

I Can Enter The Game

Chapter 21: Expensive Ornamental Fish! Instantly Becoming a Millionaire! 1

Wild Albino Tiger?

4

Qin Lin knew about wild bass, wild grass carp, and wild black carp.

He really did not understand ornamental fish.

Every time he saw the expensive ornamental fish that others had meticulously raised, his first thought was how was the taste different when steamed and stir-fried?

2

He felt that those people were paying a very high IQ tax.

However, now that he had obtained such an expensive wild ornamental fish, he still took out his phone and searched online.

The Albino Tiger was a top-grade variant of the Indonesian tiger. Its characteristics were its dazzling white-brown color and very beautiful appearance.

2

However, wild ones were extremely rare and could only be chanced upon by luck. It was just like how it was not rare to see beautiful women after makeup, surgery, and beauty enhancement. There were really few natural and bare-faced beauties.

4

Of course, this was not the most important thing. When Qin Lin saw the price of this wild Albino Tiger, he was really a little stunned.

Such a fish could be sold for 600,000 yuan? The price of a BMW 5 Series?

1

To an ordinary person like him, it was unimaginable that a fish was equivalent to a BMW 5 Series.

More importantly, was this kind of fish still priceless? Any fish that appeared would be snatched by the fish slaves. This could only mean that there were too many people who had money but no place to spend it.

Qin Lin entered the game in disbelief and looked at the fish the dwarf had given him. Was such a fish really worth so much money?

This was more money than he had earned from working hard to plant watermelons, strawberries, and okra.

[Wild Albino Tiger: Quality 2!]

[This is a very beautiful fish. Looks +2, taste +2, delicious +2, desire to buy +2!]

1

It tastes really good~

Although he felt that there was something wrong with the head of a person who would spend 600,000 yuan to buy such a fish, he wanted to find a person with such a head immediately.

Between an expensive fish and 600,000 yuan, he naturally chose 600,000 yuan.

However, it was a problem who he sold it to. Although one of them would be snatched away, he did not know how to let those people who would snatch it know.

1

With a thought, Qin Lin brought the container and the Wild Albino Tiger out of the game. Then, he called for a taxi and carefully carried the fish into the car.

There was a shop in Youcheng County that sold ornamental fish, but this shop definitely did not have any ornamental fish that cost hundreds of thousands. They all sold ornamental fish that cost dozens or hundreds of yuan.

However, there must be a way to open this ornamental fish shop, right?

When he thought of the 600,000 yuan in his hand, Qin Lin instructed the driver as soon as he got into the car, "Sir, drive slower later. Don't scare this fish."

“...” The driver looked at Qin Lin from the rearview mirror and felt like he had met another strange passenger.

It was just a fish. Did he need to specially instruct him? How fast could he drive in this city? He could just overtake a few cars.

Naturally, the driver did not know that this fish was worth a BMW 5 Series top-grade car. Otherwise, he might have rejected it.

Soon, Qin Lin was brought to a shop called Huimai Ornamental Fish. When he entered the shop, he saw a man whistling as he patiently surrounded a fish tank.

He was probably even more gentle to it than he was to his wife.

“Is the boss around?” Qin Lin asked as he carried the Albino Tiger into the shop.

“Sir, I’m the boss!” the man turned around and replied. His gaze was attracted to the fish in Qin Lin’s hand. He said in surprise, “Albino Tiger? This color and appearance... It’s from the wild? It’s top-grade.”

“Sir, are you buying an aquarium or fish food? If it’s an aquarium, I don’t have anything worthy of your fish. I’m afraid I’ll have to customize it. I still have some fish food...”

Qin Lin immediately said, “Boss, I want to sell this fish. Do you have a way?”

These words clearly made the boss’s eyes light up. He actually invited Qin Lin to sit down enthusiastically. “Sir, I’m Lin Sheng. Are you going to find a buyer for this fish? I have a channel to help you, and I can help you fight for the highest price. However, according to the rules, as a middleman, I need to take 20%.”

This was also why he was suddenly so enthusiastic.

Wild Albino Tiger. He knew the price of this fish and happened to know that there were a few ornamental fish at this price in a farm player’s WeChat group. Wasn’t this a coincidence that the God of Fortune came to his doorstep?

How many aquariums and low-quality ornamental fishes must he sell to earn this money?

“Boss Lin, then we’ll follow the rules. You’ll get what you deserve.” Qin Lin did not doubt this. Didn’t many businesses in society rely on intermediaries? Such people had another professional title: brokers.

Of course, there were also professionals and temporary guests. He could tell that Lin Sheng was clearly a temporary guest.

As for the 20% he said, he did not know if it was expensive or normal.

However, this did not matter to him. After all, this fish had no capital. There was no way he could find a buyer himself. It might waste a lot of time and energy, and some things might even happen.

1

“Sir, you look like a magnanimous person.” When Lin Sheng saw that Qin Lin had agreed, his smile grew wider. However, he was also afraid that Qin Lin would renege on the contract. He professionally printed a commission contract and signed it with him.

After that, he took a few sets of photos and videos of the fish to check if there were any marks or registration codes.

2

Seeing that it was all blank, he picked up his phone with a happy expression and began to operate it. He called a few more times and sent WeChat photos and videos.

This process lasted for almost an hour before Lin Sheng said to Qin Lin, “Sir, I’ve helped you contact three interested people. There’s a boss in the Water City who offered the highest price. He’s willing to pay 650,000 yuan for this fish. He’s from the city and will take two hours to get here.”

