

## Bodyguard 8781

### Chapter 8781

He couldn't afford to offend Lin Yi, and he had to protect him with all his might. Fang Gezi, on the other hand, had something on him, so he couldn't force her too much. Zuo Si made a quick decision and took the opportunity to retreat.

Tie Shixin looked at Zuo Si with a strange expression. In fact, everyone in the inspection department knew what kind of person this guy was. If it wasn't for his close relationship with the former director, he would have been dismissed from his position as Chief Inspector long ago.

After Jin botian took over, he had a lot of work to do and couldn't find the time to deal with Zuo Si. In addition, he had the face of the previous hospital director and didn't have a suitable successor, so he had temporarily not made a move.

A body full of righteousness and two sleeves of breeze? Hehe!

To think that Zuo Si had the face to say it!

But tie Shixin knew that Lin Yi couldn't bribe Zuo Si-he was the Vice Dean, and he was one of the higher-ups of the inspection department. What was he thinking, asking a Vice Dean to bribe a Chief Inspector?

It was more like the reverse!

"I'm only supervising the debriefing. I don't have the power or obligation to judge. The problem of the patrol is your responsibility, Chief Inspector Zuo. Plus, you're in charge of the debriefing this time, so you have to handle this matter!"

Iron Heart didn't want to be involved in the whirlpool, so he kicked the ball back decisively. ""As for your impeachment, it's not under my jurisdiction. You should go back and appeal to the Dean. I won't mention it today!"

He said he didn't care, but he still gave his opinion. Lin Yi's business was left to zuosi, and zuosi's business was Jin botian 's. Today, they were only reporting!

Since Vice Principal tie had spoken, Zuo Si couldn't push the blame away and could only continue to accept Fang Gezi's impeachment.

Yan Su couldn't stand it anymore. Although he knew that Lin Yi was the Vice Dean and that nothing would happen to him, he still felt bad that Lin Yi was misunderstood like this!

If Fengqi Dazhou didn't have Lin Yi, it would be hard to say what the situation would be like right now. It might've already been completely taken over by the dark Demon beast clan!

On top of that, Lin Yi's identity had been restricted during the test before, and Yan Su was worried that she couldn't use her Vice Dean's identity in this situation, so she couldn't help but stand up for Lin Yi!

"Vice Principal tie, Chief Inspector Zuo, it's not like patrol Sima didn't do anything. Before the new year, he was the patrol in our Feng Qi continent!"

"During this time, patrol Sima destroyed the dark Demon beasts' plan of building a transit space, a teleportation array, and a node to connect to the underground Devil's Den by himself. He also annihilated 99% of the dark Demon beasts in the underground Devil's Den that were at the earth formation stage and above!"

"In addition, the darkness demon beast clan's spies in our human race were also uprooted by patrol Sima, restoring the entire environment of our Phoenix nest continent to clarity and giving us at least a few decades of peace!"

"These are all patrol envoy Sima's achievements, but he didn't mention them. This subordinate doesn't dare to take away patrol envoy Sima's credit, so I have to come out and make things clear!"

Yan Su didn't usually talk much, but for Lin Yi today, she went all out and said a lot in one breath to clear Lin Yi's name!

Fang Gezi was initially in a difficult position. Due to Zuo Si's overreaction, the two of them were likely to fall out on the spot.

It wasn't worth falling out with Zuo Si before killing Lin Yi.

Fang Gezi was in a dilemma, but her eyes lit up when Yan Su stood up for Lin Yi.

Target change!

"Hehe, patrol envoy Yan Su, right? I've also heard of you. According to what you've said, Feng Qi continent's achievements were all done by Sima Yi. Then what did you, patrol Yan, do?"

The corners of Fang Gezi's lips curled into a sneer. Without waiting for Yan Su to speak, she continued, ""You didn't do anything! So, according to what you said, the one who's truly in a dead-end position is you! You're the one who should be fired!"

Since Sima Yi couldn't bite him to death in a short time, then he would bite Sima Yi's friend to death first!

Since Yan Su was willing to stand up for Sima Yi, the relationship between the two of them was definitely not ordinary!

Fang Gezi felt that taking down Yan Su would cause more damage than taking down Lin Yi!

As expected, Lin Yi's face darkened as soon as he finished speaking, his eyes unfriendly.

Lin Yi didn't even react this way when Fang Gezi impeached him.

Fang Gezi had been paying attention to Lin Yi's expression. She was overjoyed, thinking that she had finally found Lin Yi's weakness!

But before Lin Yi could say anything, Zuo Si exploded!

"Shut up! Fang Gezi, what are you trying to do? Not long before I returned to the inspection Institute, I just finished my inspection of Feng Qi great continent. Because the darkness demon beast clan suffered a once in a century heavy blow, Feng Qi great continent entered a rare period of stable development!"

"Under the joint leadership of Fengqi great continent's great Hall Master and the patrol, Fengqi great continent reinvigorated and everything was renewed! From top to bottom, their power was united! Such a United and harmonious atmosphere is rarely seen on the continent!"

"What are you trying to do by randomly saying that patrol Yan is a corpse without food? I can't stand such a serious slander!"

"If you think that I'm blind and can't tell right from wrong, or that I've accepted bribes to protect inspector Yan, then it's not a problem! If you want to impeach me, then continue. I will request Dean Jin to personally lead a team to Feng Qi continent to re-investigate and see what the truth is!"

"Fang Gezi, are you slandering the truth with your baseless accusations, or is the conclusion that I came to after my own inspection true? If I'm lying, what's wrong with giving you the position of Chief Inspector, Fang Gezi?"

The veins on Zuo Si's neck were bulging. He was extremely agitated. He almost pointed at Fang Gezi's nose and cursed.

His unyielding performance made Fang Gezi want to back out.

Just as Zuo Si had said, he did not have any evidence, and he was just making things up.

If Zuo Si really had evidence after his inspection, Fang Gezi would be the one in trouble if this continued!

"I don't dare, I don't dare, I didn't know that General Inspector Zuo just went to Feng Qi continent for an inspection, I was too impetuous! Just pretend I didn't say anything just now, I'm sorry, I'm sorry!"

Fang Gezi was stunned and cursed her bad luck. She didn't expect Zuo Si to have just been to Fengqi Dazhou!

He could only admit his mistake immediately. Even if Zuo Si had taken a bribe, he did not dare to continue.

Zuo Si was a careful person. If he had accepted the bribe, he would definitely cover up most of the loopholes and not leave behind too big of a flaw.

The biggest possibility of letting Jin potian lead the investigation team to Fengqi continent was to verify that Yan Su was fine. The final result would be that Fang Gezi was slandering his own colleagues.

It's too dangerous, I can't do this!

Zuo Si was secretly pleased. He was very happy that he could suppress Fang Gezi with his aura. It would be even better if Fang Gezi refused to admit defeat!

Chapter 8782

Zuo Si really didn't do anything during his trip to Fengqi great continent. One reason was that he didn't have time to find trouble with Yan Su, and two, he didn't dare to do anything with Lin Yi, this God, suppressing him.

He was innocent and upright, not afraid of being investigated, so Zuo Si was full of confidence!

"If you want to say it, then say it. If you want to take it, then take it? How could it be that easy? Words that have been spoken are like water that has been spilled. Fang Gezi, your slander has already caused serious damage to the reputations of this Lord and inspector Yan!"

How could Zuo Si let him go so easily? he immediately chased after him and started fighting. "Just now, you still wanted to frame patrol Sima. This kind of behavior is really too vile. If I don't punish you, and others imitate you in the future, how can I still do things? I'll be so busy dealing with all these false accusations!"

Fang Gezi's face turned pale. She knew that she had offended Zuo Si badly and would not let this matter rest!

"Chief Inspector Zuo, I was in the wrong. I'm willing to apologize to you!"

