

I Can Enter The Game

Chapter 26: Isn't This Triangular Plum Worth a Lot? Repay Your Debt! 1

The next day.

When Qin Lin woke up, Wang Cai was squatting outside the door, as usual, stretching his head in anticipation of his rub.

Lin Fen had already prepared breakfast for him. "Xiao Lin, why are you being so mysterious these days? I went to the shop yesterday and it was closed."

"Mom, didn't I earn some money from doing wholesale previously? I recently established a villa and am handling the procedures. I'll be even busier from tomorrow onwards." Qin Lin did not hide anything. His mother would find out about this sooner or later.

"Xiao Lin, I'll support you in whatever you want to do. If you don't do well in the villa, the shop can continue to open. If it really doesn't work, I think the shop can still do it." Lin Fen knew that her son was ambitious. His family was already a burden to him, so she could only support her son's wishes.

1

The villa her son was talking about probably cost 30,000 to 40,000 yuan to rent a place to decorate the farm, right?

After all, his son did not have many funds.

This was also what she was worried about. This was because many people did this, but it would not last long.

"Mom, rest well. Don't worry about me." Qin Lin was very confident now. He believed that he would make the villa popular.

After breakfast, Wang Cai took the opportunity to follow him out.

Qin Lin picked the ripe okra in the morning and sent it to the RT-Mart. He waited until the afternoon before the game scene in his mind reminded him that the 6 plots of triangular plum were ripe.

Qin Lin immediately controlled the game character to arrive in front of the six plots of land. Indeed, there was a notification that it could be plucked.

He chose different colors for six plots, so the color of the triangular plums in each plot was different. There were about 25 stalks.

He controlled the game character to pick them and finally obtained a total of 153 ordinary ornamental triangular plums.

Then, Qin Lin controlled the game character to enter the seed shop in Ore Town to buy a new ordinary triangular plum seedling (group) and plant it again.

After that, he headed to the warehouse again.

When Qin Lin arrived at the warehouse, he instructed Wang Cai, who had jumped out of the car, "Wang Cai, watch outside."

"Woof!" Wang Cai responded to the order and wandered back and forth at the door as if it was patrolling.

Qin Lin then closed the warehouse door and entered the game.

After entering the courtyard where the triangular plums were stored, other than the 25 ornamental-type triangular plums, there were 153 ordinary ornamental-type triangular plums in the courtyard.

When these triangular plums were placed together, they seemed to be a sea of flowers. They were beautiful, fragrant, and abnormally dazzling.

Qin Lin went forward and touched an ordinary-looking triangular plum plant. He saw the note:

[Yellow flower type ornamental triangular plum plant: Quality 1]

[This is a special species of ornamental triangular plum. It's 60 centimeters tall, 70 centimeters in the crown, and 4 centimeters on top of its head. It's a game product and is very beautiful. It has a higher ornamental value than ordinary plants of the same type. Furthermore, it's easy to transplant. It blossoms all year!]

[Game product: Gorgeous +2, Viewability +2, Attraction +2, Feeling Good +2, Entering the Mirror +2, Transplantation Life Rate +2!]

1

He looked at the others. Other than the different colors, the notes were the same.

This ordinary ornamental triangular plum was clearly much worse than the seven-colored symbiosis. Not only was it in appearance, but it was also only of Quality 1.

However, a game product was still more entertaining than a similar plant. That +1 increase was not a joke.

In addition, it was easy to transplant and bloom all year round. It was the same as the seven-colored symbiotic flower.

Then, Qin Lin went forward and touched these triangular plum plants. With a thought, a triangular plum followed him into reality.

After repeatedly entering and exiting the game, he spent some time moving all these plants out of the game.

However, now that this thing had been moved out of the game, how to transport it to the villa was a problem.

His lousy car could not transport this thing. He could not carry the seven-colored, symbiotic, and ornamental triangular plum stalk of Quality 2.

Qin Lin could only take out his phone to contact a special transport team. There was a special transport company in the logistics park.

He had memorized phone numbers in the past.

He was transporting them for a short distance. He had to call a special transport team for these 178 triangular plums. The starting price of each car was 85 yuan, and then it was calculated at 5 yuan per kilometer.

After Qin Lin contacted the transport team, he added them on WeChat and sent them a deposit and location. Soon, a convoy arrived.

The area in front of the warehouse was not big. Coupled with the transportation tools, the trucks could only be loaded one by one.

"Is Mr. Qin transporting these triangular plums?" The supervisor leading the team was called Zhao Liyuan.

When he looked at the triangular plums in the warehouse, he revealed a surprised expression.

These triangular plums were too beautiful and mesmerizing.

It was not that he had not seen the triangular plum blossoms before. He had even been to the triangular plum blossoms sea in Xia City. However, compared to the ones in front of him, it seemed like the ones in Xia City were far inferior.

He was attracted the moment he came in. Furthermore, these triangular plums were very comforting to look at.

This was naturally the effect of the game's attributes.

"Mr. Qin, is your villa going to have a triangular plum blossom sea?" Zhao Liyuan said as he subconsciously took out his phone to take a photo. However, he realized that the triangular plum blossom was surprisingly beautiful on camera. The feeling of taking a photo was different.

