

THE IMMORTAL CULTIVATION GAME HAS COME TRUE

Chapter 241: Chapter 236: Finally Planted the Ginseng Fruit Tree Seedling!

At last, the final divine power... perfected. In this way... the entire “TianGang Thirty-six Method” has been cultivated to the level of perfection.

“Phew~” Xuanqing opened his eyes.

When all thirty-six divine powers were cultivated to the level of perfection, he discovered that an effect similar to the Three Flowers Gathering At The Top had occurred.

These thirty-six divine powers... were connected, and it seemed as if there was a link between them.

In this situation!

As long as one divine power is used, the remaining thirty-five powers will also be triggered, and their strength will be added together, forming the effect of Tiangang.

“In other words... using any divine power now will have thirty-six times the effect!” Joy filled Xuanqing’s eyes.

He never expected.

That cultivating the “Tiangang Thirty-six Method” to perfection would produce such immense benefits.

“Let’s give it a try... the power of perfect level TianGang thirty-six divine powers!”

Xuanqing was eager to give it a try.

The next moment.

The perfect level Ground-Gold Light!!

Accompanied by a flash of brilliance, he felt the surrounding space flicker as he disappeared from Black Wind Mountain in an instant.

The next time he reappeared, he was above Sha City at the border of the Black Wind Country.

At this moment.

On the city walls of Sha City, countless people touched the surface or communicated with the spirits of the fallen warriors, or remembered their own families.

The streets of the city were bustling yet orderly.

The ground was very clean, with trash cans every two or three hundred meters, and a security pavilion every one thousand meters.

The various shops along the roadside sold all kinds of grain, oil, rice, noodles, snacks, and restaurants.

“In an instant, I traveled from Black Wind Mountain to Sha City. This speed... would be equivalent to moving tens of kilometers per second if converted to kilometers.”

“The distance between Water Blue Star and the Moon is 380,000 kilometers. With my current speed... it would take just over an hour to travel from Water Blue Star to the Moon.”

Xuanqing silently calculated his own speed.

It would take just over an hour to travel around the entire Water Blue Star as well, which had a circumference of only 400,000 kilometers.

In other words...

Xuanqing could now appear anywhere on the Water Blue Star in just over an hour.

With such a speed.

Even the fastest aircraft in the real world would likely be left far behind, surpassing the limits of what real-world technology can achieve.

“This perfect level Ground-Gold Light is definitely much faster than the Somersault Cloud!” Xuanqing’s eyes were shining.

It’s worth mentioning that.

The so-called “traveling 108,000 li in one somersault” does not mean that such a long-distance can be reached in an instant.

First of all, the phrase “108,000 li” doesn’t refer to a specific number, but rather it means a very long distance.

For example... the journey to the west is fraught with difficulties, covering 108,000 li, but it doesn't mean that there are exactly 108,000 li from the Tang Dynasty Empire to the Peacock Dynasty. Instead, it describes the distance between the two places being very long.

There are many similar phrases, which will not be listed one by one here.

Of course... these are all digressions.

Back to the story.

After testing the Ground-Gold Light, Xuanqing found a secluded place to test other divine powers from the "Tiangang Thirty-six Method."

The final result was very satisfying to him. No matter which divine power he used, the other thirty-five would support it, with the power increasing by at least tens of times more.

After completing the tests.

Xuanqing returned to Black Wind Mountain.

Entering his Taoist temple room, sitting cross-legged on the futon, and setting up a protective formation with a casual wave of his hand.

Everything was ready.

With one thought.

“Exit the game!”

Real World.

Qingping Mountain.

Xuanqing opened his eyes, detaching from the game.

In an instant.

He felt a surge of pressure from all around, as if the entire space was trying to squeeze him out.

However.

For Xuanqing, who had already become a Flawless Golden Immortal, this pressure only made him feel nauseous and uncomfortable, but it did not cause any harm.

“This Heaven and Earth Will... really makes one annoyed!”

Xuanqing shook his head.

This squeezing feeling was like a fly constantly buzzing around a person, causing annoyance and confusion.

“Cold and Eternal, Silent World, serene heart, I am the only god, unite mind and spirit...”

After reciting the “Serenity Spell,” he managed to suppress the nauseating feeling deep within his heart.

Afterward.

Xuanqing thought about the planting of the Ginseng Fruit Tree in his heart.

He had just condensed his Immortal Body when he first felt the pressure from the Heaven and Earth Will of Water Blue Star. Now that he had broken through to the Flawless Golden Immortal, this feeling of pressure had increased a hundredfold.

“If I plant the Ginseng Fruit Tree on the Water Blue Star... I’m afraid I will have to deal with the Heaven and Earth Will of the Water Blue Star first!”

“But the key is, I was counting on the Ginseng Fruit Tree’s ability to absorb Chaotic Qi and turn it into Spiritual Qi to devour the Heaven and Earth Will of Water Blue Star.”

Xuanqing furrowed his brow.

For a moment.

It was like an awkward situation where he couldn't leave the house without a mask, but he couldn't get a mask without leaving the house.

In his plan, he would use the Ginseng Fruit Tree's ability to change the environment and create a Cave Heaven and Blessed Land effect to open up the Heaven, Earth, and Human Three Ways.

Ultimately, by controlling the Heaven, Earth, and Human Three Ways, he would be able to perfectly replace the Heaven and Earth Will of the Water Blue Star, devouring it with minimal impact..

[The Immortal Cultivation Game Has Come True](#)

[#Chapter 242 - 236: Finally Planted the Ginseng Fruit Tree Seedling!_2 - Read The Immortal Cultivation Game Has Come True Chapter 242 - 236: Finally Planted the Ginseng Fruit Tree Seedling!_2](#)

Chapter 242: Chapter 236: Finally Planted the Ginseng Fruit Tree Seedling!_2

It can be said... the Ginseng Fruit Tree is absolutely an irreplaceable part!

With a thought.

The Ginseng Fruit Tree Seedling was taken out of the Game Backpack.

In an instant.

The feeling of space squeezing around became even more intense. Obviously, just one Flawless Golden Immortal already made the Will of Heaven and Earth go crazy. Coupled with the Ginseng Fruit Seedling, one of the ten great spiritual roots in the Game World.

In this kind of... collision of rules between the two worlds, the Will of Heaven and Earth simply can't accommodate such a strong impact.

Seeing this scene.

Xuanqing thought to himself that it was as he expected.

"Take!" He took the hovering Ginseng Fruit Seedling and put it back into the Game Backpack.

He looked at the distant sky, his eyes seeming to penetrate the atmosphere and reach the cratered surface of the Moon.

"Once I perfect the Thirty-Six Heavenly Arts, I'll take a trip to the Moon!"

Xuanqing thought with some anticipation.

It can be said... every modern person must have an impulse to explore the mysterious space and the mysterious moon.

However, this impulse, with the growth of age, is gradually shattered by the trivialities of reality. The pressure of housing loans, car loans, betrothal loans, and various loans leaves people out of breath and loses that innocence.

The next moment.

"Earth Leaping Golden Light!"

With the blessing of the perfect level of the Thirty-Six Heavenly Arts.

Xuanqing's entire body was covered in dazzling golden light, as if bathing in a golden ocean.

Immediately after, at a speed difficult to observe with the naked eye, he shot towards the direction of the Moon.

In this process.

The gravitational pull of Water Blue Star was nothing compared to the overwhelming feeling of space squeezing around for the Flawless Golden Immortal Xuanqing.

Fast!

Very fast!

He discovered that on Water Blue Star, using Earth Leaping Golden Light was even more powerful and effective than in the Game World.

