

## The Immortal Cultivation Game Has Come True

### #Chapter 461 - 342: Changes in the Journey to the West! - Read The Immortal Cultivation Game Has Come True Chapter 461 - 342: Changes in the Journey to the West!

Chapter 461: Chapter 342: Changes in the Journey to the West!

“Begin deducing the techniques matching the ‘Swallow Heaven Saint Art!’”

Xuanqing sat cross-legged, in deep thought.

The next moment.

“Activate Two Years of Absolute Holiness Abandonment of Wisdom.”

[Ding...-63.07 million Ingots!]

The moment the Ingots were deducted, he felt his Soul being fortified by an unfathomable power.

This time.

Xuanqing found that the sensation of activating Absolute Holiness Abandonment of Wisdom was entirely different from before.

In the past, it felt like obtaining the ‘Unity of Heaven and Man’ ‘Great Dao Nature’ sensation.

But this time, his Soul Power was strengthened, greatly enhancing his deductions.

However.

Although there was still improvement, the multiple of enhancement was not as high as before.

“It seems...My guess was correct indeed. This Absolute Holiness Abandonment of Wisdom function would gradually lose its effect as my cultivation increases.”

Xuanqing sensed his condition and had made his conjecture.

However.

He cannot control if it would be ineffective in the future, but the fortification now was noticeable.

Get on with the deduction!

Swallow Heaven Saint Art.

That is to refine a world into the 'Heaven-swallowing Tree Seed', and then constantly devour other world origins to enable this seed to metamorphose until it becomes the actual Swallowing Sky Tree!

Origin Power!

Origin power is the crux of the 'Swallow Heaven Saint Art'. During practising Swallow Heaven Saint Art, the key is to strengthen the Origin Power he obtains.

When starting as the Swallowing Sky Tree Seed, that is the time to master the 'seed-level' origin!

Then, when metamorphosing into Swallowing Sky Tree Sapling, to master the 'sapling-level' origin!

Thus... keep practising, the origin power obtained becomes increasingly advanced, thereby increasing combat power.

"The essence of Swallow Heaven Saint Art is to command the power of world origin. Therefore... what I have to do is to better utilise this world origin power."

Xuanqing's eyes were closed. Under the Absolute Holiness Abandonment of Wisdom state, he deduced rapidly, resembling a quantum computer.

"The origin of a world can not only be used to fortify the physical body, but it itself also possesses tremendous power."

"The power of rules, the magnitude of a world's rule power. As long as the opponent has not yet escaped the power of the world, they can only shiver under the rules!"

Having deduced till here.

An actual technique from a sci-fi work in the real world suddenly appeared in his mind.

A two-dimensional foil attack!

It utilises the power of the world to forcibly reduce a world to a two-dimensional world, thus easily destroying the opponent.

This shows the strength of the world origin.

Of course.

He was merely using this line of thought and not actually replicating it because the difference between the two is significant.

“Apart from this, the power of the world can certainly be used for more than just fortification. It can also be used in other ways, for example., rules superposition....”

“In either case....”

Xuanqing’s fingertips kept changing signs.

The Devouring Sky Tree Sapling in his Heavenly Eye was also swaying, as if it also wanted to give his master a power boost.

In the blink of an eye.

Two years had passed in a flash.

One day.

“Huh” Xuanqing woke up.

Over these entire two years, he had been deducing the techniques matching the Swallow Heaven Saint Art.

Regrettably, although he had a direction for the fighting techniques of the Swallow Heaven Saint Art, he was still unable to grasp the specifics.

Sometimes, even if the theory is understood, applying it is not a simple task.

The reason he stopped now was that the two years of Absolute Holiness Abandonment of Wisdom had just ended.

It was already tough to deduce before, but without the fortification of the Absolute Holiness Abandonment of Wisdom, it would undeniably be more difficult.

“There’s no rush. The two years in the Game world translate to just over two months in the real world.”

Xuanqing had no choice but to console himself in this way.

He didn't expect to deduce the matching techniques for the 'Swallow Heaven Saint Art', which turned out to be much more challenging than deducing the technique itself in the beginning.

Just as he was about to activate Absolute Holiness Abandonment of Wisdom again to continue deducing techniques.

Suddenly.

He sensed something.

"Hm..?"

Xuanqing stood up and looked towards the direction of West Niu Hezhou.

At this moment.

A cloud of rainbow came dashing towards Black Wind Mountain at full speed, and on the cloud was a hairy monkey.

"Master of the Primordial Beginning, Old Sun salutes you!"

The Monkey King jumped off the cloud and greeted him with a respectful bow.

Upon hearing this.

A slight smile appeared on Xuanqing's face as he said with interest: "Monkey King, you're supposed to be protecting Tang Seng on the journey to the West to fetch the scriptures. What brought you to my Black Wind Mountain?"

"Ah, don't even mention it."

The Monkey King looked frustrated. He then pointed towards the west and said solemnly: "Master, you don't know..."

"On the journey to the West with my master, we passed by a depression where there was a small town set up by demons. Their leader was an old demon with golden horns..."

"Their abilities are ordinary, but their magical treasures are extremely powerful, so powerful that even the immortals in heaven could not defeat them."

"Then, Old Sun turned into a mosquito, only then did I secretly learn that these two demons happen to be relatives of you, Master."

In the end,

The Monkey King asked curiously: "Master, are these two demons really your relatives?"

Upon his words.

Chapter 462: Chapter 342: Unexpected Changes in the

Journey to the West! \_2

"Hahahaha-"

Xuanqing immediately laughed heartily, then said leisurely, "Not only are they related, they're actually my senior brothers."

"I see, no wonder these two demons...these two Taoists are so powerful," The Monkey King grinned sheepishly, wanting to say something, but feeling too embarrassed to speak.

Seeing this,

"Since you've found me, it's fine. I've been in closed-door cultivation for a while, so I'll accompany you for a walk and take it as a break." Xuanqing smiled and said.

"Thank you..."

Monkey King was overjoyed, cupping his hands and bowing, "Thank you, Master of the Primordial Beginning-"

"Master, I can travel 54,000 miles in a somersault, do you want me to carry you?"

As if remembering something, Monkey King, who had just prepared to ride the cloud, stopped and turned to ask.

"Let me take you instead!" Xuanqing said with a smile.

As soon as the words fell,

He waved the duster in his hand, transforming it into countless threads that swept toward Monkey King. Before he could react, it had already broken through the current space and was moving in Gold Horn and Silver Horn's direction.

In a sunken area,

There was a large area of black on the ground, as if there was originally something there, but it was moved away.

At this moment,

In this strange place, the space slightly fluctuated, revealing a Taoist wearing a robe, stepping on cloth shoes, and holding a radiant duster in his hand.

The duster in the Taoist's hand was extended, tied around a hairy Monkey, Xuanqing, and Monkey King.

???

Monkey King was puzzled.

What's going on?

One moment, he was visiting Taichu Dao Master at Black Wind Mountain and boasting about carrying him with the Somersault Cloud, and the next moment they were already at their destination?

"Monkey King, follow me to meet my two senior brothers. It's been a long time since I've seen them."

"Ah...yeah~"

After hearing the voice of the Taichu Dao Master, Monkey King finally woke up from his trance and hurriedly followed him.

It was a town,

If not for the demonic energy within, anyone would think it was an ordinary small town.

Xuanqing stepped into the small town.

Inside were many members of the Devil Race with animal skulls on human bodies.

As for Xuanqing and Monkey King entering, the Devil Race seemed to not notice them at all, letting them pass by without any reaction.

He was willing to follow Monkey King here,

On one hand, he had been in a closed-door cultivation for two years, so coming out for a walk and clearing his mind might help him master his battle techniques more easily afterward.

Moreover, Jin Ling and Yin Ling were indeed his senior brothers and had helped him a lot when he was just starting out.

So,

Xuanqing wanted to come here this time also to repay their kindness from the past.

In this way,

They walked directly into the most luxurious room in the center of the town.

Creak-

“Who?”

Golden Horn Great King and Silver Horn Great King were drinking and saw the door mysteriously pushed open. They quickly put down their wine glasses and sternly asked.

However,

At the next moment,

They saw a familiar figure.

The Taoist robe, foot tread, and the familiar tail of the duster in his hand with the cow-tail scent-

“Junior Brother Xuanqing!!”

