

Bodyguard 8921

Chapter 8921

There was no need for Lin Yi to reply personally. Yan Su, who was standing in front of Fengqi Dazhou's team, stepped forward and spoke for Lin Yi.

"So what if you're not the first hall Master? Sima Yi was still the patrol of the great land of Sangzi. Without the head Hall Master, what was the problem with the patrol leading the team? Whoever is unconvinced, come out and fight with this old man!"

Yan Su showed his hot-tempered side. He couldn't change the decision of the martial Alliance of the mainland island, but he couldn't refuse to do such a trivial matter of protection!

"Yan Su, you're already so old, why do you have to do such a boring thing? The competition is about to begin, who has the time to waste on sparring with you!"

People close to Fang Gezi expressed their stance, ""If you want to compete, then we'll do it in the Grand competition. As long as you lose, you'll have to obediently admit your mistakes and kowtow. Don't say that we're bullying you because you're old. We'll give you special treatment. Even if it's a draw, you'll win. How about it?"

Fang Gezi cheered loudly as she shot Lin Yi a challenging look. "Sima Yi, how was it? Are you coming too? It's fine if you don't dare, I'll just go to the Sangzi continent to help you spread your heroic deeds!"

The so-called heroic deed was that he admitted defeat and did not dare to fight with them! Fang Gezi was clearly trying to goad Lin Yi into action! The competition was a team competition. After all, the

burning sun continent's Foundation was much deeper than the Sangzi continent 'S. Fang Gezi felt that they could definitely beat Sima Yi in the team competition!

In a one-on-one fight, Yan Su might not be afraid of them. After all, Yan Su was the president of the combat Association, and her one-on-one fighting ability was extremely outstanding.

However, Yan Suzhen didn't have much confidence in winning or losing based on the results of the Grand competition!

After all, Fengqi continent was only a third-grade continent. In terms of Foundation, it was far less profound than the second-grade continent. Although there had always been a competition, the ranking of each continent had not changed for many years!

If nothing special happened, the development gap between the continents would only get bigger and bigger. The resources of the first and second-grade continents were much more than that of the third-grade continents, so the gap could not be reduced at all.

It was like the difference in wealth between a billionaire and an ordinary person. A billionaire didn't need to do anything. Just the interest of his daily savings was enough to make ordinary people work hard for a year or even longer. How could they compare?

Yan Su hesitated. It was embarrassing to admit his mistake and kowtow after losing. It didn't matter if it was just him who was embarrassed, but the other party obviously wanted to humiliate the entire Feng Qi great continent. He couldn't use the reputation of the great continent as a bet!

But on the other side was Lin Yi, the person he was willing to give his all to support. This kind of bet didn't seem to be out of the question!

"You don't even dare to accept the condition of a draw? If you don't have confidence in yourself, you might as well not participate in the competition and just be the bottom continent!"

Seeing Yan SU's hesitation, the other side felt assured and felt that victory was in their hands, so they continued to ridicule her.

"Let's compete then, who's afraid of who!"

Yan SU's eyes turned red, and she blurted out as if she couldn't stand the provocation, ""Whoever loses will kneel down and admit their mistakes! This old man doesn't need you to give in, a draw is a draw, if I can't beat you, what kind of win is that!"

In the past, Fengqi Dazhou indeed had no chance of winning, but the current Fengqi Dazhou was different!

No matter if it was pill or formation, or even the battle Association's battle generals, under Lin Yi's direct and indirect training and guidance, they were no longer the same as they were before!

Yan Su had confidence in Lin Yi, confidence in herself, and confidence in all the men of Fengqi Dazhou!

Lin Yi smiled and nodded. Fengqi continent's Foundation wasn't as strong as the other continents, but it might not be the same now. It was hard to say how it would end up compared to a first-grade continent, but it wouldn't be inferior to a second-grade continent.

In fact, he had a higher chance of winning!

Fengqi continent's martial Alliance's Hall Master was one of their own, so he naturally supported Yan Su and Lin Yi. Hence, the battle was set up, and Lin Yi represented the Sangzi continent to join in, forming a multi-party battle.

After a short while, Luo xingliu brought Dian Youwei and a few other higher-ups of the continental martial Alliance to give a speech. After a series of formalities, the ranking competition between the continents officially began!

"This year's competition will still test the comprehensive strength of each continent. The rules are the same as those in previous years!"

Luo xingliu came to announce the start of the competition and glanced at Lin Yi, adding a few words of commentary, "First, it's the alchemy Dao and array Dao assessment. Each continent will send ten alchemy and array Dao participants to participate in the competition!"

"The alchemy Dao test is a list. On the list, there are 50 types of commonly used medicinal pills. Medicinal pills are divided into five grades, and each grade has ten types!"

"One point for each of the ten lowest grade pills, one point for each higher grade pill, and five points for each of the highest grade pills! You have to concoct all ten types of pills before you can concoct the next grade of pills!"

"If you can only refine nine types of medicinal pills at a certain level, you can only continue to refine medicinal pills of that level to get points. If you can't refine medicinal pills of the next level, you won't get any points even if you refine Lao Ai!"

"The competition time limit is six hours. If there are any unfinished pills after the time limit, it will not be counted into the total score! Therefore, you must pay more attention to the time during the competition. Don't exceed the time limit and cause the final pill to be completed without any points!"

Under normal circumstances, an Alchemist could only refine a pill once in six hours. Under the competition conditions, they could only refine the lowest grade pill.

Of course, those were the most ordinary alchemists. The elite alchemists of the various continents were much faster at refining pills. According to their past experience, they could at least refine level three pills.

The fourth level was very rare, almost an existence as rare as Phoenix Feathers or Qilin horns!

Lin Yi's face changed when he heard the rules.

Had Luo xingliu never seen an automatic alchemy furnace before? The rules of this competition were not a big problem in previous years, but now they were full of loopholes.

With the automatic alchemy furnace, as long as there were pill recipes and materials, and the grade of the pill did not exceed the upper limit of the automatic alchemy furnace, there was no problem at all!

Whether it was Wutong, Fengqi, or Sangzi, the continents Lin Yi had been to all had automatic alchemy furnaces in the martial Union's alchemy Association. As for the other continents ... He didn't pay attention to this information.

I wonder if the central Chamber of Commerce has sold automatic alchemy furnaces to other continents? If even Luo xingliu didn't know about it, then there probably wasn't.

The central Chamber of Commerce's production capacity is limited, so it's only provided to Dazhou that knows about automatic alchemy furnaces? Or did the central Chamber of Commerce look down on the profits of the automatic elixir production furnaces and simply didn't want to promote them?

No matter what, Lin Yi felt that his side was already in an undefeatable position in the field of elixir refinement!

Chapter 8922

Even if other continents had automatic alchemy furnaces, they wouldn't be as smooth and familiar as the alchemy furnaces in his world! This was a sure win!

Yan Su had obviously thought of this as well, and she couldn't help but exchange a look with Lin Yi, a hint of joy in her eyes.

Fang Gezi and her friends were also very proud. The overall alchemy strength of the second-grade continent was far superior to that of the third-grade continent. So what if Sima Yi was a diamond-grade alchemy Grandmaster? In a team competition, individual strength couldn't change the overall situation.

And so, they were already looking at Lin Yi and Yan Su with a smug look on their faces, as if Lin Yi and Yan SU's defeat was already set in stone, and they were just trying their best not to show their fear.

Luo xingliu continued to explain the rules. After talking about elixir refinement, he started to talk about formations."The array Dao assessment will start at the same time as the alchemy Dao assessment. The duration will also be six hours."

"The rules are similar to the alchemy Dao assessment. You'll also set up an array according to the list given. The list is still divided into five levels, from low to high. You can only set up the next level of array after you've completed the lower level of array!"

"The scoring method is the same. The lowest level of formation is one point, the next level will add one point, and the highest level is five points ..."

In terms of formations, they didn't have an automatic pill furnace, but Lin Yi and Yan Su weren't scared at all. They were as confident as they were in refining pills!

