

Bodyguard 4131

Chapter 4131 The Golden Core

"It's a core secret. They're relying on this to grow and grow. It's their way of making money, so it's impossible for them to reveal it." Lin Yi nodded.

"Yes, one thing is for sure. They must have special channels to get these things from the secular world, but they will never reveal a word. Just like our five elements Chamber of Commerce, some special and rare herbs can't be found outside or deep in the mountains, but only we can cultivate them. This is our secret. The Chamber of Commerce relies on this to maintain its core competitiveness, and they are the same." Cai Zhongyang explained.

In the end, the single-lens reflex camera was auctioned off at the sky-high price of 68000 spiritual jades. The next few items were all provided by the central Chamber of Commerce, and they were all technological products from the secular world.

Walkie-talkies, surveillance cameras, foot spa ... There were even canned food from the secular world. They weren't as practical as the technological products, but they were rare and sold for a high price. Lin Yi was shocked and envious at the same time.

He could just casually take some common stuff back without any cost, and he could sell it at such a shocking price on Sky Class Island. Was there any business more profitable than this?

What was a huge profit? This was the real deal, and it was shocking. Lin Yi thought that making elixirs was already enough to earn him enough spirit Jade, but it was nothing compared to the central Chamber of Commerce.

If he could figure out how the central Chamber of Commerce operated between Sky Class Island and the common world, with Lin Yi's methods and the Jade space, he could do the same business as the central Chamber of Commerce even if he was alone.

Of course, he could only think about it for now. The key was that he could only wait for an opportunity to slowly dig out that secret.

But no matter how well the Chamber of Commerce did to keep it a secret, there were no impenetrable walls. Lin Yi believed that he'd be able to grasp this secret one day, and then he'd be able to return to the common world!

Starting from the single-lens reflex camera, there were a total of 10 items, all of which were technological products from the central Chamber of Commerce. Each item was sold at a sky-high price, setting off the first peak of the Nakajima auction!

For a time, the name of the central Chamber of Commerce was firmly engraved in everyone's heart. Even those who had never bought anything from it would have a deep impression of it and would never forget it.

However, another shop's name immediately entered everyone's field of vision. They had only used a few elixirs in total and achieved almost the same effect as the central Chamber of Commerce. Their name was heavenly pill Pavilion.

"The next auction item is from an unknown small merchant. It's the heavenly pill Pavilion, which has just opened in Nakajima square. However, the auction item it provides is not simple at all. It's a Supreme-grade golden core golden core. I don't think there's a need to elaborate on its miraculous effects. The base price is thirty thousand spirit jades." The female auctioneer said with a smile.

Before his voice fell, everyone's breathing suddenly became heavy. A golden core was extremely rare, not to mention a top quality one. For any golden core stage master, it was simply a fatal temptation. They would not hesitate to go bankrupt for it!

The Jindan, as the name suggested, was the same as the Foundation Stage Jindan. After taking it, one could break through a level, but the difference between it and the latter was that it was effective for Jindan experts.

The Golden core and golden core were rare not only because it was difficult to refine, but also because the materials needed to refine it were extremely difficult to find. One of the most important and core materials was the Wandu golden core fruit.

Lin Yi had three Wandu golden core fruits, but they were fruits after all, and they couldn't be stored for long. They'd lose their medicinal properties easily, so Lin Yi used them to make golden cores.

Out of the three Wandu golden core fruits, five golden cores were formed. This was the biggest harvest Lin Yi had gotten in his recent alchemy.

"Lin shaoxia, a golden core of the highest quality, you've never spent so much before!" Cai Zhongyang, who was standing beside Lin Yi, was surprised. This was the first time he heard that Lin Yi was auctioning something like this.

It should be known that even if this golden core was placed in their five elements Chamber of Commerce, it would still be a good thing that could be used as a last resort, not to mention that it was a top quality item that could only be encountered by luck!

"I can't bear to do it either, but for the sake of the heavenly pill Pavilion's reputation, I've been forced to give it my all. If you don't give up, you won't be able to trap a Wolf." Lin Yi replied with a bitter smile.

This was the truth. Seeing that he was getting closer and closer to breaking through to the Jindan stage, no one would want to take the Jindan stage out for auction. In the eyes of any normal person, that was simply stupid.

However, if a peak-grade golden core could be exchanged for the sky pill Pavilion's rise to the top, then it wasn't a loss. Lin Yi had really put in a lot of money this time.

"40000 spiritual jades!" This fight for the Supreme-grade golden core was destined from the beginning. It could only fall into the hands of the big shots in the a-zone. The people in the other zones could only be envious, because they did not have the capital to do so.

"Fifty thousand spiritual jades!"

"70000 spiritual jades!"

"90000 spiritual jades!"

The previous items, even the technological products of the central Chamber of Commerce, were only increased by a few thousand. Now, it was the Supreme-grade golden core and golden core, and the price was increased by 20000, which made people's blood boil.

In the blink of an eye, the bid had broken through the 100000 spiritual Jade mark with an unstoppable momentum, and it was still rising crazily!

No one found it strange, as it was only natural. Even the worst quality golden core would cost at least 30000 spiritual jades to buy from the five elements Chamber of Commerce. The better quality would cost 50000 or even more.

If this Supreme-grade golden core were to fall into the hands of a talented golden core stage master, he could directly break through one and a half levels. The success rate was far higher than ordinary quality. If he could get his hands on a hundred thousand spirit Jade, he would be burning high incense.

It was a pity that this was the Nakajima auction, and everyone in the a-block area was from a rich family. If they really took a fancy to it, 100000 spiritual jades was only the starting price for them.

For this kind of good thing that everyone coveted, the early jiedan stage Wei shenjin naturally drooled non-stop. Unfortunately, his capital was really not comparable to those young masters from other sects with deep backgrounds. When he saw that the bid had exceeded one hundred thousand spirit Jade, he could only give up. It was useless to think more, and he could only admit defeat if he did not have enough spirit Jade.

In the end, the Supreme-grade golden core was won by a young man in the first Pavilion at the sky-high price of one hundred and seventy thousand spiritual jades.

Chapter 4132 A Letter

Lin Yi looked at him-this young man's background was probably profoundly deep. One hundred and seventy thousand spirit Jade, and he didn't even bat an eye from the start. It could be said that he didn't even care about spirit Jade-this calmness wasn't something that could be faked.

As for the others, although it was a pity that they had missed the Supreme-grade golden core and there was only one in the entire auction, they still remembered the name of the heavenly pill Pavilion.

All of them were secretly hoping that they would be lucky enough to find time to go to this unknown small shop and have a look. Although it was not very famous, since the heavenly pill Pavilion could produce a Supreme grade golden core golden core, there might be a second one. Who knew?

After that, Lin Yi also gave out three peak-grade golden core barrier-breaking pills. They were the same as the Golden cores, fifth-grade as well, but their prices were much lower than the peak-grade golden cores.

The final price of the three Supreme-grade golden core barrier-breaking pills was only 130000 spiritual jades. This was all thanks to the Supreme-grade golden core golden pill, which kept everyone in suspense. Otherwise, the price would have been even lower.

But up to this point, the heavenly elixir Pavilion had already won the auction. Not only did the four elixirs get sold for a sky-high price of three hundred thousand spirit Jade, allowing Lin Yi to earn a huge sum, but the most important thing was that the name heavenly elixir Pavilion was engraved in everyone's heart, just like the central Chamber of Commerce from before. From now on, their name was known throughout the entire Middle Island.