The guy was decisive as well-he immediately cupped his fists and bowed to Zuo Si, Lin Yi, and Yan Su, apologizing to them.

Fang Gezi consoled herself in her heart,'those who do great things are flexible! The humiliation he suffered today would be returned ten times or a hundred times in the future!

He didn't think that Lin Yi and Yan Su never came to him for trouble. He was the one who humiliated himself, so how could he blame others?

"Chief Inspector Zuo, today's focus is on debriefing. Since patrol envoy Fang has admitted his mistake and apologized, why don't you continue with your debriefing!"

Tie Shi didn't want to get involved, but he still expressed his opinion in the end. It wasn't that he was biased toward Fang Gezi, but he didn't think it was a big deal.

Since neither party had suffered any losses and Fang Gezi had apologized, it was better for both parties to let it go and not delay the official business.

Zuo Si bowed and agreed. He had to give face to Iron Heart. Since that was the case, he could only wait for another opportunity to deal with Fang Gezi.

Anyway, as long as he was still the chief Inspector, Fang Gezi would not have a good life!

The storm had temporarily subsided, and the work report continued in an orderly manner!

With this conflict, the investigators at the back were more or less more restrained. They didn't boast too much about their achievements, nor were they modest and cautious. They honestly ended the reporting segment.

After the report, it was time for the competition between the inspectors of the various continents. However, the competition was not as simple as a fight.

Zuo Si expressionlessly looked at the many investigators and slowly said, "As everyone knows, one of the most important tasks of a patrol is to manage and supervise the operation of the various Academies in each continent."

"So the first task of this year's great tournament is to go to the starsource continent's Tianxia Academy and stay there for two days. We will observe and find the problems in the Academy and come up with a solution!"

"Within two days, those who find and solve the problem will receive more points. Your performance will be recorded by a professional, so you don't have to worry about notarization."

"Next, I will invite all the investigators to move to our starsource continent's Tianxia Academy. I hope that everyone will have an outstanding performance in the next two days!"

Tianxia college had always been a cradle of talents. It was the foundation for martial League and the inspection department to add new blood, so it was highly valued.

This was the topic of the first round of the competition. It was also to find and solve the hidden problems in Tianxia college, so that the quality of Tianxia College's teaching, management, and other aspects could be improved. It could also test the ability of the patrol, killing two birds with one stone!

Lin Yi nodded-he didn't think there was anything wrong with the questions.

It was the same for Yan Su. He was the Dean of the Phoenix land's Tianxia Academy. Although this was the starsource continent, the questions were very suitable for him, so he didn't think it was difficult.

But other than Lin Yi and Yan Su, the other investigators all had serious expressions on their faces. No one looked relaxed.

Lin Yi was a bit suspicious when he found out, but he understood what was going on when he heard a few third tier continent investigators discussing in a corner.

"The starsource great continent's Tianxia Academy is directly under the jurisdiction of the inspection department. Dean Jin is personally supervising and managing this place, so this question isn't easy to solve, right?"

"Yes, they say they want to find faults, but the problem is, after they find it, is it really possible? Dean Jin is so wise, if we can find an abnormality, how can Dean Jin not find it?"

"Sigh, what a dilemma! If he didn't answer well, he would easily offend others! However, I can't refuse to answer it. This question is related to the competition between us, so I can't give up ..."

Those few investigators were obviously acquaintances. Although they were competitors, they weren't too guarded against each other, and were more open when they chatted.

They probably felt that there was nothing to compete with even if they competed directly, so that was it!

Zuo Si might have also heard these comments, so he specially added, "Dean Jin said that the first project's main purpose is to improve the teaching quality of Tianxia college, so everyone doesn't need to have any concerns."

"If you find any problems, just mention them directly. No one will blame you for it. Dean Jin can guarantee this! So please observe carefully when you arrive at the Academy, and be sure to tell me everything you know!"

Although he said that, most of the investigators didn't take it to heart. They still did what they had to do. In their hearts, they were also calculating how to find a balance between not committing any crimes and getting good results.

After Zuo Si said that, he left. He couldn't control whether he believed it or not. If he sent someone to bring a group of investigators to Tianxia Academy, his mission today would be considered complete.

He wanted to chat with Lin Yi and get to know him, but Lin Yi didn't have the intention to stay. He left with Yan Su and headed to Tianxia Academy.

Zuo Si couldn't go talk to Lin Yi-that'd draw too much attention. He didn't know when Lin Yi's status as the Vice Dean would be revealed, and he couldn't make the decision for Lin Yi at the moment.

When the group arrived at Tianxia college, there were naturally people from the college to pick them up and take them to the dormitories that had been arranged long ago to temporarily settle down.

The next two days would be the time for these investigators to show off their abilities. Whether they could find the problem and obtain points would depend on their own methods and strength.

Lin Yi and Yan Su didn't go in after knowing which room they were staying in. They walked around Tianxia college together.

"Director Yan, what direction do you think we should start from?"

Lin Yi was still used to addressing Yan Su as director Yan-it'd be uncomfortable if he were to address her as a patrol, as if he were her superior.

Yan Su didn't mind-he was someone who'd watched Lin Yi's rapid rise.

Chapter 8783

When Lin Yi first came to Fengqi Dazhou, he even wanted to be Lin Yi's backing, but he didn't expect Lin Yi to soar into the sky and become someone who could look down on him in a short time.

However, the change in their identities didn't make Yan Su feel estranged from Lin Yi, so she smiled and shook her head after hearing Lin Yi's question.

"This is the Tianxia Academy of the starsource continent, which is completely different from our Fengqi continent. All the problems in Fengqi Dazhou can be easily solved here. If you want to use past experience as a basis, it will be biased!"

Yan SU's train of thought was very clear. She pointed out a few facilities in Tianxia Academy: "Sima, look at these places. Our Fengqi great continent is lacking, but the starsource great continent has no problems."

"In terms of hardware, the starsource continent's Tianxia Academy is at least two grades higher than our Fengqi continent's Tianxia Academy. It's almost impossible to find any flaws in the hardware."

"But since Dean Jin set such a topic for us, he must be dissatisfied with Tianxia Academy in the starsource continent. Or perhaps he feels that there's still room for improvement, and there's quite a lot of room for improvement."

"In my opinion, it's most likely that there's a lack of teaching, or there's a problem with the Academy's management. It's also possible that there's something wrong with the students."

"So, if we decide on a direction, we can pay more attention to these aspects. If we focus on these aspects, we should be able to gain something!"

"Great minds think alike, Dean Yan." Lin Yi clapped his hands and smiled, "I see that Tianxia College's facilities are quite complete, and we can only start from the teaching, management, and students."

"The inspection department of the starsource continent's Tianxia Academy is directly under Dean Jin's supervision, so even if there are some omissions in the management, it's absolutely not a big deal. No one would dare to play any tricks under Dean Jin's eyes."

"So, we should focus on teaching first, then on the problems that the students might have. Director Yan, what do you think?"

Lin Yi wasn't too interested in the inspector competition-he was already the Vice Dean, after all, and it'd be beneath him to fight an inspector like that.

However, since he was already involved, losing would be even more embarrassing.

Lin Yi wanted to give Yan Su some advice so that she could get good results. After all, people would think that Yan Su was on his side.

"Good! This old man has met the president of the heavenly Academy of the starsource continent a few times. Why don't we go and talk to him first?"

Yan Su naturally agreed and gave a reliable suggestion: "Maybe we can get some information from him more easily. In this way, we can get twice the result with half the effort."

The Dean of the heavenly Academy of the starsource continent was called Shui Yuntian, and Yan Su was the Dean of the heavenly Academy of the Phoenix Qi continent. The two of them would naturally have some interactions.

As for the two great continents, one was a first-grade continent, while the other was a third-grade continent, so there was basically no possibility of competition. Shui Yuntian's personality could also be considered bold, so his relationship with Yan Su was still alright.

