

## The Immortal Cultivation Game Has Come True

### #Chapter 451 - 337: Establishing a Teleportation Array among the Nine Large Planets! - Read The Immortal Cultivation Game Has Come True Chapter 451 - 337: Establishing a Teleportation Array among the Nine Large Planets!

Chapter 451: Chapter 337: Establishing a Teleportation Array among the Nine Large Planets!

A thought moved in his heart.

Xuanqing found himself back on the Moon again.

Gazing at the pockmarked surface and various cosmic rays in the air, such a harsh environment would be unbearable for any ordinary person with no cultivation background, even if they were clad in a spacesuit.

To make the Moon suitable for human habitation, the first issue to solve is the cosmic ray one.

“Whether it’s cosmic rays or random meteorites, laying down a large formation will easily solve it.”

Xuanqing pondered in his heart.

Having said that,

The ozone layer that shields Water Blue Star from cosmic radiation can actually be considered as a naturally formed defensive array.

Soon after,

There was no need for excessive deliberation.

An idea had emerged in Xuanqing’s mind and he immediately mumbled in his mind:

“Exchange for a Deus Ex Machina Eight Trigram Furnace!”

[Notification... 102E ingots have been deducted!]

In the twinkling of an eye when the ingots were deducted, a Chaos Level Eight Trigram Furnace had appeared in his game backpack.

“I will use this Chaos Eight Trigram Furnace as the base for the array.”

The corners of Xuanqing’s mouth curved up slightly.

With his current cultivation, even without refining the newly exchanged Chaos Eight Trigram Furnace, it would be more than enough to only use it for the formation.

With the grade of Chaos Eight Trigram Furnace, the array that he could set up on the Moon could easily resist not just cosmic rays, but also solar wind flares. “Qian, Kun, Zhen, Xun, Kan, Gen... Eight Diagrams Isolation Array!” Xuanqing murmured as he waved the whisk in his hand.

Humming-

Centring around the Chaos Eight Trigram Furnace, a ripple spread out in all directions, forming a wave-like pattern in the air.

Then.

The Chaos Eight Trigram Furnace soared into the sky, arriving right at the central area of the lunar sky and rapidly revolving.

Each swift rotation discharges a ray of light that spread out eventually forming a semi-transparent light shield that covered the entire moon.

“Some of these cosmic rays can be used to unlock human potential, don’t need to completely isolate them...”

Xuanqing manipulated the Chaos Eight Trigram Furnace, setting up the things that needed to be isolated like adjusting a computer program.

Quickly.

The isolation array, with the Chaos Eight Trigram Furnace as the array base, was completed.

It is worth mentioning that

This Eight Diagrams Array enveloping the entire moon can isolate harmful cosmic rays while adjusting the climate, and even transform lunar particles into soil suitable for biological reproduction.

“Array-Open!”

Xuanqing exclaimed.

In an instant.

The wind and clouds changed. The array wrapping the moon began to slowly transform the soil on the moon’s surface.

Including Helium-3 on the moon, all substances under the operation of the array were changing towards the properties of the soil layer on Water Blue Star.

Seeing this,

“The minerals on the moon cannot be wasted.” Xuanqing frowned slightly.

The reason why the Great Yan Kingdom could quickly become the most powerful economic and military force on the Water Blue Star in just a few years is largely due to the Controlled Nuclear Fusion technology.

And if one wants to carry out nuclear fusion, Helium-3 is an indispensable element.

However,

With his current cultivation, although he can easily change the origin particle attributes and hand-craft Helium-3, such approach is contrary to his intended purpose.

After all.

The reason for developing the human race on the Water Blue Star is to provide resources for his cultivation with the power of humanity, not to become a nanny for the development of the human race.

Thinking about it this way in his heart.

Immediately,

Xuanqing’s god soul flew out of his body, enveloping the entire moon, and then gathered all the Helium-3 elements...

“Chicken from egg, egg from chicken. Based on these Helium-3 elements, set up a conversion array again. As long as the origin of the moon is still there, it can continuously generate Helium-3-”

A moment later,

Artificial mining platforms were set up on the surface of the Moon. Each mining platform was connected to the lunar ecosystem, and the Helium-3 inside was continuously generated.

Seeing this,

Xuanqing nodded in satisfaction.

In this way, the moon in the future will develop its unique economy centered around Helium-3 elements, becoming one of the human race’s key mining stars.

“After a period of time, people should be able to live on the moon.

“Back to the Water Blue Star first!” Xuanqing took a look at the lunar environment, confirmed that nothing was missing, and disappeared from the moon in a flash.

Qingping Mountain.

After returning to Water Blue Star,

Xuanqing didn’t enter the game. He planned to establish teleportation arrays that could reach the remaining major planets in the solar system here on Water

Blue Star.

Including Water Blue Star, the solar system has a total of eight major planets.

They are:

Venus, Jupiter, Mercury, Mars, Saturn, Water Blue Star, Uranus, Neptune!

As for the ‘Moon’, it’s not counted as a real planet but just a satellite orbiting around the Water Blue Star.

These eight major planets, though they vastly differ in size and area, their mass is similar, putting them on the same level.

It’s worth mentioning that,

Gold, Wood, Water, Fire, Earth, these five major planets, are not named because Venus is all metal or Mars is all fire.

The reasons for these names are simply based on the positions of these planets and the traditional Five Elements and Eight Diagrams of the Great Yan

Kingdom.

With this in mind.

Chapter 452: Chapter 337: Establishing a Teleportation Array among the Nine Large Planets!\_2

“Elder Yang Ying, come to Qingping Mountain quickly!”

Moments later.

Greetings, temple master, what do you command?” Yang Ying arrived at Qingping Mountain and respectfully greeted.

“I want to establish interstellar teleportation arrays between the eight major planets of the solar system. The location on the Water Blue Star will be at the peak of the previous mountain. You should go and make arrangements for evacuation.” Xuanqing commanded.

Upon hearing this,

Yang Ying was shocked.

She never expected that after the moon, the temple master would so quickly decide to expand to other planets, and also include all the planets at once. Truly, their temple master was immeasurable in his divine power and prowess. “Yes, temple master, I shall make arrangements at once.” Yang Ying bowed her head and replied.

As it happened,

At first, she had some other ideas about this mysterious Daoist Priest, Xuanqing.

But as time went by and she witnessed Xuanqing’s divine power time and time again, such thoughts disappeared from her mind without a trace.

One day later.

Moonlight City!

This was a town with the 'Moon Teleportation Array' halfway up the mountain as its center, extending radially in all directions.

Most of the people living here were either workers engaged in lunar mining or their families.

Due to the large-scale lunar development project, there were tens of thousands of workers, their families, and various service staff, making the population increasingly vast.

Over time,

A city formed around the Moon Teleportation Array, complete with various shops, food streets, entertainment centers, and so on.

High above Moonlight City, a figure appeared out of thin air.

Looking down at the bustling city below, Xuanqing couldn't help but say: "People say that those who live by the mountains eat from the mountains, and those who live by the sea eat from the sea. This place, which depends on the moon's teleportation array, has developed into a city."

He didn't plan on building separate teleportation arrays for the remaining seven major planets, but instead intended to modify and add to the existing array that connected to the Moon.

Whoosh-

Xuanqing arrived at the very center of Moonlight City, where the teleportation array to the Moon was located.

Under the arrangements of Elder Yang Ying, Moonlight City, which used to be bustling, was left empty. Only the various large machinery parked around testified to the city's prosperity.

"Let's start with Venus!"

With this thought in mind,

Xuanqing flicked his palm and took out Kongming Stones and materials for the teleportation arrays from his game backpack.

"Refine!"

The materials floated in mid-air, fusing in a certain order and pattern under Xuanqing's immense and imposing power.

Soon,

Two palm-sized, square-shaped teleportation array jade talismans were refined.

Next,

Xuanqing's gaze turned to the platform.