As for the famous medicine sect, Tong yangfei and Diao Huanshan, who had been trying to oppress the heavenly pill Pavilion, they didn't even mention it anymore. From the moment the Supreme-grade golden core was released, they were so shocked that they couldn't speak. They knew that all their preparations were in vain.

From the looks of it, in the eyes of the crowd, this newly opened little heavenly pill Pavilion was much more attractive than their old medicine sect. It was simply depressing to the point of collapse, but there was nothing they could do about it. They could only look at each other.

First, there was the rising central Chamber of Commerce. Then, there was the unknown heavenly elixir Pavilion. Today's auction had become the exclusive venue for these two. All the other items that were auctioned before and after did not cause as much of a stir as these two. They did not leave as deep an impression as these two.

The auction continued in an orderly manner. Although there were also rare treasures appearing, they were no longer as eye-catching as before. However, when the auction was about to end, the central Chamber of Commerce once again released a heavy piece of news.

"The next item is provided by the central Chamber of Commerce. It is very special. It is not a treasure, a divine weapon or a pill, nor any rare treasure. It is just a letter." At this point, the female auctioneer deliberately paused.

Sure enough, the crowd was in an uproar. Their eyes lit up when they heard the words "central Chamber of Commerce." They didn't expect it to be a letter. What kind of treasure was this?

Unexpectedly, the female auctioneer's next words shocked them. "Dear guests, do you have any relatives in the secular world? Do they have descendants? Do you have any friends? If they do, do you want to contact them but have no way to do so?"

Lin Yi's eyelid twitched as he recalled the secret of the Chamber of Commerce. He had a rough idea what the letter meant.

"This letter provided by the central Chamber of Commerce will give you this opportunity. This is not a regular auction. As long as you pay a straight price of 100000 spiritual Jade, you will get a chance to write and communicate with the secular world. Don't think that this is a scam, because this is a two-way service. As long as your letter is sent to the secular world, the central Chamber of Commerce will also bring back a reply to you, so you can't deceive people." The female auctioneer said, drawing the attention of the crowd.

For a moment, the atmosphere in the hall became a little strange. The letter delivery service provided by the central Chamber of Commerce was meaningless to most of the people present because they had nothing to do with the secular world and naturally had no need to write letters. However, for some special groups of people, this was an unexpected opportunity.

Some of them had family and friends in the common world, and some were practitioners like Lin Yi, who came from the common world. They'd be lying if they said they weren't excited to hear about this service.

However, to pay the sky-high price of 100000 spiritual jades just for the sake of writing a letter was simply too much for anyone to bear. If 100000 spiritual jades were used to bid for some rare treasure, it could still be of some help to their strength. However, what else could this letter do other than to relieve their homesickness? Would it increase his chances of survival or increase his strength?

To waste a hundred thousand spiritual jades just to get someone to deliver a letter was definitely a scam. There were not many people who had such a strong foundation, and in the eyes of most people, only an idiot with water in his brain would do such a stupid thing that would make people speechless.

However, after a moment of silence, someone finally took the bait.

"Count me in," Lin Yi said after some hesitation. He'd earned three hundred thousand spirit Jade from the auction, and while a hundred thousand was outrageously expensive, he could still afford it.

To tell the truth, Lin Yi's thoughts of the common world only grew stronger and stronger over the past six months on Sky Class Island. He'd think about the situation there almost every day, whether everything was going well or if something unexpected had happened. It was just that he didn't have a way to contact them, so he could only suppress the worry and longing in his heart.

But now, this central Chamber of Commerce suddenly appeared out of nowhere, providing this kind of delivery service. To Lin Yi, it was a timely help. Even though he knew that there might be risks, he couldn't help but want to try. It was only a hundred thousand spirit Jade, he could afford to bet on it.

Everyone's gazes were once again focused on the 12th a-row Pavilion. They were sneering, suspicious, and discussing.

"What's the background of this kid?" Wei shenjin had the same question as everyone else-he'd already made up his mind to get rid of this troublesome kid, but Lin Yi's performance still made him nervous.

Sitting with Cai Zhongyang, being able to take out a hundred thousand spiritual jades, and being connected to the secular world-these three things added together made Lin Yi's identity even more mysterious and unpredictable, making people wonder.

After Lin Yi took the lead, a few more people started bidding for the service. Three were from area a, and one was from Area B. They should all be people with strong backgrounds, but he didn't know if they were practitioners from the common world like Lin Yi, or if they only had relatives in the common world.

Chapter 4133 Ling Yi Takes Action

After bidding for the service, the reception Messenger immediately gave each of them a stack of fine paper of excellent quality with the watermark of the central Chamber of Commerce. This was the letter paper specially prepared for them.

Lin Yi didn't say anything else and started writing, telling them everything he'd experienced in the past half a year on Sky Class Island, big and small. He especially emphasized that he'd found Xue Li and Tian Gang, and told them not to worry.

As for the recipient of the letter, there was a long list of names-not only song Lingshan, sun Jingyi, and the other girls, but his lackeys were included as well. Lin Yi believed that no matter which one of them got the letter, everyone would see it and pass it around.

After he was done, he stuffed the letter into an exquisite envelope and wax-sealed it before passing it to the messenger to send it to the central Chamber of Commerce.

At that moment, the Nakajima auction had just ended, and it was time to leave.

"Young hero Lin, you should come with me or meet up with elder Tian. It's best not to act alone, just in case." Cai Zhongyang gave Lin Yi a look and pointed at A-15 on the other side, where Wei shenjin's dark eyes were on.

"It's fine. Elder Cai, you can go back first. I can handle such a small matter myself. " Lin Yi smiled faintly as he shook his head.

He knew that this time Wei shenjin would definitely take revenge on him. After all, Wei shenjin was an early jiedan stage master. Not only did he have to help Xue Li vent her anger, but even if it was just to eliminate the hidden danger, he had to find a way to eliminate this threat as soon as possible.

If he went back with Cai Zhongyang or Tianxing Dao today, Wei shenjin wouldn't dare to attack him in front of them no matter how brave he was. He would choose to endure and wait for an opportunity to take revenge in the future. This wasn't a good thing for Lin Yi. Instead of giving the initiative to the opponent, he might as well reveal a flaw and draw the snake out of its hole.

Lin Yi believed that if Wei shenjin found out that he was alone, he wouldn't be able to hold back. As long as he was prepared, this would be a great chance to kill him.

"Alright then, but you have to be careful. That guy is a core disciple of the snow sword sect, so don't force yourself, understand?" Cai Zhongyang warned after seeing Lin Yi's determination.

"Elder Cai, don't worry. I know what I'm doing." Lin Yi nodded.

After coming down from ten thousand sky peak, Lin Yi and Cai Zhongyang parted ways. Wei shenjin's eyes lit up as he followed behind. He was worried that Lin Yi would leave with Cai Zhongyang, but he didn't expect his chance to come so soon.

"Qian 'er, you can go back first. I have something to do." Wei shenjin immediately turned his head and ordered situ Qian, who was snuggling up to him.

"Brother Wei, I'll be waiting for your good news. You can't let that annoying fellow get away!" Of course, situ Qian knew what Wei shenjin was going to do and immediately nodded in agreement. She had full confidence in Wei shenjin's strength.

Wei shenjin responded and followed Lin Yi, staying far behind in the crowd. His tracking ability was better than most people, and it was almost impossible to notice if one didn't pay attention.

Unfortunately, Lin Yi's perception had locked onto him long ago. No matter how much he pretended, Lin Yi knew everything about him. He was just a clown who thought he was smart enough to hide his whereabouts.

Fifteen minutes later, the crowd was getting smaller and smaller-they'd left the central area of the island, and Wei shenjin was getting ready to make his move.

