

CEO Bride 575

Chapter 575

Duncan was overjoyed.

After enjoying a hearty meal and drinks, The Swordsman ch and asked, "Duncan... Boris mentioned you prepared some wo

for me?"

Duncan smiled slightly, took a phone from the security guard, and

handed it to The Swordsman. "Godfather, please see if they meet

your satisfaction..."

Upon receiving the phone and glancing at it, The Swordsman's eyes

sparkled with excitement. "They're much prettier than the ones I can

find myself..."

Duncan laughed heartily. "Tonight, you must enjoy yourself thoroughly, Godfather!"

After saying this, he instructed the bodyguards to take The

Swordsman for a good time.

At the Lee family's residence, Olivia had already received the news of

Luna's disappearance.

She organized a large number of people to investigate and search for

Luna.

The Inspection Office cooperated with them vigorously as well.

However, they found no clues throughout the night.

The next morning, Olivia hesitated before calling Nash.

Nash had just administered a medicinal pill to Kai.

Exhausted, he was resting on an adjacent single bed.

Hearing the phone ring, he picked it up, "Olivia... what's the matter

Olivia would not call without an important reason.

"Luna's missing!" Olivia blurted out urgently.

"When did this happen?" Nash inquired.

"Yesterday. We searched all night but didn't find her!"

"Why not ask Xeno to look into it? Doesn't he have the Skyes' intelligence organization?"

“After Xeno took over the Black Tiger Hall, Theo called his people back.”

“What about the Inspection Office?” Nash continued.

How could he find her in such a large place like Jonford?

“The Inspection Office has been searching all night too. They also received reports of two other girls missing last night.”

“Send me their photos and I’ll ask someone to help look into it.”

Nash had a contact in his network.

It was a top hacker who had developed a supercomputer and planted

viruses in satellite systems in 80% of countries worldwide.

3.4

This computer had a staggering computational power of trillions of operations per second.

His computing network covered the globe, so he could easily infiltrate the most secretive facial recognition systems of various countries. He could automatically access surveillance cameras of all brands.

Nash had helped him once, and he had promised to help Nash find anyone in the world when needed.

Nash had already engaged his help for that girl from the flower shop once before.

This time, it was to help Olivia.

Olivia got the photos of the other two girls from the Inspection Office and sent all three to Nash's phone.

Nash browsed the photos and sighed. "All pretty girls. After one night, I fear the worst."

After hesitating, he took out his button phone and dialed a number."

"Hello, Mr. Grim Reaper..."

A magnetic male voice came through.

"Help me find a few people!"

"Sure, send me the photos!"

The person agreed without hesitation.

Nash sent the three photos using his smartphone.

"Oh dear, this is three people. If I remember correctly, our deal was for

me to help you find one person!"

"Then help me find the girl in the uniform!"

The girl in the uniform was Luna.

Of the three girls, Nash only knew Luna.

“Okay, Mr. Grim Reaper. Please wait a moment!”

On the other end of the line, a handsome young man with blue eyes

and blonde hair connected his phone to the computer.

He then started tapping on the keyboard to activate his self-

developed God’s Eye System.

In a huge underground server room, numerous mainframes started

up, emitting a loud roar.

“Mr. Grim Reaper, to save time, could you give me the approximate range?”

“Drakonia, Jonford!”
