

Bodyguard 6361

Chapter 6361 The Conference Begins!

"That's not possible! Aren't you underestimating me, ao Tianba?" Ao Tianba immediately shook his head in denial with a hint of pride on his face.

"Brother ao Tian, don't mind her. LAN 'er likes to joke and talk nonsense." Lin Yi breathed a sigh of relief and quickly tried to smooth things over. Although ao Tianba might not care, Shangguan LAN 'er's words still made things difficult for him.

"It's fine, it's fine. I've been in the industry for so long, how could I be at the bottom? You should at least be ranked 19th!" Ao Tianba laughed dryly, feeling a little embarrassed at the end.

The difference between the 19th and 20th place ... Was so big ...

Shangguan LAN 'er was already covering her mouth and laughing, and Lin Yi didn't know what to say. He was ranked 19th, and he wanted to fight for the top two. Ao Tianba was really ambitious.

"Those who are able to enter the top 20 should not have a big difference in the strength of their fleets. The victory and defeat of each other still depends on factors such as timing, location, people, and so on. Therefore, the gap should not be as huge as the ranking." Zhang jinmiao spoke at the right time. She wasn't spouting nonsense, and she was indeed insightful."Plus, Lin Yi, you're here now, aren't you? Captain ao Tian's chances of winning have increased a lot. It's not impossible to get one of the two spots, right?"

"Dean Zhang is right, I think so too! No wonder you're the Dean of the Feiyang college in the mystic division Sea area, you're so knowledgeable. " Ao Tianba suddenly felt that Zhang jinmiao was really his confidant! He smiled and cupped his hands to show his gratitude.

"Captain ao Tian, you're too kind. I'm just telling the truth." Zhang jinmiao waved her hand with a smile. She only thought highly of Lin Yi-the kid was one of the best geniuses she'd ever seen, and there was something about him that seemed to be able to solve anything.

It was because of this that Zhang jinmiao felt extremely fortunate that she was able to bring Lin Yi back to Feiyang college. Ao Tianba asking Lin Yi for help was the best choice in Zhang jinmiao's eyes.

As they chatted, ao Tianba introduced the other fleets to Lin Yi and the others. Gu Yunhao was ranked fifteenth, which wasn't considered strong among all the fleets, but Lin Yi was frowning. After all, Gu Yunhao had three large warships and an ancient warship, but he was only ranked fifteenth. It seemed that the fleets ahead were even stronger.

As expected, after entering the top ten, the combat power of the fleet increased greatly. The tenth place had two ancient warships and four large warships, excluding the treasure ship for the time being. If it weren't for Lin Yi's control of the ancient ship's formation, ao Tianba wouldn't have been able to fight back at all. He'd be crushed to death in the ocean.

Although there were differences in ancient warships, and ao Tianba's ancient warship was one of the more outstanding ones, it could not compete with the number of warships the other party had!

"Brother ao Tian, I've always wanted to ask you this. I thought ancient battleships were extremely rare treasures. Why are there so many of them now?" Lin Yi couldn't help but ask ao Tianba quietly-were there really that many ancient ships?

"It's very rare! There are less than 70 ancient warships in all the fleets and the major islands. It was by chance that I got one. Although the top 20 fleets have ancient warships, the quality and combat power of my warship are top notch!" Speaking of his own battleship, ao Tianba was quite proud. This was also why he dared to compete for the top two.

" 70 ships ... That's quite a lot!" Lin Yi was speechless. If seventy ancient warships formed a fleet, a normal sea beast tide wouldn't be a threat at all! Unless it was a sea beast tide during the mountain opening period, it would be invincible in the entire sea region.

However, with the huge number of sea beasts, it was not impossible for them to form a sea beast tide during the opening period of the mountain.

Lin Yi looked around and didn't see anyone he knew other than Gu Yunhao. He was wondering if Xia luoluo's family would come. After all, she was the ship king of the south Island. It seemed that her family could only be called King in the southern sea and was nothing in the entire Sky Class Island.

The entire South continent had always been the territory of the spirit beast clan. The human clan was too weak, so it was not a big deal to take the ship king of the south Island outside.

As they spoke, most of the people who were supposed to be here were already here. The representatives didn't sit in order, but formed a semi-circle with a platform at the back of the center. Everyone could see what was happening on the stage, and Lin Yi felt like it was a Grand Theater in the secular world. The platform in the center was the stage, but their seats were at the edge of the semi-circle, one of the worst seats. As for the nineteenth place, there was nothing they could do about it ...

"I welcome all Fleet Captains to participate in this route distribution meeting!" After the twenty fleets had arrived, a spirited old man came up to the central platform and began to speak to everyone.

"This is the Vice President of the Sky Class island's yellow Class sea route management Association, he Hao. He's someone with power, and he's impartial. He's quite fair in the distribution of routes, but he's a bit talkative ..." Ao Tianba didn't dare talk to Lin Yi out in the open, so he used voice transmission to communicate with Lin Yi. He didn't want he Hao to overhear it, and he'd be pissed off.

Lin Yi couldn't help but smile. He had seen Hao talk a lot, and he thought that he'd get to the point after a few formalities, but he didn't expect Hao to ramble on for an hour. He almost told the whole history of the conference. Even first-time people would be old birds after hearing it.

Fortunately, none of the people present were ordinary people. In just an hour, everyone was able to maintain their posture and listen with smiles on their faces. He Hao paused for a moment when there was an exciting part and even applauded in tacit understanding.

Lin Yi decided to just treat it as a common talk show. It wasn't that interesting, but it was fine.

An hour later, he Hao was finally done. Lin Yi thought it was time to move on to the main topic. He did not expect he Hao to start hosting the opening ceremony of the conference again. Although it was not a complicated ceremony, in he Hao's hands, half an hour had passed.

Lin Yi only just remembered what ao Tianba said about finishing the ritual and talking nonsense ... Fine, it seemed like the most important thing was to start after the nonsense, right?

Chapter 6362 Virtual Trade Competition

No matter what, when Lin Yi was about to fall asleep, he Hao finally finished the ceremony without any more tricks. This time, everyone applauded sincerely.

"Alright, I'll just say a few words today. If you're interested, you can come and chat with me in private." He Hao said this with a smile, which made everyone's face turn black. Then, they began to imagine what it would be like to chat with him in private.

After a cold shiver, everyone felt that it was better not to think about it. Focusing their minds on the upcoming competition was the right way. They couldn't be distracted!

"The first competition of this conference is virtual trade!" After he Hao mentioned virtual trade, he paused for a moment and looked at everyone's surprised expressions with satisfaction.

"I've never heard of this virtual trade!" Ao Tianba scratched his head. Although the events of each conference were basically not repeated, most of them could be understood at once, but this time, he did not understand.

Lin Yi's head hurt. He didn't know what virtual trade was, but he didn't feel good when he thought about how he had to listen to he Hao's explanation of the rules. Would it take another hour?

Lin Yi wasn't the only one who had that thought-everyone who heard the words "virtual trade" had the same thought in their minds-uncle he, you could've just gone down for a drink and rest, leave this to someone else!

Unfortunately, he Hao didn't feel like he needed a drink or a break. He started with the idea of virtual trade, then talked about how to realize virtual trade, how everyone would complete the competition, how the conference would decide the winner, and the arguments and considerations involved.