He didn't know who Lin Yi was or where Lin Yi lived, but he knew that if he wanted to kill Lin Yi to vent his anger, he couldn't waste the chance today. If he missed it, he might never have another chance like this again.

Seeing that there were only a few people around and Lin Yi turned into a remote alley, Wei shenjin couldn't help but feel happy. This was a Godsent opportunity. He quickly chased after him and accumulated his Qi, ready to attack.

However, as soon as he turned the corner and saw the empty alley, Wei shenjin was stunned. "A ghost? Where did that guy go? Why is it gone?"

At this moment, a figure suddenly appeared above his head and flew down towards Wei shenjin. Wei shenjin was shocked, especially after seeing this person's face.

This fellow who suddenly appeared was the martial artist who took Xue Li away and injured him, Ling Yi!

"Alright, you don't want to take the path to heaven, but you want to barge into hell without a door. Let's see how you die this time!" Wei shenjin was surprised and happy at the same time. He didn't have time to think about why Lin Yi suddenly disappeared, but this martial artist Ling Yi suddenly appeared.

He only had one thought, to kill this martial artist Ling Yi and take revenge for his failure last time!

As a core disciple of snow sword sect, Wei shenjin's strength was undoubted. His reaction was also very fast. Almost in an instant, all the true Qi in his body gushed out, and the silver sword on his back was immediately unsheathed.

The temperature within a hundred feet suddenly dropped a lot, and there seemed to be snowflakes falling. This was the symbol of snow sword sect's core martial arts technique. Once it was used for real, there would be signs of snow in the surroundings.

This time, Wei shenjin had learned his lesson from underestimating his enemy. As long as he used his true strength, he didn't believe that he couldn't kill this martial artist Ling Yi!

However, just as his determined snow sword thirty-two forms flashed with a snow-colored sword light, it was mercilessly suppressed by a powerful true energy that descended from the sky.

Strictly speaking, this wasn't Qi, but a bomb-a terrifying killer move that combined both Qi and alchemy. Lin Yi had been secretly gathering it ever since he left the auction, waiting for this moment!

BOOM! In an instant, the earth quaked and the mountains shook. Even with Nakajima's super-high-level defense array, the surrounding area within a radius of several miles was flattened without any suspense. Even the surrounding passers-by who were affected by the aftermath of this attack were all shocked.

On this Island, although Jindan experts were not rare, such a powerful aftermath was by no means something that ordinary people could create.

As the dust settled, Lin Yi looked at the surrounding skilled people. He glanced at Wei shenjin, who was blown to a pulp, and found a convenient place to escape, but he didn't turn around and run.

He was still not sure if Wei shenjin was dead. If he was really dead, then his efforts to wear the thousand silk mask would be in vain!

Chapter 4134 Tian Xing Dao's Strength

Since Wei shenjin had chased after her to take revenge, situ Qian would definitely know about it. At that time, she would definitely believe that she was the one who killed Wei shenjin.

What Lin Yi needed to do now was to make sure that no matter if Wei shenjin was dead or not, Wu Fuling had to be the one responsible for this.

He purposely stopped for a moment so that the surrounding practitioners could see his face clearly before turning around and disappearing from their sight.

"That person looks familiar. Where have I seen him before?" Sure enough, a passerby expert asked doubtfully.

"Eh, isn't this snow sword sect's Wei shenjin? I remember now, a while ago, snow sword sect wanted a man and a woman. That person just now seemed to be that man, and his name was Ling one or Ling two or something!" Very quickly, someone reacted.

"Don't worry about that. Just inform snow sword sect about this. Hehe, I heard that this guy is quite a showoff and has always been popular with women. I didn't expect him to be in such a state today. He might even lose his life. How pitiful." One of the passerby experts immediately reported the matter to snow sword sect.

Wei shenjin was attacked by Wu Fuling, and it was unknown whether he was Dead or Alive. This explosive news instantly shook the entire snow sword sect. This was different from Xue Li's elopement. Not only was it related to the sect's reputation, but it was also possible that they would lose a core disciple with a promising future. This was a big deal for any power!

Looking at Wei shenjin's bloodied body, Situ Qian almost fainted from crying. If it wasn't for a few experts who insisted that Ling Yi was the culprit, she would have directly told the higher-ups of her sect and asked them to go to the five elements Chamber of Commerce to force Cai Zhongyang to hand over the real murderer.

Once again, the snow sword sect mobilized all their forces to hunt down martial artist Ling Yi in the entire city. This time, they offered a sky-high reward of ten thousand spiritual jades!

After a few days, Wei shenjin finally returned from the gates of hell under snow sword sect's full efforts. However, this news did not cheer up the entire snow sword sect. Even Wei shenjin himself lost all hope after learning of the situation and fainted.

In addition to the internal and external injuries in his eyes, all the meridians in his body were shattered. He, Wei shenjin, a core disciple of the snow sword sect, had now become a disabled person. Geniuses had been beaten to the dust, and they could not even be compared to ordinary people.

All of this had nothing to do with Lin Yi. The snow sword sect had caused a huge commotion because of Wei shenjin's incident, but from the beginning to the end, the blame was all on Wufu Ling, who didn't seem to be affected at all.

What Lin Yi needed to do now was to make some Tier 4 and 5 pills every day when he wasn't training, and then walk around the sky elixir Pavilion. He'd never felt so comfortable before.

After the auction had been announced, the customers who came to the heavenly pill Pavilion were endless. The business of the heavenly pill Pavilion had been unprecedentedly good for the past few days. The daily sales had almost reached the number of the opening day. If this continued, the business would only get better and better. It was completely on the right track, and it made people feel happy.

However, while Lin Yi and the others were overjoyed, Tianxing Dao had been frowning these past few days, so much so that he had no choice but to come to Lin Yi for drinks.

"Big brother Tian, what's bothering you?" Lin Yi asked after a few drinks with Tian xingdao. Tian xingdao had always been a tough man in Lin Yi's eyes. He could even hold on for so many years after his meridians were destroyed. Normal things shouldn't make him so depressed.

"Hey, Lin Yi lil bro, I've been really depressed these past two days. Human relationships are fickle, and the world is fickle...Favors aren't something you can rely on, you can only rely on yourself in the end." Tian xingdao said with a bitter smile.

"Brother Tian, tell me, what happened?" Lin Yi asked.

"I thought I would be able to see a few old friends at the middle Island Auction a few days ago, but none of them showed up. So, the next day after I came back, I went to the island owner's Pavilion at the peak of the middle cauldron mountain. I wanted to see my old friends and restore my status as the Vice Island owner. Anyway, my injuries are no longer a big problem. It's only a matter of time." Tian xingdao said as he drank.

"And then? An accident?" Lin Yi guessed.

"Humph, your brother, I, thought that this was a matter of course. I didn't expect that the island master would refuse my request because of my absence in the island master's Pavilion for the past few years. He said that he wanted to hold a meeting to study it. What made me most disappointed was that my old friends, who were the Deputy Island Masters, all had a bad attitude. No one was willing to stand out and speak for me. It really made me speechless. Damn it, I always thought that they were die-hard supporters!" Tian xingdao said indignantly.

Lin Yi didn't look surprised at all-no matter how high a person's strength was, they couldn't escape the word "snobbish."

"This is actually not incomprehensible. From their point of view, no matter which one of them, I'm afraid they don't want you to be the Vice Island master and fight for power with them. What do you think, big brother Tian?" Lin Yi analyzed for him.