The Moon Teleportation Array was placed on the flat peak after the mountain had been cut away, and its surroundings were covered with various constructions.

Under normal circumstances, it would be difficult to place teleportation arrays around the array due to lack of space.

However,

For a cultivator who had already mastered space and time and surpassed the realm of Daluo Jinxian, this was just a minor issue.

Open!" Xuanqing held a feather duster and flicked it lightly.

The next moment,

Humming-

Accompanied by a mysterious fluctuation, the platform, which was originally only half the size of a mountain peak, seemed to have consumed growth hormones, expanding at visible speed all around.

In the blink of an eye, the Moon Teleportation Array platform expanded several times and continued to grow at a crazy pace.

From one grain of sand emerges a world!

A tiny sand heap could create a world, let alone a platform with the size of a soccer field?

Moments later,

Looking at the expanded space hundreds of times larger, there was a feeling that he couldn't see the edge.

"Good!" Xuanqing nodded in satisfaction.

Now that the space had been expanded, it would be a simple task to accommodate not only one Venus Teleportation Array, but even ten or a hundred of them.

Afterward,

“Go!”

Xuanqing waved his palm, and threw one of the jade talismans for the teleportation array to another location in this space, about one kilometer away from the lunar teleportation array.

As the jade talisman left his palm, it silently merged into the ground like cotton candy meeting water.

Immediately after.

A light ring about the same size as the lunar teleportation array slowly appeared on the ground, marking the halfway point of the construction of this interstellar teleportation array.

Next, they just needed to place the other jade talisman for the teleportation array on Venus and connect the spatial coordinates of the two, allowing for interstellar teleportation.

“Speaking of which, although I, the humble Taoist, have cultivated to the level of communicating with the heavens and the earth, I have never been to other planets in the real world.”

Xuanqing smiled self-mockingly.

He himself had a rather indifferent personality, which in modern terms would be described as a homebody, and after embarking on the path of cultivation, he became even more of a homebody.

Most days, he would either practice on Qingping Mountain or in the game, and besides Water Blue Star and the Moon, he had not been to any other places.

“First, to Venus!”

Venus.

As the second closest planet to the Sun, its surface temperature reaches several hundred degrees Celsius, enough to melt lead bars.

The atmospheric pressure here is also immense compared to Water Blue Star, at 90 standard atmospheres, equivalent to the pressure at a depth of 1,000 meters in the Earth's ocean.

Ordinary people could not survive here even if they wore protective suits.

However.

The material composition of Venus was quite similar to that of Water Blue Star.

This means that, except for special minerals like 'coal', everything available on Water Blue Star can be found on this planet as well.

Whoosh ~

In a valley shrouded in an unknown mist, a Taoist wearing a Taoist robe, walking with a gait, and holding a glowing feather duster suddenly appeared. After arriving on Venus, Xuanqing disperses his God Soul to observe the situation on this planet.

He casually chose a spot.

"Go!"

With a wave of his right hand, he threw the other jade talisman for the teleportation array, which merged into the ground the moment it touched the surface.

Humming-

Accompanied by a wave of mysterious and obscure fluctuations, a teleportation array area quickly appeared on the ground just like previously on Water Blue Star.

Moments later.

The teleportation array lit up, signifying that the teleportation channel between Water Blue Star and Venus was successfully established.

"Now to set up a protective array!"

With a thought.

Xuanqing took a few pieces of Five Elements material from the game backpack and laid down a Five-element Isolation Array on top of the teleportation array to protect the nearby area.

With that.

The matters on Venus were completely settled.

It's worth mentioning that.

Xuanqing had no plans for now to transform Venus. Given the current population of Water Blue Star, it would probably take a long time to fill up the Moon alone.

Moreover, transforming a star into a suitable place for humans to live would require some time and resources. There was no need to waste energy in such places without a good reason.

“Next up is Jupiter...”

Whoosh –

Xuanqing’s figure disappeared from Venus.

When he appeared again, he was already in front of an incredibly massive celestial body.

Jupiter.

This was a gas giant planet, mostly composed of hydrogen with a small amount of helium. Compared to other solid planets, Jupiter was extraordinarily huge. For this planet.

Xuanqing also intended to make it a mining star for the Human Race. Since this planet didn’t even have soil, it was impossible to develop an ecosystem here without major transformations—using it for habitation was definitely out of the question.

Just like with Venus, first set up a teleportation array, followed by protective arrays.

“Five Elements Isolation Array, complete!” Xuanqing’s feather duster flicked. After activating the array, the teleportation array on Jupiter was complete. Now they only needed to return to Water Blue Star to install the corresponding jade talisman, allowing regular people to freely shuttle between Jupiter and Water Blue Star.

With Venus and Jupiter settled.

Follow the formula!

Next, it was Mercury, Mars, Saturn... Neptune, Pluto-the remaining five planets in turn would have teleportation arrays and complementary isolation arrays installed.

## The Immortal Cultivation Game Has Come True #Chapter 453 - 338: From the depths of the sun, a strange call for help? - Read The Immortal Cultivation Game Has Come True Chapter 453 - 338: From the depths of the sun, a strange call for help?

Chapter 453: Chapter 338: From the depths of the sun, a strange call for help?

Two days later-

After activating the final Pluto Five-element Isolation Array.

“Huh-”

Xuanqing took a deep breath and looked at a blazing area, which was the core of the entire star system, and the star that brought light and heat to the whole star system.

To tell the truth.

He was quite curious about the sun in the Real World.

In the Game World, Tai Yin and the sun had the same status, even the size and texture were similar. The Moon was transformed from Pangu's right eye when the heaven was opened, and the sun was transformed from Pangu's left eye when the heaven was opened.

Yin and yang, containing infinite Taoist charm, among which the Sun Star gave birth to the mythical creature 'Golden Crow'.

However.

The Moon in the Real World is quite disappointing. Apart from having Helium-

3, a material needed to unlock the origin of the Water Blue Star, it's not even comparable to a regular planet, let alone a star like the sun.

“The rules of heaven and earth are different in the two worlds. The Game World follows the ‘authority’ rule, while the Real World has different origins for each planet.”

“When I get to the sun, I'll know everything!” Xuanqing's gaze was deep, looking at the blazing star in the distance.

The next moment.

Swish-

Space rippled slightly, and his figure disappeared on Pluto.

The vast and desolate starry sky.

An immeasurable, edgeless, burning fireball occupies the entire sky, containing immense energy that could destroy worlds.

Zizz- Zizz...

With every flicker of this boundless fireball, the space in the starry sky would twist, and the gravity it generated could even change time.

The sun!

This is the sun.

A terrifying star body that holds 99.8% of the total mass of the Solar System.

What kind of concept is that?

It means that the entire star system, the nine large planets, and the vast number of asteroids in-between, combined, only constitute 0.2% of the sun's mass.

How terrifying is that!

Speaking of which.

The sun's lifespan alone is much longer than that of the Primordial World.

Why do I say that?

Because the sun is also known as the Yellow Dwarf Star, with a life span of billions of years, and it has already been born for 4.5 billion years.

A whole 4.5 billion years!

What a terrifying number that is?

If it were called 'Convention' years, one Convention equals 129,600 years, even if it is 130,000 years.

It would still have 34,615 Conventions!

In Journey to the West, Tathagata Buddha once mentioned to Jade Emperor that he had experienced 1,750 reopening of Heaven and Earth, each time spanning 129,600 years.

In plain words, that is only 1,750 Conventions!

Moreover, Jade Emperor's so-called cycling through Jie was not in the Primordial World, but in the Three Thousand Small Worlds incarnated from thousands of worlds.

These times seem enormous... but compared to the sun's 4.5-billion-year lifespan, they seem so insignificant.

Moreover, the Solar System is just an inconspicuous star system in the Milky Way Galaxy.

That's why Xuanqing has always believed that although the Water Blue Star in the Real World Universe is quite mediocre, the whole Real World Universe is at least on par with the Primordial World, or even surpassing the Primordial World.