Another hour passed. Although he Hao didn't mention any rules, everyone clearly understood what the rules were. Everyone was still very interested in the virtual trade. What they were more interested in was when it would start.

"The purpose of the competition is to use an illusion array. The designer of this project is indeed a genius, especially when the 20 fleets enter the same illusion array but experience different scenes. In the end, they have to communicate with each other, which is almost the same as the real world. Amazing!" Lin Yi's array Dao was quite extraordinary, and he could naturally tell that this illusion formation was not simple.

Although there were ghosts around, Lin Yi couldn't use formations to deal with this project. It was easy to break the formation, but once they did, it would be a failure. They had to experience everything in the illusion formation honestly.

"Indeed! Moreover, this project is to test the trading ability of each fleet, not the strength of each fleet. It can be said to be quite fair and just, and our chances of winning are very high!" Ao Tianba's eyes were also shining. In terms of trade, he thought that he was quite outstanding. In just a few years, an ancient warship had developed into a fleet, which was the best proof.

In the entire 20 fleets, he was the weakest in terms of Foundation, but it also reflected his ability. A person who started from scratch, compared to those with inheritance, his trading ability was at least not inferior.

"That's right. Each of the 20 fleets will receive a flagship, a frigate, and three treasure ships. In addition, there will be 500000 spiritual jades as start-up capital and a port as a base. Each port will have a unique specialty. Within a year, the person who obtains the most specialty and capital will win and be ranked in order. The points will be obtained according to the ranking. Brother ao Tian, do you have a plan?" Lin Yi summarized the rules of the virtual trade. It was only a few sentences, and it was quite impressive that he Hao could talk about it for more than an hour.

"I have a preliminary idea, but it's not mature yet. For this competition, we first have to obtain the specialties of other ports, and then we have to prevent our opponents from obtaining our specialties. This seems to be a paradox. Using our specialties to exchange for the specialties of other ports, we can only compete in speed and see who is faster." Virtual trade was all about exchanging goods. If everyone exchanged specialties like this, they had to consider the speed and route of the fleet. They had to plan the route to get the greatest time.

The starting capital seemed to be used to buy specialties from other ports, but ao Tianba felt that it was not that simple. If he had the pricing power of his port specialties, even 500000 spiritual jades might not be enough to buy many specialties.

"Brother ao Tian, don't forget that an Alliance is always better than working alone. If a few guilds were to join together and trade with each other, they would definitely be able to maximize their profits. Furthermore, it is very likely to create a monopoly, and the number of guilds would only increase." Lin Yi squinted his eyes as his brain started working.

Ao Tianba's face turned a little ugly. As the third young master of the AO Tian family, he was not bad at networking. However, because he had left the family and did not rely on the family's power to develop, he had almost no friends in the top 20 fleets. On the contrary, his opponents were not just Gu Yunhao.

In addition, ao Tianba's ranking was very low, so even if others wanted to form an alliance, they wouldn't look for him. At most, they would treat him as cannon fodder. Such a status was something that the proud ao Tianba would never accept.

Others would eat the meat while he would drink the soup. He might not even get the soup. For ao Tianba, who was aiming for the top two, there was no need to consider it at all.

"Trade ultimately can't escape from war!" A hint of ruthlessness flashed in ao Tianba's eyes. The rules did not say that they could not attack and Rob each other. Therefore, this competition was not only about trading, but also about fighting.

The problem was that ao Tianba knew very well that without any allies, even the battle would be quite difficult. It was fine if it was a one-on-one battle, but if he were to face two or three or more joint fleets, he would not even have the chance to escape.

"Those Allied fleets will definitely start a war in the end to destroy the opponent. Isn't it more beneficial than letting the opponent get points?" Lin Yi nodded. The more the two discussed, the more he felt that this competition wasn't as simple as it seemed. There were too many variables, and the discussion now could only be said to be a preparation. There was no guarantee that they could deal with all the changes.

"Okay, okay, let's start the virtual trade competition. The time inside the illusion array is one year, but the actual time won't be that long. About two hours will be enough, so don't worry. If there's something, it won't delay you from coming out to deal with it." He Hao said with a smile, but he didn't know that everyone was crazily complaining in their hearts. It will end in two hours? If you'd stopped talking, we would've been in the second event by now, right?

Chapter 6363 Level-Nine Illusory Array Space

Let us start the competition before you explain the rules. We'll be back after you're done, right?

He Hao didn't care what they were thinking. After he finished speaking, some people from the Association ran to the center of the semicircle, put down a circular array disc, and started to activate it.

Lin Yi took a look and nodded to himself. This was a level nine illusion formation disk, and it looked quite old. It should be something passed down from the past, no wonder it could support the virtual trade competition.

After the level-nine illusory formation disk was activated, it began to emit a faint seven-colored light. Soon, it enveloped the people of the twenty fleets, but the platform was not affected.

Behind the 20 fleets, 20 water screens appeared out of thin air, showing different scenes. They should be what they would experience after entering the illusory formation. Because the time ratio was completely different, the images flashed extremely fast, and ordinary people could not see what was happening at all. However, he Hao's eyes flashed with interest. From time to time, he would swim around the 20 water screens, apparently able to grasp the situation of all the fleets at the same time and analyze it. Just this move alone was worthy of being the Vice President of the Yellow Sea route management Association. His reputation was indeed well-deserved!

On the other side, Lin Yi and ao Tianba didn't resist and were easily pulled into the illusion. They didn't even feel anything out of place and appeared on a dock.

"This is our base! It looks pretty good. " Ao Tianba looked around and nodded slightly. He was not satisfied, but he estimated that all twenty fleets had gotten more or less the same.

"Captain, your fleet's supplies have been replenished. Do you want to purchase the goods and ship them?" A thin man with a goatee came to ao Tianba's side and greeted him respectfully.

Ao Tianba, Lin Yi, and the others naturally knew the man's identity. He was the port's manager, and in theory, he was under ao Tianba.

"Butler Jin, tell us about the situation at the port first. I haven't been paying much attention to it recently. Are there any changes?" Lin Yi smiled, not bothering about the goods. He wanted to find out more about his base first.

"Yes, vice-captain! The defense and attack formations have been completed, and they can now fight against two fleets of the same combat power as our fleet. However, there is still room for improvement, but the cost will be greater, so it's not necessary for the time being. " Lin Yi and ao Tianba let out a breath of relief when they heard from Butler Jin about the port's defense.

Being able to fight against two fleets would at least ensure that their base would not be captured in the short term. When the other fleets joined forces, they might have the capital to continue to improve their strength.

"The stock of our special product, the exquisite Fishbone, is sufficient, so the price is relatively stable. With the captain's current funds, he can fill two half-treasure ships, and the empty space can also store more food and water. We still don't have information on the nearby ports, so if the captain wants to know, you can arrange for people to spy on them and then decide where to go." Manager Jin introduced the place in a business-like manner, giving Lin Yi and the others a general understanding of the place.

"Brother ao Tian, what are your plans now?" Lin Yi turned to ao Tianba-it was time to see what strategy he'd come up with.

The best choice was to immediately find other fleets to form an alliance. Under such an Alliance, at least they would not be easily killed.

However, ao Tianba was not familiar with the other fleets. If he rashly asked for an Alliance, he might be sold out by others. After all, they were all competitors. Who could guarantee that he would not stab him in the back without any friendship?

