

Chapter 1121

"Director Li, it's hard."

"Hard work, director Li."

When Lao Li just showed up from the operation and didn't even show up, a group of doctors in the burn department all shouted around, the same director Li. When he came, someone called him Professor Li and Dr. Li, but this time the name was unified.

The name of the medical circle is particularly interesting. Small doctors tease each other when there is no superior, and they will also call each other director. When the doctor reaches the top of the professional title and the chief physician, if there is no position of department director, the relationship is generally better. When there is no department director present, he often calls so and so director.

In fact, chief doctors and professors with professional titles represent academic status, while department directors represent not only academic status, but also power status. Therefore, doctors are also people, and they can't escape the circle of fame and wealth.

Sometimes, when patients go to see a doctor, they don't mean to curry favor with each other, but it's better to bring a little happiness to each other in tone than to make each other impatient. Therefore, when they don't know what to call, there's nothing wrong with calling the director. Maybe if they haven't been the director for half their life, they will use more snacks when they are tired at work.

Don't just say, show me what's wrong with me. Doctors, especially when they are tired, have a bad temper. Throwing out a big check that you can or can't do takes not only money but also time. After all, this kind of thing can not be evaluated by the moral quality of doctors alone.

After a group of people gathered around, Lao Li was reserved. He's really reserved. He's a returnee. It sounds like he's going to die. In fact, no one urinates him when he leaves the mediocre hospital. For example, some hospitals have dinner parties. When they inquire, oh, these people are Xihua graduates. Come, come, come, the director is also Xihua. A group of people will be closer naturally.

And he can't. When I didn't meet Zhang Fan at the beginning, the Manchurian looked for an expert. His identity as a golden returnee didn't add points to minus many points. It can be said that his way to find a master is more bumpy and sad than his way to school.

It's different now. The materials have passed the clinic, and Zhang Fan in the operating room has begun to formulate operation guidelines. He's different now and shakes up.

Facing a group of colleagues with eager smiling faces, he nodded slightly, just like the modest department director nodding modestly to the lower level doctors after the ward round. However, no one cares about his attitude at this time.

"Director Li, have you and president Zhang started to formulate surgical guidelines?" Finally, someone couldn't hold on and opened his mouth and asked questions that everyone was very concerned about. Although knowing that Zhang Fan was recording the details of the operation, he more or less expected Lao Li to decide. He denied that Zhang Fan was formulating the guide, but was writing the year-end report!

How can you describe this in your mind? For example, as long as no one in China makes a plan, everyone is not in a hurry. Anyway, this is a small discipline, waiting for Jinmao. No matter what Jinmao can study, everyone will not be jealous.

But today, a hairy boy suddenly appeared in front of his eyes. He worked out the operation guide while performing the operation, which made everyone feel a little uncomfortable. Not just uncomfortable, but also actively participate in it, otherwise we will fall behind.

The Chinese people know very well that being backward means being beaten.

"Yes, it's making surgical guidelines." Lao Li nodded solemnly.

"Guide, a person is not perfect after all..."

At this time, those who are not positive begin to be positive.

On the operating table, the things that can separate the mind to record are definitely not children's play. And Zhang Fan's operation is obvious to all. It is said that no one doubts Zhang Fan's formulation of operation guidelines at this time. Now we are worried that we can't participate.

It can be imagined that as long as you participate in it, the guide will be completed, not to mention anything else. Maybe in the future, the textbooks for masters and even doctors in burn department will have to be hung with their own names, which will have more face. This can be called a big man.

"Yes, director Wang is right. But we all know the level of president Zhang." Lao Li paused and looked at a group of colleagues whose faces had changed.

"Why, get rid of us and don't take us to play? Looking for the golden mean?" Everyone looked at each other and almost had the same meaning in their hearts.

To tell the truth, Zhang Fan really wants to contact the golden mean at this time. They really don't have any drama. After turning to the sixth edition of medical textbooks, we can see that the editors can have a concept, either in the capital or in the magic capital. Few doctors in other places fall on the editors of the books.

It can be seen from the teaching materials that almost all the best doctors in China are gathered in the capital and magic capital. This is no problem.

Lao Li looked at everyone's faces proudly, and then said, "Zhang Yuan is of high standard, but a hero needs three help. Now we need everyone to contribute. Zhang Fan said that he now needs assistants and relevant patients. Starting tomorrow morning, this is the compilation center of the guide to new transplantation materials. Friends with ideas should sign up and contact patients as soon as possible.

And... "

I don't know when Lao Li began to talk melodiously and frustratingly" And what, director Li, don't take a big breath! "

There are anxious, small departments and large hospitals. The competition is still very fierce. If you take advantage of this wind, you may be able to reach the peak of your career. No one is in a hurry.

"Hehe, after my discussion with Stryker, Stryker will be fully responsible for the operation expenses and travel expenses of patients. As long as patients are suitable for new materials, they can sign up. "

Lao Li also paid a lot of money in order to let everyone send the patient to Zhang Fan as soon as possible.

As soon as he said this, the people around Lao Li scattered like birds returning home. The page is so big. If you don't seize the opportunity to go in early, you may be pushed away by some big guy on a whim one day.

Professor Zeng watched everyone make phone calls. He was worried. At this time, Lao Zeng was anxious and wanted to slap himself in the face" Too careless, too careless. "

"Director Li, I..."

They were almost gone. Lao Zeng squeezed over and boiled all day. His legs were sour, but his heart was more sour. Who would have thought that old Lu's apprentice had burns and had a famous hall. Regretful old Zeng, his intestines are almost broken.

According to Lao Li and Li Cunhou's previous personality, director Zeng will definitely have a back of his head and let him feel the dignity of intellectuals.

But now, Li Cunhou has no time or mind to compete with such people. All for the operation guide, all for Zhang Fan's operation these days.

"My comrade, how old are you? Don't you have a little city government. That won't work. Just me and Zhang fan are easy to talk. OK, I won't say more, as long as there are patients, as long as there are qualified patients. You can also participate, but in the later compilation, you still have to manage your own... "

"Yes, I understand. Thank you. Thank you. You must apologize to Zhang Yuan for me. I'll contact him now."

A group of people hurried away.

Lao Li was holding the wall at this time. He didn't know whether he was tired or too happy. Anyway, he seemed to be soft all over. Looking at the busy Zhang Fan in the monitor, Li Cunhou's eyes are wet. Think about the crimes suffered abroad in recent years and the anger suffered in returning home. Really, although the young man in the display is unreasonable and domineering on the operating table, he is hot and sincere.

Lao Li, like a resentful little daughter-in-law, leaned against the door frame and looked at Zhang Fan.

Qingniao, in the office building of the Affiliated Hospital of Qingda, Lu Laofan looked at the recent experimental report. Since the knife was closed, life has entered the normal stage. The old man has time to play bridge with his wife in the elderly center.

The old man doesn't have many hobbies. He doesn't know much about mahjong and chess. He just likes to play bridge. His generation doesn't know what's going on. They feel more fashionable than Zhang Fan's post-80s generation. They don't know whether they studied abroad or followed master Deng. They don't know whether they play bridge or not, but they still have some posture.

Lu Ning, Zhang Fan's younger martial brother knocked on the door and entered his teacher's office.

"Hehe, how can you come to me. Isn't your lab busy? " Without Zhang Fan, Lu Ning is old man Lu's closing disciple. Moreover, Lu Ning and Lu Laozi are more similar, partial to the laboratory.

"Let me see you. I've been busy lately. " There was no outsider. Lu Ning naturally stored some water in the teacher's teacup. The old man didn't drink tea now, so he drank some boiled water. When he drank too much tea, he rebelled against the prostate.

"Just have this heart. Don't always come to see me and delay your time. I can't help you with your research now. There's no separation between liver, gallbladder, pancreas and spleen, but I've crossed a

little. If you have problems with your pancreas, you can talk to your martial uncle."

Since Lu Lao was not on the operating table, his temper has become increasingly kind. There is really a trend of obedience. Unlike before, when he was old and weak and couldn't reach the previous level, he lost his temper and cursed on the operating table. It's strange that the assistant didn't help well, and the equipment of the equipment company didn't work well. Anyway, when the old man was about to seal the knife, he was as eccentric as the old man in menopause.

"Well, OK. You've been getting better lately. " Lu Ning himself took a glass of water and sat in front of the teacher with a smile.

In the medical circle, too many teachers and disciples turn against each other, but they are still so close after graduation.

"Can it be good? When you are full every day, you play bridge without overtime or surgery. If you look bad, it will become a waste of food."

The old man smiled.

"Younger martial brother, I called on a group of people these days. There seems to be some surgical guidelines. "

"What, surgical guidelines?" Old man Lu took off his reading glasses and looked at Lu Ning incredulously.

Lu Ning nodded.

"Oh, oh, the boy finally woke up. Did you remind me? "

"No."

"What guidelines?"

Chapter 1122

Lu Ning knew it was wrong when he turned his mouth.

The old man rubbed the white porcelain cup, which was the kind often seen in fishing hotels on TV. It was a pure white official hat tea cup with a lid“ It can't be gastrointestinal! However, the scientific research force in Northwest China is weak after all. Smelly boy doesn't know how to fool him. He pulled several major medical schools in Marubeni to fight him. It's better to have research than not, otherwise he will only have surgery. "

It sounds like the old man is disgusting. In fact, I don't know how proud the old man must be.

One of the ancestral disciples of the Chinese nation is counted as one. At Zhang Fan's age, they are no better than Zhang Fan. Of course, except for the founder and the eldest disciple of Kaishan, these two can't be compared. Their system is estimated to be more advanced than Zhang Fan.

Lao Zu not only became the director of general foreign affairs at a young age in de Mao, but also received medals in de Mao countries. Of course, this was generally not mentioned later. You can imagine how powerful the old man was when China was not unified.

And the first disciple of Kaishan is not bad. When the new country tightened its belts and held back its big moves, when there was no money and resources to pay attention to medical treatment, the old man created the liver blood vessel map of Chinese people. This is a great achievement. This is equivalent to a surgical guide for liver surgery.

Of course, other people's guide is not at the same level as Zhang Fan's Guide. Although the skin area is large, the complexity of the liver is the father of the skin. So, sometimes, Zhang Fan will think. In those years, their teachers and uncles, who were so young and the country was still so poor, made such great achievements. They must have hung up, perhaps their own upgraded version.

Of course, if these two people don't mention it, among the current ancestral disciples, Zhang Fan is not famous, but his technology is high, and his achievements are not small, so don't look at Lu's phone to clean up Zhang Fan remotely. In fact, he doesn't know how happy he is.

Sometimes, when chatting with other martial brothers, the old man mentioned Zhang Fan. In the old man's words: my little apprentice, although he is alone in the northwest, he can pull a group of university professors in MARUKI country to study gastrointestinal tract. That's why the rabbit doesn't get liver and gall.

As soon as this was said, the other martial brothers were not in the mood to chat. Although everyone didn't say it, they all vaguely felt that old man Lu's closed disciple might be the leader of the third generation. Although young.

"Ha ha." Lu Ning doesn't know whether it's an awkward smile or a laugh at the old man. Anyway, his face is not even muscular.

"Speak well. Where did you learn such an expression. What the hell is going on. "

"He didn't do it!" Seeing that the old man's eyes were round, someone said, "don't worry, he didn't have the courage either. He and Li Cunhou, the golden mean, got a skin allograft, which has passed the clinical trial. It is the material with the smallest rejection on the market.

He's working on the operation guide these days. He's too busy to call me and let me help. " Luning told the old man the whole story.

"Hey!" The old man doesn't know what to say.

Let's say he doesn't work hard. Whose apprentice can get an operation guide. Although it's a small subject, it's also a subject.

It can be said that he was focused. Flying knives all over the world under the banner of Lao Tzu made money, but there was no news. He turned around and went to get something else, either orthopedics or gastrointestinal tract. Today he got another burn. The old man sometimes wondered if the bastard had thought about it in those years and beat Lao Tzu's name to make money!

The old man was stunned for a long time.

"Are you busy now?"

"I'm busy, but I can spare a few days." Lu Ning can be a senior brother in the ancestral system. Although he will be a senior brother for Zhang Fan, he is also a senior brother. The two brothers have a good relationship. Therefore, he answered the phone call from Lao Chen of the tea vegetable hospital, came to report to the teacher, and then prepared to go to tea vegetable hospital.

"Well, you are much better than that boy in research and experiment. You should pack up your tea quickly. Don't let outsiders fool your younger martial brother. He hasn't even entered the door yet. " Although the old man said Zhang Fan, when he heard that Zhang Fan wanted to help, he quickly let Lu Ning go.

"If you play the mean game and cheat, you call me."

"OK, I'll go to tea vegetable in the afternoon. Teacher, do you want to take a message to the younger martial brother? " Lu Ning got up with a smile and was ready to leave.

"Take a message? No. He's probably too busy to care about his face these days. I'll clean him up when he's finished. Be careful on your way. "

"Hehe, I'll go."

.....

Zhang Fan is really busy here. Zhao Yanfang put down all her work to assist Zhang Fan. Dr. Zhao now really feels that he was fascinated and got on the thief ship. Today, we are engaged in prevention and virus. In a few days, we have to straighten the gastrointestinal tract together with marukuni. We haven't got a clue yet. Now Zhang Fan has come to burn us again.

And it's not a small project. As soon as we get a surgical guide, Zhao Yanfang's head is big. Can this be played by a regional hospital. Even if it's a small subject, it's not something a regional hospital can play.

She wanted to pour cold water on Zhang Fan and make fun of him, but when she looked at Zhang Fan's operation records, she frowned, "find help, at least those who have participated in the key medical laboratory. Now we are short of manpower, and the doctors in the hospital can only help with the experiment, but in the later stage, the summary of some data is not what the doctors in the hospital can do.

Hey! I let you say it. "

Zhao Yanfang sighed. She thought what she had learned was very complicated, but today she found that the Dean was more complicated than what she had learned. Moreover, his level seems to be a little deformed. I say he knows some fur. It's amazing to do super difficult surgery. Let's say he has a high level. Let him say the principle data. He made a pot of paste.

The operation guide was already a little vague. Dr. Zhao had to pick up the burn he had put down for several years and work while learning.

Not only Dr. Zhao is busy, but Ouyang is also busy. It's winter,

All the infrastructure has been shut down, and the old lady has no chance to toss about other people's construction companies. So I watered the flowers in the office and stood in front of the windowsill as a thief to see who was late. Originally, she was at leisure. Anyway, she doesn't care about the things in the hospital. She watered the flowers at work and went home to see the dog blood love film of Bonzi. She can be regarded as drawing water with salary.

But after Zhang Fan wanted to get the operation guide, the old lady had to be busy. First of all, she has to coordinate with airlines. Tea is too far away. It's too far to the horizon in the words of mainlanders. It is impractical for patients in the mainland to take a car or a train.

We have to take a plane, but Airlines look at patients wrapped like mummies. They are really afraid, deeply afraid that patients will die in midair. Sometimes, I can't say. So Ouyang came out of the mountain.

The old lady sat in the ground service command center of the tea vegetable airport. "Don't worry, every

patient is accompanied by the medical staff of the local hospital. There will be no accident. Do you see that all our 120 are on standby. Come and pick it up. It won't delay your business. "

The old lady still has some tea vegetable cards. Let alone a small airport, she goes to the government boss's office. When she is unhappy, she still beats the table and quarrels.

So the leaders of the tea vegetable airport have turned into rags“ Not that. As you know, there are many disputes now. If other passengers complain... "

Anyway, the meaning is very obvious. I just don't want to take the job. He also has difficulties. He doesn't know what great things have been done here at the tea vegetable hospital. These days, patients in all directions are on stretchers, wrapped tightly, moaning patients want to buy air tickets to tea.

One or two, he clenched his teeth and did it. It can be heard that there are no fewer patients like the 20th and 30th. He is really afraid. Although we can sign an exemption agreement, it's not true that something is going to happen.

So his face is bitter.

"What's the matter with you? You're still not a party cadre. You think it's your business. The country has made such great efforts to build an airport here, just for the convenience of the people. What do you mean by pushing and blocking.

I've said it many times. We've negotiated with the local hospital. No accident, no accident. The patient comes to see a doctor, not to die. Yes, no, I have to do it today. I tell you, the hospital is on standby now. If you delay, the patient will die. I tell you... "

The leaders of the airport are sweating down.

After saying that, the old lady began to feed dates again, "you know, the level of tea vegetable hospital is becoming more and more advanced. In the past, your planes were half empty and not full. You'll lose money. Don't worry about asking for money this time. This is paid by Jinmao enterprises.

When this time is over, give your airport leaders a VIP physical examination. They are the top experts in tea. Don't underestimate our tea hospital. I'll tell you, go to my office and the leaders have written banners for me.

Moreover, when the time comes, we will publicize the tea vegetable airport and tea vegetable hospital, think what the people think and worry about what the people are worried about, and you are waiting for promotion. This is a good thing. You see, it scares you. Call the local patient and get on the plane. "

The old lady is like carrying a knife. Anyway, you have to agree today, whether you agree or not.

This is the advantage of strong leaders in small places. If it's in a big city, it won't work. When the

administrative notice comes down, the patients don't have to take a plane and send them on the spot

"It's all right?"

"It's all right! Will I fool you? At least I'm also a department leader. You can rest assured. Come on, call! "

Ouyang is busy, so is Lao Chen. Lao Chen is responsible for the relationship between the government and traffic police, Ren Li is responsible for the internal medicine backup group, Lao Gao is responsible for coordinating various departments, and Lao Ju is responsible for coordinating several other affiliated hospitals and postoperative treatment of patients.

It can be said that the tea vegetable hospital began to be busy around Zhang Fan.

Chapter 1123

Work hard, persevere and fight hard.

It seems that I don't know when to start. These words have become chicken soup. What is chicken soup? It seems nutritious. In fact, it is monosodium glutamate water with some oil flowers. In fact, if you want to get and want, you must have these three words without a good father. There is no other way.

Zhang Fan seems to be back when he just got the system. He stayed in the operating room all day from morning to night. He was hungry. The hospital canteen was open 24 hours a day. Since Zhang fanquan's tea vegetable bidding, the ingredients and precious aspects of the tea vegetable hospital canteen have not improved, but the taste has become one of the delicious meals of tea vegetable. If the name of the hospital was not too frightening, It's estimated that many gluttonous food will come and have a taste.

Tired, sleep in the lounge where the head nurse in the operating room bought it. In the environment of all-weather fluorescent lamps, Zhang fan can't tell whether it's day or night. Although he is tired, his spirit is excited.

Because in the process of surgery, Zhang Fan realized more and more clearly that his surgical level seemed to be raised to a level. Vaguely, even if you don't cut, you can predict the situation after cutting. How to say this, it's about a bit of a so-called professional hunch. That is, the so-called flickering and seeming appearance in Chinese culture.

This thing sounds mysterious. In fact, it has such a feeling among the big players in many industries. This

feeling can not be quantified, and sometimes it can not be expressed, let alone put this feeling into words. However, it can really improve Zhang Fan's understanding and cognition of surgery to a higher level.

Therefore, Zhang Fan is still very proud. This feeling system can't be given. It's his own efforts. The tired legs were not his own. While rubbing his legs, he was still very proud. Before going to bed, Zhang fanlue said with narcissistic heart: "I still have talent."

For Zhang Fan's struggle, the doctors of tea vegetable hospital are not surprised. In their words, there are always a few times in a year when Zhang hospital has a draught. As soon as it has a draught, he begins to stay in the operating room.

Earlier, Ouyang was frightened by Zhang Fan's struggle. She was deeply afraid of Zhang Fan's accident. The old lady deliberately turned the corner and asked Lao Gao to persuade him. Later, Zhang Fan had more times, and the old lady didn't take it seriously.

And we all know that after every such effort, a department of the tea vegetable hospital will suddenly turn a native chicken into a swan. Hepatobiliary center is an example, Orthopedic Center is an example, and even pediatric surgery is an example.

So when Zhang Fan was struggling in the operation, many young doctors were worried. They are not qualified to participate in this level of surgery, but there are no restrictions on their visit. Ouyang dares to use young people, and Zhang Fan likes to use young people.

This is also an opportunity. The burn department and the burn department of tea element are estimated to be the next key department. Earlier, when Li Cunhou came to tea, Ouyang arranged more than ten young doctors as assistants for Li Cunhou, just like the big class teacher in the kindergarten.

In fact, assistants are all a cover, and the old lady thinks very well. Maybe one or two of these people have become Lao Li's apprentices. The idea is good. Some people can bear hardships and have talent, but they just can't stand loneliness.

Lao Li came today and left tomorrow. Almost none of the more than a dozen doctors arranged at the beginning insisted on living at home. The house and car tickets are all under pressure. Therefore, one or two doctors are slowly diverted to other larger departments. After all, the departments are too small and have no money to transfer.

Those who let others kick the wall barefoot can't just listen to the crisp sound. Ouyang and Zhang fan

are also very helpless. Talent is rare after all. Therefore, the skin of tea is still so half dead. But this time it's different. This time it's a real hammer.

When the materials came out, Zhang hospital stayed in the operating room again, which means that the Department of the next fire is dermatology. Maybe the dermatology department can separate another burn department. This is the chance.

Those who left wanted to come back. They didn't choose at the beginning. Now they see the opportunity. Senior doctors have no choice. In the medical industry, the subject they chose when they were young is almost equivalent to setting a label on their forehead. When people talk about it, they will say, what's your origin.

The origin of the medical circle is not to ask whether your family is a medical family or whether you graduated from a key medical school. They ask the subject you are engaged in. For example, Zhang Fan, where he goes, even if he learns from Master Lu, his practice certificate is registered in orthopedics, and his birth is an orthopedic doctor.

In the hospital, young doctors are worried. Outside the hospital, doctors such as the deputy director of the burn department of several senior officials third-class hospitals in niaoshi were also excited. Tea vegetable is like holding a Wulin meeting. They know it even if they haven't been informed.

Many people are interested now. Not only the people in the bird market are attracted, but also the deputy directors of some large cities in the mainland. That is, tea is too remote and a little closer to the center. For example, in Shaanxi, these people probably don't even consider it, and they will definitely end up rolling their sleeves early.

The young doctors have jumped up and down, and these people are still waiting for Zhang Fan's final conclusion.