Shi Yucai didn't come this time, and the house needed someone to stay behind. The members Zhang Yiming brought were all newly developed members, but they all studied Lin Yi's array Dao inheritance. Of course, they couldn't compare to Lin Yi or Shi Yucai, but they were far stronger than array Masters of the same level!

"Other than the alchemy and formation Dao tests, there's also the written exam. Similarly, ten people will be chosen to test on literary talent, knowledge, administration, management, planning, and so on. The written exam isn't too particular. Each person will have a quota of ten points, and the full score for the entire team is one hundred. It will depend on each individual's performance!"

The difference in the written exam wasn't too big. People from different continents might have different talents, but it wasn't like there was a world of difference. It would be an exaggeration to say that there was a difference of ten to twenty points.

The main points were still in alchemy and formation. The faster the speed, the higher the success rate, and it could really open up a huge gap in points.

For example, if a team could only refine pills up to the third level, they would only get 60 points at most. However, if a team could refine pills up to the fourth level, they would get 100 points!

Of course, this was based on the premise that only one pill was produced in each furnace. If it was an automatic alchemy furnace, four or five pills could be produced in one furnace, and the score difference could be increased by several times in an instant!

"Pill refining, formation setting, and the written exam will all begin at the same time. The participants can not be changed after they have been decided. One more thing, pill refining is based on high-grade pills, medium-grade pills will get a 20% discount, low-grade pills will get a 50% discount, and Supreme-grade pills will get 1.5 times the points!"

Luo xingliu said this especially for Lin Yi. After all, it was Lin Yi's first time participating in the tournament and he didn't know the rules in detail.

If one wanted to get a high score, pill refinery was the most important part. On the surface, setting up an array looked similar to pill refinery, but there were special rules for scoring based on quality only in pill refinery.

Formations were also divided into high and low quality, but there was no need to distinguish them too strictly during the competition. As long as the formation was successfully set up and operated smoothly, it would be counted as a score. The power of the formation would not be taken into consideration.

In other words, the scores for formations were standard, but for pill refinement, the scores would be different according to the quality.

For example, if the STANDARD 100 points were all low-grade elixirs, one would only get 50 points after a 50% discount. If the other side was a Supreme-grade elixir, 1.5 times would be 150 points, which was three times the former. This gap was simply impossible to bridge.

Lin Yi was a diamond rank Alchemist, and Luo xingliu specifically mentioned that he wanted Lin Yi to participate in the alchemy competition. Although one person couldn't control the entire team's quality, with a diamond rank Alchemist leading the team, the others might be able to perform better.

"That's the rules for the first round. Now, I'd like to ask all the continents to submit the name list of the participants. After the review, we'll begin the first round of the competition!"

Luo xingliu waved his hand after he finished speaking, and the staff of martial League began to ask for the name list from the team leaders of the various continents. The divided assessment areas were also undergoing the final inspection and sorting, and the assessment could begin at any time.

"Boss, which competition are you going to participate in?"

Zhang Yiming had already prepared the name list, and according to yesterday's discussion, Lin Yi wouldn't be participating in the alchemy and formation competition today. With Lin Yi's strength, it would be a bit of a bully to participate in these kinds of competitions.

But today's situation was different, and the bet with Fang Gezi and the others had to be taken seriously. Zhang Yiming didn't know what Lin Yi was thinking, so he had to ask.

Lin Yi waved his hand, "I'm not joining. We'll stick to the original plan. Our brothers have enough power to deal with it. Don't worry."

Zhang Yiming nodded and didn't say much. He went to submit the list of participants.

Lin Yi didn't have to participate-this was a team competition, after all, and it was best if all ten people were of similar strength. For example, in pill refining, the lowest level was ten different types of pills, and each person could make one.

It was useless even if Lin Yi completed it when the others weren't. He needed to complete all ten types before he could make the level 2 elixir. If he didn't want to waste time, he would have to repeat the first level.

But during that time, the others would have finished and started making Level 2 elixirs. Lin Yi making the lowest level elixir for the second time was also a waste of time, the price to quality ratio was too low!

The list was submitted and quickly passed the review. This was just a formality. They had never seen the submitted list being rejected.

Under the guidance of the people arranged by the martial Alliance, the participants from each continent walked to their designated positions. Pill refining, formation setting, and the written test were all divided into designated areas, and they did not interfere with each other.

"Yo, Sima Yi, you actually didn't lead the team to participate in the competition? I heard you're a Double diamond-grade Grandmaster. Why? You don't have the confidence to win, and you're afraid of tarnishing your title as a Double Diamond master, so you're deliberately avoiding the battle?"

Fang Gezi was surprised that Lin Yi wasn't in the team, and couldn't help but mock him.

He probably thought that Lin Yi wouldn't dare to do anything to him in this environment, so he was unscrupulous. Yuan Buliu, on the other hand, had just seen Lin Yi deal with Gao Yuding yesterday. It was still fresh in her memory and she was still a little scared when she saw Lin Yi and didn't dare to jump out and cause trouble.

They were martial Union's Hall Masters and investigators, but they weren't good at making elixirs, setting up formations, or writing. They were completely different from Lin Yi, and naturally, they wouldn't join the competition!

Chapter 8923

Leaving the professional matters to the professionals to handle was the most professional way of doing things at their level!

Fang Gezi was mocking Lin Yi, implying that Lin Yi was only fit to make elixirs and set up formations, not fit to be a Hall Master or inspector!

Lin Yi laughed in disdain. "Why would I need to personally take action in such a small situation? Wasn't that bullying?! The men under me are enough to deal with it! On the other hand, shouldn't you all be worried about yourselves?"

"Don't forget, if you lose, you'll have to kneel and admit your mistakes! Don't go back on your word at that time! I've never had a good impression of people who go back on their word ..."

Fang Gezi sneered, 'Sima Yi, are you talking about yourself? I'll return this sentence to you, so don't go back on your word when you lose! We're all witnesses. I'm already looking forward to seeing you kneel down in front of me and admit your mistakes!"

Yan Su was full of confidence. Her advantage in alchemy was too obvious. How could she lose to Fang Gezi and the others?

Therefore, Yan Su replied with confidence, "Fang Gezi, you're good at daydreaming. If there's a competition in this area, we'll definitely have to admit defeat!"

"It's a pity that there's no competition to daydream about this time. It seems that you can't play your advantage. Think carefully, what kind of expression and posture should you use to kneel in front of us and kowtow to us to admit your mistakes!"

If Fang Gezi dared to flirt with Lin Yi, she didn't have to worry about Yan Su at all. She sneered, ""Yan Su, you're already so old. Have you been living in fantasy all day long to live until now?"

"I really don't know who gave you the courage to think that you can defeat us? You've lived for so long, and you haven't learned anything else, but you've grown very thick-skinned!"

Lin Yi glanced at Fang Gezi indifferently before turning to Yuan Buliu, who was standing beside her, ""If I'm not mistaken, there should be a battle segment in the tournament, right? Fang Gezi and Yuan Buliu, what's the point of coming here to argue?"

"Although we will definitely be able to win in the first round of the competition, we are not too concerned about this. Instead of engaging in a pointless argument here, why not wait for the battle segment and see the real deal face to face with our hands?"

Luo xingliu had only mentioned the events of the first round and didn't go further. However, according to the rules, there were indeed battles.

The most important thing for every continent was the war with the darkness demon beast clan, and combat power was of the utmost importance. Whether it was pill refining, formation setting, or the various policies and strategies during the written exam, the ultimate goal was to serve the war!

The supporting event was the first round of the competition, and it was like an appetizer. The real feast was the fighting part. Lin Yi was challenging Fang Gezi and Yuan Buliu publicly.

Yuan Buliu's face darkened. She felt so wronged. I didn't say anything. Why did you bring me along? As expected, Sima Yi held grudges. The matter of him being impeached had not passed!