They weren't close, but they were at least acquaintances who nodded at each other and had good intentions. If she went to talk to him now, he probably wouldn't reject her.

Lin Yi didn't have any better ideas at the moment, so he nodded in agreement and followed Yan Su to find Shui Yuntian.

After arriving at Shui Yuntian's office and reporting their arrival, Shui Yuntian gave them a lot of face and personally welcomed them in the courtyard.

"Principal Shui, long time no see. You look even more elegant than before!"

When Yan Su saw Shui Yuntian coming out to welcome her, she smiled and cupped her fists, taking the lead to greet him.

"Sangzi great continent's patrol envoy Sima Yi greets Dean Shui!" Lin Yi followed suit.

"Long time no see, director Yan! Also, patrol envoy Sima, you are very welcome. Please come in and let's talk!"

Shui Yuntian returned the greeting with a smile on his face. He then turned to the side and invited the two of them in to take a seat.

The maidservants naturally served tea and fruits, and Yan Su first reminisced with Shui Yuntian for a while before turning to the main topic. "Principal Shui should know why we are here. I am now the Feng Qi great continent's patrol and I really want to get a good result in this competition. So I came to ask principal Shui if you could give me some advice?"

Shui Yuntian smiled indifferently as he stroked the beard on his chin, "I also know the questions set by the inspection department, but it's too much to say that it's guidance!"

"Actually, director Yan also knows that there will definitely be various problems in an Academy. Some can be solved, and some can't. Since you've asked, then I'll just say a few words."

"If I'm not wrong, you want to start with teaching, right? That's why you came to me. That's the right direction, but it won't be easy to solve. "

Shui Yuntian was indeed the Dean of Tianxia Academy in the starsource continent. He had already seen through Lin Yi and Yan SU's thoughts, but he didn't seem to mind, "The biggest problem of our Academy right now isn't the number of qualified teachers. After all, the starsource continent is second to none in the continent, and it has a lot of talented people."

"The instructors in our Academy are all Dragons and phoenixes among men. They have a strong foundation and talent in their respective fields, but their teaching ability seems to be somewhat problematic."

The starsource continent was the capital of the continent, so the Tianxia Academy naturally gathered elites from all fields. Each teacher was a top expert in their own field.

However, experts did not necessarily accept disciples. This had been proven long ago. It was just like how there were many instructors who had students all over the world. Their own strength might not be outstanding, and many of the students they taught would be able to surpass the instructors when they graduated.

"I understand. Are there many such situations? It should only be a rare case, right?"

Yan Su understood and immediately asked, "although a powerful teacher might not be a good teacher, he must be a teacher with a higher starting point. This situation shouldn't happen on a large scale, right?"

"How should I put it ... About fifteen percent of the teachers in the entire Tianxia college have this kind of situation. In fact, they didn't have any problems in the past, but starting from this year, the quality of teaching has greatly declined."

Shui Yuntian furrowed his brows, a look of confusion on his face. "I've observed them. Their way of teaching is no different from before. The students' talents are basically the same as those in the past, but their grades are far inferior to those in the past."

"If there were only three to five students, it could be explained as the students' own problem. However, almost all the students are the same. This means that there must be a problem with the mentor's teaching!"

"Dean Jin has also come to observe, but he also didn't have any clues. Everything seems normal, as if this batch of students should be so mediocre! But their talent is clearly not inferior to the previous students!"

"Therefore, for experimental purposes, we changed instructors to teach the same course. In the end, it was proven that the students' comprehension ability was not a problem, and it was indeed the problem of the instructors' teaching."

Chapter 8784 The End

"This matter is a little strange. We can't find the reason for it yet. If you are interested, you can try to solve it. If you succeed, I think you will get a very good result in the first task."

Lin Yi and Yan Su looked at each other, stunned.

According to what Shui Yuntian had said, those instructors who had problems with their studies had not had any problems last year. At the very least, the results of their students were normal.

However, this year, when the students attended their classes, there was a decline in the quality of teaching. If it was just an example, it was not a problem to say that the teacher had a problem.

It just so happened that almost 15% of the teachers in the entire Tianxia college were like this. It wasn't a simple individual problem!

The students had also proved that their talent and comprehension were normal after the change of instructors. This matter was really a bit strange!

"Dean Shui, may I ask if the teachers with the problem are concentrated in one sub-academy or scattered in various sub-Academies?"

Lin Yi pondered for a while and asked a crucial question. If they were all in the same school, then there might be a problem with the school.

Unfortunately, that was not the case.

Shui Yuntian spread out his hands and helplessly said, "It's distributed in all the sub-courtyards of the entire Academy, with no exceptions! So I can't solve this problem. I really can't find the reason!"

Lin Yi touched his chin, thinking that this was strange indeed. He had to investigate what the reason was.

"I understand. If we can solve this problem, we can indeed obtain excellent results. In that case, let's give it a try!"

Lin Yi looked at Yan Su, and the two made the same decision.

Yan Su then turned to Shui Yuntian, "Dean Shui, can you give us a list of the instructors who have problems?" Let's go and have a chat with them first. Perhaps we can find some clues. "

"You might not know this, but patrol Sima is an extremely outstanding great teacher. In the area of teaching his disciples, he has outstanding abilities and achievements. With patrol Sima taking action, the success rate of this matter is still very high!"

Yan Su conveniently advertised for Lin Yi. Of course, he meant it from the bottom of his heart, because in his heart, Lin Yi really did have that ability!

Shui Yuntian looked at Lin Yi, deep in thought. In fact, he had some understanding of Lin Yi, and if not, he wouldn't have said so much.

"Of course, no problem. If the two of you can solve the problem of our Academy, then it would really be a great help to me! I have great Expectations for this!"

As Shui Yuntian spoke, he took out a list of names and handed it over to Yan Su. It seemed that he was indeed very concerned about this matter, as the list of teachers who had problems had always been placed on his desk.

The Tianxia Academy could be said to be the best academy in the entire starsource continent. It was indeed extremely serious for 15% of the teachers to have problems with teaching.

One couldn't blame him for placing so much importance on it-if the two could really solve this, Shui Yuntian would be truly grateful!

Yan Su received the list and expressed her gratitude to Shui Yuntian before moving closer to Lin Yi to look at the list.

The name list was filled with names and there were even notes behind the names.

It explained which school the person was a teacher in, what his professional level was, and so on.

The total number of people was about two hundred people, and they were indeed spread all over the sub-courtyards, without exception!

"I've heard that patrol Sima is a Double Diamond rank Grandmaster in both the array and pill Dao. Director Yan used to be in charge of the combat Association and the combat section. You guys are probably thinking of starting from the pill refining section, the array Dao section, and the combat section, right?"

Shui Yuntian waited for the two of them to finish reading the name list before smiling and giving a hint, ""However, these three divisions are relatively popular places. At this time, most of the investigators are gathered. Do you still want to target them?"

Alchemy, array path, and combat were the three schools with the most people and the most wide scope of application. Naturally, there were also the most people who studied it.

As such, what Shui Yuntian said was absolutely correct. The majority of the investigators would set these three divisions as their target for the competition.

There were also rules in this project, such as first come, first served!

Whoever arrived first and found the problem would be able to solve it first. Lin Yi and Yan Su had been delayed by Shui Yuntian for a while, and they would probably be very late if they went over.

And if everyone arrived at the place around the same time, they would have to follow the order of the previous tournament's ranking, and the higher-ranked ones would get the priority to answer.

Whether it was Sangzi great continent or Fengqi great continent, although they weren't at the bottom last time, they were only below average and didn't have any advantages.

In addition, the problems that others had already discovered could not be raised by the people behind them, unless the problems were raised by the people before them but could not be solved.

Therefore, if he wanted to be invincible, he had to find more problems and solve them at the same time.

