

Bodyguard 6411

Chapter 6411 So Close Yet Worlds Apart

"My judgment of su Lu might be a little wrong. If he uses this saber and uses a suitable martial arts technique, the power he can unleash might be quite powerful. He might even be able to kill cultivators at the early stage of the shattered Sea realm instantly!"

"Of course, if you can't kill the enemy, there's a possibility that you'll be killed instead! Lin Yi, why don't you accept his challenge and let him use this knife as a wager?"

The demonic thing laughed evilly and even urged Lin Yi to get su Lu's knife.

Lin Yi was tempted by the offer. He didn't use knives himself, but he could give them to Leng rufeng after studying them.

"Senior ghost, now is not the time to talk about this, right?"

Lin Yi suddenly realized that he'd been distracted by something. Shouldn't he be focusing on the connection between the knife and the cave?

"Then what should I say? "Oh right, because this saber has its own dimensional scabbard, it causes slight spatial chaos wherever it passes. We usually can't detect this kind of chaos, but after entering the cave, those fine spatial scales will feel it very clearly. For this kind of troublemaker, the spatial scales obviously can't tolerate it. It's like sand has entered your eyes, and it'll be very uncomfortable if you don't get it out."

The demonic thing was indeed very experienced, and it had calculated the situation very clearly.

Lin Yi believed that was the truth. Su Lu was attacked by the repulsion force of the cave after he entered, and his killing intent was probably because he was locked by the spatial crack.

Speaking of which, the space crack should have locked onto su Lu's saber and not him. The space scale only wanted to destroy the saber that had been hidden in the dimensional space.

No wonder nothing happened when Lin Yi and Shangguan LAN 'er entered the cave-su Lu was like a hornet's nest the moment he entered. This jinx could cause so much trouble even with a knife.

"Hey, hey, hey, are you done? My eyes are playing tricks on me!"

Lin Yi and the damn thing came to a conclusion-they came up with a plan to deal with the current situation, but the most important thing now was to make su Lu move the knife away from his eyes.

This guy was addicted to playing with her. There was no end to it!

"How is it? Are you dazed?"

Su Lu pulled his hand back, and the blade disappeared again. The bright light from the blade disappeared instantly, leaving only su Lu's smug face. Lin Yi wanted to give him a good smacking with his shoe.

"Do you want to leave the deserted island?"

Lin Yi cut to the chase.

"Nonsense, you don't want to?"

Su Lu's lips twitched. He felt that he couldn't communicate with this Lin Yi at all-he was just talking nonsense.

"Can you put your saber into your storage bag? Don't keep it outside!"

What Lin Yi was worried about was the fact that the knife had dimensional abilities, and that it might conflict with the spatial laws in the bag.

Since he knew that su Lu's saber could stimulate the space scale, he would have to put the saber away before he could leave. Putting the saber away in his storage bag would mean that he was in another space, which could isolate the dimensional fluctuations!

"Yo, you actually saw through it!"

Su Lu was surprised. No one had ever noticed that his sword was always outside, but Lin Yi said that. He must have noticed something.

He wasn't an idiot-he couldn't find the spatial scale in the cave, but he'd had a rough idea of what it was after a few encounters. Lin Yi's random words confirmed his suspicions.

"Can you put it in? just tell me, we don't have much time."

Lin Yi frowned. If this dragged on, none of them would be able to go back within 24 hours. It didn't matter if they didn't go back after 24 hours since the points were the same.

"Yes, but it will affect the storage bag a little."

Su Lu was very straightforward this time. He raised his hand to summon the long saber and put it into his storage bag.

"Let's go, into the cave!"

Lin Yi waved his hand and went back into the cave. He'd have to try to see if it was the same as he guessed.

"If you dare to talk to me like this again, I'll beat you to death!"

Su Lu felt like he was at a disadvantage in terms of momentum, and he wasn't happy about it. He yelled at Lin Yi's back and followed him in.

Sure enough, without the aura of the saber, the spatial scale was well-behaved and didn't move at all.

Lin Yi and the ghost quickly found the wound left by the spatial crack with their spirit sense. There were countless spatial scales repairing it, but there was still a big gap.

"Senior ghost! Look at that crack, it's a formation flag!"

Lin Yi was overjoyed. He didn't expect to finally see the formation flag of the spatial formation. It was all thanks to su Lu that he came. Otherwise, he wouldn't have been able to find it even after years.

Lin Yi's spirit sense saw it, and so did the ghostly thing. Their spirit senses were in a combined state, and the spatial fluctuation from the flag made the ghostly thing extremely excited.

"Think of a way to get the formation flag. Without it, a hole will appear in the entire formation, and the chances of leaving will increase greatly. It doesn't matter if we can't get it. The invisible barrier around the formation should have a periodic cycle. If I'm not wrong, it will disappear for a period of time after a few hours."

The ghostly thing was very eager to get the array flag and study it-it was great for setting up space-related arrays, but he was worried that Lin Yi would take risks, so he didn't force it.

"I'll try!"

Lin Yi didn't say anything and tried to use the Jade space to put the formation flags into his bag, but the formation flags didn't move at all!

It seemed that Lin Yi's Jade space was only limited to the space he was in. It couldn't do anything to other spaces!

With that thought, Lin Yi charged forward, a super alchemy fire bomb forming in his palm.

The spatial tear was almost completely repaired, and Lin Yi could only try to tear it open again with this method!

If he waited until it was completely repaired, his super pill fire bomb would only be able to wreak havoc in the current space. It would be impossible for him to open a spatial Rift. Was he supposed to ask su Lu to take out the saber again?

With a loud explosion, the Super alchemy fire bomb went straight into the spatial crack. To Lin Yi's joy, it really did tear open a little more. It wasn't much, but it was enough for him to put his hand into the spatial crack.

"Ah, Yingluo."

Lin Yi couldn't help but scream as he reached his hand in. He was prepared but he didn't expect the pain to be this intense, and it came so suddenly!

Countless tiny spatial blade flares instantly tore the flesh off Lin Yi's arm, leaving only white bones. The formation flag was clearly just a little bit inside the crack, but Lin Yi felt like it was thousands of miles away.

This was the real close, yet worlds apart!

Chapter 6412 The Unforeseen Event Of The Array Flag Shattering

"Stop, quickly stop!"

The demonic thing was shocked. He didn't think that Lin Yi's body would be so weak against the space-tearing blade light!

He wouldn't have let Lin Yi get the array flags if he'd known. "Stop! Your hand will break!"

At Lin Yi's level, he could regrow limbs, but the regrown arms couldn't be compared to the original ones, because it involved the simultaneous refinement of the meridians and flesh, which was extremely important.

The new arm could not be exactly the same as the original, so it would have a huge impact on his strength and future cultivation.

Of course, Lin Yi's own pure Qi had healing properties, and he couldn't guarantee that it could change the situation, so it was best not to try.

Right now, he had only lost his flesh and blood. The bone armor was still there, and he could recover it with medicinal pills. Once the bone armor was lost, he would really have to regenerate it.

Lin Yi turned a deaf ear to the ghostly thing's screams-after the pain, the stubbornness hidden in his personality started to rise!

As he gritted his teeth and endured the pain, he activated the heaven's stolen fortune. His true Qi turned into lightning, and countless lightning arcs appeared on his pale skeletal hand, barely resisting the attack of the spatial blade radiance.

The whole process happened in an instant, and su Lu only saw Lin Yi reach out his hand and send a ball of pure Qi into the air, and then burst out with it, followed by a scream!

Before he could react, lightning started crackling around Lin Yi's missing arm.