There were two other options. One was to use the war to sustain the war and invest all the start-up funds in the war, then develop and grow in the war. The other was to do honest trade and use speed to exchange for victory. One year seemed long, but in fact, it was not too long when it came to sailing. Perhaps it would be almost over after a round of 20 ports.

"Do you have any suggestions, lil bro Lin?" Ao Tianba rubbed his forehead. He couldn't make a decision for the time being, but he knew that there was no hope for him to make a mediocre choice. This event could be said to be quite fair, which was extremely beneficial to him. If he couldn't get a good result, the subsequent competitions would only get more and more difficult.

"I don't think normal trade will work!" Lin Yi saw it clearly as well. After a slight pause, he turned to manager Jin. "Butler Jin, are there any surplus ships that we can buy at the port?"

Ao Tianba paused for a moment before understanding what Lin Yi was trying to say. The starting capital wasn't necessarily for purchasing goods-it could also be used to strengthen the fleet, and buying ships was the best way.

"Yes, there's a large warship, but it's not a new one. It's a broken warship dragged in from outside. After some refurbishments, it was launched again. It was originally planned to be sold to other ports, but if the captain and vice-captain need it, we can buy it." The manager didn't even blink as he gave the answer Lin Yi wanted.

As expected, starting capital could not only be used to buy goods, but it could also be used as an arms race!

"Let's go and take a look!" Ao Tianba and Lin Yi looked at each other and made a decision.

No matter what, this was a choice!

The refurbished large warship was in a good condition, and its combat power was at least guaranteed. However, the price was not cheap. It cost seven hundred thousand spiritual Jade, and installments were not accepted.

Ao Tianba was rather straightforward. He directly used a treasured ship and 100000 spirit Jade to exchange for this refurbished large warship. Of course, this price could only be found in the illusionary realm. Where could one buy such a cheap warship in the real world?

Buying the warship was equivalent to deciding the future strategy. There was nothing else to think about. Ao Tianba divided the remaining spiritual Jade into two halves, half to buy a boat of exquisite fish bones, and the other half to keep as a reserve. Then, he led the group onto the ship and set sail.

On the bridge, ao Tianba and Lin Yi were studying the map of the ship. The ships here were all ancient ships, so there were no problems with using them.

"The positions of the twenty ports are marked, but we don't know which fleet is occupying these ports. There are ports in three directions around us, and the distance is about the same. It doesn't make a difference which one we choose." Ao Taba pointed at the sea Map. The port they were heading to was relatively the closest to ao Tatian port. However, there was a limit to how close it was. If the fleets from the other two ports set off at the same time, they would arrive at their destination at about the same time.

Chapter 6364 The Highest Level Of Battle Preparation

"The location of our port isn't very good. If all three parties choose to head to ao Tian port, it's very likely that they will form a temporary Alliance and completely conquer ao Tian port. So this time, we can't be friends with the port we chose. We must attack them immediately. We must not let the three parties have the opportunity to meet up." Lin Yi's face was extremely serious. Looking at the map, there were only two places with ports in all three directions, and they were very likely to be the first to be attacked.

"The port and the flagship have a device to communicate with each other. If either side is attacked, they will send a message in real time. Maybe we can quickly return to help when the port is attacked." Ao Tianba was referring to the ten thousand mile formation of the ancient warship. The distance between the two ports was not too far. If they sailed normally, they would be able to reach it in about ten days. If they used the ten thousand mile formation, they would probably be able to return to their own port after consuming more than half of the two hundred thousand spirit Jade in their hands.

Leaving behind two large warships to protect the two treasured ships on their return journey, although it was not too safe, it was not completely unacceptable.

"Let's talk about this later. There are risks in giving up the fleet. We'll decide when the time comes." Lin Yi waved his hand dismissively, not really agreeing with her.

Zhang jinmiao and Shangguan LAN 'er had no right to speak at all in this regard, and it was like a mountain was separated from another profession. The two of them, who had been completely reduced to spectators, immediately regretted coming.

Ao Tianba had only brought six of his trusted subordinates this time. He did not expect that the first project would be a virtual trade that required navigation. Although there were subordinates in the fleet that were generated by illusions, their abilities were definitely not comparable to the people he had brought.

Not only that, everyone's tacit understanding was also a big problem. If Zhang Jinmiao and Shangguan LAN'er did not come, Ao Tianba could bring two more subordinates. The difference between them was quite big.

"Aunt Zhang, if there's a fight, we might need your help. With a master like you, our chances of victory will be much higher." Lin Yi's sharp senses picked up on the unnatural expression on Zhang Jinmiao's face, and he immediately understood what was going on, so he pretended to casually bring her into the topic.

"Is there anything I can help with? There's naturally no problem with that. If there's anything you need, just say it." Zhang Jinming immediately smiled and couldn't wait to join the battle.

"Don't worry, Dean Zhang. We won't let you stay idle. The battles here are different from the ones in real life. Our goal is to obtain the enemy's supplies, so after a long-distance battle, we must engage in close combat." Ao Tianba was actually glad that Lin Yi brought Zhang Jinmiao along. Although she couldn't provide any help in naval fleet battles, a master at earth-creation realm was much more useful than a large warship if they wanted to take the enemy's ship.

After some discussion, they decided on the basic strategy of this voyage. If they did not meet the other fleet, they would go to the port to trade normally. Although they did not know the market, they thought that they would make a profit. If the other fleet directly sailed to the AO Tian port, they would have to stop the other party and see if there was any possibility of an Alliance. If not, they would go to war without any hesitation.

After five days of sailing on the sea, the anticipated enemy fleet appeared on the distant sea level. Sure enough, they also chose to head to the AO Tian port first. This choice was probably because they subconsciously wanted to join forces with the fleets of the other two ports, take down Ao Tian port in one fell swoop, and completely get rid of a competitor.

"Prepare for the highest level of battle!" Ao Tian stood on the bridge and gave the battle preparation order with a blank expression.

Although they didn't know which fleet the other party was from, no one would relax their vigilance at this time. Before knowing whether they were friend or foe, they would only be killed if they were not prepared. This was a sea where the strong preyed on the weak. Only by showing your sharp blade could they sit down and have a good conversation!

Lin Yi was already standing in front of the control panel for the ancient battleship formation. Currently, ao Tianba's fleet had the absolute advantage over the other twenty fleets. Even if someone else chose to buy a large battleship like them, they wouldn't be stronger than them because ao Tianba had Lin Yi!

"We're about to enter the firing range of both sides. The other side has slowed down. They probably want to talk." Ao Tianba's men reported the latest information in an orderly manner. It seemed like the other party had the same thoughts as them. They had not yet decided on their choice between fighting and cooperating. They needed to discuss it first.

However, when he saw the flag of the other party, he knew that there was no need to talk about it anymore.

"It's Gu Yunhao! Lil bro Lin, attack! Don't worry about the consumption!" Ao Tianba's eyes flashed coldly. He did not have any friendship with the other 19 fleets, but he had the deepest hatred for Gu Yunhao. The incident at the hidden reef passage had not happened for long. Now that they had met on this narrow road, what else was there to say?

When Gu Yunhao realized that it was ao Tianba's fleet, he completely gave up on communicating with them. All the shields on the ships were turned on to the maximum, and the long-range weapons were ready to fire.

When enemies meet, they'll be jealous. They don't even need to say hello, killing you is the best greeting!

