

Bodyguard 3661

Chapter 3661 Newcomer's Trial

Hearing this, Shangguan LAN 'er agreed and immediately nodded,""Although what you two said is unreliable, I won't blame you for helping me find little white!"

"Thank you for your forgiveness, young miss!" Meng jueguang and the other hurriedly nodded in agreement.

"Alright, you two can go back. I'm leaving." Shangguan LAN 'er immediately carried the little Curly Bear and hurried away. The Shangguan family's family rules were very strict. It was already dark now, and if she stayed outside for too long and was found out by her family, she would be punished again.

Meng jueguang and Shangguan LAN 'er watched her walk away, then looked at each other and fell to the ground like deflated balls. The scene just now had really frightened them!

If it wasn't for Meng jueguang's quick reaction just now to cover up the matter, and Shangguan LAN 'er being so easy to fool, the two of them might have been dug up today, and they would really die without even knowing how they died!

"Ninth cousin, that Curly Bear was already half dead from my kick, how come it's still alive and kicking in Lin Yi's cave?" Meng Tong asked, still in fear and confusion.

"I'm wondering too-could that Lin Yi be able to heal it? This doesn't make sense. Even if he had the best healing medicine, it shouldn't be effective on this kind of spirit beast. " Meng jueguang was equally confused.

"Maybe this Curly Bear has a special Constitution and has the ability to heal itself?" Meng Tong said, patting his head.

"That's possible. After all, spirit beasts like curly bears are very rare. We don't know what kind of innate abilities they have." Meng jueguang nodded thoughtfully.

Compared to something as ridiculous as Lin Yi healing spirit beasts, the curly bear's natural ability to heal itself was much more reliable. After all, normal people wouldn't expect Lin Yi's practicing to be so special that he could use pure energy to heal people, even spirit beasts.

Meng jueguang sighed with regret. "Lin Yi's really lucky this time-if the curly Bear died in his cave, he'd have no way of explaining himself, and miss Shangguang would kill him for sure! What a pity, it failed at the last step!"

"Even if he escapes this time, with our ninth older cousin's scheme, isn't it a piece of cake to kill him!"

Meng Tong flattered him with a flattering smile and then said, "Tomorrow is the 25th-it's the newbie test. I don't know anything, and I'm not confident-I'm just worried that I'll lose to that Lin Yi kid by accident. That'd be embarrassing for you, ninth cousin, so you have to give me some advice in advance!"

On the 25th of the first month, all the newcomers would participate in the newcomer's trial. This was to make it before the first newcomer ranking competition so that the newcomers with potential could find an opportunity to break through in actual combat and enter the foundation establishment level as soon as possible. From there, they would stand out and become the key training targets of the three pavilions in the future.

However, even though everyone knew that the newbie trial would begin tomorrow, they had no idea what the trial was, what rules there were, or what loopholes they could exploit. Everyone only knew that everything would be announced before the trial started the next morning.

Meng jueguang chuckled. "You're quite impatient, kid. Don't worry, although it wasn't announced in advance, the content of the newcomer trial is almost the same every time. I've already prepared a cheating device for you to ensure that you'll surpass everyone else. When the time comes, it'll definitely be a matter of minutes for you to get first place."

"A cheating device? Ninth cousin brother, you're like my second parent!" Meng Tong's eyes immediately lit up.

"Hmph, you can't do other things well, but you're pretty good at flattering!" Meng jueguang snorted, but he could not hide the smugness between his brows. He paused for a moment before saying, "Also, get the other newbies here before the test tomorrow-I have something to tell them. This is a great chance to mess with people, how can we let Lin Yi and the others go!"

"Alright!" Meng Tong nodded. Working together against Lin Yi was something he was happy to see.

The next morning, under the organization of their respective senior managers, the new disciples of the three pavilions gathered in the main hall of the welcome Pavilion. However, they did not announce the trial rules here. Instead, under the leadership of the pavilion master, Hu Yun Feng, all the new disciples headed to the trial ground in the back mountain.

The so-called back mountain was not the back mountain of the welcoming new pavilion, but the back mountain of the entire three pavilions. In front of the vast primeval forest that spanned tens of thousands of mu, the welcoming new pavilion, which occupied less than a hundred mu of land, seemed insignificant and not worth mentioning.

In the eyes of all the cultivators on the North Island, the back mountain was synonymous with natural treasures. If all the natural treasures on the North Island were divided into ten portions, the back mountain would occupy eight of them. Therefore, even though they knew that there were dangers lurking everywhere, cultivators still rushed to the back mountain like a flock of ducks. However, the back mountain was not a place that just anyone could enter.

The three pavilions had clearly stated that the back mountain was a forbidden area on the North Island. Without the permission of the elders, no one was allowed to take a single step into the back mountain. Those who disobey will be killed without mercy.

Out of respect for the newcomers, the elders' Association allowed the welcome new pavilion to place the newcomer trial in the back mountain. Of course, this access was also limited. The newcomers could only move around in the outer area of the back mountain. As for the inner area or the more central area of the back mountain, they could not enter.

There was no need to worry about anyone taking advantage of this loophole because no newcomer could take advantage of it.

The top powerhouses of the three pavilions had set up layers of restrictions in the back mountain. There was one layer in the outer area, another in the inner area, and several more layers in the central area. However, the newcomer's trial had only opened up the outer restrictions. It was impossible to break through the layers of restrictions inside.

In fact, even if a one-in-a-million miracle happened and someone could break through the inner barrier, they didn't need to pay too much attention to it, because not only would the elder in charge of the back mountain guard notice it at the first moment, but there would be no loss even if they let it go.

It was true that the deeper one went into the back mountain, the more opportunities one would have to come into contact with rare natural treasures. However, one should not forget that the benefits were always proportional to the risks. If one didn't have enough strength, even if someone slipped in through a loophole, they would only end up as food for those powerful spirit beasts. There was naturally no loss to the back mountain.

Under the pavilion master Hu Yunfeng's lead, the senior brothers in charge of the three pavilions brought the new disciples to the rear Mountain Hall.

The back of the mountain was covered by a restriction. Unless one relied on unparalleled strength to destroy it, under normal circumstances, one could only enter and exit from a fixed path. And the throat that controlled the path was the back mountain Hall.

Chapter 3662 Generous Reward

Although there was a group of people in the back mountain Hall who were responsible for maintaining the restriction and order of the back mountain, strictly speaking, there was still a difference between the back mountain Hall and the welcoming new pavilion. The biggest difference was that there were at least three elder-level experts guarding the back mountain Hall at all times.

This meant that if someone tried to invade the back mountain, not only would they have to face the layers of restrictions, but they would also have to be on guard against the siege of more than three elder-level experts. This was no small matter.

This was related to the foundation and heritage of the entire three pavilions. The back mountain could not be lost, so it was reasonable to have such a powerful lineup.

Under the watchful eyes of the guards, Hu Yun Feng brought all the newcomers to the square in the back mountain Palace, waiting for the elder to speak.

Since the trial was held at the back of the mountain, the newcomer's trial was no longer a matter for the welcoming new pavilion. It also required the participation and coordination of the back mountain Palace. Compared to Hu Yun Feng, who was the head of the welcoming new pavilion, it was obvious that the garrison elder of the back mountain Palace had more authority. His words naturally carried more weight.