Lin Yi's finger or finger bone had already touched the flag, but the lightning couldn't block the spatial blade flares at all. It only bought Lin Yi a very short moment.

If Lin Yi insisted on pulling out the formation flag, he'd only end up putting his arm around it and getting nothing.

At this crucial moment, Lin Yi was decisive. He grabbed the flag and pulled it back, hoping to pull the flagpole through the flag.

Unfortunately, his wish didn't come true-Lin Yi had overestimated the formation flag's toughness. The formation flag could survive in the space blade flares only because it was an effect of the formation.

With a slight tearing sound, Lin Yi's arm pulled back like lightning, his pale fingers holding onto the half of the flag. The tattered flag was not even the size of his palm, but it still had a thick spatial aura.

This was indeed an array flag specially used to set up a spatial array!

Lin Yi and the ghost confirmed this when they felt the aura! It wasn't on the same level as Lin Yi's low-level formation flags, which could set up any formation.

It was a pity that there was only half of it left ... The value of a broken formation flag that could be used for research was probably not even one percent.

However, both the ghost and Lin Yi were satisfied. This 1% of the space Array flags was enough to have a huge impact on their array Dao.

"Hurry up and go, don't just stand there!"

It didn't have time to think about the formation flags anymore and started yelling at Lin Yi!

Although the array flag was still in its original position and had not been pulled out, it was a broken array flag after all, and its effect was definitely greatly reduced. No one could say for sure what problems would arise!

The entire deserted island had already started to shake slightly. This was something that had never happened before.

Lin Yi didn't dare to waste any time and put the half of the flag into the Jade space. He threw a healing pill into his mouth and used the heaven seizing Fortune's Qi to heal his arm.

At the same time, he activated the lightning escape technique and rushed out of the cave without looking back. He even grabbed su Lu along the way.

The guy saw Lin Yi's arm disappear in mid-air and then pull it back, but there was nothing left other than bones. He was still in shock and didn't come back to his senses.

He didn't expect to be dragged out of the cave by Lin Yi again, and this made him very unhappy! Alright, she didn't have time to care if he was unhappy or not.

The frequency and intensity of the island's vibrations were increasing. It felt like an earthquake was happening!

Lin Yi didn't think that tearing half of the formation flag would cause such a shocking change! If the outer barrier had not been opened, then everyone would probably be in trouble.

"Lin Yi, what did you do? Why is it like this?"

Su Lu realized that something was wrong as well. The tremors only lasted for a short while. He had never seen one shake so many times in a row.

"I'm helping everyone open up a path. I don't have time to explain to you. You can go by yourself. I'll go over first!"

Lin Yi let go of su Lu and left after saying that.

If he brought su Lu along, his lightning escape technique would be greatly affected. That guy was not slow either. It would be more convenient for everyone if he walked on his own.

Plus, he was back to being a competitor again, and Lin Yi had no reason to keep bringing him along.

The people of the various fleets on the beach had already boarded their ships and were ready to set off. Regardless of whether the invisible barrier around them had disappeared or not, they had to leave the deserted island!

Because looking at the situation on the deserted island, it seemed that it would be dangerous to stay here. It was safer to stay at sea.

Lin Yi's lightning escape was pushed to its limit, and he arrived at the beach in the blink of an eye. He didn't stop as he flew to the small speedboat at the edge of the fog.

At this time, the White bones on his arm had recovered more than half of the flesh under the treatment of pills and true Qi. It looked a little scary, but it was actually not a big problem.

"Fifth brother, go left!"

Lin Yi didn't even have time to greet them as he ordered fifth brother to set off.

The invisible barrier was still there and didn't disappear, but the array flag that Lin Yi destroyed was still effective. Under Lin Yi and the ghost's joint detection, they found a crack a few miles to the left!

It wasn't big, but it was big enough for a small rapid-speed ship to pass through.

"Follow them!"

Ye da Xi's sharp senses detected Lin Yi's group's movement and gave the order without hesitation. Su Lu, who had just returned, did the same and chased after Lin Yi's small rapid-speed ship at full speed.

As soon as the two of them moved, the people from the other fleets immediately followed suit. When the situation was unclear, there was no mistake in following these two big shots.

"What cunning fellows. They've gotten off easy this time!"

Lin Yi turned around and smiled as he shook his head. He didn't bother with these people.

After entering the sea fog, everyone would have to find the hidden reef passage with their own abilities and then rush back at full speed. Lin Yi and the others still had the advantage of being the first to move!

The chance of getting first place was still very high. Even if it didn't work out, he could still maintain his position in the top three. With the huge advantage he had in the first round, he could still stand at the top in terms of points.

At this moment, the deserted island that had been shaking continuously experienced the most violent shaking it had ever experienced!

The mountains on the island began to collapse, and the ground of the forest began to crack. Large areas of vegetation were swallowed by the ground, and it looked like it was going to sink.

Chapter 6413 Second Place, First Place In Total!

"It's actually this powerful? It can't be because of me, right?"

Lin Yi's face changed slightly as he spoke guiltily to the ghost.

Originally, he had thought that he would have a chance to visit this place again in the future. Perhaps he would be able to comprehend some things about space. Now, it seemed that there was no chance.

The entire Island was done for. In the future, when they came here, they could only look at the sea ...

"Lin Yi, the invisible barrier is starting to collapse, we can get out from here!"

Zhang jinmiao suddenly reminded them. As the deserted island collapsed, more and more cracks appeared on the invisible barrier, and a new passage appeared beside them.

Zhang jinmiao had been using her spirit sense to Scout the area, so she found the tunnel immediately. Lin Yi and the ghost were too focused on the island to notice it.

"Fifth brother, hurry up and get out of here!"

Lin Yi didn't say anything-he ordered fifth to make a 90-degree turn and charge into the fog.

The island was starting to collapse, and it seemed like the momentum was irreversible. Lin Yi gave up on the idea of coming back.

Whether it was the space scales or the space Array flags, when the island disappeared, it was most likely that it would disappear with it, and it would disappear into another space. There was no point in Lin Yi coming back.

As they charged into the sea fog, Lin Yi realized that the invisible barrier was collapsing at an extremely fast speed. If they were still in their previous position, they could've passed through it!

In other words, the fleets that didn't follow Lin Yi could pass through from the other side faster. This was unreasonable! He had dug a pit for himself.

Luckily, ye da Xi and su Lu were powerful enough to make everyone follow them. When Lin Yi and the others rushed into the sea fog, they realized that the invisible barrier had collapsed big enough.

So when Lin Yi set him up, he set everyone up as well!

Everyone was the same-they were even now, but the small speedboat behind them was still a bit closer to Lin Yi because it was slanted.

"Lin Yi, Lil" bro, what happened to your hand? What's going on?"

Only now did Shangguan LAN 'er have the chance to care for Lin Yi. Compared to the collapse of the island, she was more worried about Lin Yi's arm.

"I'm fine. I'm almost done. "

Lin Yi smiled faintly and raised his arm to move a few times. That flexible and natural look of his really didn't look like anything was wrong. It was a little ugly, but it didn't matter.

"Everyone, be careful. I'm going to start accelerating!"

The fifth brother reminded them loudly. The speed of the small rapid-speed ship had already begun to increase.

Although they had entered the sea fog, the fifth brother was quite confident in his sense of location and space, so he very quickly found the entrance to the hidden reef passage.

He was already very familiar with the route on the map. As long as the hidden reefs did not move, there would be no problem with this route.

Last time, old fifth's extraordinary performance had improved him quite a lot. Although he couldn't compare to that time, he was much faster than the first time he walked through this hidden reef passage.