Lin Yi didn't hesitate. The ten thousand mile formation activated and stopped instantly. After a flash of light, the ancient warship appeared in the middle of Gu Yunhao's fleet.

"What? How did ao Tianba do it?" Gu Yunhao was horrified. He had never thought that the ancient battleships could perform such teleportation-like movements. His fleet was now operating long-range weapons. When the other party closed in on them in an instant, they did not even have the ability to resist.

Fortunately, the protective shields of all the ships had been activated, or the losses would have been great! There were no hidden reefs here, so ao Tianba's ancient warship could attack without any hesitation.

Falling star formation!

The bright Starlight fell from the sky like a river of Stars. After the battle on the northernmost Island, Lin Yi's control of the two formations on the ancient battleship had reached the realm of perfection. With his own improvement in formations, he could perform well even without the help of the damn thing.

One after another, the Starlight River fell on the protective shield of Gu Yunhao's fleet, making a violent roar and shaking. The protective shield of the ancient battleship could still hold on for a while, but the protective shields of the other two large battleships and the treasured ship could not withstand the

attack of the Starfall array at all. After only one attack, the protective shield broke into pieces like glass and entered a completely defenseless state.

"Gu Yunhao's thinking is the same as ours! I bought a large warship and a treasure ship's cargo, leaving half of the spiritual Jade for storage!" Ao Tianba's eyes were sharp. When he saw the waterline of the two ships, he knew that Gu Yunhao's plan was almost exactly the same as his.

Chapter 6365 Do You Have A Killer Move

The only difference was that ao Tianba had Lin Yi as a trump card, while Gu Yunhao didn 't!

In the distance, two large warships were like sharks that had smelled blood. They separated to the left and right, drawing a small arc to launch their attacks while quickly approaching Gu Yunhao's fleet. The captains of these two large warships were ao Tianba's trusted subordinates. They were naturally much more capable than the original captains. They ignored Gu Yunhao's ancient warship and aimed at the other two large warships that had lost their defensive shields.

Gu Yunhao's ancient battleship was completely suppressed by ao Tianba, and he could not spare any time to help the battleships under his command. The large battleships, which had lost their shields, were still in a daze. Most of their random attacks missed. They were lucky to hit once or twice, but their shields were offset by the other party 's, and they did not cause any damage.

In just a dozen breaths, ao Tianba's large warship had completely paralyzed the attack and movement abilities of the other two warships. As for the two treasure ships, although they had a certain level of attack and defense capabilities, in front of the large warship, they were no different from a child facing an adult.

"Brother ao Tian, Gu Yunhao is about to run away!" Lin Yi noticed that Gu Yunhao's ancient battleship was also starting to light up. He couldn't stop the enemy, but it wasn't impossible for ao Tianba to pursue.

"If he wants to run, then let him run. The remaining ancient warship can't do much." Ao Tianba waved his hand nonchalantly. Although Gu Yunhao's flagship's protective shield was in imminent danger under the attack of the Starfall formation, ao Tianba did not want to kill Gu Yunhao in one go because he did not have many reserves.

With this perfect assault, ao Tianba had some confidence in the victory of this virtual trade. At present, there were not enough resources. It was not worth it to waste them on Gu Yunhao.

"Ao Tianba, just you wait. I'll make you pay the price!" On the other side, Gu Yunhao's eyes were bloodshot. He had only managed to activate the ten thousand li formation after much difficulty. The failure this time was truly out of his expectations. It would be more accurate to say that it was a crushing defeat.

If they didn't leave now, they would not be able to leave when the shield broke. Gu Yunhao, who had been on the sea for many years, knew very well what was impossible and what it meant to stay alive! Even if there was only one ancient warship left, there would still be hope for a comeback. If they lost everything, they would really have nothing left!

The ancient battleship disappeared in a flash of light. The ten thousand mile formation was the ancient battleship's strongest trump card. Unless Lin Yi used the formation to chase after it, he wouldn't be able to catch its trace.

"Dean Zhang, I'll have to trouble you to help me out next!" Ao Tianba was in a great mood. They were evenly matched this time, but under Lin Yi's control, it turned into a one-sided lightning-fast battle.

The next step was to take over the ships under Gu Yunhao's command and return directly. Because of the battle, Gu Yunhao's port had become a forbidden zone for the AO Tianba fleet. Unless he had enough fleet to destroy the port's defense, it was better not to provoke them.

"Don't worry, leave everything to me!" Zhang jinmiao laughed and did not refuse the order. What she needed to do was to get rid of the rebels on the two large warships and the two treasure ships, so that ao Tianba's men could smoothly take over the ships.

If this was the real world, Zhang jinmiao probably wouldn't do such a thing. Not only because she was the vice principal of Feiyang college, but also because of her dislike for such things. However, now that they were in an illusion, she felt that she owed ao Tianba, so she didn't hesitate at all.

Gu Yunhao's confidants were on the large battleships, but when they faced Zhang jinmiao, they had no room to fight back at all and were eliminated immediately. They knew that this was an illusion, so of course, they would not surrender. Thus, each and every one of them bravely stood up for justice and returned to reality through death.

It hadn't even been two minutes in the real world, and they were the first to return. He Hao had already noticed Lin Yi's fighting style, but he didn't say anything.

There were too many things to observe. The battle between ao Tianba and Gu Yunhao's fleet was only a flash in the outside world. No one noticed it except he Hao. Of course, no one noticed the slight change in he Hao's eyes.

On the sea, ao Tianba's fleet successfully took over Gu Yunhao's four warships after a thunderous blow. Two of the large warships were severely damaged. They were worried that the other party would resist, so they had been a little ruthless. After they became their own, everyone began to feel sorry for them.

"It's a pity that there's so much damage. Wouldn't the repair cost be a lot? The problem is that it's quite troublesome to pull them back!" Ao Tian BA's subordinate on the ancient warship shook his head and muttered regretfully. If the two large warships were fine, he might have been able to become a sub-Captain, but now it seemed that he had to wait a little longer.

"Brother ao Tian, we've profited greatly from this battle. What do we do now?" Lin Yi was satisfied with the results-if this continued, he'd be able to build up a huge advantage in the early stages.

The battle was short, but the ancient warship's reserves were used up a lot. Lin Yi used the ten thousand miles formation and the Starfall formation, which was a very extravagant act, but the spoils of war far exceeded the consumption.

Not to mention the two broken large warships, there were also two intact treasure ships, and a ship of special products from Gu Yunhao's port. Ao Tianba's wealth almost doubled.

Having tasted the sweetness, ao Tianba waved his hand and said, ""Let's return first. The two empty treasure ships will drag the two large warships and follow behind the fleet. Once these two warships are repaired, our strength will be more or less enough to attack Gu Yunhao's port."

"Brother ao Tian, I have an idea, I wonder if you want to hear it?" Lin Yi muttered to himself and decided to bring up the plan he'd just come up with-it was the best way to establish the biggest initial advantage.

"Lil bro Lin, you're treating us like outsiders. Do we brothers need to do this? If you have any thoughts, just say them. I'm sure they're reasonable. " Ao Tianba laughed loudly. His trust in Lin Yi was extremely deep now. If it wasn't for the fact that Lin Yi wasn't mature enough in commanding the fleet, he would've just handed the fleet over to Lin Yi.