Both demons exclaimed at the same time, followed by a look of surprise and joy on their faces. They quickly and warmly greeted him.

“Junior brother, it’s been so long, please sit down right away, this time... huh?” “Ah-Monkey King with the face of a Thunder God’s mouth?”

It was then that they discovered that behind their Junior Xuanqing, there was Monkey King with the face of a Thunder God’s mouth. They couldn’t help but be shocked.

“Hehe- You see your grand... uh....”

Monkey King grinned arrogantly, intending to say something, but just then remembered that these two demons were the senior brothers of the Taichu Dao Master.

And if he called himself their grandfather, wouldn’t it imply he had an advantage over Master of the Primordial Beginning?

Thinking of this,

Monkey King quickly retracted his words and carefully glanced at the Master of the Primordial Beginning beside him. When he saw that the other party had no intention of getting angry, he finally breathed a sigh of relief.

As the saying goes, a newborn calf is not afraid of a tiger, but Monkey King is no longer the unruly wild monkey he once was.

Especially after witnessing the arrogant Guanyin acting so humble in front of this Daoist master, he felt even more like a small monkey, vulnerable to being pinched by Guanyin at any time.

“Junior Brother, why did you bring this plague-infested monkey here? He really brings bad luck-” Golden Horn Great King said with a depressed expression.

Silver Horn Great King also chimed in: “Yes, Junior Brother, why don’t we just slaughter this Monkey King and enjoy the Tang Monk’s flesh together... What do you think?”

As soon as these words were spoken,

“Pfft~” Xuanqing almost laughed out loud.

Then,

Xuanqing raised an eyebrow and asked with interest: “My two senior brothers, why do you want to eat this Tang Monk’s flesh?”

Why?

Without thinking, both of them spoke simultaneously:

“Of course, it’s for eternal youth! It is said that eating Tang Xuanzang, the reincarnation of the Golden Cicada from Shimen, grants eternal youth and everlasting blessings!”

However, what they didn’t notice was that when they spoke these words, a subtle black Qi of Tribulation emerged deep within their true spirit.

“So that’s it!”

Xuanqing suddenly understood, and then asked: “My two senior brothers, if you don’t eat this Tang Xuanzang, won’t you be able to achieve eternal youth?” Hmm?

Golden Horn Great King and Silver Horn Great King were stunned.

That’s it.

They felt as if something was growing in their minds.

Yes, they were originally immortals in Heaven with infinite lifespans, and they had eaten many Nine Thousand Years Flat Peaches that could grant one a life as long as the heavens themselves.

Eating Tang Monk's flesh could make one live forever, but not eating it would also make one live forever...

In this case... wouldn't that mean it's pointless?-

"If eating and not eating are the same, doesn't that mean I've been eating for no reason?" Golden Horn Great King was dumbfounded and blurted out.

"No, no, good brother, eating Tang Monk's flesh not only grants eternal youth, but also everlasting blessings, right?"

Silver Horn Great King shook his head and anxiously refuted.

However,

"Pfft~"

Xuanqing couldn't help it any longer and laughed out loud.

"I ask you, my two senior brothers, why did you descend to the mortal world?" "Heaven is boring, and the mortal world is interesting, so we sneaked down!" The two of them didn't hide anything, as they thought Xuanqing was on the same side as them.

As soon as these words were spoken,

"Hahaha, Old Sun understands now! It's so funny, hahaha... Haha..."

Monkey King burst into laughter, tears forming in the corners of his eyes.

"You, this loser of a subordinate, dare to mock us? Our words are reasonable and well-founded, what are you laughing at?"

Golden Horn Great King was furious and scolded angrily.

If it weren't for their own Junior Xuanqing's presence, they would have probably used their magic treasures to capture this plague-infested monkey.

"I laugh at you for having no wisdom!"

Monkey King put his hands on his waist and laughed: "Since you have descended from Heaven, it means that the blessings... are not enjoyable, yet you insist on eating my master."

“You say... if you want everlasting blessings, why make so much trouble? Just go to Heaven directly, right?”

Upon hearing this,

“Ah... this... this...”

Golden Horn Great King and Silver Horn Great King were stunned once again.

They felt that although Monkey King was detestable, there was really a lot of logic in his words. If they wanted to enjoy immortal blessings, why not just return to the Heavenly Court?

They were dumbfounded for a long time.

Silver Horn Great King stammered: “Good brother, I think this monkey’s words make sense. Why don’t... we let go of Tang Monk?”

“Let him go... Let me think...” Golden Horn Great King fell into deep thought, and although he couldn’t find a valid reason, he eventually decided to follow his younger brother’s advice.

“Servants!”

Golden Horn Great King shouted at the door and then commanded: “Bring

Tang Monk here, and... bring his other two disciples too!”

Moments later,

Golden Horn Great King and Silver Horn Great King... no, it should be Child Jin Ling and Child Yin Ling escorted Tang Xuanzang and his group to the exit of the small town.

“Tang Monk, Monkey King, you can go now!”

“Thank you, Master of the Primordial Beginning, thank you, Great King!” Tang Xuanzang clasped his hands together and looked at Xuanqing with a complicated expression.

Meanwhile, Pig Gangling, who was holding the horse, kept winking at Xuanqing as if saying... I, Old Pig, know everything.

Chapter 463: Chapter 343: Dust. Suppresses Heaven!

After sending off the Fetching the Scriptures team.

Jin Ling Child and Yin Ling Child return to their room.

“Junior Brother Xuanqing, why do I feel so dull, even that monkey is smarter than us?”

Yin Ling Child stepped forward, grabbed Xuanqing’s arm, and his eyes were filled with frustration.

If they had known the result would be like this, why would they bother capturing Tang Xuanzang, just wasting their time like this.

More importantly.

This incident has made them feel very stupid, otherwise, how could they have done this?

“Yeah, why are we so foolish?” Jin Ling Child was puzzled too.

At these words,

“Hahaha”...

Xuanqing laughed heartily a few times, then patted their shoulders and explained, “The reason you’re so confused is because your True Spirits have been blinded by the Qi of Tribulation!”

“When your True Spirit is obscured, your God Soul is not visible, and even horns grow on your heads!”

Having said that,

Jin Ling Child and Yin Ling Child only realized this now, and quickly touched their heads, finding a hard lump indeed.

Both of them were shocked.

Not only did they not notice their own horn growth, but they also failed to recognize their good brother/good junior brother’s horn growth. Was this the harm caused by a blocked True Spirit?

“Senior Brother, save me, save me, I don’t want my True Spirit to be blocked. This Qi of Tribulation is too powerful, how can it be eliminated- – ”

Both of the child-like beings looked mournful and pleaded for help.

“Be at ease!”

Xuanqing nodded slightly and then said, "I have come to find you in order to solve this tribulation!"

Exchange for ten pieces of Primordial Origin Stone.

[Ding... – 1E Ingot!]

With the deduction of one hundred million ingots, ten stones that exuded Daoist charm appeared in his game backpack.

These Primordial Origin Stones were used to carry Heavenly Merit after he released the Dragon Qi from the Ancestral Dragon Crystal of the Dragon Clan. Each origin stone contains ten thousand Heavenly Merits, which is equivalent to killing a Yellow Wind Monster, and ten origin stones are a total of one hundred thousand Heavenly Merits.

After the successful exchange,

Xuanqing waved his whisk gently, took the ten original stones from his game backpack, and then threw them in the air.

At that moment,

The origin stones bloomed with dazzling light, and rich Daoist charm filled the entire space.

Hum hum-

"It feels so comfortable... My scalp is itching, and it's like wisdom is growing back." Yin Ling Child held his head, his face filled with a shocked expression.

Jin Ling Child on the side also did the same, holding his head to feel the changes inside.

Soon after,

The keratinized flesh tumors on their heads shrank at a visible speed, and eventually, they completely disappeared.

Moments later,

"Good brother, my cultivation level... seems to have broken through!"

"Good junior brother, my cultivation level... seems to have broken through!" Jin Ling Child and Yin Ling Child looked at each other, almost exclaiming in excitement at the same time.

As the huge Heavenly Merits were gradually absorbed by Jin Ling Child and Yin Ling Child, not only did it improve their cultivation, but it also cleansed their God Souls and physical bodies.

A moment later.