"Fifth brother, you're pretty fast. With your current speed, I'm afraid only su Lu can catch up with us! Even ye da Xi is only about the same as us. Even if he's fast, there's a limit to his speed. It won't be easy to catch up to him. "

Lin Yi smiled as he sensed the presence. He turned to ao Tianba for his praise.

"That's right. With this speed, even if we can't get first place, we can still compete for the second place. The third place is definitely not far away. In this case, we can be considered to have won the second round."

Ao Tianba didn't care about the first, second, or third place. In his opinion, it was acceptable. After all, he had won all the rounds in the first round, and a loss of one or two points wouldn't affect his advantage.

Of course, this was for ye da Xi and su Lu. They were ao Tian BA's biggest competitors in this round, and their results in the first round were extremely poor. Winning one or two points in this round would not affect the overall situation.

With their current speed, they could definitely catch up to the 24 hours time limit and widen the gap between them and the fleet behind them. This was the best result.

After traveling at high speed for about two hours, they were halfway through the course when su Lu's small rapid ship finally caught up to them from behind!

Then, the gap between them widened bit by bit. When su Lu's ship passed and disappeared into the sea fog ahead, they had already crossed another one-third of the sailing route. It was clear that old fifth's current strength was not just for show.

In comparison, ye da Xi's specialty was not speed, so it was not easy to close the distance between him and ao Tian BA.

When Lin Yi's spirit sense found ye Daxi's small rapid speed ship a hundred feet away, the reef channel was already at the last straight line!

It was basically impossible to catch up to or even surpass the small rapid-speed ship controlled by the fifth brother in such a short distance.

When they went there, the fifth brother did not have the ability to do so. He only managed to overtake ye Daxi's boat after using his power. Although he was not in a super-godly state now and was slightly slower than ye Daxi, he had the advantage of being the first to reach the finish line. That was enough!

Ao Tianba couldn't help but laugh out loud as he rushed out of the sea fog. He had thought that third place was acceptable, but he didn't expect to get second place in the end. It was not easy.

As a result, su Lu had only managed to close the gap by one point, while ye da Xi had managed to widen the gap by another point. If there were only three rounds of the competition, it would be enough if ao Tian BA performed as usual in the last round and got a middle ranking.

When turning in the task items, it was indeed necessary to compare them with the sea Map and the ship to judge. If there was someone behind who did not care about this and randomly boarded someone else's ship, he was afraid that all the work would be in vain.

However, this had nothing to do with Lin Yi and ao Tianba. The lower-ranked fleets were basically no match for them.

"Everyone did a good job. You completed the second round of the competition in just one day. But I heard that you sank the island? Is there such a thing?"

When everyone returned to the public square of torrent city through the teleportation formation, he Hao was still sitting there, drinking tea and mumbling to himself. When he saw the people coming, his voice suddenly became louder.

Ao Tianba's heart skipped a beat. He didn't see the island sink, but he did see the island collapse. It was most likely related to Lin Yi, and if he Hao pursued the matter, the good situation they'd worked so hard for would be gone.

Other than ye da Xi and su Lu, everyone's eyes were on Lin Yi. The biggest suspects of the island's collapse were Lin Yi and su Lu. No one dared to look at su Lu, so they could only look at Lin Yi.

Chapter 6414 Studying The Electric Eel

On top of that, the aotian BA fleet was in the limelight too much. They were first and second place every time, and they were firmly in first place with six points more than the second place. Lin Yi also took the lead on the island, and it was impossible for them not to be envied.

Even the two fleets that had cooperated with ao Tianba in the first round were jealous of them, let alone the others.

"President he, this was purely an accident. No one knew how the deserted island sank. In fact, when we left, the deserted island had not sunk yet, so we are even more unclear about what happened!"

Ao Tianba knew that he had to say something. Otherwise, the gazes of these guys were enough to put him in an extremely passive position.

Lin Yi didn't mention anything about what happened in the cave at all, and even su Lu, who was with him, only knew about it but didn't know how it happened, let alone ao Tianba.

However, he didn't need to know. If he insisted that he didn't know, no one would be able to say anything. They couldn't just pin the hat on his head, right?

"Don't be so anxious. I didn't say anything. It's fine if that Island has sunk. There's nothing on it anyway. Moreover, that Sea area is full of dangers. No one knows what's in the deeper parts. Without this Island, everyone will be free of worry and energy. It's good ..."

He Hao began to ramble on and on again. The captains, who had just escaped death, really wanted to slap him to death.

You've been resting here for a day and a night, can't you let us rest for a while? He had escaped from death! Do you know how to write it?

Unfortunately, no one had the guts to talk back to he Hao, so they could only listen obediently ...

Ao Tianba, on the other hand, let out a breath of relief. As long as he wasn't being held accountable, everything was fine. He'd been thinking about how he'd protect Lin Yi even if it meant giving up the spot. He'd even thought of a way to make things more impassioned, but he didn't expect it to pass so easily.

Lin Yi smiled. Nothing on the island? Please, there's probably nothing on the island under the sky Class islands and yellow Class seas!

Lin Yi didn't believe that Hao and the others didn't notice the spatial formation at all.

Why did they set the second round on that deserted island?

Just to pass through a reef sea route?

If he could even calculate the intervals between the invisible barriers so clearly, how could he be completely unaware of what was above?

Perhaps sending the captains of the elite fleet to the island was an opportunity to find some clues?

Then, he Hao said that without this Island, everyone would be free of worry and effort. Obviously, he was implying something!

Perhaps there was some information about this Island in the yellow Class sea route management Association?

If he had the chance, he could go and ask around. A space formation beyond level nine, and he didn't know what level it was, was something he had to worry about.

After another half an hour, he Hao announced that today's competition was over. After a day's rest, the third round of the competition would continue!

This sentence was even more delightful than adding a few points to everyone. In order to prevent he Hao from continuing to nag, everyone immediately dispersed. They didn't even bother to say anything.

It was already late at night. Ao Tianba and his men found the five men who had stayed behind and checked into the room they had booked in advance. They could finally have a good rest.

Although he had not been in torrent city for a long time, he had spent a year in the illusory formation in the first round. He had not relaxed in the second round, and he had been calculating and fighting with his mind on edge the whole time.

Their bodies might still be able to hold on, but their minds were indeed quite tired, so everyone had no interest in continuing to talk and went back to their rooms to rest.

Lin Yi went back to his room alone, but he didn't rest immediately. He took out the electric eel to study the mysteries of the lightning in its body. As for the half of the array flag that almost cost him an arm, he threw it to the damn thing to study.

As for formations that involved space, Lin Yi couldn't comprehend it yet, especially since the flag was still incomplete. He could only hope that the damn thing could find some clues, or else he would have wasted the half of the flag.

"The electric eel's power of thunder and lightning is not transformed from its own true Qi, which is different from mine! Its inner core can store the power of thunder and lightning, and the cells of the body can continuously generate the power of thunder and lightning. When it's not in use, it can store it in the inner core, and when it needs it, it can directly activate it through the inner core. This is not a bad method. "

Lin Yi came to the conclusion he wanted after studying it for a while.

The electric eel itself could produce lightning, and it did not need to transform true Qi, which was equivalent to having an additional means of attack!

Moreover, its body could not only produce lightning on its own, but it could also guide the power of lightning in the natural world into its inner core. As long as there was thunder and rain, it was a rare time for the electric eel to replenish itself.