Fang Gezi didn't look too good either. No matter how much he forgot the pain after the wound healed, Lin Yi's cruelty was still fresh in his memory. His taunting and teasing were still within the acceptable range.

If they really had to face each other one-on-one ... They wouldn't dare!

"Sima Yi, do you think we don't dare to? Hehe ... Aren't you overestimating yourself? Did he really think that he was invincible in the battle stage? Don't be too naive!"

Fang Gezi's heart skipped a beat, but she still struggled to say, ""We would like to face you weak third-grade continents in the battle, but it's a pity that we don't have the final say in the battle. You better pray that you don't encounter us!"

He wanted to sound tough, but he didn't dare to respond directly to Lin Yi, like "I'll be waiting for you in the battle!"

Yuan Buliu's face turned darker. "Just say it yourself, don't bring me along. Who's with you?" she thought. I didn't say that!

The battle hadn't even started yet, but the two bosses of the burning sun continent were already on different sides ...

"Alright! Let's leave everything to fate. For now, let's just quietly watch the first round of the competition!"

Yuan Buliu was afraid that Fang Gezi would say something to provoke Lin Yi and ask him to go to Luo xingliu to arrange the battle between the Sangzi continent and the burning sun continent. If that happened, they would really be done for!

According to the principle of following one's heart, it was better to be obedient at this time. Yuan Buliu sensibly said that, then turned around and left with Fang Gezi.

Fang Gezi went with the flow and followed Yuan Buliu out of Lin Yi and Yan SU's place.

About 20 minutes after the first round of the competition began, the spectators began to exclaim in surprise!

"How is this possible? What's happening?"

"Heavens! Are my eyes playing tricks on me? Or are the judges' eyes playing tricks on them?"

"Hall Master Luo, what's going on? Wasn't the lowest grade pill only worth one point? What's the situation now?"

"There's a conspiracy! Do you have some sort of private deal?"

.....

The reason for the uproar was that the real-time updated pill refining leaderboard suddenly showed 45 points, which shocked the Sangzi continent!

It was normally impossible to finish refining a furnace of pills in twenty minutes, even if it was the lowest grade of ten pills.

Furthermore, the alchemy contest would only provide the name of the elixir and the required medicinal herbs. It would not provide the elixir formula. If the participant encountered an elixir without the elixir formula, it was equivalent to completely losing the possibility of refining the next level of elixir!

Under such conditions, most of the alchemists in the continent had to discuss which elixir to refine and choose the medicinal materials according to the elixir recipes they had mastered before finally starting to refine the elixir. It took about 20 minutes, and they were not even halfway done.

The Sangzi continent already had a score!

The real-time update of the leaderboard did not start from the beginning. The first time the points appeared, they would only be displayed when all the lowest grade pills were refined. After that, every pill refined would be converted into points after being judged and confirmed.

Therefore, Sangzi Dazhou's appearance on the points list could only mean that they had completed the refining of the lowest level of ten pills!

The speed was indeed amazing, but it wasn't unacceptable. What the audience couldn't accept was the number of points. It was also the biggest reason why some people suspected that there was a conspiracy in the competition!

What the hell was 45 points?

The lowest level of elixir was based on the standard of high-grade. One pill was one point, and ten types of elixir were ten points. Even if all of them were Supreme-grade elixir, getting 1.5 times the points would only get fifteen points!

What the hell was 45 points?

An average of three pills per batch? What a joke!

Chapter 8924 The End

In the eyes of those who had never seen an automatic alchemy furnace, refining a furnace of elixirs was just producing one elixir. Failure meant nothing!

Who had ever heard of three pills in one batch? Or was it that Sangzi Dazhou's alchemists were all fast shooters, directly refining three furnaces of pills in 20 minutes?

He wouldn't believe it even if he was beaten to death!

"Silence! "The continental martial Alliance's fairness is beyond doubt. There are at least three adjudicators at each continent's assessment point. The three adjudicators come from different departments and monitor each other. There's no way there'll be any problems!"

Luo xingliu didn't pay attention to him. Since Dian Youwei had come forward to solve the problem, he had some dignity when he put on a stern face. However, he usually presented himself as a good person, so not all the leaders of the other continents were convinced.

"Vice Hall Master Dian, there's obviously a problem with these points! We believe in the continental martial Alliance's fairness, but you have to reveal the reason, right?"

"Yes, yes! There must be a problem with Sangzi Dazhou's results, who didn't know what alchemy was? It's already very impressive to be able to form a pill in twenty minutes, but he actually got forty-five points in one go. What's going on?"

"Vice head Dian, if there's a problem, we have to solve it immediately. If Sangzi Dazhou got the points with his own strength, he wouldn't be afraid of disclosing the reason, right? Otherwise, how can the other continents accept this? If everyone protests and refuses to participate in the tournament, this matter will blow up!"

Most of the people from the other continents were expressing their dissatisfaction. Indeed, Sangzi continent's 45 points were a bit too high. The lowest grade and the next grade of medicinal pill could get 45 points, which was already a super high score!

In this situation, no one could ignore the unique Sangzi Dazhou!

Dian Youwei looked a little helpless in the face of the raging crowd, but he was actually quite happy. Luo xingliu had a feud with the martial Alliance of the continent Island in The Burning Sky Star region because of Sima Yi.

If there was a scandal in the great continent ranking competition, he would be on the opposite side of the hall Masters and inspectors of the martial Alliance of the other continents. It would be a fight between the upper and lower levels!

Luo xingliu might even lose his position as the Great Hall Master of the martial Alliance. At that time, Dian Youwei might have a chance to advance further and become the Great Hall Master of the martial Alliance in the starsource continent!

Fang Gezi was the loudest of them all. He couldn't accept Lin Yi's team getting 45 points in 20 minutes! His instinct told him that there was something shady going on, and he couldn't wait to expose Lin Yi and kill him.

This time, Yuan Buliu didn't stop Fang Gezi. He also thought that Luo xingliu was secretly opening the back door for Lin Yi to compensate for the removal of Lin Yi's position from the martial Alliance.

It was just that this backdoor was a little too big, and the points were unbelievably high. If he only gave 15 points, although everyone would have some doubts, it was not unacceptable!

It could only be said that they had gone overboard!

Was that really the case? Obviously not!

In the midst of the noise, the second continent's name and points appeared on the real-time updated rankings. They were the most outstanding Fengqi continent with 45 points!

The same incredible high score, but his speed was only one or two minutes later than Sangzi Dazhou. It could be said that they were almost the same!

Yuan Buliu was a little dumbfounded. Luo xingliu was willing to take such a risk, so it was reasonable for him to compensate Sima Yi. However, Yan Su didn't have anything to compensate him for. He wouldn't compensate him as well, would he?

Moreover, no matter how he looked at it, this result was a failed product that had cheated too much. There was no reason for both sides to make mistakes at the same time, right?

The noisy crowd tacitly quieted down for a moment, and then an even stronger sound wave burst out. They couldn't even accept one Sangzi great continent, what was the deal with another Fengqi great continent?

Stop fooling around!

However, just as this even stronger sound wave burst out, it was as if someone had grabbed his neck and he lost his voice again!

Wutong great continent, thirty-nine points!

It wasn't as high as the previous two continents, but it was still one or two times higher than the standard score. It was also an incredible series of scores!

It could only be one or two, not three!

Three continents with super high scores appeared in a row, and the rowdy people fell into confusion and self-doubt, wondering if there was a problem with their own understanding.

After the lowest grade medicinal pill was refined, it should be around 40 points? So these are all normal points?

They didn't think that these three continents were all connected to Lin Yi, or that Lin Yi's footprints and influence were all left on them!

Automatic alchemy furnaces couldn't be said to be widespread in the three continents, but the alchemy Association of the three continents must have their own automatic alchemy furnaces.

Wutong continent was the continent Lin Yi left the earliest, so the influence from this was the weakest. As a result, Sangzi and Fengqi both got forty-five points, while Wutong only got thirty-nine.

There was a difference, but it wasn't big!