The two child-like beings completely awoke from their tribulation state.

Only then did they realize that they had unknowingly entered a tribulation.

“Xuanqing teach... Huh?”

“Where did Senior Brother go?”

Jin Ling Child and Yin Ling Child were preparing to express their heartfelt thanks when they realized that their Junior Brother Xuanqing had disappeared. The two looked at each other.

In the end,

They bowed deeply in the direction of Black Wind Mountain and shouted together: “Thankyou, Junior Brother Xuanqing!”

Meanwhile,

At the Douluo Palace in the thirty-six heavens above.

An old man with a huge Bagua behind him, sitting cross-legged on a cushion and exuding a strong Daoist charm was Taishang Laojun.

As Jin Ling Child and Yin Ling Child return to normal,

Taishang Laojun opened his eyes, looking at a certain place in the Human World with a slight smile on his lips.

The tree they had planted in the past will bear the corresponding fruit one day, and with the nourishment of this Heavenly Merit, their path would become much wider in the future.

On this side,

After handling the matters of Jin Ling Child and Yin Ling Child, Xuanqing returned to Black Wind Mountain.

He had been in the Game World for two years, which was only seventy days in the Real World. The incense collected was definitely not enough for a breakthrough, so there was still plenty of time.

So... time to continue deducing!

“Activate Absolute Holiness Abandonment of Wisdom for two years!”

[Ding... -63.07 million Ingots!]

As the ingots were deducted,

Xuanqing felt his God Soul being strengthened, and in this state, he continued to deduce his battle techniques.

Perhaps because he had repaid some of the karma from Jin Ling and Yin Ling Child, he felt that his whole being was much clearer after returning from that trip.

Just as he entered the state, he sensed that this closed-door session would be successful.

“Heaven Devouring Saintly Art... World Power, transforming the world into a Swallowing Heaven Tree, like this???? ”

“The World is divided into Yin and Yang, Five Elements....”

One year.

It was just one year.

Xuanqing, whose eyes were tightly closed, suddenly opened them.

He had achieved enlightenment! Finally, he understood a battle technique based on world power and used it for attack.

“A Dust... Suppressing Heaven!”

Xuanqing’s eyes sparkled, and he gently waved the whisk in his hand. The rich Daoist aura scattered and turned into a green tree sprout.

Chapter 464: Chapter 343: A Speck of Dust Suppresses the Heavens! \_2

Droning...

A tiny treeling’s shadow, just a few dozen feet high, contains the origin power of the entire Water Blue Star and the Moon.

Thus.

Immediately after the appearance of this tiny treeling's shadow.

Rumble...

The whole world dimmed, and various colorful lights bloomed, each light representing a world rule.

Black and white symbolize Yin and Yang, gold, green, blue, red, and orange represent metal, wood, water, fire, and earth.

The power of the rules that make up all things in the world is condensed into this tiny tree.

Such a huge movement.

Above the nine heavens and Lingxiao, down to the Netherworld Blood Sea, even the various worlds that rely on the Primordial World for their existence were also shaken by this strong rule of Dao rhyme.

Heavenly Court!

Above the nine heavens is the Lingxiao Bao Hall.

Inside the Great Hall, literary and martial Immortal Officials stand on both sides, lowering their heads and gazing at their noses and hearts, thinking it is just another boring Fairyland regular meeting.

On the high platform.

The Jade Emperor is also absent-minded, only thinking about going back to his Golden Palace of Clouds after the meeting to eat peaches, fruit, and watch the monkey show.

The chanting etiquette officer next to him naturally knew the thoughts of his master, so after waving the duster in his hand and taking a step forward, he said loudly:

"By the order of the Emperor Haotian, the Golden Que, the supreme, the natural, the wonderful, the Miro... Singing to all the immortals..."

Before he could finish his words.

Suddenly.

Rumble...

The entire Lingxiao Bao Hall suddenly trembled violently, with a much larger amplitude than when the Monkey God was born.

Clang-

A piece of Luli Immortal Crystal fell from the roof and made a crisp sound.

The huge impact of the Dao rhyme rules caused all the literary and martial immortals in the hall to stagger, and the Giant Spirit God even clumsily fell to the ground.

“Ouch, what are you doing... Daoist friend Giant Spirit God, you’re crushing me!”

An Immortal holding a Jade Ruyi was pressed down by the fallen Giant Spirit God, and immediately wailed in pain.

This Giant Spirit God’s weight is no small matter. Even if an Immortal is hit, they will have difficulty bearing it. If it were an ordinary fairy, they might lose their life at once.

“Father King, your pagoda is poking your son!”

“Ah, what’s going on, what’s going on...”

“Who’s making trouble... Ouch...”

The whole main hall was in chaos.

If they had encountered this impact elsewhere, it would have been fine. With the divine powers of these great immortals, it wouldn’t be like this.

However, in this Lingxiao Bao Hall, no matter how powerful your magical powers are, they can’t be used. Even the most basic ‘flight’ is impossible, and every time they attend the court meeting, they have to walk.

On the high platform.

Seeing the chaos in the Lingxiao Bao Hall.

The Jade Emperor’s face looked somewhat unpleasant.

Just now, although that wave of Dao rhyme was powerful, it still fell short of affecting him, the Emperor Haotian, who ruled the Three Realms.

“Calm down!”

The Jade Emperor waved his sleeve and projected a green light containing the Heavenly rules of the Primordial World.

Instantly.

Everything became calm.

Even the Luli Immortal Crystal that had originally fallen from the roof of the hall seemed to have been rewound by time and returned to its original position. “Phew-”

Veritable? stabilized their figures, sorted out their clothes, and returned to their seats with awkward expressions.

“Your Majesty, I’m afraid it’s a big deal. I don’t know who was so bold as to disturb the Three Realms and cause the Lingxiao Bao Hall to tremble. We must investigate this thoroughly.”

“Yes, today someone dared to make Lingxiao tremble, and tomorrow they might dare to rebel and cause chaos. We must investigate thoroughly.” “Investigate thoroughly!!”

All the deities were filled with righteous indignation.

That wave just now made them lose face. The ones who could attend a court meeting at Lingxiao Bao Hall are at least fourth-rank Immortal Officials.

Aside from the time they accompanied the Monkey God in a play, when had they ever suffered such grievances?

On the high platform.

The Jade Emperor was also slightly angry, and immediately ordered, “Summon the Thousand-mile Eye and Downwind Ear!”

The chanting etiquette officer next to him first adjusted his own hat, and then shouted loudly at the lower side:

Introduce the Thousand-mile Eye and Downwind Ear to the court!” moments later.

Thousand-mile Eye and Downwind Ear arrived inside the main hall, and under the command of the Jade Emperor, they began to use their authority to investigate the cause of this tremor.

It’s worth mentioning that.

At this moment, the Jade Emperor took advantage of the gap, made a decision with a pinch of his fingers, and personally checked who was so bold as to disrupt the Heavenly Court’s Lingxiao Bao Hall.

“Hmm....?”

It didn't matter if it was off. A check scared him!

Good guy.

It turned out that the troublemaker was his old acquaintance, Daoist Xuanqing, who he had just visited personally to congratulate on the Daluo jinxian Banquet.

Not only that.

All of the Ginseng Fruits and Nine Thousand Year Flat Peach piled up like a mountain in his room, the Golden Palace of Clouds, as well as the Drunk Golden Immortal Wine, were all given by the Master.

This...

The Jade Emperor showed a distressed look on his face.

If it were Xuanqing, it would be difficult to deal with this matter.

After all, it's a case of accepting help and knowing no shame since even the Emperor Haotian should show some face, right?

At this moment.

Downwind Ear and Thousand-mile Eye also used their divine powers to sense the course of events.

When they raised their heads, ready to report the cause to Jade Emperor, they suddenly saw the 'difficult color' on Jade Emperor's face.

With a report in their hearts, the two looked at each other.

After a brief contemplation,

one of them said: “Your Majesty, it's Daoist Master Xuanqing of Taichu Dao from the Human World who has gained insights into Heaven and Earth, causing a certain amount of commotion.”

Zech Zech-

It must be said that the same thing can be expressed in different words.

The reason why Downwind Ear and Thousand-mile Eye are like this is, of course, because they also attended the last Daluo Jinxian Banquet.