This was naturally the effect of the entry attribute!

"That's right. I want to make a triangular plum blossom sea!" Qin Lin nodded.

"Then I'll definitely bring my wife to take a look!" Zhao Liyuan immediately made a decision. Just this alone gave people this feeling. If it really formed a sea of flowers, how beautiful would it be? Just thinking about it made one know that it was beautiful scenery to enjoy.

His wife would definitely like that beautiful scenery too.

The transport team also began to move. They had special starting tools to move those triangular plums to the car.

Zhao Liyuan put down his phone and lit a cigarette for himself. He asked, "Mr. Qin, these triangular plums are very beautiful, especially those with many colors. They shouldn't be cheap, right?"

Qin Lin nodded and said, "Yes, just look at the color. A three-colored one is more than 3,000 yuan, and a five-colored one is more than 5,000 yuan. My seven-colored one is very rare. It's difficult to determine the price!"

"Ahem... Ahem!" Zhao Liyuan had just taken a puff when he heard the price. He hurriedly said to the employees, "Be careful. Be gentle. Don't hit these triangular plums."

No kidding. A five-colored one was more than 5,000 yuan. How expensive was a seven-colored one?

Just the 25 stalks were astronomical. Those short ones should not be cheap.

How much was their transportation fee?

If they accidentally broke one, their transportation fees would not be enough to compensate.

After spending some time loading all these triangular plums into the car, the convoy set off for the villa.

Qin Lin also set off with the transport car. He was in a good mood and began to look forward to the triangular sea of flowers he was about to build.

However, there was something he had to settle.

His family still owed a lot of foreign debts. The online contract he had signed for 10,000 ordinary triangular plums had only paid a deposit. The money on his card was still enough to repay his debts!

Chapter 27: Only When There's No Debt Can You Feel Light! Lin Fen's Worry! 1

Soon.

The convoy arrived at the villa.

However, such a big car could only be parked in the parking lot of the villa. There was no way to drive it inside.

Qin Lin parked his tricycle. Wang Cai jumped out of the car and followed closely beside him.

"Mr. Qin, are we going to unload it in this parking lot?" Zhao Liyuan went forward and asked.

"Yes, we'll unload here." Qin Lin nodded. This was the only place where they could unload.

Zhao Liyuan began to bring people to unload the goods. The money for unloading was calculated separately. The electronic contract had been signed before they came.

Qin Lin also walked into the villa.

Wang Cai cried twice and hurriedly followed. Along the way, it looked around and barked, very curious about the new environment.

When Qin Lin saw this, he smiled and said, "Wang Cai, this will be your territory from now on. Are you happy?"

Wang Cai seemed to understand its master's words. It barked twice and suddenly ran. Along the way, it would stretch its nose in front of some plants and smell them. Then, it would raise its legs in satisfaction and pee.

Qin Lin looked at the dog's behavior with a stunned expression. It was marking its territory just like that?

In the villa.

Other than Gao Yaoyao, there were already a few more people. They were all original employees. When they received Gao Yaoyao's notice yesterday, they had already been waiting.

It was not easy to find a job in modern society. The salary of the villa was not bad in Youcheng County, where everyone had a salary of 3,000 to 4,000 yuan. No one wanted to lose their job.

"It's the new boss!" When Gao Yaoyao saw Qin Lin arrive, she immediately introduced him to the others.

The others also looked at this new boss curiously.

He was very young and even came with a dog.

This was their first impression of Qin Lin.

"Boss!" Gao Yaoyao ran to Qin Lin and greeted him.

Qin Lin asked, "Gao Yaoyao, which one is Master Lin?"

"Master Lin, Boss is looking for you," Gao Yaoyao immediately shouted at a dark-skinned man in his 50s.

Master Lin went forward and said before Qin Lin could speak, "Boss, I can work for you, but you have to let me save those two ginkgo trees. You can't cut them down."

This request stunned Qin Lin.

Other people's requests for their boss were more wages. This was the first time he heard someone make such a request.

Gao Yaoyao immediately explained, "Boss, wasn't there a special period in the past? Master Lin's house was targeted. Because this place was still very remote, Master Lin's

grandfather brought his family here to escape. The family lived under two ginkgo trees for a long time. Master Lin's grandfather also died under these ginkgo trees."

"After that, Master Lin's father brought his family back. Previously, Master Lin did all kinds of tiring work because of this."

"Master Lin, I agree to your request. We'll sign the employment contract later. Come to the parking lot with me first. There's something I want you to be responsible for." Qin Lin did not want to cut the two withered trees. Furthermore, he finally understood why Master Lin had done everything in the villa previously. It was to protect the trees.

This was an unforgettable emotion for the older generation.

This kind of person usually valued feelings and was trustworthy.

Qin Lin brought Master Lin to the parking lot.

Gao Yaoyao and the other employees followed curiously.

When they arrived at the parking lot, Zhao Liyuan had already brought people to unload a portion of the triangular plum plants.

"Boss, is this the triangular plum you bought? It's so beautiful!" Gao Yaoyao exclaimed. She was clearly attracted to the triangular plum.