"If I can be like the lightning eel, using the collision of the body's cells to produce lightning, and then storing it in the dantian, I can use Thunder attribute martial arts faster and more efficiently in the future, and the power will also increase greatly! It's just that not using true Qi is a bit of a waste. "

Lin Yi smiled. He had a lot of Qi in the Jade space, and he could replenish it at any time. He didn't need to worry about using up Qi.

But then again, it took time for spiritual Qi to transform into pure Qi, and it was a good thing that he didn't need to use his pure Qi. It was also helpful for Lin Yi's ability to continue fighting.

He picked up the electric eel's inner core and felt the power of lightning within it. Lin Yi started thinking about what kind of elixir he could use this inner core to make.

The profound Thunder pill was obviously too overqualified to be used. Using the core of an earth stage Thunder-type sea beast to refine the profound Thunder pill? This was not how you should squander!

"Wait!"

Lin Yi blinked, putting the matter of the pill to the back of his mind as he tried to recall what he'd just said to himself. "What did I just say?"

What was that flash of inspiration? Lin Yi massaged his temples and forehead as he repeated the words.

He had to match it!

"If only I could be like the lightning eel ... Using the collision of body cells to produce lightning ... If only I could be like the lightning eel, using the collision of body cells to produce lightning!"

Lin Yi jumped up, his face full of excitement. He couldn't help but shout.

If it wasn't for the excellent sound-proof restriction in the room, his shout would definitely have given everyone a shock.

Chapter 6415 The Second Assassination!

"If I could be like the electric eel and use the collision of cells to produce lightning, wouldn't I be combining my body with lightning? Why didn't I think of this before? Hahaha, lightning with the body! The third level of the lightning escape technique!"

Lin Yi mumbled non-stop as he paced back and forth in the room, evidently excited.

When he obtained the lightning escape technique, he only had the first two layers of the Kasaya, the lightning evasion body and the lightning control body! As for the third and fourth levels, they had already been lost.

Lin Yi's heaven's fortune battle tactics was quite heaven-defying-he could copy and improve other people's skills after seeing them, but he couldn't deduce the next part of his own lightning escape technique.

It wasn't that his heaven seizing fortune battle technique had lost its effect, but that every level of the Thunder escape technique was different. The way it produced and used lightning was extremely different!

If Lin Yi could see people use the last two levels of the lightning movement, he would've copied it already.

Yet, Lin Yi had never seen anyone use the technique, and he couldn't even rest for a moment. He really couldn't focus on the last two levels.

He didn't expect that when he helped ao Tianba to participate in the competition for the Xuan class sea navigation quota, he'd chanced upon the electric eel's body, which gave him the opportunity to cultivate the third level of the lightning escape technique.

"That's right, that's it. There's hope. As long as you can use the collision of your body cells to produce lightning like the lightning eel, and at the same time attract natural lightning into your body, you can complete the third level of the Thunder escape technique, lightning with your body!"

Lin Yi's eyes were getting brighter and brighter. The more he thought about it, the more he felt that his idea was feasible. He could use this as a direction and use the battle tactics of heaven's fortune to deduce the next part of the skill.

This might be a little different from the original, but Lin Yi believed that combining his body with lightning wouldn't be any worse than the original!

After sorting out his thoughts, Lin Yi raised his hand and grabbed the electric eel's body, generating arcs of lightning on his hand. He then used his spirit sense to carefully observe the electric eel's reaction to the lightning.

Although a dead electric eel was different from a living one, Lin Yi didn't care. The battle tactics for heaven's fortune only needed a thread to start from, and he could slowly figure out the whole thing.

"This is how the cells react to lightning. This is the way to guide lightning into the body ... Without using lightning, I used true Qi to stimulate the cells to collide ... As expected, lightning was produced! I just need to imitate the cell movement of the lightning eel, and I may be able to complete the lightning with my body. It seems that this trip was not in vain!"

After Lin Yi figured out the secret of the electric eel's cells, he was completely excited.

There was no time to lose! He immediately began to deduce the third level of the lightning escape technique, merging his body with lightning!

Lin Yi sat down cross-legged, and slowly tried to collide the cells in his body according to what he learned from the electric eel!

If it wasn't for his powerful spirit sense, he wouldn't be able to do this at all. Without the battle tactics of heaven's fortune, he wouldn't have the ability to deduce skills. It could be said that in the entire Sky Class Island, only Lin Yi could do this. If it was someone else, even if they were in the sea-shattering or heaven-breaking realm, they wouldn't be able to do anything.

Just when Lin Yi felt that he had improved a little, the Jade space suddenly sent him a strong danger alert. Lin Yi was shocked and instinctively activated his lightning escape technique, appearing on the other side of the room!

Then, he saw that the entire roof was like snow that had been poured over by boiling water, completely melting away. A round hole with a diameter of five feet was left on the ground, showing the terrifying power of this attack.

He was trying to test the cells in his body, and this sudden movement made him feel like he was being torn apart. He couldn't breathe.

"Pursue and attack!"

Lin Yi couldn't do anything himself, but the spirit beasts scattered around him didn't care. They immediately flew towards the attack's direction as soon as they received the order.

Lin Yi spread out his spirit sense, trying to lock on to the attacker and also observing the hole in the ground.

What surprised him was that this was also a mark left by an arrow. It was different from when he was at proud of dawn Academy, but Lin Yi was almost certain that this was the assassin who hadn't appeared since!

As expected, he didn't make a move, but once he did, he almost killed with one strike!

If it wasn't for the Jade's warning, Lin Yi really would've been killed by that arrow. Thinking about the terrifying attack, he didn't think that his physique could block the arrow.

"This guy must be eliminated. Otherwise, if he keeps following me and scheming in the dark, I'll really have trouble sleeping and eating in peace in the future!"

Lin Yi's face turned serious as he calmed down.

The most annoying thing was that the assassin and Archer would never make a move if they were not confident. After they made a move, regardless of whether they hit the target or not, they would retreat in one shot and would never be greedy for success!

This kind of opponent was the most terrifying. You never knew when he would make a move, and when he made a move, it would be difficult to catch his tail regardless of whether you were dead or not.

Lin Yi's spirit sense was enough to cover the entire city, but he still couldn't find this guy's trace. In terms of stealth, this bastard was definitely a master among masters, not inferior to the little spirit beast, maybe even slightly better.

This time, she still couldn't catch him!

Lin Yi already knew the answer, but he couldn't help but sigh. The spirit beast's defense range was quite wide, but it was shot by an arrow without being noticed at all.

What made him feel strange was how that guy actually determined his position? How could she aim at his residence so accurately? And how far away was the place where this person shot the arrow from?

There were so many questions, and Lin Yi couldn't find an answer to any of them. This feeling of being wronged was really depressing!

The people in the other rooms heard the commotion and rushed over to see what was going on. The huge hole in the roof and the terrifying arrow holes on the ground made their faces change.

"Lil bro Lin, what's going on? Who would be so bold as to assassinate you here!"

Ao Tianba was furious-he was the one who asked Lin Yi to help him out, and he'd have to bear the consequences if something happened to him.

As for Shangguan LAN 'er, seeing such a huge arrow hole, she immediately thought of the previous attack, and her pretty face turned pale.

"Lin Yi, Lil" bro, are you okay? Is it ..."

Lin Yi raised his hand to stop her before she could finish.

"It's fine, it's fine. I'm not good at other things, but I'm good at escaping. It's not that easy to deal with me. "

Lin Yi smiled, comforting Shangguan LAN 'er and easing everyone's hearts.

Chapter 6416 How Did You Lock Onto Him?

"Lin Yi, do you know who did this? We can't just let this matter rest!"