2

“Okay!” Qin Lin nodded. He did not expect him to be more anxious than him, the fish seller.

Two hours passed quickly. After a car stopped at the entrance of the shop, a man in his 40s walked in and asked, “Boss Lin, where’s the fish?”

Lin Sheng immediately pointed at the container on the table and said, “Boss Zhuang, the fish is here. The person beside you is the fish owner, Mr. Qin.”

“Mr. Qin, then I’ll look at the fish first?” Boss Zhuang was clearly a little anxious. He greeted him and went forward to watch with bright eyes.

Qin Lin did not disturb him.

However, he could clearly see a wretched expression gradually appear on Boss Zhuang’s face.

“Beautiful, so beautiful... These eyes... This figure... This skin is really perfect!” Boss Zhuang said with a face full of joy. “The natural ones are indeed better.”

3

It was as if he had seen a beauty.

This stunned Qin Lin. To be honest, in his eyes, other than being a little beautiful, that fish was nothing.

“Mr. Qin, I want this fish. We can transfer the money immediately,” Boss Zhuang said anxiously after admiring it for a moment.

This fish was top-grade. It was natural and wild, and it was very well taken care of. It could be one of the final pieces of his aquarium exhibition.

Furthermore, for some reason, when he saw this fish, he had a strong desire to buy it. He knew that he would definitely regret not buying it.

Qin Lin naturally had no objections, but he really did not understand these fish farmers. This person who spent 650,000 yuan to buy fish was even more anxious than him who sold fish. It was as if he had gotten a big beauty and was preparing to get a room.

Perhaps this was the effect of ‘desire to buy +2’!

Not long after.

Boss Zhuang left with the fish with a flushed face.

Naturally, Qin Lin’s card also received a huge sum of money.

“Your last number... income is 650,000 yuan. Your balance is 1,035,779.60 yuan.”

2

In an instant, he had become a millionaire?

Chapter 22: A Villa! Upgraded Again! 1

What could one million yuan do?

1

For Qin Lin, he could completely pay off the debt at home and even pay the down payment for a house to bring Zhao Moqing home.

1

Of course, if it were someone else with ambition, they would definitely think of using these one million yuan to do something big. They might even have already constructed various plans in their minds to earn one million yuan next.

However, he was not ambitious. Before he had a goal, he still chose to be light-hearted and let Zhao Moqing know that he had not misjudged her.

4

After receiving the 650,000 yuan transfer, Qin Lin decisively transferred the 13,000 yuan to Lin Sheng.

9

He had earned so much in one go, so he did not want the middleman to wait too long. Both sides' happiness was the foundation of their next cooperation.

Perhaps that dwarf in the game, Arnie, would come looking for him to compete in fishing again and give him another fish? That would still require Lin Sheng.

Lin Sheng also saw that it was Qin Lin's first time selling this ornamental fish. He smiled and reminded him when he received the money, "Mr. Qin, remember to report and pay taxes within a month. Although there's no specific tax on the ornamental fish business, it's currently included in the special tax on agricultural products."

"Previously, someone forgot to declare that he had sold an ornamental fish for 500,000 yuan because he had not experienced it before. Soon, he was reported. Not only was he fined double, but he also went to jail for a period of time."

"Thank you for your reminder, Boss Lin!" Qin Lin nodded in gratitude.

He naturally would not forget to pay taxes. He was actually more afraid of being investigated if he forgot to pay taxes. After all, he did not want his secrets to be known.

5

After bidding farewell to Lin Sheng, Qin Lin logged into the tax bureau's website as soon as he returned to the shop on the market and reported the tax on the transaction.

Although ornamental fish was included in the agricultural product entry, it was a special value-added transaction. The tax rate was 9% and the value-added tax was 3%. In other words, he had sold it for 650,000 yuan and had to pay 78,000 yuan in taxes.

After registering and paying taxes online, Millionaire -1 only had 953,000 yuan on his card.

1

In the evening, the strawberries and okra matured. Qin Lin picked them immediately and planted new seeds. Then, he sent the ripe strawberries to the RT-Mart and earned 42,390 yuan.

In addition, he took out 10 catties of Quality 2 okra for Manager Chen. One catty was 400 yuan. Manager Chen paid 4,000 yuan happily and even instructed him to deliver all the goods to him.

He had earned a total of 46,390 yuan today. After receiving it, his bank account had exceeded a million yuan.

Millionaire +1 again.

2

At night.

After dinner, Qin Lin went into the bathroom to take a shower. He even specially picked a shirt and blew his hair before going to pick Moqing up from work.

When he arrived at the tax bureau, the people working overtime inside walked out one by one. Chen Hao was among them. It seemed like there were many people working overtime today.

Chen Hao naturally saw Qin Lin again. This time, he walked toward his Audi expressionlessly. He did not want to see such a fellow pretending to be a pig to eat a tiger.

“Qin Lin!” Zhao Moqing came out with a document and Li Jiahui. When she saw Qin Lin, she jogged forward happily and sat in the backseat.

Li Jiahui could not help but feel envious when she saw this. How romantic!

Which woman did not want a husband who rode an electric car like this to pick her up from work?

5

Qin Lin turned on the small electric car and headed to the hotel. After getting his room card and going upstairs, he shook the room card in his hand. “I booked the best room in this hotel today. I heard the bathtub inside is super...”

“Do you want to die? We’re in public.” Zhao Moqing reached out angrily and hit Qin Lin’s waist hard.

Qin Lin took out his room card proudly and opened the door.

“I’ll take a shower first!” Zhao Moqing put down her bag and documents when she entered the room and ran to the bathroom.