"What's going on? Why did they all get such high scores? Could it be that the difficulty of the lowest grade pill is too low, so you can get high marks even after refining it?"

"This is so strange ... Is this really a common phenomenon?"

"Will our people also get such high points?"

.....

The noisy doubts from before had now turned into low whispers. If it was really an average high score, then the noise just now would be completely unreasonable.

Would Luo xingliu hold him responsible?

Luo xingliu sat there expressionlessly. Whether it was the surging public sentiment just now or the current undercurrent, nothing could change him.

Only when he saw Sangzi Dazhou get a high score, a trace of admiration and relief flashed in his eyes.

The atmosphere at the scene became a little strange. It lasted for about seven or eight minutes before the name and score of the fourth continent finally appeared on the real-time updated leaderboard.

The name wasn't important, what was important was the score. Most of the People's eyes were fixed on the refreshed score, and then they were all dumbfounded.

9.5 minutes!

It wasn't even the standard ten points, and there were still zeros and zeros!

This score was equivalent to nine high-grade and one low-grade medicinal pill? And seven high-grade, two low-grade, and one Supreme-grade pills? Bah! I don't care what grade he is, the problem is, what the hell is 9.5 points?

The lowest score in the top three was 39, and you F * cking came up with 9.5. Do you still want to get a Jade Lotus?

The Great Hall Master and the patrol envoy of that continent were about to go crazy. Originally, this speed was really not slow, and the score was also considered to be within the standard. However, everything was afraid of comparison. As the saying goes, there is no harm without comparison.

Compared to the top three, they had suffered too much damage!

Without waiting for them to complain, the results appeared one after another. 9.5 points, 11 points, 12 points, 12.5 points ... The highest was 15 points, and the lowest was 9 points!

Other than the first three, no continent had more than fifteen points!

It was not difficult to make the lowest level elixir. However, there might be some flaws in the pursuit of speed. The continents that got 15 points were the slower ones. Ten Supreme-grade elixir pills were amazing enough in normal times.

Chapter 8925

Those with nine and ten points weren't lacking in standards. They might have felt that the points of the lowest level of elixir pills were too low, so there was no need to waste time pursuing perfection. It would be fine as long as they could pass the test and enter the next level of elixir pill refining.

After all, the further he went, the higher the points of the medicinal pills. There was no need to waste time here.

When the scores of all the continents were revealed, the leaders of the continents who had not broken the 15-point limit were not happy and raised doubts again.

Dian Youwei's calm explanation could not suppress these people's anger at all. Seeing that the matter was about to blow up, Luo xingliu stood up, took a step forward, and coldly shouted in a low voice, "All of you, shut up!"

A powerful aura spread out, and everyone subconsciously quieted down.

"The continental martial league's tournament has always been fair. After it's over, any questions can be answered. If anyone still wants to make a fuss, they'll be disqualified from the tournament and automatically become a third-grade continent!"

"Whoever is not convinced can withdraw from the competition! It doesn't matter if everyone withdraws from the competition, but any continent that withdraws from the competition will not be allowed to participate in the continental tournament for the next ten years. The continent's level and all resources support will be canceled!"

Whoever withdrew from the competition would not even be considered a third-grade continent in the future!

For a moment, all the continents that wanted to make trouble were as silent as cicadas in winter. Under the suppression of Luo xingliu's aura, no one dared to raise any doubts.

The scene of the hall Masters of the martial Alliance opposing Luo xingliu didn't happen, as Dian Youwei had expected. Although Luo xingliu's words were indifferent, they were much more effective than his stern voice.

"Hall Master Luo said that we'll find out after it's over. Let's wait and see after it's over ..."

"Yes, yes, yes. Hall Master Luo has always been fair and just. He must have his reasons for saying that. We don't have to worry. Hall Master Luo will definitely not cheat us ..."

"I'll listen to Hall Master Luo ..."

For a moment, those with quick reactions made the same choice. They chose to move closer to Luo xingliu!

With someone taking the lead, the others would naturally follow. Herd mentality had always lacked a leader!

As time passed, the points on the real-time updated point list began to accumulate. The top three were still the Sangzi continent, Fengqi continent, and Wutong continent. These three third-grade continents had really shocked the world this time.

According to the standards of previous alchemy competitions, the total score of refining five levels of elixirs, all of which were high-grade elixirs, was 150 points, and all of which were Supreme-grade elixirs, was 225 points. This kind of result had never been seen before!

But the situation was completely different this time. After Sangzi Dazhou and Fengqi Dazhou finished refining the third level pill, their points had already broken through their previous highest points and reached two hundred and seventy points!

The Wutong continent was a little worse, with 240 points. On the other hand, the other continents only had 40 to 50 points, barely catching up with the Sangzi continent and the other continents "first round of alchemy ... How could they play?

On the other hand, in terms of formation arrangement, the performance of Sangzi great continent, Fengqi great continent, and Wutong great continent were also outstanding. They were the three fastest in setting up formations, but there was no rule to add points in formation, so the points were normal. Even if there was a gap, it didn't affect it at all.

Compared to pill refining, what was a ten-point difference in formations?

As for the theory examination, there would be a process of grading after the examination. The marks wouldn't be released immediately, but the difference in the marks couldn't be pulled apart. The total score was so little that it wouldn't affect the overall situation at all.

To put it bluntly, with Sangzi continent as the leader, these three third-grade continents "current points in alchemy alone were enough to sweep the world. It didn't matter if they had points in array formation or theory examination!

As time went on, Fang Gezi and Yuan Buliu became more and more desperate. Sangzi Dazhou and Fengqi Dazhou's points were going to break a thousand! What the hell is this!

This difference was close to ten times. Could he close the gap or surpass it later? If they couldn't cancel this exaggerated result, wouldn't their wagered battle be a complete failure?

The thought of kneeling down and kowtowing to admit their mistakes filled Fang Gezi and Yuan Buliu with despair! Fang Gezi was even more determined to find a way to ruin this result!

The six hours were finally up, and the first round of the competition came to an abrupt end. The real-time updated point rankings finally locked in all the values.

There was no suspense as to the top three of the alchemy competition. The first place was still Sangzi great continent, the second place was Fengqi great continent, only a few points less. The third place Wutong great continent was a few dozen points less than the second place, but it didn't affect the crushing momentum of the fourth place.

The top three all had more than 1000 points, while the best score in the other continents was only more than 100 points. The difference was almost ten times, and it was like an insurmountable moat!

It wasn't that the alchemists of the other continents were bad. If they performed normally, 150 or 200 points were not rare. However, because of the unbelievable crushing momentum on the point list, the alchemists who participated in the competition completely exploded and lost their emotional balance when they accidentally noticed it!

To be able to perform at this level was really not bad!

The formation was just average, but the top three were still the great continents of Sangzi, Fengqi, and Wutong. These were all places that had been influenced by Lin Yi's formations, so the points weren't too different. Getting into the top three wasn't a problem.

The written test results were a bit disappointing, and Lin Yi's men in this field were a bit worse than the other continents.

In the past, they didn't properly cultivate talents in this area and just relied on their original talent reserves. They couldn't compare with the first and second-grade continents. The final result was that

whether it was the Sangzi continent, Fengqi continent, or Wutong continent, they were all ranked around 25 to 30.

It wasn't considered outstanding in the third-grade continents. Fang Gezi and the others felt that it was normal when they saw the results. However, it was useless. A one-point difference in the written exam could make one rank several places. The 20th or 30th place was only ten points away from the top three.

This little score couldn't even make a splash in the face of the shocking difference in alchemy scores. Therefore, the top-ranked continents in the theory examination didn't feel any better.

"The first round of the competition ends here. The total score is out. Everyone can take a look at the position of your continent!"

Luo xingliu had a faint smile on his face, clearly in a good mood. "Here, I would like to praise the Sangzi continent, Fengqi continent, and Wutong continent. Although they were all third-grade continents before, their performance today was very outstanding, surpassing many first-grade and second-grade continents. Everyone should learn from them!"