The speed had at least doubled!

That is to say, by using Earth Leaping Golden Light here, it would not take two hours, but only an hour to travel from Water Blue Star to the Moon in space.

Seeing this situation.

Xuanqing was surprised, but also very happy. After all, no one wants to waste time on boring commutes.

Eagle Sauce Country.

A certain special treatment center, also affectionately called Area 51.

A supercomputer is monitoring the movements on Water Blue Star through a satellite in space.

In the chair in front of the supercomputer, a young white man in a white protective suit and gold-rimmed glasses is sitting.

He was boredly swiping short videos and commenting on the hot pants girl on it.

Suddenly.

[Beep... Attention please! Unknown object detected, approaching R-5iam Satellite.]

[Beep... Attention please! Unknown object detected, approaching R-5iam Satellite.]

A series of piercing sounds rang out in the observation room.

Thump-

Phone fell to the ground, the outer screen shattered, and the hot girl on it was still dancing.

The young white man with glasses looked at the situation on the monitor, his face full of astonishment.

“Oh....my~god!!”

The young white man was horrified and didn't pay attention to the phone on the floor that was still playing sister's hot dance. He directly picked up the pager behind him.

“Oh- Someone come quick, you won't believe what I found... Damn, this has to be real, get Dr. Mike over here, now....”

Bzzz-

A current sound rang from the pager.

Only then did he realize that he hadn't changed the channel, and the conversation just now hadn't been sent out at all.

The young man angrily pounded the table.

“Huff-”

After taking a deep breath, he organized his words in his mind and adjusted the pager in his hand to the correct frequency.

“This is May Kiel, code name.... observed... approaching R-5iam Satellite, be careful...very fast, faster than a rocket, oh- I swear ever seen....”

it's the fastest thing I've

He quickly said what happened, and after getting a response, he turned his attention back to the monitor.

The series of data observed on it made him wonder if the observatory equipment was malfunctioning.

“Oh my god- What on earth is this? It's hard to imagine!” The young man murmured, filled with astonishment.

Apart from Eagle Sauce Country.

On Water Blue Star, the other superpowers basically also have advanced satellites, and naturally, they too discovered this scene.

All the scientists' faces were filled with confusion and shock.

With all their knowledge, they could not guess what kind of object could possess such speed... this was not something that current technology could achieve.

Of course.

The higher-ups of one country, however, were very calm.

In a nature reserve within Yan Country, a very secretive base had been built, similar in function to Eagle Sauce Country's Area 51.

Researchers remaining in the observation room who discovered some unknown presence in Changling City, Yan Country that managed to escape Water Blue Star's gravity at a terrifying speed, heading towards the moon...

"Holy shit, what the hell is going on?"

The researchers were horrified and quickly reported the situation to the base's higher-ups.

However.

Apart from slight surprise, the base's higher-ups simply told them not to worry about it, as if they had already anticipated it.

Facing such a bizarre response from the higher-ups.

The researcher seemed to think of something, his eyes widening as large as copper bells.

In his mind, he instantly recalled the live broadcast not long ago that shook the entire Yan Country.

Unfortunately, this broadcast was quickly overshadowed by numerous other stories of celebrities getting married, cheating, and breaking up, quickly fading from public attention.

But for researchers like them, they always kept it in mind.

"Huff-

- I

The researcher took a deep breath, his eyes rolling around as he muttered under his breath:

“I remember back home there’s a Taoist temple; I’ll have my mom go worship this month!”

Regardless of the impact on the bases of the various superpowers in Yan Country due to Xuanqing’s unbridled display of speed,

let’s just focus on the present situation.

Slightly more than an hour later.

Xuanqing arrived on the moon.

The scene before him was foggy all around; if an ordinary person were here, visibility would probably be less than ten meters.

It was quite different from the moon’s landscape portrayed in movies and television dramas.

Of course.

The craters created by meteorites on the ground were similar to what was recorded.

“So this is the moon... Aside from a weak gravitational pull, the oppressive feeling from Water Blue Star has completely disappeared.”

Xuanqing closed his eyes and carefully observed the surrounding environment.

However... for him, these things were insignificant; the most important thing was to try and see if the Ginseng Fruit Tree seedling could survive here.

With a thought.

He took the Ginseng Fruit Tree seedling out of the Game Backpack.

Humming-

Without the suppression of Heaven and Earth Will, the Ginseng Fruit Tree seedling’s aura was completely released, causing the surrounding space to become somewhat distorted.

At this moment.

If scientists were to witness this, they might think that the Ginseng Fruit Tree seedling was some kind of supermassive metal, otherwise, they couldn't explain the space distortion.

Xuanqing knew.

The reason for the distortion of space was due to the clash of different world rules.

Then.

He planted the Ginseng Fruit Tree seedling in a hole created by a meteorite.

Although there was no water or oxygen on the moon – the essential conditions for life – the Ginseng Fruit Tree seedling was different, as it didn't rely on nutrients from the real world. Instead, its roots directly pierced into the Endless Chaos and absorbed Chaotic Qi to survive.

“Activate a 100-year time acceleration!”

Xuanqing cast a time acceleration on the seedling planted on the moon, using only 100 years for the first attempt, just to be safe.

[Beep... -1000 Ingot!]

As one thousand ingots were deducted, the Ginseng Fruit Tree seedling trembled slightly but didn't show any other reaction.

However.

Xuanqing still had a smile on his face.

Because... upon closer inspection, one could see that the leaves of the Ginseng Fruit Tree seedling had become a bit more lush green than before.

The reason for only a slight tremble and not showing any other reaction was that a mere hundred years was not enough for the growth of a spiritual object at the level of the Ten Great Spiritual Roots of Heaven and Earth within the Game World.

The next moment.

“Activate a 10,000-year time acceleration!”

Chapter 243: Chapter 237: The more devout the faith, the more Qi is drawn.

[Beep... -100,000 ingots!]

With the deduction of 100,000 ingots, a whole 10,000 years of time acceleration is bestowed upon the Ginseng Fruit Tree Seedling.

This time.

It's not like the previous negligible effect.

The Ginseng Fruit Tree Seedling, as if it had ingested Jinkela, began to tremble wildly, and its branches and leaves turned green at a visible speed.

Then.

Tree roots began to branch out and spread around densely, exuding an indescribable Dao charm.

"This is... the roots are about to pierce into the Endless Chaos!" Xuanqing was fully focused, not even blinking.

He wanted to see how, in the Real World, the Ginseng Fruit Tree Seedling pierces into the Endless Chaos, and how it was different from when he became the Chaos Body and connected his physical body to the Endless Chaos.

10,000 years in time.

For ordinary beings, it usually only appears in vows, such as "love you for 10,000 years," and is a very far-reaching figure.

But a mere 10,000 years, to the Ginseng Fruit Tree, which is a Heaven and Earth Spiritual Root, is nothing more than an instant, and even still within its infancy.

A moment later.

10,000 years of time acceleration was completed.

Xuanqing covered the tree with his God Soul, but found that although its roots had grown out, they were still a certain distance from entering the Endless Chaos.

Without any hesitation.

"Use 10,000 years of time acceleration."

[Beep... -100,000 ingots!]

Anyway, the time acceleration function, when used on plants, only requires 10 ingots per year, and at such a low price, it is of no consequence to the current Xuanqing.

In an instant.

The roots of the Ginseng Fruit Tree Seedling... were growing wildly, and in a blink of an eye, they reached a depth of about 100 meters underground.

Crack.... crack

Accompanied by an irritating scratching sound, like claws rubbing against glass.