The other employees were the same. They could not help but go forward to take a look. These triangular plums were really too beautiful.

Master Lin was attracted to those triangular plums as well. He liked beautiful things regardless of age. He asked, "Boss, are you going to get a triangular plum blossom sea in the villa?"

Qin Lin nodded and said, "That's right. I plan to build a triangular plum blossom sea. I'll probably build 30 acres. More than 15,000 triangular plums will be sent over one after another. Master Lin, Gao Yaoyao said that you know how to plant flowers. I plan to let you be in charge of this."

Master Lin was immediately shocked and said, "Boss, do you think I'm an animal? 30 acres, 15,000 stalks. I can't do it. I want more people!"

Qin Lin naturally knew that there were more than 15,000 triangular plums in 30 acres. Master Lin could not do it alone. He definitely had to hire a landscaper or an experienced farmer to transplant the triangular plums.

Master Lin had clearly misunderstood. Was he being exploited by the person in charge of the villa?

He did not want Master Lin to transplant the triangular plum alone. It was just that he had experience in this aspect and he wanted him to supervise.

“Master Lin, I’ll get more people to help with the transplant,” Qin Lin explained. “When the time comes, just keep an eye on them. When the sea of flowers is done, I’ll hire two long-term gardeners for daily maintenance.”

When Master Lin heard this, he nodded and promised to keep an eye on the plants.

The 178 triangular plums were quickly unloaded.

Qin Lin paid the rest happily and did not forget to say, “Supervisor Zhao, I still need you to come over tomorrow. Besides, I might have to trouble you every day for the next month.”

“Boss Qin, just contact me,” Zhao Liyuan said readily.

Transportation was not easy now, and it was not easy for him as the fleet’s supervisor either. He definitely would accept this job that was delivered to his mouth.

Although he was puzzled as to why Boss Qin did not directly transport the items to that warehouse, it was none of his business as long as he could earn money.

After all, some rich people had many hobbies.

For example, his boss had a strange habit. He clearly had a house, but he insisted on buying another one secretly. He had a wife at home, but he did not sleep with her. Instead, he often used the excuse of going on a business trip to sleep alone in another house.

7

Wasn’t he rich and free?

After Zhao Liyuan left with the convoy, Qin Lin also interviewed a few of the original employees in the villa. It gave off a good first impression and did not disgust anyone at first sight. As for later, he would take his time to see.

On the other hand, the labor contract was a problem. He had no experience in this aspect. In the end, he could only find the original contract sample of the villa. He planned to go back and print it out with this original contract before signing it with Gao Yaoyao and the others tomorrow.

After that, he followed Master Lin around the 500 acres of land in the villa. If he wanted to build this 30 acres of triangular plum blossom sea, he had to choose a suitable place.

After more than an hour, they finally decided to place the triangular sea of flowers on the ground north of the villa's hall.

Since he wanted to build a sea of flowers, the 30 acres of land naturally had to be wide open. The geographical difference could not be too great. If the difference in location was too great, there would be a gap, and the effect of the dense sea of flowers would not be displayed.

1

After deciding, Qin Lin returned to the county city and contacted a construction company with the best reputation.

A company like Youcheng County had mixed business. It was also covered by gardeners and experienced farmers who knew how to transplant flowers. However, the labor fee reached 400 yuan a day.

After signing the contract and paying the deposit, the company's people immediately entered the villa to start the initial inspection. It only ended in the evening.

However, after dark, the triangular plums in the parking lot became a problem.

These triangular plums were not cheap. He could only get the previous security guard, Chen Dabei, to guard them at night. It was a good opportunity to see how their character was.

After arranging everything, Qin Lin planned to go back to the county city. The triangular plum blossom sea had begun to be built, and it was time to settle the debts at home.

Sooner or later, the people he knew would know about him doing this villa, especially those to whom he was indebted. Before the debt was settled, there might be people who thought he had money to settle the villa but still refused to repay his debt.

6

The creditors were all his parents' relatives and friends. If they could lend his family money, they had a connection with his family. Even if they did not think so, the people around them would always fan the flames.

Even if later on, he returned the money, some relationships would deteriorate.

Humans were complicated creatures after all.

Therefore, the debt had to be repaid. Even if others knew later on that he had built this villa, it would give them a different feeling.

As he thought about this, Qin Lin picked up his phone and opened his contact list. He had recorded the names of all the debtors in his family on his phone. Other than Qin Ren's father's 50,000 yuan, and some that he had returned every month for the past year, he still had more than 330,000 yuan of debt.

Qin Lin called the first number. As soon as the call was picked up, he said, "Uncle Ergen, have you eaten... You've already eaten... Can I invite you over tonight... Yes, I earned some money. I'll pay you back the money my father owes you first..."

After hanging up, he called the next number until he called all the creditors. They were all elders from the same village.

Actually, it was better for him to take the initiative to return the money.

However, he wanted to resolve his mother's worries. His mother still had his father's photo. She nagged every day, feeling that if she did not repay the money at home and could not see him marry and have children, his father would not be able to rest in peace.

After putting down the phone, he went to the warehouse and took out some ordinary wild fish from the game to put in the bucket of the tricycle. Then, he covered it with a cloth and drove back to his district.

