

Bodyguard 6371

Chapter 6371 Quick Control

After taking the ancient warship, they would have to enter the battle immediately. Lin Yi didn't dare to use a wide-area attack. If the control was damaged, he'd be dead!

"Kill him!" The captain on the bridge was furious. He immediately ordered his men to attack Lin Yi. Unfortunately, his strength was limited. He was only at the peak of the mountain-opening realm, not even the earth-opening realm. In the Golden class Sea area and other big islands, he could be considered an Overlord, but in Lin Yi's eyes, who had seen many earth-opening and sea-breaking realm Masters, the peak of the mountain-opening realm was really not enough!

After the lightning arc flashed, Lin Yi appeared beside the captain in an instant. A brand new five elements killing intent entered the captain's body, and then he waved out a Dragon-shaped killing intent, which whizzed around the bridge. He didn't give the captain any time to react and killed the captain's trusted men in seconds.

The Voyagers, including the captain, were shocked. They had never thought that the ancient warship would be captured so easily. Or was it all because of an illusion array? Yes, these were all illusions ...

Ao Tianba and Zhang jinmiao quickly took care of the resistance along the way, only to realize that Lin Yi had complete control of the situation. This speed was comparable to his lightning escape!

"Everyone, get into position and prepare to face the enemy!" Lin Yi roared. He didn't have time to say anything. He didn't expect to take the ancient warship so quickly, but it was definitely a good thing. At least he had time to react and avoid being sunk by the other ancient warship before he could control it.

The remaining resistance didn't pose much of a threat anymore, and the important personnel were quickly in position. It was all thanks to Lin Yi, Zhang Jinmiao, and Ao Tianba-these three strong men were amazing at clearing out troops. Otherwise, it wouldn't have been easy for these average crew members to get here so quickly.

"Boom boom boom!" The ancient battleship in the distance didn't have any intention of holding back. It took advantage of the fact that Lin Yi didn't have a shield and launched an attack. Fortunately, these attacks couldn't be compared to the Starfall formation. Although there was no shield, they could still take a few hits.

"Power system damaged. Speed decreased by 50%. Turning ability lost 40%!" The crew members who were already in position immediately reported the situation of the ancient warship.

"80% of the long-range attack system has been destroyed, and we can't launch an effective counterattack. However, the energy is sufficient, and we can use the ten thousand mile formation and the Starfall formation of the ancient warships." This wasn't good news, but it was good news for Lin Yi. As long as he had enough energy and the two formations working normally, he could still fight this battle!

"The defense system is damaged, and the shield can't be used for a while. The warship's own defense is insufficient and can't last long!" This wasn't good news either. It meant that the ancient warship they took was completely defenseless!

"It doesn't matter! We'll see if they can hit us!" Lin Yi smiled. With two formations, what was there to worry about?

Ten thousand li formation, activate!

After a flash of light, the scarred ancient warship appeared behind the ancient warship in the distance. The other party's attacks were concentrated in the front and there was basically no attack power from the back.

Starfall formation, activate!

The Starlight in the sky appeared again, and the brilliant Galaxy poured down. The shield of the ancient warship trembled violently!

"How is that possible? That madman had taken control of the enemy's flagship so quickly? Are you all F*cking useless?" The captain of the twelfth Fleet panicked when he saw the familiar scene.

A familiar recipe, the same smell ... Could it be that history was going to repeat itself?

"Increase the distance and change direction at full speed! Starfall formation, activate!" His ancient warship was in a better state and had stronger combat power, but he had an ominous feeling that he would be sunk at any time. However, he was unwilling to just run away like this, so he wanted to struggle again.

Lin Yi's ancient battleship's mobility was twice as weak as his opponent's, so it was impossible for him to catch up to his opponent. Luckily, the Starfall formation didn't need to stay close to his opponent to attack, so it didn't matter if he was a little slower.

The continuous River of Starlight fell precisely on the shield of the ancient warship. The frequency of the attack completely extinguished the counterattack thought of the captain. He had the Starfall array too, but how could it be used like this? This made him wonder if the falling star formation on his battleship was a fake one.

The ancient warship clearly had the upper hand, but did it have to choose to escape in the end? Clearly, he was about to turn the tables. Did he have to go back and be a salted fish? He could clearly take revenge, but did he have to continue to add injuries to his injuries?

Yes! It was like this! After taking on the consecutive Starfall formation attacks, the guy no longer had the same pride as before. He activated the ten thousand mile formation and escaped from Lin Yi's hands again!

It's not that I'm afraid of you, but I don't have enough strength now. One day, I'll make a comeback!

Alright, I've already said this once. I hope there won't be a next time!

Lin Yi let out a long breath as he watched the ancient warship disappear from his sight. He felt his legs go weak, and he felt a little dizzy after suddenly relaxing. This battle was short, but it was more dangerous than the previous two.

If there had been a slight deviation in the middle, they would have already been eliminated.

"I'm so lucky!" Ao Tianba's forehead was also covered in cold sweat. He only felt a sense of fear when he saw the ancient warship escape from the battle.

Just a little more, just a little more, and they would have been completely done for!

"There are still two large warships and a treasure ship over there!" Shangguan LAN 'er couldn't help much, but she was also excited and hot-blooded when she saw Lin Yi and the others relax. She quickly reminded them that the fleet from the North had only lost their flagship. If the remaining large ships attacked, it would be a threat to the broken ancient warship without a defensive shield.

"Don't worry, they won't dare to resist! A surrender is inevitable." Lin Yi smiled and waved his hand. The ancient battleship's mobility was greatly reduced, but the ten thousand mile formation could still be used. The two large battleships and the treasure ship couldn't escape at all.

Moreover, ao Tianba's four large warships as the second echelon had already appeared in the distance. As long as one was aware of the situation, they would definitely not resist.

Chapter 6372 We Can Set Off

"Brother Lin is right. If I'm not wrong, there are still two people from the other side on those two large warships. If we are ruthless and get rid of them, their fleet will be completely eliminated. So, surrendering is a good choice. Keep them as seeds and at least get some points in the end." Ao Tianba was very clear. When everyone's strength was similar, they could compete or cooperate. However, after one party's strength was greatly reduced, it was not a problem to become a vassal to the stronger party.

After all, this was a competition, and the most important thing was to obtain points. As for hatred? It was already good enough that ao Tian BA could give them points. He didn't really kill their leader or comrades.

In fact, the warships and treasure ships from the northern port stopped all movements after their flagship fell. Then, they saw their flagship beat away another ancient warship in the same way as the enemy and immediately sent out a signal of surrender.

As the saying goes, "a wise man submits to circumstances." Rather than being completely annihilated, it was better to leave some seeds behind.

"That was really close this time, all thanks to lil bro Lin! If it wasn't for you, this old brother would've been torn down by others countless times. Hahaha, but after this battle, we've finally taken the most important and most difficult step. As long as we don't make any mistakes, we'll definitely be at the top of the list in this competition!" Ao Tianba ordered his men to organize the fleet and return to the port before putting his arm around Lin Yi's shoulder and laughing.