"This guy is great. I've been with you for three days. Now I can't straighten my waist. "

"Yes. He's still young. You said he was so young. How could he eat so deeply? You and I are at his age. Do you dare to have such an operation? " The two doctors at the level of deputy director had an operation and rested in the expert building of tea vegetable hospital.

"Dare? Look at what you said. It should be a question of whether it will be OK. " A southern accent with glasses and obvious accent can be classified as a foreign language.

"Hehe, that's right. I'm a little excited. " The other one is also a southern accent, but you can understand it carefully. It's much better than the one just. Needless to say, everyone is at the same level. When it comes to heart, we all understand.

"Hey, I'm also excited, but the winter of tea vegetable is terrible. You know, my nose is almost frozen out after I went out for a few minutes. But the heating here is really good. There is no leader in the

dermatology department of tea vegetable hospital. Guli is in her 40s and has not made any achievements. She must not be able to take it in the later stage. Ah, it's hard to choose. "

They are both college students and have a good relationship, so they have one to say, and they are not the only ones who are moved. I don't care whether I compete or not.

"Yes, children's education, wife's work and the views of relatives and friends are all troublesome things. When I came to tea vegetarians, my relatives told me what to do with tea vegetarians. What was good to go to the place where our fellow Lin Lao's hair was matched in those years. "

As they talked, they had nothing to say and lay quietly in bed thinking about gain and loss. There are too many such dialogues in the tea expert building.

Everyone is not very satisfied with the area of tea vegetable. Moreover, for tea vegetable hospital, these people are not hairy young men. Their eyes are very poisonous. When you look at it, you know that this hospital depends on Zhang Fan. Once Zhang Fan wants to run, the hospital will fall from the top of the cloud to the dust, so they can't afford to gamble.

Moving has been poor for three years. For them, it is not only a problem of moving. Once they leave the original hospital, the pit will disappear. It will be even more difficult to turn back.

.....

"He doesn't care about his home. He stays in the hospital all day. Does he still want this home. Xin Kui is the dean. If he is the president, does Lao Tzu have to make an appointment to see him?" Zhang Fan's family. While eating the meal cooked by his daughter-in-law, Zhang Fan's father and his wife gathered together and scolded Zhang Fan in front of Shaohua.

After the old man scolded, Zhang Fan's mother seamlessly connected, "that is, when the career can be completed, the career is national, but the home is his own. Hua Zi, don't persuade me when he comes back. I'll clean him up. "

Shao Hua couldn't laugh or cry. Zhang Fan hasn't been home for almost a week. Shaohua knows that Zhang Fan is very busy recently and that he is at a critical moment, so although he is a little lost, he still supports his man.

Because she knew that when she chose, she knew that there were too many times in this industry.

Before she could find it, her father-in-law and mother-in-law came to the villa and accompanied herself while scolding Zhang Fan. The little loss in her heart disappeared immediately after the two old people stood on their own front.

She smiled and said to the two old people, "Mom, look at what you said. Don't mention that he does this occasionally. Many of our classmates are on business almost every week. They haven't taken care of

Zhang Fan's family yet. When Zhang Fan is not busy, he still takes care of his family very much. Don't make trouble. He's probably tired and his mouth is tricky. I just don't know whether he ate well in the hospital, alas! "

As soon as he said this, the old man stopped talking. He discussed it with his wife when they came in. There is no one who doesn't love his son. Although the father and son are always angry, his son is his pride. His daughter-in-law was reasonable, so he stopped talking. After eating, he put down his chopsticks and went to the yard to eat.

"Yes, little stone doesn't know whether the food is good or not. Why don't you go and have a look." Zhang Fan's mother said her true thoughts at this time.

"OK, mom, are you going or not?"

"Me? I, I won't go. Don't mess him up. "

Shao Hua saw that his mother-in-law also wanted to go. Without a word, mother-in-law tidied up and drove away.

Zhang Fan now lives a little away from the hospital and has to drive.

"Dad, are you going to see Zhang Fan?" When the car came out of the yard, I saw the old man walking slowly in the street. In winter, the old man wanted to have a good chat with his mother. He was inconvenient, so he was frozen outside.

"I'm not going." The old man is still tough.

"Come on, you have to show me the way." Shaohua said again, and the old man got on the bus happily.

"Don't worry. I'll show you the way now. I'm very skilled."

"Huazi, do you think Zhang Fan will be humiliated if I wear this? After all, he is the Dean now." When Zhang Fan got on the bus, she kept pulling a pair, as if she felt that there were always some irregularities in one pair.

"Lose someone, you see what you say." Lao Tzu Zhang Fan is not happy.

"Hehe, how could it be, mom? If you put on the woolen coat Zhang Fan bought for you. It's more foreign than me. I don't know. I thought it was Sister Zhang Fan. "

"Hey, hey, Hua Zi will make the old woman happy. It's good not to lose face. It's good not to lose face. When Xiaoshi came here, he was alone and capable of his current position. Think about it, we all know how difficult it is for children. I can't help when I'm a mother, but I can't make trouble for children any more. "

With that, the car was quiet.

Chapter 1124

In the past, when the word doctor was used, everyone thought of both good and bad. The bad side is red envelope kickbacks. On the one hand, it has a high status and ensures the harvest in case of drought and flood. Even if there are knives in the sky and people eat cereals, they will suffer from all kinds of diseases. It can be regarded as an industry that does not ask for people.

In recent years, after the photos of various doctors taking time to rest in the operating room were sent out, each said the situation. Some say show, others say hard work. In fact, this kind of photo is still very introverted. Sometimes in the doctor industry, there is no way to say.

For example, when a patient comes to 120, the patient needs to be rescued, and the person is dead right away. There is a shortage of doctors and manpower. You just get off work and change your clothes. You have to go home and compare your skills with your wife. But the director said, Xiao Zhang, come and help. There are not enough people, and the patient is bleeding.

At this time, what can the doctor say? He jumped up and said, I've been on the job for 24 hours. Now I'm going home. I'm protected by the labor law. However, after engaging in this industry, some words are really speechless.

You said the doctor was hard hearted, but when you saw the patient's crisis, he quickly put on his white coat and rushed up without hesitation. Sometimes it is personal spirit and personal quality, but most of them are the recognition of this practice.

Shaohua took Zhang Fan's parents and father into the hospital. Her pickup truck is on the farm. After returning to tea, Zhang Fan usually leaves her car to Shaohua. Therefore, when the red card cooluze entered the tea vegetable hospital, the guard's security department came at the first time.

To tell the truth, there is a big difference between the security section with staffing and the security section without staffing. If Zhang fan drives into the hospital on weekdays, they will come out of the sentry box at most and say hello with a smile. But now everyone knows that hospital Zhang is in the operating room.

Therefore, only the wife of Zhang Yuan can drive. The section chief of the security section came out of the office next to the guard at the first time and trotted to direct Shaohua to reverse the car. To tell the truth, there are spaces around the administrative building. Is it still useful to find a conductor!

"Thank you, section chief Yang. My skills are not good. Thanks to your command, I guess I'll have to wait a long time." After getting off the bus, Shaohua was also very polite.

"Ha ha, manager Shao's technology is much better than that of Zhang Yuan. Why, come to Zhang hospital. Zhang hospital is in the operating room. I'll take you there. "

He said he would lead the way.

Many times, especially in the system, you are more attentive to leaders than to their families. The section chief of the security section understands this truth. Anyway, he has never commanded Zhang Fan to reverse and park.

"No, no, I won't find him. Thank you, section chief Yang." Shaohua quickly thanked each other for their kindness. With that, Zhang Fan's parents got off the bus.

"This is..." Yang asked with a smile.

"This is my father-in-law and mother-in-law. This is Yang section chief of the hospital. He is a good hospital leader." Shao Hua is very talkative.

"Ouch, ouch, uncle and aunt..."

Shaohua hurriedly sent off section chief Yang and took Zhang Fan's parents to Zhang Fan's office. She had to find Lao Chen first.

"Section chief Yang is very nice and friendly." Zhang Fan's mother whispered to Shaohua. Lao Tzu Zhang Fan pouted and whispered, "don't talk nonsense. Your son is the dean. Can you not be enthusiastic. The hair is long..." "The old man looked at Shaohua and didn't say any more.

Zhang Fan's mother glanced at the old man and couldn't help but stop talking. If Zhang Fan's mother can give up on weekdays? make fun of! She can let Lao Tzu Zhang Fan know why his hair is long.

After Lao Chen saw Shaohua, Shaohua said his intention, and Lao Chen didn't call Zhang Fan. Zhang Fan was tired recently. He didn't know if he would take time to rest, so he quietly took three people into the lounge of the operating room.

The three people who changed their hand washing clothes and slippers looked curiously at the scene in the operating room. The operating room is too mysterious for people who are not engaged in this industry. When the old man and the old lady walked from to the lounge in the hall.

The old lady's tears are coming down.

A group of young men and women, wearing masks and hats, lay on the floor like corpses, snoring slightly. If the conditions are slightly better, cover a green instrument package skin and lie on the ground to rest.

They are all parents. Looking at them is like seeing their own children. The old lady's tears revolve in her eyes.

"Recently, the hospital is overcoming a technical difficulty. The time is relatively tight. There is no way to go out and have a good rest, because the patients are from other places. The patients will come after the flight, so we can only make do with it first." Lao Chen doesn't know what they think. He explained in a low voice.

"Zhang Fan..." Shaohua wanted to ask, just said.

Lao Chen said, "the conditions of Zhang hospital are slightly better, but it's also reluctantly good. It's in the front small office. It was originally a utility room. The hospital felt that Zhang hospital was too tired, so it cleaned up and made it a small lounge."

Lao Chen certainly won't say it's the decision of the head nurse in the operating room. It's called not looking for trouble. Although it's all right, he won't say it.

The lounge in the utility room was not big, and the bed couldn't fit, so a three person sofa barely squeezed in. Gently push the door open, you can see Zhang Fan lying on the sofa, also wearing a mask and a surgical cap, but fortunately, Zhang Fan's treatment is higher. There is a sofa covered with a blanket.

There is half eaten rice on the tea table.

"If the oil is too big, he doesn't like it very much. Ah. " Shaohua said softly.

I want to wake up, but I can't bear to watch Zhang Fan sleep soundly. Just when several people were tangled, Zhang Fan suddenly looked up " Is the patient here? "

"No, Zhang Yuan, manager Shao, uncle and aunt came to see you."

As soon as Zhang Fan listened, he rolled over " Hey, why are you here? Lao Chen is also inappropriate to bring them in. "

Lao Chen smiled and said nothing, "we'll send you something to eat. Don't blame others, Dean Chen. Don't take it to heart." Zhang Fan's mother quickly explained.

Old Chen waved his hand, said hello and went out of the lounge. He knew that Zhang Fan's mother didn't understand Zhang Fan's position in the hospital. It's not convenient for him to be here.

When I came here, I wanted to say a lot to Zhang Fan, but I really saw Zhang Fan's working environment and didn't know what to say.

"OK, let's just come to see you. Don't be too tired. I brought you some food you like. We know the impact is bad. Let's go now. You see, you have a long beard." Shaohua carried his body and touched Zhang Fan's stubble. A little reluctant to take her in law out of the operating room.

Zhang Fan is the main force of the operation. He can't go. Others rotate in three shifts to cooperate with his operation" Wait a minute. I don't need to call you now that you're well. This is brother Lu's phone. His flight is at 3:00 p.m. when you take the hospital officer to pick it up. I won't go. Please explain to elder martial brother. After receiving it, take elder martial brother to eat and send it to the hospital. "

.....

"Son of a bitch, he'll make people!" Lao Tzu Zhang Fan said nothing. With the arrival of Lu Ning and a group of doctors, the skin transplantation guide group of tea vegetable hospital is also complete.

In the operating room, Zhang Fan kept performing operations and sending out various data. In the observation room of the operating room, after the summary group summarized the data, it was sent to the laboratory at the first time. In the laboratory, Li Cunhou, Zhao Yanfang and Lu Ning took the lead and carried out the experiment with a group of doctors.

Zhang Fan is busy, they are even busier. Sometimes, they operate during the day. In the afternoon, the data comes out of the operating room. They have to test the data overnight. It can be said that one ring fits another, one ring catches up with another. It's absolutely hypocritical to say it's not hard.

In two weeks, the number of surgical patients finally decreased slowly, and the large collection of experimental data made the laboratory more busy. But Zhang fan can finally come out of the operating room.

"Take off a layer of skin!" Zhang Fan and a group of doctors who came to help boxing smiled and said.

"Hehe, Zhang hospital is still powerful. Generally, this kind of project will take less than half a year if it is in another hospital. We followed Zhang Yuan and finished it in half a month. To tell you the truth, I don't believe it myself, ha ha! "

A group of people are full of gossip. It's false to say they're not excited. Zhang Fan is very domineering

on the operating table. He is really an assistant when he comes on stage, but it is different when he gets off the operating table. He is approachable and makes people feel that he has changed a person.

"Thanks to everyone, there will be a thank-you banquet later. I will prepare a simple meal and everyone can have a rest together. Also, when we wait, we all sign our names on the preliminary report of experimental data. We can't let everyone come in vain after a long hard day. "

At the beginning, Zhang Fan was trying to put his perception into practice. But later, with the increase of patients, the increase of doctors helping boxing, and Lao Li's constant nagging, Zhang Fan felt that he might really be able to make a guide, so he called the little brother who was partial to the experiment at the first time.

Now I'm finished here. It depends on what's going on with junior brother and Lao Li.

On the way to the canteen, several assistant boxing doctors at the level of deputy director chatted with Zhang Fan respectively.

In general, there are three meanings. One is Zhang Fan's plan in the future. If Zhang Fan wants to leave tea, we don't have to say more. The other is whether Zhang Fan wants to find a leader in the burn department. The third is whether they are qualified or not.

To be honest, there are too few such opportunities. Many people dare to gamble. Because there was no result in the laboratory, Zhang Fan didn't take everyone out to dinner, so he entertained them in the small restaurant of the canteen.

In fact, Zhang Fan is also a little stingy.

Before eating, Ouyang entered the small canteen with a spring look on his face. I don't know whether the weather is too cold or exciting.

"Is there a result? It shouldn't be. The old lady doesn't worry about the hospital recently!"

Just when Zhang Fan wondered, the old lady pulled Zhang Fan to a place where there was no one and giggled all the time.

If other people, Zhang Fan, would say that if they were ill, they would be Ouyang. Zhang Fan waited patiently for the old lady to laugh enough before he asked, "Dean, what's a good thing? I'm so happy."

"Hey, hey, the army is coming. Hey, hey, it's said that the bird city leader who contacted directly. It is estimated that bird city leaders will accompany them to the hospital tomorrow. Boss Cha Su just called me to get ready for reception. You were in the operating room, so I didn't bother you. "

"The army?"

"Yes. Hei hei, this time we should make a good sum up and let our hospital become a designated hospital of the army. "

Chapter 1125

Whether Jinmao's army smoked camels and drank coke and called for support as soon as there was a war, Zhang Fan didn't know. But since the Second World War, the army of the golden Maoist country has fought many wars, young and old, and I don't know why. Anyway, people's slogan is for all mankind.

Other countries will be more or less weakened after the war. But Jinmao is different. To use aunt song's words, they have money. Zhang Fan didn't pay attention to other aspects, but medical treatment, especially the burn department, fought several wars, especially the two wars related to China, one is the war on the Bangzi Peninsula and the other is the war with monkeys in the south.

After these two battles, the army did not win, but the burn research center of other people's golden hair army has become the most advanced Burn Research Center in the world in the war. Moreover, at present, in the field of burns all over the world, the top hospitals are almost military hospitals. The eldest is golden hair, the second is a bear, and even Yugoslavia are quite powerful. Although the country was divided into several, the southern army hospital treated 3008 patients in the battlefield burn department in one year from 1991 to 92 (Real data.)

The Chinese burn department and the military hospital are also the leaders, but they are not enough to see in the world. When there were patients, the poor socks of the country leaked their toes and ignored them. When I look back, I have a little money, but the patient is gone again.

Medical treatment is like this. It sounds good to say, saving the dead and healing the wounded. In fact, the doctor's experience is almost equal to the number of lives lost. The ancestors of China said that we should never forget danger in safety. The army has also made great efforts in this regard.

But it's too hard to break through. The accumulation of medical experience, how to say, is particularly similar to drug production. Simply put, for example, many drugs in Europe and America are not only daunting for chemotherapy drugs, but also not cheap for other drugs. Why do Europeans and Americans love fitness so much? Are they used to it? No, it's too expensive to see a doctor and take medicine.

The imitation is as tall as it is said. The third brother next door is known as the strongest medicine in Asia. In fact, the drugs they imitate are better than nothing! Pharmaceutical is a very precise and

rigorous project. By analogy, the difficulty of this thing is no less than that of manufacturing a large aircraft, that is, a Boeing large aircraft.

There are too many crafts here. How many countries in the world can build large aircraft? Medical treatment is also a truth. The accumulation of technology is like the accumulation of technology. It can be said that it is absolutely wrong to make a mistake.

Therefore, when the tea side was full of Chinese patients, the general digital hospital of the Chinese army also smelled the smell. After asking, I couldn't sit still. The burn department, the most powerful burn department in China, was in someone else's hospital.

Their nature is different from that of local hospitals. Generally speaking, local hospitals relieve patients and protect their health for the people, and people also shoulder the task of battlefield. Therefore, they are particularly sensitive to this aspect.

At that time, Lao Li's materials, to tell the truth, also found someone else, but it was too difficult to use. Battlefield burns, the military burn center of the golden Maoist state once said that surgery within an hour can prevent the death rate of the wounded with a high probability. But Lao Li's materials didn't last an hour at the beginning. Nine out of ten failed, so they didn't care. There are too many semi-finished products.

But now it's different. After asking, the tea vegetable hospital began to issue operation guidelines. Once the operation guide is formed, it is like building a high-speed bridge. As long as there are rules, it is not only fast, but also safe and effective.

People have a brand face. Although they don't know tea, they have a much broader way. First, investigate the foundation of tea element hospital.

"Well, top three in the region. Ah, the top three in this area are wonderful. There are several research centers. They also cooperate with Marubeni and Jinmao countries, and they are all top hospitals. It's a little interesting. " After getting the preliminary information, the director of the burn department of the digital hospital went to the president.

People's dean is hung with golden stars. He looked at the information in the hands of the director of the burn department. After a little meditation, he asked, "are you sure you have passed the clinic?"

"Yes, at present, we have basically achieved the results proposed in Professor Li's paper. At the beginning, the operation was too difficult and demanding. We didn't follow up. " The director of the burn department explained.

The Dean thought, picked up the phone and called the tea vegetable border police. Speaking of it, the border police here used to be very powerful. Later, although they became public security, they were in the army. Even if they were trained, it didn't seem to be a kind of training to prevent urban emergencies. It was a little like a highland War Regiment.

Therefore, it can be said that although wearing police uniforms is actually the same system as others wearing military uniforms.

"Ha ha, I'm Lao Liu from the digital general hospital. Let me ask you something. Does the people's Hospital of chasu understand? "

The phone call from the Dean happened to be sent to the leader of Zhang fanhong brand. At the beginning, the leader wanted to dig people and give the brand face. As a result, the other party was not sensible. The car brand and face were needed. There was no news when it was over.

Then the leader wanted to go back and take back the red license plate. According to the leaders of the local traffic police department, this car often appears in the front line of risk resistance and disaster relief, and it always takes the lead. When the leader thought about it, was it good for military and civilian fish and water? He didn't take it back.

"Mr. Liu, we often deal with the Municipal People's hospital. We have a good relationship and understand it very well. Several rescues rely on the doctors of the Municipal People's hospital. Your setting of the border hospital is too unreasonable. The military hospital on the border is as small as a sparrow. You should reflect."

The president of the digital general hospital didn't have time to fight with him“ Their hospital burns department is very bad? "

"Great, why not. When the oil factory exploded, many of my soldiers were scalded. It's the doctor from the people's Hospital of chasu city and Professor Li in the capital who have made great contributions. "

After hanging up, the soldier's style is definitely not sloppy. "You take people to tea and give me feedback at the first time. If it is really perfect and suitable for the use of the army, I will report it and try to win it over. When necessary, the core doctors of the hospital can be specially recruited into the army. "

"Yes!"

Then, the director of the burn department of the digital hospital and the vice president of the hospital led the way to the frontier. Although he is a hospital, he has a high rank. Accompanied by the intestines and stomach who didn't speak at the bird market, he came to tea.

On the tea element side, we pay more attention to it. The leaders at home, one by one, came. This is a good thing. It's a good thing with more face.

It is estimated that under the influence of Ouyang and Zhang Fan, boss Cha Su kept complaining in front of superior leaders“ Dear leaders, in order to develop the people's Hospital of chasu City, we have really tightened our belts up and down. In order to develop the hospital well, the salaries of our civil servants are ready for loans.

Let's look at the building of our hospital. The regional hospitals in developed cities are not as high as the building of our tea vegetable hospital.

Leaders look at the equipment in the hospital and boast that individual instruments do not even exist in the digital general hospital. They are all experimental equipment. In particular, our burn department has taken the lead in the past two years, especially after setting up a laboratory jointly with Professor Li, chasu Municipal People's Hospital and chasu College... "

Boss Cha Su wants money, so he doesn't say it. He exaggerates a lot. The leaders of the digital hospital also pretended to be shocked. They listened in extra detail and asked questions in key places, such as who took the lead in the laboratory, who presided over the project and who was the top priority.

If boss Cha Su knew that they came with the intention of digging people, they would probably cry. Why is it so difficult to deal with people.

Zhang Fan has no time to receive. Ouyang, on behalf of the tea vegetable hospital, can only and must have received. The old lady rarely wore light makeup and a skirt. In winter, I don't know what the old lady thought. Anyway, just like the female prime minister in those years, she wore Tang clothes with a little Han culture on her upper body, not Tang clothes, and a black woolen pleated skirt on her lower body. He even praised a small black bag in his hand. Anyway, he attached great importance to it.

The other party is trying to dig people's minds, and the old lady is trying to ask for money and brands. They are all social people with ideas!

The field experts who were supposed to leave didn't want to go either. It's not stupid. At a glance, we all understand that the country should pay attention to it. The expert who had been wavering in his heart did not waver at this time and entered the operating room for the first time.

Originally no mind, also have a mind.