Zhang Jinlin's face was as cold as ice, her expression unfriendly. Lin Yi was someone she had high hopes for, someone who would bring the Feiyang college to the sky in the future. How could she let someone go against Lin Yi at this time?

"Brother Lin, could it be someone from another fleet? Your performance was too good, so you attracted the attention of others, and they wanted to get rid of you in secret! That's the only way they might be able to fight for a spot from us. "

Ao Tianba's killing intent was strong as well. Even if it was ye da Xi or su Lu, as long as they dared to lay a hand on Lin Yi, he'd make them pay even if it meant sacrificing his fleet.

He and Lin Yi weren't brothers, but they were more than brothers. They'd been through too many life and death situations together, and ao Tianba already saw Lin Yi as a partner he could trust!

"Don't worry, it's just a small matter. Furthermore, this assassin was definitely not sent by those fleets. The second round of the competition has just ended, so who could have found such a powerful assassin to kill me so quickly? If he wants to kill someone, he should be killing you, brother ao Tian. "

Lin Yi smiled faintly, his face nonchalant as he teased Ao Tianba.

Ao Tianba's face relaxed a little as he pointed at Lin Yi,

"You, you, you still have the mood to joke at a time like this. Who doesn't know that our results were all thanks to you? Is there any use in dealing with me?"

"Lin Yi, don't hide anything from us. We're all family, and the right way to face problems is to think of a way together, unless you don't treat us as family anymore."

Zhang Jinmiao wasn't going to be fooled by Lin Yi so easily-she could tell that Lin Yi wasn't telling the truth, and was trying to get away with it by changing the subject.

"Aunt Zhang, you're being too harsh!" Lin Yi shook his head with a bitter smile, telling the truth.

"To be honest, I really don't know who sent the assassin. However, I have my suspicions that this assassin might be from Hidden Death Sect! Previously, when I was on the northernmost island, I was ambushed by Hidden Death Sect on my way back to the northern island. However, I managed to kill the assassin in return. Therefore, this time, they might have sent an even more powerful assassin. In addition to killing me to complete the mission, they might also want to avenge their dead companions. "

"Hidden Death Sect? Don't let me run into these rat-like despicable killers, or I'll teach them a lesson. "

Zhang jinmiao's Phoenix eyes widened as she gritted her teeth and said hatefully.

Lin Yi couldn't help but touch his nose, feeling a little guilty. He used to be an assassin, but in Zhang jinmiao's eyes, wasn't he just a lowly rat?

That wasn't important-what was important was that Lin Yi really didn't want Zhang jinmiao to meet the assassins from hidden death sect!

The opponent wasn't a weakling, and Lin Yi could imagine how terrifying a sky-grade killer was. The Archer this time was probably one of the sky-grade killers.

Zhang jinmiao's strength was indeed extraordinary, but what was the use of being strong in the face of such an opponent? They couldn't find the opponent's trace at all and could only passively take the beating. If they weren't careful, they would fall into a situation beyond redemption.

"Brother Lin, if they're really assassins from hidden death sect, you have to be more careful. I've heard of their reputation. They're powerful and have strange methods. The higher the level of the assassin, the higher the success rate! It is said that the stronger the target, the lower their chances of success, but that is not the case. As long as they are targeted by their high-level killers, there is a 70 - 80% chance that they will be killed. "

Ao Tianba looked worried. It seemed like he was afraid of hidden death sect.

If it was one of those fleets that wanted to kill Lin Yi, he could still go all out. But against hidden death sect, he felt that he couldn't do anything even if he had the power. Not to mention, from what he knew, hidden death sect was extremely strong, and he couldn't fight them.

To put it bluntly, even if the Nakajima Aida family went all out, they might not be able to completely eliminate hidden death sect, let alone ao Taba.

"Brother ao Tian, don't worry. I've said it before. I might not be good at other things, but I'm definitely the best at escaping and staying alive. If you want to assassinate me, it's useless to shoot arrows from afar."

Lin Yi smiled faintly, revealing an extremely confident expression, making the others feel a lot more at ease.

The little spirit beast chased around but found nothing, so it gave up and turned back to continue setting up defenses.

But this time, the distance was further, and not all the spirit beasts were on the outside. There were a few points near Lin Yi, forming a three-dimensional defense circle.

As long as the assassin attacked within this range, it would not be easy to escape from the little spirit beast's pursuit.

"Alright, all of you can go back and rest. I'm fine here. Let's go. We'll talk tomorrow."

Lin Yi asked everyone to leave. He needed time to continue working on the third level of the lightning escape technique, merging his body with lightning. Once he succeeded, not only would his strength increase, but his ability to stay alive would also increase greatly.

"Alright, be careful. You can't stay in this room anymore. I'll get someone to change your room."

Ao Tianba looked at the holes in the roof and ground and prepared to get Lin Yi another room.

"No need, no need. I still need to study how the other party can lock onto me. This place is just right. You don't have to be busy. Go back and rest!"

Lin Yi wasn't lying-he had to figure out how the other party locked onto his position, so he could at least be on guard in the future.

Ao Tianba and the others had no choice but to leave after a few more words.

After everyone had left, Lin Yi took out a bunch of formation flags and started setting up a formation in the room!

Defensive, trapping, illusionary, killing, and so on were all set up. He had plenty of these normal array flags in his hands, and he didn't mind wasting them.

When the array was completed, the holes in the roof and ground were directly covered up, and there was no sign of any abnormality.

After finishing all the preparations, Lin Yi started to check the room for any devices that could monitor the room.

If that was the reason the assassin was able to lock onto him, then Lin Yi would have to consider if the other people had the same equipment in their rooms.

But after Lin Yi checked carefully, he didn't find anything like that. It seemed that people with the ability wouldn't use such a low-level method!

"Senior ghost, let's not study the array breaking flag for now. Help me think, how did the other party lock onto me?"

Lin Yi woke up the guy who was so engrossed in studying the space Array flags that he was about to go crazy.

Chapter 6417 Wrong Estimation

"Kid, you're getting more and more useless. You have to trouble this old man for every little thing. Do you think it's easy for this old man? It's rare to find something that interests me, and I'm always interrupted by you!"

The ghastly thing was still full of dissatisfaction and kept on nagging.

Lin Yi didn't know whether to laugh or cry. How long had the old man been studying it? I'm always disturbing you? Just this once, okay?

Also, was almost getting killed a small matter? How big are your insights, old man?

"I don't see any foreign objects in this room that can help with locking! Perhaps it was originally there, but it was completely destroyed by that arrow. "

The demonic thing grumbled a little, venting its dissatisfaction from being interrupted. It started searching for Lin Yi, but didn't find anything different from what it was doing.

"Destroyed? In other words, the device was placed right where I was meditating? It can't be that coincidental, right?"

Lin Yi felt that this deduction wasn't very reliable!

He wasn't meditating on the bed or on the chair. Instead, he was sitting cross-legged on the ground, trying to deduce the third level of the lightning escape technique!

If the other party could even calculate this, it would be somewhat inconceivable!

However, Lin Yi still felt that it was a pity that the electric eel's body was destroyed as well.

Although he had already studied everything that needed to be studied, it was still a rare Thunder-type sea beast. Fortunately, the inner core was still in the Jade space. Otherwise, he would have suffered a great loss.

"It's unlikely to be a coincidence. The only explanation is that the killer has a skill to lock on to a target from a long distance!"

The ghastly thing pondered for a moment and spoke slowly.