Fang Gezi, who had been holding it in for a long time, couldn't take it anymore. She immediately stood up and said, "Hall Master Luo, you said that you would give us an explanation after the competition."

Chapter 8926

"Now that we've explained the competition, we want to know how Sangzi continent and the other two continents got such high scores in alchemy. According to common sense, the continent after the fourth place should be the normal score, right?"

"If they weren't biased towards them when giving marks, then they must have cheated! If cheating can get you into the top three, then shouldn't we all cheat? Everyone, don't you agree?"

Fang Gezi wasn't stupid. She knew it would be stressful to face Luo xingliu alone, so she brought the leaders of the other continents along. Since the scores of the three continents were beyond imagination, the other continents naturally formed a common hatred for the enemy.

"That's right! They cheated to get high marks, so do we have to cheat too? Is there any fairness in the great tournament?"

"Hall Master Luo, you must give us an explanation for this matter! Otherwise, everyone will feel uneasy!"

"I hope Hall Master Luo can give us Justice! Don't disappoint our continents!"

.....

Fang Gezi lowered her head slightly to hide the smile at the corner of her mouth. With the momentum, she was not afraid that Luo xingliu would target her alone. After all, the law could not punish the masses!

Luo xingliu frowned slightly. However, he had indeed promised to announce the truth after the event, so he could not go back on his word.

"Patrol Sima, your Sangzi great continent's alchemy skills are so outstanding, do you have any secret skills? Can you share it with everyone? Of course, if it's not convenient to share, we can understand!"

Luo xingliu could've asked the judges to explain, but that would be disrespectful to Lin Yi and the others. He asked Lin Yi first with a sincere attitude, thinking for Lin Yi's sake.

Lin Yi shrugged and smiled. "Of course you can tell me. It's not a secret skill, it's just that I changed my tools!"

"We've ordered an automatic alchemy furnace from the central Chamber of Commerce. This new type of alchemy furnace can store pill formulas and automatically adjust the fire for alchemy. You only need to put in the medicinal herbs and inject the alchemy fire to complete the entire alchemy process."

"Because you can put in multiple ingredients at the same time, you can make three to five pills at the same time. Through the precise control of the fire in the automatic alchemy furnace, the probability of making top grade or even Supreme grade pills is greatly increased, especially those low grade pills that are not difficult to make."

Lin Yi said as he took out an automatic alchemy furnace to show off, almost shouting, "No 998, no 888. The event price is 98, and you can bring the automatic alchemy furnace home!"

He felt that he should go to the inquiry Center to collect advertising fees ...

However, it was not a bad thing to promote automatic alchemy furnaces. The real high-grade pills still needed alchemists to refine them. The automatic alchemy furnaces produced by the center could only refine middle and low-grade pills.

This would be beneficial for the war with the darkness demon beast clan in the future. After all, the most consumed items on the battlefield were still these low and mid-tier pills.

Having all the continents purchase automatic alchemy furnaces could greatly reduce the need for alchemists and increase the storage of elixirs. These were important strategic materials, and no matter how much they prepared, it would never be too much!

After hearing Lin Yi's explanation, the leaders who had never seen an automatic alchemy furnace before were a little dumbfounded. There was such a good thing? How come I've never heard of it before?

"Hall Master Luo, Sima Yi and the others cheated! The pill refining test was a test of an Alchemist's ability to refine pills, not some kind of automatic pill refining furnace to cheat! How is there any fairness in their actions?"

Fang Gezi was definitely not convinced. With such a huge difference in scores, she could ignore the rest of the competition!

He had to mess up the results!

With someone taking the lead, the other great continents "Great Hall Masters and investigators all agreed. For their own interests, they would definitely group up to destroy the achievements of the three great continents.

"Ridiculous! Since when were there restrictions on what kind of pill furnace to use in a competition? That's right, the automatic pill furnace's function is many times stronger than other pill furnaces, but it's still a pill furnace for pill refining!"

Luo xingliu's face darkened, and he berated, ""Do you dare to say that other people's pill furnaces don't have any magical effects? I don't think so? I've heard that some pill furnaces have endless uses and are by no means ordinary!"

These words were not nonsense. There were many pill furnaces passed down from ancient times on the sub Island. In the eyes of alchemists, they were divine tools and contained many magical effects that could only be experienced when refining pills.

In this way, the automatic alchemy furnace could only be regarded as a tool with a magical effect, and could not be elevated to the level of cheating!

"Hall Master Luo, these two can not be mixed together. Those divine weapon pill furnaces that were passed down were only used to assist in refining pills. They still needed a powerful Alchemist to control them to refine pills. However, the automatic pill furnace that Sima Yi mentioned no longer needed the skills of an Alchemist!"

Fang Gezi was also a little impatient and tried her best to argue, ""You only need to input the pill fire, and the rest will be controlled by the automatic pill furnace. A person who doesn't know how to concoct pills can concoct pills as long as he can form a pill fire. Isn't this cheating?"

The two consecutive rhetorical questions showed his agitation. If Luo xingliu was not a noble person, Fang Gezi would have jumped in front of him, grabbed his collar, and spat on him!

"Of course this isn't considered cheating!"

Lin Yi's expression was relaxed as he said, "This is a major change to the pill refining profession! But can you say that there's a problem with the pills refined by the automatic pill refining furnace?"

"We fought with the darkness demon beast clan, and the injured soldiers needed pills. Can't we eat the pills made by the automatic pill refining furnace? If the alchemist's production is limited and they can't supply, do we have to watch the injured soldiers die?"

"The apothecary profession may have ushered in an era of change, but the alchemy industry has made huge progress! And it's not that we don't need alchemists, we just need more powerful alchemists!"

Lin Yi raised the automatic furnace in his hand. "This is a new thing, but it is not perfect. At least, it can not complete the production of high-level pills. We still need powerful alchemists to make those high-level pills."

"The appearance of an automatic alchemy furnace is also a good thing for alchemists. Alchemists don't have to waste a lot of time and energy on refining low to mid grade pills!"

"After all, middle and low grade pills are the most consumed on the battlefield. If there is a lack of them, even high grade alchemists can only waste time and energy to do this work."

"But it's different now. With automatic alchemy furnaces, we can guarantee low to mid grade pills. Alchemists will have more time to improve their abilities and research to refine higher grade pills. Isn't that good?"

Chapter 8927

Lin Yi's words, on the other hand, received the approval of most of the refiners. When they first saw the automatic alchemy furnace, they felt a sense of danger, thinking that decades of practice and learning were not as good as a furnace. It would be difficult for them to show their identity as refiners in the future.

But Lin Yi's words made sense-putting aside the mid and low-level pill making work, he could save a lot of time and use it to research and improve himself. It wasn't a bad thing!

"You're all quibbling! In a competition between alchemists, how could one use a pill furnace to win? Pill refining ability wasn't important? It was simply laughable! I don't agree with this result!"

Fang Gezi's face turned red, but she gritted her teeth and held on.

He had no choice. He didn't want to kneel and kowtow to admit his mistakes. That was worse than death!

Dian Youwei stood up and said to Luo xingliu in a seemingly fair manner, ""First hall Master, what both sides said makes sense. It's not a solution to keep arguing like this!"

"The automatic alchemy furnace is indeed a good thing, but it was not reported in advance, and we did not set any rules on whether it can be used or not. This matter still needs to be handled carefully,"

"Especially the point gap between the two sides. It's outrageously large. This is almost equivalent to losing all suspense. The result of the subsequent major competition is already known."

"For the sake of the competition, we should indeed make some concessions. What does first hall Master think?"

Luo xingliu pondered for a while and nodded slightly. ""Vice Hall Master Dian's words make sense. Do you have any suggestions? Why don't you tell me!"

Dian Youwei's position in the continent's martial Alliance wasn't bad. He was a smooth-sailing vice Hall Master with good social relations. Even if Luo xingliu knew that he was a spy from the darkness demon beast clan, he had to speak to him in a friendly manner.