Qin Lin was not an ignorant person. He followed obediently.

...

An hour later.

1

Qin Lin watched as Zhao Moqing organized the information she had brought with a towel by the side and asked, “Moqing, what information is so important? You still brought it back to do it after work?”

Zhao Moqing explained, “Wasn’t there a problem with a township state-owned enterprise previously? The problem is still very serious. A few people went in, but some money couldn’t be recovered, so we could only seal their assets and auction them in court.”

“I worked overtime today for this. Uncle asked me to be in charge of checking these documents and then send them to the court to register for the auction tomorrow.”

Qin Lin nodded. Zhao Moqing’s uncle was a section chief in the bureau. He was clearly taking care of Zhao Moqing and giving her some credit.

He had also heard about the town enterprise. It had even spread on Youcheng County’s WeChat Moments. After all, everyone was most concerned about corruption now.

He took the documents that Zhao Moqing had reviewed curiously. They were all cars, houses, stocks, and so on under those people’s names. However, an auction item attracted his attention.

This was an auction for a farmhouse. Could this be the farmhouse that Moqing had said those corrupt people were eating and bragging about?

This farmhouse was called Fuhai Villa. It was not small and covered about 500 acres. It included a fish pond and the right to use the reservoir near the villa.

However, most of the villa were not used well. It was all wasteland...

Furthermore, in a small place like Youcheng County, which was a court auction, the starting price for the rental period and property rights transfer was not very expensive. It was only 600,000 yuan.

As for the final price, it depended on the competitor.

“Moqing, this Fuhai Villa is also being auctioned? There won’t be any follow-up problems, right?” Qin Lin asked subconsciously. He was clearly thinking about it.

1

He majored in tourism management at university. When he saw the information, he felt that Fuhai Villa and Shepherd’s Field game in his mind seemed to be able to combine. He could not keep growing watermelons, strawberries, and okra to sell, right?

Now that he had the system to guarantee his income, he was not a pedantic person who went to a dead end. With a ready-made goal, he could delay his debt repayment and purchase goal for a while. After all, many times, good opportunities did not wait for others.

If any creditor really had something to do before returning it, it did not matter if it was a few days earlier or later. A debt of gratitude was for a lifetime, and it was not something to be rushed for the next few days.

However, there were usually many follow-up troubles in court auctions. For example, there were people from the families of the parties involved who caused trouble and had potential debt risks.

Zhao Moqing explained, “There are potential problems with a car and a house, but someone who dares to auction such a car and house will definitely have a way to resolve it.”

“As for this Fuhai Villa, there’s no problem. I’ve gone there to take a look. The environment is still not bad. They only cared about providing them with food and water and did not manage it well.”

Qin Lin was relieved to hear Zhao Moqing’s words.

...

The next morning, Qin Lin checked out with Zhao Moqing. He still had to send her back to change before sending her to work.

After that, in less than a day, Qin Lin saw those auction items appear on the Youcheng County Justice Auction Network, including Fuhai Villa. Other than the starting price being 600,000 yuan, there was an additional auction item. The rental contract could be

delayed to the longest period to be signed again. The rent would not increase during the delay. In addition, there was a priority lease.

The land in this villa belonged to the government. When the lease period came, it had to be rented again. At the same price, it had priority.

However, this was not attractive enough. After all, it was only a villa in a small place. It was not certain if it could be done well. If it was not done well, there was no point in losing everything.

What he had to consider now was whether there would be anyone competing. If he encountered someone he liked, it would definitely exceed the starting price of 600,000 yuan and might even exceed a million yuan.

He believed that he was not the only one with good taste.

No matter what, Qin Lin decisively filled in the information and signed up for the auction. The auction date was a week later.

...

A week passed in the blink of an eye.

Over the past week, planting strawberries and okra had brought Qin Lin more than 270,000 yuan, which also made his funds reach more than 1.28 million yuan.

When he woke up in the morning, Qin Lin had received a notice of a judicial auction early in the morning. The auction would officially start at 2 PM. He had to pay 10% of the starting price to qualify for the auction.

Qin Lin decisively paid 60,000 yuan before looking at the game screen to pick the ripe strawberries and okra and plant new seeds.

This time, as soon as the seed was planted, the game received a notification.

The game character had leveled up again. He could develop new land and upgrade a level 3 land.

3

Qin Lin looked at the screen in his mind immediately.

His game character leveled up again. The notification he received was that he could develop Level 1 land again and upgrade one Level 3 land.

Level 3 land could grow more valuable crops.

Of course, upgrading to level 3 required the gold coins in the game. He had sold all the crops in the game in reality, and there were no gold coins in the game.

Fortunately, the fishes he caught every day were still there.

He immediately sold all the fish. Naturally, he kept the wild basses, wild grass carps, and black carps of Quality 2.

These big items were all good things, so he naturally kept them.

However, after selling all the fish he had caught during this period of time, there were already a lot of game gold coins. It was actually not enough to upgrade to Level 3.

It seemed like the higher the level of this land, the more game gold coins it required.

Qin Lin simply controlled the game character to take out his tools and develop the newly opened land.

Weeding, gravel, cutting wood... After spending some time developing the six plots of land, he planted new okra seeds.

He did not plan to sell these six plots of okra in reality. He would sell them all in the game.

He had to develop that Grade 3 land first.

Furthermore, a portion of the land that was opened up in the future had to be reserved for the game to be sold. In the future, character upgrades and development would always require game gold.

Time passed.