Lin Yi and Yan Su had the name list of the mentors, and were pretty much certain that the problem was with the mentors. However, there was still an element of uncertainty.

Therefore, going to the three popular sub-schools might not necessarily give them any advantage.

"Dean Shui's reminder is right. We don't have to go to the popular sub-schools, we can also observe other places!"

Lin Yi stood up and cupped his fists. "Thank you again for your help, Dean Shui. We won't disturb you any longer. We'll go and take a look at the situation."

Yan Su also got up and left.

Although he had two days, there were only so many problems. If someone else completed it before him, he would not have the chance to do it later. It would be a waste to give him another 20 days.

Shui Yuntian very courteously stood up to send him off, only returning after he had sent him out of the courtyard.

Such a courteous reception was probably not just for Yan SU's sake. After all, the two of them had only met a few times, and their relationship was only a nod of the head.

Although he didn't say it out loud, Lin Yi and Yan Su could guess that Shui Yuntian might have known about Lin Yi's identity as the Vice Dean of the inspection department, and was thus acting so respectfully.

It wasn't flattery, it was just respect. From this point, Lin Yi did quite admire Shui Yuntian.

After leaving Shui Yuntian's place, Yan Su looked at Lin Yi and asked, ""Sima, what do we do next? Just as Dean Shui said, the other investigators should have already gone to the more popular branches. If we follow them, the competition won't be too strong, right?"

Lin Yi nodded. "That's true. It's a waste of time to go now. We don't have to line up. But it's not like we can't go to the combat college."

"It's still not certain whether there's a problem with the mentors in the Tianxia Academy in the starsource continent. Director Yan, you can go over and observe them, chat with the mentors who have problems, and collect some clues. "

"The pill refining and array path divisions don't have to be busy yet. The inspection Division and Tianxia college have not been able to find the root of the problem. These patrols will at most pick some superficial problems to solve. We don't have to fight with them over these."

Chapter 8785 No Problem!

"When we find the root of the problem and solve all the instructors 'problems at once, we will naturally be able to obtain a large number of points! As for the combat college, director Yan, after you go over, in addition to collecting clues, you can also see if there's anything wrong with their teaching. "

"For example, battle formations! Our Fengqi great continent's battle formations don't lose to any other continent, and we're even second to none. Director Yan, you can start with battle formations and get some points. "

Yan Su immediately showed an expression of understanding after hearing this.

Fengqi continent's battle formation was just average. It was completely ordinary in the starsource continent.

However, under Lin Yi's guidance and Fei daqiang's occasional training, Fengqi Dazhou's battle formation level was definitely far beyond the overall level of the starsource continent.

Regardless of whether there was a problem with the teacher who taught battle formations, it was too easy for Yan Su, the president of the combat Association, to find some problems and solve them after her battle formation skills had improved!

The important thing was to collect clues and figure out the reason for the decline in the quality of the instructors' lessons!

According to Shui Yuntian's explanation, it was clear that the instructors' lessons were the same as last year's, and the talents of the students were also about the same. Yet, the quality of the lessons had dropped. This was simply inconceivable.

Lin Yi didn't think it would be easy to figure out the secret!

"I understand. As for the battle division, I'll start with the battle formation to get a wave of points. I'll also chat with the instructors who have problems."

Yan Su accepted her task. At the same time, she was a little curious. "Sima, what are you going to do? You're not coming with me?"

"Yes, time is tight, and the mission is important. It's better for us to attack in groups. We'll get some points first and gather enough information at the same time. Then, we'll meet up and solve the biggest problem together."

Lin Yi nodded with a smile, explaining his plan. "In order to make sure that even if the biggest problem is not solved, we will not lose points. At the beginning, we must first get some points to ensure the base, so I will go to some less popular sub-schools, you don't have to worry about me."

Yan Su revealed a smile and chuckled, "Of course I won't worry about you. With your ability, there's nothing you can't solve! Then let's split up and meet again at night!"

Lin Yi smiled and cupped his fists at Yan Su, saying goodbye. The two each chose their own targets and went their separate ways.

Yan Su followed Lin Yi's suggestion and went to the combat division. She planned to use the battle formation as an entry point to gain points and then chat with the mentor.

Lin Yi, on the other hand, went to the array path sub-school.

As expected, there were already more than ten investigators in the array path school. As expected of a popular school, they had to queue for half a day to find and solve the problem.

The good thing was that Lin Yi wasn't here to join in the fun-his target wasn't the array path section, but another section under the name of the array path section, the Xuanji talisman section!

It was definitely a super unpopular choice!

In fact, the talisman formation sub-school was a big sub-school that could be on the same level as the array Dao sub-school. However, there were very few inheritances of talismans on the star source continent, and some people would believe that they were cut off.

The array and talisman sub-school was more of an Academy for archeological research and did not have any proper inheritance.

One could only imagine how many students there were in the talisman and array sub-school.

With such a declining sub-college, Tianxia college had no way to separate it and could only put it under the name of some related array path sub-schools.

Not a single patrol envoy went to such an unpopular section. Everyone would rather queue at the array path section than go to the talisman section.

They couldn't be blamed. None of them understood the Dao of talismans and formations. It would be a waste of time even if they went.

Previously, Fei daqiang had plundered many books from the sky array sect's sub-school, including books on array discs, but no books on array talismans, which showed the rarity of array talismans inheritance.

The heavenly array sect headquarters might have some ancient books on this, but who on the Xingyuan continent could obtain the inheritance of array talismans from the heavenly array sect headquarters?

Lin Yi arrived at the school and scanned with his spirit sense. He found that there were only eighteen students in the school, and they were all in class.

The one teaching them was an old man with unkempt appearance. He had an unkempt beard, messy hair, and loose robes. He didn't look like a proper person.

He stood outside the classroom and listened for a while. He found that the theoretical knowledge of talismans and arrays was disjointed and completely unsystematic.

It was as if the old man had casually pulled something out of his mouth in a moment of excitement.

However, the students below were quite serious and listened with great interest. They didn't seem to think there was anything wrong with the old man's class.

The old man noticed that there was an extra person outside the classroom. He smiled and nodded at Lin Yi as a form of greeting before continuing for another three or four minutes. The class was probably done.

"Next, you guys think about it for a while. There are guests outside, so this old man will go and greet them first!"

The old man said briefly before walking out of the classroom, cupping his hands to Lin Yi. "This old man is Lu GUI Chen, may I know who you are?"

Lu Guichen's information flashed through Lin Yi's mind. This name was also on the list that Shui Yuntian had given him. He was the Vice Dean of the array Dao school, as well as the Dean and mentor of the talisman school.

That's right, there were a total of 18 students in the talisman division. Other than Lu GUI Chen, there was no other teacher.

The quality of his lessons was also on the list of abnormalities, but Shui Yuntian had specially marked it out, indicating that Lu GUI Chen's abnormalities were mostly in the array path sub-school.

As for the talismans and formations departments...Shui Yuntian didn't even pay attention to the differences between the past and the present, so he didn't even consider it.

It couldn't be helped, the talisman division was too transparent. If it wasn't for the fact that the entire Academy only had one teacher, Lu GUI Chen, and that he had an abnormality when teaching in the Academy, the name of the talisman division wouldn't have been on the list!

"Greetings, Dean Lu. I'm Sangzi continent's inspector, Sima Yi. I'm here for the first event of the inspector tournament. Dean Lu should have heard about this, right?"

Lin Yi returned the salute and briefly introduced his identity and purpose of visit.

Lu GUI Chen revealed an expression of sudden realization.

"So it's patrol envoy Sima, it's a pleasure to meet you. This old man has already heard about the competition between the patrol envoys, but I didn't expect that patrol envoy Sima would come to the talismans and arrays division!"