At this moment.

Xuanqing had already arrived not far from the sun.

The moment he saw the sun, the first thought that came to his mind was...

Big!

Extremely big!

Infinite, so to speak. Even his eyes, which had surpassed Great Luo, could not measure the size of the sun.

Even.

His God Soul perception couldn't even sense how gigantic the sun was.

The size of one sun is equivalent to 1.3 million Water Blue Stars. Note, it's 1.3 million'.

What kind of concept is that?

All the so-called Three Thousand Small Worlds in the Primordial World combined probably aren't as big as one sun.

Such a gigantic sun.

Before getting close!

Xuanqing had already felt an incredibly violent force.

This force was not the scorching heat of the sun, but the immense gravitational force. The gravitational force generated by its huge mass was strong enough to influence the rotation of the entire star system.

As for the light and heat on the surface of the sun, they were merely byproducts of the massive mass collapse.

“What a terrifying sun!”

Xuanqing took a deep breath.

While feeling shocked, a sense of relief also rose in his heart.

Fortunately!

Fortunately, he didn't recklessly break through space to travel to the sun when he first mastered some spatial power.

Keep in mind.

If he had rashly entered the sun after merely mastering space development, his fate... would have been a dead end.

Even tearing space to escape would have been impossible.

Because he discovered that around the sun, due to its immense gravity, space had become incredibly heavy.

It's easy to breach space from other places into the vicinity of the sun, but it's incredibly difficult to leave the sun's side by tearing space.

Gravitation!

One of the most powerful forces in the universe, so powerful that it seems unreasonable.

Bear in mind.

No matter what kind of power, once it reaches a certain level, there will be an upper limit. At that time, no matter how hard you try, this upper limit cannot be broken.

Gravity, on the other hand, is different.

From something as small as an apple to something as large as a sun, all objects have their own gravitational forces. And as long as they are big enough, gravitation can increase infinitely, and even eventually collapse into a black hole where light cannot exist.

Chapter 454: Chapter 338: A strange cry for help coming from deep within the sun?\_2

“It’s hard to imagine, is this... the great power of the universe?”

Feeling the power within the sun.

Xuanqing’s expression is dazed, and his heart cannot calm down for a long time.

After a long time.

Xuanqing finally comes back to his senses from the shock of the imposing sun.

I must go in and have a look.

This is the only thought in Xuanqing’s heart at this moment. Who wouldn’t be longing to face such a grand existence?

To die in the evening would be no regret for one who has heard the Truth in the morning!

Moreover.

He can feel that although the sun is huge, and the power inside is so vast that it seems illogical, but it is extremely stable and won’t explode for no reason.

This is a star that is in its prime, only more than four billion years old, very safe!

“Hoo- Swallowing Sky Tree Seed Barrier!”

Xuanqing takes another deep breath.

With a move of his thoughts.

His third eye opens on his forehead, and the Swallowing Sky Tree Seed inside rotates and blooms, forming a shield that wraps around his whole body.

After all.

The Real World isn’t a game. If you die, you really die, and there’s no such thing as resurrection after death.

After taking sufficient protective measures.

He takes a step forward!

Whoosh-

His feet touch the surface of the sun.

In his eyes is a boundless sea of fiery red; there is no soil beneath his feet, only aether formed by a concentrated energy.

“Hiss... In that case, isn’t it correct to say that the entire sun can be considered a whole... Spiritual Crystal?”

Xuanqing takes a cold breath, feeling the energy under his feet, and his whole being is dumbfounded.

Put it in another way.

If it was in a fantasy cultivation world, this sun would be equivalent to... a whole Spirit Stone, and it would also be a top-grade Spirit Stone with the most abundant energy.

No wonder.

No wonder that such a sun can illuminate the entire galaxy, and not to mention its immense gravitational force, the energy contained within the sun itself is unimaginably vast.

While being shocked.

An excitement emerges in Xuanqing’s heart.

Facing such a huge sun, a crazy thought arises in his heart.

“If the sun’s essence is completely absorbed, then my ‘Swallow Heaven Saint Art’....”

Xuanqing’s body trembles.

According to the essence he absorbed on the moon, just absorbing a single moon’s essence allowed his Swallow Heaven Saint Art to evolve from the Heaven-swallowing Tree Seed stage to the Devouring Heaven Tree Seedling stage.

If he devours the entire sun, wouldn’t it be easy for him to practice to perfection, transforming into the final Swallowing Sky Tree, condensing countless Swallowing Sky Fruits...

Ultimately... then easily achieve sainthood with sheer power, dominating the primordial world, whipping Hong Jun, devouring the sky and swallowing the earth, and being an invincible madman spinning around and exploding the heavens?

Indeed.

The greatest opportunity lies in reality itself.

Just one sun possesses such a huge amount of original energy.

And in the entire Milky Way galaxy, the number of stars like the sun, if not understood by people, would absolutely overturn their cognition!

One hundred billion-Four hundred billion!

That's right.

Like the majestic sun, the entire Milky Way has a staggering number of stars, ranging from one hundred billion to more than four hundred billion.

Isn't that terrifying?

Subsequently.

Xuanqing leisurely strolls on the sun.

Because of the sun's huge mass and gravitational force, the surrounding space has been affected, and the rules of space have lost their effect here, so he can only walk in the form of physical flight.

However.

Just about an hour later, Xuanqing stops in his tracks.

As far as the eye can see, it is entirely fiery red. The entire sun is a gigantic energy body. And because its gravitational force and energy are simply immense, besides the sun's original mass, there is nothing else here.

"The entire thing is made up of energy bodies, making this sun quite pure." Xuanqing shook his head, thinking to himself.

After understanding the surface of the sun.

Xuanqing could only give up on his idea of setting up a teleportation array here.

After all.

The sun's surface is not to mention the immense gravity, but its huge mass' by-products... light and heat are not something ordinary humans can endure.

Not to mention ordinary humans, even ordinary immortals from the Primordial World would be unable to survive on this sun and would be crushed alive by the immense gravitational force.

"Let's take a look inside the sun!"

After having this thought, Xuanqing controlled his physical body, slowly sinking into the sun's surface.

The pure energy bodies that make up the sun did not pose any hindrance to him as he sank.

As he went deeper, the temperature and energy increased correspondingly.

However,

compared to the relatively high temperature, what is even more terrifying is the massive gravity and endless repetitive scenes brought about by the enormous mass.

The sun is vast.

It has a diameter 109 times larger than the Water Blue Star and a volume 1.3 million times greater.

If he could use 'space' ability, even if it was enormous, he could arrive instantly by tearing space directly.

Unfortunately, the immense gravity generated by the sun's colossal body causes all spatial rules to lose their effects, and even... Time rules do not work at this place either.

He didn't know how long it took.

As he went deeper, he still couldn't see the end, let alone reaching the central point even when he dived down to 100 million meters.

It is merely because Xuanqing has the 'Chaos Morality Holy Body' that his physical body and God Soul are incredibly powerful.

If an ordinary Daluo Jinxian or an ordinary Half-step Saint Early Stage were here, they would probably be injured facing such immense gravitational pressure.

Xuanqing, on the other hand, didn't have the slightest damage on him, and even his clothes were intact under the protection of the Swallow Heaven Saint Art.

You should be aware that the clothes he is wearing are just ordinary magic treasures which show the power of the Swallow Heaven Saint Art.

This is just the first level of the Swallow Heaven Saint Art. When it reaches the later stages of the Heaven-swallowing Tree Seedling, the Swallowing Sky Tree, or the Swallowing Sky Fruits, it's impossible to imagine the power it will possess.

Nevertheless,

although he is confident that he won't be hurt if he continues diving, the tedious diving without any difference is quite boring.

What's even more important is,

according to scientific calculations, the sun's diameter is a whopping 1.4 billion meters.