At this moment, Uncle Ergen and the others had already finished their meal. Qin Lin had to prepare some gifts as a courtesy of inviting them to his house.

These ordinary wild fish were not light and were also very good gifts.

When she returned home, Lin Fen had already prepared dinner and was waiting.

"You can eat now," Lin Fen shouted. After Qin Lin sat down, she asked, "Xiao Lin, why are you so late today? How's your farmhouse?"

"I'm already on the right track. I'll be a little busy recently," Qin Lin replied.

Lin Fen reminded, "Xiao Lin, don't neglect Mo Qing. She's such a good girl..."

Lin Fen did not say anything else. She was naturally worried that if such a good girl became someone else's daughter-in-law, he would never be able to find another one.

However, she was even more helpless because she was useless. Her family was in a mess, and she owed so much money. Her son did not have a house or a car, so why would Zhao Moqing's parents agree to marry him?

Chapter 28: Relieved! Becoming Someone Else's Child!

Lin Fen sighed and did not forget to remind Qin Lin, "Remember to let me go when it opens. I'll help you greet the guests."

Qin Lin immediately said, "Mom, how can I let you serve the guests?"

Lin Fen snorted unhappily. "I'm not in good health, but I'm happy to have my son open for business."

"Mom, I'll wash the dishes later!" When Qin Lin heard Lin Fen's words, he smiled. It was good to have his mother.

After dinner, Qin Lin packed the dishes and went to the kitchen to wash them.

Lin Fen looked at her busy son and sighed again. Her son had been sensible since he was young. He was too worry-free compared to his peers. It was their fault as parents.

After washing the dishes, Qin Lin remembered about the creditors and did not forget to remind her, "Mom, I invited Uncle Ergen and the others over. They should be here soon..."

Lin Fen was stunned. She was about to say something when the doorbell rang. She hurriedly opened the door and looked at the person outside with a bitter expression. "Ergen, you're here?"

The other party was the family's creditor. The family owed him 30,000 yuan.

What she was most afraid of now was to see these creditors. Her family really did not have the money to repay them.

"Sister-in-law Lin Fen." Qin Ergen greeted Lin Fen and asked, "Is Lin Zi back?"

"Xiao Lin, your Uncle Ergen is here." No matter how bitter Lin Fen felt, she could only invite him in.

Back then, she had borrowed money to treat her husband. Although she had not saved him, she could not hide from her creditors. One had to have a conscience.

As soon as she welcomed Qin Ergen in, Lin Fen heard a surprised voice. "Ergen, you're here too?"

Qin Ergen greeted the person and smiled. "Dalin, you're here too? Your snack bar opened?"

"It's still being renovated," Qin Dalin said with a smile.

As the two of them conversed, someone else came from behind.

"Ergen, Dalin, you're here too."

"You guys are here too."

Lin Fen sighed silently. These were all the people who had lent her family money back then. Her son had really invited these people.

People were afraid of creditors coming to their door, but if they owed a debt, they had to welcome them warmly.

She forced a smile and led these people in. She took out a cup and poured water for Qin Ergen and the others.

Qin Ergen and the others filled the small living room. Wang Cai was shocked to see so many people. He quickly got up and ran to the kitchen to look for Qin Lin.

When Qin Lin came out and saw Qin Ergen and the others, he immediately came out to welcome them. "Uncle Ergen, Uncle Dalin..."

He was grateful to these creditors. After all, when his father was diagnosed with cancer, they could still borrow money because they knew that their family might be left with an orphan and a widow.

2

However, Uncle Ergen and the others still lent them money. This was a huge favor.

The key was that he had graduated more than a year. Everyone knew that it was not easy for them, an orphan and a widow. No one had come to rush for the debt.

Sometimes, he was quite envious of his father. Not everyone could gain such affection.

Or rather, the feelings of the older generation were not present in the new generation.

Modern young people had already been eroded by the pressure of life and exaggerated social values and did not have the spare energy to manage such feelings.

When Qin Ergen saw Qin Lin, he praised him from the bottom of his heart, "Xiao Lin, you're really capable. You're even more powerful than those juniors from the village."

Qin Dalin nodded and said, "Xiao Lin has been sensible since he was young. His results are good too. I'll be relieved if our good-for-nothing son is half as sensible as him."

These words were agreed by the others.

Qin Lin was the only child in the village who had entered a key university. The others were all playful. It was just that Qin Lin was unlucky and his family was in a mess.

Lin Fen was naturally happy to hear others praise her son, but then she sighed. Her son was being dragged down by his family.

Qin Ergen praised Qin Lin and took out an IOU to hand to Lin Fen. "Sister-in-law Lin Fen, look. This is my IOU."

Qin Dalin also took out his IOU. "This is mine."

The others took out the IOUs they had brought and placed them on the table.

Since Qin Lin said he wanted to pay them back, they naturally had to bring the IOU.

If the debt was settled, according to ancient logic, the IOU had to be destroyed in person.

Qin Lin was afraid that his mother would be worried, so he hurriedly said, "Mom, I asked Uncle Ergen and the others to come. I earned some money and can pay them back."

