

Chapter 220 Please Save Me

As soon as the leader finished speaking, someone came over to placate him: "Big brother, why do you have to be angry with that brat? If you hurt your body for this bastard, then it's not worth it. You are our boss, our leader. We can't wait to follow you. If he wants to be a Great Saint, then let him be. We can't do anything about it."

After finished speaking, he looked Finn and snorted coldly.

Finn heard all these words from his subordinates and forcefully shut his mouth.

That man called Finn spoke up for her again and again. Elena thought that he was not too bad.

The pain in her abdomen came suddenly. Elena fell to the ground in pain. Beads of sweat appeared on her forehead and her face became uglier and uglier.

“Ahh...” Elena felt that there was something coming down from her thighs. She touched her trousers and felt that it was already wet.

Her water broke!

Looking at the painful woman in front of them, no matter how foolish the men were, they could tell that something was wrong with Elena.

"Big brother, it seems like this woman is really going to give birth. Look at her face full of pain. She did not seem to be faking it at all."

Someone pointed at Elena and said hurriedly. He was somewhat scared.

Elena was panting heavily. She had read books about pregnant women before. She still understood the basics. Her water had already broke and she knew if she delayed anymore, her babies would be in danger.

She looked at the group of men and begged bitterly, "Please, please save me. My water broke. I am going to give birth. I am really going to give birth."

Elena shouted at the top of her lungs. The people who were stunned just now were all shocked.

The leader who was speaking ill just now had killed countless people. But he had never encountered this kind of situation before. He was at a loss for a moment.

The leader thought for a moment and took a few steps back defensively. "Let me tell you, don't blame this matter on me. Your stomach is not working properly! Did you have to choose this time to give birth?"

"Please, I really can't take it anymore. Can you take me to the hospital first? I need to save my babies. Please!" Elena begged bitterly. She had not lived enough and did not want to die.

Furthermore, in her stomach there were two little innocent lives, who hadn’t even seen the light of the day. She definitely could not die!

The leader swallowed his saliva. To be honest, he was really scared looking at this situation. He looked at his brothers around him. They were also at a loss.

Finn saw this and immediately went forward to quickly check Elena’s body. He turned around to look at the leader and said urgently,

"Big brother, it is already too late to send her to the hospital. Since we kidnapped this woman with the purpose of money, why not help her deliver the baby now? Maybe we can still get some money at that time."

"What exactly are you doing?"

"If you still don't make a decision, when her husband comes, we might even lose our lives. You know Ryan Monor, right? If he knew that we killed his wife and children, do you think he will let us off? Money and life, you choose one yourself."

Finn interrupted him and looked at him coldly. His face darkened.

"If you are willing to help her to give birth, then help! I don't care about these things. Watch carefully. Guard all the exits. If you dare to let a fly in, I will question you all."

The leader gritted his teeth and bit the bullet. He also knew he couldn’t get over of this situation.

Finn's words undoubtedly gave Elena a glimmer of hope. She looked at him with gratitude but could not hide the surprise, "You. . . Do you really know how to help to give birth? I am carrying twins."

"Yes, my wife gave birth to a child and I was the one who helped. But they were all killed. I came here to seek refuge with powerful people, just to avenge my wife and child. Don't worry, I'll make sure your children are safe."

As soon as he finished speaking, Finn started to make a move.

...

A few hours passed quickly, and the children had yet to be born.

Elena lay on the ground, her entire body covered in sweat. Her clothes were also drenched in blood and she shouted hysterically.

Finn was even more nervous and anxious than her, "Don't give up. Try harder. Now we can see the child's head."

Elena had used up all the strength in her body. She was exhausted. Even if she did not want to give up, she did not have any strength left. There was a force that ruthlessly pulled her into the dark abyss.