That is to say,

the 100 million meters he has dived into is merely a fourteenth of the sun's diameter.

"Forget it, I will come back to explore the depths of the sun's interior when I have cultivated the next level of the Swallow Heaven Saint Art."

Xuanqing shook his head.

Just as he was about to turn back,

an accident occurred!

"Save me, Ancient Archon!" A voice suddenly resounded directly in his mind.

The voice sounded as if it were a faint buzzing of a mosquito.

"Hmm?"

Xuanqing's hairs stood on end as his heart was filled with an overwhelming sense of impending doom, as if the owner of the voice were some extremely terrifying existence.

You should know that,

he is not an ordinary mortal now, but a being beyond Great Luo, a cultivator at the same realm as Half-step Saint Early Stage in the Primordial World.

With such a cultivation level, he won't have any illusions. Since he's gotten this feeling of imminent danger, it means that if he continues, he may indeed face a threat to his life.

The owner of this voice must be even stronger than his cultivation level to give him such a feeling.

“Who...is the senior playing a trick on me?”

Xuanqing deflected himself effortlessly, steadying his position and scanning his surroundings with caution.

While doing so,

his divine soul spread out, with his powers operating at their limits, trying to find out who had produced the voice.

Unfortunately,

the faint whisper seemed as if it had never existed, and no matter how hard he searched, it did not resound again.

Save me... Ancient Archon?

Chapter 455: Chapter 339: Achieve Water Blue Star Federation within one year!

Xuanqing frowned, using his brain to analyze the meaning of these two words. With his wisdom, he quickly gained related information from these two simple words.

Firstly: Save me?

Some living being must be in danger and sending out a call for help.

But the key point is, the voice he heard earlier brought him a sense of fatal threat, proving that the opponent must be stronger than him.

Such a powerful mysterious creature, yet it needs to ask for his help?

Does this mean that within this sun, there is something even more terrifying than the master of that voice?

And, the master of that mysterious voice, their following words... “Ancient Archon”?

There are two possibilities.

One is that the creature has not discovered Xuanqing and is merely calling for help to a being called “Ancient Archon”.

The other possibility is quite terrifying upon further thought.

That is... the mysterious creature has discovered him, Xuanqing, and has mistaken him for the "Ancient Archon," seeking his help through the message. Regarding these two outcomes.

Xuanqing's heart leaned more towards the latter.

This mysterious creature definitely discovered his existence and regarded him as the Ancient Archon, calling out for his help.

After all.

The voice resounded directly in his mind, and he hadn't noticed it at all.

If the mysterious creature had discovered him, there could be many meanings behind the term "Ancient Archon".

It could be that "Ancient Archon" represents a power, or maybe "Ancient Archon" is a person.

And Xuanqing... must have some similarities to this Ancient Archon, which is why the other party mistook him as the Ancient Archon, either the person or the force.

Seemingly having countless thoughts in his mind and analyzing many possibilities, all of this happened in a split second.

The next moment.

"We can't stay here any longer, retreat!"

Without any hesitation, Xuanqing used the full power of the Heaven Devouring Saintly Art, turning himself into a stream of light and rapidly escaping from the scene.

If he died in the real world, he would really be dead.

As a seeker of the Dao, one must maintain a heart of reverence. If curiosity arises towards everything, even ten lives would not be enough.

Moments later.

At a distance of billions of kilometers from the sun, a figure rushed by, precisely the fleeing Xuanqing.

"Space gravitation has weakened, I can use space travel now!"

Xuanqing was overjoyed.

The space here was still affected by the sun, but with his current cultivation, he could barely exert the power of the spatial laws.

Right after.

Zila-

A distorted space was torn open as he stepped into it, completely disappearing and distancing himself from the terrifying and mysterious sun.

In a strange, uncharted starry domain outside of stellar coverage range.

Dark, silent, the entire universe seemed to be like an invisible soul-devouring mouth, ready to consume your body and soul at any time.

Humming-

At this moment.

The silent and dark starry domain distorted subtly as a Taoist wearing a Taoist robe and stepping with gait suddenly appeared.

The duster in the Taoist's hand emitted a faint light, appearing like a lone boat in the tumultuous waves in this quiet, dark universe, so very small.

"Phew-"

"What kind of being was that mysterious voice?"

Xuanqing maintained his vigilance while silently pondering in his heart.

That's right.

This Taoist was Xuanqing, who had escaped from the sun by tearing apart space and traveling through it.

After fleeing the sun, he did not choose to teleport directly back to Water Blue Star but instead entered an unfamiliar starry domain randomly.

He did so mainly because he was worried that the mysterious creature might track him down and go to Water Blue Star, which would be a disaster for humanity on Water Blue Star.

"I originally thought that there wouldn't be any supernatural mythical beings in the real world, but I never expected that within the sun, there would be such a mysterious existence."

Xuanqing murmured involuntarily.

He didn't expect that not only were there supernatural beings in this real world, these supernatural beings were also so powerful.

"I can't go back to the Water Blue Star for the time being, so I'll wait here for some time."

To be cautious.

Xuanqing planned to stay in this starry domain for a while, observing any unusual situations before deciding whether he should return to Water Blue Star.

From then on.

Xuanqing remained in this starry domain, always cautious and ready to teleport away at any moment.

If it became necessary, he would abandon his physical body in this reality and hide in the game.

Of course, unless he was truly facing life and death, he would not give up so easily, as the real world was the root of his existence.

As such.

In the blink of an eye.

Five months later.

During this half-year, he didn't relax for a moment, keeping his energy tightly wound and alert for the mysterious creature from before, but there were no abnormalities.

There were no traces of the mysterious creature from before either.

Xuanqing speculated in his heart.

The mysterious being was possibly trapped in the sun and unable to escape, otherwise, there would have been movement during this half year.

"Hiding is not a solution. Only by enhancing my own strength can I find a real solution!"

Xuanqing pondered inwardly.

He had spent half a year in the real world, from setting up the teleportation array, exploring the sun, and finally escaping and hiding in this starry domain.

Chapter 456: Chapter 339: Achieve Water Blue Star Federation within one year! \_2

For a full half a year, even if there was no growth in daily income, according to the previous 3.5 billion incense per day, he would have more than 60 million.

With those over 60 million, plus the over 10 million incense on his body, it was enough to use the time acceleration divine power to refine the essence of the entire moon.

According to the previous progress, as long as the essence of the moon is completely refined, his “Heaven Devouring Saintly Art” will be able to metamorphose from the Heaven-swallowing Tree Seed, into a Devouring Heaven Tree Seedling.

More importantly.

He planned to speed up the power development of the Taiji Hall after returning to Water Blue Star, and quickly gather enough incense for practice.

Previously on Water Blue Star in the Real World, he had not encountered any beings with supernatural powers, so he had been indifferent to the matter of practice.

But now that he had encountered the terrifying creature on the sun, the situation was naturally different, and he needed to quickly increase his strength.

With that in mind.

Xuanqing glanced around one last time with his God Soul, and after not finding any abnormalities.

Swish-

The space slightly fluctuated, and his figure disappeared into this star area.

Water Blue Star.

Qingping Mountain.

Xuanqmg’s figure appeared in the inner courtyard of the Taoist temple.

“You all, hurry to Qingping Mountain!!”

After returning to Qingping Mountain, the first thing he did was inform all of his followers to gather at Qingping Mountain.

Moments later.

Whiz- Whiz...

Accompanied by ripples in space, everyone of Taiji Hall arrived at the inner courtyard of the Taoist temple on Qingping Mountain.

“Greetings, temple master!”

“Greetings, Sir!”

Yang Ying, Elder Jingde, Elder Qianqing, Huai Qingyun, and Cang Qingyu arrived in the inner yard and bowed with pinching gestures.

“Um!”

Xuanqing slightly nodded, then looked at his followers with a solemn expression, and said:

“Everyone, during my recent establishment of teleportation arrays on the various planets, I encountered a very serious matter.”

