

## CEO Bride 265

### Chapter 265

This was a martial artist, and one above the level of a grandmaster.

The man in the suit glanced at the group coldly and said in a chilling voice, "I'm in a good mood. today. I don't want to kill anyone..."

After saying that, he vanished like a shadow, leaving the villa.

Not long after he left, a patrol car pulled up at the entrance.

Felicity and Angelica stepped out of the car.

Xeno was somewhat taken aback.

Were the police always this swift?

Felicity approached and asked, "Where is Yvonne Mare?"

"They... went out to eat..."

Xeno replied, then quickly added, "A thief just ran out of the villa. You need to chase after him!"

Angelica frowned. "A thief? In Royal Bay?"

Felicity glanced at the unconscious Logan on the ground, his tongue stuck out and his eyes rolled back. She said slowly, "He's not just any thief. He came for Yvonne!"

“Hera... drive faster...”

James urged anxiously.

drinks, did not dare drive and sat in the passenger

James and Yvonne were in the back.

This road had a speed limit of 40.

Hera gritted her teeth and floored the accelerator.

The speed climbed from 40 to 100.

Yvonne clutched her Winnie the Pooh plushie, whispering, “We don’t really need to rush...!”

James remarked, “If that item falls into the wrong person’s hands, the consequences will be unimaginable!”

“Uncle James, what exactly is that thing?”

Hera was curious. Uncle James grew up in Capiton with a big family, had martial arts training since childhood, and was also a manager of a foreign security company. He had even seen many foreign royals. Whatever made him panic must be significant.

“Your Uncle Lincoln is an explorer and a biologist. Five years ago, he discovered a type of bacteria in a frigid region of the Moliga Empire, and he named it FS Microbacteria. FS has strong reproductive and adaptive abilities!

“After years of research by your Uncle Lincoln, he found that FS has a potent effect against the HIV virus. After clinical trials, it has been confirmed that FS can completely clear HIV virus cells!

“However, FS has a downside. When combined with certain infectious viruses, it can amplify their infectiousness and lethality tenfold.

“FS is a double-edged sword, useful for treating severe HIV cases but also a potential bio-weapon.

“The Moliga Empire lab intended to use it both ways-as a remedy for HIV and as a bio-weapon. Your third uncle strongly opposed this, but he was ostracized by the lab and eventually detained.

“I sneaked into the lab to rescue him, but the security was stringent. In a dire situation, a friend of uncle helped me locate him. Your third uncle told me that the lab has the offspring cells of FS, but the mother cells are hidden inside a crystal ball in your room...”