"Wealth is found in danger. This time, it was dangerous, but the harvest was also extremely huge!" Lin Yi couldn't help but smile-it wasn't easy to win, and they'd missed a few losses too. It was finally time to reap the rewards.

"Our fleet is now quite large. It's a pity that the damaged warships need to be repaired. Otherwise, we can directly set off to continue sweeping." Ao Tianba waved his arms in high spirits. The three nearby ports had been destroyed, so there was no need to worry about enemies coming in the short term.

However, ao Tianba felt that it was a waste of time. Wasn't this the time for rapid development and pursuit? It would be too extravagant to stop and recuperate. The initial period was the most important. Even if you didn't develop, others would.

"Brother ao Tian, we have two ancient battleships now. One of them is slightly less damaged, and the other is almost 70% damaged. However, the core array and control system are still there, so we can repair it with time. We also have six good large battleships and two damaged large battleships. We have

eight Treasure ships, four of which are full of goods. I mean that we should prioritize repairing this ancient battleship first. We can take our time with the other damaged battleships. After that, we will continue to sail." Lin Yi calculated his gains and started planning his next move.

"We don't need the two broken large warships. We can just mortgage them to exchange for repair fees. The most important thing is the ancient warships. Once we have two ancient warships, it will be possible to kill the flagships of the other fleets." Ao Tianba made his decision immediately. With Lin Yi around, capturing ancient ships was proven possible, and so he wasn't interested in large ships anymore.

The damaged ones would be sold for money, but the ancient warship had to be repaired!

"The specialties of the other three ports are sold at ao Tian port, and the price can be doubled. Three ships of things can be exchanged for six ships of goods. Although we have enough treasure ships, we don't need so many goods. What I mean is three ships for three ships, and the rest will be used as resource reserves for the ancient warship to prevent the same situation from happening again." Lin Yi's memory of running out of resources at the last moment was still fresh in his mind, so he was very concerned about the replenishment.

"We'll do as you say, lil bro Lin. If you have any other ideas, let's continue our discussion. " Ao Tianba accepted Lin Yi's words without any hesitation. After all, Lin Yi had won everything on his own, so what else was there to say?

Outside the illusion, he Hao's eyes swept across the water curtain around ao Tianba. The faint smile on his face did not disappear. He was clearly very interested in the combat ability displayed by ao Tianba.

However, ao Tianba's attention was not only on he Hao's water screen. There were two other water screens that he was also paying attention to.

It was clear that Lin Yi and the others did well, but the others didn't lose out much, perhaps even better.

While he Hao's eyes were wandering back and forth, time was passing by thousands of times faster in the illusion. In the AO Tian port, more than ten days had passed.

"Brother Lin, the fleet has been reorganized, and our new flagship has been repaired. We can set off now!" Ao Tianba greeted with a smile as soon as he found Lin Yi.

The new fleet had one ancient warship as the flagship, three large warships as guards, and Eight Treasure ships were incorporated into it. The other three large warships were left at ao Tian port as reserves to guard the port.

In addition, the damaged ancient warship flagship had begun to be repaired. It might take more time, but it did not matter. This time, the AO Tianba plan had to go further, so the next time he returned, he might be able to see the brand new ancient warship.

"Alright, then let's go! We've wasted enough time. I hope we don't get left behind too much. " Lin Yi and Shangguan LAN 'er had been wandering around the port these days, and they'd gone to all the places they could go. They were quite excited to be able to set off on a voyage.

Lin Yi didn't keep a single bit of the special products on the three ships-they were all sold out. The final result would show the amount of special products, but money was clearly more useful right now.

He'd planned on buying three more exquisite bones to make four, but after some consideration he decided to add two more ships-it'd be a waste to empty a ship, too.

Leaving behind two empty treasure ships was already enough to deal with any possible changes.

He'd wanted to leave the empty ships at the port as reserves, but considering the huge amount of money he'd get from each port, the empty ships would be used at the next one.

This time, ao Tianba chose the northern route. After the other party lost their flagship, the rest of the people surrendered. Therefore, the northern port was no different from their own to ao Tianba. There was no risk in making the first bucket of gold of trade there.

Chapter 6373 Gale Su Lu!

"We've been recuperating for more than ten days, and we don't know how the other fleets are doing. Are there any fleets that are in a similar situation or better than us?" The journey was smooth, and ao Tianba was chatting with Lin Yi and the others on the deck.

"If we use our method as a reference, I'm afraid it's very difficult for a similar fleet to appear. After all, we're able to reach this stage largely due to luck. Other than luck in battle, it's also the advantage of location." Lin Yi smiled faintly. He didn't believe that any other fleet could achieve the same results as them in such a short time.

Under normal circumstances, a fleet could only travel to and from one port in less than a month. If they did not return to their base, they could only go to two ports at most. It was not easy to attract three hostile fleets like the AO Tian port.

The most important thing was that they were all the same on the surface, and the only difference was if they switched to a bigger ship or not. If they didn't have a heaven-defying attacker like Lin Yi, the two fleets would probably be equal in strength.

In a situation where no one could do anything to the other, peaceful trade was the only choice. Then the problem was back to the original point. In less than a month, how much money could three treasure ships earn from a full trip? How many more battleships could they add?

"That's true, who would have an expert like you, little brother Lin? With you, it's equivalent to having an additional fleet!" Ao Tianba couldn't help but exclaim, but it sounded more like a compliment to Lin Yi.

Lin Yi smiled-otaba had been complimenting him a lot lately, and it seemed like the fight had really triggered him.

"Alright, brother ao Tian. We're brothers, so let's not talk about these truths. I'll get proud if I talk too much." Lin Yi teased with a smile."The fastest way to develop is to fight and plunder, but without absolute strength, this path is not easy. I believe that there are Masters in this area in the fleets of the first few, but their positions are not as good as ours. The difference in luck destined that their development will not be faster than ours."

"I'm relieved to hear you say that. Now, what we need to do is to take advantage of the advantage we have and continue to expand the results of the battle, and widen the gap between us and all our opponents." Ao Tianba's thinking was very clear. Since they had begun the battle to Annex the enemy, they had to continue to move forward firmly and maintain their advantage. Only then would they be able to stand in an undefeatable position.

"The only thing we need to worry about is that some fleets will form an alliance and then deal with us with the pressure of Mount Tai." Lin Yi had a clear understanding of the current situation, and he wasn't blindly confident in his advantage.

Ao Taba had no choice but to continue fighting. He was ranked at the bottom of the twenty fleets. He had no connections or reputation, so it would be difficult for him to form an alliance. It was not necessarily the case for the other fleets. When a fleet with enough prestige, ability, and connections stepped forward to form an alliance, there would probably be quite a number of responses. At that time, ao Taba would be in an extremely disadvantageous situation.

"When we grow strong enough, so what if they have an Alliance? We'll still be able to break them one by one!" Ao Tianba wasn't too worried. Now that they had the first-move advantage, as long as they continued to maintain it, the final victory was still within their expectations.

Plus, he had more confidence in Lin Yi than Lin Yi had in himself. As long as Lin Yi was here, there was nothing that couldn't be done.

"Ha ... Brother ao Tian is right. Let's talk about the future in the future. We just have to work hard and do well in the present!"