At 2 PM, Qin Lin received the message that the judicial auction had begun.

With the development of the online information society, there were fewer and fewer traditional judicial auctions now. The court had also begun online judicial auctions with the times.

Qin Lin logged into the local judicial auction network and received an auction number backstage.

The things sealed by the tax bureau had already begun to be auctioned.

Soon, the Fuhai Villa began to auction.

Furthermore, as he had expected, someone else had taken a liking to this place.

As soon as the auction began, three people took turns bidding. From the beginning of the auction to 600,000, 610,000, 620,000, 630,000... until 700,000 yuan.

These three people had all bid 11,000 yuan, making them seem petty. It was obvious that they wanted to auction it at the lowest price. At the same time, their budget should be limited.

This made Qin Lin think. He only had a budget of 1.28 million yuan. He did not know what the others' budget was.

1

He could not grind it out with these three people. Such people actually had a mentality. That was, if he added another 10,000 yuan, they might give up and think that it was a fluke.

Furthermore, 10,000 yuan was not that much pressure. 10 times was only 100,000 yuan.

However, if it was an increase of 100,000 yuan at a time, the pressure would be completely different. It would even give off a determined aura.

As he thought about this, Qin Lin wanted to add 100,000 yuan to the bid. However, before he could do anything, a fourth person joined and directly offered 800,000 yuan.

Someone had thought of the same thing as him and added 100,000 yuan at once.

Indeed, the three people with 10,000 coins stopped bidding.

100,000 yuan each time was indeed quite scary to the three of them. It also meant that the three of them did not have enough budget and were purely trying to take advantage of the situation.

Qin Lin was vexed.

He had met his match. He just did not know how much this person's budget was now.

"Forget it. Let's just go with the flow. It depends on fate," Qin Lin muttered and directly placed a bid of 1.2 million. The starting price was doubled.

2

Wasn't it just scaring people? Let's see who would scare who.

Anyway, he had earned this money without any capital.

If the other party continued to snatch with him, he would treat it as a lack of fate.

At this moment,

In a room, the three young men were already looking at the computer proudly.

One of them smiled and said, "I knew it. Adding 100,000 yuan in one go must have frightened these three dilly-dallying fellows. If we grind with them for 11,000 yuan, we might even spend more than 100,000 yuan."

When one was young, one had to have the spirit to work hard and start a business. The three young men were like this. They had worked as travel planners in the city previously. After accumulating a few years of experience, they wanted to return to their hometown to start a business.

They also felt that Fuhai Villa had a lot of potentials, so they raised a sum of money and planned to bid for it.

The three of them were in a good mood when they saw that the increase in price had frightened the other bidders.

"q43 bids 1.2 million!"

The latest bid came from the computer.

"Damn, there's someone stirring up trouble?" a young man said in frustration.

1.2 million?

When they saw this price, the three of them were stunned.

Did he increase the bid by 400,000?

"This person is crazy!"

1

"How f*cking willful!"

The three of them complained.

They did not know if this fellow was bluffing by adding 400,000 yuan, but they knew that their additional 100,000 yuan was definitely a bluff.

Some people had been frightened, but someone else was even more ruthless.

“Are you still... following?” someone asked.

The other two were also conflicted. This was far beyond their budget.

One of them sighed and said, “Why don’t we forget it? We’re still young anyway. We’ll still have a chance.”

“Wait a little longer!” the other person said.

“Then let’s wait a little longer!” a third person said.

...

“Congratulations to Q43 for successfully bidding for Fuhai Villa. You can pay the money according to the information received backstage and go through the relevant procedures.”

Qin Lin heaved a sigh of relief when he saw this.

It seemed like the other party was also bluffing. His actions had frightened the other party.

With the auction at the villa, Qin Lin did not want to delay it. He went straight to the court and planned to settle the procedures first and pay 1.2 million yuan.

However, the procedures for such a large sum of money were very troublesome. Not only did he have to receive a ruling confirmation in the court, but he also had to get the relevant departments to cooperate with him.

These procedures would take at least a few days to review.

However, after paying 1.2 million yuan and receiving the verdict and receipt, these procedures could be slowly handled. After all, this auction was recovered by the tax bureau, and no department would interfere. If word got out, it would destroy their official credibility.

In the evening.

Qin Lin received the ripe strawberries and okra and sent them to RT-Mart. After a day of income, his bank balance broke through from 80,000 yuan to 120,000 yuan.

After that, he rode the electric scooter to the tax bureau to pick Zhao Moqing up from work again, wanting to tell her the good news about Fuhai Villa.

Zhao Moqing quickly came out with a smile.

“Moqing, something good seems to have happened today?” Qin Lin asked with a smile.

Zhao Moqing smiled and said, “Of course, I’m happy that there will be more bonuses this month. The things our tax bureau sent to the auction today are very effective. They exceed the estimated value of the items.”

“Especially Fuhai Villa. It seems like a tycoon has taken a liking to it and directly bid 1.2 million yuan.”

“This is much more than what we expected. Everyone even said that the others were frightened. If there was anyone else who raised the price, this spendthrift who doesn’t lack money would probably pay a higher price.”

“...” Qin Lin.

Rich? A spendthrift who did not lack money?

Was she talking about him?

He suddenly did not want to share this happy news with her.

He had to make this villa popular and give her a huge surprise.

Zhao Moqing continued, “However, if they can spend so much money to bid for Fuhai Villa, they must be serious about developing it, right?”

“To be honest, there are so many wastelands in the villa. If we can plant a sea of gorgeous triangular plum blossom, it can attract a lot of people.”