"The surgical data is too imperfect. Can we say that it is a guide? At most, it is a surgical paper, which can not be published in the core journals. For such things, we can produce 70 or 80 articles a year. It is not enough to rely on your small volume for this level of guidance. It's not perfect. The surgical patients are single and one-sided. It's too childish. It's too limited. It's a waste. It's a real waste... "

At the reception meeting, the director of the burn department of the digital hospital, holding their primary operation records, was a spray. It's like how much the doctors at the tea plant hospital have committed.

The leader of tea vegetable turned white. Although he is a director, he is an authority, and the superior leaders are also there. The authority in the field of burns, ah, is over now. Just after blowing the cow, now let it all be denied. The leaders of tea vegetable couldn't sit still and kept glancing at the leaders from the bird market.

The leaders of the tea vegetable hospital, except Ouyang's Old God, couldn't sit still, because in each other's mouth, it was like what Zhang hospital had worked out with so much energy, which was not worth mentioning.

"Dean, say a word. If we go on like this, our efforts will be in vain." Lao Chen was anxious, regardless of whether he had a meeting or not, and directly spoke in Ouyang's ear.

"What's the hurry? I'm not calm at all. I usually say your old city. I don't think you're old city at all." Ouyang's triangular eyes whitened old Chen.

Then the corners of his mouth turned up and whispered with a smile: "what level do people really don't like? Will they still point to three or four in this guide? How boring he is. This thing is just like buying and selling. The real buyer is the one who thinks it's expensive and looks for problems. But I don't think these people have a good mind. "

Although Ouyang still doesn't know who the other party wants to dig, she is still a pen. She has been on the battlefield, made a small soldier and worked as a leader. She hasn't seen anyone in this circle, so now she's determined to hold your three inches and see what flowers you can say.

Although Ouyang is not good at raising flowers, he quarrels and ponders people's hearts. That's a master. Who is the master? If you don't move, once you move, you will see blood causing death. No matter how arrogant you are, you still have to beg me.

Chapter 1126

In fact, the director of digital hospital is wrong. He thought that the experimental fund of tea vegetable was endorsed by the government, and the slightly exaggerated words of tea vegetable leaders also misled him during the reception.

Experts fool laymen, just like geniuses fool, the difference is really not big.

You said the operation was successful, he told you, this is an example, it doesn't make any sense.

You say our materials are new, and he tells you that there are many unpredictable risks.

Even the operation signature of appendicitis can make the family members afraid to sign. They are

deeply afraid that if the word has been signed, they will send their relatives to the slaughterhouse. What unpredictable death and what accidental asphyxia caused by anesthesia. Anyway, it looks like a word, death!

Therefore, this level of surgery and research is not recognized by the tea vegetable leaders. Moreover, because this research is the small treasury of others' tea vegetable hospital, Ouyang does not report, and the leaders actually don't care much.

Because of the money, Ouyang and Zhang fan are as close as the local rich, and they are not in the mood to talk to each other.

When the superior leaders called, they did a surprise job, but this thing can be understood by surprise? No, so the director of the burn department made up his mind to scare the tea vegetable government out of the capital.

He knows that tea is not rich. Once the funds at this level are splashed, there will be no problem for another boss. Therefore, as soon as they discussed with the leaders of the digital hospital, they came up with a bang. The laymen present began to be frightened.

He had seen that the leaders couldn't sit still. It is estimated that the tea vegetable hospital will be waxed. It is absolutely impossible for this level of experiment to be wholly foreign-owned. Therefore, his calculation is also very subtle. When the tea vegetable hospital was out of order, they made a reluctant expression, and then even people took a pot of experiments. Think more seconds! Unfortunately, I met Ouyang and Zhang Fan.

The leader of the burn department talked about the hype as if the experiment was about to fail. Even if it did not fail, the things produced would have no future in the future.

After his publication, it was cold. The originally noisy tea vegetable leaders had no desire to speak. On the side of the municipal hospital, Ouyang had a diplomatic smile on his face. He didn't know whether he was angry and smiled or had nothing to refute.

The cold scene lasted about ten seconds, and the tea vegetable leader felt extremely embarrassed. At

this time, the intestines and stomach of the bird market said, "let's adjourn the meeting first." Although he wore a military uniform and didn't talk much in the bird market, he was still a leader in the region.

At the break of the meeting, the tea vegetable leader wanted to explain one by two. The leader in military uniform also smiled and said, "it's okay, it's okay. Let the scientists do the things. We can't help here. Here we are. Take me to see the placement of veterans.

At the end of the year, we can't chill the hearts of the soldiers. Let's go! "

As soon as he said this, the tea vegetable boss returned to taste, but it was too late. We can only go to the inspection with a smile and leadership.

A group of Hula people left, leaving only experts.

At this time, the director of the digital hospital changed his face and was much more polite than just now " I know it's difficult for regional hospitals to do some scientific research. I also worked from the grass-roots level. I know your difficulties.

You are still very good, better than most grass-roots hospitals in China. But now what do you say about this operation and experiment. I'm sorry to say that it has no research value. It can be said that it is of high value and a little inaccurate.

Just a little chicken ribs. Give up. It's a little pity. Don't give up. It's estimated that you're stretched out now. However, as a superior hospital, I think we have the obligation and responsibility to help lower level hospitals develop and implement scientific research. Especially in terms of funds and talents. "

Then he looked at Ouyang, and he saw that the old lady was in charge.

"Indeed, we have a big gap in capital and talents. The superior hospital is the superior hospital. Standing high and looking far, our small hospital can understand our difficulties at a glance. I don't know what kind of help our superiors give us. " Ouyang coughed slightly and cleared his throat. He was very kind and followed each other's words.

If the tea vegetable boss didn't leave, he would definitely say that the old lady began to pretend to be a pig and eat a tiger again. But Lao Chen and his colleagues still don't understand, "we don't lack money now, and we don't seem to lack talents. Zhang Yuan shook so many people, how can we lack them? The president is the president. He is so brave that even the military hospital dares to pit him. "

They also thought that Ouyang was pretending to be poor. In fact, Ouyang wants to find out. As an old doctor, how can she not understand and apply the right medicine to the case. Now it is tantamount to interrogation. In fact, let's look again now. Whose interrogation technology is higher.

"Of course, we will provide abundant funds. As for talents, I don't talk big. As for the burn department, there is no hospital in China that has more confidence than us. We can carry out experiments and

operations jointly with catechin, but we must take us as the main body. Catechin hospital can take turns to arrange doctors to go to our hospital for further study. We will give as many places as there are people. I can decide now. "

When the director of the burn department looked at it, he felt that there was a door. The gold owners of the tea vegetable city hospital had left. Now he is estimated to have lost his temper.

"Really? This condition is really good, but we have set up a laboratory here, and the equipment and personnel have... "

"This is not a problem. The laboratory here can act as a second-line laboratory, and the personnel had better go to our hospital. After all, they can learn more and improve their level as soon as possible. As for your burn department, I promise that our hospital will send you experts for a long time in the future. "

"Oh. Is it true that our staff will not come back after they go to your side? " Ouyang seems a little pity to pretend, but he can also let go.

The old lady's Bonzi series is not in vain. She can act.

"After all, our laboratory has a high level of confidentiality. For the sake of security, my suggestion is to join the army. Of course, this matter is not sure, because the conditions for joining the army are too high. It is a special recruit and may not pass. So we'll talk about it later. I will try my best. "

As soon as you say that.

Ouyang changed his face. Trying to fool me, there's no door.

"In fact, it doesn't matter whether money is needed or not. Who would dislike less money now. Talents are the same, but we have reached a preliminary intention of cooperation with golden mean University and golden silk.

Originally, I thought that such a good technology has involved Jinmao. How can we not let the digital hospitals in our own country participate. I didn't expect that the superior hospital couldn't see it. Ah, that's right. We're a small hospital, a subordinate hospital, and our level is not enough.

We won't waste the time of comrades in higher hospitals. I think the meeting will be over! "

At the beginning, Ouyang had a superior leader on the left and a superior leader on the right, which was called cordial, but now he has become a comrade.

"Dig people, there is no door!" Ouyang raised his triangular eyes. He couldn't get up and left.

Lao Chen, they finally understand. These people are here to dig people.

"Hey, hey, hey, comrade, Dean Ouyang, don't go. We can talk about it. We actually... "

Ouyang left without looking back!

be gone!

"Well!" The director of the burn department looked at the president of the digital hospital.

"Talk broke down!" The other party smiled.

"Hey, this move has never failed before. What's the matter today?"

"My comrade, you didn't do your homework at home! Failure is not terrible. Since we have come, we can't go back empty handed. Our soldiers are divided into two ways. You go to the local military hospital to understand the situation, and I go to the border police to understand the situation. Then sum it up and apply the right medicine to the case. President Ouyang of the other party is not a good person to deal with. We have to be prepared for massive bleeding.

Hospitals at this level are waiting for our superior hospitals to beg her. She will never let go if she doesn't bite you a piece of fat. "

"OK. I'll go now. "

Like fighting, they lurked to the tea place.

.....

"So powerful?"

"Yes, at that time, Stan sent a plane. It is estimated that it is the most advanced rescue plane in the Chinese medical system. We not only go out, but also listen to other people's orders. President Ouyang was too overbearing to eat more and occupy more. Even our living space is squeezed to the limit.

We used to be a secondary hospital, but you see, now the hospital is defeated like a temple. Zhang Fan of their hospital, the executive president who led the experiment, has a very good relationship with the border defense.

They took away the source of our disease. I refused to accept it and reported it to my superiors. The superiors said that our level was not good and the instruments were backward, so we should give it to tea vegetable. I was about to cry. Can the scale of tea vegetable hospital be compared with our small digital hospital in the frontier. Even the border general digital hospital in bird city is not someone else's opponent.

You see, Siemens' experimental nuclear magnetic resonance and CT, Olympus's non export endoscope, Johnson & Johnson's top color Doppler ultrasound, Stryker's biochemical instrument, and even Jinmao's special orthopedics have come to cooperate with them. How can you compare me? My superiors allocate so much money a year, let alone can't buy it. Even if I can buy it, I can't afford any of their equipment. "

The president of the tea element small digital hospital cried to the director of the army general digital hospital. He has heard that because of the strength of the people's Hospital of chasu City, his digital hospital will be abolished. He can't be a good president. It's really people sitting at home. Disaster comes from heaven.

"So it is!" The director of burn department has cold sweat on his feet!

Chapter 1127

"Careless!"

"Yes, hasty!"

The director and vice president of the burn department of the digital hospital sat together and saw the incredible in each other's eyes.

After inquiring about the first-hand news, the outline of tea vegetable is much clearer than that in the document. After all, the document is still a lot one-sided. After all, the tea vegetable hospital is not a key large hospital, which also makes the people of the digital general hospital form an illusion. I think it's the tea vegetable hospital. I don't know who knocked the wooden clock and went through whose back door to deal with Li Cunhou.

But when it comes to tea vegetable, such an inquiry. Of course, in the mouth of peers, the tea vegetable hospital is like Huang batian. It doesn't pay attention to morality and morality to eat more and occupy more. All peers running on the bank will be abolished. Of course, there is nothing good to say. But on the side of the local border garrison, the tea vegetable hospital has become a good hospital with strong business and urgent troops, and even a good hospital going abroad.

"It's all my fault. Let's lead you to criticize me. I belittled the other party and hastily formulated the negotiation strategy. It is estimated that the leaders of the other party have had some bad views on us, which has discredited the unit. "

In any case, the director of the burn department began to take responsibility first.

The vice president of the digital hospital took a deep look at each other. He kept sighing in his heart, "he is young, has high professional skills and can be a man. Today, he can still be an official. Hey! No wonder he can control the most powerful Department of the hospital at a young age. "

Although they are all in the same hospital, they don't deal with each other much. Hospitals are like the rich list in China. Everyone is responsible for the boss. In the Department, the doctor is responsible to the director. In the hospital, the director is responsible to the president.

As for the of the deputy director and vice president, it's really like a little transparent. In particular, senior directors of some departments sometimes deliberately avoid dealing with leaders such as vice presidents, and they don't know why.

"It's all right. We're not engaged in information. It's nothing. Greatness is about money. Will there be fewer such things? One or two think that our digital hospitals are local tyrants. Everyone wants to bite. Who can let the other have the ability? Bite and bite, which can be regarded as our contribution to the frontier.

Tomorrow, we'll go to the hospital in person, and don't look for leaders. I can see that the government's control over the hospital in chasu city is not high. "

"OK, I'm ready. Leaders, enlistment... "

"It's hard to estimate. At least he has become the executive president of the third class hospital. The next step is to think about the president. He is so young and has such a good future. Our conditions may not be exciting. The leader can't pull, and others don't mean much. How many doctors do we lack in our hospital?

And we don't have to go through the superior channel. I don't believe it. Our huge digital hospital doesn't have the advantage they can see? Moreover, we have taken the superior way, which is a blow to the research confidence of grass-roots hospitals. It is not necessary. "

The leader smiled and shook his head. He thought it was impossible.

"Good!"

.....

Tea plant hospital office.

"Dean, we need too much money from the digital hospital. It's not very good. We all let Jinmao's equipment manufacturers participate, and then let the digital hospital pay. It's a little..."

Zhang Fan was pulled out of the operating room by Ouyang.

A group of tea vegetable hospital leaders sat in Zhang Fan's office for a meeting. Ouyang now pays great attention to important or important meetings. Generally, he will not hold meetings in his own conference room and will go to Zhang Fan's office.

Although it is a small move, it also represents recognition. In Ouyang's words, it is the nature of the organization taking the lead and can't be careless.

Zhang Fan sat in his boss's chair, smiled bitterly and said to Ouyang, "Ouyuan, you and everyone have decided. Why do you have to pull me out? Today's operation has not been completed. If you don't hurry up, it will take too long. My elder martial brother and other experts have been here for nearly half a month. "

"You take the dean's salary and don't do the dean's work. You're okay." Ouyang smiled and said to Zhang Fan. The old lady is in a good mood today. To tell the truth, Ouyang always says that the digital hospital is powerful when the Affiliated Hospital and digital general hospital of the golden mean university are put in front of him.

Even for various institutions and rankings, the old lady will say that digital hospitals are powerful. Today, she came to the best hospital in China. Ouyang is really happy.

Old Chen said, "Zhang Yuan, the European hospital has a special spirit today. You didn't attend the meeting. The leaders of the digital hospital don't know what to say."

"Hehe, what's the matter?" Zhang Fan asked.

In addition to Lao Gao, several other people chirped the whole story. Zhang Fan thought for a while and said in a deliberative tone: "Dean, we all play with golden hair. Don't be difficult for the digital hospital. They are not rich either."

Zhang Fan is afraid that the old lady will slash the digital hospital. To tell the truth, sometimes the Chinese troops are too close to ordinary people. Zhang Fan was embarrassed to be cruel.

"Well, you are the leader, you has the final say!" In fact, the old lady doesn't want to cut down the digital hospital. She made a gesture at the meeting. Although she wasn't going to ask for money, she

couldn't do anything else.

As soon as Zhang Fan heard this, he shook his head with a bitter smile and said in his heart, "this old lady is becoming more and more like a child." Of course, I can only say it in my heart. Don't say it. I can't bring out a little expression.

Then, Zhang Fan hurriedly said, "of course, money and equipment are OK, but we can't let go of the condition of joint cooperation. They don't have much money, but more than 100000 young people serve the country every year, and they are still rich in talent."

As soon as he said this, Ouyang glanced at Zhang Fan from the corner of his eye, as if to say again: "still sensible!"

The army's personnel are so tough that Ouyang doesn't want to cut. They are thinking about digging their own corner. To tell the truth, Ouyang's failure to give a good face is necessary, but cooperation is still necessary.

Several people carefully set up the cooperation policy.

Finally, when everyone had to be busy, Ouyang said, "if you can, it's best to let the digital general hospital suggest to merge the digital hospital of catechin into our hospital. I'm looking at them. They're very jealous. We're in the hospital. "

Zhang Fan smiled and said nothing. In fact, it's your old man's building.

The next day, Zhang Fan still didn't attend the negotiation meeting. He really didn't care. With the improvement of patient number and operation volume, he now feels that even if the burn in the system is not opened, it is estimated that he will not be much worse.

Ouyang led the team. His face is still not good-looking. The other party is also ready to let Ouyang cut.

Unexpectedly, Ouyang didn't care about their money“ Cooperation is OK. Although our hospital spent a lot of manpower and material resources in the early stage of the research, we will never make any requirements as long as you are willing. "

grand and magnificent! Ouyang looked majestic. The tea vegetable leaders couldn't come. They were pulled away by the intestines and stomach of the bird. You say this stomach, he is the stomach of the frontier, but people still prefer digital hospitals. Only the leaders in charge of health attended the meeting.

His eyes stared at Ouyang, and his mouth couldn't close. "This woman doesn't seem to be a good man! Why are you so generous today. "

This is the difference between people. Ouyang became a technical cadre in his early years. If he took a

retreat cadre, he would be better than him. When to turn over, when to be naughty, when to be bold and unrestrained, it's not astringent at all.

In a few words, the director and vice president of the digital hospital are a little ashamed. Both of them were embarrassed to say that they had moved the laboratory to their hospital, let alone enlist each other's people. Man eating mouth is short!

"On behalf of China Digital general hospital, I would like to thank President Ouyang and colleagues in the frontier." Ouyang, the vice president of the other party, had to stand up and thank him for bowing.

This is Haohao yangmou. He knows that the other party has something to ask, but he not only has to pay in advance, but also has to accept the other party's love.

"This is a master." The vice president of the digital hospital sat down and looked at the director of the burn department.

The meeting was good for you and me. Ouyang said no, no, the other party said yes. Hypocrisy is like giving lucky money to children between relatives during the new year. If you say no, you can't give less. If you say yes, you give a face of flesh pain.

"In the next five years, the digital general hospital must, like its own affiliated hospital, provide expert support to all departments of the tea element hospital, and each expert shall come to the tea element hospital for no less than half a year. In case of special circumstances, it can be extended, and the doctors of the digital hospital shall be under the leadership of the tea element hospital within the support time.

Tea vegetable hospital has become the first teaching hospital of digital hospital in the frontier, with no less than 100 interns every year. In addition, the two hospitals have opened in-depth cooperation, and the tea vegetable hospital and the digital general hospital jointly teach each other... "

Ouyang looked at the contract signed by the double counter and couldn't take the happy reading glasses on his face. This time, it really takes up the stool. The joint teaching of digital hospitals is much more bullish. There is one in Shaanxi in the northwest, and there are no more in other northwest regions.

In the future, I will never worry about the number of places for further study, and I will never worry about finding good graduates" I'll never go to the south again! "

Ouyang, humming a tune, knocked on the signed agreement several times and began to call, "what's President Chen busy about? Hurry up and make a plaque. Yes, it's the plaque of the joint teaching hospital of the general hospital.

It must be bigger and copper. I'll hang up early! "

At this time, the vice president who left alone was very strange. He came to dig the foot of the wall. As a result, the corner of the wall was not dug. The director of his burn department also stayed in tea and

participated in the formulation of recent guidelines.

I really feel like I lost my wife and lost my soldiers. But I have to be grateful. This business is too oppressive.

Chapter 1128

More and more people participated in the guide. Not only the digital general hospital sent people, but also the golden mean. The golden mean hospital was very dissatisfied with Professor Li Cunhou's formulation of the tea vegetable development guide, but when they saw that the digital general hospital sent people, they couldn't sit still, and a group of burn experts from Hula also came to tea vegetable.

It was originally worse than digital hospitals in this regard. It would be even worse if they did not participate. When the golden mean also sent a large number of experts, some famous hospitals in China couldn't sit still.

Like a snowball, the combination of tea vegetable hospital, golden wool Stryker and the famous name of the golden mean has become the joint action of China burn.

With advanced technology and strong scientific and technological force, the first associate professors from Xihua and Yaxiang are now directly sent by the senior director in person.

People who are rich but not so powerful in technology and technology are not bad. No one has no technology. We are rich. The foreign affairs of mordu, Jinhe, the capital and the largest village in China. The hula doctor came with money.

Ouyang is so happy that he can't sleep these days. Every morning, the old lady comes before work time“ It's too small! Why don't you make it bigger. ”

Ouyang looked at the plaque of the United teaching hospital hanging at the gate and was slightly dissatisfied. Old Chen accompanied with a smiling face: "European Academy, it's big enough. No matter how big, it can only be hung in the middle of the door!"

"Yes!"

.....

"Ah! Younger martial brother is getting more and more arrogant. The joint teaching hospital of the digital general hospital is not small. " Zhou Hongyi, Lu's eldest disciple and Zhang Fan's eldest martial brother, personally brought tea vegetable this time.

Their hospital is too transparent in the burn department. The director has no card, so he can only lead the team himself.

Standing at the gate of the hospital, looking at the plaque almost one wall away, Zhou Hongyi grinned, "our junior brother is also a good face person. You see, the doctrine of the mean, the meatball country, the golden hair, darling, those who don't know think this is a place to sell brands. "

"Ha ha." Several brothers who were the Dean gathered together and came to tea vegetable.

"Where's Zhang Fan?"

"Where's the younger martial brother?"

When seeing Lu Ning coming to meet someone in a white coat, several elder martial brothers asked discontentedly " Hehe, I'm also a junior brother. "

"You don't count. You're no longer spoiled."

"Ha ha." The martial Brothers shook hands happily again.

"Hurry and go first. People are frozen to death in the winter in the frontier." Lu Ning welcomed several Division brothers into the hospital. There have been so many people these days that several leaders of tea vegetable hospital have become receptionists. So when elder martial brothers Zhang Fan came, they had to go to meet Lu Ning.

"I'm so busy these days that I can't even get out of the operating room." Lu Ning said with emotion.

"What? Is it controversial? "

"No, it's not small. We'll discuss one by one. We won't let anyone until we get the results. Because it is a guide after all, everyone is very cautious. "

"Hey, we can't help with burns. I can only hope that younger martial brother can make achievements as soon as possible. The director of the burn department of our hospital has also come. He will be asked to have an operation later. Although he can't help a lot, he can also make a strong reputation. "

Several senior brothers who were the Dean spoke.

In the lounge of the tea vegetable operating room, just like a debate, a group will pick one by one, and a group of three or five will challenge each other.

You said the incision must be within three centimeters. He said it can't exceed three centimeters. If it exceeds three centimeters, the damage will increase. Anyway, no one really disagrees with anyone.

But this also has the advantage that Zhang Fan's guide is more and more authoritative and comprehensive.