After all, a creditor would not be in a good mood if he came knocking. He immediately sat beside his mother and grabbed her hand to comfort her. Then, he generously picked up the IOUs and said, "Uncle Ergen, Uncle Dalin, you brought your phones, right? I'll transfer the money to your bank."

These words stunned Lin Fen. She looked at her son in disbelief.

At this moment, Qin Ergen and the others also took out their phones.

"Xiao Lin, yes, yes."

"Who doesn't have a phone now?"

"Yes, but can you really return it all once?"

Qin Lin did not hesitate. He took the IOUs and checked them one by one. Then, he transferred the money through the bank on his phone. In the blink of an eye, more than 300,000 yuan was transferred. The balance on his card was in danger again!

However, after paying off the money, he was more relaxed. He would treat Uncle Ergen and the others to a meal in a few days. As for this favor, he would slowly repay it in the future.

When Qin Ergen and the others received the transfer message, they all smiled.

Although they had not thought of urging Qin Lin and his mother to return the money, they were still very happy that Qin Lin had returned the money in one go.

Every family had its own difficulties. With this sum of money, it was better to have more money.

Qin Ergen and the others looked at Lin Fen with envy. Although her family was in a mess, she had a good son. It was really enviable.

Qin Lin was amazing. Not only did he not have his parents' help, but he also helped his parents repay hundreds of thousands of debts so quickly.

Which parent did not want their son to have this ability?

Lin Fen clearly felt this gaze and felt mixed emotions.

Qin Ergen and the others did not disturb them any longer. After praising Qin Lin, they bade farewell.

Qin Lin sent them downstairs and opened the bucket covered in cloth on the tricycle. He gave each of them one of the wild fish he had brought home as a small token of appreciation.

"Xiao Lin, are these wild fish?"

Qin Ergen and the others were clearly a little surprised.

"It's a small token. This wild fish is nutritious. Uncles, go back and make some wine to drink."

1

"Xiao Lin, why are you being so polite?"

"..."

Qin Ergen and the others were clearly very happy. This wild fish was not small and was usually very rare.

After Qin Lin sent Qin Ergen and the others away, he picked up the IOUs again. His mother had signed them. He had been there at that time. Now that he had taken them back, he felt a little emotional.

When he arrived at his father's portrait, he burned all these IOUs to ashes in one go. These debts had once been a mountain that pressed down on him, making him unable to breathe.

Because of the game in his mind, he could finally escape from the quagmire of planting bitterness.

Lin Fen was a little anxious. She asked Qin Lin immediately, "Xiao Lin, tell me honestly, where did you get so much money? Did you do something illegal?"

This was also what she was most worried about. It did not matter if her son was rich or not. She did not want her son to take the wrong path.

Qin Lin guessed that his mother would be worried and had already made up a reason. "Mom, how could I do something illegal? Actually, I caught a wild ornamental fish and sold it for more than 600,000 yuan."

"After that, I used this money to do wholesale. Previously, I either brought back watermelons or wholesale those watermelons. I earned another sum. Other than investing in the villa, I used the rest of the money to repay my debts."

This excuse was actually flawed.

He had mixed up the order of fish and wholesale.

"What fish is worth so much?" Lin Fen could not believe it.

Qin Lin explained, "It's a wild albino tiger. I don't know what's good about this fish, but rich people like it and spend a lot of money to buy it."

With that, Qin Lin took out his phone and showed his mother the tax record of his wild ornamental fish.

Lin Fen had no choice but to believe it now. Her face was filled with disbelief. "There's such an expensive fish? Your father must have blessed you to catch this fish."

A long-lost smile appeared on Lin Fen's face as if she had relaxed a lot.

Qin Lin saw the change in his mother and could not help but smile.

"Xiao Lin, then the villa you're busy with isn't a farmhouse that costs 30,000 to 40,000 yuan?" Lin Fen reacted and asked.

"Yes, the villa is not small," Qin Lin said with a nod.

Lin Fen was anxious now and said, "Then hurry up and explain to Moqing. When she came to see me previously, she saw that you didn't tell her about the farmhouse. I thought you had 30,000 to 40,000 yuan farm goods and weren't confident, so I told her to wait for you."

"Moqing is such a good girl. You have to give her something to look forward to. Don't let anyone snatch her away. I only acknowledge her as my daughter-in-law."

"Huh?!" Qin Lin was stunned. He had not said anything because he wanted to give Zhao Moqing a surprise after building the triangular sea of plum blossoms.

Chapter 29: Top Quality 3! This Will Definitely Be Popular! 1

Qin Lin explained, "Mom, I want to surprise Moqing when the villa is done. Don't let Moqing know!"

"You young people like to have surprises!" Lin Fen shook her head.

That night, after Qin Lin finished paying, he felt light and slept especially well.

The next day, he moved the mature okra out of the game early in the morning and sent it to RT-Mart. Then, he printed the labor contract and headed to the villa.

When he arrived at the parking lot of the villa, he saw Chen Dabei, who was wearing a security guard's uniform, sitting in front of a tent and yawning. His face was filled with exhaustion, and it was obvious that he had been looking at triangular plums for the entire night.

The tent belonged to the villa. There were always some couples who wanted to camp at night to prove that they were very bold.