Lu GUI Chen laughed out loud and raised his hand to scratch the back of his head,""Sangzi continent is a third-grade continent, the lowest existence in the entire starsource continent. Could it be that because inspector Sima couldn't win against others, he took a different path and came to our talisman division to try his luck?"

"That's a good idea, but I'm afraid that our Academy will have to disappoint you! Speaking of problems, there are many in the talisman and array division. It wouldn't be wrong to say that they are riddled with holes, but they are all unsolvable problems. If patrol Sima can solve them, this old man will be celebrating!"

Chapter 8786

His words seemed to look down on the third-grade continents, but with his expression, it gave people a sense of cynicism.

And so, everything he said was like a joke, and Lin Yi didn't feel disgusted.

On the contrary, he was as Frank as he should be!

"Haha, I'm here to try my luck. It's better than lining up behind people. But why did Mr Lu say that? Could it be that the formations and talismans sub-school was filled with ancient problems that could not be solved? I don't really believe you. "

Lin Yi didn't mind at all as he asked Lu GUI Chen with a smile. This old man was interesting, he didn't seem to be an old-fashioned person.

Lu GUI Chen shrugged his shoulders and made a helpless expression before pulling Lin Yi out a few steps, acting as if they were avoiding attention.

She sneaked a glance at the classroom, making sure they were far enough away from the students before speaking to Lin Yi in a low voice.

"Patrol envoy Sima, to tell you the truth, our talisman and array division is a division at the very edge. Strictly speaking, it should be the talisman and array division's talisman and array division."

"The students here have no talent in array Dao, but they are extremely interested in it. They were originally students of the array Dao sub-school, but because their results were too bad, they were sent to the array and talisman sub-school."

"Here, they only need to study the various theories of talismans and arrays. Because there's no chance to actually do it, they don't have to worry about their results. If it's just theoretical knowledge, they can do very well."

"The children are all good children. It's a pity that in the talisman and array sub-school, they will never have a future. No matter how good their theoretical research is, without the complete inheritance of talismans, they are just Flowers in the Mirror."

"Patrol envoy Sima, if you want to find problems in the talismans and arrays division, then you can really find countless problems! But the key is that these are all problems that everyone knows. If you can't solve them, it'll be useless to your competition. "

If you found a problem that you didn't find, even if you couldn't solve it, you would still get points.

As for those problems that had long been recognized, if you solved them, you would get double the points. If you couldn't solve them, it would be useless to mention them, as they would not be counted.

Lu GUI Chen was clear about the rules and didn't have high hopes for Lin Yi to come, not thinking that he could get any points.

Lin Yi wasn't sure what he could do right now. He wanted to talk to Lu Guichen first and see if he could find out the reason why Lu Guichen's classes were so unusual.

The inspectors in the queue didn't know that there was an abnormality in the lessons in Tianxia college, nor did they know that Shui Yuntian had a list of abnormal teachers. They only knew to find an opportunity in the array path section.

Lin Yi did have the advantage in this area, but after seeing Lu Guichen's class, he changed his mind and decided to talk about it after the class.

"Thank you for your advice, Mr Lu, but I think the talisman formation sub-school is still very promising. We can't give up so easily! That's right, the talisman and array sub-school also has its own library, right? I wonder if I can go in and read it?"

Lin Yi had just listened to Lu Guichen's class, and while it wasn't a complete mess, he had to admit that it was all about formations.

In terms of theory, it was definitely qualified to be taught.

This was why Lin Yi was interested in the library in the talisman division.

After all, Lin Yi himself had a blank space when it came to formations and talismans. Learning some theoretical knowledge would definitely help him gain points in the school.

Lu Guichen blinked, thinking that Lin Yi had given up and was using the library as an excuse to get out of the situation. He smiled and nodded, ""Of course you can. There are quite a few books in the array and talisman sub-school, but unfortunately, most of them are incomplete and don't have much practical value."

"If inspector Sima is interested, you can look through it, but you can't take it away. Please understand! If there's anything you don't understand, you can come and ask me, but I can't guarantee that I'll be able to answer, hahaha!"

In Lu GUI Chen's heart, the library of the talisman division really didn't have much practical value. It was more of a collection value.

Therefore, there were no restrictions in the library Pavilion. Anyone could read it as long as they did not bring it out.

"Thank you, Mr Lu," Lin Yi cupped his hands, "I'll be off to the library then. Please have a chat with me when you're done with your class. I think I'll have a lot of questions for you. "

"No problem, no problem. This old master doesn't have much, but I have a lot of time. The library Pavilion is this way. If you walk along the road, you'll reach it quickly, so this old man won't accompany you. "

Lu Guichen pointed out the way for Lin Yi, and the two said their goodbyes before he strolled back to class.

Lin Yi went to the library of the formation and talisman division to read.

After walking along the stone path for a few minutes, they saw the library of the array and talisman division. It wasn't big, just a three-story building. The door was left ajar, and no one was inside.

There was an office at the entrance, but the administrator was obviously not there. Perhaps it was a student who was also the part-time administrator of the library Pavilion, so there was no one here when the class was going on.

In any case, other than the 18 students here, there probably wouldn't be anyone else coming to the library of the talisman sub-school. Hence, they didn't care much.

Lin Yi entered the library and scanned around with his spirit sense, copying all the books into his sea of spirit and arranging them accordingly.

He then picked up a book and pretended to flip through it, but in reality, he was reading a copy of the book in his spiritual sea.

The library of the talisman division was not big and there were not many books in it. Compared to the library in other continents, it was not worth mentioning.

This was because all of the books here were related to talismans and formations. Occasionally, there would be a few pages that touched on formations, but they were just scraps.

Lin Yi used his spirit sense to scan through the books at an extremely fast speed and eliminated 90% of the books.

These 90% of the books were basically theoretical knowledge on formations and talismans, but there was not a single useful book. They were all things that future generations had speculated and speculated.

In fact, a portion of them were actually written by the students of the talisman and array division, including all the previous and current students.

It was because there was too little knowledge about formations and talismans, and no matter how small the library was, it would still appear empty, so all of these were included in it.

It was no wonder that the talisman division was so lax in their management of the library Pavilion. No matter who it was, they would not be interested in stealing the books here!

After eliminating 90% of the useless theory books, the remaining 10% contained genuine ancient books on formations and talismans. They had a long history, but unfortunately, none of them were complete. Other than incomplete volumes, there were only incomplete volumes. They were completely unsystematic!

Chapter 8787

Even Lin Yi wasn't able to derive anything useful from these incomplete books. These books were useless if you were to say they were valuable.

However, they were really valuable!

No wonder the array and talisman sub-school existed in name only. If one wanted to learn something from these fragments, they really needed to have the spirit of a foolish old man moving mountains.

Lin Yi wasn't a fool, but in his sea of consciousness, with his extraordinary speed and wisdom, he could easily complete the mountain moving work. All the fragments were rearranged and filtered one by one.

After eliminating the parts that couldn't be pieced together, he actually obtained a relatively complete ancient book on talismans and formations, and it was still incomplete!

However, this incomplete piece that was pieced together could at least be understood by others. Moreover, it was relatively smooth, and there was nothing wrong with it on the surface.

"It's a pity that this incomplete manual only contains the knowledge of the later stages of talismans and arrays. It doesn't have any basic knowledge at all. It's still impossible to understand the process of talismans and arrays!"

Lin Yi sighed in his sea of consciousness. This was his limit. It was an incomplete piece of text, and it was beyond his ability to deduce the basics of making talismans.

However, with this remnant piece, if he were to throw it out, it would be able to shock Lu GUI Chen and those students.

Of course, without the basic knowledge, the details would be meaningless. It was like a castle in the air without a Foundation. No matter how grand it was, it would collapse in an instant.

Hence, Lin Yi's incomplete version wasn't too incomplete, but it was still incomplete.