The group of rookies held their breaths as they looked at the three Garrison elders sitting on the three open-air chairs in front of them with reverence.

This time was different from the previous public guidance day. Although Xu Yuanzheng and the others were also elders, their presence in the welcome Pavilion was basically equivalent to going down to the bottom level. Therefore, they deliberately suppressed their auras in front of the newcomers. The newcomers would only think that they were of high status and authority, but not necessarily that they were terrifying.

However, the rookies were facing three elder-level experts who were ready for battle at any time. They did not suppress their auras at all.

Under the pressure of the three, the rookies were all Sky Class late phase peak, but even breathing was difficult. Their knees started to shake, and the weaker ones even knelt down in front of everyone.

In this one month of cultivation, those who did not have the strength of Sky Class full completion at the beginning had all broken through to the full completion realm because of the cave and the spiritual Jade!

This was the difference between a sky-class Island and the secular world of cultivation-spirit Jade and a cave-these were all top-grade cultivation resources!

These three people were so strong! Lin Yi was an early Foundation Stage practitioner-he wasn't as scared as the other newbies, but he was under a lot of pressure.

He'd been on Sky Class Island for almost a month, and this was the first time he'd seen such a strong master who didn't even try to hide it-this was a terrifying existence that was way above him!

From the bottom of his heart, Lin Yi finally felt the excitement he hadn't felt in a long time, followed by the desire to become stronger!

An early-stage Foundation was enough to sweep through the world of ordinary practitioners, and this made Lin Yi quite pleased with himself. Even after coming to Sky Class Island, he still felt that everything was under his control, as he was in the welcoming Pavilion, which was a relatively mild environment.

But now, Lin Yi knew that he was wrong, very wrong! On Sky Class Island, the Foundation Stage was just the beginning, the same as the Golden class Masters in the world of practitioners. If you couldn't get stronger quickly, you wouldn't be able to control your own fate-you'd become an ant that could be crushed at any time!

"The newcomers these days are getting weaker and weaker." The bald elder sitting in the middle of the three open-air chairs glanced at the frightened newcomers. Although his voice was not loud, every word struck the depths of everyone's minds like a heavy hammer, making them tremble unconsciously.

After a pause, the bald elder began to announce the rules of the trial.

The rules were very simple. The rookies would be randomly placed in the outer area of the back mountain, and the most important trial mission was to find medicinal herbs. The specially made basket at the back mountain Hall would give points based on the value of the medicinal herbs. The final trial results would be ranked from the highest to the lowest points, and special rewards would be given according to the ranking.

The rules reminded Lin Yi of the Ice Palace test back in the common world-the two were pretty similar, in fact. Of course, even though the rules were somewhat similar, the environment and competitors were all very different from before, so it was still not to be underestimated.

However, there was one thing in the rules that surprised all of the new disciples. This trial was not a joint competition between all the new disciples of the welcoming Pavilion. Instead, it was judged according to the different levels of the three great pavilions. Moreover, there was a clear boundary between the areas where the new disciples could participate in the trial. This made the new disciples of the GreenCloud Pavilion overjoyed.

After all, if they were to be compared with the new disciples from the rising Sky Pavilion and the mysterious Pavilion, they would definitely end up at the bottom. In that case, the trial would be meaningless to them. However, now that the three pavilions' rookies had been evaluated separately, they saw some hope. This was especially so when the bald-headed elder's next sentence made all the rookies boil with excitement.

"The top three in this trial will each receive a Foundation establishment pill as a reward. The first place will also receive ten spiritual jades as a reward! Fourth to tenth place would be rewarded with three spiritual jades each. As for those ranked below tenth place, they could forget about anything else. Of course, these rewards can only be honored when you reach the most basic requirements. "

The top three would receive a foundation building pill!

The crowd instantly burst into an uproar. Even if these new people were ignorant and ill-informed, how could they not know about the foundation building pill, a pill that countless cultivators dreamed of! For any Sky Class full master, as long as they had the talent, they only needed to take one foundation pill and they'd be able to break through!

It should be known that the newcomers had gathered in the welcoming new pavilion today. Their ultimate goal was to reach the foundation building stage within a year. And, a foundation building elixir was very likely to help them reach the foundation building stage in one go. How could they not be excited?

Of course, the foundation elixir wasn't the same as the Golden elixir-it was only effective when one was breaking through into the early stage of Foundation, and it was useless once they were in the Foundation Stage.

However, a Foundation-building golden core didn't have this disadvantage. It could be used as a Foundation-building elixir, as a Foundation-building barrier-breaking elixir, and even as an experience elixir!

After hearing such an exaggerated reward, not to mention the grassroots newcomers of the GreenCloud Pavilion, even the elders of the mysterious Pavilion couldn't hold back. Even the eyes of the second generation young masters of the rising Sky Pavilion were burning with desire!

Unless it was someone like Xu lingchong who had a background that was so deep that it was daunting, it was actually very difficult for ordinary second and third generation cultivators to obtain a foundation building pill. Thus, this opportunity was also very rare for them!

Chapter 3663 The Rules Of The Trial

After successfully rousing the enthusiasm of all the newcomers, the bald elder smiled slightly. The original intention of organizing the newcomer trial was not only to train the newcomers, but also to let them help gather medicinal herbs to refine strategic medicinal pills like the foundation building pill.

After all, all the herbs collected by the newcomers during the trial had to be handed over. If they were not given a heavy reward and did not let them see the hope of victory, these newcomers might not put in the effort, and that would go against the original intention.

However, newbies were newbies after all. While using a huge reward to boost their morale, in order to avoid a lot of unnecessary trouble, some ugly words had to be said first.

The bald-headed elder indifferently swept his gaze over all the newcomers and finally said, ""Now you all know the rules, but there are three things I have to emphasize, in case some of you idiots have thoughts that you shouldn't have."

"First, you can only move around in the outer area of the back mountain. Don't try to touch any restrictions. I promise you will die a terrible death."

"Second, you only have three days. If you don't return before noon after three days, you will die a terrible death."

"Third, the trial encourages competition. You can steal from each other, but you can't kill anyone. If anything happens, I'll take action personally and make you pay with your life."

Any one of these three things would cost him his life, and he was filled with killing intent.

After he finished speaking, the bald elder no longer paid any attention to the newbies who were a little dazed from his killing intent. He closed his eyes and rested. As for the two elders beside him, they didn't say a word from the beginning to the end. Their main responsibility was to guard the back of the mountain. As for the welcoming new pavilion's trial, it was just a small part-time job.

"Alright, everyone, go to your respective senior martial brothers in charge to receive the special back basket from the back mountain Hall. After adjusting your condition, you can set off. Don't dawdle!" Hu Yun Feng took over the authority to issue an order.

"Yes!" All the rookies acknowledged the order in unison, all of them rubbing their fists and wiping their palms, eager to give it a try.

"Junior Brother Lin, you must be careful after entering the back mountain. Danger is lurking everywhere, and anything can happen during the trial. Junior Brother Xiao and Junior Brother Qiao as well. " The miserable senior brother worriedly reminded them as he carried the specially made baskets on the three people's backs.