"Yes, it's not that I don't understand this logic, but when I think about this, my heart still feels stifled!" "If only that old man Zhang Liju was here," Tianxing said. "He's the master of the Sky Class Island, and even the master would have to think twice about his words. It's a pity that he's always so elusive, and it'll be hard to find him."

"Forget it. In my opinion, they are probably using this to test your bottom line, big brother Tian. They want to find out how much strength you have recovered. Once they see it clearly, I'm afraid they will become even more ruthless." Lin Yi said, shaking his head.

He didn't know how strong Tian xingdao was now, but he was sure that Tian xingdao's strength was far from his peak state. Otherwise, he wouldn't have encountered such an encounter.

In the end, strength determined the final right to speak. If he wanted to get those people to agree, he definitely couldn't rely on favors. Only by quickly recovering his strength was the right way to go.

"To be honest, my strength has been restored to the peak of the late Aurous core stage. I'm only one step away from recovering to the nascent Soul Stage. But this last step ... Sigh ..." Tian xingdao sighed helplessly.

With his combat power, the complete golden core realm was definitely not weak, but it was a fool's dream to restore the status of the Deputy Island master of Nakajima.

The key was that his strength could not be restored immediately even if he wanted to. With Tian Xing Dao's attainments, he could easily restore anything below the Yuanying stage. However, the Yuanying

stage was already close to his peak state. It would be very difficult to cross over in a short period of time.

Chapter 4135 Preparing To Break Through To The Golden Core

He believed that as long as he was given enough time, Tian Xing Dao would be able to restore to its former glory. However, if that was the case, he would have no choice but to tuck his tail between his legs for the time being.

"Is there any other way? For example, medicinal pills or something that can help big brother Tian cross this hurdle quickly?" Lin Yi asked.

"If that old man Zhang Liju was here, I could ask him to help me with the Golden core. With my Foundation, I could make it in one go, but now ..." Tianxing scratched his head helplessly.

"The Golden core of the nascent soul? What rank is that pill?" Lin Yi continued to ask. Ever since he successfully made the Golden core, the extremely difficult fifth level pill, his confidence in making elixirs had increased by a huge amount. Even if he had never heard of it, he was confident that he could try it.

"Sixth-grade! Moreover, it was not an ordinary sixth-grade, but an extremely difficult sixth-grade! As far as I know, Zhang Liju is the only one in the entire Hall of dan who has the confidence to make a level six golden pill. The others, like Xiao Hou and Xiao Cai, are also masters of dan-making, but they're not as good as him. " Tian xingdao sighed.

"Level six ..." Lin Yi hesitated. With his current abilities, he could only make level five pills at most. "Why don't I try!"

"Lin Yi lil bro, you can't force yourself when it comes to making elixirs-the consequences are unimaginable. I'm already very happy that you're willing to do this, don't force yourself!" Tian xingdao quickly tried to stop him.

If one's level wasn't high enough, but they had to forcefully refine high-level medicinal pills, it would be considered lucky if they refined a useless pill. If they weren't careful, they could cause a tragedy like the furnace exploding. That would be a big joke.

"It's fine. I was also thinking of trying to see if I have the ability to refine a sixth ranked pill. " Lin Yi smiled. He didn't wait for Tian Xing Dao to continue and went to Cai Zhongyang to get a recipe for a level six elixir, along with the corresponding materials.

This was not a golden elixir of nascent formation, but the simplest kind of entry-level sixth-grade elixir, the sixth-grade nascent strengthening elixir, which was specially used to stabilize the Yuanying stage. The medicinal properties were gentle, and the difficulty of refining it was the lowest among the many sixth-grade elixir.

Everything was ready and Lin Yi started trying. The Shennong medicine cauldron analyzed the curves as usual, but when it came to the Qi input step, no matter how hard Lin Yi tried, the Shennong medicine cauldron didn't move at all. The tablet kept showing one sentence.

"Lin Yi bro, you're not strong enough yet, so you don't have enough pure energy. Jing Jing can't make you any pills ..."

"I knew it ..." Lin Yi sighed helplessly, shaking his head. He'd expected this.

His cultivation level was not high enough, resulting in his zhenqi not being strong enough. At the moment, this was an unsolvable problem. He could not cross the most basic threshold. Even if the Shennong medicine cauldron was a divine tool for alchemy, it would be useless. The only way was to wait until his cultivation level had increased to the Golden core stage. Only then could he try again.

"It seems that I have to find a way to improve my strength as soon as possible. I believe that if I can break through to the Golden core stage, I should be able to try to make it." Lin Yi explained.

It was extremely difficult to make a golden pill, but Lin Yi had confidence in Shennong's medicine cauldron. Of course, this was only if he was strong enough to make a sixth-grade pill.

"Oh? Lin Yi lil bro, you're still at the peak of the late Foundation stage, right? you're still quite a distance away from the Golden core stage, but you're a practitioner of the creation battle technique, so you can't be judged like an ordinary person. If you're prepared, you might have a chance. " Tian xingdao said thoughtfully.

"Jumping two levels to reach Jindan? Is this even possible?" Lin Yi's eyes lit up.

For the vast majority of people, the difficulty of breaking through to the Foundation Stage was not small, not to mention breaking through to the jiedan stage. Even for those experts of the Foundation Stage, the confidence to break through to the jiedan stage was extremely small. As for the peak of the late Foundation Stage, it was simply a fool's dream to reach it in one step.

"Of course, nothing is impossible in this world. I, your brother, jumped two levels from the peak of the late Foundation Stage to the Golden core stage. I believe that with your talent, Lin Yi, you should have the same possibility, but you need to be prepared first." Tian xingdao nodded.

"What preparations?" Lin Yi asked quickly.

"Other than adjusting your body to its peak condition, the main thing is to have the corresponding medicine storage, and it'd be best if you could get some other items to help you level up. After all, it's not that easy to level up twice in a row. You should be prepared for that, right, Lin Yi lil bro?" Tianxingdao asked.

"Right now, I have the foundation barrier-breaking pill, the foundation Jindan and the Jindan. As for the other supporting items, I have a star inkstone." Lin Yi said without holding anything back.

"You have star inkstones?" When Tianxing heard this, he was stunned for a moment before his eyes lit up. "This is the legendary treasure that can be used to perfectly break through to the Golden core stage. That's great, with this, your chances of success will be much higher!"

"Really?" Lin Yi was delighted. He didn't think that the Tianxing sect would know about the star inkstone. Although he was at the peak of the late Foundation Stage and could fight against most of the early golden core Masters, it was still not enough to fight against a real strong opponent. Just like the mid golden core Master he met at Mount tianwu. If it wasn't for Lin Yi's trick, he wouldn't even be able to escape from him.

So, if there really was a way to break through to the Golden core stage as soon as possible, Lin Yi would be more than happy to do so.

"Of course it's true. In fact, as long as the quality is good enough, just by using the Jindan and Jindan together with the Foundation Stage, there's a little hope of breaking through to the Jindan stage. However, the hope is relatively small. But if you add the legendary star inkstone, the chances of success

will be much greater. The success rate of forcibly passing the stage is at least more than 50%!" Tian xingdao said with a confident look.

"More than 50%? That's enough for us to take a gamble!" Lin Yi couldn't help but be excited.

A 50% chance of success was not low at all. Moreover, he had never been a person who pursued stability in everything. When it was time to fight, he would fight. He would not hesitate at all in times like this.

"Lin Yi lil bro, it's good that you have this drive, but ..." Tian xingdao paused, hesitating, ""It's just that this process is still very dangerous. Just like what I told you before, when we cultivate the creation battle technique, the breakthrough process is very painful and difficult. It's unbearable, especially when this is continuously breaking through the barriers. Ordinary people simply can't bear it, and once they can't hold on, it's very likely that they'll end up like me before, with their meridians crushed ..."