The damn thing had been paying attention to Lin Yi the whole time, and he couldn't help but laugh when he heard Lin Yi's sigh in his sea of consciousness. "It's already quite good that you can do this. Next, as long as you complete this incomplete set, you should be able to refine array talismans on this sub-Island!"

Lin Yi curled his lips, not thinking much of it. "I also know that I can refine talismans by completing them, but I have no way of completing this incomplete chapter!"

If they could do it, they would have done it long ago. Who would wait until now?

"Sigh, young people these days! Just because you have some ability, you think that you can go out and fly alone. When you encounter problems, you don't know how to ask master for help!"

Ghost Dongxi pretended to sigh with emotion, ""How can you do this? Young people should be humble and reverent, and constantly seek knowledge to improve themselves. Only in this way can they continue to improve. Being arrogant will only ..."

Lin Yi couldn't take it anymore and interrupted the ghost's performance, "Alright, senior ghost, you mean you know how to make formation talismans? Why have I never heard you mention it before?"

"Hehe, what a joke. What do I not understand? The Dao of talismans is a branch of the Dao of formations. How can a great Grandmaster like me not understand talismans? I just didn't have the chance to show off my skills on Sky Class Island!"

The demonic thing immediately put on the appearance of an otherworldly expert and began to show off. "This old master knows too many things. If you don't ask, who would be so free to mention them to you? Then I won't have to do anything all day, I'll just chat with you!"

Ever since Lin Yi showed his amazing array talent on the sub Island, the damn thing couldn't compare to Lin Yi in terms of array.

And so, he was quite proud of himself for beating Lin Yi this time.

In reality, this damned thing's understanding of talismans and formations was limited. It was only superficial.

And when Lin Yi came into contact with talismans, he met the Wang siblings from a talisman family, and they took out high-quality stuff. Who the hell would dare to say anything about it?

With this damned thing's level in talismans, he was not qualified to comment on the Wang clan's talismans, so he had decided not to mention this.

Now that he'd finished the incomplete manual, he'd gotten the more complete manual for the middle and late stages of making talismans. What he lacked was the most basic, the entry manual!

It just so happened that the ghost understood this basic entry-level knowledge, so he couldn't help but come out and show off.

"Senior ghost is mighty! Please give me some pointers!"

Lin Yi was overjoyed and quickly assumed a respectful posture, greatly satisfying the ghost's vanity.

Of course, these were all jokes. When it came to business, the ghost immediately became serious. "I've already read it. After making up the basic introduction chapter, the parts you've sorted out later can be smoothly linked with the introduction chapter. "

"Even though the" basics "is the legacy of the sky-class Island, it's surprisingly compatible with the incomplete version you've organized. It's completely self-contained. This is a sub-Island, after all, and not a sky-class Island. You can try to use this to make a talisman-if it goes well, you should be able to succeed!"

As he spoke, the ghostly thing passed the basics to Lin Yi.

Just like what the ghostly thing had said, the combination of the two was surprisingly smooth!

After reading through the entire book, he felt that it was natural, as if this was a complete ancient book on talismans and arrays, and not something that was pieced together.

"So that's how it is! It was really unexpected! After reading the basic introduction chapter, I suddenly had a feeling of enlightenment. Thinking back, it should be like this!"

Lin Yi couldn't help but exclaim after reading it, "Senior ghost, it's all thanks to you this time. It seems that the sub island's talisman Dao is going to be reinvigorated!"

"It doesn't seem to be too difficult to refine talismans according to this ancient record. I can't wait to try refining them!"

Lin Yi started rummaging through the Jade space eagerly.

The Jade space was now filled with all kinds of materials, spiritual herbs, and other resources. When he needed something, he could basically find it.

However, he really didn't have anything related to talismans ...

Whether it was on Sky Class Island or the sub Island, Lin Yi never thought of making his own.

Plus, not everyone could make talismans, and the materials for making them were rare even in the outside world. Naturally, Lin Yi didn't have any stock in the Jade space.

One couldn't make bricks without straw-no matter how excited Lin Yi was, he couldn't do anything about talismans right now. He could only go out and buy some materials first.

The starsource continent was the capital of the starsource continent, and its prosperity was second to none. It should not be a problem to buy some materials.

The tournament didn't restrict him from going out, so Lin Yi decided to go out for a walk.

Lu Guichen had just finished his class when he was about to leave the school. He waved at Lin Yi enthusiastically, "Patrol envoy Sima, you've finished reading so quickly? That's right, our branch's library Pavilion has too few ancient books and records, so there's really nothing to read, haha!"

He didn't hide this fact. It was a fact that everyone knew, and there was nothing to hide. The reason why there were so few books was because they were rare, so it wasn't embarrassing!

"Is investigator Sima about to leave? Why don't you come to my office, have a cup of tea, and chat? Of course, if you need anything, you're always welcome!"

Lin Yi said that he wanted to talk to Lu Guichen before, which was why he took the initiative to invite him this time, but his intention to invite wasn't strong. Seeing that Lin Yi was about to leave, Lu Guichen was already prepared to see him out.

Chapter 8788

Lin Yi stopped in his tracks and thought of something. After a few polite words, he changed the topic and asked, Mr Lu, do you have the materials to make talismans here?"

"I've always done some research on formation talismans, but it's not a systematic one, so I've never succeeded in making one. Today, I read some incomplete chapters in the library and gained some enlightenment. Therefore, I want to try to make formation talismans, but unfortunately, I don't have the materials. "

Lu GUI Chen was slightly startled, but his eyes immediately lit up, ""Patrol Sima has also studied formation talismans? At the point where he could try to make talismans? That's great! No wonder patrol envoy Sima would choose to come to our formations and talismans branch!"

He seemed to be a little excited, and couldn't help but clap his hands. If he were to clap his hands on the other Deans, it would seem a little exaggerated, but he didn't care about his appearance, so the clapping was very harmonious.

"Patrol envoy Sima, you've asked the right person. Our talisman and array division naturally has sufficient materials to refine talismans. If you don't mind, please come to our talisman and try to refine talismans!"

Lu GUI Chen wanted to send Lin Yi off, but now he couldn't wait to drag Lin Yi away!

To make talismans!

This was something that the talisman division could only dream of!

If they could solve the fundamental problems of making talismans, the entire talisman division would no longer be a waste concentration camp. They would only be able to research some fragmented theories and get rid of the impression that they were an archaeological Academy!

When the talisman array sub-school could really refine talismans, this place would no longer be an insignificant place under the array Dao sub-school, but a big sub-school that could truly be on the same level as the array Dao sub-school!

At that time, the students who wanted to learn talismans and arrays would be like a school of fish crossing the river!

His future was bright!

That's why we have to keep Sima Yi!

Lu GUI Chen's mind moved like lightning and he had already made a decision. He immediately took out his storage bag and pulled out a pile of materials for refining talismans.

"Patrol envoy Sima, take a look. These materials are all of relatively high quality, I wonder if they are suitable? If it doesn't work, I can go to other places and perhaps find better materials. "

Lu Guichen didn't care about his appearance at all, so he didn't care about his image when he was in a hurry. He passed the materials to Lin Yi and almost dragged him to start making talismans.

Lin Yi scanned with his spirit sense and confirmed that the materials in front of him were all good. They were good for making formation talismans. He smiled and nodded, "Suitable! They're all good materials. Thank you, Mr Lu!"

"It's no trouble, no trouble at all. Although our talisman and array division can't refine talismans, we still try to refine them on a regular basis. These materials are completely wasted in our hands. Only in the hands of patrol Sima can their value be displayed!"

Lu Guichen grinned and arched his eyebrows, not feeling that there was anything wrong with the talisman division not being able to produce talismans,""That's right, patrol envoy Sima, I have a presumptuous request. While you are refining the talisman, can I watch from the side?"