Although the bald-headed elder had already warned them before that it was strictly forbidden to kill in the newcomer's trial, the back mountain was so big that even the outer area was full of danger. No one knew what would happen. If someone really wanted to kill someone, he might not need to do it personally. As long as he played some small tricks, it was possible to kill the person.

Lin Yi, Xiao ran, and Qiao hongcai nodded. They'd never been to the back mountain before, but they were all Sky Class Masters, after all-they still had to be careful. In their eyes, the wild forest behind the mountain was full of ancient aura. Although it was a Holy Land for cultivators that contained countless heavenly materials and earthly treasures, it was also a giant fierce beast that chose to devour people at the same time. No one knew how many corpses of powerful cultivators were buried in it.

He turned around to look at the other newbies around Meng jueguang and lowered his voice to Lin Yi and the other two."Just now, I accidentally heard them slip up a few words. It seems that they are preparing to join forces to deal with you during the trial. If possible, I suggest that after entering the trial ground, you find an opportunity to meet up and act together. This way, at least you can look out for each other."

"This ..." Lin Yi and the other two looked at each other, troubled.

Putting aside the fact that the trial this time was to send the newbies to a random location, it would be very difficult for them to meet up! Moreover, if they were to waste time searching for each other, it would not be worth it!

The most important thing was that Lin Yi was focused on finding the heart-devouring exquisite grass, while Xiao ran and Qiao hongcai had their own plans. The three of them could take care of each other if they moved together, but this naturally limited their points.

After all, if three people walked the same path, the herbs they found in the end would definitely be limited. Thus, the problem came. These herbs couldn't be divided equally, right?

If the three of them split the points equally, then the final result would very likely be that everyone's points would be inferior to the others. This way, it would be impossible for them to get into the top three and pass by the foundation building pill in the end. And if the three of them didn't split it equally, who would get more and who would get less? This way, the problem was even bigger!

On the other hand, if the three people went separately, although it was a bit more risky, the return was also great. In the end, the points of each person were definitely much better than acting together. At least they had the hope of competing for the top three. It should be known that the reward for the top three was foundation establishment and golden core. How could they easily give up this opportunity?

Moreover, the bald elder had already clearly warned them not to kill anyone. As long as they were careful, at least they wouldn't be in danger of dying, and the risk wouldn't be too great. In this way, it was obviously more cost-effective for the three of them to split up!

However, Xiao ran and Qiao hongcai looked at each other. Lin Yi had always treated them well, so wasn't this the time to repay him?

If the three of them worked together and gave all the herbs they found to Lin Yi, then Lin Yi should have no problem getting first! At the thought of this, both of them felt ashamed of their previous moment of selfishness!

"Senior brother ku is right," the two of them said at the same time. "Let's think of a way to work together. Brother Lin has taken care of us so much in the past. No matter what, he has to fight for the first place in the trial for you!"

In other words, all the herbs they found during the mission would go to Lin Yi first. This way, the two of them would be giving up the rewards. This required a lot of determination-after all, the temptation of the foundation pill was unparalleled for Sky Class Masters like them.

Lin Yi shook his head with a bitter smile. He was touched by their intentions, but his most important mission was to find the heart-devouring exquisite grass. Compared to the foundation pill he was planning to make, the foundation pill was nothing.

If he went with them, it would be unfair to Xiao ran and Lin Yi, and it would be an extra burden to him.

"I appreciate your kind intentions, but there's no need for that. This is a rare opportunity, so we can't let go of the rewards we should fight for. Otherwise, we'll regret it for the rest of our lives." Lin Yi said seriously.

"But it's still hard to fight against four hands with two fists. If Meng Tong and the others really join forces, it's useless no matter how many herbs we find in the early stage. In the end, they'll still take them away. It's better for us to give up on the two-on-one fight and focus on helping brother Lin. This way, it's safer." Xiao ran thought for a while and said. Qiao hongcai, who was beside him, also agreed.

Chapter 3664 Initial Encounter

Although killing was not allowed during the trial, snatching of herbs was allowed. This was how the difficulty of the trial was reflected.

Just as Xiao ran and the other two had said, if the three of them fought on their own, it would be useless no matter how many medicinal herbs they found and how many points they obtained in the early stages. In the end, Meng Tong and the others would still benefit. This way, not only would they gain nothing, but they would also be helping the enemy, which would increase the difficulty of Lin Yi's fight for victory.

This was a big problem!

Lin Yi thought about it and took out the map of the outer area of the back mountain that was given to all newbies. He pointed at a place where two streams met, "In that case, we'll act separately for the first two days, but we'll meet at sanxikou at noon two days later and come back together. Time is of the essence, so don't push it back and forth with me. Let's just decide like this. "

In the first two days, they could split up and search for as many herbs as possible to obtain points. It was relatively safer at this time.

This was because even if Meng Tong and the others wanted to deal with them, they wouldn't choose to do it so early. After all, they couldn't kill anyone. Even if they joined forces to beat up Xiao ran and his partner, they wouldn't get any substantial benefits. If they wanted to do something, they would definitely choose to do it at the last moment of their return journey. This way, it would be more convenient to snatch the fruits of their labor and maximize their benefits.

As for the meeting two days later, with Lin Yi among the three, even if Meng Tong and the others had the advantage in numbers, they might not be able to take advantage of it. It was hard to say who would break it then!

Xiao ran and Qiao hongcai naturally wouldn't reject Lin Yi's offer, and they nodded. After all, Lin Yi's plan wasn't only more scientific and logical, it was also more beneficial to the two of them.

Seeing that the three of them had already agreed on a plan, although the bitter senior brother felt that there was still a bit of risk in doing so, when he thought about it, as a cultivator, how could he not take any risks from the beginning to the end? risks were always directly proportional to benefits, and this could not be helped.

"Alright then. In short, the three of you must be extremely careful. Don't be careless. Your enemies aren't just the other newbies. Don't forget that the back mountain is the source of danger!" The miserable senior brother warned.

Lin Yi and the other two nodded. After everything was ready, they went to the square at the back of the mountain with the other newbies.

At this moment, at the starting point, more than a dozen huge flying spirit beasts were ready to go. This was the standard equipment of the rear mountain Palace. After all, they were guarding the entire rear mountain. Usually, they had to rely on flying spirit beasts for transportation. If they were to walk, who knew how long it would take to reach the scene of the incident.

So it was this random distribution method!

Lin Yi finally understood when he saw these flying spirit beasts. He was still wondering how these newbies would be sent to the outer area of the back mountain when he heard the rules of the test, and thought that there would be some teleportation formation or something. So it turned out that they were airdropped by flying spirit beasts!

After all the rookies stood on the flying spirit beasts, more than ten flying spirit beasts whistled into the air at the same time. The scene was spectacular and caused the rookies to cry out in surprise.

After that, under the guidance of the experts from the back mountain Hall, these flying spirit beasts split into three groups and sent the new disciples from the three pavilions to their respective trial areas.

From the perspective of direction, they were completely opposite. This avoided the possibility of the newcomers from the three pavilions crossing paths. Even if they wanted to meet each other, they would not be able to.

After flying for about the time it takes for an incense stick to burn, the newcomers who were standing on the backs of the flying spirit beasts were sent down randomly one by one under the instructions of the experts from the rear Mountain Hall.