"I do have an immature suggestion ... The difference in points is too big. No wonder Dazhou, which doesn't have an automatic alchemy furnace, is not happy. In fact, if everyone uses an automatic alchemy furnace, there won't be this dispute!"

Dian Youwei said unhurriedly, "of course, it's impossible to redo the competition now. It's too time-consuming, and there aren't that many automatic alchemy furnaces. In order to ensure the suspense of the subsequent competition, this subordinate suggests that we reduce the alchemy points of the three continents, led by the Sangzi continent!"

"Perhaps this is a bit unfair to the three continents, but we don't need to reduce their points to the same level as the other continents. I think it's more reasonable to reduce two-thirds of their points!"

"In this way, the three continents still have a big advantage in points, but it doesn't give the other continents a chance to catch up. It's an acceptable result for everyone! First hall Master, do you agree?"

In terms of alchemy points, the top three with Sangzi Dazhou as the leader all broke a thousand points, while the fourth place only had a hundred points. The gap was less than ten times, but it was almost ten times!

The gap after fourth place was much smaller. Everyone was pretty close to Yingying and had around 100 points. The gap couldn't be big even if they wanted to!

According to Dian Youwei's plan, they would cut the points of the top three by two-thirds and keep one-third, which would be more than 300 points. The top three would still be the top three, but the difference would be reduced from nearly ten times to three times.

In addition to the formation and theory examination points, both sides were basically equal in this aspect. The gap had suddenly become less than double!

In this case, it was indeed possible for the other continents to catch up and overtake them!

Fang Gezi and the others quickly calculated in their hearts. They felt that this plan was not bad and was the best plan they could fight for! It wasn't realistic to reduce the top three's points to the same level as theirs. Fang Gezi had never even dared to think about it!

Because Luo xingliu was obviously on Sima Yi's side and would definitely not let Sima Yi and the others suffer a loss, Dian Youwei's proposal was the most pertinent one!

"Hall Master Luo, vice Hall Master Dian's suggestion is very good. Why don't we follow it?"

Fang Gezi was afraid that Luo xingliu would object, so she immediately stood out to express her support for Dian Youwei. At the same time, she gestured behind him for people from other continents to come out and support him and create momentum!

Luo xingliu frowned slightly and shook his head. ""Two-thirds is too much. Let's just cut it by half!"

After cutting it by half, there would still be more than 500 yuan left. It was still a huge gap. Of course, Fang Gezi wouldn't agree. She immediately demanded that they follow Dian Youwei's plan.

Luo xingliu was so impatient that he wanted to cancel the points-deduction plan!

A plan proposed by a spy from the darkness magical beast clan, and you're still so insistent on supporting it. Were they all in cahoots? Were they all spies sent by the darkness demon beast clan?

Lin Yi didn't really mind-as long as they could maintain their lead, it didn't matter how many points they had. Even if it was an eight or ten point lead, they wouldn't be able to catch up just because they wanted to.

Moreover, one-third of the pill refining points still had a gap of more than 200 points. What was there to be afraid of?

"Hall Master Luo, thank you for protecting us, but we don't think there's anything wrong with following Deputy Hall Master Dian's plan."

Lin Yi saw his impatience and came out to help, "We still have such a big lead. In order to prevent Fang GE from losing the confidence and courage to catch up with us, what's the harm in giving them one or two hundred more points? It doesn't matter!"

Fang Gezi held her breath but could not say anything. Was he confident that he would be able to catch up no matter how big the gap was?

Don't joke around! If that was the case, why would he hold on to it?

Luo xingliu looked at Lin Yi and smiled, "Alright! Then, we'll do it according to vice Hall Master Dian's suggestion! Indeed, there's nothing to worry about. Even if we fall behind, we can still catch up, let alone take the lead!"

He was really confident in Lin Yi. The second round was about combat, and Lin Yi could do whatever he wanted in the node world. It would be a piece of cake for him to deal with the competition.

Dian Youwei's proposal was approved, but no one knew how to react. Cheer? He didn't have the face!

They had cut two-thirds of their points and were still leading by more than two times. Who had the face to cheer? Don't you want your face?

The gap had shortened by so much, and they should be happy, but no one could feel happy when they saw Lin Yi's smile!

The new points were updated very quickly. Looking at the points that had shrunk by more than half, Fang Gezi and the others still couldn't relax!

Luo xingliu didn't care what they thought and started to announce the next competition.

"The second round will be about the combat ability of each continent. The first round will be about individual combat power. Each continent will send ten soldiers and draw lots to decide their opponents."

Chapter 8928

"The opponent is completely random. Except for teammates who will automatically avoid it, people from any continent may become the opponent. The basic score for winning a one-on-one is ten points, an additional ten points for winning in seconds, and an additional five points for ending the battle within one minute!"

In other words, the points awarded for winning a one-on-one fight were between ten to twenty points, and the final score would be determined by the performance.

"The time for each battle is five minutes. If the battle doesn't end in five minutes, it will be considered a draw. Neither side will get any points. Each warrior only has three chances to fight one-on-one. After three chances, he can't participate in it anymore!"

Fang Gezi had already started calculating in her heart. Each of the ten spots would have three battles, so there would be a total of 30 battles!

According to the standard score calculation, winning all of them would give 300 points. If the Sangzi continent's side fought to the death with everyone, the probability of failure would be very high!

Who knew if the points advantage of the top three would be wiped out after the order-picking round?

The more Fang Gezi thought about it, the more excited she became. She immediately went to discuss with the first hall Masters and investigators of the other continents about besieging the top three warriors of the other continents!

As long as everyone went all out against the Warriors of the Sangzi, Fengqi and Wutong continents, how many points could the people of these three continents get?

After Luo xingliu finished explaining the rules of the individual battle, he looked up at the sky. It was about two or three o'clock in the afternoon. The sky would probably turn dark after the individual battle.

"Let's start the individual battles today, then rest for one night. Tomorrow, we will continue the other battle-related assessments. Now, please hand in the list of participants as soon as possible, and we will start immediately after drawing lots!"

The individual battle didn't affect the rest of the test, but Lin Yi wasn't going to take care of the bullying himself!

It wasn't that Lin Yi was looking down on anyone, but if he really wanted to fight, no one here would be his match!

"Boss, what's our list of names?"

Zhang Yiming was in charge of handing in the list, and he asked Lin Yi first, "This is the list of battle generals that I brought. Their strength level and battle strength are all written down. Boss, you can choose!"

The level of strength and combat power were not the same. For example, Gao Yuding, who had reached the heaven breaking stage by relying on external forces, might not even be as good as an ordinary general in the consummate level of the sea splitting realm in terms of actual combat power.

Zhang Yiming was in charge of intelligence, so he naturally valued the evaluation of combat power. The strength level and true combat power of the battle generals under him were clearly divided.

For example, some combat generals were only at the middle stage of the earth split realm, but when they erupted, they could fight an opponent at the early stage of the sea shattering realm. Their combat power was definitely far beyond their actual level.

Lin Yi took the list and glanced at it. He suddenly realized that if the difference in strength was too big, it didn't matter how strong he was. Most of the generals from the great land of Sangzi were earth formation stage martial artists.

There were only three experts at the early stage of the sea shattering realm, and none of them were above that level. If all the experts sent by the other continents were at the sea shattering realm, it was possible that the entire Army would be annihilated.

"Hall Master Luo, are there any restrictions on one's strength in the individual battle? For example, there is an insurmountable gap between the earth-splitting stage and the sea-splitting stage. If two opponents of different levels meet, there is basically no need to fight to know the result, right?"

Luo xingliu didn't mention the rules, so Lin Yi had to ask.

If there wasn't a level restriction, Sangzi Dazhou wouldn't have much of an advantage in the individual battle. Lin Yi didn't want to fight at first, but he had to fight this time. At least he could win three matches and get some points.