"Boss, you're here." Chen Dabei immediately stood up to greet Qin Lin!

"You've worked hard. Come with me to the hall to sign the labor contract and go back to rest." Qin Lin nodded at the other party.

"Okay, Boss!" Chen Dabei nodded and followed.

When they arrived at the hall, Qin Lin asked Gao Yaoyao to call everyone over to sign the contract.

The salary of the contract was written according to these people's original salary. For example, Gao Yaoyao received a commission of 3,500+ yuan. Previously, the more people played jungle adventure and slippery grass, the higher her salary.

Among them, Master Lin had the highest salary. He had a fixed 6,000 yuan because he was originally a chef and had several jobs.

The other employees were similar to Gao Yaoyao.

This salary was nothing in a big city. In Youcheng County, where everyone had a salary of 3,000 to 4,000 yuan, it was considered a normal salary. Furthermore, the villa was covered. If they were willing, they could stay in the few dormitories in the villa like Gao Yaoyao.

This was also the reason why Gao Yaoyao and the others would come back after the villa was sealed and the boss changed. After all, it was not easy to find a job now.

Qin Lin also declared, "The salary is the same as before, but it's also temporary. I naturally have to develop after buying this villa."

"When the villa develops well and you guys do well, your salary will naturally increase. I'll also hire more people. At that time, I'll raise your management and give you a higher salary."

These words were actually just a sketch, but his sketch was good. After all, he had seen those beautiful triangular plums and attracted them at a glance.

If this new boss said he wanted to build 30 acres of a sea of flowers, it would definitely be popular. Then, their salary increase would definitely be confirmed.

Therefore, Gao Yaoyao and the others were looking forward to it.

Qin Lin was in a good mood as he held the signed labor contract.

He was now a boss with industry and employees.

Not long after.

The contract company made from the sea of flowers was here too.

Qin Lin handed the materials he had been looking at for the entire night to her.

The high-level sea of flowers he wanted to build required materials to build stone roads, swings, wooden benches, and pavilions.

He chose the price and color as a tourism manager. The specific contract company would contact the price and let him make the final decision.

Once everything was in place, they could start work.

In the afternoon.

The ordinary ornamental triangular plum in Level 2 land was harvested again.

This time, there were 156 stalks.

Qin Lin arrived at the warehouse and moved all these ornamental triangular plums out of the game. He then contacted Zhao Liyuan from the transportation company to transport these triangular plums to the villa.

After two days, the employees of the villa were on the right track. The triangular sea of flowers had also been built.

On the third day, the seven-colored symbiotic flower in the game matured again.

Qin Lin controlled the game character to pick and plant the new seedlings (group) before heading to the warehouse to enter the game again.

However, when he came to the Miao Zhu Storage Yard again, he was shocked.

Among the more than 20 2.5-meter-tall seven-colored ornamental triangular plums, one stood out. It was taller, more beautiful, and more attractive. The moment he entered, his eyes were attracted uncontrollably.

Qin Lin thought of something and immediately walked over to check the information of this triangular plum.

[Diligent flower seven-colored symbiotic triangular plum plant: Quality 3]

[This is a special breed of symbiotic triangular plum. It has a total of seven colors and is expensive. It is four meters tall, 3.5 meters in length, and 36 centimeters above the head. It is extremely beautiful and has an attractive view. Furthermore, it is easy to transplant. It will last for the entire year.]

[Game product: Gorgeous +3, Viewability +3, Attraction +3, Entering the Mirror +3, Life Transfer +3, Ecological Harmony +3!]

This was a higher-quality seven-colored symbiotic flower. All its attributes increased by +3. No wonder it surpassed the other triangular plums!

This triangular plum with a quality of 3 had an additional ecological harmony +3 attribute!

However, he did not know what use this attribute had for the time being.

Furthermore, if he wanted to move this one out of the game, the warehouse could not even accommodate it. He could only exit the game and leave the warehouse. After observing that there was no one around, he entered the game as quickly as possible and moved this triangular plum out of the game.

However, if this plant was to be transported back to the villa, Zhao Liyuan would probably have to bring a larger truck over.

When Zhao Liyuan brought the convoy over and saw this seven-colored symbiotic triangular plum of Quality 3, he was speechless. He quickly got his subordinates to be more careful. This one was clearly more expensive.

After being busy for a long time, they finally loaded it into the car.

...

The villa was bustling with construction.

The gardeners and farmers they had hired had already begun to transplant the triangular plums over. The seven-colored ornamental triangular plums would gather in the center, followed by the ordinary ornamental ones. Finally, the periphery was filled with ordinary triangular plums, forming radiation.

This way, the tourists would feel even more surprised as they went deeper.

Naturally, in order to make the outer area not too monotonous, some game seven-colored symbiotic ornamental type and ordinary ornamental type would be separated to match the triangular plum bought outside.

Chen Dabei looked at the triangular plum flowers in the parking lot very responsibly and saw a convoy driving over. It seemed to be from the city.

The convoy stopped outside. Chen Dabei walked out in confusion.

A middle-aged man got out of the car and asked, "Is this Boss Qin's villa?"