Lin Yi made a rough estimate-the two newbies were at least ten miles apart from each other at the drop-off point. Even Pingchuan Avenue would take a long time to travel, let alone this vast forest.

From the looks of it, even if the newcomers had a plan to meet up and work together in advance, it would be difficult to meet others within a day. Generally speaking, it would be good enough if they could meet up after two days.

This distribution pattern clearly had a special purpose. Although the rookie trial encouraged competition, it did not want to see vicious competition between rookies.

If the rookies were put together from the start, the final situation would likely result in a constant chaotic battle between each other. No one would put their heart into searching for herbs, but instead hope to snatch the fruits of others' labor from the beginning.

This was clearly not in line with the three pavilions' original intention of letting the rookies gather medicinal herbs for strategic storage. And now that they were so far away from each other, at least for the first two days, the rookies would not be focused on killing each other. Instead, they would turn their attention to searching for medicinal herbs. As for the competition between them, that would be a matter for two days later.

When both sides had enough points, the competition would be more intense, wouldn't it?

Lin Yi couldn't help but smile after seeing through the organizer's intentions. This was good-at least for the first two days, there wouldn't be any blind people who would get in his way!

The only problem left was whether he could find the heart-devouring exquisite grass. Although the miserable senior brother had said that there was heart-devouring exquisite grass in the back mountain, the back mountain was so big that it was really unknown whether he could find it in just three days. Moreover, even if it was there, it might not be in the outer area. If it was only in the inner area of the back mountain or even deeper, it would really be a pain in the ass.

I hope the situation won't be too bad! Lin Yi prayed silently and jumped off the back of the flying spirit beast at the signal of the back mountain Hall Master.

It was easier for newbies to release the spirit beasts after they were released-they didn't fly too high up, and Lin Yi only needed to reach the top of the tree to reach for them. After he got off, he found himself in the middle of a giant tree.

Whoosh! Whoosh! Whoosh!

After getting off the aerial spirit beast, Lin Yi felt the killing intent coming from behind him before he could even stand still. At the same time, he received the warning from the Jade. He didn't have time to look back and activated his butterfly microsteps immediately, barely dodging the sneak attack.

Just as Lin Yi dodged, a crudely made but extremely sharp wooden spear brushed past his clothes and buried itself into the trunk of the tree.

Lin Yi turned around and saw an ape-type spirit beast standing on a branch five to six feet away from him. It was covered in black fur, and although it wasn't particularly strong, the hostility in its red eyes was enough to make people shiver.

The black ape roared at Lin Yi from a distance before charging at him. Its speed and agility surprised Lin Yi.

According to Lin Yi's estimation, this black ape should be around Sky Class mid phase!

Chapter 3665 Playing Tricks

If it was placed outside, it might not pose any threat to him, but this was its home ground. Who knew how strong this guy could be!

Lin Yi didn't want to waste his Qi on the black ape since he was new here. He turned around and tried to shake it off with his butterfly microsteps. Even though this was the opponent's home ground, Lin Yi had absolute confidence in his speed.

But what was unexpected was that even with his tolerance, the black ape was still in hot pursuit, as if it wouldn't stop until he died. Lin Yi was a little confused-what did he do to piss this thing off? did he accidentally step into its nest?

In the blink of an eye, the man and the ape had already covered a distance of several thousand feet in the dense canopy. At this time, the black ape finally slowed down, as if it had the intention of giving up.

Lin Yi let out a breath of relief-this confirmed his previous guess. It seemed that he had really accidentally stepped into the enemy's territory. To the forest spirit beasts who were very territorial, if an outsider like Lin Yi broke into their nest, they would definitely fight to the death!

However, just as the black ape was about to give up, a huge black shadow suddenly appeared above the black ape's head without any warning. Taking advantage of the black ape's lack of reaction, it opened its bloody mouth and swallowed it whole. Then, it whistled back into the dense canopy, making it impossible for people to see its true appearance.

Hiss! Lin Yi, who had witnessed the entire scene, couldn't help but take a deep breath. He quickly left the scene before the beast could even see him.

After carefully escaping a thousand feet away, Lin Yi finally slowed down. He was nervous, but his lips subconsciously curled up, "This back mountain had given him a solid show of might!

After all, he was still an early Foundation Stage practitioner-the scene just now was shocking and numbing, but Lin Yi still managed to gather enough information in his hurry.

The giant was a multi-colored giant python, its body as thick as a water bucket. Lin Yi couldn't see its entire body, but he could guess that it was at least thirty meters long.

More importantly, this multicolored giant python was able to swallow the Sky Class middle phase black ape in one bite. This meant that its strength was at least Sky Class full completion, and could even be a strong foundation Stage spirit beast!

In this deep forest, facing such a ferocious Foundation Stage spirit beast, Lin Yi didn't have the slightest confidence in escaping unscathed. It wasn't impossible for him to lose his life here. Fortunately, the Python's prey was the black ape. If it had been him, he might not have been able to Dodge the attack just now!

Thinking back to the warning he'd given Lin Yi before leaving, Lin Yi felt that it was absolutely right. His enemy wasn't just the newbies-the back mountain itself was the source of the danger!

It had only been a few minutes since he had disembarked from the aerial spirit beast, but he had already seen two powerful spirit beasts, one of which might even be at the foundation establishment stage. This kind of thing was simply unimaginable in the outside world.

One had to know that this was only the outer area of the back mountain. If it was the inner area or even more central area, what would it be like? Not to mention those Sky Class full Masters, Lin Yi felt that even a Foundation master like him wouldn't be able to live past a day!

What Lin Yi didn't know was that there were a lot of powerful and ferocious Foundation Stage spirit beasts in the outer area of the back mountain, but it wasn't so many that one could just step on them. If there were these giant pythons everywhere, then other Sky Class peak phase newbies wouldn't be able to survive, let alone pick herbs.

The reason why he had encountered so many vicious people was not simply because of bad luck. Someone had deliberately warned him from behind to throw him into the most dangerous area in the outer periphery and try to make him die in the mouth of the spirit beasts.

In order to greet him, Meng jueguang had even specially asked Xu lingchong to come forward. After all, with his power, these Masters in the back mountain Hall would not even give a damn about him, let

alone help him. However, Xu lingchong was different. They had to give him face. After all, it was just a small matter.

It might be a small matter to them, but it was a matter of life and death to Lin Yi. If it wasn't for the fact that he was hiding his foundation level strength, he would've died in a place like this.

Lin Yi was much more cautious after that display of power, but there weren't any other powerful creatures within a few miles, perhaps because of the giant python. Even if there were, they were small, harmless beasts like the groundhogs.

Lin Yi guessed that the giant python wouldn't even bother to open its mouth even if he brought it to it.

Lin Yi relaxed a little after coming to this conclusion. It was dangerous to move around these powerful spirit beasts, but it wasn't without its benefits. At least it could save him a lot of trouble.

And that giant python had just swallowed a Sky Class mid phase black ape, and according to the habits of snakes, they shouldn't need to eat for a while. This was an innate instinct, and the Foundation Stage giant python was no exception. In other words, there shouldn't be any other danger in this area for at least a while.

This was perfect-it gave Lin Yi the best chance to search for herbs. Normally, other spirit or wild beasts wouldn't dare to step into this area under the Python's threat, so the herbs here should be growing better than anywhere else!