As Lin Yi spoke, on another ancient battleship far away in the sea, there was a man standing proudly on the railing at the bow of the ship. Because there was no shield, the strong sea wind whistled past him, but it turned back into a gentle breeze blowing around him.

He was su Lu, the leader of the second Fleet among the twenty fleets!

Behind su Lu's flagship was an ancient warship that was slightly damaged. Many craftsmen were busy repairing it, but it did not affect the warship's speed.

Other than that, there were five large warships following closely behind. There was not a single treasured ship in the entire fleet. It was a battle-type fleet. Without a treasured ship, the fleet would be much faster. This had always been su Lu's fighting style. When he was outside, his treasured ships had been modified. Even if they were loaded with goods, they were not slow at all. Although he would sacrifice a lot of cargo capacity, su Lu thought it was worth it.

Gale su Lu was the fastest in the entire sea region! This illusion formation test was like a fish in water. Trade? Hehe, without strong power, how could he safely do trade?

"Boss! We're about to reach the third port. We're in luck, the enemy's fleet seems to be about to set sail. " Su Lu's Deputy jogged over and reported the latest observation with a smile.

"We're indeed lucky. Pass on my order. Full speed, storm assault!" Su Lu stuck out his tongue and licked his lips. A cold and bloodthirsty glint flashed in his eyes as he pointed his index finger forward.

"As you command! Boss!" Su Lu's assistant was excited. His aura was as sharp as an unsheathed sword. He was no longer as carefree as before.

"You only have one chance to surrender before me, Gale Sulu! Are you able to grasp it?" Su Lu smirked coldly. Once his attack took shape, no one would be able to surrender in time. That was why Gale's name was known throughout the world!

Su Lu's port was unique in the virtual trade this time. It was located at the corner of the border, and there was only one sea route that led to the port. There was no other choice.

Under normal circumstances, this was extremely disadvantageous to trade because they had lost more options. If they wanted to go to other ports, they would need more time and resources. With only a year's time limit, they would be at an innate disadvantage if they wanted to get more special products and funds.

However, su Lu thought that it was the best possible outcome!

He directly abandoned his treasured ship and began to attack the other port fleets at lightning speed. While strengthening his own side, he also opened a safe trade channel for the base behind.

Wherever the fleet passed, the four Seas were swept by gales!

All the dangers would be cleared by his main battleships in front, leaving the absolutely safe sea area and port behind, so that the treasure ship could come and go freely without the need for a guard fleet.

Chapter 6374 Return Or Advance

Next was su Lu's third target. Since they had the absolute advantage, the fleet and the port had no chance of resisting!

"Wind! Wind! Gale!" All the battleships suddenly let out a deafening roar, and their already extremely fast speed was increased by another 20%. The seven battleships were like sharp arrows, shooting toward their prey!

Lin Yi and ao Tianba thought that they were the fastest developing fleet at this stage. After all, they were facing three fleets at the same time and taking them down one by one-it was almost an unreplicable case.

There was another port in the same location as ao Tian port, but they didn't have Lin Yi or Zhang jinmiao. It was already impressive that they didn't lose when faced with three fleets, how could they replicate ao Tian BA's development?

They did not expect that there was a guy named su Lu in the distant sea. He had caught up with their progress with his super-fast speed and never stopped running. He was even more powerful than them!

On the other hand, a port in a similar location to the AO Tian port was indeed unable to replicate the battle of the AO Tian BA fleet. In fact, they had not encountered any battle at all.

In the beginning, the fleets of the surrounding three parties also headed to this port without prior agreement. Everyone could read the sea Map and knew the benefits of this port after it was divided.

However, they each encountered a treasure ship half loaded with cargo on their way. Without any guards, they swaggered in the direction of their port.

If ao Tianba's fleet had dared to do this, they would have been devoured like a piece of fat meat delivered to their door. Even if it was su Lu's ship, there might be people who would dare to touch it. However, no one dared to simply swallow this fleet.

Because this was the ship that needle in cotton, who ranked first among the 20 fleets, was overjoyed about!

This person was powerful, and his fleet was even more powerful. In terms of combat ability, su Lu was probably the only one who could fight him head-on. However, that was not the point. The point was that he was resourceful and had a good relationship with the other fleets. Only su Lu was determined to replace him, so he did not pay much attention to him.

However, if you think that ye da Xi is a good person, then you are really wrong. What is a needle in a cotton? When you don't provoke him, he's like soft white cotton. You're good, I'm good, everyone's good. If you dare to provoke him, you'll know what it's like to be sharp.

When the treasure ship passed by, the people on the ship were very polite. They respectfully passed a message from ye Daxi to the fleet leader.

"Everyone is doing business peacefully, and everything can be discussed. I'm just afraid that some people don't want to do business well! I hated fighting and killing the most. In order to avoid getting caught up in such a troublesome situation, interested friends can come to my port for a gathering. We can discuss together if we should stick together to keep each other warm and prevent anyone from ruining the peaceful and friendly atmosphere between us. Of course, if you don't want to join, it's fine. If you like my treasure ship, you can take it, but this way, the small boat of our friendship will capsize at any time!"

The messengers were all ye Daxi's trusted aides, and they imitated ye Daxi's tone to perfection. They didn't speak much and spoke very casually. There was also a hint of ridicule in their words. They didn't sound very serious, but no one would really think so.

What would be the consequences if the boat of friendship with ye Daxi capsized? Was there a need to ask? He was the only person that su Lu, the battle maniac, could not defeat in a direct battle between the two fleets. Although su Lu did not lose, the other fleets were no match for them.

Ye Daxi had taken the initiative to show his goodwill. It was one thing for people of different beliefs to not work together, but if anyone dared to touch his ship, they would be tired of living. Not to mention ye Daxi's own fleet, the other fleets would probably attack him together. They could gain benefits and make friends with ye Daxi.

Hence, after hearing the message, the fleet leaders all smiled, and replied with a similar meaning, ""With chief ye's help, we can all do business peacefully. A peaceful environment is more important than anything else. I believe that we will achieve a good result under chief ye's leadership."

"Captain, you are indeed a good friend of our leader. Please continue to our port. Everyone can have a chat with our leader first. I've been working so hard, but I still need to continue sailing and try to find more good friends to join us in this great event!" Ye Daxi's trusted aide looked very happy and immediately left.

Those fleets that had determined to join the alliance had started to make calculations on the way. As long as they formed an alliance, this Sea area would be absolutely safe. By then, large warships would lose their significance.

Everyone was an old-timer, so how meticulous was the calculation in their hearts? Once the Alliance was established, just the ancient warships alone could form an invincible fleet. The mobility of large warships was incomparable. It was better to change all of them to treasure ships and carry out large-scale trade in the safe sea.

A fleet formed by ancient warships was enough to sweep away all opponents. As long as the scope of trade expanded, resources and capital would come in endlessly. It did not matter if they used the ten thousand mile formation to travel. How terrifying would an unrivalled fleet that could appear in any region at any time be? Just thinking about it gave him goosebumps!

He had to meet ye da Xi as soon as possible and join this Alliance! The fleet of ancient warships did not need to be too many. Six to eight warships were enough. If there were more, ye Daxi would not be able to control the final distribution of points. Therefore, the earlier he joined, the more cost-effective it would be!