He could clearly feel that the massive root system seemed to break through some obstruction and enter a silent void.

At this moment.

Xuanqing was fully focused, and the Divine's flower was also brought out just to observe the Endless Chaos connected to the Real World.

However... No matter how he observed.

He couldn't figure it out and could only faintly feel that the roots of the Ginseng Fruit Tree Seedling had pierced into the Endless Chaos, with nothing else.

On second thought.

Now he is only in the Flawless Golden Immortal Realm, and although he seems to be very powerful, there is still a huge gap between him and the level of 'Endless Chaos'.

It's like someone who hasn't even graduated from elementary school attending lectures at a top-notch university trying to make sense of it all – they probably could understand the beginning's "start of class" and the end's "dismissal," but that's about it.

"Forget it, if I can't observe it, then I can't."

"Let's refine this Ginseng Fruit Tree Seedling first!"

Xuanqing muttered softly.

Under normal circumstances, it would be impossible for a Flawless Golden Immortal like him to refine such a Heaven and Earth Spirit Root like the Ginseng Fruit Tree.

But this Ginseng Fruit Tree... is still in its seedling state, and if done properly, it can still be refined.

With a thought in mind.

The Divine's flower bursts forth its full Power of the Soul, enveloping the Ginseng Fruit Tree Seedling that is now over ten meters tall.

"Refine!"

Buzzing-

The Ginseng Fruit Tree Seedling trembled, initially trying to resist, but upon sensing the Chaotic Qi in Xuanqing's body, it stopped resisting and instead cooperated with the refining process.

Upon seeing this.

Xuanqing's mouth curved slightly upwards.

This is why he waited for the Ginseng Fruit Tree Seedling to take root in Endless Chaos before refining it, so as to reduce the difficulty of refining.

However... Even so.

He didn't dare to be careless, concentrating his spirit and imprinting his God Soul little by little into the tree's heart.

About two days later.

With a tremor from the Ginseng Fruit Tree, a successful God Soul imprint had been made in the tree's heart.

"Phew-"

Xuanqing breathed a sigh of relief.

Although it only took a short two days, refining the Ginseng Fruit Tree was so difficult that it left him quite exhausted, especially mentally.

Fortunately... he had successfully refined it now.

At the same time.

Information about the Ginseng Fruit Tree appeared in his mind.

Three Yuan-years to grow, three Yuan-years to mature, and finally, three Yuan-years to bear fruit... meaning that it takes a full Nine Yuan Hui for the Ginseng Fruit Tree to bear fruit.

It's worth mentioning that.

From Taiji, two instruments were born, and from two instruments, four images were born.

One Yuan is divided into twelve Hui, each Hui lasting 18,000 years, and one Yuan Hui has a lifespan of 129,600 years.

This means that it will take over 1.16 million years for this Ginseng Fruit Tree Seedling to bear fruit.

The subsequent process of nurturing the fruit is easier: 3,000 years to bloom, 3,000 years to bear fruit, and 3,000 years to mature.

If it were an ordinary person, waiting for the fruit to mature in over a million years would probably be pointless.

But as for Xuanqing, using time acceleration on a plant only cost him a little more than 10 million ingots.

"Eleven million+ ingots are acceptable!"

Xuanqing thought to himself.

Compared to the 100 million ingots it took to exchange for a Ginseng Fruit, 10 million ingots didn't seem like such a huge number anymore.

With a thought.

"Use 10,000 years of time acceleration."

[Beep... -100,000 ingots!]

The roots of the Ginseng Fruit Tree Seedling rapidly grew in size, and the trunk expanded at a visible speed. Numerous branches and leaves sprouted from the tree crown..

Chapter 244: Chapter 237: The more devout the faith, the more Spiritual Qi is drawn. _2

What's more important is.

During the growth process of the Ginseng Fruit Tree Seedling, a familiar energy was also excreted by the leaves.

After feeling this familiar energy.

Xuanqing's heart was delighted.

Spiritual Qi!

Heaven and Earth spiritual energy!

"In this case, by the time the Ginseng Fruit Tree is fully mature, the entire Moon might have become a cave heaven and blessed land."

Xuanqing couldn't help but think of Longevity Mountain.

He had learned from his casual conversation with Great Immortal Zhenyuan that in ancient times, Longevity Mountain was just an ordinary high mountain.

It was only after the Ginseng Fruit Tree was relocated there that it gradually transformed the mountain into a cave heaven and blessed land.

Although the Moon being a blessed land wouldn't allow him to practice directly on it, the feeling of creating a blessed land with his own hands would give him a unique sense of achievement.

Perhaps... this penchant for farming is a characteristic deeply rooted in the true spirit of every Yan Country's people!

Of course.

Apart from the sense of achievement.

He had an immature idea about the Heaven and Earth spiritual energy nurtured by the Ginseng Fruit Tree, and how to proceed needed careful consideration.

Shaking his head.

He thrust the messy thoughts out of his mind.

"Continue."

Xuanqing muttered in his heart:

"Activate 10,000-year time acceleration!"

Moments later.

The effect of the 10,000-year time acceleration ended.

Compared to ten million years of time, 10,000 years were still too short.

Without any hesitation.

Xuanqing continued to use time acceleration on the Ginseng Fruit Tree.

“Activate 10,000-year time acceleration.”

[Ding... -100,000 ingots!]

Moments later.

“Activate 10,000 years...”

[Ding... -100,000 ingots!]

- ? ?

In this way, the cycle continued until twenty 10,000-year accelerations were used before stopping.

The reason he stopped.

It was not because he ran out of ingots, but because the endless Chaos Space that the root system of the Ginseng Fruit Tree connected to had been exhausted.

Even if he continued to speed up, he wouldn't be able to absorb a bit of Chaotic Qi, so there was no point in it.

“I can only wait for this piece of Endless Chaos Space to recover before I continue to accelerate.” Xuanqing shook his head and thought to himself.

Of course.

He was already very satisfied with the result.

Twenty 10,000-year time accelerations added a full two hundred thousand years of growth time to the Ginseng Fruit Tree.

That meant that after just five more times, the Ginseng Fruit Tree would be fully mature and ready for fruit harvesting.

At this moment.

Around the Moon.

The originally dark gray misty atmosphere had been dyed white by the massive spiritual qi exuded by the Ginseng Fruit Tree.

Xuanqing closed his eyes and sensed it.

From the center of the Ginseng Fruit Tree, spreading out tens of kilometers in diameter, the concentration of Heaven and Earth spiritual energy... was already almost the same as the Black Wind Mountain before it became a Blessed Land.

However.

The spiritual qi was visibly diffusing as well. If left unchecked, it would soon become less dense and eventually vanish completely.

Xuanqing's brow furrowed slightly.

In the subsequent 'Human Path' plan, the spiritual qi nurtured by the Ginseng Fruit Tree played a crucial role, and it must not be allowed to dissipate into the universe like this.

Fortunately.

He had some achievements in the Formation aspect, starting from the Five Elements Talisman Array and never falling behind.

Locking Spirit Formation!

This formation emerged in Xuanqing's mind.

Unlike the Gathering Spirit Formation, the Locking Spirit Formation did not have the function of gathering spiritual qi, but it could lock a space and ensure that the spiritual qi would not dissipate.

He couldn't quite remember the origin of the formation...maybe, it was congratulatory gifts obtained at a banquet in the Game.

No sooner said than done!

Then.

He took out the materials for arranging the Locking Spirit Formation from his Game Backpack.

Within moments, a Locking Spirit Formation was set with the Ginseng Fruit Tree at the center, covering an area of tens of kilometers in diameter.