A serious matter?

Everyone was shocked when they heard this.

So far, no matter what happened, their temple master had always been calm and indifferent.

They had never seen such a solemn expression on their temple master’s face, nor had they heard such a serious speech from him.

Then.

Xuanqing continued, “After I had set up the teleportation arrays between the nine planets, I had nothing to do, so I decided to go to the sun for some exploration.”

???

To the sun...for exploration?

Everyone was dumbfounded.

Although this was the first time they had ever heard of their temple master going to the sun for exploration, it was something they had never imagined before.

More importantly, it seemed that... their temple master had encountered danger on the sun?

Just as they were thinking about this, the next words they heard made their hearts race uncontrollably.

“While exploring the sun and diving a billion meters deep into it, I encountered a mysterious creature.”

Xuanqing’s face became more solemn, and after taking a deep breath, he said, “This creature’s power is even greater than mine!”

Boom-

As soon as these words came out!

It was like a thunderclap bursting in everyone’s minds.

Could it be...there was a creature more powerful than their temple master, living a billion meters deep into the sun?

“Temple Master, did you come face-to-face with that creature?” Elder Jingde asked hesitantly.

Everyone else also had their ears pricked up, looking at their master with rapt attention.

“No!”

Xuanqing shook his head, without hiding anything, and stated directly, “After I found that creature, I thought it was not appropriate to stay in the same place for a long time, so...”

In the end, I also stayed in that unfamiliar star area...”

He recounted the entire incident from beginning to end.

In the end.

Xuanqing expressed his guess, “According to my humble judgment, that being should be trapped in the sun, unable to break free.”

“But what I’m worried about is that although the creature cannot break free at the moment, it doesn’t mean it will never be able to break free.”

“If it escapes and takes a tour of Water Blue Star, I’m afraid...”

Though he didn’t finish his sentence,

Everyone understood that if this creature was more formidable than their palace lord and came to the Water Blue Star with malicious intent, perhaps only their palace lord would be able to survive and escape, leaving the rest of the human race on the entire Water Blue Star behind.

Even they would have to die, because although they now possess the ability to travel through space, this ability is provided through their authority, and once they leave Water Blue Star or the Moon's range, their space capabilities would fail.

"Sir, what should we do now?" Huai Qingyun couldn't help but ask.

Hearing this,

Xuanqing looked down at the foot of the mountain and said solemnly, "In order to forge iron, one must be tough oneself; it is time for Taiji Hall to develop rapidly."

Elder Yang Ying, Elder Jingde, and Elder Qianqing, I entrust you with a task!" "I give you one year's time for Water Blue Star to achieve federal unity, and in every state and city of Water Blue Star, there should be a Taoist temple of Taiji Hall!"

"Do any of you have any difficulties?" Xuanqing asked with a stern voice.

Upon hearing these words,

They looked at one another and thought that the mysterious creature was indeed very powerful; otherwise, their aloof palace lord would not be so concerned.

After some thought,

Yang Ying, who was in charge of worldly affairs, said, "My lord, with the influence of our Taiji Hall, we could make it happen, but during the process, I'm afraid there will be a great deal of death and injury, what do you think?" As the person in charge of worldly affairs for Taiji Hall, she was well aware of the current situation.

Although the 'Controlled Nuclear Fusion' project made Great Yan Kingdom the most economically advanced and militarily powerful country on the Water Blue Star,

due to the existence of 'nuclear weapons', everyone tacitly maintained peace with each other, with the world leader changing from the Western Bird Country to the Eastern Great Yan Kingdom.

Under such circumstances, if the Water Blue Star wants to achieve federal unity, apart from the support from a small number of impoverished countries, it is likely to face opposition from the whole world.

At this moment,

After hearing Yang Ying's words,

Xuanqing couldn't deny it, but then said lightly, "I will erase all the nuclear weapons on Water Blue Star; as for the small-scale deaths and injuries..."

Let them be. If that creature in the sun escapes, it won't be just death and injury."

Everyone nodded in agreement.

Indeed,

Such a powerful creature would not even consider humans as ants.

Moreover, it's not just about humans; even a planet like Water Blue Star is insignificant compared to the sun.

I'm afraid that the creature would only need to sneeze, and not only would humanity become extinct, but the entire Water Blue Star would be wiped out, and then who would talk about death and injury?

"Go, I want to see the entire Water Blue Star, centered on the Great Yan

Kingdom, achieve real federal unity within a year."

"We obey your order!"

The three of them bowed and turned into a breeze, disappearing on the spot.

After arranging the tasks for the three,

Xuanqing then looked at Huai Qingyun and Cang Qingyu, and commanded, "One of you is the Lord of the Underworld, and the other is the Emperor Haotian."

"While Elder Yang Ying, Elder Jingde, and Elder Qianqing are working on their tasks, you'll have to monitor the entire Water Blue Star."

"If anyone obstructs Taiji Hall's affairs, Qingyu, you will punish them with divine retribution, and after their death, their God Souls will fall into the Netherworld. Qingyun, you will give them two bowls of forgetting potion, erase their True Spirit Marks, and send them directly to be reborn."

"Yes, sir!"

Huai Qingyun and Cang Qingyu complied seriously with their instructions.

And so,

The tasks for all the followers had been arranged.

At Qingping Mountain,

The usual calm was restored once more.

“A full half-year’s time has passed. Presumably, I have accumulated enough incense to allow me to accelerate the devouring of the Moon’s origin.” Xuanqing looked at the sky as if seeing through the thick atmosphere and directly at the desolate moon in the starry sky.

The next moment,

“Heaven Devouring Saintly Art.”

Accompanied by a low roar, his third eye opened!

Chapter 457: Chapter 340: From this day on, there will be no more nuclear weapons in the world!

The Heavenly Eye opened.

A diamond and oval alternating seed in emerald green rotated and floated, emitting a mysterious aura in it.

“Incense... gather!” Xuanqing operated the Devouring Sky Tree Sapling.

He had already refined the Water Blue Star into a heaven-swallowing tree seed, and he could mobilize the power of the entire Water Blue Star with just a thought.

Within just an instant, the power of incense fire from the entire Water Blue Star gathered in front of him.

The dense incense power made the space around Qingping Mountain slightly distorted.

Every individual human’s existence is weak, but when united under a common belief, they can generate shocking power.

“Recharge!”

[Ding...+68Z,2 billion Ingots!]

Over 6800 billion Ingots?

Xuanqing calculated in his heart, half a year had passed since the last harvest of his incense fire.

So on average, every day in this half year, he received 38 billion Ingots. The daily income has increased by three billion compared to before.

Immediately after...

With a thought...

“Open the personal panel!” Xuanqing silently commanded in his mind.

[Name]:Xuanqing

[Physique]:Chaos Morality Holy Body

[Grade]:Master of the Primordial Beginning

[Cultivation]:Swallow Sky Tree Seed (51%)

[Cultivation Method]:Heaven Devouring Saintly Art

[Divine Ability] :XXX

[Ingot]:7932E

On his character panel, he originally had more than 1000 billion, plus the current 6800 billion, amounting to a total of more than 7930 billion.

“Almost to 8000 billion, even if I devour the moon, and after repairing the gravitation of the moon, there would still be a huge surplus.”

Indeed.

Even though the acceleration consumes a lot, it won't take long to accumulate enough in front of such a large population on the Water Blue Star.

Head to the moon, assimilate the original energy, and cultivate!!

Having made up his mind.

Xuanqing flicked the fly-whisk in his hand, transformed into specks of stardust, and slowly disappeared in mid-air.

The moon.

The original pits and bumps were all gone.

Under the protection of the Five Elements Formation, the harmful rays in the universe were completely blocked out, the restructuring done by the origin power had made this planet lush with life and vibrant with nature's song.

Half the area of the entire moon was already enough for humans to migrate and survive.

However...without Xuanqing's command, even though the moon was now habitable, it was still under lockdown, with no one living on it.

