

Chapter 1461

There are not many directors in the era of tea vegetable hospital and Ouyang. The former president and director either applied for transfer or were rushed to other hospitals such as China Hospital by Ouyang.

At present, the only remaining ones are urinary Lao Li and infectious Lao Huang. Huang and Ouyang did not pay, but they had the ability. The preliminary discussion of the treatment plan after diabetes combined with tuberculosis was made by others.

A few decades ago, when there was nothing, people could have this vision. It was skilled, but it was not just housewives who knitted sweaters at the Council meeting.

The man is skilled, but he has a bad temper. For others, such as Lao Zheng, deputy director of the infectious diseases department, although he also suspected Zhang fan that this was nonsense, he would pretend not to understand and play with Zhang Fan.

If Lao Chen is replaced, it is directly what Zhang Fan says. Not only to play with, but also to expand. How to say this? Lao Chen and Wang Hong are actually the same kind of people. They are capable bureaucrats. When they meet good leaders who can do things, they can exert great positive energy.

There is a bad leader. They are accomplices. Of course, Lao Chen's position is much higher than that of Wang Hong. Lao Chen can make the leaders have a sense of dependence. For example, when the leaders need to be angry and are embarrassed to be angry, he will show his teeth at the first time.

But I will not be angry for the leaders on my own. This is the difference between Wang Hong and Lao Chen. Although there is a little difference, some people can't understand it all their life. When they suffer a loss, they are still wronged. I'm all for the leaders. Why should the leaders punish me? I don't understand.

Director Huang looked at Zhang Fan. Zhang Fan gave a positive look. If Ouyang said this, Lao Huang would believe it. After all, Ouyang is a physician. Now a butcher with a knife says he has some ideas about tuberculosis.

Think of an egg!

As soon as Lao Zheng, the deputy director, saw it, he knew that his leader was not happy. It was a great pity in his heart, "Hey, even if we were fooling around, we would accompany him for two days. It's not good to fool some equipment and some bonuses from him!"

Director Huang doesn't fool around with Zhang Fan. She's afraid that Zhang Fan will ruin her reputation for half of her life.

"Zhang Yuan, the scientific research of the Department of infectious diseases can't just get a laboratory. This can be regarded as a biochemical laboratory, and the worst safety level is P2. If you have ideas about tuberculosis, Zhang Yuan is very expensive. There is no P3 level laboratory, and I guess the tea government won't agree with you!"

Zhang Fan has a toothache when he is looked at by director Huang, but in the technical unit, he has to talk about technology. You can't say I'm the dean. I order you to think I'm awesome. Nima isn't talking about work. She's here to show off.

In the past, when Zhang Fan was unknown, he pulled old man Lu's tiger skin for a long time. It's hard to say in some big cities in the capital mordu, but it's easy to work in the small border town of tainima. But now when we talk about tuberculosis, this thing is a medical department. It's useless to pull the flag of old man Lu. Even if Zhang Fan is now the boss of the Ministry of health, people should not believe it or not.

Now they are the dean and let the old lady laugh like this. Zhang Fan is really ashamed. It's hard to scabbard a knife!

"You don't have to worry about the equipment and laboratory. Isn't it money? Although the hospital is not rich now, it still has the cost of getting a P3 laboratory!"

Look at Zhang Fan!

Wang Hong thought, "the president is the president, atmospheric and domineering!"

Director Huang's heart clattered: "silly boy, can't it be true!"

As for other people, for example, director Zheng said in his heart: it's too much!

Some equipment is useless for the hospital. For example, the P3 level biochemical laboratory has no good project. The annual maintenance cost can bankrupt a smaller hospital. Director Huang is still sentimental. She is afraid to rush to get a laboratory out and put it there as a sample.

"In fact, our foundation is not good, and the personnel software can't come up, even if there is a laboratory..." it's director Huang's turn to worry. It's really necessary to put a P3 level laboratory here as a decoration. NIMA herself has become a sinner.

Zhang Fan smiled in his heart, "digestive medicine is now involved in the scientific research of Marubeni. It goes without saying that respiratory medicine. The ICU of other departments is better than the general ICU of our hospital.

I can't eat my old capital. The most brilliant time of the infectious diseases department was the paper you sent by director Huang 20 years ago. Even now, your treatment plan should be mentioned in the treatment guide, but now, is your debut the peak, but this peak is too short!

Look at what you have done in the past few years. The hospital affairs meeting is a big sweater, and the strange words satirize the leaders of the hospital. It doesn't look like director Huang in those years. Now I have some ideas. Although I'm immature, I'm also worried.

Comrades, director Huang was brilliant in those years, but now I'm really worried in my heart! Money is nothing. As long as you have confidence and motivation, I can create conditions for you. "

Zhang Fan smiled as if he were chatting with friends, putting up Mrs. Huang's choking hair.

The doctors of the Department of infectious diseases stood aside and wanted to laugh. They didn't dare to laugh. They choked very hard. Seeing that the old lady is going to pat the table, she is angry. Zhang Fan immediately turned around. After all, people have no credit and hard work. It's really angry. Where can Zhang Fan go to find the director of the infectious diseases department.

"Of course, the hospital owes money to the infectious diseases department in the direction of development in recent years. I apologize to you. It's not too late. What do you say, director Huang."

"Really?"

"You think I'm kidding?"

"Yes!" Wang Hong said more. Zhang Fan and director Huang looked at each other at the same time, as if to say, what's the matter with you here!

Wang Hong rolled her eyes wrongfully. She didn't know that if she hadn't flinched today, Zhang Fan would have taken her away if she went back.

"We don't even have an ordinary experimental team. We haven't done scientific research since we entered the hospital. I don't have an opinion on you, Zhang Yuan. It's really a little sudden. You said you were fine. How did you think of the infectious diseases department?"

Zhang Fan is also helpless. He also wants to choose a more valuable project, but NIMA tea vegetable hospital can't do it at present.

"OK, let me tell you first. If you have ideas, you can come to me in the office in private. As for the equipment laboratory, you don't have to worry about it."

Zhang Fan then got up and took people away.

There was silence in the infectious diseases office. Not surprised that director Huang was subdued by Zhang Fan, but because of Zhang Fan's words, he went to find him privately.

To tell the truth, many people want to be salted fish, but many don't want to be salted fish. If some people in a department don't want to be salted fish, others can't be salted fish.

Although Zhang Fankou doesn't deduct at all for doctors, others don't say. It depends on the salary of this half a year and the red Audi of Bayin young woman. Who is not jealous.

.....

"Where's President Chen?" when he returned to the office, Zhang fanxin was refreshing and ready to drink some tea. To tell the truth, Zhang Fan was still very happy to convince director Huang today.

"Chen Yuan has gone to get the science and education building. What can I do for you..." Wang Hong thinks that she can do what old Chen can do.

"Ha ha, we should keep a calm mind. Taking the initiative to work is an advantage, but we can't be too impatient." Zhang Fan said to Wang Hong with a smile. Whether she can cover up depends on her nature. Today, Wang Hong's image to Zhang Fan in the infectious diseases department is very good, so she plans to make some suggestions.

As soon as Wang Hong heard this, she was not stupid. She was not only stupid but also a thief. Otherwise, a new girl who was admitted to the hospital could play with a group of male doctors like her younger brother. Hearing Zhang Fan say so, she took a panic on her face and hurriedly said, "I'm going to ask Chen Yuan now."

Out of the door, he changed his face and smiled like a fox.

"Zhang Yuan!" after a while, the ashen old Chen came to the office.

"Why do you work yourself? Sit down, sit down, drink some tea and warm up."

Old Chen smiled, drank a sip of tea and said, "my heart is hot. In the past, we couldn't even recruit an intern here. Now there are 200 people coming to the internship at one time, including teachers and professors. Can you not be excited?"

"Hehe, it will be fine! Can you spare time?"

Zhang Fan smiled. This is high-end flattery. Zhang Fanming knows that Lao Chen deliberately did it, but he is still very proud.

"Yes, as long as I don't travel, I can't delay the affairs of the science and education building. Zhang Yuan, what do you want me to do?"

"Well, doesn't Siemens have an equipment joint venture in the high tech Zone? Take the time to ask if you can donate a P3 or P4 biological laboratory to us."

Lao Chen nodded, "OK, Zhang Yuan, I'll go now."

Lao Chen really doesn't understand this. Zhang Fan actually asks Lao Chen to try water. If not, the tea vegetable hospital still has to pay.

Because it costs a lot of money. There are no P3 level laboratories in the northwest, and there are only about 1000 reported by Jinmao. As for P4, Zhang Fan actually means asking too much.

These days, He Chuan is super busy. When he came to the tea plant, he didn't think about what he could do in the future. He was ready. If the tea plant hospital dismissed him, he would go to a nursing school and other specialized schools to be a teacher.

I didn't expect that the road is turning now. I don't have to be a kindergarten teacher when I have nothing to do for a day. "Training plan for interns" He Chuan looked at the plans he had made all night and was very grateful to Zhang Fan.

The first heavy snow of tea vegetable came a little earlier than in previous years. The vast expanse of white in the city is not only whether the hospital is full, but also the people in tea vegetable area have entered the winter cat season.

Shao Hua asked Wang Yanan and Jia SuYue to eat hot pot and called Zhang Fan. Zhang Fan was reading He Chuan's plan. He didn't want to go, but Shao Hua didn't agree. Zhang Fan said he would go later.

Shaohua never interfered with Zhang Fan's work before. Since Zhang Fan was unconscious once, Shaohua is now afraid, so if possible, she is trying to find a way not to let Zhang Fan work overtime. My husband doesn't feel bad about himself. Who does.

In winter, the goose head of tea vegetable has a very hot business. Shaohua booked a small private room early. The first one to arrive is Princess Jia. Her long boots are like red lips after drinking human blood. After taking off her down jacket, the white cashmere sweater can't cover the two fat brothers who are about to come out.

Chapter 1462

For eating out, to tell the truth, Zhang Fan doesn't like it very much. He has passed the state of holding the wall in and out when eating the buffet. If he really wants to go to dinner, he will queue up to invite Zhang Fan's various drug dealers and equipment manufacturers, one a day, and it is estimated that he can eat for several years.

"Hello!" Zhang Fan, with a report in his hand, called and saw that it was Shaohua's.

"Where have you been, the dishes will be served." now Shaohua is deeply afraid that Zhang Fan's body can't stand it. He really gave full play to all his ways to prevent Zhang Fan from working overtime.

"Right away, right away!" Zhang Fan said shyly. "Take Wang Yanan, too. She's still in the Department when I just called." Shaohua guessed that Zhang Fan hasn't been out of the hospital yet.

"Good!" Zhang Fan saw that he could not continue his work. He put down the report and strolled to the surgery building. After work, the doctors and nurses came down from the building one by one.

Male doctors are better. Most of them are black down coats or gray coats. The young nurses are different. They took off their white coats and just took a bath in the Department. Piles of flowers and fragrance smell like going to work from the bath center. They can't see it at ordinary times. Now they are stunned to set off the tea vegetable hospital, like what the world is.

"Zhang Yuan!"

"Zhang Yuanhao!"

Zhang Fan smiled and nodded in response.

"Zhang Yuan, what's the new year's issue this year? There's a new generation of fruit without mouth." and the group of nurses who went to the hospital with Zhang Fan were particularly familiar with him and spoke more relaxed.