After making up his mind, Lin Yi jumped down from the top of the tree. After all, herbs didn't grow on trees, with a few exceptions.

As expected, Lin Yi found something as soon as he got to the ground.

It was a light blue flower that grew in the grass. At first glance, it was unremarkable, but if one looked closely, they would find that this flower was completely made up of a single petal. The flower's arc was very mysterious, as if it contained the mysteries of the world. Most importantly, although this flower was small, it was full of spiritual energy, which was the characteristic of herbs.

"Could it be a flower?" Lin Yi thought about it-he remembered the shape of the flower. There were hundreds of common herbs on the walls of the back mountain Hall, and he'd scanned through them before he left-he saw this flower.

Chapter 3666 Extremely Difficult

As for whether it was a herb or not, he'd just have to dig it up and put it in the basket on his back. It'd give him points based on the herb's properties and Qi, and after Lin Yi did that, the bright red point Bar on the basket really did jump up a bit, from zero to seven.

Ordinary herbs only gave one point, but this seemingly unremarkable flower directly gave seven points. It was quite a good start.

Lin Yi was delighted. Although his goal was to find the heart-devouring exquisite grass, it wasn't a bad thing to collect as many other herbs as possible. Even if he didn't put them in the Jade space, he could still use them to exchange for points.

However, the following process was a little boring. Lin Yi did collect quite a lot of herbs as he expected, and in less than an hour, his points shot up to fifty-seven, but he still couldn't find the heart-devouring exquisite herb he wanted the most.

It had to be known that in order to ensure that he could find the heart-devouring exquisite grass during the trial, he had done a lot of homework before this. He had even specially made a trip to the back cliff to consult with the "scholar" Lu bianren. Not only did he know the characteristics of the heart-devouring exquisite grass like the back of his hand, but he had also memorized the suitable environment for it to grow in. He had made sure that he would not miss it if he came across it.

However, he had already walked around the area for several miles, but he couldn't even find the shadow of the heart-devouring exquisite grass. Not only that, but judging from the dark and damp environment, it didn't seem like the heart-devouring exquisite grass could grow in this area.

"According to senior brother Lu, the heart-devouring exquisite grass is sunshiny and easily appears in dry places with sufficient light. It's not easy to find such a place in the deep mountains and old forests." Lin Yi shook his head helplessly.

The deep mountains and old forests had plenty of rain. If it was in the secular world, it would be a tropical rainforest with no end in sight. The ground was either dark and damp with streams or streams. Not even a little sunlight could penetrate through. It was not easy to find the heart-devouring exquisite grass in such a place.

Even with Lu bianren's hints, it wasn't easy for Lin Yi to find a place that fit the criteria-he didn't even know where he was, and there weren't any signs or landmarks within a radius of a couple dozen miles. Even if he compared it to the map the back mountain Hall gave him, it'd be useless.

Anyone who had experience living in the jungle knew that the scariest thing in this vast jungle was not the fierce beasts and poisonous substances that were hidden everywhere, but losing one's direction. In this dense forest where even sunlight was hard to see, once one lost their way, the final outcome was likely to be devoured by the dense forest.

In fact, without any landmarks around them, even an early-stage Foundation like Lin Yi would have a hard time locating himself. However, he was slightly better off than a normal person in that he could at least climb to the top of a tree and use the sun to pinpoint his location.

Apart from that, his other advantage was that his survival ability was much stronger than ordinary people.

But that was all. Lin Yi's current mission wasn't to survive, but to find the heart-devouring exquisite grass in three days. That was a huge difficulty! At least until now, he still didn't know which direction the heart-devouring exquisite grass would grow in, and he didn't know how far that place was from him!

It was a pity that Skybolt pig was still unconscious. If only this guy was awake! Lin Yi couldn't help but sigh.

With the pig's ability, even if it couldn't help him find the heart-devouring exquisite grass directly, it should be able to find a dry place with plenty of light. After all, treasure hunting was this guy's talent, and the most basic premise of treasure hunting was to sense the environment.

Finding the heart-devouring exquisite grass in three days ... If Lin Yi only had a twenty percent chance of success on his own, then with the pig's help, he had at least an eighty percent chance!

It was a pity that Skybolt pig had been unconscious ever since they arrived on Sky Class Island. It had been more than twenty days, and Lin Yi didn't know how to wake him up. If it weren't for the fact that its vital signs were still stable, Lin Yi would've thought that this guy had already turned into a plant pig.

Since he couldn't count on the Skybolt pig, he could only count on himself!

Lin Yi took a deep breath, found a tree and started climbing.

He could only see further when he was high up. He tried to climb to the highest tree nearby and find a place that was suitable for the growth of the heart-devouring exquisite grass. This was the last hope he could put his hope on. He was a little stupid, but it was better than blindly searching like a headless fly.

Lin Yi was extra careful when he was climbing the tree, always on guard for any movement around him. He learned from the previous experience that the trees weren't as messy as the ground with all kinds of poisonous snakes and beasts, but it was more dangerous.

In this kind of dense forest, the more powerful the creature was, the more likely it was to occupy the large space above, just like the giant python and the black ape they had encountered before. The snakes and beasts on the ground were troublesome, but they didn't pose much of a threat to Lin Yi. However, it was a different story on the top of the dense treetops. There might be some powerful and ferocious Foundation Stage spirit beasts there.

The tree Lin Yi was looking for was technically out of the Python's territory, so he didn't have to worry about it. However, while he was climbing up, there might be another spirit beast that was as strong as him already.

He kept feeling like there was a powerful creature staring at him from a dark corner, but he made it to the top of the tree without any danger. He had a good view.

But after some observation, even someone as strong-willed as Lin Yi couldn't help but feel discouraged.

There was no other reason. No matter which direction one looked, the scenery was almost exactly the same. It was all the same endless treetops. The only difference was that when one looked North, in addition to the treetops, one could see a towering mountain in the distance. It was so high that one could not see the top, and it reached straight into the clouds. This was the main body of the so-called back mountain.

The back mountain Hall was South of the mountain, and Lin Yi had a general idea of where he was now, but he didn't know which direction he should go next.

None of these four directions seemed to be suitable for finding the heart-devouring exquisite grass. It might be possible to find it after reaching a certain height in the back mountain in the North, but there was no need to think about it. According to the map, it was already the inner area of the back mountain. The restrictions of the inner area had not been opened, so there was no way to enter.

Chapter 3667 Skybolt Pig Wakes Up!

"Well ..." Lin Yi was in a difficult position. He could only choose a random direction to look in.

At this moment, a muffled Thunder sounded in the sky, followed by dark clouds and a strong wind. In the blink of an eye, countless raindrops had already hit down, each one as thick as a thumb. It hurt when they hit the face. The rain was coming at any time!

He was not familiar with the surrounding environment, and the storm had suppressed his visibility and perception to the extreme. If he continued to move outside at this time, it would be no different from courting death.

Even with Lin Yi's strength as an early-stage Foundation, he had no choice but to find a place to hide from the rain. After all, it was a thunderstorm, and it came and went quickly-it shouldn't take too much time.

Lin Yi was planning to find a dense canopy to hide from the rain, but he accidentally saw a hole in the tree trunk.