Looking at the no longer dissipating Heaven and Earth spiritual energy.

Xuanqing nodded in satisfaction.

“Tree, you just stay on the Moon, and I’ll go back to the Water Blue Star to get you some ingots-”

After saying that.

He cast Earth Leaping Golden Light, left the Moon, and flew towards the blue planet.

An hour later.

Xuanqing, who was crossing the void on his way home, suddenly frowned, stopped, and felt several gazes peering at him.

“Courting death!” Xuanqing’s brow furrowed, his fingertips forming seals.

Manifestation of Heaven and Earth!

The gigantic palm, resembling a world-ending force, appeared once again, this time appearing in the void between the Water Blue Star and the Moon.

The giant palm’s thumb and index finger...aimed at the probing thing...gently pinched it, reducing it to dust.

“A mere satellite, ignored before, dares to push its luck.”

Looking at the satellite fragments pinched back by the giant palm.

Xuanqing sneered.

In fact.

Earlier, when he flew from the Water Blue Star to the Moon, he had already sensed the existence of these satellites.

It was just that he was looking forward to planting the Ginseng Fruit Tree seedlings and, in addition, because he was using Earth Leaping Golden Light, he would only be seen as a ball of light even if he were caught...

So, he didn’t bother with those satellites.

Now that the Ginseng Fruit Tree had been planted and there was nothing else to do, he casually crushed these spying satellites.

On Water Blue Star.

On the other side of the Atlantic Ocean... the Beautiful Country.

Inside a certain white building, a Caucasian researcher wearing a white research uniform was playing a video on a computer..

Chapter 245: Chapter 237: The more devout the faith, the more Spiritual Qi is drawn in through Jieying. 3

The scene in the video was rather blurry.

One could barely see a golden light moving at a terrifying speed from Water Blue Star's atmosphere towards the moon, and then disappearing without a trace.

After the video finished playing.

The researcher played another clip with a time stamp about two days later. A golden light appeared again, quickly flying from outer space towards Earth.

However, just a few seconds later... the screen suddenly stopped, following a gigantic hand, and lost signal.

Downstairs.

Sitting in a chair... was a man in a suit with a sturdy frame and a tuft of yellow hair, who was the base director.

Behind the base commander sat a dozen staff members, all of whom had sparse hair and appeared to be extremely intelligent.

However.

When they saw such an outrageous scene... they looked at each other in shock, even suspecting it was some kind of joke.

"Shit, are you sure this isn't a movie trailer?" The base commander cursed, his eyes filled with suspicion.

"Oh... You are the great base commander, how could I dare deceive you?" The researcher held his forehead, then explained:

"I know you might not believe it, but it is indeed true."

"Right... after analysis, this huge hand is the same as the one that took away Yan Country's meteorite before."

Upon hearing this.

“Damn... This must be a new weapon developed by Yan Country.”

“Could it be they’ve also captured starry sky creatures?”

“Commander-in-chief, I suggest we increase infiltration of Yan Country’s agents!”

The staff members expressed their opinions one after another.

Upon hearing this.

The base commander fell into deep thought, his eyes flashing with a mysterious color, not knowing what he was thinking.

- ? ?
- ? ?

Let’s leave aside the Beautiful United Nations and the thoughts of many other countries.

Here.

Qingping Mountain.

Xuanqing had returned to the Taoist temple and sent a message to Huai Qingyun through the Immortal Official Document, asking him to send the Gathering Qi Bead after it had been replaced.

While waiting.

Xuanqing sat cross-legged, pondering the matter of Heaven and Earth Will in his mind.

In his imagination, among the Heaven, Earth, and Human Three Ways... the most appropriate starting point would naturally be the Human Path.

“Heavenly Path... is Shinto, Earthly Path is Reincarnation, and Human Path... is the path of cultivation.”

“However... just relying on the ordinary revival of spiritual Qi to open up the Human Path doesn’t align with my interests. I need to think more carefully!”

After contemplation for a moment.

A flash of inspiration came to his mind.

“What if I combine the Faith Incense Fire with Spiritual Qi? This way, I would be opening up the Human Path while also reaping the rewards of faith!”

The more he thought, the clearer his ideas became.

Xuanqing closed his eyes and continued to think deeper in this direction.

First!

He needed to set up some guiding formations on the moon to bring Spiritual Qi to Water Blue Star.

Next... these Spiritual Qi couldn't be readily used by people. There must be restrictions set up, and these restrictions had to be related to faith.

“Contemplation method!”

“Create a meditation practice that uses my divine statue as the focus.”

Xuanqing couldn't help but blurt it out.

“And the formations guiding the Spiritual Qi will be set up in Taoist temples all over Yan Country. Just set a restriction that once a certain amount of incense is contributed, they will automatically bring in the corresponding Spiritual Qi, allowing believers to cultivate!”

“The more devout the faith, the more Spiritual Qi can be brought in.”

“In this way.... the Human Path will be opened up on Water Blue Star!”

Chapter 246: Chapter 238: Main Array Plate, Sub-array Plate, and Activation Key!

“The formation is set in the Taoist temple, using the visualization map as a medium to determine how much incense fire a believer has contributed, then based on the quantity of the incense fire, an appropriate amount of spiritual qi is dispersed!”

Xuanqing's eyes are increasingly bright.

With such a set of procedures, everyone on the Water Blue Star who wishes to practice must ensure the devotion of their faith.

By doing so.

Not only has he developed the Human Path, but he also ensured the devotion of faith. It can be described as killing two birds with one stone.

Next.

Xuanqing began to ponder the details of this 'Visualization Practice Method', as well as how the formations should be arranged.

Several hours later.

In the distant sky, a cloud of luck descends, revealing a robed child. This was Huai Qingyun, who had been tasked with replacing the Gathering Qi Beads.

"Sir... all the Gathering Qi Beads are here." Huai Qingyun respectfully bowed and then brought out several Sumeru Bags.

Listening to the voice.

Xuanqing came to his senses and nodded at Huai Qingyun, "Good, thank you for your hard work!"

"It's not hard work, Sir. You carry on with what you were doing."

Perhaps Huai Qingyun had noticed that Sir was deep in thought.

Huai Qingyun did not make a fuss. After bowing again, he bid farewell to Sir.

Watching Huai Qingyun leave.

Xuanqing focused his attention on the Sumeru Bags in front of him, feeling a bit expectant.

In the Game World, he had spent a whole year forming a Divine Flower and gathering it on his crown.

He had then spent four months practicing the "Tiangang Thirty-Six Method" from Dacheng to perfection.

Then he stayed on the moon for two days.

After calculating it all.

On the Real World side... fifty days had passed.

The next moment.

His divine thought covered these Sumeru Bags, drawing out all the power of the incense fire, and then he silently said to himself:

“Recharge!”

[Ding...+1.5E ingots!]

Hearing the prompt sound in his mind.

Xuanqing was slightly taken aback.

One hundred and fifty million?

This number was somewhat unexpected.

Just fifty days had passed and he had already harvested 150 million. Didn't that mean that 3 million ingots were credited every day?

“Last time I harvested.... there were only 1.8 million a day, now it has grown to as much as 3 million a day.”

Xuanqing was filled with emotion.

What concept is this?

If the Guanyin of the Shimen is used as a measuring unit, doesn't it mean that a top-tier big brother is harvested every day?

“Open Character Panel!”

[Name]: Xuanqing

[Physique]: Chaos Virtue Holy Body.