When Zhang Fan first became the Dean, the directors talked more relaxed. Slowly, now, the little nurse, the little doctor and Zhang Fan talked very easily. On the contrary, the directors and deputy directors became more and more serious in the face of Zhang Fan.

In the past, there were directors who dared to call president Zhang. Now try it. The black buying of nurses has been going on all the time.

"Go home and nurse the children, and think of good things all day!" Zhang Fan smiled and sent the young women away. The young girls in those years are now married and have children. Their willow waist is now plump.

After entering the trauma orthopedic ward, Zhang Fan looked. The number of patients was OK. Most of them were injured by falling.

Every winter, there is a sharp increase in the number of patients in cardiovascular, respiratory and trauma orthopedics. Zhang Fan slowly passed by several wards and was about to call Wang Yanan. As a result, Zhang Fan turned and pretended to leave.

As a result, a nurse caught the thief, "Zhang Yuan! Dr. Wang, Dr. Wang, Zhang Yuan came to the Department!"

I don't know what their head nurse explained. Zhang Fan was like a caught mouse in an instant. Embarrassed to turn around, Zhang Fan didn't see Wang Yanan avoid, but turned around to avoid after seeing LV Shuyan.

It turned out that a pregnant woman in the trauma department fell and was injured. Wang Yanan asked for gynecological consultation. After LV Shuyan's operation, she saw that she was off work. She was embarrassed to let other doctors go, so she came by herself. She is now responsible for the teaching, scientific research and routine daily work of all doctors below the Deputy High School of gynecology.

As soon as they came out of the ward, LV Shuyan explained some things and said that after the orthopedics department handled the fracture, they would transfer to their gynecology department. As a result, they heard the little nurse shouting in surprise. As soon as they saw that Zhang Fan was half inclined, they didn't know whether to go or come.

"You didn't get off work!" Zhang Fan smiled and asked the little nurse to be busy, then looked at the two people and said hello.

If Zhang fanzha were a little, he would never have such a heart of debt. Now Zhang Fan always feels like a thief and can't deal with LV Shuyan easily.

Lv Shu looked at Zhang Fan with a white face and whispered: is the boss so cheeky? ask while knowing the answer. Wang Yanan has a thick nerve, otherwise he will definitely think about it in his mind.

"Come and pick me up. Wait a minute. I'll finish talking to director Lu and let's go." Wang Yanan smiled foolishly at Zhang Fan.

Now, although LV Shuyan is not the director, the doctors will politely shout director Lv. This title is not a joke. Everyone knows that as long as there is no big accident, the next director of gynecology may be LV Shuyan.

"Where are you going?" Lu Shuyan asked curiously.

"Go to eat hot pot. Are you going? It's so cold now. It's fun to eat spicy goose hot pot!"

"Er!" Lv Shuyan looked at Wang Yanan and Zhang Fan.

At first glance, she wanted to go, but she just didn't speak, as if she was very embarrassed.

Zhang Fan's head is big. Isn't NIMA looking for trouble? He glanced at Wang Yanan. But at a glance, "that's right. Shaohua is greedy today. Are you on duty? If you're not on duty, go."

"I'm not on duty, is it convenient?" after Zhang Fan's invitation, LV Shuyan asked Zhang Fan innocently with big eyes.

"NIMA! Playboy!" Zhang Fan scolded in his heart, but he said well: "it's okay, it's okay, just more chopsticks. It's not convenient."

Life is so helpless. Opening your eyes and telling lies are the basic skills of people in the workplace.

"Let's go and change quickly. I haven't eaten spicy goose for a long time!" Wang Yanan urged LV Shuyan.

"OK, I'll drive and wait for you downstairs." Zhang Fan said and turned away.

After getting on the bus, Zhang Fan thought a little and sent a message to Shaohua, "Wang Ya has a lot of men's affairs. She invited LV Shuyan, a gynecologist. You women are boring for me to go alone. If you don't go to eat, I'll forget it."

Believe it or not, Zhang Fan believes in himself, but he also has to take care of Shaohua's mood. "Ouch, what's the matter with many people? You're stingy. I brought Luko and Zhu Ke here. Last time people came to see you, and asked us to eat several times. You're too busy to get away.

Although it was a little hasty today, Zhu Ke's relationship doesn't care about this etiquette. Come quickly. "

As soon as Zhang Fan listened, he understood that Shaohua understood him.

This is reassuring. Don't you protect several people around you in your life and make several people around you happy. If you ask Zhang Fan to save the world, he doesn't have the ability to make the people he cares about happy safely. That's enough.

Lu Renjia has a good father. Zhu Bing is a burden in their family. The house of Zhu Bing's unit was empty and didn't live there. The couple had been at the father-in-law's house and wanted to move out, but the old road wouldn't let them.

At the beginning, Lao Lu didn't like Zhu Bing. He was also a department level cadre. He had a lot of opinions about Zhu Bing, a small family without parents. But with his life in the past two years, Lao Lu found Zhu Bing very nice.

But then again, even if people can't, NIMA has children, and she can only recognize them by biting her teeth. Zhu Bing's career has been very smooth in recent years. Now he is the deputy director of the municipal port management office.

When Shaohua called, Lu Renjia and his wife were going to have dinner with Director Tang. It happened that the two teams made a pair, and director Tang came together.

Tang Jingjing, the Secretary of the female leader of quark in those years, later went to China Merchants. Now he is the deputy director of the high tech Zone. This guy has a smoother career than her previous leaders.

She and Zhang fan can't be familiar anymore, but now everyone is busy. Usually, they just call and greet each other occasionally. They haven't seen each other for more than a year.

After waiting for a long time, Zhang Fan thought whether the two women had gone to surgery. He couldn't help but go up and have a look. When they came down with their arms.

"If you don't come again, you'll starve to death in the car." Zhang Fan complained.

"All right, all right, let's go. Shaohua has urged several times." Wang Yanan got on the bus and sat on the co pilot, urging Zhang Fan to drive. At this time, she was worried.

"Leader, you say what car I buy is better." when I got on the car, Wang Yanan touched it here and there. Wang Yanan called Master Zhang Fan in the office. When he left the hospital, he changed from a docile apprentice to a grinning woman.

That is LV Shuyan. Otherwise, Zhang Fanchang and Zhang fanduan would have shouted.

"According to Director Wang's level, you have to buy seven or eight hundred thousand!" Zhang Fan said. In fact, what he thought was: if you don't even have a driver's license, you have to buy a car!

In the past two years, to tell the truth, not only Zhang Fan is tired, but the younger generation of tea vegetable hospital is not easy. For example, Wang Yanan likes cars very much. When she first saw Zhang fan driving, she couldn't help getting started.

But she really didn't have time to learn her driver's license. After almost a year of study in shuitanzi, the

capital, she came back and increased her horsepower. Now the hospital requires young doctors to read more papers and make more ideas on scientific research.

So, so far, she doesn't even have a driver's license.

"I also want to buy one. Do you have a driver's license?" Lv Shuyan asked Wang Yanan in the back row.

Although they have been busy in the past two years, their income is also high. Although the two girls seem to work for a short time, they still have no problem buying an Audi since Zhang Fan raised his salary.

This is also the chaos of war in the hospital after Zhang Fan fell in the hospital, because everyone knows that if Zhang Fan really has an accident, the hospital will return to the prototype soon.

At the goose head, Zhang Fan sees Zhu Bing, who is slightly fat, smoking at the door of the store alone. "Oh, how can you let the leaders wait!" Zhang Fan said hello to Zhu Bing with a smile after stopping the car.

Wang Yanan LV Shuyan and Zhu Bing were not very familiar, so they said hello, "fast forward, fast forward, wanlihesan box, they are waiting for you."

Frontier people have a good face. A hot pot shop has huge box names. Wang Yanan and LV Shuyan go in, and Zhang Fan wants to follow in. As a result, Zhu Bing pulled aside to talk.

"Enough milk can't serve you like this. Look at you. When we received the award, you were still strong. Now your stomach is hanging on the belt."

"You're bullshit. My daughter-in-law is too thin to eat and I have to buy milk powder. You fainted and scared me to death a few days ago. Are you okay?"

"Nothing, just too tired." they talked for a few words. Although they were not in touch, they had experienced life and death together. Zhu Bing was still very interested in Zhang Fan.

Before long, Shaohua came out, "Oh, have you finished smoking? We're all waiting for you two. You two are also interesting."

"Come, come."

Zhu Bing walked in front. Shaohua took the time to clean up Zhang Fan's shirt collar. "Director Tang is also here!"

Chapter 1463

The atmosphere in the box is quite good. Wang Yanan sat with LV Shuyan and Jia SuYue on one side, while Lu Renjia and Tang Jingjing sat on the other side. Their middle position was reserved for Shaohua. It can also be regarded as the unmarried group and the married family.

When they saw Zhang Fan enter the box, the three girls in the unmarried group seemed not to see it, while Tang Jingjing and Lu Renjia stood up, "Zhang Yuan, looks very good. I scared Shaohua last time, and now everything looks very good! I collected some snow lotus last time, and someone will send it to you later."

Tang Jingjing said to Zhang Fan with a smile. Among these people, except Zhang Fan, she has a high position. "Thank you, director Tang. The road section chief sat down quickly. I haven't seen you for a long time. I'm usually busy. Shaohua said he would invite you to dinner."

Zhang Fan stretched out his hand and let everyone sit down. After a few greetings, Tang Jingjing quietly asked Zhang Fan, "what orders have you given to the enterprises in the high tech Zone? Today, we called the enterprise leaders of the high tech Zone for a meeting. The leaders of several equipment enterprises came to the meeting as deputies.

When I came home from work, the high tech Zone was still brightly lit. "

After hearing Tang Jingjing's words, Zhang Fan said in wonder, "no!"

Tang Jingjing looked at Zhang Fan, who was a masseuse all over the world at that time, and felt a slight sigh in her heart. She was not only a secretary, but also made great efforts at home. As a result, she was still not as good as others. Looking at the young Zhang Fan and thinking about her current position, zhennima felt powerless.

What makes Tang Jingjing envy is that although she is a deputy of the high tech Zone, she has no way to see her voice in the face of these international enterprises. Sometimes she wants to communicate with these enterprises and even needs to speak through the boss of tea vegetable to be valued.

But take a look at this man. In a word, who dares to listen to the pharmaceutical enterprises and equipment enterprises in the whole high tech Zone.

Especially after the big order of desert country was smashed down, these enterprises felt that they had become affiliated enterprises of tea vegetable hospital. Sometimes when I think about the faces of those enterprise bosses, she wants Zhang Fan to take her on an inspection tour.

When Zhang Fan and others were having dinner, the high tech Zone worked overtime for a meeting all night. At noon, after Lao Chen went to the high tech Zone, the vice president of tea vegetable area of Siemens received Lao Chen. In the past, these international enterprises had only agency points and no branches in the northwest.

Now, the northwest head office has been established directly in Chasu. Although it is an enterprise, people also pay attention to equality. If Zhang Fan comes to the door, the boss must come forward in person. Lao Chen comes, that is, the vice president.

When Lao Chen said he wanted a P4 laboratory, the vice president was almost laughed at. Zhang Fan said it was P3, preferably P4. Lao Chen didn't say P3 directly when he came to the door. He knew that if he said P3, it would be P2, so he wanted a P4 when he came to the door.

The vice president couldn't help driving Lao Chen out. After a few words sent Lao Chen off, he sat in the office angry. He felt that the tea vegetable hospital was a little too much, thinking and sulking.