After some observation and making sure there weren't any powerful spirit beasts, Lin Yi flashed in. Compared to the storm outside, a dry and comfortable tree hole was an irresistible temptation, and Lin Yi was no exception.

Unexpectedly, the space inside the tree hole was quite large and empty. It was about 20 square meters, and there were no obvious signs of chiseling. It seemed to be a naturally formed tree hole.

He looked around and saw a pile of things in the corner. His eyes narrowed and his heart tightened.

That pile of things was actually a pile of bones! There were about four or five of them in total. These weren't the bones of any wild beasts, but the bones of real humans!

In an instant, they felt their blood run cold.

It wasn't strange to see human traces in this tree hole. After all, this was the outer area of the back mountain. Every year, many cultivators would enter and leave. However, it was shocking to see human skeletons here, and there were as many as four or five of them!

Could it be that there were cultivators killing each other and then piling the corpses here? Lin Yi couldn't help but wonder.

Lin Yi was extra alert as he scanned the bones-each one of them had huge teeth marks. This time, the answer was obvious. These people did not die at the hands of humans, but became the food of some powerful spirit beast!

The conclusion made Lin Yi break out in cold sweat.

The reason why these people had appeared here was most likely to take shelter from the rain like he did now, or simply to find a place to rest and reorganize. But in the end, they had all become food for a powerful spirit beast. What did this mean?

This meant that Lin Yi had followed in their footsteps, and was most likely being targeted by that powerful spirit beast!

From the beginning to the end, this tree hole was not a shelter, but a living trap, a trap that caused many cultivators to die without a burial place!

The law of the jungle! Those words flashed across Lin Yi's mind. Outside of the back mountain, there were all sorts of rules and restrictions. People could live in peace with each other, even with spirit beasts. But here, none of those rules worked.

There were only two identities here. You were either the predator or the prey.

He didn't know what the spirit beast looked like, but he knew that he'd become its prey, a prey that had fallen into its trap.

In a situation where he didn't know the opponent's background at all, if he stayed here, he might just be sitting around and waiting for death. So Lin Yi made the choice immediately-out of the thirty-six Stratagems, leaving was the best! Even if he had been targeted and couldn't escape in one piece, he could at least choose to change the battlefield. There was no need to fight in the opponent's home field!

However, just as he was about to leave the tree hole, a voice that he had not heard for a long time suddenly rang in his mind. "Ji Ji! Ji Ji!"

The pig woke up at this moment! Lin Yi's steps stopped-this voice made him overjoyed. It'd be much more reliable to find the heart-devouring exquisite grass now!

However, the situation wasn't looking good, and it wasn't the time to release Skybolt pig. He had to wait until they were out of danger.

But before Lin Yi could leave the tree hole, the pig's cries in his mind got louder, as if it had something urgent to tell him!

Lin Yi's heart jumped-could there be some treasure hidden in the tree hole that made the pig this anxious?

After hesitating for a while, Lin Yi decided to let Skybolt pig out first to see what he could find. After all, something that could wake Skybolt pig up must be something special.

If he left now, he might not be able to find the tree hole even if he wanted to come back later. It would be a pity if he missed the treasure just like that.

"Ji Ji! Ji Ji!" After coming out of the Jade space, Skybolt pig looked at Lin Yi for a while before running to the pile of bones.

"You're saying that there's a treasure inside?" Lin Yi blinked.

Out of an instinctive disgust, a normal person would not want to take a second look at this pile of bones after seeing it. Even a powerful early Foundation Stage expert like him would not want to turn over this pile of bones at all, let alone think that there was something under it.

"Ji Ji!" The pig nodded.

Lin Yi didn't hesitate and walked up to the pile of bones. As expected, there was a black bag hidden under the bones. It was not big, about the size of a shoe box.

He opened the bag-it was a blood-red, sand-like thing, and there was a weird aura about it that he'd never seen before. He turned to Skybolt pig, "What is this?"

Skybolt pig shook his head, dipped his hoof into the dark-colored tree bark, and wrote on the ground, ""I don't know what it is, but I was awakened by its aura. It should be a very rare treasure."

"Oh? "That's interesting ..."Lin Yi decided to stop thinking about it since they were in a dangerous situation. He put the bag into the Jade space.

If he was not mistaken, this bag of things should be the spoils of war from the pile of bones on the ground. It might be a precious treasure that they had spent countless efforts to obtain. However, they did not expect to die in this tree hole trap on their way back.

Lin Yi couldn't help but feel a sense of danger at the thought-he'd end up like these people if he dawdled any longer.

However, just as he was about to leave, the Jade started to alert him. Skybolt pig squeaked and hid behind him. Lin Yi turned around and saw a suffocating figure at the entrance of the tree.

Chapter 3668 A Powerful Opponent

A pair of cold, blood-red eyes, like copper bells, were staring at Lin Yi. His throat trembled slightly, letting out a low growl that made one's scalp go numb. His fangs were bared, and the smell of blood assaulted Lin Yi's nose.

From its appearance, it should be a mountain leopard. However, its body was several times larger than an ordinary mountain leopard. Its height alone was close to ten feet. At this time, it had just stuck its ferocious head in, and it had already blocked the entrance.

There was only one entrance in the tree hole, and Lin Yi couldn't even escape now. He was like a turtle in a jar, caught by the giant Panther.

Of course, Lin Yi didn't dare to turn around and use his skills to break the other parts. He was afraid that the monster would attack him!

It was clear that his previous speculation was not wrong at all. The entire tree hole was a living trap, and in a moment of carelessness, he had become the prey, the prey that was almost in the other party's mouth.

Lin Yi's heart skipped a beat when he sensed the aura. As expected, the Panther was a strong foundation Stage spirit beast!

In fact, if it wasn't for this level of vicious creature, it wouldn't have been able to block those people here. After all, those people could come to the back of the mountain, their strength should be at least at the Foundation Stage. Of course, the possibility of a Sky Class full master wasn't high, but it couldn't be completely ruled out.

However, Lin Yi was glad that although the Panther was a Foundation Stage spirit beast, its strength should still be around the early stages of the Foundation Stage. He wasn't completely helpless.

However, even if they were both in the early stage of the foundation building realm, there was still a huge gap between humans and these natural creatures that were born for fighting, especially since this was the home ground of the other party.

Facing a monster like this, even someone like Lin Yi, who'd fought his way up from the common world, didn't have much confidence in escaping.

While the giant mountain leopard was still looking at him, Lin Yi quietly put the Skybolt pig back into the Jade space. After all, the pig wasn't born to fight, and it was too weak-a single scratch from it would turn it into cannon fodder. Lin Yi was still counting on it to find the heart-devouring exquisite grass for him, and he couldn't bear the consequences.

Luckily, the Panther seemed to only care about Lin Yi-it didn't even bat an eye at Skybolt pig. Lin Yi couldn't help but sigh-this guy might be addicted to eating humans!

Roar!

The roar of the giant Panther became more and more intense. Starting from its huge and ferocious head, its entire body slowly stretched in. At the same time, extremely sharp black claws suddenly appeared on its thick feet. With a light swipe, it left several deep claw marks on the soles of its feet.

This scene was truly shocking.