"Then I'll get straight to the point. I think time is the most precious thing for us right now. There's nothing wrong with returning, but we can't take our time like this. We have to make full use of our time. This might be a great opportunity for us to develop." Lin Yi said carefully, straightening out his thoughts.

Chapter 6366 The Worst Became The Best

"Lil bro Lin, if you have any ideas, just say it!" Ao Tianba's eyes brightened-he'd caught on to what Lin Yi was trying to say, but he couldn't quite figure it out yet.

"Our port ao Tian is surrounded by three parties, and to those three ports, they are the closest to our port. So, the probability of them choosing to come to ao Tian port is very high. All the fleets have a Sea Map. Through the sea Map, we can immediately judge which port is the most favorable for our first contact. It is because of this that we met Gu Yunhao's fleet." Lin Yi gestured for ao Tianba to come to the map and pointed at it.

Ao Tianba's eyes were getting brighter and brighter. They had discussed this before, but they didn't think too deeply about it before they met Gu Yunhao. Now that Lin Yi brought it up again, the situation was completely different.

"Brother Lin, are you saying that the other two ports will most likely choose to come to our otainport first? And they most likely didn't have good intentions? Although there was no agreement, in their estimation, there is a high possibility that the three sides will join forces and then naturally form an alliance to break through the AO Tian port?" Ao Tianba's thoughts were starting to drift away from the discussion, and he understood what Lin Yi was getting at.

"That's right. As long as they're really coming to aotian port, I'm sure they're hostile. If I'm not mistaken, their fleet configuration is the same. They're more aggressive than us by exchanging a treasure ship and spiritual Jade for a large warship. This configuration can ensure that the three fleets can take the port at the lowest cost and won't be easily suppressed by the other two sides." Lin Yi's analysis was clear-as

long as the other two ports "fleets came over, they were basically enemies, so there was no need to be polite to them.

"Our advantage is the combat power of our fleet! If we want to win this battle, our only choice is to use our greatest advantage in the early stages and establish an unshakeable super position in one fell swoop!" Ao Tianba patted the sea Map and instantly understood what to do.

Wouldn't it be a waste to leave a combat genius like Lin Yi here instead of fighting and looting?

"Well said! Our port was originally in a very bad position, but now it has become the best port for us. The crisis of the enemy attacking from three directions and surrounding the port has now been completely resolved. What's left is to make use of the time difference and perfectly break them one by one!" Lin Yi's eyes flashed with excitement. He suddenly felt that he was very interested in this kind of small-scale war. The feeling of strategizing was very intoxicating.

"Break them one by one! We'll break them one by one!" Ao Tianba's eyes brightened up as he started laughing. His finger slid across the map as he understood what Lin Yi was planning.

"Master, what are they talking about? Why do you all look so happy?" Shangguan LAN 'er didn't know anything about these things, and couldn't help or say anything, but she was happy enough to be able to go on an adventure with Lin Yi.

But she didn't dare ask Lin Yi if there was something she didn't understand-she didn't want to interrupt their discussion. She could only ask Zhang jinmiao quietly.

Zhang jinmiao was the Vice Dean of the Feiyang school, after all. She had almost zero experience in this kind of battle, but she had a lot of theoretical knowledge. Lin Yi and ao Tianba didn't hide their conversation from them, and they understood Lin Yi's plan after listening to the whole conversation.

"Look at the sea Map. The Gu Yunhao we met is the nearest port to the AO Tian port in the South. Although the other two ports are about the same distance, they are still slightly further apart, so there will be a slight difference in their arrival time. If we didn't come out, the first to arrive at ao Tian port would be Gu Yunhao, followed by the port fleet in the East of ao Tian port, and finally the port fleet in the North. Assuming that they all set off at the same time, The final time of arrival will not exceed a day. " As Zhang jinmiao spoke, she pointed at the air a few times. Shangguan LAN 'er seemed to understand a little, but she could only nod in agreement.

"The place where we met Gu Yunhao was around the center of the two ports. Because we came against the wind, it's closer to aotian port. If we return now, with the original configuration of the fleet, we won't meet the other fleets, but with the two broken large warships, our speed will be much slower. If I'm not wrong, Lin Yi wants to split up and temporarily abandon the broken warships and treasure ships. Let's go back and attack the other fleet first. With our combat ability and speed, it's very likely that we'll be able to finish them off before the last fleet arrives. " As Zhang jinmiao spoke, she was even more satisfied with Lin Yi. This kid was a genius in all aspects. Not only was he so skilled in controlling the ancient warship's formations, but he also showed great talent in tactics. He was a little monster at the abnormal level.

However, Zhang jinmiao's guess didn't completely guess Lin Yi's thoughts. He wasn't just splitting up his forces-there were many other meanings.

"Brother ao Tian, now that Gu Yunhao has been defeated, this sea route is absolutely safe for the time being. He doesn't have the guts to turn around and attack us, so there's no problem in leaving the treasured ship behind and moving slowly." Lin Yi said with certainty as he drew out the models of the ships.

"I can understand that, but brother Lin, why did you place our original ship at the back to drag the broken battleships, and then gather all the goods on Gu Yunhao's ship?" Ao Tianba had a general idea of Lin Yi's strategy, but there were still some details he couldn't figure out.

Lin Yi smiled slyly as he explained the situation to ao Tianba. Realization dawned on both Zhang Jinming and ao Tianba, and they followed Lin Yi's plan without hesitation.

The fleet was split into four parts, the fastest ancient ship leaving the fleet first and heading towards the east. Lin Yi estimated that they'd meet the fleet from the East Port about a day from ao Tian port.

With the ancient warship's strength, even if there was only one, they were confident in defeating the enemy's fleet. This was why Lin Yi and ao Tianba dared to make this move.

The second fastest were the two large warships that were still in good condition. They would follow closely behind the ancient warship and act as the second echelon. If the battle went well, they would be used to receive the captured warships. If it did not go well, they would be used as backup. Although the distance between them and the ancient warship that was moving at full speed would be widened, they would not be too far apart. They would be able to enter the battlefield at a critical moment.

Chapter 6367 The Conspiracy Of Pretending To Be A Pig To Eat The Tiger

The third fastest were the two treasure ships full of cargo. This was a team that returned directly to the AO Tian port. Because they were full of cargo, their speed was much slower than the airships. Perhaps after the battle between the ancient warship and the large warship, they would meet them on their way back to the AO Tian port.

Finally, there was the treasure ship that was dragging the two broken large warships. Although it was an empty ship, the two large warships without any mechanical power were much heavier than when they were loaded with cargo. By the time they returned to the AO Tian port, everything would have been settled.

Lin Yi's arrangement was definitely a bit risky. If Gu Yunhao was brave enough and came back, he might be able to take all four treasure ships in one fell swoop. At the very least, he could take back the two empty treasure ships and the two large warships.

Unfortunately, Gu Yunhao didn't dare to turn back. He finally escaped with the ten thousand mile formation, and it would take a long time to come back. He couldn't use the formation again if he encountered Ao Tianba's fleet.

He Hao paid more attention to the water curtain around the AO Tian BA fleet, but it had only been two minutes, so no one could see the difference. Only he Hao himself knew that he was very interested in the AO Tian BA fleet's risky move and wondered what the end result would be.

Four days later, the full speed ancient battleship arrived near the eastern sea route. Lin Yi predicted that they would encounter the enemy's fleet soon.