"This kind of skill may be realized by the aura of the items you have used, or by sharp senses or divine sense. Because the rooms in this Inn have restrictions, the possibility of divine sense is very low. Moreover, under normal circumstances, if a divine sense at the sea splitting stage wants to lock on to you, it will definitely be discovered by us. So, I'm more inclined to think that the other party has used something on you to lock on."

This damned thing was able to analyze it clearly. As expected, the older the ginger, the spicier it was!

It wasn't that Lin Yi couldn't figure it out, but it was easy to be in the dark when it involved himself.

"After hearing what senior ghost said, I also feel that the other party might be using the items I've used to lock onto my aura. After all, I've used many items, so it's not difficult to find one or two! If that's the case, doesn't that mean that the killer can kill me anytime he wants?"

Lin Yi's head hurt just thinking about it-there was no way he'd be in a good mood with an opponent like this hiding in the dark, ready to strike at any time.

"Isn't he going to attack you at any time now? The moment you relax, he will attack! The only thing I'm curious about is, how did he know that you were in a relaxed state and exposed yourself?"

The demonic thing suddenly changed the topic and threw out a new question.

Lin Yi blinked. That's right, locking onto the enemy's position could be explained, but how did they know when to attack?

He couldn't possibly determine the target's real-time status while determining their location, could he?

Lin Yi only studied the electric eel for a while today, and he wouldn't let his guard down like this normally.

"Senior ghost, what are your thoughts?"

Lin Yi suddenly felt that something was wrong. Were his previous assumptions all wrong?

"It's hard to say! Maybe he has this ability to determine your position and state at the same time, or maybe he's not far away at all, but in the nearest place to observe your movements. Although there are restrictions in the inn room, such a simple restriction has very limited effect on an expert. "

The ghostly thing couldn't come up with an accurate conclusion, but it raised another possibility.

Lin Yi's mind flashed, and he finally understood why he felt weird!

Perhaps it was just as the ghost had said, the killer had launched a sneak attack from a close distance. He had always thought that people who used bows and arrows would definitely launch a snipe from a distance, so that it would be easier to escape.

After the attack, both Lin Yi and the spirit beast focused on the distance and ignored the possibility of the killer beside them!

Lin Yi didn't see the angle or direction of the arrow, but based on his experience, the assassin should be very far away, so he fell into a blind spot.

"Senior ghost, perhaps the killer is really nearby. Let's search again!"

Lin Yi's face didn't change, but he asked the ghost to help him search for the killer again.

Regardless of whether this fellow was from hidden death sect or not, his concealment skills were indeed extraordinary!

Lin Yi's spirit sense couldn't find anything, but with the help of this thing, the effect was completely different!

He believed that as long as it wasn't a super expert that could split the sea and break the sky, it shouldn't be able to avoid the joint investigation of the two.

If he really had the ability to split the sea and break the sky, he wouldn't need to hide in the dark-he could just kill Lin Yi!

The demonic thing was still very concerned about Lin Yi's safety, and so it started working with Lin Yi to find the killer's trail without saying anything.

At the same time, Lin Yi also called back the little spirit beasts on the outside to defend, forming a closed net. Once the opponent was found, he would have no way to escape!

In just a few breaths, Lin Yi and the ghost found an unusual place!

This was the direction the arrow came from, not far from Lin Yi's room. It was only two to three hundred feet above, the best position to observe Lin Yi's room.

In this place, there was still a trace of almost undetectable true energy fluctuation, which was exactly the same as the hole left by the arrow!

"That's right, it should be here! That guy is really bold, he actually dared to attack me at such a close distance?"

Lin Yi smiled coldly, extremely unhappy. He was sure that the killer attacked from a close distance, but he still couldn't find any trace of the killer.

Lin Yi and the spirit beast didn't pay much attention to the nearby area because of their misjudgment, giving the opponent a chance to escape.

"Lin Yi kid, you've really met a troublesome opponent this time!"

The ghastly thing stopped joking and became serious."

"If I'm not wrong, the first time he sneaked an attack on you, it was indeed from a long distance! This time, however, it's a close-range attack. From the power of the two arrows, you can tell that the first one has a strong penetrative power, while this time, the explosive power is even greater!"

Chapter 6418 Abandoned Sneak Attack

"It was my first impression. I thought that the same person would have the same habits, so I didn't consider that the different power of the arrow would lead to different distances between the opponent. It was my negligence!"

Lin Yi admitted his mistake-he'd be able to predict where the enemy was the next time this happened.

"Alright, you can continue comprehending the lightning movement technique. Let's end this here. I'll pay attention to the surroundings while you're comprehending. If the assassin dares to come again, I'll definitely be able to catch some traces of him."

The damn thing was planning to use Lin Yi as bait again, then lure the killer out and finish him off.

Didn't killers need opportunities? Lin Yi's training was the best opportunity!

Judging from the interval between the last attack and the attack just now, it would cause people to develop a kind of habitual thinking!

The killer would not continue to attack after he failed. Instead, he would run away and wait for a certain time before he took action!

So Lin Yi might let his guard down, and this was a good chance for a sneak attack!

The ghostly thing was quite accurate in reading people's minds, and the killer was obviously an expert in this field. Everyone showed their own skills, and it was a matter of who was more powerful.

Lin Yi's advantage was that the killers wouldn't know about the existence of the ghosts, so Lin Yi could train as much as he wanted while the ghosts investigated.

"Then I'll have to trouble senior ghost!"

Lin Yi thought it was a good suggestion, but he felt that something wasn't right!

He had just set up a large number of arrays in the room. These were not simple restrictions like the inn's. Could the assassin break them?

It seemed like having a high array Dao level was not always a good thing ...

Even Lin Yi found it funny himself. He started collecting the formation flags obediently, taking away all the unnecessary formations. It was a good thing they were hidden under the outermost formation, otherwise it would be awkward.

In the end, only a low-level defense array was left to cover the hole in the room. If the assassin came again, he would not be hindered by this low-level defense array.

"Alright, senior ghost, I'll start cultivating now. I'll leave the rest to you!"

Lin Yi didn't need to be polite with the damn thing-he greeted it and sat down cross-legged, once again working on the merging of body and lightning.

The cells in the body colliding was a troublesome thing, but Lin Yi had a strong spirit sense. This kind of detailed operation wasn't hard, but the difficult part was how to create the power of lightning from the collision of two cells.

If he didn't have the electric eel, Lin Yi wouldn't be able to make much progress for years if he were to explore on his own!

But after seeing the electric eel's cell collision demonstration, Lin Yi at least had a direction.

The only problem now was that Lin Yi's cells were completely different from the electric eel's. If he wanted to compare the electric eel's collision method, he had to at least simulate the characteristics of the electric eel's cells!

As long as he could solve this most critical problem, everything would be smooth.

The electric eel's cells were born with the ability to create lightning through friction, and Lin Yi was thinking about how he could simulate that effect.

First, Lin Yi tried to convert his Qi into lightning to stimulate his cells. It was a classic reverse process.

Lin Yi, who was immersed in his training, had small lightning arcs all over his body. The entire room was filled with the sound of electricity, and the low level defense array couldn't block the light of the lightning at all.

From the outside, one could clearly see the light in Lin Yi's room.

A ghostly shadow moved silently in the dark like smoke, stopping at the top of a tall building far away, staring coldly at Lin Yi's room.

There was a strange distortion around his body. Whether it was air or light, they seemed to be refracted when they reached here.

If someone were to use their spiritual sense to observe this place, they would only feel that there was a lack of light in this space. They would not realize that there was actually a living person standing here.

The ghostly thing's spirit sense didn't extend that far, and in order to ensure Lin Yi's safety, he had to put his attention on the nearby suspicious spots.