The wood under his feet wasn't ordinary wood-Lin Yi had felt it before coming in, and it was extremely hard, almost as hard as a rock. The claws, on the other hand, could leave such deep marks-he'd be dismembered on the spot if he got scratched by it!

This was the advantage of a combat-type spirit beast. As a race that was born to fight, their entire body was filled with deadly weapons. Compared to them, humans were so weak that they could not even withstand a single blow. This was also the reason why it was difficult for human experts to fight against combat spirit beasts of the same level of strength.

Lin Yi looked around-the thought of backing away from the giant Panther's threat came to mind. Although the hole had been blocked by the other party, for an early Foundation Stage expert like him, it was not difficult to break a hole in this kind of tree hole and escape.

However, Lin Yi's own rationality crushed this seemingly more reliable and wise idea.

This was different from the giant python they'd encountered before-it was no weaker than the Panther, but its target was the black ape. It didn't have any designs on Lin Yi, and so he was able to escape unscathed.

In fact, if the Anaconda were to attack him right after, Lin Yi was confident that he could escape. After all, he had the lightning storm boots and butterfly microsteps, and he was confident that he wouldn't lose to the Anaconda in terms of speed.

However, the giant Panther was different. It was obvious that the Panther was much faster than the Python, especially in the dense forest. It would not be an exaggeration to say that it was the king of speed.

And so, even with the lightning storm boots and butterfly microstep, Lin Yi still didn't dare compete in speed.

After all, first of all, he might not be able to outrun this giant Panther. Second of all, the heavy rain outside had suppressed his visibility and perception to an extremely low level. If he did not handle it well, he might break into the territory of other powerful spirit beasts. If such a troublesome and vicious creature were to appear, then he would really be in danger today.

Compared to running away, if he turned around and faced them head-on, although it would seem foolish, it was actually a more reliable choice.

That's right, this was the opponent's home ground. That's right, this was a trap set by the other party, and there was no way to avoid it.

But to Lin Yi, it wasn't like he didn't have any advantages at all. The biggest advantage he could rely on right now was that the tree hole was big enough for a human, but it was too small for a ten-meter tall beast!

Most of the time, the strong and huge body of a beast could have a great advantage, but in some situations, it could be an out-and-out disadvantage.

The giant Panther might be fast and agile outside, but it wasn't as agile as he thought it would be inside the tree hole!

In a fight between Masters, a small opening could decide the outcome. This small advantage might not be enough to kill the giant Panther, but it gave Lin Yi a lot of room to unleash his potential.

It'd been a long time since he'd felt like he could die at any moment. He could see the danger in those cold eyes, but Lin Yi was ready to take the risk.

Roar!

The giant Panther pounced forward, and The Killing Game began.

In such a small tree hole, especially in such a rainy day, the moment the giant Panther moved, the strong smell of blood from its body would hit the nose, making it hard to breathe.

This guy, even the smell on his body could kill!

Lin Yi's heart tightened, and before he could do anything, the other's dangerous claws had already reached his chest.

Chapter 3669 Narrow Victory

So fast! Lin Yi had already overestimated his opponent's speed, but he realized that he had still underestimated his opponent. However, this also showed that his choice to face the enemy head-on was the right one. At the speed of the other party, if he wanted to run, he really didn't have any chance of winning.

Lin Yi quickly dodged to the side and used all his strength to barely avoid the attack, but the wind from the claws still left a few holes in his clothes.

Roar!

Lin Yi's ability to Dodge the attack was out of the giant Panther's expectations. According to its past experience, it should have been able to deal with an early Foundation Stage practitioner with that attack, the bones in the corner being proof of that.

However, the surprise was just a surprise. The giant Panther's movements did not stop at all. When one claw missed, the other immediately followed. Compared to the previous claw, it was faster and more powerful!

Lin Yi couldn't find a chance to counterattack in a hurry, and he was forced to retreat again. After all, no matter how confident he was in his strength, he wouldn't risk fighting against such a powerful and powerful monster.

He clearly knew that the other party was very dangerous, but if he still attacked without understanding the situation, that was not courage, that was stupidity.

But this time wasn't as easy as the first. As Lin Yi retreated, the creature chased after him. Even when Lin Yi used butterfly steps to move at maximum speed and even changed directions, the creature still chased after him.

This was no longer an attack purely based on animal instinct, but a real high-grade martial skill. This martial skill was so profound that even human experts could not master it. No matter how fast or agile you were, once you were locked on, there was no possibility of escaping!

Before this, Lin Yi had wanted to rely on his agility to bully this huge monster, but once the monster's second claw appeared, everything was gone! If he couldn't get rid of it no matter what, what was the use of his agility?

Lin Yi couldn't help but sigh-an early Foundation Stage battle-type spirit beast was no easy target!

In the end, the claw ended with Lin Yi's left arm bleeding profusely with three bone-deep wounds.

This was the result of Lin Yi using the cave wall behind him as cover. If it wasn't for the giant Panther slowing down a bit, this claw wouldn't just leave three wounds-it would've taken away Lin Yi's entire left arm!

But other than the shock, the scene gave Lin Yi some inspiration. The beast's actions were full of killing power, but it was very careful to control its strength. It didn't want to release even the slightest bit of extra force, as if it was afraid of destroying the tree hole. It was especially obvious when it almost grabbed the wall!

In fact, no matter how hard the walls of the tree hole were, the man and the Beast were both in the early stage of the foundation building realm. If the two of them were to fight, even the entire tree would be blown to pieces, let alone this small tree hole! Most of the experts had died here before because they couldn't even withstand the first claw and were directly killed!

Lin Yi couldn't help but smile to himself-was this guy still planning on using this tree hole trap to get more people? You're thinking a lot!

After all, a powerful spirit beast at the early stage of the foundation building realm was not an ordinary wild beast. Its intelligence was not inferior to that of a human, and its actions were far from as straightforward as that of ordinary wild beasts. Every action of its had a special purpose.

It was even said that some spirit beasts could take human form after stepping into the heavenly path. However, the range of the heavenly path was too wide, and he didn't know if the early stage of the foundation building realm could do it.

However, it was not necessarily a good thing to think too much in the process of battle.

But just as Lin Yi was thinking of how to make use of this, the Panther's claws missed. Normally, it should've revealed its weakness by now, but it didn't. Not only did it not use up all its strength, it even attacked more fiercely!

The giant Panther turned around when its claws missed, and Lin Yi was surprised to see the long and powerful tail coming at him.

And this was not an ordinary Tail Sweep. The speed of the leopard tail was so fast that it was difficult to distinguish with the naked eye. One split into three, three into nine, and turned into heavy tail shadows that pounced on his face!

This guy was indeed fierce! According to Lin Yi's estimation, the power of this illusionary tail whip was already comparable to his 21st style of the wild fire Eight Trigram palm!

If he were to be hit again, even if it was just a brush like before, it would be hard not to die.

The giant Panther was full of confidence. This was its trump card. There was no way an early Foundation Stage cultivator could survive this attack. Even a stronger peak early Foundation Stage cultivator would be seriously injured if not killed by this trump card!

Little did they know that the more powerful a killing move was, the more likely it would have unexpected fatal flaws at certain times. Although this giant Panther already had intelligence comparable to a human, its thoughts still had a fatal blind spot, just like a normal human.