And when they were about to leave, they received gifts from Daoist Bai She of Black Wind Mountain: a Ginseng Fruit and a Nine Thousand Year Flat Peach.

Once Xuanqing came and went, Downwind Ear and Thousand-mile Eye said.

In an instant!

The scene suddenly calmed down.

It should be known that

everyone in the entire Lingxiao Bao Hall, except for Pagoda-Bearing Heavenly King Li Jing, has attended the banquet hosted by Xuanqing.

Although a gift is given at each banquet, at the end of the banquet, it is normal to receive ginseng fruit or a nine-thousand-year flat peach as a return gift.

“So it’s the Master of the Primordial Beginning, no wonder he could cause such a huge commotion. It’s really admirable!”

The Giant Spirit God immediately gave a thumbs up.

The remaining immortals also spoke up:

Zeze- As expected of a Lord of a Dao Court, truly amazing.”

Your Majesty, in the humble opinion of this minister, Master Xuanqing must have gained insight into some extraordinary divine power.”

“It’s only been a few days since we attended the banquet at Black Wind Mountain, and now Master Xuanqing has shaken the Three Realms again.”

On the high platform.

Seeing the attitude of the officials in the main hall change dramatically.

He couldn’t help but twitch the corners of his mouth. Good fellow, is it that it’s unforgivable when others do it, but when it’s Xuanqing, it’s no big deal, and they even praise him?

However.

The Jade Emperor also had a very good feeling about Xuanqing, after all, Ginseng Fruit, Nine Thousand Year Flat Peach, and Fairy Brew were not obtained for nothing.

Now that all the ministers are pleading in this way,

“Cough-” Jade Emperor coughed lightly and then said loudly: “In that case, I will follow the advice of my ministers!”

As soon as these words came out.

“The Jade Emperor is wise!”

“The Jade Emperor is wise!”

All the gods in the main hall spoke up.

On the other side.

Jiuyou Land.

A secluded valley.

On the shoulder of a hundred-feet giant man covered in muscles, stood a dignified, heavy-robed woman.

Her gaze looked into the sky as if penetrating the Netherworld and heading directly to the land of Black Wind among humanity.

“Daoist Xuanqing has become even stronger!”

Houtu’s eyes were deep, whispering softly. Perhaps...the hope for that matter will eventually fall on Daoist Xuanqing’s shoulders.

Black Wind Mountain.

Xuanqing opened his eyes, a wry smile on his face.

Chapter 465: Chapter 344: Absorbing the Origin of Venus!

He had just become too excited, because he realized that this combat technique, based on the power of the world, was too overwhelming.

So he couldn’t help but use it.

As a result, the entire Water Blue Star and Moon’s world power condensed on a small duster, causing a huge commotion.

“The Jade Emperor shouldn’t blame me for this... It’s because I...”

Xuanqing thought of this in his heart, then looked down at the duster in his hand.

The duster that had accompanied him for a long time, was now shattered, with only a few strands of the dust tail made from the ancestor master's mount's tail hair remaining.

It couldn't bear it anymore.

Although the material of his duster was not bad, it was still an ordinary magic treasure, which couldn't withstand such a massive world power.

"One Dust Suppressing Heaven, with the power of the world suppressing all heavens, the stronger the world power, the more powerful it is."

Xuanqing casually put away the broken duster and then thought about the combat technique that he had deduced this time.

On the surface, this One Dust Suppressing Heaven is almost the same as an ordinary attack, but in reality, the power they can exert under the same world power is completely different.

For example.

If the world power is digitized.

10 points of world power can only exert 2~3 points of power at most by simply suppressing with world power or using the methods before Great Luo.

But if using the just deduced 'One Dust Suppressing Heaven' combat technique, with the same 10 points of world power, at least 100-200 points of power can be exerted.

It wouldn't be an exaggeration to say that there is a world of difference.

"Open Character Panel!" Xuanqing silently recited in his heart.

[Name]: Xuanqing

[Physique]: Chaos Morality Holy Body

[Grade]: Master of the Primordial Beginning

[Cultivation]: Devouring Sky Tree Sapling (0%)

[Cultivation Method]: Swallow Heaven Saint Art

[Divine Ability]: Dust-suppressing Heaven (Perfect)

[Ingot]: 2552E

On the character panel, there was no change in other places, except for the 'Divine Ability' column, which had changed from XXX to 'Dust-suppressing Heaven', with a suffix directly being perfect.

It seems... the combat techniques he deduced and created by himself, are of perfect level as long as they are created.

"With the One Dust Suppressing Heaven divine ability, and transforming my cultivation into a real Swallowing Sky Tree, I will go to the sun again and meet that mysterious creature."

Looking at his character panel.

Xuanqing thought secretly in his heart.

"It's time to exit the Game and return to the Real World!"

It has been a full three years since he entered the Game World to deduce combat techniques. According to the to to 1 time ratio between both worlds, 109 days have passed in the Real World.

With such a long time, a huge amount of incense power must have accumulated in the real world, enough for closed-door cultivation for a while.

Thinking this.

"Exit the Game!" Xuanqing silently recited.

Real World.

Inside the Inner courtyard of Qingping Temple on Water Blue Star.

Xuanqing opened his eyes, awakening from the Game.

"It's been three years in the Game and more than a hundred days in reality, I wonder how much incense has accumulated."

Then.

A Heavenly Eye opened on his forehead, and within it, a lush green tree sapling was constantly rotating, emitting a rich World Dao Rhyme.

Swallowing Heaven Saintly Art!

With the operation of the cultivation technique, everything on the entire Water Blue Star and Moon was under his control.

“Gather!” Xuanqing shouted in a low voice.

In an instant.

All the incense power generated by the humans of the real world who believed in the Main God Taichu, crossed the space from all directions and came before him.

Such a large amount of incense power turned the area around Qingping Mountain into a golden ocean, almost condensing into a substance.

“Recharge!”

Xuanqing’s God Soul left his Body and wrapped a huge amount of incense power, then silently recited ‘recharge’ in his heart.

[Ding...+5995E Ingot!]

A quantifier prompt rang in his mind.

“109 days, 5.995 trillion ingots, calculating... the daily incense revenue is now 55 billion!”

Xuanqing was a little surprised.

You should know

Before entering the game for closed-door cultivation and deducing the ‘One Dust Suppressing Heaven’ combat technique, the daily incense revenue was only 38 billion, and now it’s only over a hundred days, and the daily revenue has increased to 55 billion.

Including the previous 200 billion, he now has:

8547 billion!

“With more than 8 trillion, I wonder how many percentage points the cultivation progress of the Swallowing Sky Tree Sapling can be pushed forward!”

Xuanqing pondered in his heart.

Now.

The entire Water Blue Star and Moon’s origin have been completely refined and swallowed.

It is worth mentioning that.

These two refined and swallowed planets are not to say that the origin inside them is directly gone after refining and swallowing.

In essence, when refining and swallowing a planet in the Swallow Heaven Saint Art, in addition to swallowing and refining its origin, a 'Swallow Sky Mark' would also be applied to the refined planet.

As long as the refining and swallowing are successful, the new origin produced by the refined planet every moment will be turned into the growth nutrients of the Swallow Heaven Saint Art, improving his cultivation.

That is to say.

Even if he does nothing and just guards the Moon and Water Blue Star, his Swallow Heaven Saint Art will sooner or later transform from the current Swallowing Sky Tree Sapling to a real 'Swallowing Sky Tree'!

Of course, relying solely on Water Blue Star and Moon, it would be impossible to achieve the natural progression in time before the destruction of the solar system.

Chapter 466: Chapter 344: Absorbing the Origin of

Venus !\_2

"First, cultivate and use up these over eight trillion ingots!"

Xuanqing murmured softly.

The next moment.

His body turned into specks of starlight and disappeared within the Inner courtyard of Qingping Mountain.

In the vast and boundless universe, a planet wrapped in carbon dioxide appeared extremely quiet.

Venus!

A planet with an atmosphere composed of carbon dioxide, with an atmospheric pressure of 90 standard atmospheres. By the scale of the Water Blue Star (Earth), it would be equivalent to a depth of one thousand meters below the ocean.

The enormous pressure made the surface of this planet have a high temperature of over four hundred degrees under normal conditions.

If ordinary people were to come here, they would probably be cooked in no time!

However.

One day.