Qin Lin silently remembered Zhao Moqing’s words.

The triangular sea of plum blossoms had to be arranged first.

Chapter 23: Villa in Hand! Triangular Sea of Plum Blossoms! 1

1

Qin Lin looked at the screen in his mind immediately.

His game character leveled up again. The notification he received was that he could develop Level 1 land again and upgrade one Level 3 land.

Level 3 land could grow more valuable crops.

Of course, upgrading to level 3 required the gold coins in the game. He had sold all the crops in the game in reality, and there were no gold coins in the game.

Fortunately, the fishes he caught every day were still there.

He immediately sold all the fish. Naturally, he kept the wild basses, wild grass carps, and black carps of Quality 2.

These big items were all good things, so he naturally kept them.

However, after selling all the fish he had caught during this period of time, there were already a lot of game gold coins. It was actually not enough to upgrade to Level 3.

It seemed like the higher the level of this land, the more game gold coins it required.

Qin Lin simply controlled the game character to take out his tools and develop the newly opened land.

Weeding, gravel, cutting wood... After spending some time developing the six plots of land, he planted new okra seeds.

He did not plan to sell these six plots of okra in reality. He would sell them all in the game.

He had to develop that Grade 3 land first.

...

"Congratulations to Q43 for successfully bidding for Fuhai Villa. You can pay the money according to the information received backstage and go through the relevant procedures."

Qin Lin heaved a sigh of relief when he saw this.

It seemed like the other party was also bluffing. His actions had frightened the other party.

With the auction at the villa, Qin Lin did not want to delay it. He went straight to the court and planned to settle the procedures first and pay 1.2 million yuan.

However, the procedures for such a large sum of money were very troublesome. Not only did he have to receive a ruling confirmation in the court, but he also had to get the relevant departments to cooperate with him.

These procedures would take at least a few days to review.

However, after paying 1.2 million yuan and receiving the verdict and receipt, these procedures could be slowly handled. After all, this auction was recovered by the tax bureau, and no department would interfere. If word got out, it would destroy their official credibility.

In the evening.

Qin Lin received the ripe strawberries and okra and sent them to RT-Mart. After a day of income, his bank balance broke through from 80,000 yuan to 120,000 yuan.

After that, he rode the electric scooter to the tax bureau to pick Zhao Moqing up from work again, wanting to tell her the good news about Fuhai Villa.

Zhao Moqing quickly came out with a smile.

“Moqing, something good seems to have happened today?” Qin Lin asked with a smile.

Zhao Moqing smiled and said, “Of course, I’m happy that there will be more bonuses this month. The things our tax bureau sent to the auction today are very effective. They exceed the estimated value of the items.”

“Especially Fuhai Villa. It seems like a tycoon has taken a liking to it and directly bid 1.2 million yuan.”

“This is much more than what we expected. Everyone even said that the others were frightened. If there was anyone else who raised the price, this spendthrift who doesn’t lack money would probably pay a higher price.”

“...” Qin Lin.

Rich? A spendthrift who did not lack money?

Was she talking about him?

He suddenly did not want to share this happy news with her.

He had to make this villa popular and give her a huge surprise.

Zhao Moqing continued, “However, if they can spend so much money to bid for Fuhai Villa, they must be serious about developing it, right?”

“To be honest, there are so many wastelands in the villa. If we can plant a sea of gorgeous triangular plum blossom, it can attract a lot of people.”

Qin Lin silently remembered Zhao Moqing's words.

The triangular sea of plum blossoms had to be arranged first.

Chapter 24: Level 3 Land! Seven-Color Symbiotic Triangular Plum! 1

In the next three days, Qin Lin completed the procedures related to the court. However, the other relevant departments still needed three days to review and approve the documents.

He was already fast. He had heard that it was common for some French auction houses to review and approve it for months or more than half a year.

2

Over the past three days, other than harvesting 116,076 yuan, with the game in his mind, along with the game coins he had earned from fishing and planting the okra in the new six slots, he had finally upgraded the level 3 slot.

Qin Lin immediately controlled his game character to go to the seed shop in Ore Town.

As the level 3 land upgraded, the level 3 seeds that could be bought also lit up.

After a rough look, there were seeds such as multi-core four-edged beans, yellow heart gourds, green-skinned kiwis, and milk strawberries...

2

These were all light luxury goods among vegetables and fruits in the market. The plants outside often cost hundreds of kilograms.

1

There was also a seed that surprised Qin Lin. There was a star in front of this seed, which was especially eye-catching.

When one paid attention to the star's symbol, there was a note that represented a mysterious treasure. It was very rare, and it was a level 3 seed randomly refreshed in the shop.

[Seed of seedless watermelon (Quality 2)]

[A seed that has been specially cultivated. The watermelon planted tastes delicious. There is no planting season restriction, and the growth cycle is extremely short.]

This seed had a Quality 2? This was the first time he saw it. The watermelons planted should all be Quality 2. Furthermore, there was no planting season restriction and the cycle was extremely short. This was awesome.

The moment he saw this seed, many thoughts surfaced in Qin Lin's mind.

This thing was amazing.

Other than that, level 3 land could also plant some higher-level ornamental plants.

When he saw a seven-colored flower bud, he immediately thought of Zhao Moqing's words: Triangle Plum Blossoms Sea.

1

Qin Lin immediately took out his phone and searched online. He realized that this multi-colored flower was a high-level seedling.

Multi-colored symbiosis was to graft the colors of the multi-colored plum tree together, allowing a flower of several colors to grow. It was very beautiful and very ornamental.