Lin Yi didn't choose to Dodge like the last one, but jumped into the air instead.

The giant Panther's eyes were filled with contempt. This guy was simply courting death by choosing to fly in the air in front of his trump card!

But the next moment, it felt that something was wrong. Although Lin Yi jumped in the air, his whole body was stuck to the wall behind him. If the tail of the whip swept over, it could kill Lin Yi, but it would also destroy the tree hole.

The Panther subconsciously hesitated, and this gave Lin Yi the chance to counter-attack.

He stepped on the wall behind him with his butterfly steps and pushed his speed to the maximum. In the blink of an eye, Lin Yi had jumped over the shadows and was above the head of his opponent.

Then, he used the 21st style of the wild flame Eight Trigram palm, which was enhanced by the profound Qi necklace!

BOOM! The entire tree trembled, and countless branches and leaves fell from the outside, startling a group of harmless and weak birds.

"Whoosh! Whoosh!" Lin Yi let out a breath of relief as he looked at the giant Panther lying on the ground, unable to move. He had been in extreme danger ever since the enemy had blocked the entrance, and that palm just now was a life-or-death experience!

If it wasn't for the fact that he noticed the weak point of the giant Panther, even if Lin Yi could kill it in the end, it would be a lose-lose situation for both sides, and he would need some time to recover.

Even so, the 21st style of the wild fire Eight Trigrams palm had exhausted all the true Qi in his body!

Chapter 3670 Reaching The Canyon

This was his strongest killing move now. If this move still couldn't kill this vicious creature, then he really could only kneel and beg ... For this damn thing.

The giant Panther was strong, but it couldn't handle the twenty-first style of the raging fire Eight Trigram palm. Lin Yi finally had the last laugh.

It was still raining heavily outside, and they wouldn't be able to leave anytime soon. Lin Yi hid in the tree hole and entered the Jade space to recover his Qi and heal his wounds. However, before he entered the Jade space, he took a look at the Panther's corpse on the ground and put it in with a thought.

After entering the space, the ghostly voice of the thing sounded next to him with a hint of surprise. "A Nine-Tailed cloud piercer leopard? If you can kill this thing, you can!"

"Senior ghost, this guy is called a Nine-Tailed cloud piercing leopard?" Lin Yi blinked, but the name was quite fitting when he thought back to the tail whip.

"Not bad. Judging from its body size, it should be an adult already. Its strength is at least at the early stage of the foundation building realm. It's a well-known killer in the forest. Even in the entire world of

spirit beasts, it's an extremely sinister and cunning fellow. It's rare to see someone like you who can kill it in the forest with your strength." The ghastly thing's tone carried a rare hint of admiration.

"Hehe, senior ghost, you flatter me. I was just lucky." Lin Yi shook his head with a bitter smile.

This time, they were able to kill the Nine-Tailed cloud piercing leopard. Although they ultimately relied on hard power, luck at the last moment was also crucial. If it wasn't for the Nine-Tailed cloud piercing leopard's subconscious hesitation, it was hard to say who would have won in the end.

Of course, this bit of luck came from his intelligence-if Lin Yi hadn't noticed the weak point, he wouldn't have had the chance to try his luck.

"No need to be humble, luck is also a part of strength." The ghastly thing sighed.

Lin Yi looked at him, surprised. It sounded like there was a story behind it. To be honest, he still didn't know where this thing came from after staying in the Jade space for so long. He just had a feeling that it had something to do with Sky Class Island.

Although, this question had been in his heart for a long time, but since the thing didn't want to say it, Lin Yi couldn't bring himself to ask. He could only keep it in.

He looked at the bag of blood-red gravel and asked the ghost while recovering his pure Qi, "Senior ghost, do you know what these things are?"

The ghostly thing sized him up for a long time before saying, ""I've never seen it before. It looks like some kind of material, but I don't know what it's used for."

You can't even recognize a ghost? Lin Yi blinked-the guy seemed to know a lot, and there shouldn't be anything he didn't know, but even he couldn't tell what this pile of blood-red gravel was-could it be some sort of rare material?

He could only keep this question in his mind for now and see if he could find out the specific name and use of it in the future.

After a while, Lin Yi was done with his recovery and brought Skybolt pig out of the Jade space. After all, his priority was to find the heart-devouring exquisite grass, and he didn't have much time to waste.

After exiting the Jade space, the rain was over and the sky was clear-it was the perfect time to move. Lin Yi brought Skybolt pig down to the ground and left the rest to the pig.

Because he'd never seen the heart-devouring exquisite grass before, even a natural treasure hunter like Skybolt pig couldn't just look for it directly. He could only follow Lin Yi's request and find a suitable place for it to grow.

There were two conditions: sufficient light and dry. The conditions were very simple, but it was not easy to find such a piece of land in the periphery of the back mountain that was like a tropical rainforest.

However, to the pig, this was a piece of cake.

Its talent was not so much treasure hunting as a complete perception of its surroundings. Its nose was far more accurate than the most sophisticated detector in the secular world. As long as it was willing, it could grasp any minute changes in the surrounding environment without missing a single detail. And this range could even reach a radius of several li.

With this setup, it was a piece of cake for Skybolt pig to find a place that fit Lin Yi's requirements.

"Ji Ji!" Seeing the light of day again, Skybolt pig squeaked in joy!

"By the way, senior ghost, when I was in the mortal world, I heard that once a spirit beast reaches the heaven rank, it will be able to speak the human language. But I, the Skybolt pig, still seem to be making some jabbering sounds?" Lin Yi asked curiously since there was no danger.

"Some spirit beasts are like this, but some spirit beasts are not! Don't use your limited knowledge of spirit beasts in the secular world as an authority. " The demonic thing said indifferently, "the spiritual beasts you see in the secular world are all low-level spiritual beasts. They've gone through a long period of evolution, so they can basically speak when they reach the sky Class!" However, you're the one who forcefully raised this little fellow's strength. It hasn't reached the right time to speak yet, so naturally, it can't speak! This was like a child speaking. There was a gradual process, and it was not something that could be done just by increasing one's strength. Also, on this Sky Class Island, some spirit beasts are already Sky Class the moment they're born. How could he say that?"

"I see!" Lin Yi said, fully convinced that the damn thing was the authority in this area!

As he brought Lin Yi to the hidden locations, Skybolt pig didn't forget what he was good at. One man and one pig, they took all the spiritual herbs they came across, and the result was that Lin Yi's points shot up to seven hundred and thirty-eight.

According to the common sense of the past trials, the final score of the same type of newbie trials in the past was generally around 500 points. It hadn't even been a day, and Lin Yi had already exceeded his expectations.

Under the pig's lead, Lin Yi trudged through the forest for an entire day, and only when the sun was about to set did he finally reach his destination-a Canyon.

This Canyon was more than a hundred feet wide and was marked on the map provided by the back mountain Hall. Originally, it was difficult to associate a Canyon with the word "dry and sunny". However, in the periphery of the back mountain, this place was already a rare place that met these two conditions.

The canyon was a few hundred feet deep, and there was a Rapid River below. The water was especially turbulent because of the rainfall just now, and it looked like if he accidentally fell in, even a master like Lin Yi would be skinned alive.