Under normal circumstances, Zhang Fan is a pick. He starts, and then allows everyone to start discussion. When the opinions are unified, he will go to the guide, and when the opinions are not unified, he will go to the operating table and the laboratory. The mineral water in the hospital lounge costs a little more than usual these days.

Zhang Fan picks things in the operating room, and Ouyang is the logistics director outside the operating room. She has almost contacted all the famous restaurants of tea. Today we eat mutton, tomorrow we eat horse meat, and the day after tomorrow we eat steamed stuffed buns. Anyway, we change the flowers to make the experts eat and drink well.

"Is it still noisy inside?"

"Great, several experts have come recently. But you can rest assured that the meeting minutes are all our own people, and I didn't let the students of experts participate. Their own records are absolutely incomplete. "

"Yes, it will be bait in the future. We must not be careless."

Standing at the door of the operating room happily, listening to the voice of the debate inside, the old lady left with satisfaction.

Although this guide is a small guide for the burn department, it almost covers the top hospitals in China, and the third-class hospitals of senior officials in niaoshi can't be ranked here.

It can be said that this is a grand event of burn department in China.

Day after day, the foaming experts finally began to unify their opinions. The guide is getting faster and faster.

Just like Yin and Yang attract each other, tea and vegetarians gather here, like a big magnet, and patients from all over the world slowly embrace them. The hotels in the urban area of tea vegetable are full.

In tea vegetable City, hotel business is good in summer, but in winter, there are few people here. Except for special days, such as Valentine's day and Christmas, young people seize the opportunity to open a room, there are more waiters than clerks on weekdays.

There are talents and economy. The leaders of tea vegetable city are not idle these days. Everyone is discussing. If only tea vegetable city hospital had such a big party every month. We don't have to go to the bank to borrow money and pay wages.

Of course, some people are happy and others are unhappy, such as young people, because a large number of patients from other places have poured in these days, so that many young people can't find a house for the festival. It's not practical to go to the wild in winter. Tea vegetarian winter says frozen chicken. It's really frozen chicken.

In addition, the leaders of the tea element digital hospital also frowned. They didn't know where the news came from that they were going to be abolished.

.....

"Where are you?" Old Lu called his eldest disciple Zhou Yihong.

"Master, I'm here. I came here yesterday." Lao Zhou finished in the microphone and whispered to several other martial brothers, "master's phone."

"You've gone to tea vegetable, too. What are you doing? Are you starting to burn, too?" The old man was surprised.

"No, no, I can't do that. The guide here is stable, younger martial brother. Our hospital burns a little, so I have the cheek to participate."

"If you don't work hard, you just want to improve your reputation. Is it useful?" The old man said casually that the disciples are either the dean or the director now, and he won't say anything more " I thought you were in the magic capital. Did Geng Zhong also go to tea? "

Geng Zhong is Zhang Fan's fourth elder martial brother and the shoulder of Shanhua hospital.

"Hehe, Shifu, you're so predictable. He's here too. He's now the vice president. Their hospital is similar to ours in terms of burns."

Old Zhou smiled and replied to his master.

"Hey, it's okay. You're free one by one. You're busy one by one." The old man was unhappy and had a taste in his heart. Because this guide, if only it were a general foreigner.

"What's the matter?" Lao Zhou stopped laughing.

"Well, there's a special patient. I'm not sure. Martial uncle recently went to the capital. I thought about looking for you. As a result, all of you went to tea. "

"It's all right, master. We'll fly green birds in the afternoon. We can't help here anyway. "

"All right. What is the situation with Zhang Fan's guide now? " Although the old man is a little delicious, he still cares.

"It's almost finished. Now it's ending. It's estimated that it can be released this year through the Ministry of health."

"So fast!" The old man said in surprise.

Can you be unhappy? The burn department and University of Manchuria have all come.

"Oh, that's good, that's good. Let him not be proud and listen to the advice of other experts. "

.....

In the lounge of the operating room, Zhang Fan's forehead was cut with meat marks, just like wearing a meat hat.

"You eat slowly."

"It's cold. Slow down. It's estimated that the mutton is stained together." Zhang Fan is eating and chatting with several elder martial brothers.

"We have to go to bluebird in a few afternoons."

"What's the matter, master?" Zhang Fan stopped eating and looked up and asked.

"Shifu is fine. There seems to be a patient who can't hold it steadily over there. Let's go and have a look."

"Oh." Zhang Fan didn't ask much. After a few bites of rice, he drank a mouthful of hot tea. He couldn't do without it. The rice was a little cold. After eating cold mutton, he was a little sick.

"Dr. Zhao, what is the difficulty now?"

Zhao Yanfang in the laboratory has just finished his meal. These days, he knows how many mice have been killed by them" Now there are no difficulties, but we have to go through it again three times. After all, it's a guide. It doesn't matter if we make a mistake or lose our lives, but if we lose our lives, we're

committing a crime! "

"Oh, it's ok if I don't have surgery."

"Theoretically!" Zhao Yanfang was concise and comprehensive. She hasn't been out of her busy Laboratory for half a month. She is not only responsible for the experiment, but also responsible for the coordination with the operating room. She also has to control the experiment here. She is physically and mentally tired.

"All right. I see. Don't be too tired. Take a rest if you can! " Zhang Fan's words are so empty that he doesn't even believe them.

The other party didn't even have the mood to reply to him, so he hung up directly. Zhang Fan didn't care, just when the other party accepted his kindness, but when he wanted the experimental data, he still urged him.

"OK, I can go out of the operating room now. Have you bought the ticket, elder martial brother? I'll go to Qingniao too."

"What are you doing? Just let's go. Now we're going to get results. You're gone... "Old Zhou whispered to the little younger martial brother.

"It's all right, master. I'll go and have a look. I'll feel better. Maybe the old man will assign less homework in the future."

Zhang Fan refused the kindness of elder martial brother like joking.

Lao Zhou did not tangle, but also smiled and said, "why, the foreign language has not passed?"? Ah, I'm in balance now! "

"Ha ha!"

Chapter 1129

There are many consultations in the hospital, but most of them are doctors to avoid risks. For example, a patient in the anorectal Department has urinary retention, and then catheterization fails because of prostate swelling. He will never give the patient a cystostomy in person unless there is no urology department in the hospital.

Also, for example, when the patient was in the respiratory department, there was a small heart problem. Doctors will not easily use heart drugs. They will definitely invite cardiologists for consultation. You said they would make a fistula and treat the heart.

Absolutely. Heart and lung are not separated. Anorectal fistula is much more difficult than cystostomy. But if it is not necessary, they will not do it by themselves. This is to avoid risks and abide by the practice law. It's illegal for a neurologist to treat patients with mental illness.

Therefore, in general, those who are not interested in consultation, and those who invite consultation will go through the motions. Of course, the price is not expensive. In the early years, there was a consultation for one yuan. Later, the price increased by three yuan, and now it is ten yuan. In fact, everyone is unwilling to earn this money, because the consultation fee goes into the Department rather than personal pockets.

The real consultation of difficult and miscellaneous diseases is the serious consultation. Especially when some special people encounter special diseases, the consultation at this time is quite wonderful.

Where is the difficulty of medical treatment? In fact, in most cases, it is not treatment, but diagnosis. Many times, it seems that some diseases are difficult to treat. In fact, as long as we study it, doctors can treat 7788.

For example, AIDS, this thing is now listening to terror, treatment is difficult, in fact, this thing early in the year, scared the Europeans and Americans all began to ban love. Because it can't be diagnosed, what kind of disease is this, and the death rate is extremely high. Later, it was confirmed that AIDS, once confirmed, although it is very difficult to cure, but always have a goal to fight.

.....

Brothers, let's start with tea preparation. You don't have to buy your own tickets. It is said that the family members of Bluebird patients have covered all the tickets of all experts.

"This place is too cold. In winter, the wind in this place is like being slapped in the face. Younger martial brother, come back to the South with me. I'll give you the dean. My martial brother will practice to build a medical fortress in Nanhua. "

Fourth elder martial brother Geng Zhong rubbed his hair wooden face on the way to the airport of tea vegetable and said to Zhang Fan seductively.

These elder martial brothers, except Lu Ning in his early 30s, are all around 40, so Zhang Fan is a child in their eyes.

Everyone didn't take it seriously. If Zhang Fan wanted to go, he would have gone to the green bird or the devil. On the plane, the master brother whispered to a group of senior brothers, "it's a medical disease, and the old man has no rules."

It was not only their division brothers on the plane, so everyone spoke very little "Internal diseases!" Not only Zhang Fan was scared, but also several other senior brothers began to feel uncomfortable.

"I didn't say it must be a medical disease. Anyway, it hasn't been diagnosed yet!" Master brother added another sentence. The old man estimates that this is to engage in personal Naval Warfare! In fact, this is also an advantage, just as there is a large population in the family. If there is something wrong, don't say it first. If there is an accident, Hula calls a group to come. It's very reassuring to stand there and look at it!

Zhang Fan finally came out of the operating room, but the side of the laboratory is still busy. Lu Ning was caught by Zhang Fan. With the younger martial brother and Zhao Yanfang, Zhang Fan has nothing to worry about, and even if Zhang Fan is there, he can't help at this time.

Sitting on a large plane, Zhang Fan looked at the clouds outside the window and felt a little emotion. He remembered the super slow green car when he went to Qingniao for study for the first time the year before last. When he came back, the small plane bumped and almost scared Zhang Fan to death.

At present, the airports here are more and more direct flights to other cities, and small planes have become large planes. Although it is not only because of the tea vegetable hospital, the airport has opened up routes and changed big planes. But the great development of tea vegetable hospital still accounts for the main factor. Otherwise, the passengers of tea vegetable in a year will be three or two birds. People can't lose their lives when they open routes.

Now, the urban area of tea vegetable is particularly affected by tea vegetable hospital. For example, the real estate prices near tea vegetable hospital have soared. Not only the real estate prices have soared, but also there are many more hotels. The father of sister Mao in France and the boss of Sandao have made hotels here, which are still high-grade hotels.

Moreover, the street outside the tea vegetable hospital is no less prosperous than the bird market. All kinds of restaurants, shops and stores opened by the tea vegetable hospital are becoming pedestrian streets. There is also a medical device manufacturing enterprise established by Johnson & Johnson here relying on Zhang Fan. Although it is still under construction now, you can see water spray when you throw real gold and silver into the tea element. No, there are more people in the winter of tea element this year than in previous years.

This is also the reason why the tea vegetable government turns a blind eye to the tea vegetable city

hospital. If the tea vegetable hospital only makes money by itself, it will never get so many preferential treatment and indulgence. But now it is different. The tea vegetable hospital can treat diseases and expand GDP. Therefore, even if the leaders in charge of health care are oppressed, they can only watch helplessly.

Thinking that he could have an impact on a city, Zhang Fan slept in a little pride. The main reason is that although the plane is large, Zhang Fan is too exclusive of the feeling that he can't control his life. In order to survive, he can only sleep with his head down.

For Zhang Fan's habit of getting on the bus to sleep and getting off the bus to pee, several elder martial brothers couldn't help but curl their lips, "how can young people be so mature!" Master brother Zhou Hongyi looked at Zhang Fan, smiled and said to the others, "no wonder master is so eccentric, young and not frivolous, and can be so focused."

Lao Zhou just finished saying that, the fourth senior brother Geng Zhong took over, "like is like, but this boy is not shallow about the old man's anger. Last time the capital was bullied, the old man and his martial uncle went to support him. After supporting him, he turned around and went to study gastrointestinal tract with MARUKI country. The old man was angry and didn't know what to say. Ha ha!"

Several people talked and laughed and saw the green bird. Of course, they are not qualified to let master pick them up, but doctors at their level don't say that they have friends all over the world. At least drug dealers and equipment manufacturers pay attention to them at any time.

After getting off the plane, Zhou Hongyi said to several Division brothers, "don't be busy taking a taxi first. The manager of Olympus sent a car to pick us up. "

How to say about this kind of thing? Let it be. It's wishful thinking to change the current climate by relying on one or two doctors. Some people say that you should resolutely resist. In fact, most doctors are ordinary people. They want to make achievements in medical treatment and improve the business climate. It's too difficult.

I don't know when to start. Anyway, the group reception with a little higher grade will never get a Mercedes Benz bus or a row. Don't touch me. Beige cowhead Custer is standard. Zhang Fan and his martial brothers get on the bus.

Without much greeting, I went to the Qingniao affiliated hospital.

The old man was waiting for them in the office, and the administrative secretary warmly welcomed a group of the boss's disciples.

"Hehe, here we are." The old man looked at the disciples in front of him with relief. When he saw Zhang Fan, the old man raised his mouth and said, "the guide is at a critical moment. You won't delay anything when you come."

"No!" Zhang Fan smiled. The old man has a good spirit.

"You can't be so capricious in the future. Now you are not a simple doctor. There are many people who cooperate with you. You can be said to be a team." Although the old man said so, he was still happy in his heart.

Things are actually simple. The green bird is the meatball country across the sea. Although the meatball country seems to be less bullish in recent years, it is a developed country. Moreover, there are a lot of people in the meatball country.

No matter how noisy it is, the trade between China and the pill country has been intertwined. This time, a young man of Itochu Zhushi chamber of Commerce got sick. The name of this enterprise is also very strange, and there is no famous Mitsui, Panasonic and Konjng.

This enterprise is not well-known and may be large in quantity. Not to mention others, this enterprise is the first enterprise in China to be officially rated as a friendly business agency. It can be imagined how big this name must be. The young man who fell ill this time was the grandson of a big man in the business.

Everyone says that Chinese people value men over women. In fact, Marubeni is more serious. There can be a queen on all three islands, but Marubeni would rather change the Emperor than the queen. It's very feudal!

After the boy came to China, I don't know what happened. He suddenly had high fever, nausea and vomiting. He stayed in Qingniao hospital for a few days, but the hospital didn't feel good. Then they wanted to get the boy to go to meatball country at the first time. As a result, the special plane hasn't been on yet. The boy is in a coma!

This makes a big deal. While sending experts from Marubeni, their big boss personally sent a request to the Chinese government. It means saving the child! The child is innocent.

The Chinese government loves face, and then let the bluebird start treatment. The treatment can rise and fall, and the effect is not obvious. When the experts from Marubeni come, they are also skilled bala. There is no way!

But these guys are good at throwing the pot. They mean they delayed treatment. This said that Bluebird's Hospital quit and reported directly to the government. Said the small balls were going to throw the pot.

The government is more generous than the hospital, so it directly wants to issue a Jianghu call order. But it was stopped by some top doctors of Bluebird. Everyone wants face. Old Lu has retired to the second line and rarely participated in such activities.

But the bluebird expert still has no way. He can't even make a clear diagnosis now. He can't. He can only ask in front of Lu laomen. The old man thought about it. He was very modest. A group of green bird experts couldn't help it. It's estimated that my old man didn't have much to do when he went, so he shook his disciples in advance.

Some old experts are afraid to let others know that their level is not good, but Mr. Lu is different. He is deeply afraid of giving people a wrong look.

Chapter 1130

They didn't greet each other much. They were all surgeons in the same office. They were more and more impatient one by one. After asking the Secretary to contact each other's family members, Mr. Lu set out with a group of students.

Young people in Marubeni live in the special ward of the provincial affiliated hospital. It can be said that it is like a crystal house. The young man is lying in bed, with all kinds of pipes inserted into his body, surrounded by all kinds of instruments flashing signal lights.

When Mr. Lu arrived, the president of the provincial hospital came out to meet him personally " I'm looking forward to you at last. "

The court case at the head of the president has held seminars with experts from Marubeni almost every day these days.

"Well, I brought help here. I'm old. Don't blame me for not coming. You can't see well. It's no use for me to come! "

"You are modest."

Lu Lao didn't say much nonsense. He was wearing protective clothing and preparing to enter the ward. There are also a group of experts in Marubeni.

"Hello, academician Lu. I'm the director of internal medicine of Shuntian." After seeing academician Lu, the little old man who thought he was over 50 came forward to say hello. Marubeni studied China in the early years, then Germanic, and finally Jinmao.

Now, for imitation, they imitate quite well. They not only imitate well, but also refine their own things. This also has to admit the super imitation power of this country. But I'm relieved to think about it. I've imitated it for thousands of years. It doesn't make sense if I don't have some experience.

In recent years, Marubeni has not paid much attention to the medical treatment of China, but it is still recognized by the ancestral disciples.

"Hello! How is the patient? "

"I'm not optimistic. The white blood cells are higher and higher every time. Tylenol has been used as an antibiotic and voriconazole has been used as an antifungal drug. But the blood picture is still not optimistic, and the high fever will not subside. " After saying these words, the old man's face wrinkled like a grayish brown washing cloth.

"What did you check?" Old Lu asked while wearing protective clothing. Zhang Fan and his colleagues also changed their clothes and listened to master's consultation.

"Bone marrow puncture culture, blood culture, whole-body CT, whole-body MRI, almost everything can be done."

"What are the dominant flora?"

"Not sure?"

"Not sure?" Old Lu frowned.

"Yes, I'm not sure!"

To tell the truth, there is no way to call old Lu. Now the patient is obviously a medical disease, and there is no way for the bluebird medical community. The broken child can't get on the plane. Now it's going to be smashed in the bluebird.

Lu frowned and said nothing. After watching the disciples dressed up, he was ready to enter the ward. When entering the ward, a middle-aged doctor in the pill country muttered that Zhang Fan and his martial brother didn't understand.

Zhang Fan's Japanese level, if you don't like it, is the level of Zhang GA, the little soldier watching the film. You know that бага sweeps GA is abusive and yells West is good. Mi Mi seems to mean eating. His level hasn't reached the level of selling land in Asia.

The main reason is that I sold instant noodles when I was in college, delayed learning Japanese, and had a girlfriend after work, so I was not interested in this. So the Japanese level is quite poor. Of course, it can't blame his poor language talent.

The martial brothers let the old man sigh when he spoke German, and they didn't have the energy to learn Japanese, but old man Lu understood.

In fact, what the other party means is that so many people, patients are so fragile, and so young doctors are also involved in what to do, which is irresponsible to patients.

The experts from Marubeni all looked at Zhang Fan.

Zhang Fan thought he didn't wear proper protective clothing " No, I can't pass it wrong with my eyes closed. I wear things more often than I wear pajamas. How could it be wrong. " Although very confident, I still had to look up and down " Yes, these guys are staring at me! "

Zhang Fanting wondered.

When Master Lu thought about it, he bit his teeth and said to his disciples, "there are too many people. Let's go in batches and three first."

At this time, Zhang Fan has no privileges. Just like people with many children, he turns from big to small.

Zhang Fan, young and old, can only wait in line.

There is Mr. Lu here. Whether you are the dean of Mordor's foreign affairs or the first knife of Shanhua puwai, here are Mr. Lu's students. No one specially introduces you. Moreover, these students are very low in front of the teacher. As soon as I speak, I am Lu Lao's student, not the dean.

This is a quality.

In the ward, Mr. Lu also waxed.

To tell you the truth, this is not what the old man is good at. I checked it and found nothing new.

"Let my students have a look." The old man said to the experts of Marubeni in the same way.

Several people from Marubeni country discussed it and agreed to it in the face of Lu Lao.

To tell the truth, such patients with extremely high leukocytes are generally isolated. They are not afraid of his infection, but that he will be killed by the bacteria brought by others.

So sometimes it's hard to be too cautious in medical treatment.

When Zhang Fan wanted to have a physical examination, the middle-aged doctor stopped him directly.

Because several elder martial brothers in front shook their heads after inspection and found no new situation.

When Zhang Fan is about to start, the doctors in Marubeni country are not happy. Zhang Fanna was called a Sao, and his face turned black and red. Seeing a doctor was refused. Zhang Fan hasn't seen this for a long time, and he's still in front of a group of martial brothers.

"Well, if you don't let me see it, I won't let you see it." Old Lu gently pulled Zhang Fan. Zhang Fan bit his teeth and endured it. This thing is forced by the police to catch thieves. No doctor twisted the patient to see the doctor.

"Sorry, I'm not good at what I've learned, and we can't help." Lu Lao's face was a little ugly, but he spoke quite politely.

This is self-restraint.

Old man Lu is leaving!

It doesn't matter to the doctors in Marubeni, because there are too many Chinese experts these days. They are like this. How to come and how to go.

But the president of Qingniao province quit, "Sir, you are my uncle. Just say a word."

"What can I say? I won't even let my disciple do it. What can I say!" The youngest student of the old man is despised, even if he is a cultural man, otherwise he would have left early.

"Hey, when you didn't come these days, some famous people from Dongshan Peninsula came. I can't help being angry."

"Didn't their country send experts?"

"Yes. Neither. "

Although old Lu was angry, after decades of practicing medicine, the old man was not angry with the patient. "It's not a question of treatment." The old man thought about the patient's situation, then meditated and said to the president of Qingniao province.

"You mean..."

"Yes, it's a diagnostic problem."

"All the medical doctors are here!" The dean is almost crying.

"Go and ask director Chen Bin of Xihua's diagnostic pathology room!"

"This... Is this useful?"

The Dean looked at old Lu's face and immediately said, I'll invite him now.

.....

"Don't be angry. At this time, anger is inferior. First, you are too young. Second, who made you think about having an operation all day and don't even have an academic name. If I were a family member, I wouldn't let you start. "

The old man advised Zhang Fan again and again. Zhang Fanna is a grievance. He can't say it yet. Who wants to say that he is his own master.

After talking for a long time, Zhang Fan hurriedly interrupted the old man's words. If he didn't interrupt again, it's estimated that a group of senior brothers can't hold back.

"If you're not angry enough, your hands are itching. What's the situation, master? I think you look embarrassed when you check."

"Yes, that's right. Keep a curiosity about the disease." Old man Lu nodded. Then he said uncertainly, "I checked it again, and the patient gave me the feeling that, how to say, there was no infection, but I couldn't be sure."

"Oh, white blood cells are so high..." Zhang Fan studied the copied case carefully. Lu Lao looked at Zhang Fan and nodded inadvertently, "the little rabbit hasn't changed. It's still the same as before. It's good to like studying!"

When Zhang Fan looked at the medical record, the master brother said to the master, "teacher, you said old man Chen, can they please?"

"Probably!"

People outside the industry generally don't know who old man Chen is. His insiders, especially medical students, want to give him up.

Old man Chen is known as the once-in-a-century genius of Xihua hospital. As long as Chinese doctors went to medical school after the founding of the people's Republic of China, almost all of them entered this industry by looking at the books written by old man Chen. What does the old man do, chief editor of diagnostics.