This black shadow was just far away from this area. Otherwise, it would be possible to know who would be the stronger one.

After observing for a moment, the black shadow did not make a move, but quietly retreated.

Although he felt that this was a good opportunity, he had failed twice in a row, which made him more cautious. Without full confidence, it was better not to make a move.

The night passed peacefully.

The ghostly thing heaved a sigh of relief when it didn't manage to launch a sneak attack, but it couldn't help but feel disappointed.

"Thank you, senior ghost, for protecting me!"

Lin Yi opened his eyes and jumped up, thanking the ghost in his heart.

"That's a small matter. How's your research on the third level of the lightning movement technique? Any progress?"

The damn thing didn't show any emotion and turned to Lin Yi's training progress.

"After many attempts, I have some ideas! However, it's still not perfect and needs further research. "

Lin Yi smiled. He didn't manage to figure out the third level of the lightning escape technique, but he could feel that it wouldn't take too long.

"Then why don't you continue cultivating? Isn't the third round of the competition starting tomorrow?"

The damn thing didn't quite understand what Lin Yi was thinking-shouldn't he just do it in one go? Who would stop halfway through their cultivation?

"It's a good balance between work and rest! LAN 'er is already here, we can't just close the door and not see her, right?"

Lin Yi smiled faintly as he opened the door.

Shangguan LAN 'er walked in happily, Zhang jinmiao following behind her.

"Lin Yi, Lil" bro, you knew I was coming, so you opened the door for me?"

Shangguan LAN 'er squinted her crescent-shaped eyes as she smiled at Lin Yi, as if she was very happy.

It seemed like she didn't really care about the attack last night. As long as Lin Yi was fine, then everything would be fine.

"Aunt Zhang, Good Morning, little Senior Sister."

Lin Yi greeted them with a smile before turning to Shangguan LAN 'er, "You're up so early, are you going out to shop?"

"Hahaha, Junior Brother, you're so smart! How was it? Do you want to go with me?"

Shangguan LAN 'er smiled very happily, thinking that she and Lin Yi understood each other very well.

"That's good. I've been nervous for so long. It's rare for me to relax today."

Lin Yi smiled and turned to Zhang jinmiao. "Auntie Zhang, are you coming too?"

"That's right. I've never been to this city before. Let's take a look around. "

Zhang jinmiao smiled and nodded.

Chapter 6419 Shopping

Zhang jinmiao didn't want to follow Lin Yi and Shangguan LAN 'er. As someone who had been through this, she knew her disciple's thoughts very well.

However, the assassins from hidden death sect were watching in the dark. If she didn't go with them, she wouldn't be at ease.

If it wasn't for the fact that the assassins were so strange that there was no difference between staying in the inn and going out, Zhang jinmiao would definitely not let them go out at this time.

"Brother ao Tian, are you up?"

Lin Yi was about to say hi to ao Tianba when Zhang jinmiao told him that he'd already left.

"Captain ao Tian said that he's going to attend a private meeting of the captains of a fleet. He wanted to ask you to come with him, but he saw that you were still cultivating from afar, so he didn't come to disturb you and asked me to let you know."

Zhang jinmiao waved her hand. In fact, she wanted ao Tianba to come along as well. It was always good to have more experts.

However, she had no reason to stop ao Tianba from doing what he was doing.

"A private gathering between captains? It seems that brother ao Tian is finally being accepted by the other fleets. "

Lin Yi smiled, happy for ao Tianba.

Previously, ao Tianba's fleet was ranked 19th out of the 20 fleets, which was considered the bottom of the list. The captains of the powerful fleets did not even look at him.

However, after two rounds of competition, ao Tianba had taken the top spot with a total of 24 points, leading the second place by six points!

This made all the other fleets look at him in a new light, and the number of fleets willing to deal with him naturally increased.

This was a good thing, and Lin Yi would only be happy for ao Tianba. It didn't matter if he went or not- he'd be going to the mystic division soon, and he probably wouldn't have much chance to help ao Tianba's fleet.

"By the way, Captain ao Tian has left five of his men for you. He said that you can bring them with you when you go out. They can help out when you buy things, reserve seats when you eat, and open the way when you have more people! He only brought his fifth brother over to keep up appearances. "

A private gathering was still a gathering, and the people present were all captains of their respective fleets. It would be a little embarrassing if they did not have any followers, so Zhang jinmiao could not help but find it a little funny when she said this.

"This brother ao Tian, now he knows how to tell jokes!"

Lin Yi shook his head with a smile-ao Tianba's reasons were all bullshit.

Who would carry things in their hands when they were buying? What was the storage bag for?

Do you need to reserve a seat to eat? They had to clear the way when they were shopping?

Shangguan LAN 'er had never done such a thing in the North Island, but she was so high-profile in the East Province. Who would believe it?

Lin Yi knew that ao Tianba was worried about his safety, so he sent people to protect him. Even if Lin Yi was a lot stronger than them, a few more meat shields would be enough.

"Hello, vice-captain!"

The five men raised their heads and puffed out their chests as they saw the three of them.

Towards Lin Yi, they respected him from the bottom of their hearts. To be able to become ao Tianba's trusted aide, they naturally had to be old men who had been with the fleet for many years.

They knew each other since the first time Lin Yi used the Starfall formation to fight off the sea beasts. Along the way, they had witnessed many of Lin Yi's glorious deeds!

They'd even helped their fleet get first place this time-they'd kill anyone who said they didn't respect Lin Yi.

"Good morning, everyone. There's no competition today, so you can do whatever you want. Have a good rest. The third round of the competition will begin tomorrow."

Lin Yi smiled and waved at the five of them. He didn't want to bring so many people with him, and if something happened, he'd only get them involved.

"Vice-captain, the captain said that we'll be following you today. It'll be good for us to keep up the appearance."

One of the five laughed. Lin Yi didn't put on any airs, and while the people on the ancient ship respected him, it wasn't the same respect they had for ao Tianba, so they laughed more naturally.

"Alright, stop causing trouble. I'll just walk around with Auntie Zhang and the others."

Lin Yi continued to shake his head, determined.

The five of them looked at each other and finally agreed!

After all, Lin Yi was the vice-captain, and he couldn't go against the vice-captain's orders!

After sending the five away, Lin Yi, Zhang jinmiao, and Shangguan LAN 'er walked out of the inn together. The streets outside were more bustling and lively.

"This torrent city is developing quite well. At least it's very popular!"

Lin Yi walked beside Shangguan LAN 'er and chatted casually, but he was thinking if the assassins from hidden death sect would make a move at this time.

But Lin Yi shook his head again. The assassin was extremely good at hiding, and he didn't try again after last night's failure. Lin Yi was obviously prepared today, and unless the assassin was in a hurry to go back and report, he wouldn't choose to make a move now!

With that thought, Lin Yi felt a lot more at ease. With Shangguan LAN 'er by his side, it would be best if the other party didn't make a move.

"But there don't seem to be any powerful cultivators on this Street. Is there another street for those powerful cultivators to go?"

Shangguan LAN 'er looked around. Although she was quite happy, she still wanted to go to a more lively place.

"That's true. Let's go and ask. "

Lin Yi smiled. If he wanted to, he could use his spirit sense to scan the entire area. It was easy to find a Street with practitioners.

However, that would be meaningless. They were shopping anyway, and asking for directions was also a part of shopping.

"Excuse me, may I ask if there are any places in torrent city that high-level cultivators would like to go to?"

Lin Yi found a random shop assistant on the side of the road and handed him two pieces of spirit Jade.