This moment.

Whoosh-

Space slightly swayed.

Xuanqing's figure appeared on the moon, then he immediately sat down cross-legged without any pomp.

"Begin the cultivation!"

As the "Swallow Heaven Saint Art" started to operate, his third eye opened, the swallowing sky tree seed within it extended an imaginary vine root, and drilled into the moon.

Compared with the beginning of cultivation, now that the progress has reached 51%, the vine root used for absorption of origin had grown incredibly thick.

Buzz-

The far-located origin power was absorbed by the vine root and nourished the swallowing sky tree seed.

"Use two hundred years of time acceleration on the Swallowing Sky Tree Seed!" Xuanqing silently commanded.

At the beginning, his swallow sky tree seed could only withstand a hundred years. But after the cultivation progress reached 51%, it could withstand a time acceleration of two hundred years at one go.

[Ding...-20E Ingots!]

As the ingots were deducted,

The original huge, semi-transparent, and imaginary vine root rapidly became even more swollen.

As if simulating a water pump, it crazily absorbed the origin power of the moon.

Inside his third eye, the Swallowing Sky Tree Seed shivered slightly. Under the nourishment of the moon's origin, it transformed at a speed visible to the naked eye.

After a few moments.

The time acceleration effect of two hundred years had ended.

The moon, due to the loss of the origin power, had lost about 2 zettatons in weight. Its orbit also slightly drifted towards the Water Blue Star.

If left unchecked, the end result would be the moon crashing into the Water Blue Star.

Of course, Xuanqing wouldn't let this happen.

With a thought...

"Purchase two zettatons of moon matter!"

[Ding...-2E Ingots!]

"Take it out!"

Xuanqing took out these two zettatons of moon matter from his game backpack.

In an instant-

The sky was completely eclipsed.

How much is two zettaton?

Ten million is a billion, and a hundred million billion is a zettaton.

"Merge!"

Xuanqing whispered in a low voice.

This massive thing, as if it were a small toy, was easily and gracefully merged into the moon, filling the moon's origin.

It's worth mentioning...

Origin-matter, these are two completely different things.

To illustrate...

The matter of the Water Blue Star mostly consists of the earth's core, mantle... as well as the surface layer's rocks and soil.

But the origin of the Water Blue Star is the power generated from the smallest atomic fission or fusion, which is its origin power.

The two are somewhat related but are completely different.

Back to the moon story, after getting replenished with two zettaton of matter, it returned to its original mass, and the orbit also recovered to its previous state.

After finishing all these steps.

Right at that time.

The Swallowing Sky Tree Seed within his third eye had recovered from the stimulation of the time acceleration and was ready for the next round of time acceleration.

"Use two hundred years of time acceleration on the Swallowing Sky Tree Seed!" Xuanqing silently commanded again.

[Ding...-20E Ingots!]

After a few moments.

The time acceleration effect ended.

Just like the operations before, he purchased two zettaton of moon matter from the Game Mall to replenish the matter the moon lost due to origin absorption.

Chapter 458: Chapter 340: Starting today, there will be no more nuclear weapons in the world! \_2

Just like that.

In the continuous process of time acceleration and replenishing lunar materials, time slowly elapsed.

In the blink of an eye, another month passed.

This day.

Xuanqing sat cross-legged, with his eyes tightly closed.

His body was enveloped in the rich aura of World Dao Rhyme, and the Heaven-swallowing Tree Seed in his third eye had even developed tiny cracks.

It was not a problem with his practice, but rather the Heaven-swallowing Tree Seed was about to break out of its shell, transforming into the Devouring Sky Tree Sapling.

His cultivation of the Swallow Heaven Saint Art had reached 99-9% of the seed realm.

Only after one last time acceleration would the seed break out of its shell and transform into the Devouring Heaven Tree Sapling!

“Huh~”

Xuanqing opened his eyes and silently muttered in his heart:

“Apply two hundred years of time acceleration to the Heaven-swallowing Tree Seed!”

[Beep...-20E Ingots!]

The moment the ingots were deducted.

Buzz-

The entire illusory vine inflated rapidly, turning red like crazy, as it absorbed the Origin Power of the Moon.

Crack...-crack...

It seemed like something was about to break, the sound echoed inside his third eye.

You could see the cracks on the Heaven-swallowing Tree Seed getting bigger and bigger, and even through these cracks, you could see the small, green sprouts inside.

Moments later.

Boom-

It came out.

A translucent, green sprout broke through the oval seed and blossomed its enchanting dense Dao Rhyme into the world.

Powerful, incredibly powerful!

Xuanqing stood up, feeling the power within him, his eyes filled with intoxication.

The Swallow Heaven Saint Art that he cultivated, had no twists and turns, only straightforward power.

The so-called proving oneself through force was exactly like this!!

“Compared to before, I’m at least ten times stronger!”

Xuanqing whispered to himself.

As the saying goes, the path of cultivation is one realm after another, and each breakthrough is a transformation of one’s life level.

“So, in terms of power in the Primordial World, I now possess a mid Quasi-Saint level of strength?”

Xuanqing thought in his heart.

According to the extrapolation of Swallow Heaven Saint Art, just after condensing the Heaven-swallowing Tree Seed, it was equivalent to entering Quasi-Saint.

Once the Heaven-swallowing Tree Seed transformed into a Heaven-swallowing Tree Seedling, it would be equivalent to the mid Quasi-Saint level in the Primordial World.

When the Devouring Heaven Tree Seedling matures and becomes the real Devouring Heaven Tree, it will be equivalent to the late Quasi-Saint level in the Primordial World.

Finally.

When the mature Swallowing Sky Tree condenses the first Swallow Heaven Fruit, it will directly prove Quasi-Saint Perfection, leaping to the peak of the fighting power in the Primordial World.

“It has been another month since my closed-door cultivation breakthrough, I wonder how my followers are doing...”

Thinking thus,

Xuanqing decided to return to Water Blue Star.

Of course, before returning, he would definitely have to replenish the mass lost by the Moon as a result of this final 200-year acceleration.

After doing all this, his figure transformed into countless twinkling stars, disappearing on the surface of the Moon.

In the inner courtyard of Qingping Mountain, Great Yan Kingdom.

Whoosh-

Xuanqing appeared in the room, then his God Soul permeated out of his body, enveloping the entire Water Blue Star.

In an instant.

An enormous stream of information, carrying the dynamic movements of over seven billion beings, surged into his mind.

If it were him before the breakthrough, he would need to use some filters. Otherwise, facing such a huge information flow would be difficult.

But after transforming into the Devouring Sky Tree Sapling, he felt very relaxed and instantly filtered out the information he wanted from this massive stream of information.

“These bird countries and Western financial groups really don’t know how to appreciate kindness!”

Just as he said!

Through his divine sense, he discovered that in a certain place in the West, a group of old men half-buried in the ground were discussing how to deal with Taiji Hall.

Even... one of the old men proposed at the meeting to use a nuclear bomb as a test to see the reaction of Taiji Hall after the explosion of the nuclear bomb.

Nuclear Bomb?

Such a thing was merely a toy that he could easily deal with when he entered the Integration of Void Stage, achieving an immortal body and stepping onto the path to Fairyland.

“First, I’ll deal with all the nuclear bombs on Water Blue Star to avoid having people constantly seeking death!”

Xuanqing’s gaze was cold.

During the last meeting with the Taiji Palace Five Members, he had already said to let his subordinates handle it and he would deal with the nuclear bomb issue on the entire Water Blue Star.

Just as he was about to do something.

Suddenly.

At the western side he saw with his God Soul, there were several old men discussing how to deal with Taiji Palace...

Like dumplings in a pot, they fell one after another, spitting out white foam from their mouths. With their eyes rolling back, they died instantly.

“Sir, you’re out of closed-door cultivation, and those people, I have already killed. You won’t blame Qingyun, will you?”