"Lil bro Lin, we're not going to miss out on each other, right? After all, the sea is vast and the sea route here is quite flat. It won't be easy to meet the other party. " Ao Tianba's trust in Lin Yi went without saying, but he was still worried about not seeing the fleet he was expecting.

If he really missed the enemy's fleet, his Foundation might be destroyed and he would become the same as Gu Yunhao. That would be a terrible thing.

"Don't worry, the enemy fleet won't be that fast. The sea route in this area is the most convenient route for them to pass through to aotian port. As long as they come here, there's no reason for them to

abandon this place and not turn to another direction, unless their Captain is a rookie." Lin Yi smiled faintly, full of confidence in his judgment.

Would one of the twenty most outstanding fleet leaders be a newbie? Of course not! Therefore, as long as they came, they would definitely pass by here without a doubt!

As expected, the ancient warship finally saw the fleet from the eastern port after half a day. As expected, their configuration was the same as ao Tianba and Gu Yunhao. One ancient warship was the flagship, two large warships were guards, and two treasure ships were used to carry goods.

This kind of arrangement was full of hostility!

"Don't worry. We'll drive slowly to the otian port and let them follow us." Ao Tianba and Lin Yi smiled at each other and ordered their men to leave. The two large ships were already here, but Lin Yi told them to turn East first and make a round before returning. There were no other ships around.

After the fleet discovered ao Tianba's ancient warship, they were on high alert at first. Then, they received news from the observation tower that there were no other ships lying in ambush, so they began to speed up.

If they could capture a lone ancient warship, it would be equivalent to their strength increasing by several times. The people behind them were obviously tempted. Even if they knew that the ancient warship had a ten thousand mile formation and it was too difficult to capture it alive, what if they could succeed?

Activating the ten thousand mile formation required a huge amount of energy. What if the ancient warship in front was already in a state of resource depletion? Perhaps they had just used the ten thousand mile formation to escape here? No matter what, it was necessary to stop the ancient warship.

Ao Tianba and Lin Yi walked slowly on purpose. The ancient battleship's shield was at its lowest output, and it didn't look rich at all. This made the fleet behind even more excited. An ancient battleship! He was going to be rich!

Soon, ao Tianba's ancient battleship was surrounded by the enemy's ancient battleships and large battleships. The enemy probably thought that they could take down ao Tianba. In order to save resources, they did not attack but tried to persuade him to surrender.

"So it's the twelfth-ranked fleet. Their standard isn't that good, but they can't see through our disguises?" Ao Tianba pursed his lips in disdain. His ancient warship was not damaged at all. Even if the shield was a little weaker, it was not as if it was completely defenseless. The other party was being too overconfident by not attacking.

"They're trying to save resources and obtain a complete ancient warship at the same time so that they don't have to repair it. That's so troublesome and costly." Lin Yi explained with a smile, his expression relaxed.

"Haha, you're right, Dean Zhang. We'll have to trouble you again. After we break the enemy's shield, you can go and kill the people controlling the large warships first. We'll also get two complete large warships so that we don't have to repair them." Ao Tianba politely made a request to Zhang jinmiao.

After Gu Yunhao's men were killed, everyone realized that the people on the large warships surrendered easily. Therefore, it was not so difficult to control the warships. Perhaps this was the arrangement during the design so that all the fleets could use war to plunder the other side.

"No problem, leave it to me!" Zhang jinmiao smiled and nodded. As the saying went, "you've grown familiar with it once, but you've grown familiar with it twice." Now, she could be considered a skilled worker in this.

"Surrender. As long as you hand over the ancient warship, we promise that we will not eliminate you. We will even give you special products. As long as you sincerely surrender to us, we will definitely not let your points be at the bottom! How was it? Isn't it better to surrender than to be completely wiped out and eliminated without a single point?" The other party was still excitedly saying words to persuade them to surrender, completely unaware that this was a plot to play the pig to eat the Tiger!

Lin Yi controlled the Starfall array with ease, and the Starlight fell instantly. The shields of the two large battleships couldn't even last two breaths before they were completely shattered. Zhang jinmiao rushed to the deck of the two large battleships without hesitation and began her plan to kill the enemy.

They did not use the ten thousand li formation to advance. One reason was to save resources, and the other was to paralyze the opponent!

If Lin Yi had used the same method he used against Gu Yunhao, the energy consumption would have been more than doubled, and the shield would have been thicker.

Chapter 6368 Give Them A Chance

Things were simple now. They surrounded aotian BA's flagship and became the best targets. They did not put much thought into their defense, and the shield was not fully opened.

If Lin Yi didn't want to hold back, he might even be able to open the shield of the ancient warship.

However, the other party was still the twelfth-ranked fleet. After the panic of being ambushed, they quickly reacted to what had happened.

Unfortunately, Lin Yi's group was too fast, especially Zhang Jinmiao, who was a master of earth creation realm. It was a piece of cake for her to deal with the captains of the two ships. It was too late when they wanted to counterattack and gather the fleet.

Especially when they discovered that two large warships had appeared on the back of the treasured ship behind them, if they still did not realize that they had fallen into a carefully designed trap, they would really be unworthy of being the twelfth Fleet among the twenty fleets!

"Ao Tian BA! You're good! I'll remember you. You win this time, but don't fall into my hands next time!" Those who could stand on the bridge were not ordinary people, and they instantly judged that the situation was not in their favor.

If he didn't have the two large battleships, he would still have the confidence to fight against Ao Tianba's ancient battleship. However, with the two large battleships, it was a completely different story. Especially the Starfall array controlled by Ao Tianba's ancient battleship, which was powerful, fast, and accurate. It was on a completely different level from the one on his battleship. If he didn't leave now, he would be persuaded to surrender instead.

In the end, this guy made the same choice as Gu Yunhao. The flagship used the ten thousand mile formation to escape, and the rest of the ships were abandoned. There was no other way. If the ten thousand mile formation could take a few more ships, he would definitely take them and leave. Unfortunately, the ten thousand mile formation did not have this function, so he could only choose to preserve some of the foundation first.

The ancient warship and the two large warships burst into thunderous cheers. The battle this time was smoother than before, and the consumption was less. If it continued to develop at this speed, it would not be long before they could dominate the sea.

"Lil bro Lin, with you here, it's really easy and fun to deal with those guys! It's such a pity that you didn't come with me to manage the fleet! Do you want to reconsider? It doesn't matter even if you become the captain." Ao Tianba said regretfully. He'd seen Lin Yi's strength before, but he'd only have the chance to fight a fleet of the same level here.

It could be said that a fleet with Lin Yi and without him were two levels apart in terms of combat power. If they didn't get Lin Yi, the location of the port alone was enough to announce ao Tianba's fate of being eliminated. But with Lin Yi, this disadvantageous situation was forcibly turned around and became an opportunity for him to grow.

"Ao Tianba, what are you saying? Lin Yi's future is bright, how can a mere fleet accommodate him? It's already good enough to help you occasionally, don't push your luck!" Zhang Jinming, who'd just returned, wasn't happy at all. Lin Yi was a student of their Feiyang school-well, not yet, but he'd definitely be one in the end! How dare ao Tianba try to poach him right in front of her? she couldn't take it!