The shop assistant's eyes brightened. He was just a low-level practitioner who hadn't even stepped into the Foundation Stage. He was already overjoyed to have two pieces of spiritual Jade as an unexpected income, not to mention that Lin Yi had only asked a question that everyone in the city knew.

"Seniors, are you asking about the four Seas Pavilion? That place has the best things in the entire torrent city. Many of the seniors who come to torrent city would go to the four Seas Pavilion to take a look!"

The shop assistant was a quick-witted person-he took the Jade and started introducing the best places to Lin Yi.

"It's very close to the four Seas Pavilion from here. Three seniors, walk along the street, turn right at the end, and then turn left at the next intersection. You'll be able to see the four Seas Pavilion's signboard! If there's a need, junior can also bring the three seniors over. "

Although the shop assistant couldn't tell what Lin Yi and the other two's levels were, he could tell from their mannerisms that they weren't ordinary people. If he could get these Masters to join him, it might be a great opportunity for his life to change!

Unfortunately, the four Seas court was really close by-Lin Yi's spirit sense confirmed the location right after he said that, and he didn't even need to lead the way.

Chapter 6420 Return With A Full Load, Buy, Buy, Buy

"No need, we can go by ourselves. You do your thing!"

Lin Yi waved his hand with a smile, and walked forward slowly with Shangguan LAN 'er.

The shop assistant felt that it was a pity. He could not meet such a Big Shot so easily. Moreover, he was so kind, gentle, and generous. If he could lead the way, even if there was no big opportunity, it was still possible to make a small windfall.

"Four Seas court. The name sounds quite imposing. I wonder if there's really something good in there."

Zhang jinmiao smiled as she looked at the shops on the street. She didn't have high hopes for the things in flowing city.

It couldn't be helped. Although this city looked good, there were not many high-level cultivators! Even the city Lord only had the strength of the mountain opening stage, how many good things could he hope to have here?

"It's just that aunt Zhang's standards are too high. There aren't many things here that can catch your eye, but there should be a lot that little Senior Sister and I can use. Aunt Zhang, you're destined to accompany us shopping today. "

Lin Yi smiled. Zhang jinmiao came from a top school in the mystic division Sea area of the East continent. Naturally, she had higher standards.

"That's right, that's right. Master, help me pick out some good things for me today! When we reach the mystic division, I'll go buy some good things to show my respect to you. "

Shangguan LAN 'er held Zhang jinmiao's arm and smiled like a flower.

"That's good. Master, I'll remember this. Don't go back on your word."

Zhang jinmiao patted the back of Shangguan LAN 'er's hand lovingly. The two talked and laughed, not like master and disciple at all.

If Shangguan Tianhua were to see this, he would probably cover his face with his hands!

He sent Shangguan LAN 'er to the mystic class Sea area to become Zhang Yingluo's disciple because he wanted Zhang jinmiao to have a strict teacher and produce an outstanding disciple. He didn't expect that this strict teacher would dote on Shangguan LAN' er even more than him. His efforts would probably be in vain!

After turning two corners, the signboard of the four Seas Pavilion appeared in front of the three of them.

Although they were called high-level cultivators, most of them were in the Golden core stage or the original infant stage. There were very few even in the xuansheng stage. For the shop assistant, it was indeed quite a high-level cultivation!

However, in Lin Yi's eyes, who was used to mountain and land opening cultivators, the four Seas court's level dropped all of a sudden.

Anyway, they were just shopping aimlessly. It didn't matter if there were any good things. Since they were already here, they had to go in and take a look.

After entering the four Seas court, Lin Yi could clearly feel the presence of the formation that restricted his spirit sense!

This gave him more confidence in the four Seas Pavilion. Under the sky Class Island and the yellow Class sea, people only started to pay attention to the cultivation of primordial spirit and divine sense during the mountain opening period.

The existence of a formation that restricted spiritual sense meant that the shop owner was preventing experts at the mountain opening stage or above from using spiritual sense!

In other words, could it be that there was something here that could attract the attention of the mountain opening stage or the earth splitting stage?

"Greetings, seniors. Please come in!"

The four Seas court had a female practitioner in charge of reception, and her eyes brightened when she saw the three. One of them immediately walked up and greeted them respectfully before turning to the side.

To be able to be a receptionist here, one's strength could not be high, and one's appearance could also be ordinary, but one must have good eyesight!

Even though there were not many experts in torrent city, these female cultivators could tell with a single glance what the aura of an expert and a nouveau riche was.

These three people were definitely not weak!

This was especially true when he thought about the Naval fleet that was holding a distribution meeting in flowing city. There should be a lot of experts coming to flowing city recently, so he naturally paid more attention to it.

"Three seniors, are we going to the VIP area directly? The best things of our Four Seas court are there. If there's anything that you three seniors like, this junior can make the decision to give you a 10% discount. "

The female cultivator who led the way had a clear and beautiful appearance. When she smiled, she was very friendly, making the guests feel like they were bathing in the spring breeze. She was indeed an easy person to receive.

"We're not in a hurry. Introduce the various areas first and then take us to see them."

Lin Yi smiled faintly-it'd be boring if he went straight to the VIP area, and it'd be interesting to look around-he might be able to pick something up.

Of course, with his current wealth, he would not be interested in that little bit of spiritual Jade. It was purely for fun. The sense of accomplishment of successfully picking up a bargain was not something that a little spiritual Jade could bring.

"Yes, senior." The female cultivator slightly bowed and smiled as she pointed at the space on the first level.

"The first level of our Four Seas Pavilion only sells ordinary items. It is suitable for cultivators of the Aurous core stage and below. This is also the level with the largest space and the most goods! It can't be helped, the lower level means more items. "

Shangguan LAN 'er laughed, thinking that this female cultivator's words were quite interesting,"

"Master, let's go and take a look. Although it's a low-level item, there's a lot of it. Maybe there's something fun to play with."

"Alright, let's go and take a look."

Zhang jinmiao didn't care. She didn't plan to buy anything anyway. Whether she was in the Golden core stage or the mountain opening stage, it didn't make a difference to her.

The female Xiu immediately led the three people to slowly walk through the first level. She didn't look impatient at all and maintained a calm smile the entire time.

These three were obviously big shots, and she didn't dare to show any neglect!

She wouldn't have any objections even if he were to take a look at every item on the first floor and ask her to introduce them again, let alone just look at the first floor.

As long as she served these high-level cultivators well, other than the rewards from the four Seas Pavilion, there might be some tips and the like. If she met a more generous person, the things that they would give out would be enough to cover her monthly income.

The three of them strolled around casually, and the female cultivator followed them to the side. She gave some suggestions at the right time, but she would never say anything that would annoy them.

"These beads are not bad, you can string them together and make a bracelet ..."

"Eh, this is also not bad. It's just right to make a comb ..."

"This one is pretty too ..."

The smile on Shangguan LAN 'er's face had never disappeared. There were indeed many things here, many of which were extremely precious materials for golden core cultivators!

However, Shangguan LAN 'er only bought these things because they looked good, and they were just accessories.

The female cultivators at the side became even more respectful. Although things from the Golden core stage were not worth much spirit Jade, they were definitely not cheap for ordinary people!

At least, among the things that Shangguan LAN 'er bought casually, any one of them would require more than a month's salary to buy. Of course, rewards and tips were not counted.

However, other people bought it just because it looked good and fun to play with. How could they compare?

After a round of shopping, Shangguan LAN 'er was very satisfied and began to look forward to the floor above.

"Master, there are many beautiful things here. There should be more beautiful things up there, right? Let's hurry up and take a look, we must return with a full load today!"