A layer of colorful light wrapped a certain place on this planet, causing the space to ripple slightly. A pair of dark-blue cloth shoes appeared first.

Then.

This figure slowly revealed itself, a Taoist wearing a Taoist robe, stepping on cloth shoes, and radiating a rich aura of the Great Dao Nature.

It's worth mentioning that this Taoist didn't have his signature glowing duster in his hand.

"The diameter of Venus is similar to that of Water Blue Star (Earth), with a slightly lower mass. I wonder how much Origin Power it contains!"

The person was Xuanqing, who had shuttled through space from Water Blue Star (Earth).

After arriving on Venus.

Xuanqing's divine soul permeated through his body, enveloping and observing the entire planet.

It's worth noting that.

There were no traces of use on the Planetary Teleportation Array previously built by his side.

It seems... Although the Teleportation Array had been established, humans from Water Blue Star (Earth) had not yet explored Venus for the time being. "Start cultivating!"

Xuanqing sat down cross-legged right away.

Because he had set up the Five-element Isolation Array when establishing the Teleportation Array before, he didn't have to worry about being disturbed by meteorites and the like.

As the Swallow Heaven Saint Art was activated.

Xuanqing's Heavenly Eye on his forehead opened, the jade-green Devouring Sky Tree sapling inside it rotated, releasing a rich World Dao Rhyme.

Immediately after.

An incredibly thick illusory vine stretched out from the Devouring Sky Tree sapling and eventually penetrated into the ground of the planet.

Absorb!

Humming-

An endless stream of Origin Power was absorbed by the thick vine and transmitted into the Heavenly Eye on the forehead, turning into nourishment for the growth of the Devouring Sky Tree sapling.

Compared to the previous Devouring Sky Tree seeds, the speed of absorbing Origin Power increased by more than a hundred times, which could be described as a world of difference.

What a fast absorption speed, is this the power of the Devouring Sky Tree sapling stage?"

Xuanqing was somewhat surprised in his heart.

Speaking of which.

This was his first time cultivating by absorbing Origin Power after his transformation into a Devouring Sky Tree sapling. He didn't expect it to be so powerful.

If he had had this speed when he was cultivating on the moon before, he wouldn't have needed 120,000 years; at most, he would have completed the absorption and refining in just over a thousand years.

Of course.

The development of things was all interconnected; without the previous 120,000 years of devouring the Moon's Origin Power, how could he have transformed into a Devouring Sky Tree sapling?

And without transforming into a Devouring Sky Tree sapling, how could he have had such a formidable devouring speed?

"Try the time acceleration again!"

Then.

Xuanqing silently chanted in his heart: "Accelerate the Devouring Sky Tree sapling by one hundred years!"

[Warm reminder: each acceleration of Devouring Sky Tree sapling will consume

1 Origin Point, do you want to continue using time acceleration?]

Huh?

“The price has gone up?”

Xuanqing was slightly taken aback.

Previously, when he was cultivating on the moon, 1 Origin Point could accelerate ten years. Now 1 Origin Point could only accelerate one year. The price had.... increased tenfold!

However.

There was no way to bargain for this thing. Let alone a tenfold increase, even if it had increased a hundredfold, he would have to use the time acceleration function if needed.

Moreover.

Now, the Devouring Sky Tree sapling, compared to the seed stage, had a hundred times faster absorption speed of Origin Power.

Looking at it from a different angle... the efficiency of absorption has increased a hundredfold, but its price has only increased tenfold.

“In this case, it’s not a bad deal!”

Xuanqing comforted himself with this thought.

Then.

“Confirm the usage of a 100-year time acceleration on the Swallowing Sky Tree Sapling!”

[Ding... -100E Ingots!]

100 million ingots are equivalent to 1 Origin Point, and one hundred Origin Points naturally equate to one hundred million ingots.

With the deduction of one hundred million ingots...

In an instant!

The illusory vine of the Swallowing Sky Tree, extending from his forehead, swelled and became engorged, as its speed of absorbing Venus’s origin increased by millions of times in this instant.

Swelling!

Such swelling!

A familiar bloated feeling emerged.

It has been a long time since Xuanqing experienced this sensation.

At the same time, along with this 'swollen' feeling, the Swallowing Sky Tree Sapling was visibly growing at an incredible speed.

These vast Venus's origin powers nourished the sapling of the Swallowing Sky Tree, eventually transforming into a unique world power.

Moments later.

The 100-year time acceleration effect ended.

"Whew-"

Xuanqing rubbed his temples and let out a long breath.

This 100-year time acceleration effect alone was equivalent to the 10,000 years he had spent on the moon.

Even with his current physical body and divine soul strength, although it wouldn't inflict harm, some discomfort was still unavoidable.

However.

Compared to the discomfort of the physical body and divine soul, what he cared more about was how much progress the 100-year time acceleration had added to the Swallowing Sky Tree Sapling's cultivation.

After the sapling of the Swallowing Sky Tree absorbed the origin of Venus for a hundred years, how much material was consumed from the planet?

Like the Moon, Venus is a part of the Solar System, and if any issues occur on Venus, it will inevitably affect the Water Blue Star, which is something he wouldn't want to see.

Therefore, because of the consumption of the origin power, he would compensate for the loss of Venus's basic materials with ingots, to prevent Venus from deviating from its orbit due to gravitational anomalies.

Next.

“Open Character Panel!”

[Name]: Xuanqing

[Physique]: Chaos Virtue Holy Body.

[Grade]: Master of the Primordial Beginning

[Cultivation]: Swallowing Sky Tree Sapling (0.02%)

[Cultivation Method]: Swallow Heaven Saint Art

[Divine Ability]: Dust-suppressing Heaven (Perfection)

[Ingots]:8447E

His gaze turned to the Character Panel.

The original 8500 billion ingots were reduced by one hundred billion.

And in the cultivation column, the original zero progress, after the 100-year time acceleration, turned into 0.02%.

Using a 100-year time acceleration, the cultivation progress increased by 0.02%, and 10,000 years were equivalent to 0.02%.

In this way, it can be calculated that to cultivate the progress to 100%, a total of...

500,000 years!

A full 500,000 years of time acceleration is needed to transform the Swallowing

Sky Tree Sapling into a mature Swallowing Sky Tree.

“One Origin Point can only accelerate for one year, and for 500,000 years, that would be... 500,000 Origin Points!”

“Whew-”

Xuanqing took a deep breath.

Even with his current mastery of the entire Water Blue Star’s faith and a population of billions, facing 500,000 Origin Points still seemed like a vast number.

Keep in mind.

100 million ingots are only equivalent to one Origin Point, and 500,000 Origin Points are... an astronomical 500 trillion ingots!!

“Sure enough, the resources consumed by cultivation increase exponentially towards the end.” Xuanqing couldn’t help being secretly astonished.

Of course.

There is actually a method to cultivate and advance to the next stage without consuming so much, and it doesn’t even require 500,000 years. When converted into Convention Years, it is just less than ‘Four Yuan Years’.

Moreover, if you cultivate actively, it’s much faster than passive cultivation through time acceleration. Maybe it wouldn’t even take four Yuan Years, perhaps... three Yuan Years, two Yuan Years... and the cultivation would be completed?

What a pity.

For Xuanqing, who possesses a cheat, he’d rather spend 500 trillion ingots than honestly engage in closed-door cultivation for so many years. Even if it were only the 120,000-year ‘One Yuan Year’, he would be unwilling!

Chapter 467: Chapter 345: After 7 Months, the Water Blue Star Federation is Established!

It’s not just about accelerating time. After absorbing the essence of Venus, there is also a need to make up for the lost material, which would require a certain amount of ingots.

“Let’s see how much the origin of Venus is depleted after a hundred years of absorption!”

Xuanqing pondered for a moment.

The next moment.

His God Soul separated from his body, enveloping the entirety of Venus, probing the amount of material it had lost.

“Indeed, Venus is a major planet; its mass is much greater than that of a satellite like the Moon, and it’s almost comparable to the mass of Water Blue Star.”

Xuanqing even contemplated.

If it weren’t for the high surface temperature of Venus, which judged by its composition, might have even birthed life.

“Let’s first upload the missing portion of the material to the Game Mall to see how many ingots will be needed to replenish it!”

He thought to himself.

He covered a portion of Venus with his God Soul, wrapping around a mass roughly similar to the missing part.