Chapter 4136 The Usage Of The Star Inkstone

"Brother Tian, you can't just look at the bad side of everything, you also have to look at the good side, right? a 50% chance, I might not be so miserable, right?" Lin Yi said with a confident smile.

"If you can succeed, that'd be for the best. With the star inkstone and your potential, I bet you'll become the strongest golden core stage master. No one in your level will be able to fight you!" Tian xingdao's eyes were burning, but he was still a little worried. ""But you have to understand that even though your medical skills are superb, there is a saying that doctors can't treat themselves. Once you fail and end up with all your meridians broken, I'm afraid no one can save you ..."

As much as Tianxing wanted to recover his strength and use the Golden core, he didn't want Lin Yi to risk breaking through just for him. After all, it wasn't a joke-the consequences would be unimaginable if Lin Yi failed, and it'd be useless to feel guilty.

"Big brother Tian, cultivation is a heaven-defying thing. Wealth comes from danger. Since there's a 50% chance, I have to give it a try!" Lin Yi said firmly after some thought.

Lin Yi was afraid of the consequences of breaking his meridians, but he wasn't too worried. After all, the creation battle tactics he was training in was different from Tianxing's original version. The process of breaking through wasn't as dangerous as Tianxing said, and even if he failed, his meridians might not be broken. Even if his meridians were broken, his Qi would be gone, and junior Zhu would still be there. Self-recovery wasn't a big deal!

Moreover, there was still a 50% chance this time. If he still hesitated and didn't even have this bit of courage, then he wouldn't be able to dream of going further in the future. He might as well hurry and find a way to hide back in the secular world and live a stable life.

"Since you're so insistent, then I won't say anything more. Today, let's have a good chat about my experience in breaking through in the past. Oh, that's right, and also how to use the star inkstone." Tianxing nodded. He'd been a man of spirit back in the day, and he admired Lin Yi's decision.

"Thank you, big brother Tian." Lin Yi accepted the advice humbly. Breaking through to the Golden core stage was unknown realm, and it was beyond one's level. One could imagine how difficult it was. Now that he had the chance to learn from a legendary master like Tian xingdao, it was definitely more valuable and effective than any other rare pill.

He'd spent the whole night talking to the two, and Lin Yi had learned a lot from them. They didn't just give him the method to reach golden core, they'd also given him a lot of valuable experience.

With Tian xingdao's current strength, he could talk about how to break through to the Golden core stage from a higher perspective. Compared to his own exploration back then, what he was teaching Lin Yi now not only had a higher chance of success, but it also allowed Lin Yi to dig out more potential than ever!

After adjusting his body to its peak condition, Lin Yi decided to go into closed-door training to break through. As for the heavenly elixir Pavilion, he'd already made quite a lot of elixirs these days, enough to last for a while. He believed that Tian Gang and Xue Li would be able to handle it.

However, Lin Yi didn't try breaking through using the path of heaven's movement method right away after he went into seclusion. He wanted to confirm it with the ghost first. After all, this person was a Super Master, and it was a ready-made one. It would be a waste not to ask.

"Senior, I'm sure you've heard big brother Tian's words before. Is there anything else that I need your guidance on?" Lin Yi asked.

"Hehe, Tianxing is one of the few Masters in Middle Island. With him personally guiding you to break through to Jindan, how could there be any mistakes? He's a human and I'm a spirit beast, so he has the most say in this kind of matter. Moreover, he cultivates a creation battle technique. I haven't even come into contact with this aspect, so I can't say anything at all. " The ghastly thing laughed.

"Then ... I'll start preparing for my breakthrough." Lin Yi nodded.

"Hold on, I can't say much about the creation battle art. However, he didn't tell us how to use the star inkstone completely. If we do as he says, although it's not impossible, we definitely won't be able to unleash the full effects of the star inkstone." The ghastly thing suddenly interrupted.

"Oh?" Lin Yi was taken aback. Tian xingdao told him that the star inkstone contained the power of the stars, and that as long as he absorbed it during the breakthrough, the Golden core he formed would be far more stable and tough than other golden core Masters. Be it attack or defense, it would be much stronger than other Masters of the same level.

"Actually, you can't blame Tian Xing Dao for not being able to explain everything. After all, the star inkstone is extremely rare. As a human cultivator, it's already very rare for him to know so much. However, according to his method, at most, he can only develop half of the effects and can't be considered a perfect breakthrough." The ghostly thing said.

"Then what is considered a perfect breakthrough?" Lin Yi quickly asked.

"Of course, we have to fully exploit the star inkstone's power to make a perfect breakthrough. Although the star inkstone is a meteorite, it is a combination of the meteorite and the vast ocean. Not only does it contain the power of the stars, but it also contains the power of the ocean!" The ghostly thing explained.

"The power of the ocean?" "The power of the stars can make the Golden core tougher and more stable, but what's the use of the power of the ocean?" Lin Yi asked.

"The so-called ocean can contain all things when it's still, but when it's moved, it can cause huge waves to surge into the sky. Therefore, the power of the ocean can allow your Jindan to have more variables and more possibilities. More importantly, it can make your spiritual sense far more refined and powerful than experts of the same level!" The ghostly thing paused and said, "if the power of the stars increases the hard power of your golden core, then the power of the ocean increases the soft power of your golden core. Only by having both soft and hard power can you achieve a perfect breakthrough."

"I see. Then how can I absorb the power of the ocean? just like absorbing the power of the stars, can I condense it with my true energy?" Lin Yi asked.

"Of course not. The power of the ocean is not as hard as the power of the stars. You can't grasp it with your true Qi. You have to use your divine sense to gather it." The demonic thing taught. He was a Grandmaster in the primordial spirit area.

Only then did Lin Yi understand. Under the guidance of the ghost, he started to break through to the Golden core stage!

.....

Nakajima was at the cultivator college.

On the middle Island, in addition to the various major sects and forces, there was another force with an extremely transcendent status, which was the cultivator college.

Looking at the entire Middle Island, the cultivator college was undoubtedly the highest level college. Almost all the core disciples of the big sects would come here when they were in the Golden core stage.

Chapter 4137 Running For Vice Island Master

Here, not only was there the guidance of the long-standing Chancellor of the Academy, but if one could successfully graduate here, there was also a chance to be guaranteed to be sent to the eastern island for further study. Once they returned and returned to the sect or family, they would definitely become a popular candidate for the next core figure.

In fact, at least seven out of ten of the top bosses on the middle Island had the qualifications to study in the East Island. Therefore, if they had the opportunity to go to the East Island, it meant that they would have a meteoric rise, which was the best opportunity that all cultivators could only dream of.

Recently, the cultivator college welcomed an exciting event. That was their High Chancellor, Nantian Aurora Polaris, had recently successfully broken through the realm of the full circle of the original level and was promoted to one of the few Masters of the xuansheng stage on the middle Island!

A master of the xuansheng stage was already at the top of the Sky Class Island. Otherwise, Tian Xing Dao, who was only at the peak of the original level, would not have been able to become the Deputy Island master of the middle Island.

Of course, the Tian Xing Dao's ability to kill those of a higher cultivation level could not be judged with common sense. However, this was enough to show how much they treasured the xuansheng stage experts.

The appeal and influence of any master in the xuansheng stage was absolutely not to be underestimated. In recent years, with the continuous rise of the status of the cultivator colleges in Nakajima, the right to speak naturally also continued to expand. The voices of choosing college representatives from among them to become the Deputy Island master of Nakajima had recently been rising like the tide.