Lao Chen felt that he didn't say well, but Siemens couldn't, and so could others. One noon, Lao Chen turned several enterprises in the high tech Zone, and the effect was not very good.

This time, Lao Chen thought it didn't matter. Soon after, the enterprises in the high tech Zone blew up. At the beginning, everyone thought that Zhang Fan of tea vegetable hospital was crazy. Instead of P4, he said P3. At present, there are accompanying cities in the northwest of China.

There are no three rivers and Xihua. As for P4, is NIMA kidding! Because this thing does not say anything else, just a protective measure makes some countries dare not think. For example, P4 level protection should achieve air level. NIMA is piled up with piles of real gold and silver.

However, after Lao Chen transferred to the enterprises in the high-tech zone, some people paid attention to it, such as the boss of Meryton, and directly started a meeting, "what do they want to do in the tea vegetable hospital?"

The vice president thought that his leader was not satisfied with the tea vegetable hospital and said without thinking, "I just think the enterprise has settled down and can be slaughtered now! I suggest reporting to the headquarters. Let the headquarters send a letter to their hospital. Don't think we are easy to mess with!"

Looking at this deputy, the boss is big. NIMA is the man's brother-in-law. How did she get to the level of manager.

But on second thought, there is such a vice president. Isn't he more relaxed? He smiled on his face, didn't say a word to the vice president, and then said to his technical director, "has tea Su made any big

moves recently?"

The technical director thought for a moment and said, "the male antiemetic has entered the third stage of clinical practice. At present, he doesn't know much about allogeneic skin transplantation, but it has been formed according to the conventional estimation. Others don't seem to have heard. The director of their pharmacy department was invited to dinner last time, and he didn't say that their Dean made a big move.

But some time ago, the flu of tea element was more serious. Do they want to study the flu? But the internal medicine and virology of tea element are very general. "

The technical director is very polite! If Zhang Fan heard it, he would probably cry silently.

"It's strange. What does Zhang Yuan want for no reason?" the boss wondered. The vice president wanted to speak, but the boss motioned with his hand and didn't let the man speak.

"No, you're wrong. Do you think the leaders of tea vegetable hospital have come to our unit? Don't say they come by themselves. It's easy for us to invite others. This time, we still come to the vice president in charge of general affairs. We should pay attention to this matter. I still have to ask Zhang Yuan in person, otherwise I'm not at ease!"

"But will the headquarters pass a P4?" the vice president felt that he wanted to show his sense of existence.

"Hehe, let's talk first. If we can make a male antiemetic, do you think the headquarters will agree?"

.....

People in the mainland may not realize the heavy snow, just like the human body in the frontier will not see the rainstorm in typhoon days. Outside the house, palm sized snowflakes are floating, and inside the house, the heat is diffuse. In the big pot, the goose is stewed with frontier red pepper.

After a mouthful of goose with rich soup, the heat emitted by protein and pepper are slightly smoked. The pores on the body feel relaxed, wipe off the sweat on the forehead, and then drink the clear soup with coriander. It's really very comfortable.

This may be the beauty of winter!

Zhang Fan, Wang Yanan and LV Shuyan don't drink. Shaohua doesn't drink because of the mountain closure for afforestation. Lu Renjia doesn't drink when she wants to milk her children. Zhu Bing can only drink some red wine with Tang Jingjing and Jia SuYue.

Before long, Zhang Fan's phone began to ring.

On the phone after work, Zhang Fan feels hard to say. Shaohua is often frightened. "Zhang Yuan, don't bother!"

"No, no, no, what's the matter with President Li?" Zhang Fan put down his chopsticks and asked as soon as he saw that Meryton was responsible for tea.

Zhang Fan comforted Shaohua with his eyes, not an emergency operation!

Shaohua is relieved.

Just put down the phone and it came again. Zhang Fan reluctantly gave everyone a sorry smile.

"I can't eat peacefully!" Jia SuYue crooked his mouth.

"No, no, I'm having dinner at the goose leader! In fact, it's not a big thing. I'm a little interested in TB recently, and the hospital equipment can't keep up, so let President Chen ask you this afternoon, if it's convenient to sponsor us." because it's for dinner, and it's mainly laymen, Zhang Fan doesn't speak Chinese and directly uses English abbreviations.

I don't know what the other party said, but Zhang Fan refused. Hung up and casually said to Shaohua, "supplier's phone."

Wang Yanan and LV Shuyan looked at each other and wanted to study tuberculosis, but they didn't rest assured that Zhang Fan just wanted equipment and money.

Eat while chatting and break up after eating. When Zhang Fan went out to check out, the boss said someone helped check out.

Zhang Fan wondered, turned around and saw that the person in charge of Medtronic was sitting in the lobby with their technical director eating goose hot pot.

"Zhang Yuan!" the boss of Medtronic doesn't really care about the hot pot. When he heard that Zhang Fan had ideas about TB, he couldn't sit still.

He doesn't know how much Zhang Fan thinks about TB, but if this thing is developed, it is estimated that it will make him the number one in Greater China.

Therefore, when I heard that Zhang Fan was in goose head on the phone, people directly brought the technical director to goose head to block people.

"Mr. Li, ouch, what's the need? Why are you in such a hurry when you come to the office tomorrow." Zhang Fan greeted with a smile.

Before President Li of Medtronic spoke, Tang Jingjing came out of the box. I don't know whether to

pretend or really don't know, "didn't president Li go to the bird market today?"

"Well, just, just back, Tang district also came to dinner!" President Li actually didn't pay much attention to Tang Jingjing.

As a result, I found that Tang Jingjing and Zhang Fan had an unusual relationship today! After he decided, Tang Jingjing just took the invoice and reimbursed as much as he had.

People have already caught up with the restaurant. Zhang Fan and Shaohua can only invite people to find a teahouse.

"Zhang Yuan, P4 is really difficult in terms of cost. TB research doesn't use P4. You know, this P4 is too sensitive. Don't worry about P2 level. I can make decisions, but you have to tell me what you want to do. I have a bottom in my heart!"

"Ha ha, drink tea." Zhang Fan brewed, "now TB drugs have entered the drug resistance period, and the secondary recurrence rate of the vast majority of patients is high. I have a little idea recently, which may succeed or fail.

But if it succeeds, I think a new anti TB drug will enter the market. Of course, our hospital has P2 level now. I know P4 level is sensitive, but P3 is still necessary. "

The next day, all enterprises in the high tech Zone knew that Zhang Fan had an idea about TB and wanted a P3 laboratory.

Tang Jingjing is silly with the phone. Is an idea so expensive. P3 level laboratories are generally not less than 800 square meters, and the counterfeiting of one square meter is about 40000 to 50000.

Moreover, the new air system in the laboratory in the later stage includes three sets of systems: primary efficiency, medium efficiency and high efficiency. Each set of system has dozens of filters. It takes hundreds of thousands to change the filters every two or three years; It will cost hundreds of thousands to replace the initial effect and medium effect once a half month or once or twice a month. On average, the repair and maintenance of fresh air system and automatic control system alone costs nearly 1 million yuan a year.

In addition, the power supply is changed once every two or three years, which is about 500000 yuan a year. The calibration fees for autoclave, air supply and exhaust HEPA, biosafety cabinet and laboratory tightness are between 1000 yuan and 3000 yuan. There are more than a dozen biosafety cabinets and dozens of HEPA in the laboratory, plus other instruments, which need annual inspection, and the annual calibration fee is 300000-400000. A set of protective clothing, N95 mask, hat, gloves and positive pressure helmet, it costs 150-200 yuan to go in alone

The smallest quasi P3 laboratory in China, with an area of more than 180 square meters and a core area of about 25 square meters. The provincial CDC was completed in 2004. The construction cost of the

whole laboratory is about more than 3.8 million yuan, and the annual maintenance cost is 500000-800000 yuan.

According to Zhang Fan's temperament, the maintenance cost will certainly not be paid.

"Does a little idea cost so much money?" Tang Jingjing muttered to herself!

Chapter 1464

Early in the morning, Ouyang did not know where to get the blue denim overalls. He carried a white helmet in his hand, which should not be a white helmet. The other entered Zhang Fan's office with a thermos cup in his hand.

"Er! Ouyuan, don't go to the construction site in such cold weather. You don't need to go to the decoration of the teaching section building and dormitory. It's a big project if you want to go to the construction site."

Zhang Fan is not afraid that Ouyang will make trouble, but is worried about the winter. Ouyang is not young, and it doesn't pay to knock and bump.

"Hey, the decoration is designed to fool your laymen. I'm also half an engineer. They don't dare to fool you when we go to watch. Let's take over the teaching task for the first time. Don't let others say that our tea conditions are bad because of the classroom and dormitory."

After Ouyang and Zhang Fan sat on the reception sofa, Ouyang whispered, "do you want to white the P3 laboratory, or do you really have an idea? If you just want a P3, you say I have an idea."

The old lady is like a thief. I don't know who told her. It is estimated that the old lady knew it yesterday. She has bags under her eyes. It is estimated that she didn't sleep well last night.

The old lady said that Zhang Fan shook his head with a wry smile, "what are you laughing at? You are young and make your reputation bad for a laboratory. It doesn't matter to me. After retirement in a few years, it will be tantamount to death and political marketing. No one can say."

Ouyang was careful when he heard this yesterday. His first reaction was that Zhang Fan wanted white gloves and empty wolves. As for Zhang Fan's idea of tuberculosis, she didn't believe it at all. Just look at

Zhang Fan in the Department of Gastroenterology and endocrine ward round. He made chickens fly and dogs jump, and didn't do anything.

"Look at you, I really have some ideas!" Zhang Fan said to the old lady with certainty while tidying up the documents in his hand.

"It's good to have an idea. Don't be afraid of failure. Saving people is not 100% successful. Scientific research is 100% successful. Even if it fails, it's normal. Don't worry." the old lady almost said that Zhang Fan is not good at scientific research.

Since Zhang Fan fainted on the operating table once, others were hard to say. Ouyang spoke to Zhang Fan much better.

"Well, I think so too. Some people try to take a step ahead, otherwise we will always be a prefecture level third-class hospital."

"OK, arrange more people so that everyone can practice. OK, you have a bottom in your heart, I won't worry about it. I'm still busy arranging decoration today. President Chen hasn't handled the project, so I don't worry about it."

With that, Ouyang left with his helmet. Zhang Fan stood at the door and looked at Ouyang who was walking away. He De was a little astringent. How can he have such a good old lady to support himself all the time.

Without feeling for a minute, Wang Hong stood beside Zhang Fan like a ghost. "Today, all these documents will be handed over to President Yan for consideration. If you agree, sign. If you don't agree, call back and start again."

"OK, Zhang Yuan. Some enterprises in the high tech Zone just called and said they would visit the hospital today. Do you need to attend?"

"In this way, if I have time for the operation, I'll come. If I don't have time, let president Li Cunhou preside over it. I told President Li Cunhou that whoever pays will participate. If it succeeds, everyone will share the results, and if it fails, everyone will bear it together."

"OK, I see. Zhang Yuan, do you need me to go to that department for surgery?"

"Don't go. Look at the unfinished documents in the office."

Then Zhang Fan turned and left.

Wang Hong looked at Zhang Fan and sighed a long sigh. Other leaders, such as her husband's leaders, are deeply afraid that others will seize power and hold all rights firmly. This one has completely delegated power.