Chen Dabei said, "Yes, why?"

The middle-aged man said, "My name is Marco. I'm the instructor of the city's triangular plum cultivation base. I'll give Boss Qin the triangular plum and guide you in planting it?"

Sending an instructor was an additional service to the cultivation base. After all, it was an order of 10,000 stalks. They also knew that it was to create a sea of flowers. If the other party became popular, it would also be their living signboard.

Chen Dabei immediately pointed at the parking lot and said, "Boss has instructed you to unload the car in the parking lot if you come."

Marco nodded and got someone to unload the triangular plums in the car and send them inside. He instructed them to follow him into the parking lot.

When he entered the parking lot, Marco was stunned. He looked at the triangular plums in the parking lot in disbelief.

"Seven colors?" Marco was surprised to see those seven-colored ornamental triangular plum plants.

He was not like Gao Yaoyao and the others. He was a professional trainer, so he naturally knew what the seven-colored symbiotic triangular plum represented.

There were many triangular plum symbiotic flowers, but they were usually three-colored symbiotic flowers. Five-colored ones were already considered noble. It was definitely rare to have seven-colored symbiotic flowers that were more than two meters tall.

The key was that these seven colors were surprisingly perfect. As a professional trainer, he was so attracted to them that he could not take his eyes off them.

Furthermore, he felt a little comfort when he saw it. How awesome was this trainer?

Even their cultivation base had not nurtured such a top-grade creature.

From the looks of it, there were quite a number of such top-grade triangular plum plants. This sea of flowers was definitely going to be popular!

As Marco was thinking, he heard the sound of a car outside. Then, he heard the exclamations of the employees from the cultivation base who had come with him.

"This triangular plum is really tall!"

"Those more than two meters tall are already very beautiful. This one is really unbelievable."

"It's four meters long, right?"

Chapter 30: Can't Buy It For 200,000 Yuan! Magical Ecological Harmony+3_1

When Marco came out, he was also shocked. The four-meter-tall, messy-haired, and extremely gorgeous seven-colored symbiotic flower immediately attracted his gaze.

“This... This is considered an old plant, right?” Mark went forward anxiously to observe.

As someone in this line of work, he knew the value of this triangular plum very well. It was a seven-colored symbiotic plant and had been nurtured to such a perfect level. This was definitely an old collectible-level plant.

It was not an exaggeration to say that the tourist areas in the country with large triangular seas of plum blossoms were willing to buy this one for more than 200,000 yuan.

Not only was the sea of flowers in this villa going to be popular, but it might also be famous worldwide.

Compared to these triangular plums, the triangular plums sent by their cultivation base were just small green leaves.

When Qin Lin got out of the car, Chen Dabei came over and introduced him. “Boss, this is Mr. Marco from the cultivation base who came to deliver the triangular plum.”

“Hello!” Qin Lin shook hands with Marco.

After shaking hands, Marco could not help but ask curiously, “Boss Qin, this old triangular plum tree cost a lot, right? It’s difficult to buy a triangular plum blossom of this grade even if you spend 200,000 yuan.”

“A friend gave me a friendly price,” Qin Lin said casually.

However, he did not expect this seven-colored symbiotic triangular plum of Quality 3 to be considered an old plant.

The old plant was a collector-level plant among the triangular plums. It was given an expensive price by some rich people.

He had seen a piece of news previously. Someone had a two-colored umbrella-shaped triangular plum tree. The owner had sold it for a starting price of 300,000 yuan.

Furthermore, the value of this three-colored triangular plum tree should far exceed the price Marco had mentioned. After all, the other party did not know that his seven-colored triangular plum tree had many attributes all year round.

When Marco saw these triangular plums, he was too embarrassed to say anything about staying behind to help guide the planting. He was too ashamed to show off in front of an expert.

Marco had sent 3,000 triangular plums this time. Because Qin Lin had ordered several varieties of triangular plums, the color was different. Coupled with the problem of his transplant speed, it was impossible to deal with them at the same time.

Qin Lin also asked Master Lin to bring people over. Suddenly, a Quality 3 seven-colored, symbiotic ornamental triangular plum appeared. Then, the center area had to change a little. Naturally, it was to transplant this Quality 3 triangular plum.

Furthermore, after knowing the price of this old plant, Chen Dabei was so frightened that he suggested to Qin Lin, "Boss, are you going to hire a few more security guards?"

He was afraid that others would want to steal such a valuable triangular plum seed. Although Master Lin had discussed with him about taking turns to keep watch, if there were really any ideas, he and Master Lin were useless.

"Yes, I'll handle this." Qin Lin nodded.

He had originally wanted to hire more security guards. The triangular plum blossom sea was valuable. How could Chen Dabei alone be enough?

When Master Lin brought people over and saw this Quality 3 plum, they clearly looked surprised. It took a lot of effort to move this triangular plum to the flower field.

It took half a day to transplant this plant.

Gao Yaoyao and the two female employees were also attracted when they saw this triangular plum. They thought that the previous triangular plum was already the most beautiful, but they did not expect this one to be even more beautiful.

The next day.

When Qin Lin arrived at the villa, he saw Gao Yaoyao running to him. "Boss, come with me to see the triangular plum plant from yesterday."