While Lin Yi and ao Tianba were still talking about whether he was the one developing the fastest, ye Daxi had already formed an alliance with the first three fleets by the time su Lu took down the Third Fleet and controlled the safe waters of four ports. The other three fleets were also on their way to join forces.

In just a short month, the embryonic form of the way of the king and the seeds of tyranny had begun to take shape. The remaining five fleets had not yet come into contact with the vanguard of these three parties and were still attacking each other. In the end, they would only become the prey of the three parties!

With only one flagship left, Gu Yunhao and the captain of the 12th Fleet, who had no funds or reinforcements, could only wander around the sea, hoping to find an opportunity to rise again.

"Brother Lin, are we going to return or continue to the port?" Arriving at the northern port, ao Tianba was in a good mood after completing his first large-scale trade. The prices of the special products in this illusory array were almost the same. In one voyage, the price had directly doubled. From the perspective of the voyage, this was quite a good profit.

Chapter 6375 Getting Rich Together

Lin Yi estimated that the base's specialty products would have higher profits the further the port was, but it didn't make much sense. It was enough to change goods at every port, at most they'd lose some loading and unloading fees.

"Brother ao Tian, this port now belongs to us. Leave a large warship to patrol the nearby waters, and then we will go back and take over Gu Yunhao's port!" Lin Yi looked at the map and pointed at the harbor.

Aotian port was located in the southwest of the 20 ports. In the South, there were two more ports further south than Gu Yunhao 's.

"You mean to take down all the ports in the South and form a stable rear?" Ao Tianba had this in mind as well, and he guessed it as soon as Lin Yi mentioned Gu Yunhao's port.

"That's right. If we continue North, the two port fleets behind us might cause trouble behind us. Things will be much easier after we subdue them." Lin Yi nodded. After coming to this port, he had a feeling that if he continued North, there would be some unexpected changes.

It was because of this that Lin Yi wanted to stabilize his base first before heading north. As for the ports in the East, there weren't many ports because of the terrain. Other than the port of the twelfth Fleet, the rest were very far away. Not many people would cross such a wide sea to come over because it was too time-consuming.

"I think so too. With our current strength, it's not too difficult to defeat them. Especially after this return, our previous flagship may be almost repaired. With two ancient warships, it will be easy to wipe them out." Ao Tianba laughed out loud. As long as they took down the two ports, even if they did not develop further, they would be able to earn a large sum of money just by trading in this Sea area. The

primary task of this competition was naturally to obtain more special products, but money was also an important aspect.

Using this sea as a production area and bringing enough supplies, they could use an ancient ship to trade their specialties at the ports. With the ten thousand mile formation, they didn't have to worry about danger at all. After all, ao Tianba had never heard of someone who could disrupt the formation like Lin Yi.

"Brother ao Tian, although it's not difficult to defeat them, I think we should still look for the possibility of cooperation." Lin Yi wasn't afraid of fighting, and he thought that fighting would help him develop better, but he didn't think that starting a fight was the right choice.

This could be seen from the battle process of the other two fleets, except for Gu Yunhao. Lin Yi always let the opponent attack first and only counterattack after he had a reason. Why would su Lu talk so much nonsense? If you're not convinced, then fight. If you want to surrender, you have to do it as soon as possible. If you're late, then you'll be sorry. Once you activate storm dash, you can't stop!

"You mean? Using powerful strength to intimidate the other party, and then giving out conditions that would be a win-win situation?" Ao Tian BA scratched the back of his head. This was something he had never thought of.

"That's right. They don't need to surrender. They just need to join our fleet. In the beginning, we had no reputation and no strength. If we proposed an Alliance, no one would respond to us. But now it's different. We have enough strength. If they join us, we can cooperate and trade. Everyone will profit, and our strength can be maximized without any losses." Lin Yi smiled-the more he spoke, the clearer his thoughts became. There was another benefit to doing this-he wouldn't offend too many people.

Ao Tianba was only ranked 19th. If they continued to sweep the competition, it might cause public outrage. Even if they could get high marks in the first event, they did not know what the competition would be like in the future. If they were targeted collectively, it would not be easy to get one of the two spots.

Now that ao Tianba had the absolute advantage in strength, he was still willing to get rich with everyone. Although he might not be able to gain much friendship, it would at least reduce the number of potential enemies.

After all, Lin Yi couldn't stay in the fleet forever-ao Tianba's fleet wouldn't be as strong as it was in the formation after the festival ended, and he had to make some considerations.

"Lil bro Lin is really considerate, why didn't I think of this? This matter is settled!" Ao Tianba made the decision-he understood Lin Yi's concerns very well, and was even more grateful.

To have such a brother who thought for him wholeheartedly, what else was there to say?

The fleet began to return. This time, all the treasure ships returned with a full load. Ao Tianba had also bought a treasure ship at the port, forming a huge fleet of nine treasure ships.

Just this transaction alone would allow him to earn a huge profit, but the speed would naturally be delayed.

When they returned to the AO Tian port, the original ancient warship had just been repaired, and it would not delay the next voyage. After adding another precious ship, the larger trading fleet began to set off for Gu Yunhao's port.

A port's defense was supposed to be able to withstand the attack of two initial fleets, which meant two ancient warships, two large warships. Ao Tianba's fleet had exceeded this standard, and with Lin Yi's control, their power was on a whole different level.

No one knew where Gu Yunhao had run off to with his flagship, so his port was easily taken over by Lin Yi after a little resistance.

After trading the accompanying goods, ao Tianba's fleet was once again loaded with goods and set off for the next target.

Halfway through, they encountered a fleet from another port. Seeing such a large fleet, the other party had no intention of resisting. After negotiations, they heard that they could keep their fleet and profits, and that they only needed to join the alliance led by ao Tianba to fight together. They immediately agreed with joy. They thought that they would be destroyed, but they did not expect to become even stronger. Why not?

The fleet at the last port had also joined the Alliance fleet. Facing three ancient warships and more large warships, this was the best choice.

The second month in the illusory formation had passed, and the situation was getting clearer. Ho Hao was sitting on a chair, drinking tea leisurely while watching the water screens. Of course, there were many that he didn't need to pay attention to anymore. People had either been eliminated or joined their own alliances.

Chapter 6376 One Against Two

Right now, he Hao's focus was on the three water curtain Taowu ye da Xi, su Lu, and ao Tian BA!

"This is interesting! What will it end up like?" He Hao put down his teacup and swiped his hand. A Sea Map with different colors appeared in front of him.

This was the distribution of forces in the illusory formation. Ye da Xi, who was the first to complete the Alliance of the seven families, obviously had the greatest advantage. Not only was he strong and had a complete fleet, but because there was no war, the trade had always been carried out in a peaceful environment, so he had accumulated a large amount of resources and capital.

Su Lu lived up to his name as Gale. As he swept through the area, he actually occupied seven ports. Now, he had five ancient warships in his fleet. He kept ten large warships to form the second Fleet, which was the backup fleet for the First Fleet that was made up of ancient warships.