“Upload!”

[Product uploading... 5%..51%...89%...99%!]

The speed of product upload was swift!

Despite the massive amount of lost material requiring calculation in ‘trillion tons’, being ordinary matter, it is uploaded quite quickly, and the quantifier notified him shortly after.

[Ding... Congratulations, upload successful. Store increment: 50 Trillion Tons of Planetary Material (50 Origin Points)]

Fifty Origin Points?

“So, in addition to the a hundred billion consumed by time acceleration for a hundred years, another fifty billion will be needed to replenish the matter of Venus.”

“That implies that the 0.02% progress in accelerated practice would require a total of 150 billion ingots!”

Xuanqing frowned slightly.

With just 0.02% of practice progression requiring 150 billion, doesn’t it mean... to complete the transformation and fully mature the Swallowing Sky Tree, a total of....

Seventy-five... Trillion?

With the current daily income of 5.5 billion ingots, if it stays the same, it would take 37 years!

“Thirty-seven years... I can wait, but I’m not sure if the mysterious creature on the Sun can wait!”

Xuanqing thought to himself.

Of course.

That's not quite how the numbers work, his daily incense revenue won't be fixed at 5.5 billion.

With the emergence of the Federation on Water Blue Star, and ultimately making the Taoist faith the designated sect of the Federation... The daily incense revenue will skyrocket to a terrifying figure.

However, these are future matters. For now, it is more important to purchase planetary material from the Store to replenish the lost mass of Venus.

"Purchase 50 Trillion Tons of Planetary Material."

Ding... -50E Ingots!

With the reduction of fifty billion ingots, a mass of Mars material appeared in his Game Backpack

A full fifty trillion tons.

If this amount of material were to hit Water Blue Star, it could directly cause another mass extinction event.

What's more terrifying is that the course of Water Blue Star might be knocked off by it, then gradually colliding with other planets, and finally... Poof! Vanished!

Subsequently.

Xuanqing waved his palm, taking out this immeasurably large mass of planetary material from his Game Backpack.

In an instant!

It was an understatement to say that it blotted out the sky and covered the sun. Within the visible range, the entire sun was blocked.

Additionally, the gravity produced by this massive object attracted some stray meteorites in the universe and absorbed them.

"Merge!"

Xuanqing's God Soul, controlling this enormous mass of material, melted it gently into Venus, causing no disturbance in the process.

Moments later.

Venus returned to its original mass, and its orbital path normalised as well.

“Phew-”

Xuanqing exhaled a long breath of relief.

To be honest.

This wasn't an easy job. For him, it's extremely easy to destroy a planet – it can be done with one thought.

However, repairing a planet is a technical task. Destruction is often easier than creation.

“Once I've absorbed and refined the whole Solar System, I'll go further to devour!”

Xuanqing secretly planned in his heart.

Water Blue Star is his home, and the Solar System is the home of Water Blue Star. If he doesn't first refine and devour the entire Solar System, he won't be at ease.

Once the Solar System is completely devoured, he can then take the perfect ecological system of the Solar System with him and journey off into the distance.

At that time... when he devours and refines other planets, he wouldn't care if they lost mass and veered from their orbits.

“Continue practicing!”

Xuanqing took a deep breath and sat cross-legged.

Doing this kind of work wasn't tiring for him, it was mostly just tedious. While replenishing matter, he also had to pay attention to the planet's orbital path, and ensure that the planet doesn't vibrate as a result.

Heaven Devouring Saintly Art!

The Heavenly Eye on his forehead opened, and a phantom vine used for absorbing the origin extended from it, then plunged deeply into the planet.

“Use the hundred-year time acceleration on the Devouring Sky Tree Sapling.” Xuanqing muttered silently.

Ding... -100E Ingots!

Along with the instant deduction of the ingots, the phantom vine used for absorbing the origin instantly became extremely burly, with its suction force increasing countless times!

Swelling... an incredible swelling...

Of course.

Beyond this swelling sensation, his cultivation level visibly increased at a swift pace, and the Devouring Sky Tree Sapling within his Heavenly Eye was so excited that it couldn't stop trembling..

Chapter 468: Chapter 345: After 7 Months, the Water Blue

Star Federation is Established!\_2

And so it went.

In the following time.

Xuanqing constantly used time acceleration for cultivation, then purchased planetary materials to replenish Venus... cycling between these two.

In the blink of an eye.

Ten days had passed.

“Whoo~”

Xuanqing exhaled a long breath.

Each time he used time acceleration for a hundred years and then filled the missing matter in Venus, this cycle had been repeated fifty times.

“Open the character panel!”

[Name]:Xuanqing

[Physique]:Chaos Virtue Holy Body.

[ Grade] :Master of the Primordial Beginning

[Cultivation]:Devouring Sky Tree Sapling (1%)

[Cultivation Method]:Heaven Devouring Saintly Art

[Divine Ability]:Dust-suppressing Heaven (Perfection)

[Ingot]:1197E

In the Ingot section of the character panel, the original eight trillion ingots had been reduced to just over one hundred billion after ten days of cultivation.

And in the cultivation section, it had increased from the original 0.02% to the current 1%.

“About half of Venus’ origin has been absorbed by me!”

Xuanqing pondered slightly and thought to himself: “That means, if I take in all of Venus, it can increase my cultivation progress by 20%!”

Five!

He only needed to absorb five planets similar to Venus, and he would be able to transform from a sapling of the Devouring Sky Tree to the true Devouring Sky Tree!

Although he still has over a trillion ingots left, he does not intend to continue cultivation.

As mentioned earlier, it is very uncomfortable to be forced to interrupt cultivation midway due to lack of ingots, just like the discomfort of constipation for mortals.

“So... now I’ll just sit quietly and wait for the accumulation of incense!”

Xuanqing thought to himself.

Soon after.

His figure turned into star dots and disappeared on Venus’s surface.

Water Blue Star.

Inside the heavenly realm’s Golden Palace of Clouds.

Cang Qingyu was bored and daydreaming, occasionally taking a bite of a Nine Thousand Years Flat Peach. This life... tsk tsk, had a feeling of Jade Emperor in the Primordial World.

Perhaps.

The only difference with the Jade Emperor of the Primordial World is that this guy doesn’t have the Haotian Mirror to pry on everything, nor the monkey play to watch.

It is worth mentioning.

Because Xuanqing had changed the time flow rate of the celestial realm, in the real world, a lot of time had passed, but he had only been asleep a while.

Humming-

Golden Palace of Clouds rippled slightly, and a young Taoist priest in a Taoist robe with no shoes on his feet and empty hands appeared in the air.

Oh!

Cang Qingyu was startled and put the Nine Thousand Years Flat Peach on the table when he saw the newcomer.

“Disciple Qingyu, pays respect to Sir!”

“Hmm.”

Xuanqing nodded slightly and then said indifferently: “How do you find living in the celestial realm? Are there any discomforts?”

“Reporting to Sir, the heavenly realm is filled with Immortal Spirit Qi, although it is a bit more boring and bland, it is a nice place to stay, and I like it here.”

Cang Qingyu smiled honestly and answered somewhat shyly.

“As long as you are comfortable, I will be closing up in the Douluo Palace for a few days. If you have any matters, feel free to come over!”

Xuanqing patted the young man’s shoulder and said.

As the words fell.

His figure flashed and disappeared in the Golden Palace of Clouds. The reason for coming here was just to check on Cang Qingyu, the child.

At this moment.

Cang Qingyu watched Sir leave and quickly bowed in salutation, shouting loudly, “Farewell, Sir!”

Thirty-Six Heavens in the Heavenly Realm.

Unlike the primordial world, the real world’s Heavenly Realm has thirty-six heavens with an Eight Trigram Furnace, but there is no Douluo Palace.

Entering inside.

There is an ancient and quaint architecture, which looks very imposing, but lacks a trace of the Taoist charm.

However.

Xuanqing doesn't care about these things.

Although he created the Heavenly Realm and designated this highest place of the thirty-six heavens as his private domain, he rarely came here.

"In these thirty-six heavens, one day in heaven is a year on earth. If I stay here, I bet it won't be long before there's enough incense gathered on Water Blue Star," Xuanqing thought.

That's right.

The reason he came to the thirty-six heavens of the Heavenly Realm was to take advantage of the significant difference in the speed of time here.