"What's wrong?" Qin Lin was a little puzzled.

He only knew the reason when he followed Gao Yaoyao to the seven-colored flower.

There were actually many butterflies dancing on the triangular plum tree. Some birds were even chirping crisply. What surprised him, even more, was that there were two squirrels sticking their heads out of the tree.

If the fragrance of flowers had butterflies, it was not strange that this sea of flowers could attract butterflies. There were also birds and squirrels. It must be a special reason.

Gao Yaoyao explained excitedly, “Boss, isn’t it magical? I came up at noon to take a photo and post it on my social media, and I saw them. They’re not afraid even when I approach them.”

With that, she approached and stood under the triangular plum tree. The squirrels on the tree did not run. The two squirrels even stood on the branch above Gao Yaoyao’s head, as if they were looking at her curiously.

Under normal circumstances, when a person approached, the bird and squirrel would definitely run away in fear.

Qin Lin roughly understood what was going on.

This Quality 3 Triangular Plum had the attribute of ecological harmony+3,

This scene must be related to ecological harmony +3.

For this reason, the butterflies, birds, and squirrels nearby were attracted.

“Gao Yaoyao, maybe we’ll make a sign that forbids us from harming animals,” Qin Lin said when he saw this. This seemed to be a huge selling point.

In the following time, the entire villa was in full swing.

The villa was also temporarily closed for business.

Qin Lin would bring out ordinary ornamental triangular plums from the game every day. Furthermore, the Quality 3 seven-colored ornamental triangular plums actually appeared twice in the next month. Three of these triangular plums were planted in the middle of the sea of flowers. A flower bed and fence were specially built around it, and a sign that said, “Don’t hurt small animals” was hung on it.

Around the three triangular plums, there were more butterflies fluttering. It was the same for the birds. Their pleasant cries were like music. Occasionally, squirrels could be seen darting between the trees.

This beautiful scenery and such a harmonious scene were definitely intoxicating.

...

As time passed, October arrived.

In the evening.

As usual, Qin Lin picked up the 24 boxes of ripe okra and planted new seeds. Then, he sent this batch of ripe okra to RT-Mart and provided Manager Chen with 10 catties of Quality 2 okra.

“Your tail number... income is 19,653 yuan. Your balance is 139,876.00 yuan!”

In the past month or so, he had earned more than 650,000 yuan from sending the okra to RT-Mart. After deducting the taxes, the balance paid to the Triangular Plum Cultivation Base, and the fees for the construction company, he was only left with less than 140,000 yuan.

Now that the triangular plum blossom sea had been completed, the villa was also preparing to open for business.

Qin Lin rode the old farm tricycle to the warehouse. There were two big buckets in the car. He entered the game with a small bucket and went straight to the pool.

Over the past month, there were already more than a thousand wild fish in the pool.

He immediately used a small bucket to scoop up these wild fish and bring them out of the game. He placed them into two large buckets. After moving dozens of them, the two large buckets were filled.

There were also six big shots.

These were what he wanted to put into the fish pond in the villa.

He started cycling and headed to the villa.

When he arrived at the entrance of the villa, he could see a special wooden artistic sign: Qinglin Villa!

At the entrance, there was a colorful and outstanding triangular sea of flowers not far away. This made him feel proud. After all, this was a sea of flowers he had created.

The sea of flowers was completed. Not far from the reception hall, there was a pure retro wooden building.

This was naturally the sales center he planned to use to sell things. If the crops planted in the game earned a difference for RT-Mart, he might as well sell them himself. As long as the villa had enough traffic, he could completely consume them himself. He could even sell them at more expensive attractions. When the time came, he could also wholesale other things as a cover.

Qin Lin rode the tricycle out of the hall.

Gao Yaoyao was cleaning with four girls. These girls were all wearing custom-made blue uniforms with the words "Qinglin Villa" printed on them.

Three of the girls were newly recruited a few days ago. From now on, one of the new girls would be in charge of the tickets for the adventure and grass-skimming project. The other girl was in charge of the ticket sales for the triangular plum blossom sea.

The other two girls were in charge of the hall.

As for Gao Yaoyao, she had performed well this month and was promoted to a foreman.

The young lady was also very motivated now. She was already a manager and her pay was even raised by 1,000 yuan.

"Boss, what do you need us to do?" When Chen Dabei saw Qin Lin arrive, he also walked up with two uniformed security guards. He was very proactive.

After the sea of flowers was built, security personnel were indispensable. Other than the two people behind Chen Dabei, there was another person watching the surveillance cameras in the monitoring room. At night, there were also two people on night patrol. They were all recruited through the veterans' designated area in the same city online.

The villa had some surveillance cameras.

This was also what many scenic areas had no choice but to do. After all, there were too many fish that had escaped the net of quality education.

Naturally, Chen Dabei had been actively performing this month, so he was promoted to the captain of the security team. His salary had also increased by 1,000 yuan.

Other than that, the villa had also recruited a chef to help Master Lin, a cashier, and three professional landscapers to nurse the triangular sea of flowers.

Coupled with the original front desk registrar and the cleaning auntie, there were almost 20 employees in the villa.