Originally, Wang Hong thought Zhang Fan would be elevated. As a result, Yan Xiaoyu is now in charge of Finance and bidding. Like a busy dog, there are bidding businessmen who hand in bids for meals. But Yan Xiaoyu now respects Zhang Yuan more.

And more and more maintain Zhang Yuan.

Another example is Li Cunhou, who is an academician, but he has a clear subordinate posture in front of Zhang Fan.

"Is this power?" Wang Hong wondered and returned to the office to open the document with emotion. This is Zhang Fan's work. Some party and government organs issued documents to Zhang Fan to read the receipt, and Zhang fanquan let Wang Hong take charge.

Sometimes, when Wang Hong sits down for a day, her tired waist is almost broken. Her husband doesn't have such a bad waist after tossing, but now she is pressed here by Zhang Fan. It's a day. Although she is tired and groaning, she has a feeling that she can't stop. Sometimes when she is in a trance, she feels like the dean.

Zhang Fan went to the operating room. He put a bomb and ignored it.

The conference room in the administration building is a mess, because there is nothing to ask for at present, and there is nothing to say when you go. Just tell Li Cunhou to face these people who pay.

You let Li Cunhou face the government. He can't do it. Maybe the government can sell him.

But you asked Li Cunhou to face these pharmaceutical equipment companies. He really has fighting experience. Because Lao Li has been dealing with these people since he began to develop allogeneic transplantation in that year, which can be regarded as playing an experience.

Zhang Fan just said to him that those who have ideas will succeed with a high probability, which is enough. In the large conference room of the administration building, the tea vegetable principals of various enterprises and companies came.

"Li Yuan, even if you don't like our little money, you should also report it to the board of directors and the head office. Zhang Yuan can't say that you want to study TB, and then directly ask for money.

In general, give me some feasibility reports! "

"Before the experiment, it's all confidential. Do you think I'll report it to you, and then you turn around

and start a new stove?" Lao Li drank tea with a smile and took it easy.

Now, although he has goods, what is really scarce is the seller. The more stable he is, the more hypocritical he is, the more reassured these people are.

I didn't see that the large conference room didn't even provide a bottle of mineral water. Li Cunhou specifically explained that he had let these people bully out experience in recent years.

The people below also whispered and talked one after another, and Lao Li didn't care. "Anyway, our scientific research project team will be established soon. Who is willing to participate can sign up. I have some corresponding lists here.

For example, there are places for who is willing to supply the P3 test equipment, the relative proportion, and who is willing to be responsible for the maintenance of the laboratory. In principle, only two enterprises or individuals can sign up for each project, and cross registration is not accepted. Consider it. If you are willing to participate, you can get the registration form from the director of the hospital office.

If you don't want to participate, go back early. It's cold. It's no fun to sit here and waste time. "

Zhang Fan said a good operation would come out. As a result, it snowed, the weather was cold and slippery, and there were many injuries. The doctors of the third Department of orthopedics are almost unable to open the bolt. One is an emergency and the other is an emergency.

Zhang Fan didn't hurry out of the operating room and accompanied a group of trauma orthopedic doctors to operate in the operating room.

However, this kind of trauma is easier than smashing on the construction site. The operation is not very difficult. It is just a repetitive work.

In fact, most of the work in the hospital is repetitive work, and the intensity is not small, so sometimes the hospital has a strange phenomenon, the technology has a bad temper, and the technology with a good temper can't.

The simplest, for example, is the infusion room in the outpatient hall. Look, the little nurse who can't get in with two or three needles, smiles extraordinarily sweet. It's so sweet that some men can't afford to quarrel. And those nurses who specialize in injecting infants and young children can turn the sky with a big temper.

"Bayin, it's time to take a vacation, and it's inconvenient to go out in winter." after the operation, Zhang Fan met Bayin when he went out. This surprised Zhang Fan.

Bayin has been fat in recent months. I feel that she moves when walking.

"I just took a vacation when I took office. I'm afraid others have opinions." Bayin glanced on the left and

looked on the right. He found no one, so he whispered to Zhang Fan to tell the truth.

"Then you can't do this. You are also engaged in medical treatment. How can you gain weight so fast."

"My mother and my mother-in-law are deeply afraid of hungry children these days and feed me as a pig every day!"

"OK, you must be greedy. Don't eat too much to make a pregnancy induced hypertension or diabetes. Rest or rest. I'll let the director of nursing come to you for a while, and no one will tell you when she comes."

"Well, Zhang Yuan is good to me!" his face was already fat like a round moon, and he couldn't see it with a smile.

Zhang Fan shook his head. The former bayinguli was a flower. Now bayinguli is an aunt.

Back in the administration building, Zhang fanshu stretched out comfortably, took out the rice from the refrigerator and heated it in the microwave oven.

The mutton at home has been cooked too much these days. Shaohua is full in three Liang. Zhang fan can only take it to the hospital twice a day.

Zhang Fan's family has a tradition. Perhaps this is also the tradition of most people in China, that is, we can't waste food. Especially Zhang Fan's father, he can blow his nose and stare angrily when he sees someone pouring leftovers.

Mutton is hot in the microwave again. Darling, it's full of sheep Sao flavor in the office. Zhang Fan is stupid. NIMA, just sat down, Lao Li came.

"Did you eat?"

"Ouch, I've been pestering with the * * merchant all morning. I've had a lot of water and go to the bathroom. I'll stick my chest to my back."

"Come on, come on, I left you some mutton, grassland sheep. It's good."

Lao Li was not polite. After washing his hands, he began to eat mutton with garlic. "Mutton in the frontier is delicious."

"Yes, you eat more!" Zhang Fan had a feeling that the goods that hit his hand were sold.

After Lao Li finished eating, he began to report to Zhang Fan, "the pharmaceutical enterprises and equipment enterprises in the high tech Zone have participated. And this time, it is better that the pharmaceutical enterprises in China have also participated."

"That?" Zhang Fan was curious.

"Yiling! They also participate in shares this time."

"Oh!" Zhang Fan nodded. He was still gratified. Finally, some pharmaceutical enterprises actively participated in scientific research instead of health products.

"This is a good thing!"

Zhang Fan is just a word. After the meeting, all enterprises in the high tech Zone will give money to those who give money and equipment at the first time. They are deeply afraid of being abandoned. The boss of the tea vegetable bank ran to the government to ask the government to deposit the money.

The tea vegetable government is now afraid of two things: one is the bank and the other is the tea vegetable hospital. I don't know how boss tea vegetable fooled the bank. Anyway, Zhang Fan is not going to save money.

"Why don't you Zhang Yuan come recently? You think he will come?"

Director Huang of the infection department waited for a few days. Zhang Fan didn't come and the others didn't say anything. First of all, she couldn't wait. She stood at the door of the Department and looked out day by day. It was estimated that the ward rounds of the hospital were over. Director Huang scolded and entered the Department.

Just after scolding Zhang Fan, the head nurse shouted, "here comes Zhang Yuan!"

"How can I hear someone scold me!" Zhang Fan with Wang Hong and Zhao Yanfang, the head of scientific research, rushed into the infectious diseases department.

The last time I came, Zhang Fan kept a low profile because he had no money! No equipment, no personnel, it's a three noes product.

But this time, it's time for NIMA to let Lao Huang have a look. What is rich and powerful.

Chapter 1465

"No, no, how dare you scold? We can't hope to come. How can we say you behind your back." after Zhang Fan entered the Department, director Zheng, deputy director of the infectious diseases department, immediately stood up, invited Zhang Fan and explained with a smile.

Sometimes this team matching is also very important. For example, in general surgery, several deputy

directors can play. Although they are not the top surgeons in China, these people are quite good in general surgery.

But the combat effectiveness of the Department is not good. Why, it's NIMA's internal friction. The deputy directors stared at the director's position one by one, forming gangs and fighting on their own. Earlier, they were secretly bad.

The infectious diseases department is different. Director Huang plays the vanguard and director Zheng does the logistics. Although no one comes to the Department, the culture and working environment of the Department are very comfortable. Because of discrimination, the Department is also close to each other.

Lao Zheng smiled and pulled the sleeve of director Huang's white coat, because director Huang's neck would twist like a pillow and her nostrils were facing up. Let her admit her mistake and think about it.

Zhang Fan certainly won't get angry with the old lady. It's unnecessary. To tell the truth, this kind of person is actually the bottom line of Chinese medical treatment. He has been unknown all his life to resist all kinds of viruses and bacteria on the most dangerous epidemic line.

If one day is valued, it is when everyone needs her to play with her life.

"Director Huang, look!" Zhang Fan seems not to see the hard necked director Huang and directly gives the equipment list in his hand to Director Huang.

"What's this!" although there was an expression on her face that I wanted to work hard with you, she felt embarrassed to see Zhang Fan smiling.

"You said you didn't pay attention to it. OK, I'll pay attention to it now. This laboratory is the most expensive laboratory in tea vegetable hospital and even in Northwest China. Look, how about it!"

"This, this, this..." director Huang took the list in his hand and shook his hands a little. "Isn't this the Department joint laboratory?"

"It's for the infection department. How about it!"

"Cow, cow, Zhang Yuan is a cow!" director Zheng smiled and didn't know what to do.

The doctors around also climbed over, one by one, looking for the gap to drill inside, "darling, more than ten million!"

"God, P3 level laboratory, the first in Northwest China?"

"All right, all right, don't worry. After the hospital affairs meeting, we will send a document to explain to you. Now everyone sits down and let the president talk."

Lao Chen smiled and comforted a group of doctors and sat down.

Wang Hong looked at Lao Chen and quickly wrote down the matter in her heart. Next time, she felt that Lao Chen would not come forward. This matter should be the work of the director of the hospital office!

Sometimes this is the case. Wang Hong is not jealous of Ren Li or Yan Xiaoyu, but even if Lao Chen gives her this position, she can do well. In fact, to tell the truth, Lao Chen may not be able to win this position for a few more years. She can't do it without a broad mind in many places.

She is now in a stage where she can see it and lose it. And it's like a child in a period of rebellion.

Zhang Fan didn't have time to talk to Wang Hong around him. After arranging to sit down, he found that many doctors in the infectious diseases department were standing. "Isn't there a spare bench in the Department?"

"In the past, because the family members didn't want to leave, they removed all the benches!" director Zheng explained with a smile, and Zhang Fan nodded, which seemed very funny.

In fact, this is what we have to do to avoid quarrels between family members and doctors.

"OK, let's work hard and let you stand up to attend the department meeting." Zhang Fangang said, Lao Chen immediately stood up and said, "I don't record, I'm just here to witness. Standing is more formal!" he gave his bench to an elderly doctor.

Wang Hong felt that she had learned again.

Zhang Fan nodded. With this small action, the front-line doctors will definitely have a particularly good impression of Lao Chen, and Lao Chen added a little point in Zhang Fan's heart. In fact, this thing is the way people are, and their good feelings are accumulated bit by bit.

"It is estimated that one month will be enough for the laboratory from equipment debugging to operation. Now there are hardware and software. Who has isolated viruses, cultivated virus strains and conducted biological drug sensitivity tests?"

Maybe this requirement is a little high. I'll lower it. Who hasn't read the infectious monthly report and who has read the cutting-edge cell magazine.

No? "

Zhang Fan looked at everyone. A group of people bowed their heads. Director Huang was unconvinced, but now he couldn't say a word. His eyebrows wrinkled like an axe.