How to put it, in those days, an ancient Chinese boasted that he was forced to rule the world with half of the Analects. It's hard to boast, but the medical community can say that a diagnosis determines the world.

Medical students are in serious contact at school, and clinical diagnosis begins. All treatments, ever-changing, should follow the diagnosis. It can be said that this thing is the outline of medical treatment.

It is common for academicians to say bad words about such immortal figures. Such gods are really rare. People's expert number is almost invisible. It can be said that an expert number of the old man can definitely make the scalpers merge.

Sure enough, there are few things that can't be done in the world of the rich. The special plane came and went, and invited Xihua's treasure of the town hospital in a few hours.

What does the old man say? He is ten years younger than old Qiu, but ten years older than old Lu and Wu. Although the old man's field is breathing, his position in the medical field is not inferior to that of Qiu.

Therefore, Lu always performed disciple rites in front of old man Chen.

"Who is this?" Zhang Fan asked master brother.

"The diagnosis you learned was written by the old man. Who do you think it is?"

Zhang Fan suddenly realized "I'll go. This is the great God! "

Isn't it a great God who can let Lu Lao hold his disciples' rites!

The old man was trembling, trembling, and it was a little troublesome to walk. But his face was kind, really kind, just like his grandfather. He smiled at everyone. The smile of others is absolutely different from that of Zhang Fan.

People's smile can infect people and reassure people.

Chapter 1131

A doctor, whether a physician, a surgeon, or a gynecologist who specializes in gynecology. The basic skills are diagnostics. There is no doubt that this course is very simple and especially the most difficult.

Simply put, this course is really simple. Junior high school graduates can read through. This book is concise and comprehensive, but it is extremely accurate. It will never make you ambiguous. Moreover, with the application of various advanced instruments over the years, many doctors have become laboratory doctors who look at test sheets and never look at patients.

But if it is difficult, this course is really difficult. After learning NIMA for 30 or 50 years, you may not be

able to master it. Zhang Fan, what's the matter? The operation has almost become the backbone of Frontier surgery. Let him boast. He dares to say that he knows surgery well, but let him say diagnosis. He can only say that he has just entered the door and sat on the threshold.

Just like medical students who have not studied diagnosis for a long time, they can diagnose lung cancer according to the diagnosis book after coughing a few times, and then they are scared to death. But now doctors, to tell the truth, pay less and less attention to such knowledge.

Just like what old Magpie said to CAI henggong in those years, later people actually misunderstood. At the beginning, old Magpie didn't emphasize Wei's disease and avoiding medicine, but old Magpie emphasized the importance of diagnostics. Unfortunately, it was misunderstood later.

Seeing old man Chen, old Lu hurried forward to help him. Old Lu seems to be getting younger in front of old man Chen.

"Hehe, academician Lu is here too. You said you were there. What are you doing bothering me. You can't see it. I may not be able to see it. " The old man said it was calm, just like a modest pupil. Absolutely back to nature.

A trump of trump mixed with Min language is like a low voice, not listening carefully, but still unable to understand. The old man was extremely low-key and dressed in simple clothes, just like the uncle next door who went out for a walk.

The moment the trembling old man put on his protective suit, he seemed to become strong, although he was still so staggering.

A group of Chinese doctors, like white coats hanging on the wall, climbed on the glass wall to carefully observe the process of the old man's treatment. Doctors in Marubeni are the same. In this regard, it has to be said that Mu Qiang said that first, other countries can only compete for the second and third place.

Physical examination is very simple. It seems that physical examination is no different from other doctors. The families of Marubeni did not know when they set up cameras. Bluebird's doctors are not happy, but the old man doesn't care at all.

There is a big one, shoot casually, shoot casually. If I find a problem, I'll lose!

At the end of the examination, the old man slowly walked out of the ward, took off his protective clothing, and then slowly looked at the cases. In front of the old man, time seemed to change slowly, with withered hands, looking at the cases page by page.

When the case was turned over, the old man gently said, "the treatment direction is wrong, this person is not infected!"

Shit, doctor Qingniao, including experts from Marubeni, is down. White blood cells are higher than the sky. People are burning away. You told me you don't have a fever.

At that time, Lu Lao also suspected that the patient was not infected, but there was no evidence, so he told his disciples privately, but not to the public. This thing is more serious than Chen Tang's testimony. There is no evidence to speak here. Coupled with Lu Lao's status, it may really kill people.

"Do you have any basis?" The experts of Marubeni country have a black face, just like the old man turned into Ma Sanli, and tease you!

"Oh, my ears." The old man smiled like an urchin.

"I'll go. Are Chinese legendary doctors so unreliable? One comes to practice with a hairy boy, and the other says he can hear varicose blood vessels!" Together with the experts of meatball country, they looked at the old man in front of them with incredible eyes, just like a liar who did something to sell, and looked at Zhang Fan again with contemptuous eyes.

Although Zhang Fan didn't understand Japanese, he could still feel it without the kind eyes of the other party. He was not a wood. He kept scolding in his stomach: "I can't diagnose. With white eyes, these wretched dwarfs! "

Zhang Fan didn't get started. He was still holding his breath. His realm is not as high as that of old Lu and old Chen.

"Nani?"

The old man smiled with a wrinkled smile. How do you think it is naughty.

"Hey, I still haven't learned the diagnosis well. Go and see the patient's tongue. The blood vessels of his tongue are varicose."

With that, the middle-aged doctor who didn't let Zhang Fan start immediately ran to the ward, broke open the patient's mouth, just like giving medicine to a donkey, broke it hard, and then nodded to the people outside like a fool.

Old man Chen didn't look back, and then began to explain. The old man explained in simple terms, starting from pathology, and then talked all the way down, from pathology to sick students, from solution to physiology. Doctors understand that these knowledge points are experts, and these are Pediatrics for them.

But when the old man connected these knowledge points, it was the conclusion that these experts couldn't think of.

It can be said that everyone was stunned.

"What now?" The dean of Bluebird asked quickly.

He really doesn't want to carry this ball pot.

"Open chest exploration, the problem is in the lymph of the chest. Find an expert with accurate technique to open the chest!" The old man is really not afraid of big things.

The patients are going to hang up. It is also recommended to open the chest. Is this the unhappy death of idle patients?

A group of experts from Marubeni and China gathered together to start discussion. Finally, the family members spoke. Let's be a dead horse doctor!

Because there's no way!

When other doctors came, they either shook their heads or suggested changing antibiotics. After changing antibiotics, people haven't improved yet. Now there is finally a great God of other suggestions.

The director of cardiothoracic surgery came.

"Old Lu, you are there too!"

The director of cardiothoracic surgery was personally brought by old man Lu when he was in general surgery. Although he didn't engage in general surgery later, he still respected old Lu.

He doesn't even know old Chen. No wonder the director of cardiothoracic surgery. First, old man Chen is too low-key. Even Du Niang can't find him without hanging up Xihua. Second, he is not a surgeon after all.

"This chest is hard to open!" It's not that the director of cardiothoracic surgery dislikes the patient's big chest. He's a young man. Besides, how big can the physique of MARUKI country be.

The main reason is that the patient's life state is unstable, and the swelling is like a steamed stuffed bun with noodles, the swelling is like a meat ball, and the one with low hemoglobin is like a dead man. If you

go on like this, you may be killed directly on the operating table.

"Is it difficult?" Asked the dean of Bluebird.

"Gao, our hospital has no such operation precedent. Talk to your family. If you can, I can have a try."

This is really treating the patient as a dead horse doctor!

The family is unwilling this time. Money and willfulness are things about money. You say human life, let's use money.

Then the director of thoracic surgery of Jingdong university took off from marukuni. The director of mediocre thoracic surgery took off on a plane.

The two men almost reached the bluebird with front and rear feet.

.....

Lu Laoji was too old to help here, so he went back. Martial brothers Zhang Fan sent the old man home. Several other martial brothers were busy people. After telling master not to be too tired, he explained to Zhang Fan, "we have to have a place in the hospital."

"Add the burn department of our hospital to the list!"

Not at all.

Zhang fan can't stay with the old man. The main reason is that the old man asks German, English and German. Zhang Fan has three big questions. Thanks to Shiniang's kindness, otherwise Zhang Fan might be crying.

"Go, I know you can't sit still. Go and see and study." Old man Lu left his mouth and asked Zhang Fan to go to the hospital.

"Why are you so strict with him! You read a German book all night last night. It was used here. How old are you! " Shiniang said a few words to the old man angrily.

"Know what. This is called frustration education! " The old man is a little unhappy that Zhang Fan wants to see a patient who is not a general foreigner.

In the hospital, without old man Lu, Zhang fan can only look at the monitor in the observation room from a distance. It is impossible to enter the ICU. The card surface is still not enough.

"It's too difficult. This operation requires too much accuracy."

The professor of moderation and the professor of Marubeni kept shaking their heads.

Speaking, the relationship between the mediocre medical school and Marubeni is quite complex. It's wordy here. If you are interested, you can see the development history of the mediocre medical school.

Both of them are familiar with each other.

"Is there no way?" The patient's family members are very strong. When the money reaches a certain level, it can't be compared with ordinary rich people. Especially the professors of Jingdong University, sweat seeped out of their forehead.

"I do have a recommendation. I don't mean to refuse. The difficulty of this operation is really dangerous. If the accuracy can't be reached, the patient is particularly dangerous. I've seen a doctor whose accuracy is quite high."

"Who is it?"

The dean of Qingniao and the professor of MARUKI asked at the same time.

"It's Zhang Fan, tea vegetable Zhang Fan, the disciple of Lu Lao, the ancestor of the hospital next door! I've seen his surgery. He's a master of Qiu knife technique, and in cardiothoracic surgery, it's hard to say anything else. In terms of accuracy, it's him. "

"Go, please!

"OK, I'll invite old Lu!"

President of Qingniao provincial government, some people have called. To tell the truth, the dean is worried to death. If it weren't for the order of the government, wouldn't he be the dean of a provincial hospital!

Zhang Fan is still seeing a doctor's number in front of the monitor at this time.

"How can he hear it? Where's the old man! If only I could ask myself. " While looking at the case, Zhang Fan looked at the patient's swollen face on the display. He was still tangled in the old man's diagnostic ideas.

Old Lu was invited back again because Zhang Fan couldn't get through.

When Zhang Fan entered the observation room, he muted the phone. He originally thought that he would go out if he came in and had a look. Unexpectedly, old man Chen's diagnosis brought him down.

Chapter 1132

The more the technology industry reaches the top, the more it can't be false. If it's OK, it's OK. If it's not OK, it won't happen. One is one, and it can't be two. The medical industry is even worse.

Moreover, the medical industry has a provision that is not put into words. When a patient has an accident on the operating table, whether it is the main responsibility of the doctor or not, the chief surgeon will not be promoted in the past three years. This is an unspoken rule that cannot be written in law but has the reality of law in order to protect patients.

Whether this thing is good or not, there are good aspects anyway, which makes doctors more alert and cautious. But there are also bad aspects. Doctors are often timid. When they need to take risks, they generally choose conservative treatment.

Because the promotion of the medical industry is different from that of other industries. Other industries can overtake around the corner, but the medical industry is different. Five years is a barrier, and step by step is slow. In this life, it may always lag behind the doctors in the same year.

Therefore, in recent years, there are no Jianghu doctors like those in the previous legend, such as ten minute appendix, appendix under local anesthesia and other operations that make laymen feel super cow.

If you add a special patient under this premise, it will definitely have a miraculous effect. He is not an official fan or a person who is bent on drilling. To tell the truth, once he meets someone who needs to take a risk, the doctor will never take a risk without giving him a 100% guarantee.

Because the cost performance of this thing is too low. If it succeeds, it should be. If it fails, it may have to withstand the anger of family members and it won't pay off. Therefore, privileged people often make friends with a very familiar doctor. I didn't start looking for a doctor when I was sick.

This is the case with the young man in Marubeni. Whether the operation can be done or not, it must be done, but the mediocre extrathoracic director and Jingdong extrathoracic director of Marubeni country can certainly do it, but there is no guarantee that the patient will die on the operating table.

If there is no choice, doing is also dead, and not doing is also dead, the family may choose to live from death and let the two directors go to the stage to pull the knife. But now there are other options. Of

course, I won't agree rashly, and I don't need money. Unlike small fart people, I'm not worried about death, but whether there is enough money.

Lu is old enough to be curious about most things. For this special patient, he is different from Zhang Fan. He will no longer pay attention. At most, if he thinks about it, he will let the Secretary find a case to have a look. If he can't remember, it's OK.

There are so many undiagnosed diseases in the world that his liver and gall have not been understood yet. Therefore, when Zhang Fan went, he didn't stop but didn't support it. This business is too vast.

So when the president of the provincial hospital called, the old man thought the problem was liver and gall. The old man put down his reading glasses and couldn't wait for the other party to send someone to pick him up. He directly asked the driver to drive him there.

The old man is too old to be interested in other systemic diseases, but if he has liver and gall, it will be different. He wants to see it.

As a result, I went to the hospital and said I would open my chest. The old man didn't like it. "Open your chest, what are you calling me for?"

"Zhang Fan? You can't even be the chest director of Marubeni country. My disciple can do it? My disciple didn't even let me do a patient physical examination. You just let him have an operation. Do you think I'm old and easy to bully? "

I didn't get angry at the beginning. I didn't diagnose other people's diseases. The other party heckled me. Who makes us incompetent. But now it's different. The old man still has some restraint. If Ouyang comes, it's estimated that even the golden mean can be scolded together.

I despised it at first, but now I ask for money. Do you think you have as much money as a newspaper?

"Old Lu, my fault, it's all my fault." The dean of the bluebird quickly bowed and laughed.

The doctors in Marubeni country have a black face.

The family understood, "Zhang Sang also went to the ward in the morning?"

"The one who changed his clothes and didn't let him in!"

"Well!" The middle-aged doctor who didn't let Zhang Fan into the ward had sweat on his head, and he had already begun to feel eight quacks in his heart. It's too unlucky to kick on the iron plate. I thought I was a graduate student to practice. I was so young. As a result, it was a wolf hidden in the sheep.

"We were wrong."

When old hair gets angry, it extinguishes its anger. The main reason for his anger is that the patient is not a patient with liver and gall. The old man feels that his closed disciples are working harder and harder in the direction of not doing business, and now they have made some achievements.

This is what makes the old man's teeth ache.

"Probably in the observation room!"

Before long, Zhang Fan was invited.

Always wear that kind of seemingly indistinct smile. In the past, this kind of smile made people feel humble, but now it seems to be ridicule. This wronged Zhang Fan. The smile muscles on his face haven't changed. How can people feel different?

When the provincial president personally appeared in the ward with Zhang Fan, the family members of marukuo bowed 90 degrees without saying a word. Then the doctors of marukuo bowed with a trace of reluctance and expectation.

A group of people bent over Zhang Fan.

This battle is really shocking. If it had been a year earlier, Zhang Fan would have to hide behind his master in a hurry.

Tanima is scary.

I don't know. I thought I was in the funeral home.

But now Zhang Fan has seen the world. He doesn't proudly say what's wrong with me. I didn't deliberately give them a 90 degree bow.

Just slightly bent over. On the way, Zhang Fan already knew the situation. So, after bending over, he whispered, "can I have a physical examination now?"

Always so calm.

Old man Lu nodded slightly. Even if Zhang Fan was a little domineering now, he wouldn't say anything, but Zhang Fan didn't have a light wind and light clouds, which made the old man more satisfied, and those who were satisfied couldn't be satisfied any more.

This is tolerance!

"It's all our fault, Zhang sang, please!" To tell the truth, there are definitely two kinds of people when MARUKI lowers his head and raises his head.

Zhang Fan changed his clothes and said to his master, "master, I'm in."

"Go!" Old Lu nodded gently.

After greeting the old man, Zhang Fan nodded to the director of the golden mean. Now is not the time for greetings.

Zhang Fan entered the ward.

Physical examination.

To tell the truth, on Zhang Fan's medical skills, at the current level, liver and gallbladder are the first. He not only has his own perception, but also has famous teachers. Zhang Fan is the most relaxed and insightful in this discipline. Then there is orthopedics. In order to make more money, Zhang Fan made great efforts in this discipline. Say a bad word. At the beginning, I was connecting steel plates on bones in my dream.

Then comes the urinary system. Although the urinary system is opened the latest and the surgery is done the least, this discipline is relatively a simpler organ in the stomach. As for cardiothoracic surgery and brain surgery, it's the last bus.

As for diagnosis, it can't be called level, it can only be said that it is still in the stage of learning. This is a painstaking effort. Just like Jia Dao's poetry, it takes a lot of thought to ponder and understand. Therefore, it can also be said that all basic medical courses, such as anatomy, pathology, physiology, pathophysiology and biochemistry, are actually basic for diagnosis.

This thing is like a very comprehensive subject.

Therefore, when Zhang Fan entered the ward, his mind was the method of old man Chen's physical examination. I thought I knew the results. It should not be difficult to learn the old man's method. However, it's too difficult. Really, if there weren't too many people outside, Zhang Fan wanted to scold. The old man could hear it. He knew the result, but he still couldn't hear it.

"Is my hearing worse than the old man?"

"Zhang sang!"

When Zhang Fan walked out of the ward dejected, everyone thought Zhang Fan was not sure. In fact, Zhang Fan doesn't care about being discriminated against by comparison. But now for the technology that can't copy Lao Chen's head, Zhang Fan feels very lost. It seems that he is not a genius!

To tell you the truth, Zhang fanlue is a little floating. I looked at it once, and I looked at it three or five meters away from the glass wall. I wanted to learn the talent trick that people call Xihua once in a hundred years, which is too despised by people's Huaxi.

Zhang Fan didn't pay much attention to others. He was in a bad mood and couldn't say it yet "Cases! " Someone immediately sent Zhang Fan his hands.

Zhang Fan carefully looked at the original cases and various examinations page by page. Without the diagnostic ability of Lao Chen's head, he had to come to a stupid way and follow the map.

"Director Li, the operation can be done, but the risk is still very large. Your help me! " After reading the case, Zhang Fan said to the mediocre extrathoracic director after a slight closing deduction.

"Hehe, good." The director of the golden mean didn't have as much resentment against Zhang Fan as the director of shuitanzi orthopedics, because when the director of shuitanzi knew Zhang Fan, Zhang Fan was still in the soil, and when he knew Zhang Fan, Zhang Fan had made achievements.

Then Zhang Fan turned around and looked at the doctors present. His master certainly couldn't do it. The old man can't take a knife now except losing his temper on the operating table. Besides, the old man is not a thoracic surgeon. Other doctors are not familiar with it.

At this time, the doctor of Shuntian seemed to know later and said, "Zhang sang, excuse me, are you Zhang sang, a tea vegetable?"

"Huh? Yes, I'm Zhang Fan from the people's Hospital of chasu city! "

As soon as you say that. A group of doctors in the pill country seem to have realized it.

"Zhang sang has worked hard!" This time, even doctors at Jingdong University showed a special respect.

At this time, the family members were confused "What's going on! "

"Our hospital has cooperated with Zhang sang for a long time. Right, Zhang sang! "

The doctor of Jingdong University smiled and explained the cooperation between tea element and pill country.

This time, the family members have more confidence. More modest.

"Zhang sang, please take me, please!"

The chest director of Marubeni Jingdong bowed again.

Chapter 1133

The team of this operation, in the words of pretend force, is the cooperation of the top doctors between countries. Old man Chen, a physician, and old man Lu, a surgeon. Although old man Lu didn't have an operation, he was Zhang Fan's master. Zhang Fan would have an operation. The old man would never let go. Like in the morning, he patted his ass and left.

If the patient is not special, it is estimated that they can go to Yangma. Therefore, the operations often on TV and newspapers are generally private hospitals, and public hospitals generally do not pay much attention to this aspect. Just like the miracle doctor who always sticks to the grid of the telephone pole toilet, the more low-key, the more unusual.

Several meetings were held on the formulation of the operation plan. Old man Chen used the thinking of internal medicine and Zhang fan used the thinking of surgery to discuss and discuss together. To tell you the truth, this operation is very difficult, really difficult.

Otherwise, it would not be difficult for the director of the doctrine of the mean and Marubeni. The patient has been like an egg yolk with a broken skin, which is maintained by the membrane. Now we need to have an operation. To tell the truth, it is like drawing a balloon with a knife, not letting the balloon leak, but also making a hole in the balloon.

This time, no one questioned Zhang Fan. Even if Zhang fanqian was modest, Lao Chen also gave the leader of the operation plan to Zhang Fan. People are not afraid of taking responsibility. They think they need to see a surgeon now.

Zhang Fan now has no chance to steal the old man's technology, no time and no chance.

This level of discussion, this level of surgical scheme formulation, to tell the truth, there are few machines in the world in a year.

It can be said that this is the top medical operation.

"Directly break the chest, open the cavity, and then find the focus. The operation must have the least damage..."

Everything is based on accuracy. Therefore, now is not the time for everyone to question how accurate Zhang Fan is. Now we can only believe that Zhang Fan is so accurate.

"Zhang sang, what do you need?" The patient's family, a serious middle-aged man in meatball country.

"I need surgical instruments. Siemens sent me a set of special surgical instruments, but I didn't carry them with me in tea. We also need a familiar surgical team. There are one and two AIDS now, but we can't help but prepare backup personnel, and the anesthesia group of the medical support group also needs people. " Zhang Fan is not difficult. If he can be very prepared for this operation, Zhang Fan must be very prepared. He must not be careless.

"Good! Zhang sang, the surgical instruments are easy to handle. I'll send someone to contact Qingniao's Siemens company now. As they don't have them here, I'll send someone to take your instruments. The backup personnel of the surgical team, please tell me the list and I'll invite you! Our experts in Marubeni also... "

This is the confidence of the rich.

"Surgeon, I need my team to act as my surgical backup team." Zhang Fan didn't let the people from Marubeni country come and directly gave him the list of tea vegetable surgeons.

The meeting on the formulation of the surgical plan lasted five or six hours.

"Master, the operation will be carried out the day after tomorrow." In the office of the provincial hospital, there are Zhang Fan and Master Lu.

"Well, I won't say anything else. Have a good rest today and tomorrow. This is a bad battle. Have a good rest. Do you need me to ask the chest surgery director of Qingniao affiliated hospital to help you? "

"Master, no need to help director Li of the golden mean, two and three are all from the meatball country."