Luo xingliu was very patient with Lin Yi and immediately smiled in response, "It's patrol envoy Sima's first time participating in the great continent ranking competition. No wonder you don't know the basic rules. I forgot to mention it just now. "

"In theory, individual battles don't limit the level of strength. It's very normal for an earth-splitting stage cultivator to encounter a sea splitting stage cultivator. After all, the enemy on the battlefield won't talk about fairness with you. It's natural for the strong to kill the weak."

"However, this is a competition after all. If the difference between the strong and the weak is too great, it will lose its significance. Therefore, there is a rule on the contestants that each continent can only have two contestants at the sea Rift stage and above. The others must be below the sea Rift stage!"

"If a heaven-breaking expert is participating, then the two spots will become one. Those at the earth-splitting stage and below must have nine spots! After all, the strength of the heaven breaking stage is too powerful. It's common for them to be killed in seconds!"

The basic score for winning was ten points, and there would be an extra ten points reward for killing the opponent in seconds. It was not strange for a heaven-breaking expert to participate in the competition and kill the opponent in seconds. It was equivalent to one person beating two people, so there was indeed a need for restrictions.

This rule was relatively fair!

Because this rule had always been used, Luo xingliu didn't mention it just now. It was just like no one would mention chopsticks when eating. It was a natural thing to do.

"I understand. Thank you for clearing my doubts, Hall Master Luo!"

Lin Yi thanked him with a smile and started picking the participants.

Since there were only two spots for those above the sea shattering realm, and a heaven breaking expert was going to replace those two spots, there was no reason for Lin Yi to fight.

He didn't have that intention in the first place, so he couldn't take up more places.

Two of the three battle generals at the early stage of the sea shattering realm and eight of the earth splitting realm were selected. They formed a list of ten people and submitted it.

The Sangzi great continent's battle general strength was very average. Among the thirty-nine great continents, it could only be considered to be below average. The "Zhong" word could even be removed.

It was in line with the name of a third-grade continent ...

However, after Lin Yi took over the Sangzi continent, he improved in all aspects, not to mention the alchemy Association and the array Association, but the combat Association also changed a lot.

First, they had a better grasp of battle formations, and their overall strength had increased significantly. Then, it was the general's individual improvement. With Lin Yi's care, their levels didn't need to be mentioned, but their battle strength had all improved.

For example, the two early stage sea shattering generals who were selected in the past had only been average in their level. They could be considered early stage sea shattering Warriors.

But now, it was different. His level was still the same, but his real combat power had surpassed the early stage of the shattered Sea realm, or even the peak of the early stage of the shattered Sea realm. He could now compete with opponents in the middle stage of the shattered Sea realm.

Their skills, experience, and so on were completely different!

Zhang Yiming returned to Lin Yi's side after handing in the name list and lowered his voice, "Boss, the situation isn't good. Fang Gezi has secretly contacted people from other continents to snipe the contestants from our three continents."

"As long as the people of our three continents encounter them, their people will fight with all their strength. Even if they lose one battle, they will consume most of our strength!"

Chapter 8929

"And between them, it's just a perfunctory fight. When their strength is similar, they will give each other points. In this way, I'm afraid it will be difficult for us to fight in the individual battle!"

Zhang xiaopang was indeed the head of the intelligence Department. He was able to sense Fang Gezi's plan just by submitting the name list.

In fact, Lin Yi already knew what Fang Gezi was thinking. He didn't even need to use his divine sense to figure out what she was thinking. Besides, Lin Yi's divine sense covered the entire area, so the inter-continent interactions couldn't escape his eyes and ears.

"It doesn't matter. We don't expect to win all the battles, just about enough! With such a huge advantage, why would you care about such a small matter?"

Lin Yi smiled nonchalantly. He wasn't the only one who didn't participate in the individual battle. Fei daqiang and Zhang Yiming didn't participate either. All ten spots were given to the battle Association's generals.

From Lin Yi's point of view, the points from the individual battles weren't that important. It was good for these generals to practice their skills!

"Besides, if I'm strong enough, why should I care about the enemy's sniping? If you draw a weaker opponent, no matter how they tangle, it will be difficult to shake the gap between the two sides!"

For example, if Lin Yi went up, it wouldn't matter who the other continents sent up-they'd be able to take down their opponent easily, and fighting to the death and wasting energy was just wishful thinking!

Zhang Yiming nodded, but he still didn't look too optimistic.

He was only worried about the battle generals of Sangzi great continent. He wasn't worried about Fengqi great continent and Wutong great continent.

It wasn't that he favored one over the other, but that there was no need to worry. The battle generals of those two continents had been trained by Fei daqiang for a longer time, so their combat strength was stronger. It was difficult for them to find opponents of the same level. On the other hand, Sangzi continent's time was shorter, so their improvement wasn't as obvious as those two continents.

It didn't matter if they were worried or not. After the list was submitted, they began to draw lots. Sangzi Dazhou was currently ranked first, so they were the first to draw opponents.

At the beginning, Lin Yi didn't pay much attention to it. He didn't realize that something was wrong until the ten generals "first opponents were all sea-shattering cultivators from other continents!

How could such a situation happen in a normal drawing of lots? So when Fang Gezi tried to target him, Lin Yi just treated it as a joke.

The strength of a randomly selected opponent was completely uncontrollable. Was that someone you could snipe just because you wanted to?

Only now did he realize that things weren't that simple!

The person in charge of the drawing was a Deacon from martial League. Lin Yi noticed that after the first round, the deacon made eye contact with Dian Youwei when he turned around. No one noticed it because of the angle.

It was only because Lin Yi used his spirit sense to pay attention that he noticed this extremely hidden gaze!

Dian Youwei!

Lin Yi frowned-why was this guy interfering?

What did Sangzi continent's results have to do with him? it would be a joke if a high-level spy of the darkness demon beast clan was exposed because of this kind of boring little thing!

He knew that Dian Youwei was behind this, but he didn't have any evidence. He could only endure it!

A little impatience would spoil a big plan. Daniya had already gotten on Dian Youwei's good side, and she still needed to find more Dark Beast clan's spies from him. If he revealed any flaws, Lin Yi might have to find a way to cover it up.

Compared to finding the traitor, the results of the individual competition were not worth mentioning at all!

Fang Gezi and the others were laughing out loud. Luo xingliu frowned slightly and reproached them expressionlessly, ""Silence! Whoever makes a racket again, don't blame this Lord for being impolite and directly expelling them!"

Luo xingliu also felt that there was a problem with the drawing. No matter how coincidental it was, it was impossible for the people of the Sangzi continent to draw experts at the sea Rift stage for ten consecutive rounds, especially the two early stage sea Rift generals of the Sangzi continent. Their opponents were both experts at the peak of the middle stage of the sea Rift!

Being three small levels higher was almost like crushing the gap between levels!

There was no need to mention the other eight earth splitting stage cultivators fighting against the sea splitting stage cultivators. What was there to talk about when they were suppressed by a large level?

However, Luo xingliu didn't suspect that Dian Youwei had done something because he really had no reason to do so. What was the point of targeting Sangzi Dazhou?

Therefore, Luo xingliu first suspected Fang Gezi and the others. He thought that they had bribed the deacon who drew lots!

Who asked Fang Gezi to play tricks right under Luo xingliu's nose? It was hard not to be suspicious!

"Change to another person and continue drawing lots! Deacon Huang, go and draw lots!"

Luo xingliu couldn't overturn the battle that had already been drawn, so he could only change the person in charge of drawing the lots. This was a bit of a slap to the face of the person who had drawn the lots before, but did Luo xingliu care?

To beat up 10 experts of the sea splitting stage in a row, are you F * cking slapping my face? It was already very kind of him not to flare up on the spot!

"Yes, first hall Master!"

Deacon Huang was Luo xingliu's subordinate. After he bowed and accepted the order, he went over to replace the person who had drawn the lots and continued to draw the second lot for the Sangzi continent.

This time, it was very normal. The ten opponents were all in the earth formation stage, so there were high and low levels, and there was nothing particularly eye-catching.