"Of course, this is indeed a little inappropriate, but I promise that I will definitely not make a sound and will definitely not disturb your refining ... If you need any compensation, just tell me and I will do my best to satisfy your request!"

Lu GUI Chen also knew that making such a request was a bit rude.

The Dao of talismans and arrays could be said to be one of the most mysterious inheritances of the sub Island. In any sect, it was the top secret that was not passed on!

Who would easily allow outsiders to watch?

Even if he paid a huge price, he might not be able to get permission, but he had to make this rude request.

If it wasn't for his love for talismans, Lu GUI Chen could have just been the Deputy Dean of the array Dao sub-school, why would he still be the Dean of the array Dao sub-school?

And he even personally came to teach those students who didn't have any array talent?

One had to know that the talisman formation sub-school was under the name of the array path sub-school, so the principal's status was not even as high as the vice principal's status, so Lu GUI Chen's reputation was basically zero.

Lin Yi looked up at Lu Guichen, the latter's face was full of anticipation, his back slightly bent, looking like a normal old man, not a single bit of Tianxia College's Vice Dean's attitude.

"Of course, no problem. As for my request ... Mr Lu, haven't you already fulfilled my request? With so many good materials for talismans and formations, what more can I ask for?"

Lin Yi put away the materials and nodded to Lu GUI Chen with a smile, "It's a fair trade. Thank you very much for your help, Mr Lu!"

"No... No... Those were all worthless things, how could I ... Haha...Thank you, thank you inspector Sima ..."

A huge sense of happiness instantly descended on Lu GUI Chen's body. The little old man's back immediately straightened up, his eyes narrowed and his mouth was wide open, even his words were a little incoherent!

"Right, I have another request!"

Lin Yi's tone suddenly changed, his face serious.

Lu GUI Chen immediately retracted his smile and cupped his fists in a serious manner, ""I should! As long as it's within my means, I won't have any second thoughts!"

"I'm sure Mr Lu can do it. This is very important to me!"

Lin Yi maintained his serious expression and paused for a second before breaking into a smile. Mr Lu, please arrange a quiet room for me so that I can start making talismans!"

Lu GUI Chen froze for a second before shaking his head with a smile. He finally understood that Lin Yi was just joking with him!

He thought that Lin Yi would ask for something difficult or something extremely precious, but it turned out that he only wanted a quiet room!

He was so serious to scare people!

"So it turns out that patrol Sima is not a kind person!"

Lu Guichen laughed and pointed at Lin Yi before pulling his arm, as if he was afraid that Lin Yi would run away, ""Come, come, come. My office is very quiet. No one usually comes here. It's just right to meet your requirements."

Lin Yi smiled and didn't resist, letting Lu Guichen pull him to his office.

There weren't many people in the entire Academy, and Lu GUI Chen's office here was indeed very quiet. Usually, other than sweeping, no one would come here. He himself wasn't here often either, because there were more things to do in the array Dao Academy.

As the Deputy Dean of the array path sub-school, Lu GUI Chen naturally had another office.

"Is this place alright? If patrol envoy Sima has any other requests, feel free to state them. I will definitely make sure that you are satisfied!"

Although Lu Guichen said that, he couldn't wait for Lin Yi to start making the talismans!

He really didn't want to rush Lin Yi, otherwise he'd be telling Lin Yi to hurry up and start.

Lin Yi looked around and nodded in satisfaction. It didn't really matter where he made the talismans-finding a quieter place was just because it was his first time making them, and he wasn't sure if he'd succeed.

Chapter 8789

He thought that he would try a few more times, but if too many people saw it, it would inevitably affect his mood.

If it was only Lu GUI Chen, then it wouldn't matter. She believed that he wouldn't mind watching the process of refining talismans a few more times.

Mr Lu, I'll start making the talismans now. We'll have a good chat after I'm done!"

Lin Yi called out and took out the materials for the talismans.

Lu GUI Chen nodded seriously and walked to the chair in the corner to sit down, his eyes fixed on Lin Yi's movements, afraid to miss a single one.

Lin Yi didn't really do much. First, he raised his left hand and released a refinement fire, which floated in his palm. The temperature of the refinement fire was completely contained, not letting any heat out.

From Lu Guichen's perspective, Lin Yi looked like he was holding a ball of cold fire, but because of that, his face was even more serious.

The moment an expert made a move, one would know if there was one!

Just the refinement fire alone was enough to make Lu Guichen feel that Lin Yi's title of a Grandmaster was well deserved!

Lin Yi didn't care about Lu Guichen's thoughts and continued with his own business. In fact, if he were to make talismans, it would be better to use a natural fire like the icy blaze fire.

Even the Wang clan, a talisman patrician family, coveted the icy blaze fire. One could see how effective the fire was in refining talismans.

However, Lin Yi was only making the most basic talismans. He didn't need the spiritual fire-normal refinement fire was enough.

Under Lin Yi's control, a blank jade talisman was wrapped in the fire and further processed. This was a half-finished product, and this was the limit. The next step would have to be done by the person who made the talisman.

Lu GUI Chen's eyes were wide open and he didn't even want to blink. He had never thought of this first step and he didn't want to miss a single detail!

The surface of the Jade talisman slowly became smooth and round under the elixir fire. Its thickness also rapidly became thinner. The impurities contained in it were all burned into ashes by the elixir fire.

This step could be said to be neither difficult nor easy. The ability to control the flame was extremely important. If one was not careful, the Jade talisman would be destroyed while burning the impurities.

Many people couldn't even complete the first step. This was also one of the reasons why talisman Masters were becoming rare!

Fortunately, Lin Yi's control over his refinement fire had reached Grandmaster level, and the first step was completed easily.

In just two to three minutes, the half-finished jade talisman had turned from three millimeters thick to half a millimeter thick. All the impurities had been burned away, leaving only one-sixth of its essence!

Lu GUI Chen was shocked. The half-finished jade talisman was already processed and was already a high quality item. He didn't think that Lin Yi would reduce it by five-sixth!

Amazing!

Lin Yi didn't think that he was that good-this was just the basics!

Perhaps other people couldn't do it as fine as he did, but after removing half of the thickness of the semi-finished product, it could basically be used.

One-sixth was just Lin Yi's own desire to try more.

After this step, Lin Yi added some supplementary materials into the fire to melt and slowly merge them into the Jade talisman. These supplementary materials would build the structure of the talisman and provide energy to the talisman.

This process lasted for about five to six minutes. The thickness of the Jade talisman slowly increased from half a millimeter to about 0.8 millimeters before it stopped moving.

Lu GUI Chen really didn't even blink once. Even though his eyes were a little sore, he didn't dare to miss any changes. Therefore, he saw all the changes in the Jade talisman, and his heart was still in shock.

So, this was how to make talismans?

In the past, when they tried it randomly, they had no clue at all. They really tried it randomly and then destroyed countless materials ... Ignorance is really terrible!

After the materials were combined, the Jade talisman in the alchemy fire would be considered a blank talisman, and he could start to carve the array patterns.

Lin Yi held a needle as thin as a hair between his fingers, and it landed steadily on the empty rune wrapped in the fire. As the needle moved, the elemental Qi gathered at the tip of the needle, slowly merging into the rune.

Every time a new mark appeared, the alchemy fire would cover it, completely refining and fusing the attribute Qi into the mark, ensuring that there would be no leakage.

This was the last step in the refinement of talismans, and also the most crucial step. The majority of talisman Masters failed at this step.

If the carving needle wasn't stable enough and there was even the slightest deviation in the carving of the formation pattern, the entire talisman would be wasted. There was no problem with carving the formation pattern, but if he used too much force and pierced through the talisman, he would have to start all over again.

Being able to maintain a stable inscribing process was only the foundation of success.

At the same time, he could not make any mistakes in introducing the attribute Qi. The amount of attribute Qi must also be stable, not too little or too much. If it was too little, it would cause the entire talisman to be unbalanced, and eventually cause the talisman to collapse on its own after it was completed.