"Hey!" The old man talked in his heart. I don't know what to say. I'm obviously a general foreign student. Now I seem to be the boss of other subjects. The old man didn't even have the strength to help. He didn't feel good about it.

It's like my son is old and I'm old.

.....

"Zhang Yuan began to select people again! This time, not only those in surgery, but also those in

anesthesiology and internal medicine! "

The tea vegetable hospital has been in a panic these days. People are really terrified. One by one, they are deeply afraid that Zhang Fan will not be elected.

Because every time Zhang Yuan shakes people to fly a knife, the level of life can be raised to a higher level when he comes back. The most obvious is the little nurse Bayin.

Now Bayin is the legendary little rich woman in the hospital. The red little Audi downstairs of the surgery is Zhang Fan's record. Now it is spread again in the hospital. The head nurse in the operating room is going to be the chief nurse. Bayin is expected to impact the head nurse in the operating room.

Indeed, today's small Bayin is really moist, and her small chest is very tall. My husband is in good health and has money. Saving money can be regarded as financial freedom. Moreover, her social status is also much higher. In and out of the hospital, even the Dean with eyes on his head would stand in his footsteps and talk when he saw her say hello in the past.

This is the result of a trip to the chieftain tribe with Zhang Yuan.

So Zhang Fan called and almost made Lao Li cry.

Not only the surgeons in the operating room, but also the anesthesiologists and nurses began to drift.

One or two opened their mouths and said, Zhang Yuan shook people!

"European Academy, this is the list!"

Lao Chen handed the list to Ouyang.

When Zhang Fan was away, the old lady took charge of the family. Lao Chen, Lao Gao and Juma Buick couldn't do anything. She doesn't trust! And will not delegate power. Especially when Lao Gao and Zhang fan are away, Lao Gao's life is really sad.

"You can't lead the team alone. This operation is special. I'm not sure. Hey, I'm so old. I have to worry about you*** Didn't pay me more.

You and Secretary Ren are going. Bring an expert in internal medicine. The director of the anesthesia department also went, and the deputy director was responsible for the work of the Department. The nurse in the operating room asked the head nurse to bring Bayin and Xue Li. Dr. Zhao Yanfang can't let go of the work here.

We must take the surgical instruments of Zhang's Hospital and hand them over to him in person. We must not let others touch them. "

"Don't worry!" Lao Chen nodded.

Zhang Fan called in the morning. Before the afternoon, the departure list came out. Those who were elected were as happy as those who won the grand prize. Those who were not elected scolded and dared not say Ouyang, but they dared to criticize Lao Chen behind his back.

The physician, Ren Lidai group, is almost the backbone of internal medicine, but also brought two young people, one is the flower in the heart and the other is Chen Hong in the digestive department.

That flower is a reserve of technical talents for tea. Chen Hong didn't know whose path to take. While engaging in clinical practice, she began to take the administrative approach. Her goal is the director of the medical department, that is, the role of Lao Chen.

Chen Hong and Zhang Fan went to the hospital together to test the establishment and practice of female doctors. At the beginning, Li Hui was still obsessed with her. As a result, he was issued a good man card. This young woman has many minds and will come. She is also an official fan.

Surgery and cardiothoracic surgery of tea vegetable are really out of hand. Dai Yuhang can be pulled out for a walk, which also shows that the inside information of the hospital is not enough.

The grade of the party going to Qingniao is much higher than that of Zhang Fan. It is directly chartered by the patient's family.

On the plane, Lao Chen, Xiao Chen and Chen Hong were busy up and down.

"Stop drinking. Haven't you ever drunk yogurt. Just these people, you drink bad stomach, but it's time to delay the operation. Who's it? " Lao Chen severely stopped the greedy Bayin.

Bayin drank yogurt on the plane. Under normal circumstances, there are coke and coffee on the plane. As a result, there is yogurt on the chartered plane, which is still from meatball country, so Bayin is greedy. Small breasts can be too high, not only because of Xuefeng's efforts, but also because others love to eat tirelessly.

"Doctor, do you want an eye mask? You'll be busy when you get off the plane. You can have a rest for a while. I brought several eye masks this time. They are new and unused. " Xiao Chen, Chen Hong is very good at things. She sends eye masks to doctors and nurses.

This thing, what will happen, this is what will happen. As long as you can pay attention, it is knowledge. Despite this small move, everyone's rejection of her became much smaller immediately.

Since Zhang Fan became a teacher from Qingniao, there has been a lot of frequent communication between tea vegetable and Qingniao hospitals. On the plane, the older ones closed their eyes, and the younger ones, such as Bayin, talked about where the green bird went shopping and what seafood they wanted to eat.

They have no pressure, not only no pressure, but also a little excitement, because in their eyes, they are not afraid of anything as long as Zhang Yuan is there.

For his team, Zhang fan does not miss any opportunity to cultivate. Doctors improve by focusing on patients, but the medical team is not

The vast medical team of tea vegetable has killed Green birds from tea vegetable.

Lao Chen led the team. He didn't even take much luggage, so he was a small backpack. He held Zhang Fan's surgical instruments in both hands since he left the hospital. He didn't check in when he got on the plane. It can be said that the box never left Lao Chen's hands.

Provincial Hospital.

"Zhang Yuan, let's report!" Lao Chen handed Zhang Fan the surgical instrument box with both hands.

"It's hard. The operation tomorrow morning will hurt everyone today. Eat casually and rest quickly. We have to work all day tomorrow. We must raise our spirits. We are sure to succeed. Do you have confidence? "

"Yes!"

Men and women shouted in unison that Zhang Fan was not only giving them gas, but also giving himself gas. I don't know why, when these colleagues arrived at Qingniao, he suddenly had more confidence in his heart.

Maybe this is the so-called trust.

The doctors of the provincial hospital looked at the doctors from the frontier from a distance, and some even said bitterly: "Why are they so old-fashioned, like people in the 1970s and 1980s, and mobilized before the war, hey hey!"

In fact, this momentum is out of date on weekdays. In the era of paying attention to personalization, it is really out of date. However, it is always retained in special industries, especially in the army, the police force and some hospitals.

There are also tea vegetable hospitals, because they are in the frontier, sometimes local hospitals, and sometimes digital hospitals starting with the army!

Is it out of date? Never out of date!

Lying in bed, Zhang Fan had several surgical steps in his mind, and then unconsciously entered his dream.

Chapter 1134

Team, this word is very important in medicine. Simply put, for example, the ancestral Qiu school team, Xia Lao and Zhao Yanfang's teachers are like an unknown little transparent. But when the old man was taken out alone, he became the father of China's transplantation.

Later, it was said that old Qiu fell out with old Xia. Zhang Fan also asked old Lu curiously, but he didn't hear anything except a gossip scolded by his master, and old Lu respected old Xia very much.

Let's look at Uncle Zhang Fan's team. This team is also super powerful. A Fangdong hospital later became the base of hepatobiliary surgery in China. There are casually pulled out directors, all with gold stars, and all of whom are people special Du Niang doesn't know.

Later, Lao Zhong's team, Lao Hu's team, and even Jiangsu and Zhejiang Lao Li's team are amazing and gorgeous teams. Although the leading personality is dazzling in these teams, in addition to the leaders, others are also top-notch experts.

Zhang Fan's team is a little thin at present. Zhang Fan's team is in a small city, that is, going around and occasionally mocking the existence of the provincial capital, but once in a big city, it will be unknown.

Therefore, Zhang Fan not only improves himself, but also tries to put pressure on the team. See more, see more, practice more, and let everyone find the gap with others, so as to know which direction to strive for. Of course, in this process, it is inevitable that some people will fall behind and new people will join.

Generally, the pressure of such team members should be great, but the pressure of Zhang Fan's team is not great except to catch up with technology. First of all, tea is a small city. As for the Throwing Knife expenses earned by Zhang Fan, to be honest, money is not the main problem.

The pressure of life is not great. The old lady Ouyang of the housing tea vegetable hospital took advantage of the government's cheap and occupied a lot of chassis around the tea vegetable hospital early. Although it is not a welfare room distribution, the originally inexpensive house price and the hospital's subsidy are still very moist.

Education is also good, because of the bullish spirit of the tea vegetable hospital, whose children want to go to the tea vegetable school and find a hospital, there is no problem.

So it can be said that even if the couple fight, they can be advised by the hospital leaders. How to say, the tea vegetable hospital is still a little collective in the early years. But this has helped Zhang Fan's team in the rising period a lot.

Otherwise, one or two, worry about the housing loan today and the school district house tomorrow. To be honest, there is a lot of resistance. Moreover, those who study medicine have a long school life and are not small after graduation. They almost have to consider daily necessities, oil, salt, marriage and funeral. Not everyone is an idealist.

On the contrary, the spirit of the team is particularly vibrant.

In the operating room.

Everything has been prepared. The first echelon is the director of the doctrine of the mean and the pill country. The second echelon directly goes to the doctors and nurses of the tea vegetable hospital. The gap is really a little big, but who calls the main knife Zhang Fan? The provincial doctors have no place to participate.

"It's too chicken to bully people. The owner can't help it!"

"I'll bully you. What can you do to me!"

The provincial doctors outside the chest stood in the observation room with some complaints. They didn't say that they didn't let themselves participate in the occupation of their operating room. There's no way. Who can't let their director take the operation!

"Zhang Yuan, disinfection is over!" Dai Yuhang, a tea vegetable, rushed to disinfect. The young man from the three northeastern provinces who chased his sister out still had some eyesight and eagerly grabbed disinfection from the director of the pill country.

"Zhang Yuan, anesthesia succeeded!" The provincial anesthesiologist learned from Dai Yuhang, also known as Zhang Yuan.

The patient turned numb. After Zhang Fan dressed neatly, he went to the operating table.

Cardiothoracic surgery, how to say, cardiothoracic surgery in many hospitals has become a department that grabs ribs from orthopedics. Because the operation is too big to be done and small damage, the patient will not come to the hospital after two days at home. So many doctors in this department have

no surgery to do. When they encounter broken ribs, they have to tell lies with red mouth and white teeth: ribs belong to thoracic surgery, not orthopedics.

The main reason is that the requirements for doctors in this department are too high. For example, the heart, so far, there are few hospitals in many areas that can easily open the chest and massage the heart, let alone others.

Besides, the human structure is really special. In fashionable words, it is a relatively green and energy-saving organizational structure. For example, breathing consumes energy only when inhaling, and breathing depends on the exhaust gas discharged by the muscle mechanism and lung tissue.

So, the muscles in this place are quite complex. Not to mention anything else, you can think back to the scene of eating lamb chops. You feel that the lamb chops are very rich in taste. Between lips and teeth chewing, there is not only fat and thin, but also a sense of peeling layer by layer.

In fact, this is the secret of the chest tissue. There are three horizontal and three vertical layers, and there is also an inclined three layer in the middle. This kind of tissue is most afraid of an adhesion. A careless doctor, if he goes down with a knife, the level is not good and the suture is not good. Then the patient takes a breath, just like being hung in front of his chest by a fish hook, covering his Mimi and afraid to go out.

Just an outer tissue is so complex, not to mention the structure inside the chest. The pipe coming out of the heart is the coarsest here. If you say a bad word, there must be no mistake in this place.

A little carelessness, the tip of the knife crosses the aorta, and then people can get you a blood fountain directly. It can be reached at a height of three or four meters.

"Sharp knife!" After receiving the knife, the operation began.

Although there are different countries and hospitals, the operation regulations are almost the same.

Zhang Fan takes a knife. The director of MARUKI state and director Li of the golden mean pull a piece of gauze slightly outward along both sides of Zhang Fan's skin.

This is the same as cutting paper. Tighten the skin, otherwise it feels straight when cutting. As a result, after the wound recovers, it looks like someone with uneven teeth, and the patient will definitely curse his mother.

Incision of the skin, separation of muscles, hemostasis, these procedures are very different from other operations.

The director of Marubeni state kept his eyes on Zhang Fan's hand with a knife for a moment.

"Bone biting forceps!" The surgical field of vision is not enough. You must bite off two ribs.

Bone biting forceps are actually big forceps. How big are they. People who have worked as reinforcement workers probably know that it stands half a person tall, that is, there is no black lubricant or color on it. Otherwise, it will be the tool of the reinforcement worker on the construction site.

Click, click, two dull sounds, broken ribs. Fresh ribs are definitely not the crispy bones in everyone's meat pot. They taste quack. Because it is rich in organic matter, the younger people, the more like the summer wicker ribs, soft and tough.

Only the old people in their 70s and 80s will be crisp when their ribs are bitten, just as the people with good teeth eat crisp bones.

When you bite off your ribs, if there is a voice over at this time, the voice over of director MARUKI is definitely: Zhang sang, start your performance!

The Qiu sect, especially old Qiu and old Wu, apart from their achievements in liver and gall, the most outstanding thing is the accuracy of their Sabre technique.

And Zhang Fan is better than the blue. If we find a technology that Zhang Fan is most proud of at present, it is his knife technique.

The most powerful Chinese thoracic surgery hospital in the early years was in magic city, which was founded by the early Chinese experts, master Huang Jiasi and master Gu Kaishi. They have more than 10000 extrathoracic surgeries a year. That is, at least 30 operations a day.

Later, the capital also rose, but in the end, there was no city where the white lady got married.

Therefore, in a word, those who dare to go to the snake are not ordinary people!

"Open up!" On the operating table, Zhang Fanke was not polite at all.

The director of the doctrine of the mean and the director of the MARUKI state immediately picked up the spreader and stuffed it into the chest, and then slowly opened the width of the two ribs bit by bit, just like the incision of the cherry mouth, which was supported like a big mouth.

Open the chest. At this time, Zhang Fan's technology was seriously displayed.

In the operating observation room, the doctors who used to complain a lot have become quiet. Experts know whether there is one. Zhang Fan may not be famous in the provincial hospital, but it is different now, because the doctors of thoracic surgery have seen that the young Dean in the northwest is really powerful.

The doctors in Marubeni did not blink. Because of the special identity of the patient, the family members are also in the operating observation room.

At the beginning, the family members wiped their tears and listened to the doctors around them explain the steps of the operation. But watching, from the original crying, pity turned into fear, and then something turned into hiccup. Finally, the family members couldn't hold on. They covered their mouths and ran out with their stomachs.

This operating room is recorded in real time. I don't know whether it's the additional requirements of the family members or the uneasiness of the MARUKI country. Anyway, people ask that video must be recorded. Zhang Fan doesn't care.

.....

An hour!

Four hours!

Eight hours!

The instrument nurse and itinerant nurse have been replaced by the Bayin of tea element and the head nurse of tea element operating room.

The doctors are still the directors of Zhang Fan and marukuni and the directors of the golden mean.

Zhang Fan's head gently stretched out without talking. The head nurse came to Zhang Fan for the first time and wiped Zhang Fan's forehead quickly and gently with a gauze stained with Xinjie and Mie solution. Then he quickly took a new piece of gauze and stuffed it into Zhang Fan's hat.

The operation is really too difficult. Not only the two assistants feel difficult, but also Zhang Fan feels difficult. Because the operation window is so big, and Zhang Fan, they have to explore the whole chest.

For a simple example, it's like buying watermelon in summer, opening a window, and then lifting up the pulp to have a taste. Well, the melon is sweet. As a result, I cut the whole melon at home and found that the melon was not cooked.

To tell the truth, a watermelon can deceive people, not to mention a chest. Zhang Fan is like this now. Opening a small window of watermelon can not only damage the pulp, but also explore the situation inside the complete watermelon. To tell you the truth, it's really difficult.

Chapter 1135

People who engage in technology have a common problem. That's why he can do it and how I can do it. Of course, rowing doesn't count. With this trait, technology will develop more and more excellence.

When Zhang Fan's scalpel, like an elf, swam around the edge of the aorta and the edge of the lungs, the two assistants from the initial panic to the later surprise, and finally became silently bearing the horror Zhang Fan brought to them.

Thoracic surgery brings together a series of difficult operations. After all, it is the location of the two core organs of the human body. Coupled with the special environment of closed negative pressure in the chest, the starting point of thoracic surgery is not easy. Thoracic surgery is also the category of surgery most affected by the patient's own situation. The degree of thoracic adhesion directly affects the difficulty of surgery. When a patient with extensive thoracic adhesion is undergoing pneumonectomy, the anatomical relationship of the lung may be completely lost, and the shape of the lung lobe cannot be sorted out. During the operation, there is constant bleeding and air leakage.

This kind of surgery is also the most basic surgery outside the chest. Once it is not done well, it is not only difficult to hold your breath, but also like an air pump constantly pumping air from a flower. The surface of the human body is like circles of plastic containing gas, just like a rubber doll.

The ultimate body of lung surgery is unilateral lung plus total pleural resection. This kind of huge wound surgery is used to treat pleural malignant tumors. It needs to clean all the things in half of the chest. It is not only difficult to perform the operation, but also a great challenge to prevent mediastinal displacement.

Good to die, this is the disease in Marubeni. There is a hemangioma crawling on the most important side of one lung.

"What should I do?" The director of MARUKI state is big. When Zhang Fan finally found the lesion in the center of the bottom of the lung, everyone did not breathe a sigh of relief, but took another breath.

"Talk to your family. Conservative and non conservative treatment. Non conservative treatment is total resection of one side of the lung, and conservative treatment is tumor embolization. Go! "

Zhang Fan said that when the doctors of Qingniao province and Marubeni were still hesitating, Ren Li had gone out with the medical record.

The risk of non conservative treatment is the greatest, and long-term observation is required after operation, that is, after one step, the patient will lose half of his lungs. If there are other accidents, there is almost no alternative. If you say something bad, you can only wait to die.

However, if there is no accident, the postoperative patient can still look like a normal person for decades.

Conservative treatment not only costs a lot, but also takes drugs for a long time after operation and carries out regular examination. Once the tumor cannot be controlled, surgery is still needed, and the benefits are quite obvious, that is, the patient's organs are sound. Even if there are accidents, there are still relatively many options in the future.

General patients often choose non conservative treatment, which is the so-called one-step approach. Because there are too many non-medical problems involved. For example, the cost of conservative treatment and various drugs and examinations after discharge are really not affordable to the general middle class.

The non conservative treatment is selected. Although the injury is large and there are few options in the later stage, generally speaking, there are too few relatively conservative drugs in terms of the cost of surgery in China, which is also a benefit of the so-called drug use to support medicine.

If you change countries, the cost of such surgery is absolutely sky high. Because there are too few doctors who can do this kind of operation.

"We choose non conservative treatment!" After Ren Li told the patients' families about the prognosis and risks of the operation, they directly chose non conservative treatment.

For patients at this level, money is not a thing. You don't have to think about using money to buy one more health opportunity.

After the operation consent was signed, Ren Li entered the operating room for the first time“ Zhang Yuan, non conservative treatment! "

"Good!" Zhang Fan replied gently.

Other doctors are relieved.

Generally speaking, conservative treatment is to use a particularly advanced embolization plug, such as the patient's thymoma, to block its pathway, which is equivalent to starving the tumor. For example, it is equivalent to blocking all openings of the human body with a wooden plug, such as the mouth and anus, and then waiting for death.

The advantage of this kind of operation is that it has little damage and almost no damage to organs. If the tumor starves to death, it can be said to be a very perfect minimally invasive operation. But its disadvantage is that tumors are not easy to provoke. They often starve to death. This game will hide

behind the scenes.

Instead of conservative treatment, it is relatively rough. You directly cut all the organs, so that the tumor is cut off without almost developing. But the damage is extremely huge. It's really a way to kill ten thousand enemies and lose eight or nine thousand.

Half of the lungs were excised. Even if they were young, they would be useless in the view of normal people in the future. And there is no guarantee that the tumor will relapse.

Anyway, each has its own advantages and disadvantages.

After Ren Lijin's operation and informed Zhang Fan's family's choice, Zhang Fan began conservative treatment.

"Twenty, twenty!" When Zhang Fan started embolism, several Bluebird doctors in the observation room talked silently.

This embolic material is extremely expensive. There are 200000 embolic materials alone.

"All right, stop talking. It's a pity!" For 200000 materials, according to the routine, the general equipment company will feed back to the doctor about 20000, which is clearly priced. Fortunately, this disease is extremely rare.

"Ah! When will I do such a high-precision operation?" The nagging man seems to be very unwilling to say.

"All right. What you are thinking about is not technology, but kickbacks! "

.....

In eleven hours, all the people on the operating table changed except Zhang Fan.

Originally, the director of marubukuo was not like getting off the operating table, but in the late stage of the operation, Zhang Fan asked others to go down and have a rest in order to let the team have more experience. There were few opportunities for this kind of operation.

The old man got off the operating table wrongly.

Although the operation is completed, it is also a very troublesome thing after the operation. The patient should be fixed in one position, and the postoperative recovery is also a very troublesome thing.

.....

"How's it going?" After the operation, after Zhang Fan left the operating room, Lao Chen came over at

the first time. Zhang Fan stood in the operating room for 11 hours, and Lao Chen waited outside the operating room for 11 hours.

"Not bad. Do you have any water? I'll have a drink. " Before the operation, Zhang Fan ate two mouthfuls of chocolate. After the operation, his legs were a little soft.

And my mouth is dry. I feel my tongue has shrunk.

"Here, here, I made you medlar! Or black wolfberry! "

Like a robot cat, Lao Chen took out a water cup from his handbag.

Zhang Fan looked at Lao Chen with a slightly strange look, but he didn't talk much.

The next day, Zhang Fan had no chance to sleep in. He had to get up early to see the patients who had undergone the operation. Although the child was swollen like a dough, his body temperature and white blood cells began to drop. It shows that Zhang Fan's operating room is successful.

The patient's family members are also very polite. The president of the provincial hospital is even more polite. Zhang Fan's ward round is quite face-saving. It is the treatment of expert ward round directly.

"Zhang sang has worked hard!"

"It's not hard, it should be."

After Zhang Fan's ward round, his family and his subordinates bowed to Zhang Fan at the door of ICU. Zhang Fan politely said it was not hard.

Then wait for the other party to pay.

But after waiting for a long time, this guy kept saying polite words, and didn't see the envelope given to Zhang Fan by the provincial president. Zhang Fanting wondered whether such a big family business should be repudiated?

In the office of the president of the provincial hospital, the father of MARUKI patients finally began to say practical things.