"You may disagree and say what happened in the hospital before, but you look at the respiratory department next door and the dean of the hospital. You have led the doctors of the Department to read in the morning for decades. Dare you say you haven't secretly laughed at them?

But when the first batch of respiratory ICUs in Marubeni arrived at the hospital, everyone was silly. There was no manual, and even the buttons were marubenized. The little Marubeni was waiting for us to ask them if we couldn't use it.

But you can look at the respiratory department of others. You can start debugging without engineers. The doctors in the Department can start debugging directly by themselves.

Why, it is because they read journals and advanced papers day after day. Keep improving yourself. Now look at other people's ICU in the respiratory department. It can't be compared with the total ICU in the hospital.

Comrades, you don't need a heavy hammer to sound the drum. I don't say anything about punishment and reward, and I don't mention any advantages and disadvantages.

One month's time, I want to improve myself and stand in this laboratory in the future. One month's time gives me the most basic work of the laboratory so that I can't make mistakes without closing my eyes. I don't want you to be infected by the strain instead of being isolated.

Dr. Zhao Yanfang, I'm here today. People have several scientific research projects on their own, just to popularize basic knowledge for you. I'll teach you later. People have to work overtime when they go back.

So, now I give you a chance. Don't you say that I Zhang Fan don't pay attention to you. Tens of millions of equipment are here. If you still say you don't pay attention, don't blame me for being impolite. "

Director Huang murmured that it was just over ten million, and it became tens of millions in your mouth!

Eating people's mouths is short and holding hands is short. What the old ancestor said is clear and clear. Zhang Fan suddenly finished. Although everyone is very wronged, no one is unwilling and is not a fool.

After the morning meeting, Zhang Fan left. As soon as Zhang Fan went out, director Huang sighed and looked at the excited mood on the faces of a group of young doctors around her. She said in her heart, "silly children, wait for your Zhang hospital to peel your skin!"

The hospital was very busy at the end of the year. The teaching buildings, laboratories and the just ended flu made everyone trot off the ground in the hospital.

As soon as Zhang Fan returned to the administration building, Wang Hong came to the office with the boss of Medtronic. This time it's Zhang Fan's turn to have a short mouth and a short hand.

"Zhang Yuan, hey hey, are you busy?"

"I'm a little busy, but President Li is here. I'll stop no matter how busy I am." Zhang Fan smiles and asks president Li to sit down.

After a while, Mr. Wang of Siemens also came. One by one, it seemed as if it had been negotiated. All the good ones who made a lot of money came.

"Zhang Yuan, the equipment has been delivered. Now you can give us peace of mind. You don't disclose this at all. We are itchy."

In fact, it's not itchy. It's afraid that Zhang Fan won't admit it after he gets it.

"To tell you the truth, if you don't come, I'd like to invite you to come. In fact, it's a secret. It's an inhibitor of TB protein. As we all know, the drugs currently used in clinic are commonly used in solid medium to kill Mycobacterium tuberculosis that can grow with 1mg isoniazid, 10mg streptomycin and 50mg rifampicin.

In fact, for the killing of mature TB, can we intervene in the propagation chain of bacilli? Can we make it an inert bacterium, not just kill, but make it variant? "

When Zhang Fan finished, a group of people looked at each other. This idea is not new. Many universities and scientific research institutes tried it a few years ago.

But they all failed, and then slowly fewer and fewer people in this discipline studied it, because too many people failed.

Zhang Fan was not excited and immediately said, "you may think this idea has no future. It's normal! Many doctors and scientists have died here, and I may not be able. If you have ideas, even if I borrow these equipment and funds, I can repay them slowly in years, and the interest can also be calculated.

Of course, there are no shares. "

As soon as this was said, everyone felt uncomfortable. "Let director Wang accompany you to discuss

more. This is cooperation. Is there a mandatory prison? You can do it or not. It will not affect the other cooperation between tea vegetable hospital and you.

I have another operation. Let's go first. Director Wang, pour tea for your bosses! "

"Hey, hey! No, no, let's go, let's go. Zhang Yuan, I believe you!"

As soon as president Li of Medtronic saw that Zhang Fan turned over, he quickly got up. To tell the truth, sometimes they really feel that Zhang Fan is becoming more and more difficult to serve. So much money can't buy a good face.

The infectious diseases department is equipped with a P3 laboratory, and the hospital has been turned upside down. "What will they do? It's not our respiratory department that pours on the flu every year. We expect them to die. Zhang Yuan, in fact, I also have ideas about TB."

Zhang Fanneng said he was unhappy with a group of bosses. In the face of the old house, Zhang fantou was big. Zhang Fan just entered the surgery building. The old house was like a child. He pulled Zhang Fan's white coat and asked Zhang Fan to give an explanation.

"You have an idea. Why did you do it earlier? I said it's not good for you to live in the hospital. You can't eat in the bowl and look at the pot. The director of ICU told me that you dug several senior nurses into your department.

You can't do this. You're also a leader, don't you? You should have a view of the overall situation! I talked all afternoon before I let the director of ICU go back. I didn't tell you. "

Sometimes I can't tell you about the old house. ICU nurses in the respiratory department have never been in contact with ICU work. Lao Ju didn't want to cultivate. He directly contacted ICU nurses in private and gave 2000 more a month.

ICU nurses almost collectively ran to the respiratory department, making Zhang fantou big. But this product has no selfishness at all. Taking this opportunity, Zhang Fan blocked his mouth, otherwise Zhang Fan would really be hard to send the goods.

What he said is also true. Every year when there is a flu or other epidemic, the respiratory department is used as a doctor in the infectious department.

"Why don't I return the nurse to ICU and you give us P3!"

Zhang Fan anxiously pressed the elevator button and said to the unwilling old house outside, "it's late!"

Zhang Fan is also a thief now. He pretends not to know what's wrong with the Department Director. He doesn't say it easily. When it comes to a critical moment, Zhang Fan will let them feel it. I'm not asleep.

Chapter 1466

People are contradictory things. In their spare time, birds are facing the sun. There are a lot of strange words. One day, they dislike that their department is bad, and the other day, they dislike that the hospital leaders are all wine bags and rice bags, so they will make hidden rules for small nurses. Later, it's my rhythm.

But when I was busy, I also sighed. In the tea element experimental building, two years ago, the doctor's face was particularly bad. Today was originally the day of shift change for the two. He can go home after the ward round in the morning.

As a result, Zhang Fan's blood was boiling. He took the initiative to come to the laboratory and vowed to win the basic operation. In the future, he should strive to engage in scientific research and go to the world in the future. I haven't waited a day. After my enthusiasm is consumed, it's endless boredom.

When they took off their protective clothing and took a rest, they whispered: "I miss the days of NIMA salted fish. If I used to play games at home now, the turret dwarf hunter would take my head for thousands of miles!

The waist was broken this day, and the demon king Zhao was too difficult to deal with. It was a rubber tipped dropper. I had done it no less than 30 times. It was too boring. "

Another stared at the fluorescent lamp in the laboratory, "if you want to wear a crown, you must bear its weight!"

The man who spoke looked at his buddies in surprise. He knew his buddies' temperament too well. Otherwise, how could he be assigned to the infectious diseases department. Just when he thought his buddy was infected with the virus.

The salt fish with godless eyes said again: "I'm not in good health and can't carry heavy objects. Let others change the world and save the earth!"

Then they looked at each other and saw their passion! Then they decided that they would never come again. No matter what Zhang Yuan said or passionate, they would never come again.

In a week, more than half of the people who came to the laboratory to learn basic technology went. Zhang Fan didn't feel anything. Director Huang of the infectious diseases department was rarely angry. The people in the Department hated iron and steel, and even the old lady threw her stainless steel cup too angrily.

To tell you the truth, Zhang Fan has long been psychologically prepared. Let alone the infectious diseases department. Let's take a look at the general foreign language department. For example, how many people take the initiative to go to the laboratory in charge of marukuo after work? At the beginning, everyone went and ran more diligently than one.

A month later, there were only a few left. This thing is like this. She can't stand loneliness. She hopes to make a great discovery and invention, and then she will be sent to win the Nobel prize the next day. Tanima despises scientific research.

"The basic personnel of the laboratory are not enough. What should we do?" Zhao Yanfang reported to Zhang fanhui reluctantly in Zhang Fan's office.

"Don't worry, don't worry. The equipment hasn't arrived yet. What are you worried about? You're in charge of too many projects now. You can't eat. Don't be tired."

Zhao Yanfang glanced at Zhang Fan, who was inexplicable! "I want you to go out for a project. Is there anyone in your hand?"

"Eh!" Zhang Fan smiled awkwardly. Then he immediately changed the topic, "I heard that you didn't live in the villa given to you by the hospital. Have you been living in the dormitory? Is this a disgrace or no money for decoration?"

"I'm alone, such a big house, and on the edge of the forest. Do you think I dare to live? Every night, either owls or wild cats bark."

"Pick up your uncle and aunt. The old man will suffer all his life. It's time to enjoy happiness. I'll decide your villa and go to the hospital to reward you for decoration."

"My parents are not used to it. They have been in Suzhou and Hangzhou all their life..."

"I get used to it when I come. How can you get used to it if you don't let others come. I asked director Wang to book tickets this afternoon. How is the old man? Do you need someone from the unit to pick him up?"

"No, no, they are in good health. Zhang Yuan, this..."

Zhang Fan was deeply afraid that Zhao Yanfang would run away and invited his parents directly. Zhao Yanfang asked Zhang Fan to say a big red face. "Well, they are all children. If you have the ability, you should be filial. You have to listen to me!"

Needless to say, I'll come if I don't come.

After seeing Zhao Yanfang off, Zhang Fan sits quietly in the boss's chair. If someone comes in, he thinks Zhang Fan is settled.

The laboratory is coming, the equipment is coming, and the maintenance cost has been paid. If you can't get a 123, it's estimated that it will be troublesome to ask for money in the future. Fame is like white paper. Once a little blood falls on it, no matter where else is as white as snow, it can only be thrown away as garbage.

Therefore, Zhang Fan now wants to work out a plan.

First of all, because it is the study of TB bacteria, it is necessary to determine the isolated strain. It's simple. It's not an extremely rare thing. It's just a matter of time.

The next step is the determination of sterile animals. For this test, the requirements for animals are a little high. For example, sterile animals can't just catch a mouse. First of all, this thing should make use of the natural barrier function of the uterus to have a direct cesarean section.

Then it is raised in a sterile isolator. The food and water sources for eating and drinking are strictly treated, and the food is low molecular weight food. Really, a meal for this kind of mouse is often more expensive than a meal for Zhang Fan on weekdays.

After these processing, Zhang Fan took the initiative to do a project by himself for the first time.

"Topic selection: modification of the reproductive protein of TB bacteria!" Zhang Fan wrote as he wrote on his manuscript paper.

Then is to determine the research ideas, followed by a feasibility statement, but also to point out their differences from various documents.

Then there is the source of the task. How to say this, in fact, it means to make it clear who the gold owner is and who pays. Zhang Fan thought about it and wrote a bracket behind the tea vegetable hospital: Meryton, Siemens

Looking at a large additional enterprise on the manuscript paper, Zhang Fan secretly muttered, "am I influenced by Wang Hong!"

But then I thought, why can't I have a name when people pay. I was relieved to think so.

This is followed by the purpose and significance of the experiment, which is unnecessary. In this sentence, it is so tall.