[Grade]: Left Attendant Immortal Lord of Taiji Palace, Envoy of Five Thunders, and Director of Thunder Department (Fourth Rank)

[Cultivation]: Integration of Void Stage (Mid-Peak)

[Cultivation Method]: Food-Qi Decree

[Divine Ability]: Fate-controlling Dragon Chapter (Infinite), Heavenly Thirty-six Methods (Perfection), Five Element Array (Perfection)....

[Ingots]: 1.6E

On the Character Panel.

After recharging 150 million, coupled with the previous more than 10 million, the total is 160 million.

Of course.

This number also has an additional decimal, except that it is not displayed.

“Check accumulated number of incense fire, Secondary Third-Rank Immortal Official.” Xuanqing murmured in his heart.

[Ding..Your current total: 3.5E incense fire, 1.5E remains until your next Immortal Officials Promotion!]

One hundred and fifty million?

“If calculated at three million a day, it will only take fifty days...no, if the Taoist temple continues to expand, the time may be shorter, to be promoted to Secondary Third-Rank.”

Xuanqing murmured softly.

But the small change in rank from the Fourth-Rank to Secondary Third-Rank could not attract his attention unless he was promoted to the First Grade and had the qualification to open up a Dao Court, perhaps he would have some expectations then.

This moment.

He needs to consider how to open up the Three Ways of Heaven, Earth, and Humans on the Water Blue Star, as well as the practice of Five Qi Chaoyuan after the Flawless Golden Immortal!

“By the way, before opening up the Human Path, I should inform Elder Jingde and Elder Qianqing in advance so that they can prepare themselves, and by the way, inquire about the development of the Taoist temple!”

Thinking like this.

Xuanqing was preparing to take out his Phone to send messages to these two elders, asking them to come to Qingping Mountain.

After doing all this.

He closed his eyes again and pondered about the formation.

About two hours later.

Two helicopters landed in the parking lot of Qingping Temple, and two old Taoists disembarked. They were Elder Qianqing and Elder Jingde.

The two looked at each other and smiled, then stepped forward to the Taoist temple.

Entering the inner courtyard.

“Subordinates Qianqing, Jingde... Greetings, temple master!” The two were handling finger seals, holding them high above their heads, and respectfully bowing.

“Hmm!”

Xuanqing opened his eyes, hummed lightly, then asked, “How has the Taoist sect been developing recently?”

Hearing this.

Elder Jingde stepped forward, bowed his hands, and replied: “Reporting to the temple lord.”

“Currently, the Taoist sect is developing rapidly. The number of Taoist temples has increased from the original 2,000 to 5,162, with an average number of incense guests of about 300 per temple.”

“The number of registered Taoists has increased from 4,240 to 6,318.”

Listening to Elder Jingde's narrative.

Xuanqing was somewhat surprised.

In such a short time, the number of Taoist temples had jumped from the original 2,000 to more than double.

On this side.

Perhaps noticing the astonishment on the temple master's face.

Elder Jingde looked a bit strange as he explained, “My lord, you may not know it, but after the meteorite incident, the government office implemented a ‘three no’ policy towards us..”

Chapter 247: Chapter 238: Main Array Plate, Sub-Array Plate and the Key to Unlock!_2

“Oh? What are the three ‘do not’s’?” Xuanqing raised an eyebrow, curiously inquiring.

“Ahern-”

“Don’t interfere, don’t ask, don’t obstruct!” Elder Jingde coughed lightly, then asked with hesitation:

“Palace lord ... Are you... already an immortal?”

Upon hearing this,

Elder Qianqing at the side, too, was all ears.

They still vividly remembered the scare when the meteorite fell, it wasn’t until their Palace Lord said he would act that they felt relieved.

Unbelievably, when their Palace Lord had said he would step in, what he meant was the enormous hand that could destroy the world would scoop up the meteorite.

“Immortal?” Xuanqing was taken aback at first, however, he did not deny it and instead simply nodded with a smile.

This answer,

did not exceed Elder Jingde’s expectations. After all, only an immortal could catch a meteorite with a massive hand.

“Elders Jingde and Qianqing, you don’t have to be envious. After a while, a place among the immortals might be waiting for you too.”

Xuanqing replied with a smile, his words hinting at something more.

In order to retain Water Blue Star while devouring heaven and Earth’s will, you need to find a replacement for the will of Heaven and Earth first.

His choice is to establish the Three Ways of Heaven, Earth, and Human. Then, in the real world, he needs to create a Heavenly Court.

Having received the power from Dragon Powers, Elder Jingde and Elder Qianqing will naturally be entrusted with important tasks by Xuanqing. Becoming immortal is a minor matter compared to that.

“Alright, I’ve called you over not just to discuss the development of Taoism, but also to inform you about something!”

Xuanqing’s expression became grave and then he continued:

“Do you remember me saying one day, that I would start the Road to Cultivation on Water Blue Star?”

Upon hearing this,

Each of the two Taoists shuddered and glanced at each other before answering affirmatively.

Seeing this,

Xuanqing continued: “I plan to start the Road to Cultivation on Water Blue Star and teach the method of contemplative cultivation.”

“In addition, Taiji Hall will establish the Law Enforcement Division. If someone causes trouble during practice, the Law Enforcement Division of Taiji Hall will step in and punish him!”

“The members of the Law Enforcement Division... you two select twenty-two trusted individuals, I will personally imbue them with cultivation. Assign one Law Enforcement Division member to every city.”

As Xuanqing explained,

Elder Jingde and Elder Qianqing held their breaths, their eyes revealing deep shock.

They couldn't imagine, if the palace lord's plan were implemented, the dynamics of Yan Country, or even the entire Water Blue Star, would undergo a drastic change.

“Palace Lord... Can we also cultivate this contemplation method?”

Elder Qianqing couldn't help but ask.

Upon hearing this,

Xuanqing half shook his head, then said solemnly: “You should stick to the orthodox method of Taoist Qi cultivation. The contemplation method has many limits, don't practice it!”

Relations are hierarchical after all, he isn't a monk preaching about saving others with kindness.

For a man following the path of Tao, if there are any benefits.... those closest to him come first, those with predestined relationships are second, those pleasing to the eye come third, and everyone else is irrelevant!

“Thank you, Palace Lord!”

Elder Qianqing and Elder Jingde both bowed and thanked him sincerely.

Upon seeing this,

Xuanqing nodded slightly, "Alright, you can go and prepare. If necessary, inform the government office too."

"Regarding when I will open the road to practice, I will notify you!"

"Yes, Palace Lord!" The two Taoists bowed and then left Qingping Mountain full of excitement.

After sending off Elder Jingde and Elder Qianqing, the matters in the Real World had temporarily been settled.

Next,

Xuanqing waved his right hand.

A copy of the jade slip of "Complete Collection of Formations" floated in mid-air.

He couldn't remember when he had acquired this secret book, but it was most probably given by the West Sea Dragon Palace.

"With the Ginseng Fruit Tree, I can continuously supply Spiritual Qi, so I don't need to worry about that, for now."

"Next... I need to refine a formation plate that has the functions of recognizing incense contributions and gathering Spiritual Qi."

Thinking to himself,

Xuanqing started reading the "Complete Collection of Formations", searching for solutions to these two problems.

In a blink, several days had passed.

After days and nights of study,

Finally,

Xuanqing found the solutions for the 'gathering of Spiritual Qi' and 'recognizing incense' in the "Complete Collection of Formations".

For gathering Spiritual Qi... He decided to combine the teleportation array with the gathering spirit formation, to make a Mother Child Array Plate.

The main Mother Plate would naturally be placed on the location of the Ginseng Fruit Tree on the Moon.