If there were too many of them, it would be even easier. He would not even need to wait for it to be completed as he could directly destroy the balance and destroy the talisman.

All of the above had been completed, and there was still the cover and smelting of the alchemy fire. There was a slight mistake in the timing. If the cover and fusion were not perfect, the elemental Qi might dissipate, causing a problem in the quantity. Then, needless to say, there were more above!

All in all, this was really a meticulous job and there couldn't be the slightest mistake. Lu GUI Chen watched nervously from the side, and fine beads of sweat appeared on his forehead, but he didn't notice it at all.

Lin Yi wasn't nervous at all-he was getting more and more used to it. This talisman was just the most basic one, something he'd use for practice.

It took him about twenty minutes to finish the drawing-it was his first time doing something so detailed, after all, and he had to be extra careful.

Speaking of which, the inscribing of formation talismans and formation disks was somewhat similar, but the requirements for formation disks were much more relaxed and didn't need to be so exquisite.

However, the total amount of formation disks was more complex than formation talismans, so it was hard to say which was more difficult.

After finishing, Lin Yi let go of the needle and it fell back into the material bag.

At this point, the talisman was basically completed. There was some final work that should not affect the success or failure of the talisman refinement.

After Lin Yi let go of the needle, he made a few hand signs with his right hand and directed the elemental Qi around him into the fire. The fire suddenly increased a bit, and he began the final step.

Lu Guichen finally blinked his eyes, looking a little surprised. The hand signs that Lin Yi used to activate the attribute Qi were familiar.

It seemed ... To be something from an incomplete book in the library Pavilion?

Chapter 8790

No, it wasn't just one, but the contents of three or four volumes!

As a formation master who was obsessed with formations and runes, Lu GUI Chen had long since merged all the fragments from the library into his memory and made it his instinct. So when he saw Lin Yi's hand gestures, he immediately made the connection.

He had never thought that those fragments could actually be used together.

So Sima Yi was not lying when he said that he had some gains in the library Pavilion, and he really had some gains?

Lin Yi had finished the final refinement, and the fire disappeared. The completed talisman stopped floating and floated into Lin Yi's palm!

A few flames flickered on the surface of the talisman before they were retracted into the talisman and disappeared completely.

This was a basic fire attack talisman, and it was completed perfectly. Lin Yi's lips curled into a smile.

It was a little unexpected that it could be so smooth. He thought that he would fail at least one or two times, but it turned out to be so smooth. It was good!

The last few hand seals were indeed from the incomplete books in the library of the talismans and arrays sub-school, while the ones in front were basically taught by the ghost.

Because it was a Sky Class Island inheritance, Lin Yi made some slight changes and ended it with a sub Island.

If not, he would not be able to successfully refine a talisman in the end, even if it was the most basic talisman.

"Success! He really succeeded in refining the formation talisman!"

Lu GUI Chen jumped up and couldn't help but cheer. Lin Yi made the talisman, and he felt like he made it himself! He couldn't suppress the excitement!

"Patrol envoy Sima, no, Grandmaster Sima! You're too amazing, you actually managed to refine a formation talisman! Amazing!"

Lu Guichen jumped over and looked at the talisman in Lin Yi's palm. He wanted to take it and look at it, but he was a little embarrassed and scratched his head in embarrassment.

This was the first time he had seen a successful talisman formation. Even if it was just a basic talisman formation, it was still an eye-opener for him. He was too happy!

"It's just the simplest low-level talisman. It's not a big deal!"

Lin Yi shook his head with a smile and handed the talisman to Lu GUI Chen, "Mr Lu, please take a look. Is there anything wrong?"

Lin Yi knew that the old man would've asked for it if he didn't give it to him, so he decided to do him a favor.

Lu GUI Chen was overjoyed and quickly took the talisman, fondling it over and over as he examined it.

It wasn't like he had never seen talismans before. He had even used high-level talismans before. Normally, such low-level talismans wouldn't attract much attention.

However, this one was different. This was the first time Lu GUI Chen had personally witnessed the entire process of refining a talisman. Therefore, the talisman in his hands was extremely special. Even a high grade talisman could not be exchanged for it.

"Perfect! It was simply too perfect! There's nothing wrong with it!"

Lu GUI Chen couldn't stop praising the talisman in his hand, the fire in his eyes burning even more.

"Mr Lu, why don't you try activating the formation and see how powerful it is?" Lin Yi smiled.

The refinement process was just a process. The final activation of the talisman was the goal and the result. If there was a problem with the activation of the talisman, the previous refinement process would be in vain no matter how perfect it was.

Lu GUI Chen was a little reluctant. In his eyes, this low-grade talisman was like a work of art. It was such a pity to activate it like this!

From Lin Yi's words, he could tell that this was probably the first talisman Lin Yi made, and it had a lot of sentimental value. It was the right choice to keep it.

But Lin Yi obviously didn't think so, and Lu GUI Chen couldn't do anything about it. He could only treat activating Lin Yi's first formation as his glory.

"Alright, then I won't stand on ceremony!"

Lu GUI Chen solemnly nodded his head, and with a ceremonial gesture, he activated the talisman in his hand.

A fire attribute attack instantly shot out. Lu GUI Chen's figure flickered and disappeared from his original spot like a ghost. He appeared in front of the fire attribute attack and raised his hand to block the attack.

A light explosion rang out from Lu GUI Chen's palm. The power of the attack did not dissipate at all, all of it was controlled within a square inch.

After all, it was a low-level talisman. With Lu GUI Chen's body refining ability, he could easily deal with it.

"Whew~~quite a powerful attack! Compared to the sky array sect's low-level array talismans of the same level, the attack power has increased by at least 30%, it's really amazing!"

A low-level talisman's power wasn't worth mentioning, but this low-level talisman Lin Yi made represented something extraordinary.

It was 30% more powerful than the sky array sect's array talismans of the same level. It would probably cause a sensation if it was known!

Lu Guichen's eyes were already shining as he looked at Lin Yi.

Lin Yi's success in making the talismans was already enough to shock him, and after testing it out, the power increased by so much ... He didn't know what words to use to describe his feelings!

"Patrol envoy Sima, you're really too amazing! To be able to make such a perfect talisman, even though it's only a low level talisman, it can already be said to be a groundbreaking move!"

Lu GUI Chen rubbed his hands, not knowing what to do. He was praising Lin Yi from the bottom of his heart, but he was thinking about how to learn from Lin Yi.

He knew very well that the making of talismans was a top secret, even for the sky array sect. Not a single bit of information was kept on the continent.

Lin Yi was already giving him face by allowing him to watch-it'd be a bit too greedy if he continued to push his luck.

Perhaps he could use something in exchange?

Lu GUI Chen's thoughts moved like lightning as he started to think about what good things he had.

As the Deputy Dean of the array path sub-school, he was also a powerful array path Grandmaster, so he naturally had many precious items in the array path.

The problem was that Sima Yi was a rare Double Diamond Grade Grandmaster in alchemy and array, so he might not even be interested in what Lu GUI Chen had ...

"Mr Lu, you're too kind! It was just a simple introduction to the basics, not worth mentioning! Maybe it's because the basics of making talismans have been lost for a long time, that's why Mr Lu is so surprised. "

Lin Yi said as he took out a half-finished jade talisman, "I'm going to try making a few low-level talismans. If you have the time, Mr Lu, can you help me see if there's any room for improvement?"

"I don't dare, I don't dare. I'm truly grateful that patrol envoy Sima is willing to guide me!"

Lu GUI Chen quickly cupped his fists and bowed. He wasn't an idiot, Lin Yi was obviously giving him face and showing him the process of making low-level talismans.

If he really thought that Lin Yi needed his guidance, then he'd be stupid!