Because the rear was safe enough, and the trade was going very smoothly, it provided him with a steady stream of resources for his conquest. Although it was much worse than ye Daxi's Alliance, it was all his. If the competition ended, su Lu would undoubtedly be the one with the highest points. No one could compete with him.

"Su Lu's overbearing choice is indeed more advantageous than ye Daxi's kingly choice in the short term. However, the latter's advantage is that he has a lot of talents under his command. The complete framework of the seven fleets is still intact. Su Lu's fleet alone can't compare to him. In the final battle, ye Daxi will probably win, while su Lu will be completely defeated!" He Hao sat on the stage and muttered to himself. However, this time, his voice was too soft, so no one could hear what he was saying.

Those who saw this scene could only sigh in admiration in their hearts. Vice President he Hao's talkative nature was truly heaven-defying. No one was talking to him, but he was able to talk to himself for a long time. No one knew what he was talking about. Fine, it didn't matter what she said. She didn't want to know anyway ...

No one would have thought that he Hao was not talking nonsense, but making his own analysis of the situation in the illusion array.

"What surprised me the most was ao Tian BA. He's also developing well and has occupied six ports in the sea. He's not inferior to the two boys. Although he has the least ancient warships, only four, his combat strength can't be underestimated. If it weren't for the ancient warships of the two defeated generals that were still wandering around in his Sea area, perhaps he could have developed better?" He Hao's evaluation of ao Tianba was quite high, and in fact, it was extremely accurate.

Gu Yunhao and the twelve fleet's flagships were moving around in this area, which greatly affected Lin Yi and ao Tianba's development. The two of them were actually working together to harass ao Tianba's route.

Lin Yi and ao Tianba had no choice but to gather all their ships together and form a huge fleet for trade. Compared to ye Daxi and su Lu, they were far behind in terms of capital accumulation.

Lin Yi made up his mind and bought a large number of small fast ships from all the ports, scattering them into the sea area formed by the six ports. As long as he found the two, he would immediately send a message to the flagship.

While he Hao was lamenting in the outside world, a few days had passed in the illusion formation, and Lin Yi's plan finally bore fruit!

"Ancient warship found! The two ships are together!" Lin Yi's eyes turned cold as he received the message.

"Brother ao Tian, I'll go and hold them back first. You three ancient warships will follow after me. This time, we must not let them off!" For this operation, Lin Yi became the captain of another ancient warship, while ao Tianba and the other two allies controlled their own flagships.

In order to improve their combat ability, Lin Yi took the time to train the people he picked in the skills of controlling the two formations. They couldn't do what he did, but they were much better than before. So the two captains who joined the Alliance were overjoyed. This was a real benefit. After leaving the illusion formation, their skills wouldn't disappear. In the future, their ancient battleships would be able to exert more power on the sea, and because of this, they could use their ancient battleships to their fullest. They were determined to build a good relationship with ao Tianba.

"Don't worry, brother Lin, we won't let these two escape!" Ao Tianba was also rubbing his palms. He was already sick of these two robbers who had two ancient warships.

However, there should be no problem this time. Those two guys had lost their own ports and had no source of funds. The consumption of resources was almost at the limit. Whether they still had the strength to use the ten thousand mile formation was another matter.

According to the coordinates given by the small speedboat, Lin Yi activated the ten thousand mile formation and appeared in the sea in a flash.

Now that he had plenty of ancient battleships, even if it was one against two, it wasn't impossible to win. As long as they didn't use the ten thousand mile formation to escape, Lin Yi didn't even need the help of other ancient battleships.

However, to be on the safe side, it was more appropriate to use the encirclement method.

When Gu Yunhao and his companion's ancient battleships noticed the light of the ten thousand mile formation, they immediately knew that something was wrong. Although there was only one ancient battleship, they did not dare to take the risk. After all, they had personally experienced the combat power of ao Tianba's ancient battleship. They were already like birds startled by the mere twang of a bow.

As soon as Lin Yi appeared, he realized that the target was still some distance away from him. The Starfall formation couldn't affect them, and the two ancient warships kept a considerable distance from each other. They obviously wanted to help each other to avoid being caught in one fell swoop.

"How cunning! Then we can only choose one first!" Lin Yi's eyes flashed as he activated the ten thousand mile formation again. He chose the ancient warship first.

Since he could still use the ten thousand mile formation, it meant that he still had resources. Moreover, the activation speed was faster, making it easier to escape. He had to kill this guy first.

In terms of speed and frequency, no one in the entire Sky Class Island or the yellow Class sea could compare to Lin Yi. So before the ten thousand li formation was activated, Lin Yi's ancient battleship appeared beside him as if it had teleported. The lights of the two formations intertwined, interrupting his activation.

Starlight flashed in the sky as the Starfall formation followed. The shield of the ancient warship shook, but what Lin Yi didn't expect was that the other warship didn't take the chance to escape. Instead, it started attacking Lin Yi's ancient warship.

Chapter 6377 Self-Destruction!

Although the opponent's attack couldn't penetrate the shield of Lin Yi's ancient battleship, there was a slight vibration. Lin Yi thought that the ancient battleship that was bitten by him would take the opportunity to distance itself and get out of the attack range of the Starfall formation. However, the reality shocked him again.

The ancient warship that was attacked didn't try to escape. Instead, it started to pester Lin Yi and even learned his tactics from before, attacking and hitting Lin Yi's ancient warship at the same time.

This was the crudest way of fighting, but to them, it would consume more of Lin Yi's energy shield and increase their chances of winning.

"Are you trying to kill me?" Lin Yi blinked and found it funny. The resources of the two ancient warships were probably not as much as him alone. As long as they didn't run away, so what if they fought one against two?

The descending star formation's speed was not affected at all. The two ancient warships on the other side also started to activate the descending star formation, and the entire sky was covered in Starlight.

Unfortunately, the combined attack speed of these two ancient warships wasn't as fast as Lin Yi's alone. If it wasn't for the fact that the ancient warships didn't move much, it would be a problem if they could focus on Lin Yi's ancient warship.

"Eh, are these two guys crazy? They didn't even run because they felt that there was no hope, so they gave up completely?" In the distance, the light of the ten thousand mile formation continued to flash. Ao Tianba and the other two had also arrived. They were also a little surprised to see the current situation.

"That's probably the case. Anyway, if they continue, they won't get any points. They might as well risk their lives to destroy an ancient warship and let you suffer some losses!" Zhang Jinmiao smiled and shook her head. She wasn't worried about Lin Yi's situation. Not to mention that Lin Yi's ancient battleship still had the upper hand, even if he was at a disadvantage, he could still turn the situation around!

"Master, I think they're trying to kill Lin Yi. Think about it, if Lin Yi gets eliminated, we'll have one less powerful force to attack, and it'll be hard for us to get the upper hand against the other fleets. These two bastards know they can't do it, so they came up with this plan to bite him to death." Shangguang Lan'er had always been on Lin Yi's side, and she came up with a very reasonable reason.

"It really is! I'm afraid that's what these two fellows are thinking!" Ao Tianba nodded his head repeatedly. He was not idle either. He commanded the other two ancient warships to surround them from the left and right, hoping that they would succeed in this battle.