A childish voice sounded.

Following that.

A child in a black dragon robe, emanating a chilling divine aura, stepped out from the rippling space.

“Hehe, well done!”

Xuanqing reassured with a smile, patted the child’s shoulder, and encouraged him.

Compared to the child in Primordial World who serves the powerful immortal beings, he was more satisfied with Cang Qingyu and Huai Qingyun.

“Hehe- Thank you for the praise, Sir!” Huai Qingyun was delighted in his heart. To him, receiving Sir’s appreciation was much more meaningful than anything else.

“I can rest assured with you watching over things.”

Xuanqing nodded and praised him once more.

Of course.

Although those people had already been dealt with by Huai Qingyun, he still intended to eliminate all nuclear bombs on Water Blue Star.

He had already refined Water Blue Star into a Heaven-swallowing Tree Seed and would not allow anything that could harm it to exist.

Moreover, aside from the Great Yan Kingdom that could use the ‘nuclear energy’ Origins, no other countries on Water Blue Star were allowed to possess nuclear energy to prevent incidents like the Gundo occurring again.

“I plan to clean up the nuclear energy on Water Blue Star. It will likely be chaotic for a while. You must watch over everything carefully for me!”

Xuanqing commanded.

Upon hearing this.

Huai Qingyun straightened his body and said resolutely, "Rest assured, Sir. I will protect our homeland with all my might and will not let anyone destroy our home!"

For him, his former home was just the Qingping Temple, but now his home was the entire Water Blue Star. Protecting his homeland and easing Sir's worries was his lifelong belief.

After Huai Qingyun left.

Xuanqing came to the top of the mountain, overlooking the countless lives below with an unfathomable gaze.

From today onwards, weapons like 'nuclear bombs,' which transcended human technology, would never exist on Water Blue Star again, and the entire structure of the Water Blue Star would change fundamentally.

"Swallow Heaven Saintly Art!" Xuanqing whispered softly.

With the activation of the cultivation technique, his Heavenly Eye opened on his forehead, revealing a tender, emerald green sprout within.

The next moment.

Through the Devouring Heaven Tree Seedling, Xuanqing connected to the origin of the entire Water Blue Star, allowing him to reshape Water Blue Star at will.

Xuanqing's thoughts flickered.

"Extinguish!"

Water Blue Star.

At 6 a.m., 20 minutes, and 43 seconds.

An astonishing event took place on the entire Water Blue Star. All countries possessing 'nuclear capabilities' lost their effect at the same time.

At a nuclear weapons launch base.

"Oh no, it's not working! The reactor has stopped!"

"What?"

Everyone at the base was in chaos, searching for the cause. The person in charge even took out his phone to call his superiors.

Doot... Doot doot doot...

But no one answered, and the person in charge was dumbfounded.

Unknown to him, the number he was dialing was a private number that had never been unattended before. Yet it was unreachable at the time of this major incident.

What the staff didn't know was that the heart of their BBOS had already stopped with the nuclear reactor and would never beat again.

Not only in Bird Country.

All nuclear reactors in the entire Water Blue Star, except for the Great Yan Kingdom, disappeared.

Even within the Great Yan Kingdom, only controlled nuclear fusion for energy purposes was still available. Nuclear bombs for war had also lost their effectiveness.

Chapter 459: Chapter 341: Deduction of Combat Techniques!

Apart from those old men in Bird Country who controlled nuclear weapons and tried to use them to scheme against the Taiji Hall, only to be thwarted by Huai Qingyun.

The remaining countries holding nuclear weapons received urgent messages from their respective research bases in the first instance.

They were panicked!

Thoroughly panicked.

One must know that the reason powerful nations could become powerful was not only due to their economic strength, but more importantly, was their possession of nuclear weapons.

You could choose not to use this stuff, but you absolutely cannot lack if, otherwise, when facing countries armed with nuclear weapons, you wouldn't even be able to hold your head up.

Now.

This ultimate weapon suddenly became useless, how could that not cause panic among people?

"We must not let this leak, we mustn't let the other countries know that our nuclear weapons are ineffective."

The above sentence was said by the Emperor of Black Bear Country, speaking directly to the person in charge of their base.

Europe.

In those old member states of the federation, there was even more anxiety and trepidation.

Although they claimed to be the never-setting sun of the Water Blue Star during a certain period, as time passed, this once powerful kingdom gradually declined. Now, they can only maintain their current status by living on past accomplishments.

“Oh, Sir Magis, you are very well aware that once this becomes public, our Day Not Setting might be in danger...”

A certain lady looked a bit flustered, although she did not finish her words, her meaning was self-evident.

“Your Majesty, I swear, no third person knows about this.”

A ruthless look appeared on the face of the person in charge of the base.

He dared to guarantee this because every researcher in the base who knew about their nuclear weapons' failure had already demonstrated loyalty to the great empire at gunpoint.

Unlike the panic of various forces.

On the side of the Great Yan Kingdom, although the failure of the nuclear weapons alarmed the big shots, when they learned that only the weapons were ineffective, but the controlled nuclear fusion reactor was still working,

In an instant.

The people of the Great Yan understood.

It seemed... it was that person from the Taoist faction who was fixing the abuse of nuclear weapons on the Water Blue Star.

Only the person from the Taoist faction would have such an awe-inspiring power, capable of destroying all nuclear weapon facilities without anyone noticing.

And they speculated that not only were the Great Yan's nuclear weapon facilities destroyed, but the entire world's nuclear weapon base must also be unusable.

Therefore.

Under the analysis of the Great Yan's Think Tank Group, they came to a conclusion: the Water Blue Star was about to enter the era of no nuclear

weapons.

In this situation, what advantages the Great Yan, with its supernatural powers, would gain... they naturally knew very well in their hearts.

"The era of our Great Yan Kingdom is coming!" an old man said.

"Indeed, Daoist Jingde and Ms. Yang Ying came to find me a few days ago."

Another old man's words instantly attracted everyone's attention.

"Oh? What did these two say?" someone asked.

"Hehe~"

The old man couldn't help but chuckle, his expression just like when he secretly ambushed enemies back in the day.

"These two said, let us be prepared to... take over the Water Blue Star Federation. In my opinion, we will soon change our name!"

"Rename? To what? Our name bears too much significance, we must not change it under any circumstances. I don't support this!"

An old man with a goat beard who looked quite aged, originally dozing off sluggishly, stood up angrily, slapping the table upon hearing the word 'rename.'

"Heh, brother, I meant changing the name to the Great Yan Federation Country."

The old man who started speaking also began glaring while puffing up his chest, standing up and yelling louder.

This scene.

Made the guards outside tremble with fear, worrying that these old men might be too agitated and end up having health issues.

"Haha, Old Li, so you meant to say... no, add a Federation suffix- "

The goatee-bearded old man laughed.

Perhaps it was age, or perhaps they were accustomed to bickering amongst themselves in everyday life, he immediately retorted:

"I say, Old Li, adding a suffix is just adding a suffix, how could you stretch it to change the name? Even though I misunderstood you just now, you are also half responsible."

"Hey, you old thing, haven't we not fought for decades? Are you challenging me today?"

Let alone the turmoil outside.

On Qingping Mountain.

Xuanqing sat cross-legged.

Just now.

He operated the Devouring Sky Tree Sapling and absorbed about a month's worth of incense belief, accumulating as much as 1,140 hundred million treasure in such a short time.

"Only a mere 1,140 billion!"

A faint smile appeared at the corner of Xuanqing's mouth.

Right now, the followers of Taiji Hall have only just started exerting their efforts.

Once the Water Blue Star becomes a complete Federation and the Taichu Divine Temple is spread throughout the Water Blue Star, the daily incense benefits would reach a terrifying level.

He believed it wouldn't take long.

He would then have the confidence to devour the source of all planets in the entire Solar System.

It would definitely be possible to leap from the current Devouring Sky Tree Sapling to the true Swallowing Sky Tree, reaching the quasi-saint late-stage realm of the primordial era.