Naturally, the more colors there were, the more valuable they were.

On the Internet, after a three-colored symbiotic ornamental seedling was cultivated, each one was no less than 3,000 yuan. A five-colored symbiotic seedling could even reach 5,000 yuan.

In the game, there was seven-colored symbiosis, but it was very rare. This was because three-colored and five-colored symbiosis were easy to nurture, but seven-colored symbiosis was very difficult.

1

Qin Lin was planning to surprise Zhao Moqing with a triangular sea of plum blossoms. Wasn't this a coincidence?

Furthermore, buying this villa was indeed a very good plan.

The ordinary triangular sea of plum blossoms could attract many people. He had seven colors and was even a game product with attribute bonuses. Was he afraid that no one would come?

There was no triangular sea of plum blossoms in the vicinity of Youcheng County and Sand City.

If he could use this kind of game to create a triangular sea of plum blossoms in the villa, it would definitely be a big highlight and a selling point.

Furthermore, the temperature in the south was relatively high. The triangular plum blossom period would only start in mid-November, and it would still take two months.

When the time came, the triangular plum blossom viewing ticket would be charged 50 yuan.

With 100 people every day, there were 5,000 tickets alone.

200 people meant 10,000 yuan.

If the publicity was good, there would be even more people.

At that time, would the vegetables and fruits he planted in the game still need to be supplied?

He could just find a place in the villa to build a natural fruit and vegetable supermarket. The things produced by the game were even more delicious. Wasn't he afraid that no one would buy them? Why did he need to let others earn the difference?

Wasn't this wonderful?

After buying the villa, he naturally wanted to develop his career.

Qin Lin did as he thought and immediately clicked on the colorful ornamental triangular plum plant to buy it.

“Seven-color ornamental triangular plum blossoms (group): a special kind of seedling, after it matures, you can obtain beautiful ornamental triangular plum blossom plants. A group of seedlings can randomly obtain 20-30 mature plants.

Maturity: 3 days.”

Qin Lin immediately controlled the game character to plant the group of seedlings he had bought into the Grade 3 land.

In the blink of an eye, another three days passed. Qin Lin finally completed the relevant procedures of Fuhai Villa.

When he changed its name at the Industry and Commerce Bureau and obtained a business license, health permit, and all other relevant documents, he completely heaved a sigh of relief.

From today onwards, Fuhai Villa belonged to him, but he had changed its name to Qinglin Villa.

Spring was dense and secluded. He naturally wanted to fly around and not do anything!

How poetic was that?

Of course, this was nonsense. He was just combining his and Zhao Moqing's name,

Over the past three days, he had earned 120,146 yuan from sending strawberries and okra to RT-Mart. His savings had reached 353,419 yuan.

2

After taking all kinds of procedures home, Qin Lin rode the electric scooter out of the county city and headed for Fuhai Villa.

1

Fuhai Villa was less than 30 minutes away from the county city. It was very close. Furthermore, it was at the intersection of Sand City, the city, and Youcheng County. There were many cars coming and going.

This position was excellent, but the previous person in charge did not know how to operate it.

It had to be known that even a lousy place like East Lake was located in a remote area. It could be done well with fishing and farming.

This place was much better and had better potential. It had been forcefully turned into a place for a few corrupt people to eat.

3

More importantly, they were still bragging here. They had been recorded and posted online. What era was this?

Qin Lin had been to Fuhai Villa once in the past, but this time, his mentality and feeling were always different.

This was already his own industry.

When Qin Lin arrived, he parked the small electric car in the parking lot and chose to walk into the villa to observe carefully.

How big were 500 acres? It was probably 47 large football fields.

Of course, he had only spent 1.2 million yuan. There was no need to think about how much these 500 acres had been developed. Most of them were wastelands.

The most important thing was the main building. Other than a decent reception hall and a few dormitories, there were only a few simple construction areas. They were all half open-air private rooms.

These private rooms were provided to tourists. There was also a kitchen and a barbecue table outside the private rooms.

Most tourists who came to this kind of villa to play didn't want to cook themselves?

That kind of fun cooking was completely different from cooking at home.

Of course, the villa also had its own kitchen. There were always some people who would not cook or did not want to cook. They could order dishes for the chef.

Not far away, there was a vegetable garden in an area that tourists could pick themselves.

There was also a fish pond that could not be seen.

What made Qin Lin happy was that there were also fun settings like swings and jungle adventures behind. There was also a grass slide project.

These settings did not cost much. The gameplay was simple, but at least the guests could play.

Furthermore, there were some potted plants around these facilities. They were considered dispensable highlights.

Not far from the main building, he saw two tall trees that were dozens of meters tall. The branches had withered, and the atmosphere was heavy.

However, these two withered trees were especially surrounded by stones. There were also traces of fertilizer. They should be trying to live.

There was a sign on it: 500-year-old Ancient Ginkgo.

Was this still two ginkgo trees?

It reminded him of the thousand-year-old ginkgo planted by Li Shimin. It was still an Internet-famous celebrity tree.

However, it was obvious that not all ginkgo was as lucky as that one. They had received the best care in a thousand years and were still in their prime.

These two were already about to die.

Not only was birth important, but so were trees!

Other than that, the rest of the villa was a bare wasteland, especially the reservoir. It was probably randomly circled in back then and no one had ever thought to use it.

How should he evaluate it? With his vision as a tourism management major, he could only say that he had just passed in a place like Youcheng County. If he was in the vicinity of the city, he would not even have passed.