"Zhang sang, I'd like to invite you to travel to meatball country for a few days. By the way, if I can, I want my children to go back to the meatball country. "

"Well!" Zhang Fan was stunned.

"Don't worry about the cost. This is the cost of this time. " Then he gave Zhang Fan a check in front of the president of the provincial hospital.

Although you deserve it, you should be polite. Of course, Zhang Fan will certainly not refuse, nor hypocritically say no, "a little too much, this is not very good."

"Oh, my face is full of smiles. I don't give up when I hold a check. I also say too much hypocritically!" The president of the provincial hospital despised Zhang Fan, stared at the check and looked at the numbers. But it didn't shock much.

Because this time not only Zhang Fan, but also other doctors who came to the consultation, especially old man Chen, I don't know how much he gave.

Two million, not Japanese currency, but RMB. This figure has been a lot of extra, but he also asked for more. I want Zhang Fan to go to the meatball country.

To tell you the truth, Zhang Fan doesn't want to go.

But looking at the check in his hand, Zhang Fan didn't want to give up.

Between hesitation.

The president of the provincial hospital also came out to help talk. He really didn't want to carry the pot. At the beginning of his diagnosis, the government criticized him.

"Zhang Yuan, you should take a rest and travel. You can't finish the operation in our business. And they sincerely invite each other. "

Lao Li's side has reached a critical moment. The younger martial brother has been caught by himself. It seems a little unreasonable to run to the meatball country by yourself.

Between hesitation.

The expert from the pill country in charge of Gastroenterology of tea element called, "Zhang sang, please go to the pill country. If there is the support of such enterprises, our cooperation may be improved to a higher level."

Then Ouyang called.

"Go ahead. I asked you this way. It's not a big problem if you go now. I heard that they want to cooperate fully, but they must have a responsible person to go to Marubeni country. "

"Really?"

"Go!"

Ouyang said definitely.

"But it's Chinese New Year!"

Ouyang is on the other end of the phone. He's going crazy!

"Zhang sang, we can invite your family to travel to meatball country!" Hung up the phone, deeply afraid that Zhang Fan would not go to the meatball country, the local tyrant added.

"Well, I'll go back to tea vegetable first and discuss it with my family."

Chapter 1136

Zhang Fan originally wanted to take one million for two million, and then let the team distribute the other one million in proportion, but Lao Chen refused.

"Zhang Yuan, we have to think about it in the long run. In the past, we all thought it was a windfall. Occasionally, we can only feel that we are unlucky and have not been chosen by you. But now it's different. There are more and more throwing knives.

If the distribution is still the same as before, the physicians will revolt. Not poor but uneven. No one says how much you take, but others can't take so much. Now you are the legal person in charge of the hospital... "

Of course, Lao Chen also wants to take the money, but when he came out this time, Ouyang specially explained that he can't divide the money in such a big scale. He must have a rule. Otherwise, this kind of thing is absolutely harmful to the progress of the hospital.

"Oh!" Zhang Fan thought for a while and then said, "when you go back, make a distribution plan. But people in the team still have to take more. "

"That's for sure."

Back to tea element, Zhang Fan looked around the laboratory. He really couldn't help at all. Now it's the stage of experimental data. Everyone starts to implement it step by step according to the guide. To tell the truth, he really has nothing to do.

Said a word to Lu Ning. Lu Ning waved his hand and thought Zhang Fan was in the way.

.....

"Going to travel?" Back home, Zhang Fan and Shaohua said that Shaohua was happy.

I'm so happy, "take your parents, we don't touch your cheap. We pay our own expenses. When our parents are old, we can take them out more. Take your sister, too. The little girl is so obedient. She hasn't been to several places except the magic capital. She only went to new Matai last time! "

"OK, I'll tell my parents and see what they say."

.....

"No, no, there's nothing to turn around. Your mother and I are at home for the new year. You go. " Before Zhang Fan finished, his father began to object.

"Little stone, you go. There's nothing to see abroad." Zhang Fan's mother agrees with his wife.

In fact, it's not that they don't want to go, but that it costs money. Zhang Fan now earns a lot, but the old couple see Zhang Fan's work. It's too hard. It's really hard to earn this money. So the old couple said against their heart that they didn't want to go.

"OK, I've bought all the tickets! Call Jingshu. Don't go to work this year. Come back early during the holiday and get ready to travel! " Zhang Fan decided sex directly. If his parents don't go, his father-in-law and mother-in-law are embarrassed to go. Zhang Fan hasn't had a good rest in the past two years. He simply took this opportunity to set out for the whole family.

"You still care about me..." the old man turned from reluctant to pay attention to Zhang Fan and began to seize power. The dignity of the head of a family is really gone forever.

Zhang Fan's mother interrupted the old man, "can't you return?" While whispering, he secretly looked at Shaohua who was busy in the kitchen.

"Can't return!"

"Mom and Dad, you have worked hard all your life. Zhang Fanjing and Shu are so excellent. It's time for us to honor you."

Shaohua took the sliced orange and fed it to his mother-in-law.

Ask for leave. It's troublesome for Zhang Fan to go abroad now. First of all, it is necessary to report, not only in the flange plate, but also in the Organization Department of tea element. Explain the situation, which must be a handwritten situation report.

Where to go, what to do, how many days to go, and how many people to go with, we should make it clear. Moreover, Zhang Fan has now reached the department level, so the approval is particularly strict. The most important thing is that Zhang Fan is already an expert in the provincial expert database.

Going abroad at this level is particularly troublesome, and the whole family still goes. At first, Zhang Fan thought it was not much trouble. As a result, three people came from the government to take charge of Zhang Fan's going out. In a word, don't go out if you can.

If you have to go abroad, you'd better go abroad in batches, which means either your family is at home or Zhang Fan himself is at home.

This time, Zhang Fan sat in wax.

"Don't be reluctant. Now that you have reached this level, you have to bear the obligations and responsibilities of this level." Ouyang looked at Zhang Fan's lawsuit and persuaded him a few words. However, in order to deepen cooperation between tea and pill countries, the most important thing is to ask for more money and equipment.

She and Zhang Fan discussed it for a long time.

Finally, Marubeni Jingdong University issued an invitation letter for scholars, which was released by the government on the side of tea.

.....

A week later, Qingniao's youth had passed the dangerous period and returned to the meatball country directly from Qingniao. And Zhang Fan and they also set out from tea vegetable, flew to the capital, and then changed planes. Jing Shu waited for them in the capital. There are also two colleagues, one is an expert of Marubeni's cooperation in tea, and the other is an interpreter and assistant sent by Marubeni youth home to Zhang Fan.

Originally, people wanted to send a special plane, but Zhang Fan quickly refused. I can hardly get out. If I make it bigger, I may not get out.

Zhang Fan has no novelty about going abroad. Shao Hua and they are different. After meeting Jingshu in the capital, my aunt and sister-in-law have been chattering, and Zhang fantou is big.

"You say you like the star of MARUKI country?" Aunt and sister-in-law talked for a long time. Then Shaohua suddenly remembered that her husband was still sitting next to her, so he turned to ask Zhang

Fan.

"Me?" Zhang Fan thought, "chiming Lixiang!"

"Well!" Shaohua opened her mouth for a long time. She thought Zhang Fan would either say no or say something about a well or something empty. Unexpectedly, she said something she had never heard of!

"What's on!" Shao Hua has a cunning face.

"Hehe, you can rest assured. Have you heard the Tokyo love story?"

"Well, you're old enough!" Finish.

Shaohua turns and whispers to Jingshu.

In fact, the film and television of Marubeni has a greater impact on China than that of Bangzi later. Not to mention anything else, Zhang Fan's parents Gao cangjian in those days, later Cherry Blossom path, Liuchuan maple, women's volleyball woman and baseball boy.

The most important thing is that in the early years, if anyone had a Sony color TV in Marubeni, they had to cover it with the best silk when they didn't watch it.

Originally, Zhang Fan and Shaohua discussed that their own expenses should be paid by themselves. Unexpectedly, they directly covered all the expenses here. They also sent someone to take charge of Zhang Fan's trip. So they don't have to worry about Zhang Fan.

.....

After more than four hours of trouble, the plane finally arrived in the capital of Marubeni.

There were a lot of people picking up the plane. Of course, there must be no actress or spokes to welcome the future. In addition to Zhang Fan's family members who have undergone surgery, almost all of them are doctors in the Affiliated Hospital of Jingdong University.

Jingdong attaches great importance to Zhang Fan's arrival because of its cooperation with tea. If you know Zhang Fan now and Lu Lao them come out of China, then even experts from Marubeni country know Zhang Fan. Therefore, this time, the vice president of Jingdong Affiliated Hospital personally brought a team to the airport to pick up the plane. Zhang Fan thought that no matter how to find it, he would make himself wave for two days.

As a result, after leaving the airport, Zhang Fan was arranged to go straight to the hospital

"I don't care about personnel. The good words of bowing and bowing are exaggerated. As a result, I took it to work when I got off the plane!" Zhang fanlue was a little dissatisfied.

Zhang Fan was taken to the hospital. Shaohua took four old people and a little sister-in-law into the hotel to rest.

"Zhang sang, hard work!"

Bow again. It's too polite. Polite Zhang fan can't speak.

"The operation recovered well! Continue to adhere to treatment. " After seeing the patient once, Zhang Fan said a word to his family.

To tell the truth, many things, we feel that developed countries are free and fair, and people don't need money to see a doctor. It's hard to say whether freedom is free or not, because everyone has different concepts about the definition of freedom.

And fair, let alone fair. Not to mention the others, in terms of medical treatment, if the patient this time is not a rich family, it is too difficult to invite a doctor of the level of Lu and Chen in Marubeni. In China, this is different.

There are various disadvantages in China's medical treatment. The face of doctors and nurses is like the face of their father-in-law, but there is a particularly good advantage here, that is, the third class hospitals, even some second class hospitals. Some doctors and directors can directly contact the top medical academicians in China.

Who, who, invited so and so to do surgery, so and so is an academician, this kind of thing can't be news, but if you want to hire a top doctor in Marubeni, you have to spend tens of thousands of yuan to get it done, and you dare not think so in your dreams.

After checking the patient, Zhang Fan wants to mention his own family. He agreed to travel. What's this called.

Zhang Fan hasn't opened his mouth yet. People will report to Zhang Fan here.

"Zhang sang, this trip is rather hasty. You may not be able to rest. But your family, we will arrange according to the most distinguished guests. "

"What?"

Zhang Fan wondered.

The government gave Zhang Fan a week's holiday, not more than one day.

"Because of time, several of our universities want to invite Zhang sang to do some observation surgery and give several reports to several enterprises. Because if we cooperate deeply in the later stage, the

funds in it need the intervention of enterprises. "

As soon as Zhang Fan listened, he agreed. After all, I'm here to take the money. If I go back empty handed, it's estimated that Ouyang can tear him up.

Shao Hua and their first day's trip was arranged in Tokyo, Marukuni. Zhang Fan accompanied them to have a meal. They were about to leave here and travel to other places.

The reception banquet is unique in Maruzi country. But Zhang Fan was not satisfied with what he ate, because most of them were sashimi. Zhang Fan murmured to himself, can his intestines be well? He ate something suddenly. It's strange if he can be well.

After seeing off Shaohua and them, Zhang Fan entered the working state. After all, I'm here to ask for money. Dedication is still necessary.

Intestinal tumor, the national disease of Marubeni. There are many gastrointestinal diseases in East Asia. Gastric cancer in Bangzi, esophageal cancer in China and intestinal cancer in Marubeni have become a heart disease in various countries.

Chapter 1137

In Marubeni, many people in China say that the quality is high, and the people are generally literate. Zhang Fan doesn't know much about other industries. As far as the medical circle is concerned, Marubeni and China have both similarities and differences.

For example, where did this system come from? It was the pill country of Chinese Sinology in those days. In the early years, there were still a lot of big prescriptions in Marubeni. But the boat was so small that it turned around. I didn't feel good. I quickly separated the drug price and medical treatment. And China, which is learning from the pill country, is on the wax. The plate is too big. I can't help it for a while and a half.

For another example, the North-South difference in China's medical circle used to be the opposition between the magic capital and the capital. Now there is a tripartite opposition between the largest and richest rural areas in China. Mordor thinks that the capital is full of local steamed stuffed buns. The capital thinks that Mordor is full of worship of foreign countries. The big countryside thinks you don't have as much money as me. Give me freedom and I'll be the first in the world. It's not pleasant to look at each other anyway.

In fact, the medical circle in Marubeni is the same. Tokyo takes a circle of hospitals and medical schools around it and despises the medical circle in Kansai Osaka. Kansai Osaka feels that they are the leaders of Marubeni, and the quarrel between the two places is still very fierce.

However, the medical treatment in Marubeni also has its own characteristics. His medical treatment is mainly divided into three aspects: national, public and private. In the large hospitals in Marubeni, the most obvious feeling for Zhang Fan is that there are few people. The people who see doctors are not the same as in China. The third-class hospital in Wuyang, Wuyang, has to queue up for an elevator.

Are there few people in meatball country? According to the population per square meter, there are not necessarily fewer people in Marubeni than in China. But the patient density of people's state-owned and public hospitals is definitely not as high as that of China. This is the excellence of its private health care.

The medical treatment in Marubeni is between China and Europe and the United States. There are both national hospitals. Hospitals at this level are mainly high-quality. Relatively speaking, public is both high-end and basic. And others' private enterprises do the best in this aspect.

Clinics in Marubeni are often run by the top doctors in public state hospitals in their spare time. In other words, in some aspects, the private clinic of others is an expert clinic of a third class hospital.

This is just the opposite of China. Private clinics in China are often a means of making a living for doctors who can't go to large-scale third-class hospitals, while others use their leisure time to earn some extra money. Therefore, this system will divert many patients.

Of course, there are good and good. For example, in public hospitals in Marubeni, most doctors don't work on weekends. Then there are more dentists than expected and fewer pediatricians than expected. In addition, the of public hospitals is more personalized than collectivization.

Many people will say that personalization is better and more free. If you want to do it, you can do it. If you don't want to do it, you can't do it in other industries. But for special industries, this thing really doesn't work, because many things are always done by someone, and someone has to sacrifice.

Although Jinmao is the world's most superpower, its influence on China, especially in all walks of life, is not as strong as that of Marubeni. China's education and medical care can see the shadow of marubenism.

Especially when some people saw that the nurses and doctors in Marubeni cried that they had no masks or protective clothing and had to resign, many people felt uncomfortable. But at this time, China Hospital is not just one, but many hospitals do not have protective clothing or masks. Did you resign? It

was a little easier, because the money was inappropriate, and doctors, nurses and leaders were in full swing.

Zhang Fan has been busy these days in meatball country. In the morning, Jingdong's patients and doctors came and operated with Zhang Fan. In the afternoon, the Affiliated Hospital of the University, which planted rice, came to operate with Zhang Fan. Moreover, the status of wave by wave observers is getting higher and higher. What follows is that they pay more and more attention to Zhang Fan.

"Zhang sang, do you want to be a professor at marukuo university?" One day after the operation, the director of the gastroenterology department of the Affiliated Hospital of Jingdong University hosted Zhang Fan.

Zhang Fan took pointed chopsticks and ate rice wrapped in laver skin. What he ate was quite painful, which meant that if he didn't taste, it would be cold. Moreover, the boss here claims that several generations have made this thing, and rice is specially provided. It is said that only a little land in the whole pill country can grow this kind of rice needed by others.

Zhang Fan looked at the doctors around him and was quite intoxicated with what he ate. He thought, "it's strange for a lump of rice to eat this expression."

"Hehe, professor? Forget it, I don't understand myself. What kind of Professor! " Zhang Fan certainly won't come here. He can't accept a lump of rice.

After three consecutive days of surgery, doctors in the gastrointestinal sector in Marubeni country exclaimed: the Qiu faction of China is now extending from the liver and gallbladder to the gastrointestinal tract. It looks like a wolf.

Although there are many gastrointestinal diseases in Marubeni, the strength of Marubeni is the first in terms of gastrointestinal in the world. The strength of medical treatment is not how big the building is, how high the building is, and how many beds there are. In the words of ordinary people, it depends on the curative effect.

Marubeni has the highest five-year survival rate of gastrointestinal cancer in the world, the lowest cancer mortality in the world and the highest patient tracking rate in the world. Olympus is a global monopoly.

How good is Olympus's endoscope? Let's say so. First of all, most people don't know what an endoscope is. In fact, it's like opening an eye on one finger.

How flexible the fingertip is, how flexible this thing is. In those years, researchers in Marubeni did not know where to get the inspiration. Anyway, no one in the world could surpass Marubeni under the three-way endoscope. How about Bangzi country? It seems that the endoscope of Bangzi country is OK when it is stuffed in. But once the electric knife generates hot gas, smoke and blood stains on the lens, the endoscope of Bangzi country is obviously not as good as that of other people's meatball country.

After three days of operation, although Zhang Fan did not completely conquer the gastrointestinal community of Marubeni, the gastrointestinal community of Marubeni has recognized Zhang Fan.

"Zhang sang, please prepare. There are two reports these two days. These two reports are related to our cooperation."

Jingdong's director personally explained to Zhang Fan.

"Two?"

"Yes, there are professionals and some appraisers from pharmaceutical enterprises. They will make a final summary of the operation and your report. The second scene is the bosses of some consortia. Although they are not professional, I still want you to popularize science to them in simple terms. After all, they are also gold owners. "

"Oh. OK. " Although Zhang Fan promised very happily, in fact, he was still a little nervous. This thing is not an operation. To be honest, Zhang Fan is not shy, but the report is different. Especially report to non professionals.

Not only to let people understand, but also to let people pay. This thing is too difficult. It's transparent. In fact, it's called Huyou! But how can we convince people? Zhang Fan wants Ouyang to help him.

Zhang Fan lost sleep on the third night of coming to marukuni!

.....

"What's the beauty of this ice and snow? It's better to be at home. Isn't there snow in the great frontier! There are few people here. Hey! Spend money and suffer. "

Shao Hua and Jing Shu were shocked by the snow scenery in Hokkaido. If the snow scenery in China's frontier is a desolate and magnificent Chinese landscape painting, Hokkaido is a sketch of the combination of China and the West. In particular, the snowy wooden houses on both sides of a highway and the flag sails swinging slightly in the wind seem to have a petty bourgeoisie mood.

The two young people had a good time, but the four old people were different. Especially Zhang Fan's father and father-in-law, the two old men were fooled.

In the past three days, Shao Hua and his colleagues were well received by the medical device company of Marubeni. Almost all the places to go are the essence of the meatball country. The food is also the best. What tuna, what hot spring and all kinds of sashimi can be said regardless of the cost.

On the fourth day, Zhang Fan didn't have an operation, because the operation has made everyone see. This morning, in the largest auditorium of Jingdong University, Zhang Fan gave a professional report to

insiders. People came to major hospitals and medical bodies.

Zhang Fan took a deep breath backstage after tidying up his navy blue suit and tie. Then after hearing the applause, at the prompt of the backstage staff, Zhang Fan took the manuscript to the stage.

At present, in the auditorium of thousands of people, most of them are middle-aged people, that is, there are some old people in the front row. There are few young people, because this is a professional report, and undergraduate students are not included.

The worst of them are doctors. Most of the others have made achievements in the field of Gastroenterology or are academic leaders of a department. At the beginning, the meatball country cooperated with the tea vegetable. The money was given and the people sent it. There is no need to say more about the equipment. Ouyang asked for the most advanced equipment in marubenia.

But at present, the cost of cooperation is not comparable to the results of cooperation. Originally, Marubeni felt that the cooperation would be suspended. Zhang Fan came and the three-day operation gave Marubeni people confidence again. It's not that other people's technology is not good, but that we haven't found the trick.

Therefore, now the gastrointestinal community in Marubeni has determined to continue cooperation and strengthen cooperation. Now, it depends on whether Zhang fan can convince these people, because these people decide the strength of cooperation.

After taking a deep breath and cheering himself up, Zhang Fan said, "the individualized treatment of gastrointestinal cancer and the importance of its promotion."

As soon as you open your mouth, the topic opens quite large. How to say the foreign language of Marubeni country? It's not good anyway, but people's translation is very poor. Zhang Fan made a report on the stage, and there were almost more than ten people doing simultaneous translation around the stage.

"Professor asamura of your country has given me a lot of inspiration in the field of Gastroenterology. Please let me pay tribute to him before the report begins!" With that, Zhang Fan left the microphone and bowed gently.

If you want to cheat and want money, don't talk about whether you are professional or not. First, make these people happy! This is a trick Zhang Fan learned from Ouyang.

Then, as soon as Zhang Fan's face was right, he began his report.

"Gastrointestinal tumors, in fact, are both unified and separated. We start with the stomach. The international standard for gastric tumors is divided into five levels and six grades. When a stomach tumor expands to the duodenum, it is not just a stomach tumor. It's a compound tumor.

The spread of tumor is nothing more than two kinds of metastasis, lymphatic metastasis and distant metastasis... "

Chapter 1138

Medical reports can't be reported by mouth alone. Now many medical scholars are making a slide show to convince these doctors and scholars that they can't convince the following people if they don't show their own painting skills. Uncle Zhou was despised by the anatomy teacher of MARUKI state, which led to Uncle Zhou's weariness of learning, but now it's different. Zhang Fan's painting skills are different. How many times are stuck at the key points in the system, Zhang Fan doesn't know how many anatomical drawings he drew.

Therefore, the Chinese doctors clearly told the Marubeni doctors that we also painted well.

A water brush, on the drawing board on the podium, Zhang Fan brushed a few times to draw the structure of the gastrointestinal tract " In fact, I'm better at using chalk! " When Zhang Fan's solution plan came out and everyone was still aftertaste, Zhang fan installed it slightly.

Because Zhang Fan's words are not only the overall gastrointestinal tract, but also the layered anatomical map. What is layering, not a single, not hot pot, like eating tripe, one mouthful, just say whether it is crisp or not. Because it's a report on cancer.

Zhang Fan has made a decomposition from the level of muscle tissue, the shape of blood vessels at all levels, the shape of nerves at all levels, and the deployment of lymph at all levels. There are too many people who can draw the whole gastrointestinal tract. Just pull out a top medical student in his senior four or five, who can draw a model for you.

However, Zhang Fan's is different. It can be said that he just enters the house directly. In fact, this is Zhang Fan's trick. His most powerful is surgery. What does surgery rely on, isn't it anatomy? If Zhang fan starts talking from the molecular genome embryo, it is estimated that it will be exposed.