Lin Yi quickly understood the situation. The two were planning to run, but after seeing the familiar tactics, they changed their minds and wanted to get Lin Yi out with them.

Unfortunately, they were not strong enough. Even if they went all out, they would only be throwing their lives away!

The three ancient warships of Ao Tianba and the others surrounded the three ancient warships in the middle. Then, they closed the encirclement and aimed at them slowly.

The momentum of victory was already irreversible, so ao Tianba and the others were not in a hurry at all. As long as the two ancient battleships did not use the ten thousand mile formation to escape, it would be fine.

In fact, with Lin Yi here, it would be hard for them to escape. They all had the same ten thousand mile formation, and as long as they were locked on, it was not impossible to chase them.

Gu Yunhao's face was filled with madness. He was the ancient warship that was fighting Lin Yi at close range. Out of his hatred for ao Tianba, he would rather be eliminated and lose all his points than to drag the master who controlled the Starfall formation and the ten thousand mile formation down with him.

"I admit that your attack is powerful, and your pursuit is also powerful, but I'm not made of mud! If you want me to die, you'll have to pay the price!" Gu Yunhao had always been a ruthless character. Otherwise, he wouldn't have been able to make such a big name for himself at sea.

This was just a battle in the illusory formation, so what was there to be afraid of?

"Get close to him! Get close to him!" Gu Yunhao roared as he ordered his men to continue attacking Lin Yi's ancient battleship. At the same time, he started to detonate the Starfall formation and the ten thousand miles formation, ""I'm not as good at controlling formations as you are, but I'm not necessarily worse at self-destructing formations!"

No one had ever used the formation on the ancient warship to detonate the entire ancient warship. Firstly, it was because the ancient warship's defensive power was strong and it was difficult to break through the defensive shield. Secondly, the existence of the ten thousand mile formation greatly enhanced the life-saving ability of the ancient warship. With an impenetrable defense and the ability to leave the battlefield at any time, who would be willing to self-destruct the ancient warship?

Gu Yunhao was willing to do so!

After all, they had nothing left. This was not a real ancient warship, and staying behind would only benefit ao Tianba. What else could they say?

Self-destruct! Self-destruct! Self-destruct!

The falling star formation was the first to be detonated, followed by the ten thousand mile formation. The entire ancient warship had turned into a powerful Giant Bomb!

Lin Yi's pupils contracted-he didn't need the Jade space to alert him, and he could already feel a huge danger engulfing his body!

"Full speed escape!" The veins on Lin Yi's forehead were popping as he screamed. He knew that it was impossible to rely on the crew to escape!

A beam of Starlight suddenly descended, sticking close to the shield of Lin Yi's ancient battleship and piercing in forcefully.

Gu Yunhao's first self-explosion collided with the Starlight, causing a violent turbulence. At this critical moment, Lin Yi's mind was unusually focused. This time, the Starfall formation was also completely beyond his level. It was not only an attack but also the first layer of defense of his ancient battleship.

After the Starfall formation exploded, the shockwaves hit the shield of the ancient warship. It was countless times less powerful than the self-destruction of Gu Yunhao's double formations. It didn't cause much damage to the shield of Lin Yi's ancient warship, but the impact force pushed the ancient warship back.

The escape order that was carried out by the flustered crew complemented each other well.

"No! The ten thousand li formation could not be activated! The spatial fluctuations caused by the enemy's self-destruction are too intense. Using the ten thousand mile formation will only send the warship into the Tiger's mouth and be completely torn apart by the spatial Rift!" Lin Yi's brain was working at full speed. After failing to activate the ten thousand miles formation, he could only continue to use the Starfall formation to block the ancient battleship.

The self-destruction was extremely powerful, even the Starlight from the Starfall formation was as fragile as an egg shell. It only gave Lin Yi's ancient warship a little time to breathe!

But to Lin Yi, having time to catch his breath was better than having no time at all. In just a short moment, he'd made five beams of Starlight fall-this was a Grand undertaking that he'd never done before. As expected, only in times of crisis could one break through their limits.

Chapter 6378 Unable To Save Himself

After five beams of Starlight, Lin Yi's fingers that were controlling the formation were about to break. This was his absolute limit, and there was no way he could stop the self-destruction.

"This is our chance!" Lin Yi, who was about to give up, suddenly found another ancient warship nearby. The aftermath of the continuous Starlight destruction pushed the ancient warship towards the enemy.

In that moment of life and death, Lin Yi activated his Thunder escape technique and appeared beside the crew member who was steering the ancient warship. He didn't have time to say anything and pushed him to the side. He controlled the ancient warship to make a large turn.

The battleship barely managed to turn a little, and the aftermath of the self-explosion hit the shield of the ancient battleship. Because of the forced turn, the area of contact was larger, and the pressure on the shield also increased.

With a clear cracking sound, the defensive shield was completely shattered, but thanks to it, Lin Yi's ancient warship was pushed away again. Although the hull was damaged, it wasn't damaged at all.

Lin Yi used this momentum to drive the warship behind the first ancient warship, using it as a shield.

If the other ancient battleship self-destructed as well, Lin Yi would be thrown into hell. There was no way he could survive. Fortunately, Gu Yunhao's self-destruction had obviously shocked his comrades. They were stunned for a moment, and the chance would never come again.

"What's going on?" Ao Tian BA was dumbfounded as he watched everything that had happened from a distance. Although their battleship was approaching, it was not within the range of the self-destruction. Even so, he could not react when he saw Gu Yunhao's self-destruction.

Lin Yi's continuous narrow escapes from death happened in the blink of an eye for ao Tianba. No matter how powerful Gu Yunhao's ancient battleship self-destructed, it disappeared as quickly as it came. At the center of the explosion, the entire sea surface was vaporized, forming a huge pit. The flames that shot up into the sky were wrapped in countless water vapor, instantly forming thick clouds. There were even faint thunderclaps and flashing electric arcs in the sky.

Lin Yi, who had just escaped death, was at the edge of the explosion, the edge of the deep hole. The other ancient warship that Lin Yi used as a shield was in a worse state. The shield was completely shattered, and the entire ship was half-destroyed. If it wasn't for the fact that it was at the edge, it would have been destroyed.

From the looks of it, it was impossible for him to self-destruct.

The deep hole in the sea surface lasted for a few breaths of time before the surrounding seawater started to pour in. Lin Yi's ancient warship was also severely damaged. Although he had the 'shield' to block it, he wasn't a professional after all. He was still hit by some of the impact. At least, he didn't have enough power to get out of the pouring seawater.

With a flash of lightning, Lin Yi returned to the control panel and continued to activate the ten thousand miles formation. After the self-destruction, the space was still unstable, but Lin Yi had no other choice. If he was hit into the deep hole by the waves, he wasn't sure if the ancient battleship could take it after losing its shield and being damaged.

It would be the biggest joke if he did not die from the self-destruction of Gu Yunhao's ancient battleship but was pushed aside by the waves!

"Brother Lin!" Ao Tianba's face changed. He could see Lin Yi's situation, but it was too late for him to save Lin Yi now. His only hope was for the miracle-maker to escape.