Simply put, there was nothing eye-catching that could attract customers.

Therefore, if he wanted to develop the villa, he had to come up with an attractive highlight. The triangular sea of plum blossoms had to be carried out.

As Qin Lin was thinking, a notification appeared on the game screen in his mind. It was that the level three seven-colored symbiotic flower stalk had finally formed. Calculating the time, it should take three days for a batch to form. The time was six times that of the strawberries and okra.

Qin Lin controlled the game character to harvest the colorful triangular plum plants.

[Obtained 25 stalks of seven-colored symbiotic ornamental triangular plum!]

This time, the triangles were not stored in the storage room. Instead, they were stored in a yard behind the ranch.

Then, he controlled the game character to buy a new seven-colored symbiotic flower seedling (group) and replant it.

After that, Qin Lin walked to the toilet in the hall and entered a cubicle. Then, he entered the game.

In the game, he went straight to the courtyard where the colorful triangular plum trees were stored.

As soon as he entered the courtyard, his eyes lit up.

At first glance, he saw 25 triangular plums lined up together. The seven colors intertwined, giving him a very beautiful and stunning feeling. It was a very comfortable and pleasing sight. His gaze could not help but be attracted.

This was much more beautiful than the 5,000 five-colored symbiotic triangular plum trees on the Internet.

When he controlled the game character to pick them, he easily brought these triangular plums to the courtyard. However, when he came closer, these triangular plums were actually taller than him. The roots were even wrapped in transplanted soil.

Then, he touched a triangular plum and saw the notification.

[Perpetual flower-type triangular plum plant: Quality 2]

[This is a special species of ornamental triangular plum. It's 2.5 meters tall, 2 meters tall, and 12 centimeters tall. It's very beautiful and has an extremely high ornamental value. Furthermore, it's easy to transplant. It blossoms all year.]

1

[Game product: Gorgeous +2, Viewability +2, Attraction +2, Feeling Good +2, Entering the Mirror +2, Transplantation Life Rate +2!]

2

Qin Lin was surprised. No wonder it could attract people at a glance.

It actually had so many attributes.

What did it mean to have flowers all year round?

The temperature in the south was special. The triangular plum blossom period was about November to June, and the triangular plum blossom period in the north was about the same.

However, there were definitely very few flowers in bloom all year.

Some ornamental triangular plums might be able to last for an entire year, but it was impossible for them to reach a scale.

The sea of flowers made from this seven-colored ornamental triangular plum plant could bloom all year round. Furthermore, the game had additional attributes.

That would be terrifying.

It was also equivalent to collecting money all year long.

Chapter 25: Villa Employee! Need 15,000 Triangular Plum! 1

Qin Lin knew very well the attraction of the seven-colored, symbiotic, and ornamental triangular plum planted in this Level-3 land.

Gorgeous +2, ornamental +2, Attraction +2. He was attracted the moment he entered.

The camera +2 should have an additional effect like taking photos or videos.

1

Needless to say, this was the most useful to him.

If he wanted to build a triangular sea of plum blossoms in Qinglin Villa, he had to bring these triangular plum blossoms out to play and transplant them into reality.

These seven-colored, symbiotic, and ornamental triangular plum plants were easy to transplant to begin with. Furthermore, they had a +2 survival rate. This was not a problem.

Qin Lin came out of the game and planned to find a place to move a seven-colored symbiotic flower. However, as soon as he came out of the toilet, he saw a pure girl wearing a white shirt and jeans looking at him warily. "Who are you? Why are you here?"

The girl still looked like a high school girl. She might even be a minor.

Qin Lin was stunned and asked, "I'm the boss here. Why can't I be here? Who are you?"

"You're the new boss?" The girl looked surprised. "Then will you fire the previous employees?"

"Are you an employee here?" Qin Lin asked subconsciously.

This pure girl looked a little young. He did not know if she was an adult.

The pure girl's guard seemed to have dropped after knowing that he was the boss. She jogged forward and introduced herself. "Boss, I'm Gao Yaoyao. I was in charge of jungle exploration and rainbow grass ticketing. Do you still want your original employee?"

She was really an employee of the villa.

Qin Lin looked at Gao Yaoyao and subconsciously asked, "Um, you're an adult?"

Gao Yaoyao hurriedly said, "Boss, I've already graduated from a junior high school. I'm 19 years old. I can show you my identity card."

Qin Lin was relieved that she was not underage. He thought about it and asked, "How many employees did this villa originally have?"

He did need employees. If the original employees were not bad, he could keep them. The pure girl in front of him was very suitable for the tourism industry. If she had some talent, she might be able to do well in those famous scenic spots.

It was a waste to be a small ticket seller in this small villa.

However, this was also because she was young and had not seen much of the world. She had not been polluted by all kinds of comparisons in university. Otherwise, her heart would definitely be floating and she would not care about this kind of job.

Gao Yaoyao explained, "Other than me, there's also a security guard, a registrar, a cashier, four chefs, and...!"

"Wait, four chefs??" Qin Lin was stunned.

This villa still needed four chefs?

Most of the people who came here to play cooked themselves, okay?

Gao Yaoyao nodded and said, "I think only Master Lin cooks. The other three are the head chef and the deputy head chef!"

"Huh?!" Qin Lin was stunned.

He roughly understood what was going on.

This villa was originally a place for a few corrupt people to eat and drink. The person in charge was White Gloves. Perhaps this head chef and deputy head chef were also here to earn a salary.

Qin Lin asked again, "Gao Yaoyao, do any of the original employees know woodworking?"