As for the Child Array Plate... It would be placed on Water Blue Star, with a plate deployed in each Taoist Temple that serves to draw Spiritual Energy from the Mother Plate.

With this,

Even the heavenly and earthy spiritual energy required for cultivation is solved!

Then!

Just need to refine some, keys to unlock spiritual qi. As long as cultivators carry these keys and go to Taoist temples to burn incense, they can attract corresponding spiritual qi from the sub-array plates according to the incense points.

The whole system... is composed of three parts.

One, the main array plate on the Moon.

Two, the sub-array plate in the Taoist temple.

Three, keys for recording incense contributions and unlocking array plates.

“In this way, there is no need for manual operation. If one wants to get more spiritual qi, they have to contribute incense more devoutly.”

“However... Learning to modify formations requires some time, it’s better to do it in the game world.”

Xuanqing murmured softly.

For these kinds of time-consuming tasks, with the 10:1 time ratio of the game world and the real world, naturally, it is more cost-effective to do it in the game world.

With this thought in mind.

“Enter the game!”

Black Wind Mountain Taoist Temple.

After entering the game, Xuanqing didn’t waste any time.

With a wave of his right hand.

A large number of glowing treasures... were taken out of the game backpack, these treasures are used to refine array plates.

“Activate Ten Days of Absolute Knowledge Discarding Wisdom.”

[Ding... -864000 Ingots!]

The moment the Ingots are deducted, he enters the mysterious state of Unity of Heaven and Man. In this state, his comprehension is enhanced to the limit.

“First, refine the main array plate!”

Xuanqing’s eyes glowed silver, and he started moving his hand up and down towards the materials floating in front of him.

In a while.

Various materials flew up and merged, condensing into a small square box, which already had the rudiment of an array plate.

“Next, is to combine the teleportation formation and the spirit gathering formation!”

II

Meld!

II

Puchi-

Accompanied by a puff of black smoke and the smell of burning, the main array plate declared a failed refinement.

However.

Facing this failed array plate.

Xuanqing’s face was calm, and there was no fluctuation in his eyes, his right hand moved again, and once again, he took out a bunch of magic treasures for refining the array plate.

[Successful exchange....-165850!]

However.

He only has one portion of the materials needed to refine an array plate, but he always uploads the newly obtained treasures to the mall.

So... these materials... are from exchanging in the game mall.

“Continue!

II

Xuanqing under the state of Absolute Holiness Abandonment of Wisdom, was like he didn't know exhaustion as he channeled the Power of his Soul to refine and fuse these materials one by one.

Puchi....

Accompanied by black smoke, the refinement of the array plate failed once again.

“Continue refining.”

[Successful exchange...-165850!]

Speaking of it.

Failing twice in a row doesn't mean Xuanqing can't do it, the way of formations is inherently difficult, and to engrave the formations on the array plate makes it even tougher.

And what Xuanqing wants to do, is to combine two kinds of formations on the inherently difficult array plate basis.

But.

Even the most difficult things.

With the activation of the Absolute Holiness Abandonment of Wisdom by Xuanqing, and the assistance of materials regardless of cost, the obstruction would eventually be shattered.

After failing nine consecutive times, and on the tenth time of refining array plate...

Finally.

The formation rune on the rudimentary array plate floating in the air slowly blended together, perfectly integrating in the end.

Accompanied by a flash of brilliant light.

The array plate... was successfully refined!

“The main array plate is successfully refined, next is the sub-array plate, and the key to unlocking the array plate!”

Xuanqing stored the main array plate properly, and exchanged another pile of materials to start refining the sub-array plate.

Now with the successful experience of the main array plate, the refining of the sub-array plate, and the array plate key, has become extremely simple.

It was successfully refined in one go..

Chapter 248: Chapter 239: Launching the Human Path Practice Plan!

From beginning the research to successful refinement, the whole process...took only seven days.

At this moment.

Three items with different appearances floated in the air.

The one on the left was a square box about the size of a water tank, covered with mysterious runes and emanating a powerful gravitational force, as if trying to attract all the surrounding air.

The second item was a circular plate the size of a pot lid, also covered with runes. Upon closer inspection, the contents of these runes seemed to have some similarities with the runes on the first box.

The third item on the right looked similar to a children's wristwatch, but it had no display or any buttons or switches, looking mysterious.

These three items.

The huge box, the Main Array Plate with gathering spirit and transmission functions, will be placed on the Moon where the Ginseng Fruit Tree is grown.

As well as the Sub-Array Plate on Water Blue Star, which will receive the spiritual Qi transmitted from the Moon and recognize the incense contributed by believers.

The last wristwatch-like item is the key to activate the Sub-Array Plate. It is made of Gathering Qi Bead material and also serves to receive the spiritual Qi from the Sub-Array Plate and infuse the cultivator with Heaven and Earth spiritual energy.

With the cooperation of the three items.

The Main Array Plate continuously transmits the spiritual Qi fed back by the Ginseng Fruit to the Sub-Array Plate.

Next, the Sub-Array Plate records the incense of the cultivators, and sends the corresponding Heaven and Earth spiritual energy to the cultivator's wristwatch key.

Finally.

Cultivators absorb the Heaven and Earth spiritual energy in the wristwatch for their cultivation.

"In this way, the cultivation problem is perfectly solved, without giving access to my spiritual Qi to just anyone!"

Xuanqing's mouth curled up slightly.

Although he had the power to directly revive the spiritual Qi across the entire Water Blue Star.

Doing so would not only cause turbulence in human society but also bring no benefits to him.

Now things are different.

Those who can enjoy the spiritual energy of Heaven and Earth are believers who provide him with incense, which counts as a connection of fate.

Giving this creation to those with fate is the style of action for cultivators!

"Upload these three magic treasures to the Store first!"

Xuanqing murmured softly.

With a thought.

"Upload!"

[Upload progress: i%....6%o....20%....40%...80%..99%...100%!]

[Beep- Congratulations, upload successful, Mall increment: Spirit Transmission Main Array Plate (1,000,000)]

[Beep- Congratulations, upload successful, Mall increment: Spirit Transmission Sub-Array Plate (1,000)]

[Beep- Congratulations, upload successful, Mall increment: Spirit Transmission Key (10)]

These three items were not rare and were of a level of acquired magic treasures, so they were successfully uploaded in just a moment.

Aside from the Main Array Plate being more expensive, the prices of the Sub-Array Plate and the Array Plate Key were quite cheap.

Xuanqing thought to himself:

“Purchase ten thousand Sub-Array Plates and one million Spirit Transmission Keys!”

[Beep... -20,000,000 Ingots!]

Accompanied by the deduction of 20,000,000 Ingots, the Game Backpack now contained an additional ten thousand Sub-Array Plates and one million Spirit Transmission Keys.

Looking at the Game Backpack, with its towering stacks of Sub-Array Plates and Keys.

After some consideration.

He opened the Game Mall and looked at a thousand brown Sumeru Bags worth 200 Ingots each.

“Purchase one thousand Sumeru Bags!” Xuanqing murmured.

[Beep... -200,000 Ingots!]

Afterward.

He put the Spirit Transmission Sub-Array Plates and Spirit Transmission Keys into these one thousand Sumeru Bags separately.

“These items are enough for ten thousand Taoist temples and one million cultivators to use, which should suffice in the early stages!”

“Next, return to the Real World and install the Main Array Plate next to the Moon’s Ginseng Fruit Tree.”

Xuanqing thought secretly.

The next moment.

Log out of the game!

Real World.

