’t the compensation be even greater?”

Fang Xuelin’s wife’s eyes flashed. “Moreover, no matter how many people download, won’t the final result be to take it down? We’re just letting them be arrogant for a while.”

Fang Xuelin’s brows relaxed.

He also felt that his wife’s words were very reasonable.

He finally revealed a smile on his face, smiling very smugly. “That’s right. Shengshi Technology won’t be able to escape this plagiarism matter. After all, the patent rights are mine. Moreover, Three Realms Competition was released a few days earlier than Three Realms.”

He looked at his secretary. “Hurry up and contact the lawyer. You must win the lawsuit in court.”

“Yes.” The secretary left.

After the past three days, Fang Xuelin’s heart was finally at ease.

After Three Realms shut down, Three Realms Competition would be a unique all-intelligent game in the world.

Even if it was re-released in a month, Three Realms Competition would still become a blockbuster.

With the support of Three Realms Competition, it would be difficult for Long Yue Technology to go bankrupt. In the future, it would develop better and better.

Fang Xuelin was very confident.

—

At that time, because of Fang Xuelin’s orders, all the major application download platforms did not dare to let Three Realms appear on their platforms.

They were afraid of offending Fang Xuelin.

Hong Yuan had contacted several platforms before, but they all rejected him.

He could only follow Qin Sheng’s suggestion and release the game on the self-created platform.

The number of downloads on the self-created platform caught the attention of these platforms.

Chapter 608: Was Envious of the Platform They Had Created

They were all considering whether or not they should let Three Realms publish on their platform.

After all, in less than a month, 8 million paid games had already downloaded on the self-created platform. Each download cost 5 yuan, and the total amount added up to 40 million.

Even if Shengshi Technology split the money, they could still get 20 million.

If Three Realms appeared on their platform, wouldn't the download volume be even more terrifying because it was free?

The profits they would make from it would also be very high.

These platforms were coveting the profits from the self-created platforms, and they also wanted a share of the profits from the self-created platforms.

Many platform companies held meetings one after another.

Some higher-ups suggested... "Why don't we let Three Realms release on our gaming platform as well? This is currently the hottest mobile game. Moreover, all-intelligent games are relatively new. Three Realms will probably become a blockbuster. This popularity shouldn't drop in the short term."

"If our platform is released, we will definitely make a lot of money from it."

As soon as he finished speaking, a higher-up stood up and objected.

"This is impossible. Long Yue Technology has warned us not to let Shengshi Technology's games enter our platform. If we do this, we will definitely offend Long Yue Technology. If Long Yue Technology's games are not released on our platform, that would be a huge loss."

That higher-up frowned. "The problem is that all of Long Yue Technology's games can't be run right now and can't be repaired in a short period of time. If they are repaired in the future, Long Yue Technology will probably be unable to recover. We don't have to worry about Long Yue Technology either."

"Hehe." Another high-ranking official sneered.

He continued, "No matter how bad Long Yue Technology is, it's still a well-established gaming company. It has released explosive titles before. Although it hasn't been satisfactory in the past few years, those games were all above average. The number of downloads isn't small. I believe that this difficulty isn't a problem for Long Yue Technology."

They were arguing until their faces were red.

They were almost quarreling.

"It's still not a problem? It's obvious that Long Yue Technology's server has a problem. This isn't something that can be solved in a short period of time. When the game is restarted, the game's customers have already been lost. What's the use of that? Can they be stubborn again?"

"My confidence lies in fighting for supremacy in Three Realms. You've seen the potential of this game. It's bound to explode!"

The higher-ups immediately retorted, "After playing Three Realms, who would still want to play Three Realms Competition?"

This higher-up was also a player of Three Realms. Even someone as calm as him was completely attracted by Three Realms.

One could imagine how attractive this game was to players.

Another higher-up laughed disdainfully, "Three Realms Competition that the Three Realms plagiarized will definitely be taken down in the future."

The executive who was defending Three Realms still wanted to retort.