After all, with the current incense income of Water Blue Star, the time it would take for the sapling-stage Devouring Sky Tree to transform into maturity is still too long for him.

"Since I began practicing, decades have passed, and I haven't had a chance to rest properly! I'll rest here for a while in these thirty-six heavens," he said to himself.

Xuanqing sat cross-legged on the futon.

Surrounded by dense immortal spirit qi, it was so refreshing to inhale and caused his eyes to slightly narrow, enjoying the rare leisurely moment.

Time slowly passed.

Unconsciously, several months went by.

This day.

Water Blue Star ushered in an unprecedented change, a change that could alter the fate of the entire human race.

Ever since Xuanqing ordered all the human countries on Water Blue Star to become a federal union, Taichi Hall had been operating as a huge machine. Moreover, because the federation was led by the Great Yan Kingdom, it also received the full support of the kingdom.

The basic forces were provided by the Great Yan Kingdom, and the high-end combat forces were provided by Taichi Hall.

More importantly, all of Water Blue Star's 'nuclear power' had been destroyed by Xuanqing, so even if there were enemies who wanted to perish together, they could only engage in conventional warfare.

Conventional warfare?

Under Emperor Haotian Cang Qingyu, Yama Huai Qingyun of the Netherworld, and the supervision of the three human emperors, without nuclear power to destroy everything, what kind of waves could be stirred up?

So!

In the case of Taichi Hall being determined to achieve unification at all costs...

In just the first month, areas such as Gundo, Luo Que, and Annan in Southeast Asia near Yan Country were annexed into the Great Yan Federation Country.

In particular, Gundo Honko, which hadn't yet recovered from the 'punishment of the gods', eagerly agreed to join the Great Yan Federation at the first opportunity, and their decision was met without any objections from the elites to the common people.

Next.

It was the turn of White Bear Country to the north.

At first, White Bear Country threatened with 'nuclear bombs', pretending they still had them.

But when the envoy from the Great Yan Federation directly exposed the lie and said that all nuclear bombs on Water Blue Star had been destroyed by Taichi

Hall-

White Bear Country joined the Great Yan Federation without any hesitation, and even the strong-willed civilians who disagreed were forcibly suppressed.

So.

The entire southeastern region, along with White Bear Country, joined forces in an imposing march toward Peacock Country, another populous nation.

Without any surprises.

Faced with such a huge trend, Peacock Country initially thought of sending a message to their big brother, but the reply they received was 'good luck.' In such circumstances,

Peacock Country naturally lost the will to resist and obediently joined the Great Yan Federation.

Worth mentioning is that.

From the beginning, Peacock Country somehow learned that all nuclear weapons on Water Blue Star were ineffective.

This emboldened them, thinking that without the devastating nuclear weapons, wouldn't they be the most powerful with the largest population?

However.

When Taichi Hall of the Great Yan Federation deployed only one hundred Taoists, it directly caused a bloodbath in Peacock Country.

Only then did the arrogant Peacock Country realize that even without nuclear weapons, they still stood no chance against these Taoists who were even more potent than the protagonist of 'divine movies.'

No matter how many people they piled on, it had no effect whatsoever.

In the end... The result, of course, was a humiliating defeat for Peacock Country, and they cooperated fully with the Great Yan Country.

So.

The Great Yan Federation, carrying the power of a rising tide, swept across the entire Water Blue Star.

Seven months!

In just seven months, under the pressure of the entire world, Bird Country, which had dominated Water Blue Star for a long time, finally bowed its proud head.

With that!

Under the leadership of the Great Yan Federation, the whole of Water Blue Star completed its unification!

Chapter 469: Chapter 346: In a blink of two and a half years, the Chaos of the Beginning sweeps away the dust!

After the establishment of the Water Blue Star Great Yan Federation, it was decided by the Great Yan National Assembly to hold the Federation establishment ceremony in Moonlight City.

Moonlight City.

As the first interstellar mining transfer city for humanity.

At this moment, the city was bustling with excitement, with people of all skin colors gathered here, waiting for the press conference of the Water Blue Star Great Yan Federation.

Because there were so many people who wanted to participate in the founding ceremony, the Great Yan Country put restrictions on the event, allowing only national leaders, world-renowned figures, and major media journalists to attend.

Boom-

With a deep copper bell sound, a traditional song of the Great Yan Country echoed through the huge square.

“Welcome everyone to Moonlight City to attend the opening ceremony of the Water Blue Star Federation!” The host said.

Of course.

As this opening ceremony was facing the world’s countries and over a billion people, the speech was immediately translated into several mainstream languages.

“Now, please welcome the Honorary President of the Great Yan Federation... Ms. Yang Ying to give a speech on stage!”

As the host’s words fell, the director switched the camera to another location.

On the high platform.

Yang Ying, wearing a traditional Taiji Hall Taoist robe, stepped onto the podium and began her speech.

“Since the birth of humanity, we have always lived in various forms of conflict. The founding of the Great Yan Federation is to unite humanity and bring together all of humanity’s resources...”

There was no choice.

In such a grand and solemn atmosphere, some formalities had to be said. After finishing this, she added the new Federation calendar, implying that a new era has arrived!

“Today officially marks...The first year of the Federation calendar, July 6th...”

Following that,

She addressed the main topic.

Yang Ying talked about the things that the people of various countries cared about most.

“Now I will speak on behalf of the Great Yan Federation Assembly about the issues that concern everyone the most.”

“Starting today, the Federation Assembly will coordinate materials worldwide, improving labor-intensive industries, and ensuring that no working hours exceed... every day...”

“All aid agencies in Blue Star will be merged into the Taoist Charitable Association, which will be centrally managed by the Taoist sect, bringing tangible help to all those who need it...”

“Regarding interstellar development, it will be open to all member countries of the Federation Assembly, free of charge, from the moment the Federation Assembly is established.”

This opening ceremony of the Federation Assembly will be broadcasted live simultaneously on the internet, television, and radio throughout the world.

After the establishment of the Water Blue Star Great Yan Federation.

First month.

Yang Ying, Elder Qianqing, and Elder Jingde began the transformation of the “labor-intensive industries” in the entire East Asia region.

They knew that once the interstellar era began, the most important thing for the people of Water Blue Star would be population.

To increase the population, slogans alone would not be enough; the people must live well and have hope for the future.

East Asia is the most competitive region in the entire Water Blue Star, with the longest working hours of any region on the planet.

Under these circumstances, the population continued to decline, which is contrary to the overall development of humanity, the development of Tai Chi Hall, and the instructions of the palace lord himself.

After solving the problem in the East Asia region, they began the education popularization in Hei Province.

It can be said that

the “competition” of East Asia and the “laziness” of Hei Province are two of the most difficult problems to solve in the development of Water Blue Star.

As for Hei Province.

The Great Yan Federation Assembly, in joint consultation with the Tai Chi Temple, came up with a solution.

That is the traditional skill of the Great Yan Country... Divide!

How to divide?

To award the hardworking and non-lazy Hei Province people with the “Ode Biao” medal, enjoying various benefits from the Federation, and living a better life.

On the contrary,

For those lazy Hei Province people who deceive, cheat, and abuse their wives for no reason, in addition to not being able to enjoy the various benefits of the Federation, severe cases will even be subjected to special punishment.

It’s not as simple as going to jail, but being expelled from Water Blue Star and sent directly to the lunar mining area, contributing to the cause of Controlled Nuclear Fusion.

After resolving these major issues,

the Great Yan Federation promoted the Great Yan language as the official language of Water Blue Star around the world.

This point is quite smooth, with no opposition from top to bottom.

The reason for this is that The Law of Divine Cosmic Contemplation is based on the Great Yan text, and if you don’t know the Great Yan language, it means you can only remain a mortal in this life, without a chance to touch the “superhuman” power.

It’s worth mentioning that,

Because of the establishment of the Federation, the Water Blue Star’s “superhuman” is now well known to the world. People know that there is a mysterious Taoist sect in the Great Yan Country that possesses extraordinary powers, and to gain these powers, one must practice The Law of Divine Cosmic Contemplation and receive God’s blessings.

In this way,

The layout of Taiji Temple on Water Blue Star is proceeding methodically.