"Ten thousand li formation, activate!" Lin Yi could already feel the ancient ship starting to tilt. The entire ship was already over 70 degrees, and it wouldn't be strange if it continued to tilt 90 degrees.

Lin Yi used up all the remaining energy in the ten thousand mile formation, and a strong light started to cover the entire ancient battleship. The turbulence in the space didn't stop, though. Lin Yi wasn't sure if he would succeed this time, but he could at least make sure that he wouldn't die from the waves.

Being torn apart by the spatial turbulence was much more impressive than being slapped to death by the waves. Even if he was going to be eliminated, he should at least leave with a bang!

"I've succeeded!" Ao Tianba was overjoyed. The light from the ten thousand mile formation broke free from the waves and brought Lin Yi's ancient ship to a dozen miles behind Ao Tianba's ship. However, they were still in the same position as before, falling into the sea vertically at a 90-degree angle. They created huge waves and increased the damage to the ship.

"You guys retreat, I'll go get Lin Yi!" Ao Tianba didn't have time to say anything else. After sending the signal to the other two ancient ships, they started flying at full speed towards Lin Yi.

Although the three ancient warships were not within the range of the self-destruction, the deep pit left on the sea surface formed a huge vortex due to the reverse flow of the sea water. The scope of the vortex was getting bigger and bigger, and with the thunderclouds in the sky, it was almost going to become a super storm!

Even an ancient warship would be in danger in a Super Storm like this. Ao Tianba wanted the other two warships to leave immediately. As for him, he wasn't going to leave Lin Yi behind.

It was a pity that Lin Yi's men couldn't compare to him in terms of controlling formations-ten miles was still too close. Activating the ten thousand miles formation would take them at least a few hundred miles away, and Ao Tianba didn't dare to come back for Lin Yi after that.

"Unlucky!" Lin Yi couldn't help but complain. After his ancient warship fell into the sea, it could fall in any direction because of its vertical orientation.

The best choice was to move forward so that the ship could land steadily on the surface of the sea. If that didn't work, it could also move left or right. As long as one's luck wasn't too bad, they might be able to maintain their balance if they tried their best to control the ship. In the worst case scenario, it wouldn't matter if it flipped over. Ao Tianba would arrive soon, and with the help of his ancient warship, they would be able to pull it back quickly.

Unfortunately, Lin Yi's luck was all used up in that instant. It wasn't even 90 degrees vertical, but when the stern fell into the water, it overturned the entire ancient warship along with the bow. The impact was stronger than any other, causing more damage to the ancient warship.

If it was just that, Lin Yi would've endured it, but misfortunes never come alone!

Under the extreme control just now, the falling star formation and the ten thousand mile formation were both in a state of being unable to be activated. It was impossible to rely on the formation to save himself!

Chapter 6379 Disparity In Strength

"Everyone, leave the warship!" Lin Yi was helpless. The whirlpool and storm in the distance were both preparing for a huge explosion. If he continued to stay in this broken ancient warship, he had no other choice but to wait for death.

Although the crew of this ancient warship were all from the illusion formation, and it didn't matter if they died, Lin Yi still hoped that more people could escape. As long as ao Tianba came as soon as possible, they might be able to get everyone out.

As for the ancient warship, they could only wait for the storm to subside and see if there was any possibility of salvaging it for repair. If it did not work, then so be it. After all, they had taken down two ancient warships and solved the biggest problem for ao Tianba's fleet.

Since the entire ship was upside down on the surface of the sea, Lin Yi decided to completely destroy the bridge and cabin walls so that everyone could enter the sea and get up to the surface before the ship sank.

He didn't stop either. With a flap of his ghost speed wings, his entire body was like a sharp sword that cut through the sea water and directly soared into the sky.

After the flash, Lin Yi was already in front of ao Tianba's battleship. Ao Tianba was assured that Lin Yi was out of danger and immediately ordered people to open the shield to welcome Lin Yi in.

"Brother ao Tian, get ready to save them!" Lin Yi rushed into the bridge like a bolt of lightning and yelled at ao Tianba as he took over the person controlling the formation.

Seeing Lin Yi coming over, the man immediately stepped aside and looked at Lin Yi with respect. This was his idol, the number one in the world when it came to controlling ancient warships!

The ten thousand mile formation was activated in an instant. Lin Yi's control of distance was extremely precise, and he arrived beside his ancient ship in a flash. There were already some crew members who had escaped from the sea, and the aotian BA crew had rushed to the deck to help them board the ship.

A minute later, the whirlpool and storm were formed and started to move in this direction. Lin Yi had saved about 90% of the crew on the ancient ship, but there were still some who were deep in the ship and couldn't get out in time, or they died from the continuous collisions. No matter what, Lin Yi couldn't wait any longer.

If this ancient battleship was caught up in the storm and damaged, their fleet would be at a disadvantage in the Alliance and lose their deterrent force. It was hard to say whether the other two fleets would still have ao Tian BA as their capital.

"Let's go! They're returning!" Lin Yi let out a breath and smiled. He activated the ten thousand mile formation again and teleported to where the fleet was.

"I didn't expect things to turn out like this. I just said that they have the ability to fight the other two guilds, but they've already suffered such a blow. If I'm not wrong, ye da Xi and su Lu will definitely kick away the other disruptors before the final battle. Ao Tian BA is the only disruptor. I'm afraid they won't be able to hold on for long against the full-force attacks of these two guilds." He Hao had just finished muttering to himself when he saw the situation on ao Tianba's side take a turn for the worse. He immediately let out a sigh of regret.

"But ao Tianba's fleet didn't come back empty-handed, either. At least they've gotten rid of their biggest threat. From now on, being able to safely trade in the sea under their control is a considerable gain. What a pity, ye Daxi and su Lu are almost done with their integration, and there's not much time left for ao Tianba. There are only so many ancient battleships, and even if they can recover the wreckage, they'll still be able to repair it. How useful would it be?" He Hao continued to mumble to himself. The people around him were already used to it, so no one paid attention to what he was saying.

"Look, look, what did I just say? ao Tianba doesn't have much time left! Ye Daxi had already started to send out his troops! The fleet of seven ancient warships was going against them with the force of Mount Tai! Although there are only five ancient battleships, which is less than ye da Xi 's, it's still two more than ao Tian BA ' s. Moreover, the combat ability of these two people is not something that Gu Yunhao and the others can compare with. Ao Tian BA is really in danger!" He Hao's self-entertainment skills were unparalleled.

Gu Yunhao, who had already been eliminated, was sitting below and glaring at ao Tianba's fleet. If it wasn't for the protection of the restriction, he would have rushed forward and killed ao Tianba's group. He didn't know that he was being used as a negative example by he Hao. Of course, even if he knew, he wouldn't dare to say anything.

He Hao was in charge of the distribution of all the sailing routes, so he could talk nonsense all day long, but Gu Yunhao did not dare to say anything more. Although he Hao's reputation of being impartial and incorruptible was very well-known, in this world, the grass on the grave of those who believed in rumors was already three feet tall.

Lin Yi didn't know that there was someone in the outside world who could see the whole situation from a God's perspective, and he'd even give his own opinion. He only knew that their fleet was in danger.