Coincidentally, due to the many years of absence of the heavenly path, the position of vice Island master had been vacated, which provided the best opportunity for the cultivator college to enter the top circle of power in the middle Island.

Originally, the Dean was the most ideal representative figure. Regardless of strength or status, he was absolutely worthy of the position of Deputy Island master. However, this person had the same virtue as

the God of alchemy Zhang Liju, who had always been elusive. He was neither suitable nor interested in the position of Deputy Island master.

In addition to him, there were only two people in the entire cultivator college who had the qualifications. One was the managing Vice Principal, lang qiufeng, and the other was Nantian Aurora, who had been appointed as the vice principal because he had just broken through to the xuansheng stage.

Although there were also xuansheng stage experts among the rest of the group, if they wanted to represent the cultivator college and become the Deputy Island master of Nakajima, they would need unparalleled influence and connections. It was not just about strength.

As for lang qiufeng and Nantian Aurora, who were the most popular, although the former was stronger, he was a genuine scholar and martial fanatic. He knew nothing about tactics and tactics, and was far from being as good at studying as Nantian Aurora. If there were no accidents, Nantian Aurora, who had just advanced to the xuansheng stage, had a higher chance of winning!

In the core residence of the cultivator college, in a secret room, two people were sitting opposite each other. They were drinking and chatting.

These two people were familiar faces to Lin Yi. One was Nantian Aurora, Chancellor Nantian who once went to the secular world. The other was si tsunami, who just became the North Island manager of the central Chamber of Commerce.

"Congratulations, old friend Nantian. Not only have you grown stronger this time, but you've also become the Vice Dean as you wished. Come, come, come, I'll drink first as a form of respect!" Si tsunami toasted him with a happy face.

"Haha, manager si, you're being too polite. If it wasn't for your central Chamber of Commerce providing me with millions of spiritual jades to buy the votes of these Academies, I wouldn't have been able to become the Deputy Dean so quickly, let alone so smoothly. So, I should be toasting you with this cup to express my gratitude!" Nantian Aurora Polaris laughed proudly. He clinked glasses with si tsunami and drank the wine in one go.

"Old friend Nantian, your words are too serious. Our friendship is mutually beneficial. There's no need to thank me! You're treating me like an outsider, so I'll have to punish you with a drink!" Si tsunami said, pretending to be unhappy.

"Alright, alright, alright, I'll accept my punishment, I'll accept my punishment!" Nantian Aurora Polaris chuckled and drank a cup of wine.

"That's more like it. When I was still in the Hong Chamber of Commerce, didn't you, my old friend Nantian, also specially pull people to purchase a large number of orders from the Hong Chamber of Commerce in order to help me become the manager of the North Island branch? I'll remember all these favors in my heart, and I won't forget them in this life!" Si tsunami patted his chest and said.

"Hehe, we've been old friends for so many years. You just said that I'm an outsider, but now it's your turn. You have to drink as punishment!" Nantian Aurora said with a smile.

"I admit it, I admit it!" Si tsunami laughed and said, "Now that I'm the North Island shopkeeper of the central Chamber of Commerce, I can have as many spiritual jades as I want and have great autonomy. It's not a problem for me to use as many spiritual jades as I want, so I have to repay you! This time, my old friend Nantian, you are competing for the position of vice-Island master. My boss has said that our central Chamber of Commerce will definitely support you!"

"That's great!" Southern sky Aurora was overjoyed. Although the central Chamber of Commerce was a newly rising Chamber of Commerce, its power was comparable to the top Chamber of Commerce, such as the five elements Chamber of Commerce. He had seen it with his own eyes.

To be able to obtain the full support of the central Chamber of Commerce, Nantian Aurora Polaris believed that the competition for the position of Nakajima Deputy Island master could be said to be in the bag.

"I believe that with the power of our central Chamber of Commerce and your ability, old friend Nantian, you will definitely be the Vice-Island master of Nakajima. Come, let's celebrate in advance. Let's go!" Si haixiao vowed.

"Alright, let's have a go!" Nantian Aurora Polaris was elated. He had been looking forward to this position for many years, but he never dared to think too much. Now, his dream was about to come true.

"However, there's something I have to tell you in advance, my old friend Nantian. If you succeed this time, you'll have to come with me to visit our boss. Do you have any problems with that?" Si tsunami suddenly said.

"No problem, no problem at all. In the future, your central Chamber of Commerce and I will be on the same boat. This is what I should do." The southern sky Aurora agreed.

"Well, that's good. I was afraid that you wouldn't be happy ..." Si tsunami laughed. He knew his boss's means well. If southern sky Aurora really went to meet him, they would be on the same line in the future. No one could escape.

Nantian Aurora Polaris was still completely unaware of this. With his brain, although he was not completely unguarded against this mysterious central Chamber of Commerce, he was blinded by greed. He was now completely immersed in the excitement of becoming the Deputy Island master of Nakajima, which was a glorious position that countless cultivators dreamed of.

There was a quota for the position of Nakajima's Deputy Island master, and it had long been filled, so there was no extra position.

Chapter 4138 Perfected Foundation Establishment!

There had been no change over the years. Even though the voices of the cultivation schools being selected had always been very high, it had never been true.

Therefore, even if he, Southern Heaven Aurora, managed to break through to the mysterious Ascension stage, he could only dream of it. He would never have the chance to win.

However, there were always accidents. Tian Xing Dao's injury and long-term absence had caused his position as the Vice Island master to be on the verge of collapse. Not only did this give everyone an excuse, but it also gave the southern Heaven Aurora a glimmer of hope to replace him.

With the support of the central Chamber of Commerce, Nantian Aurora Polaris was determined to get the position of Nakajima vice-Island master!

While southern sky Aurora and Si tsunami were plotting for the Vice-Island master position, Lin Yi was busy breaking through in the heavenly elixir Pavilion.

As long as Lin Yi could successfully break through to the Golden core stage, he would be able to make a golden core for Tianxing. As long as Tianxing's strength could recover in a short period of time, then with

his strength that could kill xuansheng Masters in seconds, no one would be able to covet his position as Vice-Master. In the face of absolute strength, all schemes and tricks were just jokes.

Of course, all of this was based on the premise that Lin Yi could successfully form his core. The difficulty and risk of breaking through from the peak of the late Foundation Stage to the Golden core stage wasn't something that just anyone could handle.

Lin Yi's first phase of practicing was pretty smooth. After adjusting his body to its peak, the first thing he did was to take three Supreme-grade foundation-level golden pills!

In a short moment, the strength of Lin Yi's pure Qi increased by a whole level, instantly breaking through the peak of the late Foundation Stage and approaching the full foundation Stage.

In the foundation building realm, every peak was an extremely difficult threshold. It was the same from the peak of the early stage to the middle stage, from the peak of the middle stage to the late stage, and from the peak of the late stage to the completion.

Fortunately, Lin Yi had quite a few high quality foundation Stage golden pills. Exquisite heart-eating grass was rare in the North Island, but it was very common in the middle Island. Cai Zhongyang helped Lin Yi get some more. In addition to his own talent and Foundation, this threshold that had been stuck for decades or even a lifetime was almost broken through in his hands.

If he stopped now, he'd be a true foundational Paragon, but this was only the most basic preparation for someone who was aiming to break through to the Golden core stage-it wasn't even the appetizer.

And then, without waiting for the Qi in his body to stabilize, Lin Yi started on the second step, which was the most important step of this breakthrough-taking a Supreme-grade golden core!