Inside the Inner courtyard of Qingping Mountain's Taoist temple.

Xuanqing opened his eyes, glanced at the time, and saw that it had only been seventeen hours since he began to tackle the crucial component of opening the human path.

Seven days had passed in the Game World, but not even a day in the Real World.

It is undeniable.

Just the difference in the flow of time between the two worlds can provide him with tremendous help on the road of cultivation.

Pushing open the door.

He looked towards the distant space, and as the golden light on his feet flashed, he disappeared from the spot.

Ground-Gold Light!

Perfect Level Ground-Gold Light, even compared to the Somersault Cloud focused on flying, was no less formidable.

- ??

An hour later.

Moon.

Still, there were pits all over the ground, and a dark, lightless environment everywhere, filled with cosmic radiation like solar wind.

What was different this time.

A giant tree hundreds of meters tall stood on the pit-riddled ground, swallowing and emitting white mist-like Heaven and Earth spiritual energy.

"Hmm...The Heaven and Earth spiritual energy is denser!"

Looking at the surrounding environment.

Xuanqing nodded in satisfaction.

With the help of the Locking Spirit Formation, the area around the Ginseng Fruit Tree for tens of kilometers was enveloped in a white mist-like Heaven and Earth spiritual energy.

Then.

He swung his right hand

And took out a square, water tank-sized box, which was the Spirit Transmission Main Array Plate.

“Begin the formation!”

Xuanqing installed this Spirit Transmission Main Array Plate next to the Ginseng Fruit Tree and took out several energy-filled Spiritual Crystals to install as driving energy.

Hum Hum-

As the waves fluctuated, the surrounding spiritual Qi began to surge and gather towards the black box-like Main Array Plate.

The runes on the box constantly twisted and changed.

After a short while.

The Array Plate with gathering spirit and transmission functions was successfully activated..

Chapter 249: Chapter 239: Launching the Human Path

Practice Plan! 2

As long as the sub-array plate is activated, it will continuously transmit the spiritual qi from the moon to it.

“Oh yes, I need to add a protective formation as well.” Xuanqing pondered.

Although the vast and quiet universe has no life, it does not mean that there is no danger on the moon.

From the large and small pits on the ground... it can be seen that there are countless meteorites hitting the moon on a regular basis.

With the power of the Ginseng Fruit Tree, it naturally did not fear the meteorites, but the main spiritual transmission array could not withstand them.

The next moment.

Countless spiritual crystals appeared in Xuanqing's hands.

He placed the crystals according to five different positions, corresponding to five different rules of Heaven and Earth.

"Metal, Wood, Water, Fire, Earth, the Five Elements of Heaven and Earth... condense!" Xuanqing's hand seals changed and he shouted softly.

In an instant.

Five different colors, red, green, blue... and so on, burst out from the five positions and gathered in the sky.

In the end.

A huge multicolored barrier, with the Ginseng Fruit as the center, enveloped an area of several kilometers around it.

While Xuanqing was on the moon, setting up the array and formation.

Here.

In the Taoist temple on Qingping Mountain, twenty-four Taoists arrived, led by two old Taoists with white beards and ruddy complexions.

This group was...

Elder Jingde and Elder Qianqing, who were chosen by their lord according to his commands, selected twenty-two of the most loyal Taoists from within the sect.

When they arrived at the Taoist temple, they didn't stop... under the astonished gazes of the guests, they went straight into the inner courtyard.

"Please wait, I will call the temple master first!"

Elder Jingde stopped, took out his phone, opened the contact list, and dialed the number at the top marked with 'temple master.'

[Sorry, the number you have dialed is out of service area, please try again later...]

Hearing the prompt tone from the phone,

“The temple master is not in the service area... could it be...” Elder Jingde subconsciously looked up at the sky.

The temple master had said before that he would set up a formation on the moon. Although he did not know the principle behind it, it seemed likely that the temple master had gone to the moon at this moment.

“What’s wrong, Elder Jingde?”

Elder Qianqing asked curiously.

It’s worth mentioning that.

The reason why he called Elder Jingde ‘elder,’ rather than ‘heavenly master’...

This meant that in his heart, the priority of the lord’s Taiji Hall was definitely higher than the Water Blue Star Daoist Sect.

Elder Jingde pointed in the direction of the moon.

“It seems the temple master has gone to the moon!”

Upon hearing this.

Elder Qianqing just nodded faintly, his face showing no surprise.

However.

This remark, when heard by the twenty-two Taoists, caused quite a stir.

They were chosen as confidants because they were all members of the ‘Taiji Hall’ and extremely loyal.

They were very unfamiliar with their mysterious ‘master,’ only knowing that he was very powerful, and that even the previous meteorite incident was him emerging to help.

But they never expected that the mysterious master usually wandered in the universe, perhaps even becoming immortal.

On the moon.

After setting up the protective formation and checking that everything was secure,

Golden light glowed all around Xuanqing.

Earth Leaping Golden Light!

At the Perfect Level, this ground-gold light moved rapidly, and in a short time, it penetrated the atmosphere and returned to the sky above the Taoist temple.

“Eh... Elder Jingde and Elder Qianqing have already brought people over?”

As soon as he returned,

Xuanqing noticed the group of Taoists in the courtyard.

The next moment.

With a flash of his figure, he appeared in the courtyard, standing before the group of Taoists.

The Taoists were dozing off.

Suddenly, a man who seemed too great and dazzling to look at directly, like a radiant star, appeared before them, startling them all.

“Temple master!”

Elder Jingde and Elder Qianqing hurriedly raised their hands in a salute above their heads and bowed.

Seeing this scene.

“Greetings, temple master!”

The other Taoists quickly came to their senses and respectfully saluted.

Xuanqing slightly nodded.

He looked at the twenty-two confused Taoists before him and couldn't help but ask: “Elder Jingde, didn't you inform them of this matter?”

“Master... Not yet!”

Elder Jingde chuckled and explained: “I didn't know whether our master would deem them worthy or not. To avoid trouble, I didn't reveal the truth to them.”

“If the master has decided on the candidates, I will explain to them gradually!”

As soon as these words were spoken.

The Taoists looked at each other in confusion.

“No need for that. Since the two elders have chosen them, I naturally have no reason to distrust them!”

Xuanqing waved his hand.

As for him, it didn't matter whether he trusted these in the real world or not. As long as there wasn't a human extinction, he could handle things easily.

However.

Elder Jingde and Elder Qianqing were very touched by these words and became even more grateful to Xuanqing.

It was the palace lord who had given them this opportunity, leading them on the path of cultivation, and he also had such trust in them.

“I confer upon you all the positions as Law Enforcement Division under the management of Elder Jingde in the Taiji Hall!”

Xuanqing looked at the Taoists.

He thought for a moment.

He took out twenty-two Ginseng Fruits that looked like babies from the Game Backpack.

Then.

He waved his right hand, and each of the Ginseng Fruits turned into twenty-two rays of light, shooting towards the Taoists.

The light entered their foreheads.

The Taoists only felt something being sealed into their foreheads.

Immediately after.

A batch of information appeared in their minds out of thin air. The content was roughly about how to control the Mana in their bodies and two cultivation techniques.

“Ingesting Qi Decision”

“Treading the Clouds”

The former was a cultivation technique for controlling Mana and refining the power of Ginseng Fruits into their own Mana.

As Law Enforcement Division members of Taiji Hall, they would each be in charge of a city's security. Naturally, they couldn't be like ordinary believers, making contributions with incense and trading for a meager amount of Spiritual Qi.

The latter, "Treading the Clouds," was self-explanatory. Its biggest feature was its simplicity and great speed, making it perfect for newcomers.