"Brother ao Tian, there's news from the small rapid-speed ships that are scouting outside. Two fleets made up of ancient warships are heading towards us. One has seven ancient warships and the other has five ancient warships. They are much stronger than us." Lin Yi frowned-this was a dangerous situation!

The ancient warship had already sunk. After the storm, it was finally salvaged, but it was already severely damaged. Even if it could be repaired, it would take at least two to three months.

Although there was still half a year to the one year deadline, with the current dangerous situation, if they were not careful, they might not even be able to hold on for a month.

"They didn't use the ten thousand mile formation to launch a long-distance surprise attack. I'm afraid they want to crush us in an open and aboveboard way. However, this will give us time to deal with them. Brother Lin, do you think we still have a chance to take them down one by one?" Ao Tianba was already addicted to taking down the two fleets one by one. If he could take down the two fleets, the first place of the first round would basically be his.

"Brother ao Tian, you think too highly of me. This isn't some random person, but a fleet of five and seven ancient warships! To be able to gather so many ancient warships, how could they be easy to deal with? How many ancient warships do we have? Three ships! This is only half of the five warships, which is enough to prove that the enemy's combat ability is definitely not below ours. If we try to compete with them head-on, we will definitely lose!"

Chapter 6380 Pretending To Be A Mouse

Lin Yi shook his head with a bitter smile. He knew where his limits were, but he didn't have any confidence in facing an ancient warship that was many times his size.

Gu Yunhao's two ancient warships had almost killed him. Where were the enemies now? Even the smallest fleet had five ships! Two of them would fight the other two ancient warships while the other three would focus on the one Lin Yi was on. Could they stop them? It definitely couldn't be blocked!

"You mean? Don't fight them head-on?" Ao Tianba wasn't a man without a plan, and he understood the meaning behind Lin Yi's words.

"We definitely can't fight them head-on. These two families are stronger than us. Not only can we not fight them head-on, but we also have to show our weakness! We'll let them look down on us!" Lin Yi's

eyes lit up. He was at a disadvantage, but it wasn't an unsolvable situation. There might still be a chance to turn the tide!

"Boss, it's said that this Sea area is occupied by the 19th ranked ao Tianba. It's not easy for such a small character to be able to thrive!" Su Lu was still standing at the bow of the ship, enjoying the sea breeze. The Deputy next to him was still as carefree as before, chatting with su Lu with a smile.

"To be able to occupy such a large area of the sea, it means that ao Tianba's ability has been severely underestimated. Our intelligence shows that there are only three forces left. Other than that hypocritical hypocrite ye Daxi, it's US and ao Tianba. Moreover, ao Tianba's sphere of influence is only one port less than ye Daxi's and US. Interesting." Su Lu squinted and chuckled. He licked his lips slowly, and his eyes were glowing with excitement. It was a great thing to meet a qualified opponent.

Of course, ao Tianba might not be su Lu's real opponent yet, but he was still a good Whetstone. It would be an honor for su Lu to take care of this interesting guy before he fought ye da Xi!

"Boss, you're wrong. We're about to take down one of the ports in otainba, so they're not just one port behind us, but three!" Su Lu's assistant was still grinning cheekily. He even extended his palm and counted on his fingers.

"Haha, that's right. Ao Tian BA's first port is right in front of us. We're still following our usual strategy of steadily devouring the enemy's territory and expanding our own safe sea area! Inform the small ones to prepare for wind charge!" "Attack!" Su Lu waved his hand and pointed at the outermost port of ao Tianba with his right index finger.

"As you command! Boss!" The frivolous assistant immediately stood up straight like a sword. Every time he was about to attack, it was the stage for him to show his bloodthirsty side.

On the other hand, ye da Xi had issued the order to attack at almost the same time as su Lu. However, before he gave the order, he did not forget to send a message to ao Tian BA to persuade him to surrender.

As long as ao Tianba was willing to surrender, ye Daxi guaranteed that everyone who followed ao Tianba would be able to earn points. Of course, the number of points was up to him, and it would definitely not be more than the fleets that were in an alliance with him. After all, the six fleets were in an Alliance, while ao Tianba had surrendered. This was not a status that could be compared.

"What a pity! If ao Tianba had been given more time, he might have been pleasantly surprised. However, there was no hope now. He just didn't know how he would react. Eh, was he going to resist to the death? Relying on the port's defensive advantage and cooperating with the fleet to fight the enemy? It wasn't that they couldn't, but they were trapped in the city and had lost all the sea routes and trade. It was equivalent to losing all the supplies. How long could they last? Ao Tianba's choice is a bit disadvantageous!" He Hao had just finished talking about ye Daxi and su Lu when he turned around and noticed ao Tianba's reaction. He immediately expressed his dissatisfaction.

It was like watching a big show. At the most exciting moment, one of the main characters suddenly collapsed. That feeling was very infuriating.

Ao Tian BA, on the other hand, didn't have the time to think about anything else. He was following Lin Yi's orders and moving all the port defenses back to the port. After some development, the port's defenses were upgraded, but it wasn't enough for the time being, so the increase wasn't big enough. With the help of the ports, it could defend against at least three fleets.

Three fleets were equivalent to three ancient warships. Together with ao Tianba's own fleet, they stood a chance against su Lu's fleet. They just lacked mobility.

"Reporting! The first port in the North has been taken down by the SU LU Fleet, and the first port in the East has been taken down by ye Daxi's fleet. They are not injured and are now heading towards the AO Tian port!" A crew member in charge of intelligence quickly sent the latest battle report to ao Tianba.

The enemy's next target happened to be aotian Harbor! Whether it was the North or the East, as long as they continued to move forward, they would naturally pass by the AO Tian port first!

"Very good. They have successfully taken down the first port, so they will definitely underestimate our combat power. The next time is a crucial time. We will block them out of the AO Tian port. Then, the two hostile forces may start a war." Ao Tianba laughed out loud, as if he didn't care about the collapse of the two ports.

In fact, he didn't think much of the two ports. Lin Yi's plan was to use the ports to numb the enemy.

What would the cat do if it thought it had caught the mouse?

Perhaps it was to eat him, or perhaps it was to play with him!

However, there was no doubt that when another cat thought the same and appeared in front of the other cat, they were likely to put aside the mouse that they could swallow at any time and fight with their competitors to determine the ownership of the mouse.

Of course, there was another possibility that the two cats would first cripple the mouse and then fight over it. Then, as a mouse, it would be really sad!

Ao Tianba didn't want to be a mouse, but he didn't mind disguising as a mouse first to make the two cats let their guard down. Then, at the critical moment, he could kill both cats with a single strike.

"Brother ao Tian, don't worry. Ao Tian port will be fine! We'll definitely be able to win in the midst of danger!" Lin Yi was standing behind ao Tianba, a smile on his face.

"Hahaha, of course I'm not worried. With lil bro Lin here, I won't be afraid even if they send a few more fleets! "By the way, the message you mentioned has been sent out. Ye Daxi and su Lu have probably received it, right? Do you think they'll agree?" Ao Tianba was confident in Lin Yi, but Lin Yi didn't even know if his probing was effective. He couldn't be sure.