This was a method given to him by the heavenly path sect. It was called "in one go," he would make use of the momentum from the successful breakthrough to the perfected Foundation establishment realm and take advantage of the time when the true Qi in his body was at its peak to break through to the Golden core realm in one go.

This was the reason why Tian Xing Dao suggested Lin Yi to jump levels to reach golden core. Although it seemed like the risk was much higher than doing it step by step, the truth was that for a true genius, the success rate would be much higher!

Having just reached the Foundation Stage, the zhenqi that had just burst out of the body was still unstable. It was still at its most active and also the most vigorous. At this time, the possibility of breaking through the Jindan in one go was far higher than doing it step by step.

This was because once the true Qi in the body had completely stabilized and the drive had been completely lost, although it was easier to control it 100%, it would also lose its momentum.

At that time, the foundation establishment state would be completely stabilized, and the zhenqi in the body would no longer be an aid to break through to the Jindan stage. Instead, it would become a real obstacle to the breakthrough because of the inertia and inertia of the current situation.

Lin Yi thought the theory of breaking through levels was unbelievable at first, but after thinking about it, it seemed to make sense. As long as one's Foundation was strong enough, and they had enough potential, breaking through in one go did seem easier than doing it step by step.

This was the so-called "geniuses don't walk the ordinary path." Of course, if one didn't have any theoretical basis and rashly walked blindly, then one wouldn't be a genius, but a complete idiot.

Lin Yi's eyes opened wide as soon as he took the Golden core. The pure Qi in his meridians had more than doubled, and it was still increasing. The terrifying pressure hit his meridians and wreaked havoc in all directions.

Lin Yi felt like he was a balloon that was still being pumped full of air, ready to explode at any moment.

It was not an illusion, but a real instinctive warning from the depths of his body after encountering extreme danger!

Although the Golden core and the Foundation Stage golden core were the same type of medicinal pills, one was a fifth-grade pill, while the other was a fourth-grade pill. The gap between them was too big, especially for the Masters of the Foundation Stage, the meaning of the two was like heaven and earth.

The foundation establishment golden core could increase the strength of their true Qi by 20%, but the Golden core could double the strength of their true Qi, or even more!

An increase of 20% was an improvement within the scope of control, but an increase of two times was too exaggerated. If it was not handled well, it could really kill people.

Especially since Lin Yi's creation battle technique was an extremely strong and violent technique, the impact and damage of his pure energy were much more powerful than normal people. Plus, this was a breakthrough, so his pure energy was extremely sharp. This was even more deadly.

Breaking through to the gold core realm was very likely to encounter the danger of all the meridians being broken. Tian xingdao's words were not as simple as he had said them casually.

And this was after Lin Yi used the art of Dragon mastery to modify it. If it was the original version with a lower stability, it would be unimaginable.

It was no wonder that even a legendary figure like Tian Xing Dao had a lingering fear of this, and even fell when he finally broke through to the nascent soul realm. It was not an injustice at all.

With the meridians in his body at risk of exploding, veins popped out on Lin Yi's forehead. He used his strong willpower and control to start guiding the chaotic Qi in his meridians into his Dan Tian.

According to what Tian xingdao had said, the dantian was the place where the core was formed. To form the core, one must first guide the powerful genuine Qi throughout the meridians into the dantian. This was the most dangerous step in the entire breakthrough process, and also the key step that had no other shortcuts.

If he could withstand it, then he could begin the next step of core formation. If he couldn't withstand it, then his meridians would most likely be shattered, and in more exaggerated cases, his body might even explode and he would die.

Chapter 4139 A Problem

Sweat was pouring down his forehead, and his eyes were bloodshot. Lin Yi gritted his teeth and held on. One step forward wasn't heaven, but one step back was hell.

In this state, not only could his meridians explode at any time, but he was also only a fine line away from Qi deviation.

This went on for an hour, and Lin Yi used his inhuman willpower to channel all the terrifying Qi that had swelled up because of the Golden core into his dantian.

In the eyes of ordinary people, it was only an hour, but to Lin Yi, it felt like half a century. Fortunately, he finally made it through.

However, this was far from the time to relax. Up until now, everything he had done was just preparation work. He had guided all the true Qi into his dantian. The next thing was the real thing, which was to form the Golden core.

The biggest difference between the so-called Jindan stage and the foundation establishment stage was that the Golden core would be condensed in the dantian. This golden core would become the source of all the true Qi in the body. It was the symbol of the qualitative change from the foundation establishment stage to the Jindan stage. At the same time, it was also the life of all the Jindan stage Masters.

The process of condensing the Golden core was extremely difficult, but also easy, because it didn't have many skills to speak of. It was just to continuously condense and compress the huge amount of Zhen Qi that had been guided into the dantian before until it finally condensed into a solidified Zhen Qi crystal. This was the Golden core.

Generally speaking, those who could successfully bypass the most dangerous process of true energy infusion would rarely fail in the step of forming the Golden core. However, even if everyone formed the Golden core, the gap between them was like heaven and earth. This step would directly determine the future strength and potential.

Some Jindan experts have a hollow golden core and are called xudan. Among all the Jindan experts, they are naturally the weak ones at the bottom. There are also Jindan experts whose golden core is as hard as stone and are called solid core. Among all the Jindan experts, their strength is naturally the top.

Even if everyone practiced the same martial arts technique, the power of a solid core expert was far stronger than that of a xudan expert. The root of all this was the quality of the Golden core that was condensed at this moment.

Therefore, although the step of condensing the Golden core was not as dangerous as before, it was the most crucial step that no one dared to take lightly. Once they relaxed or were careless at this time, they would not be able to make up for it.

No ambitious master would want to form a void core-only a solid core could help them advance and become one of the strongest Masters. However, what Lin Yi wanted to do now was different from the others.

What he wanted to condense was not a solid core, but a 10000-dollar golden core!

A normal solid core would have a golden core as hard as a rock, but Lin Yi's ten thousand beauty golden core was even harder than that-it was as hard as meteorites!

And all of this would have to depend on the star inkstone's effects. Only during the process of forming the Jindan would one be able to absorb the power of the stars and the ocean at the same time. Only then would one be able to form a true ten thousand beauty Jindan. Only then would one be able to make a perfect breakthrough and become the strongest Jindan expert!

As he controlled the Qi in his dantian and made it condense, Lin Yi had to do three things at the same time. He used a part of his Qi to grab the star power in the star inkstone and guide it into his own dantian. At the same time, he had to control his spirit sense to gather the ocean Power and guide it into his dantian.

multitasking three things at once was an extremely difficult task for anyone. if there was even the slightest mistake in the process, it would lead to a failure. at best, one would not be able to form a ten thousand beauty golden core. at worst, one would fail to form a golden core and even regress in strength, never having the possibility of a breakthrough again.

however, lin yi didn't seem to be forcing himself at all. instead, he seemed to be in an orderly and steady state.

apart from lin yi's natural talent, there was also the damned thing that contributed to this. foundation level practitioners generally didn't know how to use spirit sense-the hardest part of multitasking was using spirit sense to gather the ocean's power. if it wasn't for the guidance of a grandmaster, lin yi wouldn't have had such an easy time.

at this point, forming the golden core was the final step. lin yi thought that this breakthrough would be smooth-sailing until he formed the ten thousand beauty golden core and achieved the perfect breakthrough, but he realized that he was too naive.

Forming the Golden core in his dantian wasn't a problem, and using his spirit to gather the ocean's power was the most difficult step, but it wasn't a problem either. What surprised Lin Yi was that the seemingly simple step of gathering the stars "power had a fatal accident!

The moment the power of the stars was guided into the meridians, a huge opening suddenly appeared in the meridians. It actually split open directly!