"Master Lin knows!" Gao Yaoyao replied. "Other than cooking, he also knows how to fix tables. Many of the broken shelves were fixed by Master Lin."

Qin Lin asked again, "Then is there anyone else who knows how to garden? For example, those who have some experience in transplanting and taking care of plants. I think the villa has many potted plants. Someone should be in charge, right?"

Gao Yaoyao replied, "Master Lin, he's also in charge of the vegetable garden. He's also in charge of transplanting those potted plants. Yes, we also help water them sometimes. By the way, Master Lin has always wanted to save those two ginkgo trees, but he never succeeded."

Qin Lin was stunned.

Why did he feel that Master Lin was like an animal? He did everything.

Inviting one employee felt like it was worth a few.

Qin Lin thought about it and asked, "Gao Yaoyao, do you have the contact number of your previous employee?"

"We have a WeChat group," Gao Yaoyao replied.

Qin Lin said decisively, "Other than the head chef and sous chef, help me ask if the others are willing to continue, especially Master Lin."

Anyway, he had to hire employees. Instead of using strangers, he might as well use those who were familiar with this place. He would see if they suited him later. If not, he could just hire someone else to replace him.

"Boss, Master Lin will definitely be willing, but he should make a request related to those two ginkgo trees. I'll ask the others." Gao Yaoyao immediately looked happy and took out her phone to open WeChat.

The reason Qin Lin asked this was also because he wanted to create a triangular plum blossom sea. When he transplanted it, he also asked the construction team to build some fences, stone roads, swings, pavilions, and so on. They had to be watched.

After a while, Gao Yaoyao said, "Boss, I've asked. Other than the cashier who has already found a new job, the others are willing to continue working. They'll all come over tomorrow morning."

"Okay, then you can go back first. Come back tomorrow." Qin Lin planned to send Gao Yaoyao away and get one of the triangular plums in the game first.

"Boss, I'm actually staying in the villa's dormitory. I didn't rent a house in the county," Gao Yaoyao said immediately. "If you still want to see the villa, I can introduce you."

There was no other way. Gao Yaoyao could not take out the triangular plum in the villa.

Qin Lin could only give up and leave the villa.

He did not want his secret to be discovered.

When he returned to the county, the first thing he did was to find a studio with a custom signboard and customize a retro signboard. When the time came, he would change the signboard of Fuhai Villa.

Then, he planned the placement of the triangular plum sea.

The triangular sea of plum blossoms was distributed and dense, and the dense natural cost was higher. The effect was more shocking and beautiful.

If a dense triangular sea of plum blossoms was shocking enough, it had to be at least 20 acres. Other than the stone path, swing, stone chair, pavilion, and special photo stands, there had to be at least 10,000 triangular plum blossoms.

Of course, it was impossible for all 10,000 of these to be Level-3 seven-colored symbiotic triangular plums. After all, there were only 25 stalks in three days. 5,000 stalks meant 600 days. Wasn't this a joke?

This seven-colored ornamental triangular plum was only suitable for the main body, so other triangular plums were needed to decorate it.

If he spent a month, it would be enough to have 250 2.5-meter-tall, two-meter-long crowns, and 12-centimeter-tall seven-colored symbiotic triangular plums as the main body.

Qin Lin remembered that there were also lower-level ornamental triangular plum seedlings in the game. He immediately looked at the screen in his mind and controlled the game character to go to the seed shop in Ore Town to search. Indeed, he found ordinary ornamental triangular plum seedlings in the Level 2 land. There were also several colors.

He went online and checked. This kind of ornamental plant was also not cheap. It was about 400 yuan each and could grow to dozens of centimeters tall.

This was very good.

The game would definitely have attribute bonuses, and its value would far exceed 400.

However, there was a problem. Game coins were needed to buy both seven-colored symbiotic and ordinary ornamental seedlings.

Qin Lin thought about it and planned to stop growing strawberries in Level 2 lands. He would use them all to plant ordinary ornamental triangular plums and tell Manager Chen that the strawberries were out of stock.

The newly planted okra continued to be sold in the game to buy seedlings.

However, he could still get 25 ordinary triangular plums in a day in a Level 2 land. The maturity period was one day. This way, he could get more than 4,500 ordinary triangular plums in a month.

Even so, there were still less than 10,000 stalks. There were still more than 5,000 stalks.

However, with the foundation of these game-produced triangular plums, it should not be a problem to decorate the periphery with ordinary triangular plums in reality.

Therefore, he could buy more than 5,000 ordinary triangular plums. This way, he could hide it a little to prevent others from suspecting the origins of those triangular plums.

Qin Lin went online to check. Although ordinary triangular plums were far inferior to those produced by games, they were beautiful and there were many types of beautiful ones.

He chose a cultivation base in the city. One stalk was 30 yuan, and more than 5,000 stalks were only 150,000 yuan. Furthermore, he could just pay 20% of the deposit in the beginning.

He simply placed an order for 10,000 stalks.

Since he wanted to do it, he would get 10 more acres. He would make the sea of flowers bigger and use these 10,000 stalks to decorate the nearly 5,000 stalks produced by the game.

Normally, it would cost at least a few million yuan to get a triangular sea of plum blossoms of this scale, but he only needed to spend 300,000 yuan.

1

Furthermore, others could not get so many seven-colored triangular plums, let alone have the game attribute bonus.

As long as this sea of flowers was publicized well, it would definitely become a popular attraction in Youcheng County and Sand City.

As long as enough people were attracted, the things planted in the game could be produced and sold at the villa.