The problem was that after the first battle, would the battle general of the Sangzi continent have the ability to deal with the second Battle?

The opponents for the third round were also drawn. Except for One Earth-opening stage cultivator from the Sangzi continent against the other continents, the remaining nine were all earth-opening stage cultivators.

If the order of the first and third round was switched, Sangzi Dazhou's chances of getting a high score would be very high, but now it was hard to say!

It was worth mentioning that among the 30 opponents of the Sangzi great continent, there were no people from the Fengqi great continent and Wutong great continent.

Next was the Fengqi and Wutong great continents drawing lots. The opponents were normal, there were strong and weak, there would be points and there would be points lost. It could be predicted that after the individual battle, their points shouldn't be much closer.

How the Sangzi continent would fare would depend on the results of the first battle!

"The drawing of lots has ended. Let's begin the first round of the competition!"

The competition would be held simultaneously in ten small venues. There were ten groups at a time, and after the first round was over, another ten groups would take the stage. After the first round was over, the second round of the competition would begin.

Because of the Sangzi continent's ranking advantage, the 10 people will fight the first battle at the same time. After all the first battles are over, the second Battle will begin.

The longest break in between was a small privilege for the top scorer.

The ten Rings had been arranged dozens of meters apart, enough to ensure that they would not be affected by each other. There was also a defensive array around the rings to prevent the aftermath of the battle from spreading.

The Sangzi continent's ten battle generals were the first to step onto the stage. Although they knew that their opponents were stronger than them, they didn't show any fear. Their morale was high and their battle intent was boiling!

Chapter 8930

Their opponents also went up the stage, but all of them looked relaxed and even had disdainful smiles on their faces. They felt that this battle was extremely easy and was completely like a game.

"If one side is knocked out for ten seconds, is thrown out of the arena, or surrenders, it will be considered a defeat!"

"Please note that sparring is the most important thing in the arena. It is forbidden to harm people's lives with malicious intentions! "If a bad situation occurs, martial League will have corresponding punishment

measures. Everyone is an elite of martial League, so it's only right for us to abide by the principle of not stopping!"

The referee's warning before the start of the match had good intentions, but it was estimated that few people would take him seriously.

At this level, it wasn't easy to hold back in a battle. A little carelessness would lead to the other party killing him!

It wasn't like there hadn't been any deaths in the past years, but in the end, it still ended without a trace.

The excuse was also very easy to find. If I held back and the other party went all out, then the one who would die in the end would be me! Why?

"Begin!"

On the ten Rings, the referee announced the start of the battle at the same time. Sangzi Dazhou's battle generals all got into fighting stances, while their opponents stood still.

"There's still time to surrender, don't put up a stubborn resistance!"

The 10 sea split realm experts seemed to have discussed it beforehand. They said this to the battle general of the Sangzi continent at the same time. Then, without waiting for a reply, they all suddenly exploded from their motionless state and launched their most powerful attacks!

Surrender? How could he let them surrender!

In the first battle, he wanted to cripple the people of the Sangzi continent, so that they wouldn't have the ability to fight in the next two battles!

Persuading them to surrender was just to distract their attention and kill them in one blow while they were wavering!

Fang Gezi's strategy was very effective. Sangzi great continent, Fengqi great continent, and Wutong great continent had already become the target of public criticism because of their high scores in the first round!

How could the other continents watch three third-grade continents step on their heads and replace their original positions?

Therefore, Fang Gezi was only the beginning and he didn't need to worry about the rest. It was a perfect match!

After confirming that their first opponent would be the battle general of the Sangzi continent, the 10 sea split stage experts in the arena received instructions from their respective leaders.

If he could kill, he would kill. If he couldn't kill, he would cripple!

Let Sangzi Dazhou's battle generals be completely wiped out in the first match, and then have no chance to compete in the next two matches!

Fang Gezi was also surprised by the drawing results. She did not have the ability to control the drawing of lots, but that was not important. What was important was that she had found some clues from the drawing of the first round!

Some of the higher-ups of the continent's martial Alliance also didn't like the Sangzi continent! Or perhaps he just couldn't stand Sima Yi!

This discovery made him extremely excited, and he felt more confident!

"Kill them!"

Fang Gezi shouted loudly. There was a sea Rift realm expert from the burning sun continent in the arena, so he would not violate the taboo even if he cheered for her!

The moment he shouted, the experts of the sea Rift stage on the ten arenas pretended to persuade them to surrender and then suddenly took action!

The scenes in the 10 rings were almost exactly the same. The only difference was the attack method of the 10 cultivators at the sea splitting stage. However, the power contained in all of them was the same. It was enough to crush their opponents and achieve the effect of killing them in one blow!

Apart from the Sangzi great continent, Fengqi great continent, and Wutong great continent, the people from the other continents were all shouting in excitement, as if they had already seen the ten elite battle generals of the Sangzi great continent die under the opponent's powerful attack!

In the worst case, his bones would be broken and his tendons would be broken, and he would be seriously injured!

However, the blood and flesh that they had expected did not appear. When the powerful attacks of their opponents landed, a faint layer of defensive light film appeared on the bodies of the battle generals of the Sangzi continent, blocking all the attacks.

Although the defensive light film fell apart after blocking the attack, shattering into spots of light and quickly dissipating, its mission was already completed!

"A defensive formation plate! They're cheating!"

Fang Gezi cried out in alarm, her face flushed red. However, as soon as she spoke, she realized that something was wrong!

The use of weapons and tools was allowed by the rules and was absolutely not considered cheating. In a real battle, any means could be used to save one's own life and take the enemy's life!

Therefore, the individual battle would not restrict the use of any tools and weapons. The only problem was whether you had enough powerful tools to use!

There was no doubt that the people from the Sangzi continent had it!

The formation disk they were using was naturally one of Lin Yi's trump cards. In theory, it was a one-time use defensive formation disk.

It wasn't difficult for Lin Yi to block one attack from a sea Rift master. A formation disk made with serious work could even block a continuous attack from a sea Rift master.

However, in order to pursue speed and quantity, a single-use formation plate was naturally the most cost-effective item!

This was the advantage of having a powerful array Mystic master!

The ten battle generals of the Sangzi continent exploded with their strongest fighting power as they blocked the opponent's attack and began to counterattack!

Their opponents were originally full of confidence, thinking that with a full-force attack, they would definitely complete the mission and obtain the result of an instant kill. They were even prepared to put on a celebratory posture!

They didn't expect that an instant-cast defensive array disc would completely nullify their attacks!

What was even more troublesome was that in order to achieve the effect of a one-hit kill, they really didn't hold back. If they went all out, the result would be that they lost the possibility of turning the tables!

When the attack was offset, they inevitably had a brief stun. If it was a normal fight, it might not be a big deal. After all, the two sides were going back and forth. If one side showed a flaw, the other side might not have the ability to seize it.

The problem was that this wasn't a normal fight. Their attacks were nullified by the defensive disk array, and their opponents weren't affected at all. They were even prepared and waiting for them to reveal this flaw!

The explosion only happened in an instant!

The difference in strength between the two sides was like an adult man and a child. Under normal circumstances, the strong man could naturally hang and beat the child with one hand. However, when the strong man lost balance and fell, the child held the dagger and waited for the strong man's throat to fall on the dagger. The result was obvious!

The Sangzi continent's ten battle generals weren't children and didn't need daggers. They just needed to grasp this flaw that had finally appeared.

Their strength might not be as good as their opponents, but their combat experience was not lacking at all. In a situation where the opponent's body refinement level far exceeded their own, they did not pursue killing power. Instead, they borrowed the power to fight against the strength, using the technique of lifting a thousand Jin with four taels to send the opponent out of the ring!

The 10 arenas were the same. The 10 experts at the sea splitting stage landed outside the arenas almost at the same time and stood firmly on the ground. They didn't look embarrassed at all. However, they were all dumbfounded and didn't understand the situation at all!