The extreme pain and the shock almost made Lin Yi lose control of his body. The Qi that was gathered in his dantian flowed back into his meridians, and he was about to suffer from Qi deviation.

Fortunately, Lin Yi reacted at the last moment and forced his Qi back. At the same time, he used his practitioner's Arts to repair his broken meridians. However, he didn't dare to continue taking star energy from the star inkstone.

The special characteristic of the power of the stars was that it was extremely sharp and violent. The reason why his meridians split open was because they couldn't withstand the sharpness. This wasn't something that could be done by gritting his teeth. If this continued, Lin Yi believed that his meridians would be destroyed by the power of the stars before he could form the ten thousand beauty golden pill!

Lin Yi couldn't help but feel lucky that he had channeled the star energy through his meridians, giving him a chance to heal himself. If he had channeled it into his Dan Tian without saying anything, it wouldn't have been his meridians that would've been split open, but his Dan Tian.

Once one's dantian was crippled, there would be no chance of salvaging it. One would be reduced to a complete cripple.

But even if it didn't cause such a tragedy, Lin Yi didn't know what to do. The damn thing had taught him how to use the star inkstone, but he hadn't used it himself, so he couldn't know the details.

There were only two choices left for Lin Yi. One was to give up on the star inkstone and form his golden core. This was the safest way, but the price was that he wouldn't be able to break through perfectly.

As for the remaining option, he could bite the bullet and continue to grab the power of the stars. However, the final result would most likely be a failure in core formation and he would become a cripple!

Lin Yi gritted his teeth and pondered for a while. He wasn't willing to go with the first option, but the second option was too dangerous. He'd be digging his own grave if he couldn't think of an effective solution.

Chapter 4140 The Strongest Golden Core Stage Expert

Suddenly, a light bulb went off in Lin Yi's head. The star energy was as sharp as a weapon, and he couldn't just channel it into his body, but it wasn't like there was no other way.

At the end of the day, the reason why the power of the stars could hurt the meridians was that it was impossible to completely control it by simply using genuine Qi to wrap it. However, what if it was refined outside the body and then absorbed into the body?

This might seem like a fantasy to outsiders, but it wasn't impossible for Lin Yi-he was an Alchemist!

As long as he controlled the heat well, Lin Yi could refine the star energy outside his body and then absorb it into his meridians.

Lin Yi put his thoughts into action and used his alchemy skills to refine the star energy outside his body. He tried it and it worked!

Time passed by slowly, and it had been three days and three nights since Lin Yi started his retreat.

Tianxing, tianshuo, and Xue Li were waiting outside the door nervously. Hou guanqi and Cai Zhongyang came over every morning and night after hearing the news, afraid that Lin Yi would get into an accident. After all, breaking through to the Golden core stage was not easy, and it was even more dangerous to cross levels. Accidents could happen.

For a closed-door training to break through to the Golden core stage, three days was not a long time. However, as time passed by, Tian xingdao still felt inevitably uneasy. After all, the longer the time was delayed, the more difficult the process would be, and the higher the possibility of an accident.

In the end, Lin Yi only decided to break through early because he wanted to make the Golden pill for him. If he really went into Qi deviation, Tianxing Dao would live in guilt for the rest of his life.

Tian xingdao ordered two jars of wine and set up a table outside the door. He had just filled a glass when Lin Yi's voice came from behind him, "Big brother Tian is in such a good mood, why didn't you wait for me to drink with you?"

"Lin Yi lil bro, you ... You succeeded?" Tian xingdao turned to look at Lin Yi, who was like a completely different person. He was both surprised and happy.

"This is all thanks to you, big brother Tian. If it wasn't for you teaching me everything, I wouldn't have been able to go so smoothly this time." Lin Yi chuckled.

"Perfect breakthrough, the strongest Aurous core stage expert, truly extraordinary!" Tian xingdao's eyes lit up as he studied Lin Yi.

In the past, Lin Yi was just a harmless little friend in his eyes, but now, Lin Yi's new Aura made him feel a faint threat. Even if his strength hadn't recovered yet, he was still a peak Jindan!

Tian xingdao couldn't help but sigh in his heart. Where did this little brother of his come from? he was even more abnormal than he was back then!

Even if it was a perfect breakthrough, the so-called strongest golden core stage master was only invincible in the same level. It was impossible for an early golden core stage master to defeat a complete golden core stage master. But now, Lin Yi was doing it, and it made Tian xingdao feel a little shocked. It was unbelievable.

At this time, Tian Gang and Xue Li heard the sound and ran over, both of them looking at Lin Yi with surprise and joy, one on the left and one on the right, holding Lin Yi's arms.

In their eyes, Lin Yi's strength wasn't important. The most important thing was to live well. After all, he was their pillar of support.

"I'm fine. Sorry for making you worry. " Lin Yi smiled as he consoled the two girls before turning to Tian Xing."Brother Tian, I suddenly thought of something. The matter of refining the Golden core will have to be pushed back a few days, is that possible?"

"Oh? Of course, no problem. But what is it? do you need my help?" Tian xingdao was stunned for a moment, then he nodded. Although he was eager to recover his strength, he didn't care about a few days 'time.

"No need, but for the next few days, our heavenly elixir Pavilion will have to temporarily close down." Lin Yi smiled as he looked at the girls.

"Why? Aren't we doing fine?" Tian Gang and Xue Li were shocked.

"Although the business of the heavenly pill Pavilion is important, but Xiao mo and Xue Li, don't you think that you're not strong enough?" Lin Yi said with a meaningful smile.

"Ah?" Tian Gang and Xue Li couldn't help but look at each other. Tian Xing, who was at the side, was even more confused.

"Let's go into closed-door cultivation together. " Lin Yi smiled faintly.

The sudden suggestion was a flash of inspiration. Tian Gang and Xue Li were only at the early Foundation Stage, the lowest level of existence in the middle Island. Even with the heavenly pill Pavilion, it would be hard for them to gain a foothold in the future if they only had this much strength.

Lin Yi's top priority now was to help the two increase their strength. He'd already given them Foundation Stage golden cores, but it was hard to see the effects in a short time.

Lin Yi, on the other hand, suddenly thought of a way to quickly help the two increase their strength. Back in the common world, he could already help his other female friends and followers forcefully increase their strength.

The same method might be effective now. He was now an early jiedan stage master, so could he raise the strength of Tian Ji and Xue Li to the foundation establishment realm?

This experiment was very important-it was directly related to how Lin Yi was going to develop his forces in the future. That was why he suddenly asked the two girls to go into isolation with him.

After listening to Lin Yi's plan, Tian Gang and Xue Li were both surprised and happy. After coming to Sky Class Island, the two of them had learned the importance of strength.

Femme fatale-they needed to at least have the strength to protect themselves, and only then would they be able to avoid causing too much trouble for Lin Yi.

The test began, and Lin Yi used the same method as he did in the common world-he circulated the art of Dragon mastery and transferred his Qi into the girls.

As expected, Tian Gang and Xue Li were surprised to find that the Qi from Lin Yi's hands was slowly merging with their own Qi, and their strength was also increasing!

This result made Lin Yi very excited-from a certain perspective, this discovery was as valuable as his own golden core breakthrough.

This meant that as long as Lin Yi was strong enough, if he wanted to, he could turn his friends and followers into practitioners, just like when he was in the common world!

If Lin Yi was the only strong one, the others would only be a little afraid, but not too much. After all, no matter how strong a person was, they still had their weaknesses, especially if his friends and followers were all weak. It was a fatal spot that they couldn't avoid.