For the first time, a person is responsible for a subject. The more Zhang Fan writes, the more he feels like a genius.

As a result, before narcissism for three seconds, Zhang Fan felt that he couldn't go on.

Nima also wants to write about the current situation and development trend at home and abroad. Where does Zhang Fan know? Ask about the development trend and current situation of orthopedics, general surgery and other surgery. Zhang Fan Menqing, after all, depends on this.

Although I didn't take the initiative to study, there are still some papers that should be brushed and journals that should be read, but I don't know about this internal medicine. Zhang Fan takes a breath of the air conditioner and NIMA has a toothache. "Don't write this first, it doesn't matter!"

Research content: this needs to determine the selection objectives and problems to be solved, select the observation objects and observe the contents of those aspects.

Zhang Fan sighed a long sigh, "no wonder the doctors in NIMA's infectious department have finished running. It's too useless. It's me, I have to run!"

Then, there are research methods and technical routes. Zhang Fan not only has a toothache, but also has a headache.

To tell the truth, in fact, the most important thing in a project is Zhang Fan's toothache and headache. This thing is a problem of route and way.

Finally, I opened the system. According to the system, what Zhang Fan wrote began to work smoothly.

"It's not that I don't work hard, it's too difficult!" looking at the three pages, but the research methods haven't been copied. Zhang Fan sighed a long sigh and was not in the mood for narcissism.

"It is estimated that another two pages will be finished." the result was still too young. Zhang Fan's hands were swollen. Only then did he finish writing. Looking at the dark sky outside the window, Zhang Fan looked at a pile of paper on the table.

"This NIMA is a liar to practice calligraphy! I don't know if the experiment is successful. I guess I can sell calligraphy books in the future."

It's almost a stack of books, as well as the following, research progress and expected results, equipment conditions and fund budget, subject composition and division of labor.

Although no one urged the research progress and expectation, the sheep could not be released. Zhang

Fan bit his teeth and was expected to be a year.

As for funds and equipment, Zhang Fan doesn't have to worry about it.

The rest is the division of labor, which must have clear responsibilities, specific requirements and be implemented to people. Originally, Zhang Fan wanted to write the name of the team leader as his own, because he was bullied in scientific research in the past two years.

Now it's time to show the technology. As a result, Zhang Fan hesitated, "forget it, you can't be too superficial!"

Then he wrote the name of the team leader Zhao Yanfang!

Although there are some in the system, this is different from reality. He asked for so much money for the first time. He really failed. Zhang fan can only cover his face and see people in the future.

So in order to be safe, Zhang Fan didn't dare to go on his own.

My waist was broken. I wrote all day before I finished.

I looked up at my watch and got off work two hours late. I quickly packed up and went out. When I opened the door, Yan Xiaoyu's office was still noisy, like a vegetable market, and Li Cunhou's office light was also on.

Recently, allogeneic skin has also reached a critical moment. Lao Li almost takes the hospital as his home.

As soon as Zhang Fan went out, Wang Hong shouted, "Zhang Yuan!"

Zhang Fan quickly made a hush hush posture, "get off work quickly. Don't let Yan Yuan hear it. We can't get off duty!"

Wang Hong understood with a look. They sneaked downstairs like thieves.

Out of the building, sucking the sweet cold air, "shall I give you a ride? Forget it, you have a car!"

Zhang Fan was polite for a while. He was afraid that Wang Hong would be rude, so he quickly denied it.

Wang Hong opens her mouth and looks at Zhang Fan who is far away gnashing her teeth. She just wants to say good, but Zhang Fan changes his mind again.

"If you don't want to send it, don't open that mouth!" she scolded in a low voice, and Wang Hong couldn't help laughing again.

It's actually good to have such a leader. Now Wang Hong is almost half the dean. She did all the words and part of the administrative work of the dean. Really, although she is tired, she doesn't know why. She just has a sense of satisfaction!

Chapter 1467

If the operation in the hospital does not last more than 20 hours, Zhang Fan generally does not feel tired enough to walk around. But today, he had two operations, but when he entered the door, he felt tired and didn't want to lift his legs.

Now Zhang fan can understand the doctor who gave up the laboratory opportunity in the infectious diseases department. When he didn't write the experimental plan in the morning, Zhang Fan thought he could save the world. At the end of the day, Zhang Fan thought the world was actually beautiful. It seemed that he couldn't save it!

When you get home, the heating in the frontier is a feature, hot! Hot and dry! After hearing Zhang Fan say that he would eat dozens of foods a week, Shaohua thought about how to cook. Bean sprouts salad, three green vegetables, colorful, Leng can't see that this thing is green vegetables.

There are carrots, green peppers, red peppers, fungus and mushrooms. They look really good, but Zhang Fan won't comment on the taste. People who don't cook have no right to dislike.

"How do you feel today? Do you feel sick?"

"It's all right, it's all right." Zhang Fan said that he had written an experimental paper, which made him physically and mentally tired.

"Another operation?"

"No, there's a meeting today. Where's Shifu and Shiniang?"

"Come, just called, they came." Shaohua confirmed that Zhang Fan was all right, so he continued to work in the kitchen.

After dinner, Zhang Fan didn't tell the old man about his scientific research, let alone show the old man the plan. He knew that if he took it out, the old man didn't look at it as a general foreigner, he might be able to tell Zhang Fan for a long time.

So, back in the study, Zhang Fan began to contact his younger martial brother. Other people Zhang Fan is not only worried, but also embarrassed.

You said to Zhao Yanfang that this woman originally scoffed at Zhang Fan's scientific research ability. Now she has asked others to see the early version. It is estimated that she can be laughed to death.

Simply, Zhang Fan doesn't bother others. He goes straight to his little martial brother.

In the video, the younger martial brother is still wearing a white coat. "Haven't you come home yet?"

"Recently, there has been a problem with scientific research. All the previous data have been wasted. Today, we have a meeting to discuss together to see if we can find the reason. Where are you, Shifu? I read the weather forecast yesterday and said it was snowing heavily there.

You should take good care of yourself so that the elder martial brothers won't eat you. Several elder martial brothers expected master to be invited to be an honorary professor or something when he retired, but you cheated them. "

"The old man and the old lady are very good. Do you want the old man to help you because you can't sit down?"

Zhang Fan laughs at little elder martial brother Lu Ning. Other elder martial brothers are too old. The oldest elder martial brother is even about the same age as Zhang Fan's father. Usually, there is no way to joke. Only Lu Ning is six or seven years older than Zhang Fan. It can be regarded as an age group.

"Hey! Come on, what's up? I have to go to a meeting."

Looking at the lawsuit on the younger martial brother's face, Zhang fan can't open his mouth.

"OK, what's more polite between you and me? Do you have any data to get?"

"No, I wrote a test plan. I want you to check it for me."

"Isn't Shifu tea vegetable? Let the old man check it for you. Although the old man is old, his vision is still first-class. He's not better than me?"

Luning said curiously.

"It's not a general foreigner. I got some TB. I'm looking for an old man. Can't I be educated!"

"OK, send it to me and have a look. I'm also a layman in TB. I can only look at your format. It's estimated that I have a lot of trouble. If you really want to get the data, I'll go to the hospital tomorrow to find some experts in this field to see if they have any data and data. How do you want to get a doctor?"

However, your span is too big. Although TB is not hot, it can't be said that you, a surgeon, finally got a doctor of internal medicine! "

Lu Ning is wrong. Zhang Fan doesn't want to fool a doctor. Zhang Fan really wants to save the world!

Talked a few words and turned off the video. Zhang Fan will watch TV and chat with Shaohua.

"Do you have a suitable person in your hospital? Introduce one to Jia SuYue. Last time I saw her mother, her mother took my hand and said for a long time."

"Oh! This matter needs to be considered carefully!" Zhang Fan has developed a skill since he had the system. He listens to others and does his own things in the system.

Although I don't know what Shaohua said in my mind, Zhang Fan knows that it's time to agree.

"Don't be bureaucratic for me, but also consider whether you can raise your hand to vote at your hospital affairs meeting!" Shaohua twisted Zhang Fan.

Zhang Fan then took his thoughts out of the system, "go to bed, it's dark!"

Zhang Fan certainly won't ask, what do you say!

"It's dark at six in winter. Can it not be dark now? In the final analysis, do I have a suitable person to introduce Jia SuYue!"

"Hey, Wang Yanan hasn't found a suitable one yet. Do you think the fat water will flow out? There are not many single men in our hospital, and there are many single women doctors and nurses. When you say this, I realize that this matter can't be delayed.

We have to arrange it tomorrow! "

Zhang Fan thought, really, there are too few marriages in tea vegetable hospital in recent years. In the past, although the tea vegetable hospital was a good unit, it was no better than the civil servants of the tea vegetable government. So getting married or something is simple.

But in the past two years, especially after the substantial increase in wages this year, many nurses and

doctors can't find anyone.

Shao Hua said that Zhang Fan felt that he should pay attention to both spiritual and material things. Otherwise, NIMA had no place to cry when a group of new doctors and masters were hooked by her ex girlfriend one day.

Especially Zhao Yanfang, Yang Weidong, a master of general foreign studies, and Li Guanghai, a doctor, these people are bald. Now they are still single. We really can't be careless.

After taking a bath, Zhang Fan recovered. Although it's tiring to write a plan, it's easy to relax. In the bedroom, Zhang Fan rubbed his hands, waiting for Shao Hua, left waiting not to come, right and so on did not come, Zhang Fan had to wear clothes to get out of bed to see, Shao Shao paste the mask like midnight ghost into the bedroom.

Zhang Fan hurriedly turned off the light and went into bed, shouting Shaohua to go to bed, "why?"

"I'll tell you a story!"

"Say it, don't do it!"

"Hate it, don't do it, not today!"

"Why!"

"Holiday!"

Zhang Fan thinks Shaohua will look good today. As a result

One holiday, Zhang Fan vented his anger. His eyelids seemed to stick together and couldn't open.

"What's the story you told me?" Shaohua was not happy.

"Oh, let me tell you, Nezha's father and Da Sheng's father talked. Nezha's father said that I should have shot at the stone if I had known that the villain was so disobedient.

Hearing this, father Da Sheng sighed and said, "no, I've tried!"

"Annoying!"

Zhang Fan has begun to play Xiaohan!

.....

The younger martial brother's reply hasn't come yet. Everyone in the medical system knows that Zhang

Fan is going to engage in scientific research,

Because the P3 level laboratory is too eye-catching. What about bulk province? Do you have money? But the P3 Laboratory of the provincial CDC in bulk province is still a quasi P3. I don't know if it's because southern Beijing is the capital of Anhui Province. Maybe the rich boys don't pay.

Therefore, when the most advanced P3 equipment enters China, we all know that the tea vegetable hospital wants to set up a P3 level laboratory. There are all kinds of words. Some say that no matter how advanced the P3 level laboratory is, it is not P4. It is nothing strange.

For example, a big man, who used to be a professor at a university in the northwest, can rely on others' universities in the south to borrow the laboratory every year. Now I hear that Zhang Fan's tea vegetable also wants to get P3. It's not strange to say that he is jealous and is about to jump out of the building.

He said bluntly: "tea vegetable hospital is a nouveau riche. Do they understand scientific research? They have published several SCI articles now!"