Yang Ying, Elder Jingde, and Elder Qianqing, all adhere to the principle of peaceful resolution if possible, but are not afraid to use force if necessary, directly suppressing with their powerful martial skills.

At first glance, this approach may seem controversial, but in the long run, it is the most beneficial for the development of Tai Chi Temple and humanity as a whole..

Chapter 470: Chapter 346: In a blink of two and a half years, the Chaos Primordial Dust Wiper sweeps away the dust!\_2

In the Great Yan Kingdom, there is an ancient saying, “Sin is at present, merit lies in the future forever,” which is true.

Time slowly slips away.

Water Blue Star’s Heavenly Realm, the Thirty-six Heavens.

Xuanqing leisurely leaned against the Eight Trigram Furnace, his fingertips turning into a small knife, occasionally cutting a wooden stick.

Scratch-

With his hand movement, the wooden stick was gradually trimmed to a smooth and rounded shape, with a slightly expanding opening at the top.

“I wonder, how strong is the handle made from the trunk of this half-step chaos level Flat Peach Divine Tree?”

As Xuanqing shaved the wooden stick, he thought to himself.

He planned to cultivate only after the Water Blue Star had more ingots saved up, otherwise, it would be very uncomfortable to practice intermittently.

50..he finally came to the Thirty-six Heavens in the Heavenly Court, taking advantage of the high time ratio here, planning to take a break for a while, and accumulating enough incense in the Water Blue Star.

But after dozing off beside the Eight Trigram Furnace, he remembered that since his duster had been destroyed, he no longer had a handy tool.

As a Taoist, if there is no handy tool, can he still be called a Taoist?

So.

The above scene occurred.

He decided to make another duster, choosing the trunk of the Flat Peach Divine Tree as the handle of the duster between the Ginseng Fruit Tree and the Flat Peach Divine Tree.

As for the dust silk of the duster...it is made of Qingxu's whiskers.

A moment later.

A handle made from a half-step chaos level Flat Peach Divine Tree was completed by him.

The handle was two feet, one inch, and two parts long, with a circumference of one inch, five parts, and seven li, with a handle knob for tying the dust silk, and a yin and yang fish pattern engraved on it.

Looking at the handle's appearance in front of him,

Xuanqing nodded in satisfaction, then took the handle in his hand and tentatively poured a trace of world power into it.

"It can withstand the power of the world, but the smoothness is still lacking..."

After thinking for a moment,

He decided to make the duster completely first and then deal with the strength issue of the duster. Don't forget...his login tool also has a 'fusion upgrade' feature.

With this idea,

Xuanqing waved his palm and took out a golden thread about half a meter long from the game backpack.

As soon as the thread was taken out of the game backpack, it released a powerful force of luck and causality, causing the surrounding space to twist slightly.

"It is a pity for Qingxu..." Xuanqing shook his head.

The thread in his hand was made from the whiskers of Gentleman Bai She, possessing the enhancement of luck and causality, higher level than the Ancestor Master's old cow's tail.

Of course.

Just one Luck Golden Dragon whisker would not be enough to refine the dust silk.

“Upload to the Mall!” Xuanqing pinched the dust silk and murmured silently.

[Product uploading...5%..40%/o...57%...99°/o...i00°/o!]

Although Gentleman Bai She's Luck Golden Dragon body is extraordinary, the speed of uploading only a single whisker is very fast.

In just a moment, the successful upload prompt rang in his mind.

[Ding- Congratulations, Upload Successful, Mall Increment: Luck Golden Dragon Whisker (10 million)]

“Ten million ingots?”

Xuanqing pondered.

The price is not expensive, but if you want to make dust silk, one Luck Golden Dragon whisker is definitely not enough.

50.. .although it seems that 10 million ingots is not very expensive, a large quantity is needed, which also consumes quite a significant amount of funds. After thinking for a moment,

“Purchase one thousand Luck Golden Dragon whiskers.”

As the words fell,

[Ding... -100E Ingots!]

With the deduction of the ingots, his game backpack had an additional one thousand strands of golden thread.

With the main components of the duster prepared, all that remained was to make the handle of the duster.

With a thought,

Xuanqing took out a thousand strands of golden thread.

In an instant,

Immeasurable luck and causality spread across the Thirty-six Heavens, causing the whole space to become extremely unstable.

Perhaps one Luck Golden Dragon whisker is not much, but a thousand of them together can create a qualitative change.

“Melt!”

Xuanqing shouted softly.

A thousand strands of Luck Golden Dragon whiskers fused together, blooming with dazzling light, finally condensing into the form of dust silk.

Next,

Various jadeite auxiliary materials were taken out from the game backpack, turning into a circle to set these dust silk on the handle.

It was quick.

A duster with a handle made from the Flat Peach Divine Tree and the whiskers of the Luck Golden Dragon floated quietly in midair.

Picking up the duster.

“Not bad, with the addition of the Flat Peach Divine Tree branch and the whiskers of the Luck Golden Dragon, this duster has reached the half-step chaos level!”

Xuanqing examined the strength of the duster.

However,

Even the half-step chaotic magic duster still didn’t meet his requirements.

50.. .

“Upload this item to the game mall!”

Xuanqing held the duster and muttered to himself.

[Product uploading...!%..5°/o...20%...50....95....99...i00°/o!]

The upload progress bar increased quickly.

For the previous Xuanqing, uploading a half-step chaotic level magical tool would take a long time, but now it was done rapidly, reaching one hundred percent in no time.

[Ding- Congratulations, upload successful, mall increment: Half-Step Chaos Duster (took)]

Even more,

After the successful upload, the system didn't even display the name but directly presented it as a half-step Chaos duster, hastily finishing the transaction.

"Buy the Half-Step Chaos Duster."

[Ding...-1E Ingot!]

In an instant,

Another identical duster appeared in the air.

Without any hesitation,

"Fusion Upgrade!"

Xuanqing muttered again in his mind.

The half-step chaotic magic weapon was already quite good, but for him now, it was a bit behind the times.

[Ding.. Fusion upgrade in progress...1%...2%...]

This time, the progress bar was slower. After all, according to past experience, once two half-step chaotic magical tools were fused and upgraded, they would become a true chaotic level magical artifact.

As for that,

He wasn't in a rush. He came to the Heavenly Realm's Thirty-six Heavens just to pass the time, waiting for enough Incense Fire Ingots to be gathered on Water Blue Star, and then harvest them all at once to go into closed-door cultivation.

Two days passed in the blink of an eye, and the prompt of the quantifier sounded in his mind.

[Fusion completed, please name the new item...]

"Hmm...?"

With narrowed eyes, Xuanqing casually said, "Call it Chaos Primordial Dust Wiper."

It wasn't that he wasn't good at naming things, he simply didn't care about the external appearance of the name. As long as the magic weapon itself was effective, whether it was called Zhang San or Li Si, Wang Er Maz, it made no difference to him.

[Ding...Name successful!]

[Name]: Chaos Primordial Dust Wiper

[Grade]: First-Class Chaotic Magical Instrument

[Usage]: Attack, Defense, Daily Assistance

“It is indeed an all-purpose magic weapon, suitable for both offense and defense, and also useful in everyday life.”

Looking at the information on the magic weapon’s panel,

Xuanqing had a slight smile on the corner of his mouth, speaking admiringly.

Although he already had the Chaotic Oblivion Cauldron for attack, as a Taoist, using a ‘pot’ to fight others seemed disgraceful no matter how one looked at it. Now that he had a Chaos level duster, it filled this gap.

“Phew-” Xuanqing stood up, holding the new Chaos level duster and stretched lazily.

“After checking the time, I’ve spent more than two days in this Heavenly Realm, but two and a half years have passed in the human world of the Water Blue Star.”

Xuanqing looked down at his feet.

He wondered how the Water Blue Star had developed in the past two and a half years, whether Taiji Hall’s subordinates had achieved the unification of the Federation, and most importantly, how many incense fires had accumulated on Water Blue Star, which could be exchanged for how many ingots.

“It’s time to return to Water Blue Star!”

Thinking this in his mind,

Xuanqing’s figure turned into specks of starlight, disappearing into the Thirty-six Heavens of the Heavenly Realm.

Water Blue Star.

Great Yan Country... no, it should be called the Great Yan Federation now.

Although two and a half years had passed, every blade of grass and tree on

Qingping Mountain remained unchanged from their original appearance..