"Hahaha, please calm down, director Zhang. I'm just saying. Of course, I know that brother Lin has a bright future ahead of him. You have to help him well in the future." Ao Tianba wasn't angry. Everyone was familiar with each other these days, and their relationship was naturally different from before. It didn't matter if he was joking.

Lin Yi and Shangguan LAN 'er couldn't help but smile-everyone was in a good mood after the great victory, but they got back to work after a few jokes.

It would take some time to collect the captured battleships, and ao Tianba handed this job to his subordinates while he continued to sail back at full speed on his own ancient battleship.

If the last fleet still came with hostility, they would become their third prey. At the same time, they would also complete their last leap in accumulation in the early stages.

The four large battleships and two treasure ships would return to the battlefield at a slightly lower speed after the formation was completed. This was all calculated-as long as there were no major deviations, the fleet would arrive at the last moment. Whether they would finish off the enemy or clean up the battlefield would be up to Lin Yi and ao Tianba.

Half a day later, the AO Tian port was in sight. The two treasure ships Lin Yi arranged for arrived first, fully loaded with cargo, but they were already taken over by the fleet from the back.

As soon as the enemy completed this step, ao Tianba's flagship appeared from the East. The timing was simply flawless.

"Brother Lin, you really have a good grasp of their psychology. Seeing two treasure ships with broken shields, which obviously have been through a battle and have no warships to escort them, and a treasure ship full of cargo, they definitely won't just stand by and watch such a fat meat." Otaba laughed as he spoke, his face full of pride from his consecutive victories.

"You're speaking as if you'll never be tempted by these two treasure ships. " Zhang jinmiao exposed ao Tianba's true colors without any mercy. It wasn't that Lin Yi could read people's minds, but these people who lived on the sea wouldn't let go of an opportunity like this.

Ao Tianba didn't mind. He laughed and admitted that he would have made the same choice.

Brother ao Tian, what do you think they'll do if we negotiate and ask them to hand over the two treasure ships and compensate us for the attack?" Lin Yi smiled faintly as he looked at the fleet in the distance.

"Facing an ancient warship like ours, and an exhausted Army that has obviously gone through a great battle, I'm afraid they will want to swallow us up." Ao Tianba sneered. It wasn't a bad thing to be greedy, but if he didn't have good teeth, he would have to break all his teeth before he could swallow it.

"No matter what, we'll just give them a chance. It's none of our business if they want it or not." Lin Yi knew what his opponent would choose, but it made sense. After all, this was only the first test, and they were in an illusion formation.

Even if ao Tianba won, he'd still become a target for everyone in the future events. Lin Yi's arrangements were all for his side to stand on the side of reason.

There was no need to talk about Gu Yunhao. They were enemies to begin with, so there was no second word when they met. If they were not convinced, they would fight.

As for the other two fleets, Lin Yi still played a little trick. The eastern Fleet saw the ancient warship that was alone and tried to persuade it to surrender. Ao Tianba was the one who was persuaded to surrender, so it was normal for him to fight back. The enemy could only blame themselves for their failure, and even if they hated each other, it wouldn't be to the point of fighting to the death.

Chapter 6369 Lose-Lose Strategy

Similarly, the fleet from the North had attacked and incorporated two of ao Tianba's treasure ships out of greed. They then ignored ao Tianba's legitimate demands for return and compensation. What else could they say when they were beaten up? If they were here with hostility, Lin Yi and ao Tianba wouldn't be able to make the first move if they didn't have any evidence.

"I really don't want them to agree!" Ao Tianba shook his head. He understood Lin Yi's intentions very well. As he spoke, his hands were already signaling for his men to contact the other party.

It wasn't like he couldn't attack the guy now-he'd be the one to attack first anyway, but Lin Yi thought it was all an act, so he'd just go with it.

"They got two treasure ships full of cargo for no reason. They must be overjoyed now, right?" Ao Tianba was still in the mood to chat with Lin Yi after the signal.

"You're probably more than just overjoyed to be able to capture our flagship, right?" Lin Yi smiled as well, but he didn't relax his control of the two formations. As long as the opponent was ready to attack, he would activate them.

"They're here, they're here. Hahaha, we've been laughed at by them. They said that we're overestimating our abilities." Before ao Tianba could finish his sentence, the opposing fleet had already begun to attack.

The commander of this fleet obviously had no intention of forcing ao Tianba to surrender. After obtaining two fully-loaded treasured ships, he was already considered rich and overbearing. It did not matter if he obtained a damaged ancient warship. It was just a repair fee!

The ancient battleship's shield could last for a long time against long range attacks like this, but Lin Yi couldn't just wait for the enemy to exhaust the shield's energy. The ten thousand mile formation's short-distance dash was ready and could be activated at any time.

"Enemies are found on the left. It's an ancient warship!" The news from the observation tower shocked both Lin Yi and ao Tianba.

Lin Yi's control of formations gave him the advantage over the enemy fleet, and with Masters like ao Tianba and Zhang jinmiao, it was a piece of cake to take the enemy's large ships.

However, it was still difficult to break the shield of the ancient warship. Especially now that their reserves were insufficient, they could not launch a continuous attack. Once the other party had two ancient warships, the situation would be reversed.

"Where did this ancient warship come from?" Ao Tianba understood the severity of the situation, and his expression became extremely serious.

"It's the eastern Harbor fleet's flagship that escaped earlier!" One could tell who the enemy was from their banners, and while they were shocked by this news, they also suddenly felt that it was not that surprising.

After all, it was a twelfth-ranked fleet, and the captain was definitely not a mediocre person. When he discovered that ao Tianba's flagship and two large warships had set up an ambush halfway, he had already determined the possible location of their treasured ship. Therefore, when he escaped through the ten thousand mile formation, he had directly chosen the direction of ao Tianba port.

However, after discovering the treasure ship, he was still able to hold back. Like a beast looking for food, he maintained enough patience and waited for the fleet from the other direction to arrive.

They weren't easy to deal with, and if Lin Yi and ao Tianba could figure it out, he could as well. Would there be a fleet coming from the north? He wasn't 100% confident, but he believed that there was at least a 90% chance.

Indeed, everything was as he had expected. Ao Tianba's treasure ship had been seized by the northern Fleet, and then ao Tianba's flagship appeared. The situation was very similar to what they had encountered before.

The only difference was that the northern Fleet did not hesitate to launch an attack even though they had the upper hand.

The time for revenge had arrived!

The venomous snake hidden in the grass revealed its fangs, and in an instant, ao Tianba's flagship was surrounded by enemies from both sides.

Lin Yi's eyes were like lightning as his brain worked quickly. Thanks to the strength of his essence spirit and consciousness, his thinking speed and efficiency had reached a shocking level. In just an instant, he had a plan.

"Brother ao Tian, there's no time to explain. Be prepared to fight to the death!" Lin Yi said as he activated the ten thousand mile formation's short distance teleportation.

After a flash of light, the ancient warship appeared beside the flagship of the northern Fleet. The shields of the two ancient warships collided violently, causing violent tremors and ripples.

Even the two ancient warships within the shield could not stop the powerful impact.

Lin Yi activated the Starfall formation to its maximum, focusing all the attack power on the shield of the enemy's flagship, completely ignoring the other two large ships.

Ao Tianba's face went pale, but a look of determination flashed across his face. He knew that Lin Yi was going to put everything on the line-if they failed, they'd lose everything. The ancient battleship would lose all its energy, and they wouldn't be able to activate the formation to escape-they'd even lose their ability to travel.