Of course, there are also those who have a good relationship with the tea vegetable hospital, such as the foreign-related hospital. Zhang Fan's elder martial brother called at the first time: "when will the commissioning be completed? Is there a project? If there is no project, let me use it for a period of time first. You can give me a list and register!"

Also, what kind of scientific research do you want to do? Surgery is not necessary. "

Not every professor has a dedicated P3 laboratory. Even some academicians may not have, so there are many people who call.

The news that Zhang Fan wants to get TB spread like wildfire, which is more shocking than Zhang Fan's random P3 laboratory.

"I'm going to be a surgeon. NIMA is an orthopedic doctor and wants to do TB. NIMA's bone tuberculosis is treated by us. It's amazing to let their orthopedics have an operation. We don't have to do the specific treatment from the infectious diseases department?"

"A layman who still wants to break through TB, Zhang Fan, a tea vegetable, is gone."

"I know. Zhang Fan doesn't have a doctorate. He wants to get a doctorate!"

For a time, it was originally a website for doctors to discuss related majors, and the seasoning network was very lively.

Some bigwigs who seldom speak at ordinary times make fun of Zhang Fan on the Internet.

The seasoning network is very good, especially at the beginning, there were a lot of big guys. Later, this

guy tried to make money, and the big guys lost. But now the big guys haven't lost, so they are still authoritative.

"I'll go. Director Wang of West Lake Pulmonary Hospital has spoken. Can director Wang talk privately? I have a patient who wants you to feel your pulse!"

"Director Wang of the West Lake jokes that Zhang Fan is a layman. It is estimated that Zhang Fan really has a mixed doctor's title this time. When was NIMA's doctor's title so expensive!"

"You know what a fart. The boss of West Lake and Zhang Fan had a bad relationship. Now don't ridicule him and wait for the new year?"

"Come on, give me some gossip!"

In three days, all NIMA on the seasoning website laughed at Zhang Fan.

Wang Hong was very angry. She went to quarrel in person. As a result, she couldn't quarrel. One by one, she was more professional. She was a doctor in digestion. She really couldn't quarrel. She also contacted the administrator of seasoning network to delete the post.

As a result, people didn't look at her as a deputy section level, and almost didn't annoy Wang Hong to death.

"Look, Dean, what has become. Don't high-level doctors respect themselves?"

Zhang Fan glanced, "they are naked jealousy!"

It's impossible to say you don't care. Who wants to make people laugh, but what can NIMA do? This P3 was originally envied, but it hasn't made any achievements yet. Is it really the end to scold? That would be a shame.

He said it didn't matter, but then Zhang Fan didn't even go to the operating room. He ran to the laboratory to see how his team members are doing now.

Really, others don't know the details. If they know that the laboratory is coming, the staff will be able to laugh down their teeth even if they have basic skills.

Into a laboratory, a group of people looked at Zhang Fan, blushing. They are all from the infectious diseases department. They must have read what others said on the seasoning website. Although we talk about Zhang Fan, we don't mean them.

A group of people really hold their breath to show everyone.

"In those years, elder martial brother said that real warriors dared to live a miserable life and face the

dripping blood! Now we are indeed ridiculed and looked down upon.

But why do they do this? Why do they laugh at us? Isn't it that we don't have hard things to take out? Comrades, now, today, we should make history and work hard. When we can take out hard things and when we get hard, we won't stop until we put them in their mouths!

Are you confident? "

"Yes!"

Chapter 1468

"Laughed at?" when he came home in the evening, old man Lu waited for Zhang Fan at home early. As soon as Zhang Fan entered the door, he saw the old man sitting on the sofa.

"Hehe!" Zhang Fan hehe smiled. Shaohua asked curiously, "what's the matter? Who laughed at you?"

"He didn't do his job and went to study tuberculosis. To tell the truth, I couldn't help laughing at you." the old man was unhappy. Why didn't he see this bastard set up tens of millions of laboratories for ordinary foreigners.

Even if he didn't succeed, he was more comfortable. Now Zhang Fan seems to want to engage in scientific research. As a result, he turned to infect. The old man is depressed. Is the grandmaster's craft so unattractive to today's young people?

"You have nothing to do. What about Shiniang? In a few days, after the laboratory debugging is finished, take Shiniang to the fortress while you have time. Shiniang has been in the frontier for nearly half a year and has followed you all over the grassland."

To tell the truth, the old man is very unpopular except for his work. For example, when he first came, Zhang Fan wanted to take the old man and his wife to travel. The old man blew his beard and glared, saying that he had never seen anything and would not go.

Take it out to eat something special. You dislike that it's not clean and that it's heavy in oil and salt. It's very unsociable. You let him eat steamed bread in the hospital. He didn't say anything. Things came as soon as he went out.

It's winter. Zhang Fan thinks he can't listen to the old man. Fortunately, the old man is a doctor. If he is a pure leader, he will play chess in the future. No one will play with him. It's too out of group.

In winter in the frontier, the larger cities have no characteristics like cities in other regions. Only this kind of small city with famous ethnic groups in the frontier has different scenery.

Saicheng is a multi-ethnic County, mainly Kazakhstan, Mongolia, Xibe, Tajik and Russia. It is mainly grazing here. It can be said that the mountains are high, the forests are deep, and there are large tracts of meadows.

When summer is over, there are no people in the city. Except some civil servants, there are almost no residents. Only the herdsmen who come down from the mountains in winter can hunters winter in the city. The road here is not easy to walk, so there is no tourism company to develop here.

The main reason is that there are few residents and the outside world. Some of the tuberculosis patients have not been treated. They are all joking. Zhang Fan is also trying to make something out of his heart.

So this time I took this opportunity to let the old man and the old lady go to see the scenery outside the great wall and the customs of the frontier. After a while, the old lady came to Zhang Fan's house from the villa next door. When she heard that Zhang Fan was going to take them on a trip, she said it was troublesome, but she smiled Mimi on her face.

The old man didn't like it and puffed his mouth.

Sometimes people are really angry and fate. For example, Shaohua and old lady Lu haven't been together for long. They are as good as their mother. So it also allows old man Lu to stay in tea for a long time.

"I have to get you and Shifu some thick leather clothes. It's very cold in that place, and the down jacket can't stand it." Shaohua introduced the county to the old lady while cooking with the old lady.

When there were only Zhang Fan and old man Lu, old man Lu looked at the kitchen and asked in a low voice, "are you sure? I'm not going to get you a doctor's hat, mainly because you don't have such urgent needs now, and you can avoid suspicion."

"Look at you, I'm also your close disciple. No, I won't tell you about the master's degree. The doctor wants you to worry about it. Won't it lose our grandmaster's face? It's mainly because we really have ideas, and the hospital can't always dig people from outside. Sooner or later, we have to grow up by ourselves.

Although tuberculosis is troublesome, compared with other diseases, it has more research data and is easy to control. "

"Just have a bottom line in your heart. In fact, tuberculosis is not interesting. Others have studied it for many years. It's almost a century. You might as well get your liver tumor. You see, I also have an idea. In the past, surgical technology was a threshold. I wanted to let senior brother get it. Senior brother had too many tasks. When there were fewer tasks, he was old..."

Zhang Fan has one advantage, that is, you said you. I listen. Whether to do it or not needs to be discussed.

It's not that Zhang Fan doesn't want to be a general foreigner. To tell the truth, get some bacteria and viruses. Now the tea element hospital can still operate. Once you get a general foreigner, such as tumor cells, why does the pill country come all the way to tea element.

First of all, the surgical technology should pass the test. Second, there should be a huge backup team, from pathology to physiology, from basic to clinical, from pharmacology to biochemistry. There is no need for a top person in that place.

Therefore, the tea vegetable hospital can't afford to play this thing now, because it is too comprehensive. Many people say that there will be no doctors after the Nobel Prize in the 1980s, which actually reflects how difficult it is to improve the comprehensive discipline.

.....

Zhang Fan made a big deal with the enterprises living in the high-tech zone. Even if the desert country is small, it is also a country. Improving the medical equipment of a country as a whole is really a big fat meat. Even the tea vegetable government has floated recently.

At the end of previous years, the government of tea vegetable began to broadcast public welfare films of diligence and thrift, just to let everyone understand that the government is not rich and needs to reduce expenditure and repay debts, and then manage the presidents of various banks so that they can continue to borrow the next year. But this year is different, although Zhang Fan doesn't pay dividends.

But the tax revenue of these enterprises in the high tech Zone is real, and they are not small enterprises, but large enterprises. They not only have tax revenue, but also solve the employment of almost tens of thousands of people.

So this year, the boss of tea vegetable privately said that he would have a fat year. Of course, he could not compare with the tea vegetable hospital. Moreover, the boss told the people at that time that the tea vegetable hospital could not know. At present, besides banks, tea vegetable hospital is the largest account holder of the government.

Because the medical appropriation for the past two years has not been given, even the wages of doctors

and nurses in the tea vegetable area have not been allocated. Anyway, they don't worry about too much debt, and others pretend not to know. Sometimes Zhang Fan is gnashing his teeth with hate.

Now even the government is confident enough. It is more convenient for enterprises to get equipment for Zhang Fan. Almost all the equipment that can be transported by air is air transportation. Fortunately, these equipment are not sensitive.

On Monday, the hospital rarely held a hospital affairs meeting. At ordinary times, even if Zhang Fan doesn't attend, Ouyang or Yan Xiaoyu will preside over the meeting instead of Zhang Fan. Ren Li can't count on it. At this time, she will say that she is the Secretary and doesn't participate in the specific work of the hospital. She is mainly responsible for the ideological work of the hospital!

Today, almost all the leaders at home went to the hospital because the equipment arrived. Doctors and nurses from various departments came to help, and almost the whole hospital came from the guard to the logistics. Many equipment Zhang Fan dare not let the moving company move.

It's not a question of compensation. Once a thing is broken, it can't be bought sometimes, because it's all set by set, and people don't just sell it.

Debugging is quite complicated. Engineers are specialized in debugging one by one. Doctors in the hospital and logistics guards shout to move things in the laboratory.

It will take another week for debugging. Zhang Fan is not idle this week. Zhang Fan has been thinking about what Shaohua said last time. Of course, he is not thinking about finding a partner for Jia SuYue, but about too many singles in his own hospital.

Originally, this matter was under the control of the Secretary, but the Secretary himself was divorced. Zhang Fan was embarrassed to let others come forward, so Zhang Fan could only be responsible for his appearance.

"Wang Hong, you said we were going to hold a fellowship. What units should we invite?"

In the office, Wang Hong made tea for Zhang Fan. Just about to leave, Zhang Fan called.

When Wang Hong heard this, she didn't ask anything. After thinking about it, she immediately said, "well, in general, the public security, procuratorial and judicial organs and the government. Our hospital often bothers people's traffic police. We should also invite them.

There is also the environmental sanitation bureau. The director of our medical waste family has said it several times, so we should invite it. Even if the Education Bureau has our own primary schools and kindergartens, we can't ask them!

And... "Wang Hongxin wondered. His president usually doesn't even maintain the relationship with the government. What's the matter today!

"Hi! I see. Go ahead and get busy! By the way, call President Chen to see if he is busy." Zhang Fan knew as soon as he heard that he asked the wrong person. This woman has a brain for her career. Still have to ask Lao Chen!

Zhang Fan wants to find Lao Chen. Even if Lao Chen is busy, he will say he is not busy. Of course, although Wang Hong is not happy, she dare not say. Now she can't understand Zhang Fan more and more.