Molecular genomic embryos do bluff people, and the ultimate cause of the disease can be found from the root, but Zhang fanpian is clinical.

"In tea element, our team, of course, includes doctors in China and experts and scholars in your country.

Here I will not repeat our current achievements one by one. I'm not here to show off. I'm here with a problem.

Now, let's look at the problems and puzzles our team is facing through these less comprehensive anatomical maps. I hope that when I understand my puzzles, all experts and scholars here can help me!
"

With a gentle word, Zhang Fan dispensed with the explanation from molecules, genes and embryos, and directly started from anatomy. Zhang Fan is not stupid. He comes to ask for money.

"At present, we can completely remove a single tumor, especially the tumor below the duodenum. Although the five-year survival rate cannot be determined at present, I can say without exaggeration that our team is world-class in terms of the postoperative survival rate of patients.

But in terms of compound tumors, what we lack is the same as the problems encountered by doctors all over the world. We can't completely remove them. First of all... "

Zhang Fan delayed the three-hour report originally planned. Because Zhang Fan not only aroused everyone's interest, but also asked questions in class, directly turning a report into a mutual defense meeting. Even let everyone discuss some problems in class.

The atmosphere was lively. The leader is not in vain. Zhang Fan's level of mobilizing the atmosphere is still OK.

"His level is very high! The operation was well done and his views on gastrointestinal tract were quite profound, but why did he mention the red deer? Don't we scholars in Jingdong circle have anyone he can pay tribute to? "

Asamura shangsheng, whom Zhang Fan paid tribute to, is a representative figure in the Japanese medical circle. Of course, it represents the Kansai circle. His staging of tumor and his translation of Western medicine can be said to be absolutely divine.

But people in Jingdong circle of Marubeni country look at other people's books, but they don't recognize other people's academic status. There is a posture of carrying bowls for dinner and putting down chopsticks to scold the cook. Moreover, Lao Qian is also quite oppressed in Marubeni. He is famous in the world, but he is excluded by the mainstream academic circle in Marubeni. It's strange.

"The main reason is that we intervened too late. I suggest that we should lead the cooperation with tea and not let the people in Kansai circle lead."

"Yes! You're in charge of this. I'll lobby the business director! "

"However, Kansai red deer has built a national severe respiratory department for tea..."

"We can build an endoscope Center for them!"

After listening to Zhang Fan's report, the two leaders of Jingdong decided to set up an endoscope Center for tea because of Zhang Fan's casual tribute. Zhang Fan didn't know, otherwise, it is estimated that Zhang Fan will die of joy.

"Our digestive department is the best. But Zhang Sang's research has given us great inspiration, and we decided to deepen cooperation with tea. "

After Zhang Fan's report, the Minister of JD medical department held a small symposium with Zhang Fan in person.

When the translator said that digestion was the best, the muscles on Zhang Fan's face didn't move. He not only didn't refute, but also kept nodding. Zhang Fan has the final say, he doesn't care what the other party talks about.

As long as you give me money, equipment and talents, you say you are the first in the universe. Zhang Fan will not refute, but will say with a thumbs up, yell West!

.....

"The cooperation is determined. Tomorrow, we should determine how deep the cooperation will be." When Zhang Fan returns to the hotel, he calls Ouyang.

"Good, good, good, you must pay attention to it. This is an opportunity. We must seize this opportunity and let them train us world-class digestive doctors and digestive laboratories. If time is not enough, I will go to the government and the boss to ask for leave. " Ouyang, a tea vegetable, was basking in the sun in the office, and the corners of his mouth turned up.

Can you be unhappy if you borrow a chicken to lay eggs!

"That should be enough. In the first three days, they cooperated with doctors in their major hospitals. In the next two days, they summarized and reported to professionals in the morning. The effect was OK. Tomorrow will be a little difficult! " Zhang Fan reports to professionals. To tell the truth, he is not timid at all.

Over and over, there are just a few problems. Besides, where the results of the operation are placed, it can be said that Zhang Fan has confidence.

But Zhang Fan is a little nervous about the non professional gold owners. He can't draw a few pictures

for a group of non professional gold owners, and then talk about how to do surgery. It also needs to be understood. As for Zhang Fan's report in the morning, most medical undergraduates can't understand it, let alone a group of non professionals.

"What's so hard about that!" Ouyang said discontentedly at the other end of the phone. It's like Zhang Fan didn't learn her skills well.

"Well! Tell me about it. " Zhang Fan is quite good in this regard, that is, humility.

"Put it in simple terms. If you don't understand it, first say what they care about most, and what the rich care about most, isn't it health? You talk about health first, then intersperse it with the international contribution of marubenia in gastrointestinal areas, and finally talk about our advantages. What a simple thing, I have to teach you! "

Zhang Fan really wants to say, why don't you come!

Although Ouyang's tone was not good, he still gave Zhang Fan some inspiration for his achievements. When facing professionals, Zhang Fan didn't look for information or go to a special drill. In the face of a group of non professionals, Zhang Fan had to work hard.

In the library of Jingdong University, the translator accompanied Zhang Fan in the library and sat late at night from noon.

The translator is a descendant of the second generation of marubenism from the three eastern cities of China. To tell you the truth, Chinese Americans in Marubeni are particularly difficult to mix. In their early years, China had a saying.

Most of the Chinese who immigrated to Australia became restaurant owners. Most of the Chinese who went to Jinmao Europe washed the dishes, while the Chinese who went to Marubeni often carried the bodies. Although a little exaggerated, it can also explain the cruelty of competition in Marubeni countries.

To be honest, it's a good job to be engaged in the translation of such high-end meetings. And quite dedicated, Zhang Fan needs what books, what she needs to translate, she can fix it for Zhang Fan at the first time, even if she is hungry, she doesn't say she's unhappy.

Although I held the Buddha's feet in a hurry, I didn't say that I was not happy when I was ready. Zhang Fan returned to the hotel and began the drill with half a day's achievements.

Or looking in the mirror, how to make the other party feel professional and how to make the other party feel reliable, all kinds of details should be considered.

"Shit, it's more difficult than asking for an account!" Zhang Fan practiced for a long time. It was early morning when he lay in bed. Before going to bed, Zhang Fan said to himself.

When he first sold instant noodles, some people were in arrears. When he asked for the bill, he felt it was very difficult. Now he knows that asking for the bill is as difficult as taking out other people's money.

In the morning, after Zhang Fan got up, he didn't know how to have some porridge. He couldn't eat rice every day. As a result, there was no porridge in the five-star hotel. Zhang Fan could only reluctantly drink some other people's laver soup.

The reporting place is Olympus Tokyo company. From the hotel to other people's companies, it can be said that Olympus has given Zhang Fan considerable face. Which country in the world knows China best? It is the pill country.

Pomp, the top crown, and the mounted police dispatched by Jingdong police department.

"Zhang sang, this car is the same model as the first car in our country. Our old president attaches great importance to your visit. He has not asked about the company for many years. This time, he specially came to Tokyo from his hometown!"

On the bus, the director of Olympus greeted Zhang Fan. The old man can speak Chinese. He speaks well, but he has a bad smell.

"You're welcome. You're welcome. I'm sorry to pay so much attention. " Zhang Fan said modestly.

At the beginning, Zhang Fan didn't pay much attention to the car. The old crown was eliminated in China. Unexpectedly, it was the boss's car in Marubeni.

Zhang Fan was not in the mood to observe more. While dealing with the director, he was repeatedly pondering his report in his mind.

Thanks to the system, Zhang Fan has the ability to roll around. Into Olympus. Rows of staff in black suits and white shirts greeted Zhang Fan at the door and bowed down.

Zhang Fan unexpectedly has a kind of society that wants to enter the tiger's den!

First of all, the old president of Olympus has a hunchback. Some people say this guy has a bit of royal blood. The old man warmly grabbed Zhang Fan's hand and took Zhang Fan into the auditorium.

As soon as Zhang Fan went in, he was a little confused. Almost all the people who came this time were old men and women, and even some old women came with pillows on their backs. Are you going to lie here when you're tired?

Zhang Fan knows that how much money he can carry back this time depends on the money paid by these old guys.

therefore

After entering the door, Zhang Fan's face smiled like a chrysanthemum.

Chapter 1139

It is said that Chinese people love face. In fact, other countries don't love face. However, the way of loving face is different, and the form of care is different.

In fact, the meatball country is the same, but it's really difficult for Zhang Fan to boast. It can't be said that your little movies are good. We Chinese men love to watch them. Especially after your well is empty, Chinese men say there is no more in the Jianghu

It's really difficult to boast about people's medical treatment and around the next three ways. When Zhang Fan was in the library, he wanted to call Ouyang. It's easy for you to say. Come on, you can boast.

The boast is a little deeper. These people don't understand it. The Chinese are conservative, and these old ladies in Marubeni are more conservative. It is said that the boss of the computer promotion association in Marubeni has never used a computer. Say tumor markers, say t, t, do they understand? Don't you understand?

But it's too difficult to boast around the next three ways and let others understand. It's not that Zhang Fan despises this country. To tell the truth, this country is wonderful. If you want ordinary people to understand, look at what they study.

It was only in 1997 that the scientists of Mishima clearly defined the composition and appearance of stool, and the scholars of MARUKI country improved a lot in this aspect. For example, the scholars of Mishima only determined the sausage type stool, and others MARUKI country explained the sausage type stool, such as the shape of sausage, but the bumps on the surface belong to the second category. Sausage shape with cracks on the surface and higher temperature than other stools will produce water vapor, belonging to the second category.

To tell you the truth, I was very proficient in the study of defecation. Then, in the pill country, there was the difference between fart and defecation to the brain, and then there was the emergence of brain gut axis. Zhang Fan doesn't know if he can make these old men and women happy and proud, but he is absolutely sure that he can make the old men and women vomit collectively.

Therefore, Zhang Fan decided to take the route of health care product merchants. This is nothing more than, I'll tell you what you want to hear, and then exaggerate some of them.

"In the warm winter sun, I have the honor to come to the beautiful meatball country! And have the opportunity to talk with you about the digestive tract. I think it's a very pleasant thing. " After Zhang Fan finished his opening remarks, the people below clapped their hands politely.

"The intestines are beautiful. Since ancient times, we have been exploring this beautiful garden until Olympus company in your country developed the clearest endoscope, which allowed our doctors to let our scientists see its beauty clearly for the first time.

In the ancient West, the word "gut" actually means intestines and viscera. There is another word in China, which further reflects that we Asians have long understood this truth and are worried about it.

If we generalize about the human body, in fact, the human body can be compared with three channels. Cardiovascular channels, nerve channels, and our beautiful digestive channels.

The cardiovascular system is like a monotonous drainage pipe, which is only divided into thickness, while the more boring nerves are only different from the top and bottom, while our digestive system is different. Starting from the mouth connecting the two centimeter open esophagus, it is our digestive channel.

Like a half moon stomach, a small intestine about 7 meters long, and a large intestine like a pearl necklace, this system is a symmetrical and asymmetric art. "

Zhang Fan's simple description gave the old men and women a general understanding of the digestive system.

At this time, some people who were not serious began to be serious, especially some old ladies who bowed their heads and chatted. They stopped chatting and began to listen to Zhang Fan's speech. Because what Zhang Fan said can not only make them understand, but also has a special image.

"In the next three hours, I will explain one by one around what our digestive tract needs, what kind of food, the intestinal flora, the new discovery of the brain gut axis, and the results of the joint scientific research of tea and Marubeni."

"Oh, the young doctor in China is so tall! You look healthy ~! " This venue is different from yesterday's venue. It doesn't matter whether Zhang Fanzhang is tall or short.

But today, especially the wives of some rich people, gather together to whisper gossip. Of course, Zhang Fan's wheat face is also considered to be a healthy body. They also feel very comfortable.

The old men are more concerned about what Zhang Fan said about health. Who is not afraid of death, the rich are more afraid of death!

"As we all know, the average life expectancy of Marubeni is the first in the world, but why do some people live so long? Safe social environment, reasonable diet and peaceful mentality are all very important factors.

But what is a reasonable diet? Now let me take you into the needs of the digestive tract. The most important stage of food digestion is in the small intestine. It is not only digestion, but also allergy, long-term lactic acid intolerance, and whether the intake of food is harmful to human health. "

How to make people feel interesting and bring private work is very difficult, really difficult. The old men and women in front of them are not only old, but also rich. It can be said that there may be experts with goods among them. For example, the world's largest wealth cult was invented by this country. Therefore, it is really difficult for Zhang Fan to fool them.

"To say digestion, we must first say intake. The main intake substances of the human body can be divided into three types: first, carbohydrates. 2、 Fat. 3、 Protein.

Carbohydrate is the easiest to digest, fat is the hardest to digest, and protein is between them. Therefore, when someone in your country is ill, his family will cook him a bowl of porridge instead of big fish and meat, which is good.

Many people always keep this good habit of fitness because they want to consume fat, but fat can't be digested, and it's not easy to consume. Many people work hard to keep fit, but they just can't lose weight. In fact, this is because fat is not consumed.

To what extent can you exercise before you start to consume fat. I'll teach you a little trick. When you exercise, why does your brain suddenly work so hard? This is the time to consume fat. This time is about an hour when you exercise.

The small intestine is responsible for digestion, while blood vessels and lymphatic vessels are responsible for transportation. Because fat is insoluble in water, blood vessels transport nutrients other than fat, such as amino acids. Fat is transported to the chylous duct of the heart through lymphatic vessels.

Fat, all the fat you eat, whether animal fat or vegetable oil, enters the heart rather than the liver first, so this is why people often have heart embolism and brain embolism.

Every time you eat a mouthful of poor oil, your heart and brain are at risk of being blocked. "

.....

"Oh, my God, so it is!" The old ladies carrying small pillows gently covered their cracked lips with their hands, as if they had seen something terrible.

Many people say that East Asians stand together and can't tell their nationality by their appearance. In fact, they can still be distinguished. For example, when they are surprised, the expressions of people in MARUKI country are more exaggerated. Their exaggeration is in their mouth, almost all of those in Bangzi country are in their eyes, and the small squint eyes suddenly become very big. Of course, the cut ones don't count. China is relatively calm. One by one, it pays attention to the fact that Mount Tai collapses in front without moving his mouth and eyes.

In three hours, Zhang fan can say that he has done his homework for the speech so carefully for the first time since his debut. In the past, whether it was sudden or not, Zhang Fan's speech had never done his homework, and the precipitation on weekdays was enough.

But today is different. What we want to say is vivid and interesting, and it also reflects the high essence in easy to understand. Obediently, Zhang Fan would be worried about baldness if he didn't have more hair.

But the effect is still good.

Zhang Fan mainly started from a small point, and then slowly pulled further and further, moving closer and closer to the tumor direction of cooperation between tea and Marubeni countries.

"However, no matter how well you maintain your health, there is a bomb in your genetic code, intestinal tumor!

When Olympus's great cross era invention appeared, mankind knew for the first time why polyps would become cancerous... "

Originally, Zhang Fan thought that the third stage might be boring, because he entered the field of cooperation between tea and pill countries. This field mainly talked about how to remove tumors, how to remove tumors completely and with little damage, and then he had to study how to prolong the postoperative survival of tumor patients and how to avoid intestinal tumors.

To be honest, this piece is really boring, all kinds of data, all kinds of conditions. Unexpectedly, when Zhang Fan talked about this, the old men became more and more serious.

Zhang Fan looked at the people off the court, "mother, money is not money for no reason!"

Three hours of continuous speech, but also loud voice and clear enunciation. Although the people under the stage have an interpreter, they can speak vaguely, which will make people feel powerless.

Therefore, Zhang Fan's body language from beginning to end is quite rich.

"My voice is on fire. It's much more tiring than three hours of surgery! " After getting off the podium, Zhang Fan asked his interpreter, "what's the effect?"

"Dr. Zhang, the effect is very good. It is estimated that it can meet your expectations this time. Please give me more advice later! " The translator looked at Zhang Fan shyly as he spoke.

In recent days, the girl is very dedicated and professional. Suddenly, please give me some advice. Zhang Fan feels something is wrong.

"Well! Is it... Do I look like nanbatian and bully men and women? " He suddenly remembered the office culture of Marubeni.

"The company has decided to let me follow the second batch of experts to stay as their full-time translator. So, please give me more advice in the days to come! "

Then he bowed!

"Oh!" Zhang Fan is happy and a little small

Chapter 1140

"President Zhang not only did a good operation, but also gave a wonderful speech. He has a strong personal charm!" Professor Jingdong, who accompanied Zhang Fan from chasu, found Zhang Fan backstage. After repeatedly confirming that the other party was not ridiculed, Zhang Fan readily accepted the other party's praise.

"Not enough preparation, not enough preparation. There's no big mistake." Zhang Fan said to the middle-aged man with a smile.

In the past, Zhang Fan never believed in any language genius. He thought it was chicken soup. What old horse learned maozi language in a week, and Lao Yang knew seven or eight languages. He thought it was all used by the teacher to fool the students.

But the one in front of him completely let Zhang Fan know that there is really a language genius in the world. For example, after half a year's tea life, this one can communicate in Chinese without stumbling, and even can speak a little Kazakh, which surprised Zhang Fan who has a headache in German and English.

"Already very good." The Jingdong professor smiled.

"Has the cooperation amount been determined and how much?" To tell the truth, Zhang Fan has no pursuit for the wind review in Marubeni country. Anyway, he won't come here. Even if Hua guote Niang is no longer good, her own country is not.

"Well!" Zhang Fan asked naked, which made the scholar a little embarrassed " After all, it is a professional cooperation, which has not been determined yet. But don't worry, as long as I'm sure, I'll inform you as soon as possible! "

"All right! I'm worried. "

Zhang Fan is also a little embarrassed. In recent years, Ouyang has a sense of urgency. The old lady indoctrinated Zhang fan that any hospital will be eliminated if it does not develop, and how many beds there are in any other hospital. What? The number of beds in the third class a hospital in Nanhe is several times that of us. You should work hard. You can't let the tea vegetable hospital be lonely in your hands.

It's like Zhang Fan became the last emperor.

"What's next?" It's only five days in a week. There are still two days left. Zhang Fan thought that these guys wouldn't take me on a tour.

"Zhang sang has worked hard this time, and your family has returned to Tokyo. We'll send someone to take you on a good tour in Jingdong these two days."

"Oh, that's it!"

Back to the hotel, Jingshu and Shaohua chattered together " How was your trip? " Zhang Fan smiles and wants to touch Jing Shu's head. As a result, people are now grown up and begin to dislike Zhang Fan for messing up her hairstyle.

"What are you doing..." Lao Tzu Zhang Fan was about to complain. His mother twisted the thigh meat. The painful old man couldn't speak.

"Well, I ate well, slept well, watched the snow and visited the temple. All the monks here can marry a daughter-in-law! " Zhang Fan's mother and mother-in-law smiled and said to Zhang Fan.

"What's good. Eat fish slices every day, either cold or raw. What's good about sleeping on a hard board bed?" Lao Tzu Zhang Fan and his father-in-law are probably muttering.

"That's good, that's good. I don't care about you. I'm worried that you don't have a good time. Today and tomorrow, I'm liberated. They sent a car and we went to visit the big cities of Marubeni. "

As a result, the old men and women didn't go.

There is no way. Zhang Fan sets out with Shaohua and his sister Jingshu.

"Wow, look, look, the green plants and flowers on the roadside are so neat." It is estimated that they are willing to go abroad. Shaohua and Jingshu feel very novel about many things.

"An old man of this age is still working!" Jingshu looked at the old man who helped command at the door of the mall and said to her brother.

Marubeni, what do you say about this country. It is absolutely world-class in fine places. In Chinese words, it is an expert in the Taoist temple in the shell of a snail. They can't do without admiration for their ability in small details and operation.

For example, in medical, their R & D efforts in high-precision end are absolutely no less than some countries in Europe and America, but big breakthroughs can never surpass Europe and America, but they are absolutely first-class in improving the existing technology.

Why can they be the first in the world. There will be earthquakes and tsunamis in this place. Are there volcanoes. Why can you live so old? This is a basic medical treatment.

In terms of basic medical care, people are different from China. They don't require you to engage in scientific research, but they require you to have the spirit of craftsmanship. For example, you are engaged in tuberculosis. I don't need you to invent or study any specific drugs for tuberculosis.

But I ask you to play with the technology and drugs that have been developed for this disease. Therefore, when China first put forward the relationship between diabetes and tuberculosis, when the Chinese side did not act, people began to study the combination of diabetes drugs and tuberculosis drugs to kill *Mycobacterium tuberculosis*.

Therefore, in terms of basic medical care, Marubeni has a particularly strong capital. But at the high end, they began to lose strength. What do you say about medical treatment. The foundation requires you to have the spirit of craftsman, and each needle and knife should be tempered in perfect harmony.

But when it comes to high precision, there must be innovation. This is a little difficult, so some people

say that Chinese people stand higher and look farther than Marubeni people.

"Wow, cosmetics. Kao's is very good. Buy some for your Dean and some for your vice dean!" Shaohua and Jingshu said to Zhang Fan as they looked.

"How old is she and still uses cosmetics?" Shaohua and Jingshu accompanied Zhang Fan, otherwise Zhang Fan would never want to buy some souvenirs for the old lady.

"You're floating! Can't women maintain when they are old?" Shaohua's little tiger teeth are exposed.

"Well, you have teeth, you has the final say!" Zhang Fan smiled and didn't argue.

After the two women bought a lot of garbage that seemed useless to Zhang Fan, thanks to someone's company, otherwise they would have to go back to the hotel.

"President Zhang, the president is calling to invite you to dinner tomorrow." The female translator came to Zhang Fan with the phone.

"Oh, what's wrong with his son again? No!" Zhang Fan said in wonder, because two million has been given, in general, there will be no more contact. After all, Zhang fan can't be a family doctor for him.

Moreover, their base camp is in MARUKI, not in China.

"No, the president's child is recovering very well. Because you are busy these days, I didn't bother you. I heard that you are free. Let me ask you if you have time!"

"Oh, eat. You must have time to eat."

Zhang Fan thought about it and agreed.

.....

"Brother, what level is this president?"

Jingshu asks Zhang Fan curiously.

"Don't be a financial fan. The president is estimated to be at the level of Lao Wang in China!"

Zhang Fan casually thought about it and said casually that he didn't know whether he was at the level of Lao Wang, but what Zhang Fan knew was that this man was really rich.