However, he was stopped by the chairman.

"Alright, stop arguing. Let's take a look now and see where the wind blows. We'll decide in the future."

"But Chairman, if we don't contact Shengshi Technology as soon as possible, when other companies discover the value of Three Realms in the future, if we want Three Realms to enter our platform, Shengshi Technology will inevitably raise the price."

The chairman of the company was impatient. "Alright, that's it for today. Meeting adjourned."

The higher-ups could only shut their mouths.

Chapter 609: Long Yue Technology Plagiarism!

The water army that Fang Xuelin hired was still active on Weibo.

They were saying that Shengshi Technology plagiarized Long Yue Technology and that Shengshi Technology had used underhanded means to destroy Long Yue Technology's server.

Qin Sheng glanced at Weibo and the corners of her lips curled up.

It was time to destroy Long Yue Technology in one fell swoop.

She did not have much time to waste on Long Yue Technology.

She picked up her phone and released Hong Yuan from the blacklist, then dialed his phone.

Hong Yuan set a special ringtone for Qin Sheng.

When he heard the ringtone of his phone, he thought he heard wrong. His phone number was still lying in Qin Sheng's blacklist, and it had been more than a month since it had been released.

How could Qin Sheng call him?

Hong Yuan did not pick up the call immediately. His phone was still ringing.

After flipping through the last page of the document, Hong Yuan finally picked up his phone.

On the caller ID, there was one very conspicuous word: Boss!

Hong Yuan's casual gaze paused. He was very surprised. It was really a call from Qin Sheng. Could it be that it was raining red today?

Hong Yuan quickly picked up the call.

“Boss.”

Qin Sheng’s fingertips tapped lightly on the table. “Uncle Hong, you can expose the evidence of Long Yue Technology stealing our game, as well as our patent certificate.”

When Hong Yuan heard that, he was excited. “Alright, I’ll go over and arrange it right away.”

“I gave you a proposal three weeks ago. Follow the steps above,” Qin Sheng instructed.

Hong Yuan agreed.

Seeing that Qin Sheng was about to hang up the phone, Hong Yuan hurriedly said, “Boss, don’t blacklist my phone first.”

“En?” Qin Sheng frowned.

Hong Yuan explained, “If I don’t blacklist it, I won’t have to ask Yixiu for my phone every day. It’s also convenient to contact you.”

Qin Sheng heard that Hong Yuan said it was convenient to contact her, the first thing she thought of was the documents that Hong Yuan handled for her every time she went to the company...

Her fair and slender fingers pressed on the space between her eyebrows, giving her a headache.

Qin Sheng was silent for a moment. “Uncle Hong, it’s better if you continue to stay there. It’s also convenient to use Yixiu’s phone to contact me. If he’s not around, you can also use the phone number of the employees in the company to contact me.”

Hong Yuan: “...”

The veins on his forehead were throbbing.

He should not have had any hope for Qin Sheng. Qin Sheng had always not treated him well, and she would throw him away after using him.

It was the same every time. Whenever she had something to ask of him, she would pull him out of the blacklist.

After that, she would continue to put him back in.

Hong Yuan was extremely resentful.

Qin Sheng could pull him into the blacklist, but he did not dare to.

He sighed.

Hong Yuan flipped through the proposal Qin Sheng had given him. Qin Sheng had sent the proposal to him via email, but Hong Yuan had printed out the paper version of the document.

—

At 4 o’clock that afternoon.

Shengshi Technology's official Weibo showed evidence that Long Yue Technology's department manager, Du Kaifeng, had bribed Liu Cheng.

There was a recording of their conversation.

There was also a contract signed by Du Kaifeng and Liu Cheng.

Liu Cheng was even sending Du Kaifeng a USB flash drive containing the program code of the compressed memory.