It was a pity that they were still some distance away from the port. Otherwise, they could use the port's defense to resist.

"What is that lunatic doing? How did they do it?" On the enemy's flagship that was locked on by Ao Tianba's Starfall array, the captain and his subordinates were dumbfounded. They had never seen anyone choose such an attack method, and they did not understand how the ancient warship could achieve such a short distance like teleportation.

In such a disadvantageous situation, shouldn't they directly activate the ten thousand li formation and escape? The port was not far away. After they escaped, they would not dare to attack it easily!

Lin Yi had indeed lost his mind-he didn't want to lose everything. Of course, he could escape back to the port, but so what?

There were still four large warships and two treasure ships coming from the east, and two treasure ships from the South dragging two large, broken warships. These were all ao Tianba had. If the flagship hid in the port, how could they support these two sub-fleets without funds, goods, and resources? There were two ancient warships outside, and the two sub-fleets would not have any ability to resist before they were incorporated.

And then watch as the two complete fleets attack the port together? Rather than being eliminated like this, he might as well give it a try!

"Aunt Zhang, brother ao Tian, once the enemy's protective shield is broken, all of us will advance. Abandon our flagship and seize the enemy's flagship!" Lin Yi ordered as he madly controlled the Starfall formation, using the remaining energy to attack the shield.

Not only that, but he also ordered ao Tianba's flagship to use itself as a weapon to continuously hit the ancient warships of the other party. It was a battle where both sides would suffer!

Chapter 6370 Starting To Regret

Under such a collision, although the shields of both sides had not been broken, the ancient warships inside had been damaged to a certain extent. It was possible that they would both perish together and sink. No one would do such a thing if they were not crazy.

The captain on the opposite flagship was already beginning to regret. If he had known earlier, he wouldn't have provoked this madman. Unfortunately, he was in a difficult position now. He couldn't even activate the ten thousand mile formation to escape.

The two ancient warships were too close to each other, and the continuous shaking affected his control of the formation. He didn't have a master like Lin Yi on his side, and more importantly, when he activated the ten thousand mile formation, there was always a similar force interfering. It was already hard enough, and now it was even harder to activate it.

Of course, this was also Lin Yi's doing. The ten thousand mile formation activated extremely quickly, but he was now in a super focused state. As he controlled the Starfall formation to attack at full power, he also paid attention to the movement of the enemy's ten thousand mile formation. Once he noticed the signs of activation, he would immediately activate his own ten thousand mile formation. As a master in formations, it was still possible to affect the enemy's ten thousand mile formation at such a close distance. The facts proved that He was right.

Ao Tianba's shield was the first to collapse as all its energy had been drained to supply the Starfall array. After a few hits, the shield was completely shattered. However, the ancient battleship did not stop hitting the enemy's shield as it continued to hit it.

In just a breath's time, cracks began to appear on the bow of the ancient warship, and the cracks were spreading rapidly. As the impact continued, the cracks were growing exponentially.

The turbulent sea water had already begun to enter the ancient warship. Perhaps it would not take long for the entire ancient warship to sink into the sea. However, no one on ao Tian BA's ship wavered. They all stayed in their posts and focused on their work. Even if the violent shaking caused them to make many mistakes, it would only make them spend more energy to make up for it.

As the last beam of Starlight fell, ao Tianba's ancient warship no longer had any ability to attack. It could not even continue the collision. Due to the massive influx of seawater, the ancient warship had begun to tilt and was out of control.

Everyone, including ao Tianba, fell into despair. It was supposed to be a perfect start, but as long as they could complete this battle, ao Tianba's fleet would be reborn. After the reorganization, they would be able to dominate the world.

It was a pity that the twelfth-ranked ancient warship had appeared at a time too sinister. The situation had taken a turn for the worse. If they could let ao Tianba digest the spoils of war this time and have enough resources, Lin Yi would have the confidence to deal with even two ancient warships. However, the enemy chose to appear when they were about to run out of ammunition and supplies. They knew that ao Tianba's ancient warship was at the end of its strength and wanted to take revenge.

"Pa!" With a light crisp sound, the despairing people's eyes flashed with hope again. The last ray of Starlight finally cracked the opponent's shield.

The crack was spreading rapidly, and the cracking sound continued. In just a few seconds, the entire shield had completely shattered!

"All troops, attack!" Ao Tianba raised his arms and shouted so loudly that his voice cracked from the excitement!

At the end of the road, there was a ray of light at the end of the tunnel!

Zhang jinmiao, ao Tianba, and Lin Yi immediately broke the walls of the bridge and charged towards the ancient warship. Their only hope now was to take this ancient warship and use the resources on it to attack the Avenger warship behind.

As long as they boarded the ancient warship, the other party would not be able to escape even if they used the ten thousand mile formation!

Seeing the shield on his side break, the captain of the ancient battleship was on the verge of a mental breakdown. Lin Yi's ten thousand mile formation couldn't be activated at the last moment, but after seeing an ancient battleship that was about to sink, who would think of using the formation to escape? They could even step on the large warships at the side and beat them up, so why would the ancient warship need to run?

Moreover, the protective shield could be replenished. No one had expected that the opponent's final strike would reach the limit of the protective Shield's endurance and collapse.

There was no time to hesitate. The enemy had already rushed onto the warship. The only choice now was to repel the enemy. Otherwise, the ancient warship in the distance might come over and take a bite.

Without the shield, the ancient warship could not withstand more than a few attacks from opponents of the same level. Once the flagship was lost, the ancient warship could basically be declared out of the competition.

The development of the situation was unexpected and as fast as lightning. There was no time for anyone to think at all. The ancient warship in the 12th place had only wanted to stab ao Taba in the back and then use the strength of another fleet to entangle and destroy the opponent's flagship.

After achieving this goal, he would retreat and take advantage of the stalemate to return and take back his fleet. If he was lucky, he could even take down two of ao Tianba's large battleships, which would

greatly increase his strength. At that time, he could turn back to clean up the mess or discuss an alliance with another fleet.

The plan was perfect. However, as Tianba's ancient battleship chose a shocking method. It launched a suicide attack. In a short time, one ancient battleship sank, and the shield of the other shattered. The main body of the battleship was also damaged.

"Full speed ahead! All attack preparations!" Now that a once-in-a-lifetime opportunity had appeared, what was there to hesitate about? The Avenger battleship went at full speed and rushed to the center of the battle without a care.

If he could take down this undefended ancient warship, even if it was damaged, he would be able to turn the tables! A moment ago, he was still a stray dog with only one flagship left. The next moment, he could become an invincible commander with three fleets!

As long as he could repair the damaged ancient warship, he would be able to sweep through all the obstacles and take down the largest territory in the shortest time possible. There was a high chance that he would take first place in this competition!

He wasn't sure how big of an advantage the first place would have, but he could already see two navigation spots beckoning to him. Once he got a spot, his fleet would no longer be number twelve. It might take some time to get into the top two, but getting into the top five was no doubt!

On the other battleship, Lin Yi took the lead and activated his Thunder escape. In a flash, he arrived at the bridge. The Super alchemy fire bomb instantly condensed in his palm and slammed it on the wall of the bridge. The violent explosion completely tore the wall in front of him, but he controlled the explosion range to a very small area.