As for offensive techniques... it was still a bit too early for these novices.

Anyway, as long as they had Mana in their bodies, even if they simply added Mana to their physical bodies, they could still exhibit the power of shattering mountains, stones and piercing steel plates with their bare hands.

After doing all this.

Xuanqing waved his whisk, wrapping it around the Taoists.

"Two elders, wait here for a while. I will take them to the back mountain to get familiar with the Mana in their bodies!"

As soon as the words fell.

Whoosh-

Xuanqing and the twenty-two Taoists wrapped in the whisk disappeared from the inner courtyard.

When they reappeared.

Xuanqing had already brought the Taoists to the back mountain.

After that.

He manipulated the Qi Flower, transformed his whisk into a Talisman Brush, drew several mysterious runes in the void, and casually set up a Boundary Array.

"You all need to practice your techniques well here!"

After saying this, his figure disappeared.

At this moment.

After hearing the master's voice echoing in their ears.

The Taoists finally realized what had just happened and began to explore their own bodies.

When they successfully drew out the Mana within their bodies according to the information in their minds, they were all extremely excited.

“Mana... our master has actually bestowed us with true techniques!”

“Law Enforcement Division... protecting cities, managing cultivator’s security... ‘Ingesting Qi Decision,’... our master is going to initiate the revival of spiritual Qi~”

“Incredible, this is the power of Mana, it’s so...”

The Taoists were moved to tears, sharing the joy and excitement of feeling the Mana within their bodies.

No matter how excited the Law Enforcement Division candidates at the back mountain were.

Here.

Xuanqing returned to the inner courtyard again.

His gaze shifted to Elder Jingde and Elder Qianqing.

“Elder Jingde and Qianqing, I have already planted the seed of Spiritual Qi on the moon. We can now proceed with the Human Path Cultivation plan.”

As he said this.

Xuanqing opened his palm.

A round plate the size of a pot cover and an item resembling a wristwatch floated in the air.

“This is....”

Chapter 250: Chapter 240: The gold in the Sakura treasury should be taken by me, a humble Taoist!

|

“This object is used to receive the spiritual energy of Heaven and Earth, you only need to....”

As Xuanqing explained, he activated the Sub-Array Plate, shaped like the lid of a pot.

Buzz, buzz-

In an instant.

A white fog spread, hovering around the Sub-Array Plate.

This spiritual Qi from Heaven and Earth did not appear from nowhere, rather it was transmitted down as per a preset setting by the moon's Main Array Plate upon sensing the activation of the Sub-Array Plate.

"Is this... the spiritual energy of Heaven and Earth?"

Elder Jingde's eyes widened in surprise.

As he touched the white fog, he felt an extraordinary comfort all over, just like a fish long been dried back in water again.

Off to the side.

Elder Qianqing was the same.

Though they had mastered mana for a long time, it was the first time they had contact with the spiritual Qi of Heaven and Earth.

"Exactly. Just activating the Sub-Array Plate can continuously gather the spiritual Qi of Heaven and Earth."

"One Sub-Array Plate is enough to sustain thousands of people's cultivation practice," Xuanqing said casually.

Following this.

He took the watch on the plate into his hand and continued to explain, "This is the key to turn on the Array Plate."

"To absorb the spiritual Qi from the Sub-Array Plate, one must refine this key. Then, based on the devotion to me, one can absorb equivalent spiritual Qi from the Sub-Array Plate."

Upon hearing this.

Elder Jingde's eyes brightened, eager to try, he said impatiently, "Palace Lord, may I try?"

"Go ahead!"

Xuanqing smiled and nodded, handing the watch to Elder Jingde, then he instructed, "Only a drop of blood is needed to make the key recognize the owner."

The reason for using blood to establish ownership is because the targets here are ordinary people who have never practiced before and naturally don't have mana or the power of the God Soul like cultivators do.

On this side.

Upon hearing the Palace Lord's words.

Elder Jingde promptly extended his right hand, forcing out a drop of blood from his fingertip and dabbing it onto the watch.

In an instant.

A piece of information appeared in his mind out of nowhere.

The information contained a Shenxiao Visualization Technique that describes how to enhance mental power through contemplation.

During this process, absorption of spiritual Qi from Heaven and Earth is a must, otherwise, it could at most make you a little healthier and sharper, but it is impossible to generate mana.

If you want to gain spiritual Qi from Heaven and Earth, you have to burn incense and worship in the Taoist temple. However, he wasn't quite sure how this was done.

"Palace Lord, what is the situation of gaining spiritual Qi by burning incense and worshipping?" Elder Jingde curiously asked.

"Just try it and you will know!" Xuanqing's mouth curved upwards slightly.

Upon hearing this.

Elder Jingde paused slightly, then asked uncertainly, "Where should I burn the incense? Should I go to the main hall?"

"No need, just near this Sub-Array Plate is fine." Xuanqing pointed to the Sub-Array Plate in Jingde's hand as he explained.

"Understood!"

Elder Jingde nodded and put the Sub-Array Plate in his hand on the ground.

Next.

He followed the guidance on the watch, sat cross-legged between....imagining the divine statue of 'Taichi Palace Left Envoy, Thunder God Envoy, and Head of Leiting Zhu Temple' in his mind.

Contemplation... or more accurately, continually hinting to himself, having faith in the God he visualized in his mind.

With Elder Jingde's contemplative prayer.

A wisp of incense belief emerged from the top of his head, which was then absorbed by the nearby Sub-Array Plate.

Once the Sub-Array Plate absorbed the incense, it was immediately activated, transmitting the corresponding spiritual Qi of Heaven and Earth into the Array Plate Key, also referred to as the watch on Elder Jingde's wrist.

After that...

The Array Plate Key radiated warmth, and directly transmitted this spiritual Qi of Heaven and Earth through the wrist and into Elder Jingde's body.

At this moment.

Elder Jingde felt a coolness in his wrist, followed by a familiar energy surging into his body from the wrist.

He, who was in the state of contemplative prayer, unconsciously used his mental strength according to the contemplation method to refine this spiritual Qi from Heaven and Earth.

In this process, most of the spiritual Qi from Heaven and Earth nourished the God Soul, and only a small part was used to strengthen the body and turn it into mana within the body.

Moments later.

"Phew-" Elder Jingde opened his eyes, awakening from the state of contemplative prayer.

Seeing this.

Elder Qianqing on the side, brimming with curiosity, could not help but take a step forward and ask, "Jingde, how does it feel?"

Elder Jingde pondered for a moment, thinking awhile, formulating the words in his mind before starting to explain:

“This ‘Shenxiao Visualization Technique’ is amazing. During the contemplative prayer, I unknowingly completed the cultivation practice.”

“I could feel that there wasn’t much improvement in my physical body and mana. Most of the spiritual Qi from Heaven and Earth was used to nourish the God Soul.”

Upon hearing this.

Xuanqing nodded secretly.

The ‘Shenxiao Visualization Technique’ he invented is primarily a cultivation technique for the God Soul, while physical body and mana are just incidental.

The reason for this.

Is that he found that the incense belief that a living being can contribute, besides their sincerity, is also related to the intensity of their essence, Qi, and God Soul.

And among the essence, Qi, and God Soul, the ‘God Soul’ had the most significant impact, directly influencing the birth of the incense belief.

Therefore.

Xuanqing created this ‘Shenxiao Visualization’, using his divine position as the object of the visualization, to enhance the God Soul power of the believers.

Of course.

Let’s not mention these for now.

His gaze turned towards Elder Jingde..