[Shengshi Technology: Long Yue Technology calls out for the thief to catch the thief, bribing our company's employees, and stealing the information of the game we developed, Three Realms. Unfortunately, the technology isn't good enough. No matter how much you steal, it can't compare to our Shengshi Technology. Is this what you're talking about? You're a veteran gaming company, the Long Yue Technology that Shengshi Technology copied? @Long Yue Technology]

Because for the past month, the issue between Long Yue Technology and Shengshi Technology had been in the air.

Plus, it was an all-intelligent game dispute between them.

So both sides had a lot of Weibo fans.

Chapter 610: Reversal!

The moment this Weibo post appeared, it exploded and quickly went on Weibo's hot searches.

[F*ck, f*ck, f*ck, f*ck! What did I see? Is this Shengshi Technology that Long Yue copied? I can't believe this evidence no matter how much I don't believe it. This won't do. I need to eat a popsicle to slow down.]

[I knew it. The quality of the images, sound quality, and other aspects of Three Realms Competition for supremacy can't be compared to Three Realms. How could it be plagiarism?]

[My face is swollen. It hurts. Sob, sob, sob. I won't take sides anymore. I'll focus on being a bystander.]

[The result is completely unexpected!]

[...]

This evidence was enough to prove that Long Yue Technology was plagiarizing Shengshi Technology.

Even if those gamers wanted to defend Long Yue Technology, they couldn't say that Long Yue Technology wasn't plagiarizing.

Moreover, the Weibo posts that Long Yue Technology posted were all pointing to the Three Realms Competition being plagiarized by Shengshi Technology.

Who knew that it was a thief calling out to catch a thief.

It was extremely disgusting.

This turn of events caught them off guard.

Those who protected Long Yue Technology were all speechless.

The gamers who had always supported Shengshi Technology were finally able to hold their heads high.

They left comments on Weibo one after another.

[Hahaha, I knew it was impossible for Shengshi Technology to plagiarize. As expected, it's just as I expected.]

[Just like that, how can a knockoff be compared to a genuine one?]

[This face slap is really loud. I'm very curious about the expressions of Long Yue Technology and the others.]

[No wonder Shengshi Technology hasn't made any movements these few days. It turns out that their ultimate move is hidden here. This face slap reversal is really satisfying!]

[...]

Nowadays, very few people were siding with Long Yue Technology. Those comments were clearly one-sided. They were apologizing to Shengshi Technology in all sorts of ways, or they were rejoicing that they had stood on Shengshi Technology's side from the very beginning.

When the head of the water army saw this scene, he was also stunned.

He hurriedly called Fang Xuelin.

The doctor had just finished examining Fang Xuelin's body.

He reminded him, "You can be discharged from the hospital now. However, you have to be careful in the future. Don't have too big of an emotional fluctuation. I'll prescribe some medicine for you. You just have to stay at home for a period of time."

The doctor did not stay for long before he left.

His cell phone rang.

The person who called was the head of the water army.

Fang Xuelin frowned, thinking that he was here to ask for money.

He said impatiently, "If you don't have enough money, go look for my secretary and ask him to transfer the money to you."

"No."

The head of the water army denied it. "I'm here because of Weibo. Chairman Fang, you should first go into Shengshi Technology's Weibo and take a look."

The head of the water army was afraid that Fang Xuelin would vent his anger.

After saying that, he hung up the phone.

Fang Xuelin had a very bad premonition.

He logged into Weibo.

The first thing he saw was the Weibo post from Shengshi Technology. It was at the top.

His heart skipped a beat.

Fang Xuelin widened his eyes in disbelief. After reading the content, his hands were shaking.

Du Kaifeng had actually left behind evidence to bribe Liu Cheng!!

Didn't Du Kaifeng say it was foolproof?

Fang Xuelin no longer had the courage to look at the contents of this Weibo post.

The secretary also called Fang Xuelin to report this matter.

Fang Xuelin roared into the phone, "Go find Du Kaifeng immediately!! Tell him to come find me."

Du Kaifeng had been paying attention to Shengshi Technology.

He naturally knew about Shengshi Technology's Weibo post.