"Mysterious creature in the sun, it won't be long before I, the humble Daoist, come looking for you!" Xuanqing gazed into the distance, secretly thinking.

Chapter 460: Chapter 341: Deduction of Combat Techniques!—!

Do not blame him for worrying.

After all, this is the real world, where there is only one life, and there is no resurrection here, not even reincarnation.

As for the reincarnation cycle of Netherworld in Water Blue Star?

Such a small trick works well for ordinary mortals to go through the cycle of rebirth, but for people like him at this stage, it simply can't bear the burden.

It's not that he's afraid of death, but after seeing the 'Great Dao', Xuanqing does not want to die so easily. Even if he dies, he would rather die on the path of seeking the Dao, rather than being killed by a powerful enemy at will.

"Open Character Panel!" Xuanqing muttered silently.

[Name]: Xuanqing

[Physique]: Chaos Morality Holy Body.

[Grade]: Taichu Dao Master

[Cultivation]: Devouring Sky Tree Sapling (0%)

[Cultivation Method]: Heaven Devouring Saintly Art

[Divine Ability]: XXX

[Ingot]: 2553E

On the Character Panel.

After absorbing the essence of the moon, his cultivation level has successfully transformed from a Heaven-swallowing Tree Seed to a Heaven-swallowing Tree Sapling, corresponding to the Mid-Holy Period of the Primordial World.

As for the Ingot column, out of the original 7,900 billion golden ingots, more than 6,000 billion were consumed when swallowing the moon, leaving just over 100 billion.

In the month of breaking through, Water Blue Star has accumulated another 1,400 billion.

So.

In the end, there are still 2,553 billion left.

Looking at the remaining number of ingots, Xuanqing muttered softly, "In the path of cultivation, each realm is like crossing a mountain by mortals. The consumption will be greater as you progress."

“From the Heaven-swallowing Tree Seed to the Heaven-swallowing Tree Sapling, I have consumed 12,000 or almost 13,000 billion in total...”

“If I want to break through again, I’m afraid the ingots needed will be even more massive!”

Xuanqing pondered.

His daily revenue has now increased to around 38 billion.

Based on this situation, there is no hope of breaking through within a short time. He must wait until he accumulates enough ingots.

“Although I need to wait for a while, I cannot waste this short time doing nothing.”

“After practicing the Heaven Devouring Saintly Art, I haven’t deduced the corresponding combat techniques yet...”

“I might as well take this opportunity to deduce a combat technique that goes with the Heaven Devouring Saintly Art, so that I can have a higher chance of winning when facing a potentially malevolent mysterious creature from the sun.”

The Way of Seeking the Dao is not only about having a heart with sincere devotion, but also about being cautious.

Otherwise, no matter how firm your heart is in seeking the Dao, if you die on the midway, wouldn’t you lose the chance to see the scenery behind?

With this thought in mind.

Xuanqing decided that he would deduce a combat technique next, and he planned to enter the Game World to deduce it.

It is not only because of the time ratio of the two worlds, but also because the operation rules of the Primordial World make it easier to deduce things like “cultivation techniques” and “combat techniques.”

Although the real world is mysterious and powerful, when it comes to “supernatural” rules, it is still inferior to the Primordial World.

The difference in the ways of operating at their source is still quite big for both. Before entering the game.

Xuanqing’s soul spread out, contacting his subordinates, and said:

"I will enter Closed-door Cultivation for a period of time. Wait until the Water Blue Star Federation is established, and then you can contact me again!"

In an instant.

The people of Taiji Hall, who were busy all over the place for the establishment of the Federation, put down their actions as soon as they received the message.

Then they, under the astonished gaze of others, made hand seals and gave an aerial salute in the direction of Qingping Mountain.

The reason for doing so is that the people of Taiji Hall know that when their master sends a message, he can see them.

Here.

After arranging everything, Xuanqing sat cross-legged on the cushion and muttered in his heart:

"Enter the game!"

Black Wind Mountain.

After a long time, a young Taoist priest wearing a Taoist robe and holding a glowing duster opened his eyes.

"A whole year has passed in the real world, which is equivalent to a full decade here."

"I wonder how the development of Black Wind Mountain has progressed during these ten years, and how far Tang Xuanzang's scripture-fetching team has reached."

Xuanqing murmured softly.

As the saying goes, cultivation knows no years, and countless years pass in the blink of an eye.

Because he possesses a cheat, although he differs from the traditional cultivators in the Game World, he doesn't fall into slumber for hundreds of years easily.

However, this rapid passage of ten years still makes him feel extremely emotional.

After all.

From being a first-order mortal without cultivation at the beginning, he has now cultivated to the level of Devouring Sky Tree Sapling, comparable to the mid-level Quasi-Saint of the Primordial World-

Even by the time flow rate of the Primordial World, it is only less than a hundred years in total.

“Let’s see how Black Wind Country has developed now!”

Thinking thus, Xuanqing releases his divine thoughts.

In an instant.

His massive divine soul, which represents the mid-stage Quasi-saint realm in the Primordial World, plus the Tree Sapling’s blessing, directly covers the entire southern Nanshan Continent and half of the western West Niu Hezhou.

Black Wind City.

As the imperial capital of Black Wind Country, after ten years of development, it has become bustling with numerous tall buildings everywhere.

At first glance, it even gives a sense of a modern city.

However,

Unlike the collapsing modern cities, the people of Black Wind Country still maintain their simple characters.

The reason for this is not that the people of Black Wind country are all virtuous but rather due to the country’s sound legal system and the strong management plan of the Heavenly Path and Earthly Path.

There are gods above everyone’s heads in the Primordial World, and this is no joking matter.

Moreover,

The whole Black Wind Country is a land-based Dao country, and the highest- ranking figure is not Queen Qingwan, but Xuanqing as the “God Taichu.” Under the dual effects of perfect laws and “divine authority,” this result is achieved.

On a certain street, there’s a strangely designed building; its entrance is covered with a black cloth, making it look mysterious.

At the door,

A waiter holds a stack of handbills, constantly shouting at passersby.

“Today’s free movie at the Cinema is ‘The Legend of God Taichu.’ Please come inside, everyone!”

“Let’s go, let’s go; finally a free movie about the great God Taichu.” “Haha, I’ve been waiting for a long time; finally, there’s a movie about God Taichu.”

As the passersby hear about the free movie about God Taichu, they immediately stop and go over to the waiter, taking a handbill and entering the cinema.

The Black Wind Country now is not only very prosperous in its economy but also extremely developed in its entertainment industry.

However,

In Black Wind Country, what is most popular is not any entertainment star but rather various Taoist leaders of the Taoist sects.

The Taoist temples in Black Wind Country have a rule: all Taoists must leave the temple for cultivation in the mundane world before they can truly become a Taoist after their scripture-learning period ends.

And the most supreme of them all is Xuanqing, the Main God Taichu. Anything associated with “God Taichu,” no matter in which industry, will be sought after by all.

At present,

In terms of economy, Black Wind Country has several major ocean ports, from where they launch maritime routes and sell goods throughout the southern Nanshan Continent and the western West Niu Hezhou.

Even in the Cultivation Holy Land of Dongsheng Shenzhou, many sects have formed alliances and established relationships with Black Wind Country.

In terms of military power, they are unbeatable. The neighboring countries are constantly trembling in fear, very afraid of being invaded by Black Wind Country.

“Not bad. The combination of technology and cultivation is the correct path for humanity’s development,”

Xuanqing nodded in satisfaction after observing the progress.

Now, except for its somewhat lesser land area and luck in comparison to Tang Dynasty...

In other aspects, Black Wind Country can be said to crush the Tang Dynasty. Black Wind Country is now on the right track and doesn’t need to be worried about for the time

being. Next... it's time to deduce the complementary fighting techniques of the Swallow Heaven Saint Art.