After a while, old Chen came with a disheartened face, and the dust on his body didn't beat. "Isn't there a manufacturer for the installation? How can you get started?"

"Hey, I'm not at ease. I'm afraid they'll leave us a back door, so I looked around. You called me. I came in a hurry and didn't clean up!"

Lao Chen said to Zhang Fan with a smile!

"I think so. There are too many singles in the unit, which is not conducive to unity and stability. Moreover, many doctors and masters come from other places. We should care about comrades, and the best thing is to let them combine with the local opposite sex.

When they have children, it's not easy for them to run. It's more expensive to take care of their families. Therefore, I'm thinking about finding some counterpart units to hold a friendship meeting.

The secretary should be responsible for this matter. After all, the secretary is responsible for organizations such as the Communist Youth League, but you know, our secretary is special and people need to care about it. What unit do you think we should find to hold a young singles association? "

Lao Chen said without thinking, "it's best to be a teacher. Some teachers in tea vegetable college and teachers in primary schools, junior middle schools and senior high schools are the best. Our unit is already busy. We don't have to worry about finding a teacher to solve children's problems.

There are also some non functional units, such as those working in women's federations and those working in idle departments under the party and government office. This can also be done, but it must not be functional units. Xiao Li married a female officer of the Judicial Bureau, and both of them were busy. Sweet honey before marriage and play fight every day after marriage. "

"OK, you go and contact me. I'll arrange a place. Before the new year, I can make several pairs count!"

In the morning, Lao Chen was asked to contact him. As a result, the afternoon turned upside down. The slightly qualified units of various units, such as the trade union chairman of the unit, the director of the women's Federation, and even the Secretary of the Youth League, called Zhang Fan.

The younger ones get close first. What's inside and outside is that they also want to join the fraternity.

Older people say that Zhang Fan discriminates against them and despises them.

Of course, Zhang fan can't explain to them with a smile because a few words really make people feel bad: "I'm not afraid of the busy work of the hospital. I'll come whenever I want. I'm not afraid you can't accept it!"

"What's unacceptable? Just the income of the tea vegetable hospital is great. Can't they hire a nanny in the future?"

As a result, the tea element at the end of the year suddenly became lively. It was originally a small friendship of the tea element unit. As a result, it became a major event in the tea element area.

In the streets and alleys, the little daughter-in-law, the big girl and the young man suddenly took to the street and entered the mall.

The young women selling clothes wondered, "there are no festivals recently. How can clothes sell so fast?"

On the side of the tea vegetable hospital, male doctors are more active. They don't need the Secretary of the Youth League to mobilize. They come to the door to sign up, but single women are more tangled. One or two, no one signs up, which makes the Secretary of the Youth League dare not report to Zhang Fan's office!

Chapter 1469

Governments or administrative institutions often hold so-called friendship meetings at the end of the year, that is, to find a conference room for young activists such as the Secretary of the Youth League to take the lead in performing some talents, and then hold some social dances.

At the beginning, Zhang Fan also participated in the fellowship meeting that year. He forgot that it was sponsored by that unit. In a kindergarten, he sat on the children's bench and table with some melon seeds and oranges.

To tell you the truth, it's interesting to look back now. The tea vegetable hospital will hold a fellowship meeting this time. Zhang Fan will certainly not hold it in the kindergarten. Was it held in the kindergarten that year that they wanted to have children early?

"Lao Yang, I'm Zhang Fan, ha ha. Let me ask you something. Can the conference room on the top floor of the hotel be able to dance, eat and do activities?"

At noon, Zhang Fan from the lounge of the operating room, eating a lunch box and discussing the hotel. The phone call was to the only five-star hotel opposite the hospital. This hotel was opened by the three island businessman after Zhang Fan's operation.

It's said that it's a chain. The boss gave Zhang Fan a consumption card. He can live and manage food at will, but Zhang Fan hasn't been there once. Once I wanted to take Shaohua to see it. As a result, Shaohua looked disgusted, and Zhang Fan stopped.

This time is not Zhang Fan's face. To tell the truth, without these masters and doctors, Zhang Fan is expected to borrow a kindergarten even if he wants to hold it. After all, it's the government and doesn't spend money.

The tea vegetable boss of the hotel took the phone and felt waves of alpacas flying by. He wanted to tell Zhang fan that our five-star hotel is not a meat shop, but think about what the big boss of Mishima told him: if Dr. Zhang has any requirements, you must promise. If you can't do it, call me. Even if he wants you to take off your pants and see your naked ass, you should do it.

This is the original words. Some people envy British fans and nobles with curly wigs. In fact, those things are brought out for people to see. The who conducted a survey. In developed countries, the cases of strong generals in the three islands are not high, but the only official of the WHO women's and children's fund did not understand is that the victims of strong generals in the three islands are often men!

After hanging up Zhang Fan's phone, manager Yang's mind is a row of buffet meetings, and then get a stage light. Everything needs to be arranged. What manager Yang doesn't understand is to do activities.

What exactly is this activity? Finally, I couldn't understand. I took the initiative to contact Lao Chen. It's not that I'm afraid Zhang Fan will see his light hook, but that Zhang Fan is not satisfied.

The trainee students of the school finally came. This time, the students are in the charge of the tea vegetable hospital. In Zhang Fan's words, as long as the students are at the door of the school, it will be in the charge of our tea vegetable hospital.

The school had also prepared its own bus. As soon as I heard this, I pretended not to know. Let's see how the tea vegetable hospital arranges.

There are more than 60 classes in a grade. Students going to other hospitals have boarded the hospital bus one after another. Only ten classes going to tea vegetable hospital are still waiting with luggage boxes.

"Ha ha, it's estimated that you'll have to go to the tea vegetable hospital. Fortunately, I didn't choose me. Otherwise, I'll sit in a hard seat all night in this cold day. It's painful to think about NIMA's egg. Ha ha, look, isn't that the class flower of class three? Silly girl wants to go to the tea vegetable hospital. It's going to be cold. Silly girl's nose comes out."

A group of naughty male students are enjoying the heating in the bus, that is, the window can't be opened, otherwise they would have laughed at the following group of nerds this time.

Just when the school leaders were a little unhappy, they saw more than a dozen land spacecraft Eurostar buses coming slowly. The big one was a Lexus 570, and the sign was bird 0.

In this posture, although more than a dozen cars were driving slowly on the right lane, they were stunned that no cars were overtaking.

The motorcade entered the school, 570 opened the door, and Wang Hong jumped down.

This time, Lao Chen was supposed to come, but Lao Chen was too busy to care about the old in that month. Zhang Fan thought for a while and let Wang Hong go.

This is the first time since Wang Hong became the director of the hospital office. I also want to ask Zhang Fan. As a result, Zhang Fan has everything ready for him.

The motorcade belongs to the winery owner's travel agency, and 570 is the car of President Huaqing. Zhang Fan is not to make Wang Hong have face. Zhang Fan is to give these students and teachers a sense of being valued.

Wang Hong went to the bird market and learned that it was this arrangement. She went to the largest shopping mall in the bird market and bought some clothes.

When Wang Hong appeared, a group of green and astringent girls envied him. "President Li, director of the office of tea vegetable hospital, Wang Hong reported to you!"

When Zhang Fan came, he specially explained that we should keep a high profile and be a low-key man.

The headmaster was very happy when he saw that tea Su attached so much importance to it. He held Wang Hong's hand and shook it. Finally, he said, "director Wang looks very familiar!"

"Old headmaster, the microorganism you gave us in those years, I'm your incompetent student! Just today, the Dean has to let me come, otherwise I have no face to come and make no achievements. I'm

just the director of the hospital office. Now I'm out of clinical. I'm ashamed!"

Wang Hongzui was ashamed, but she couldn't see it on her face. The Medical University of niaoshi is also a department level, and now others' tea vegetable hospital is also a department level!

"Our dean said that he wanted me to invite you to teach tea vegetables. I don't know if I can invite you as a useless student."

"Hahaha, I felt intimate when I saw you. It turned out to be 03 students. Good, good, good. When I have time, I will go to see my student's hospital. Don't worry, I will support you!"

After a few words with the headmaster, Wang Hong began to arrange the students to get on the bus and roll call. Come out a student, Wang Hongfa a suitcase, come out a student, Wang Hongfa a suitcase. As for the teacher who went to tea vegetable, a red envelope of 2000 yuan was given to each person on the spot.

Say it's overtime!

This NIMA, the teacher who used to sit on the bus with other students and read jokes on his face, can't sit still. Why doesn't NIMA send it to other hospitals?

I thought going to tea vegetable was a hard job. I didn't expect the red envelope to be so thick!

The teachers with cold faces are much warmer at this time. Although two thousand won't make these lecturers and professors grovel, if they don't have money, they don't say it first. It's called respect!

I came the latest and left the earliest. I don't know whether it was Wang Hong's intention or unintentional. 570 stood at the exit of other vehicles. Other vehicles couldn't go if they wanted to. The license plate of bird 0 is still a number within 100. The driver of big guests didn't mean to urge.

The mighty motorcade set off, and more than 200 teachers and students set off from the school.

Wang Hong also made preparations this time. She let some old professors get on the 570, and she got on the bus and adjusted the atmosphere with a microphone.

"Dear teachers and students, I'd like to introduce myself... Here are my teachers and my younger brothers and sisters. I'd like to welcome you first. You can come to me for anything in the future, big or small. After all, we are our own people.

Now take the time to introduce the tea element hospital, which is established in

Under the leadership of president Zhang Fan, our simplest scientific research at present is allogeneic skin, which has entered the key confidential plan of national development. However, I'll tell you a little secret. They are short of people now.

Not only is there a lack of assistants, but also some group leaders. Those who have ideas can use snacks.

And our male antiemetics. Everyone studies medicine. I won't give you popular science when I'm a student sister, but you should know the prospect.

.....”

Along the way, Wang Hong kept tempting at the top of her voice. Despite the county magistrate's face when the young woman was in the hospital, she did a good job.

On the bus, especially a group of lecturers and professors, their faces were very good. They felt fooled and even had an impulse to go to the tea vegetable hospital.

When the students came to the tea vegetable hospital, they were directly shocked and began to be careful. At the beginning, some felt that they had studied well and could stay in the bird market. Now coming to tea vegetable is to give face.

As a result, as soon as I entered the urban area of chasu, I saw the flower hen of chasu hospital flying at a low altitude in the sky. This thing is too big.

"Elder martial sister, elder martial sister, is this the largest rescue plane in Asia in our hospital?"

"Yes, you have a good eye!" Wang Hong replied amiably. How can NIMA be a doctor when she is so old and can't see this!

"Sister Wang, can we take part in an air rescue? That kind of thrilling!"

"Yes, but you have to try to stay in the tea vegetable hospital!" said Wang Hongzui, but she was bubbling in her heart! Too childish, too childish!

In fact, if many doctors can keep this childishness all the time, it is the gospel of patients. Unlike Wang Hong, entering the official career early is tantamount to learning in vain.

This thing can't be said.

After entering the hospital, the students were even more shocked. The students were dazzled at the gate of the hospital.

The plaque at the gate is almost hanging half of the wall, including English, meatball, laomaozi, Shuimu, moderation, and even the Digital Research Institute. The plaque with copper plates on one side is reflected by the winter sun.

I don't know whether the light is dazzling or the name is dazzling. A group of students have the feeling of

kneeling.

"Is this all true? It won't be hung up by the tea vegetable hospital itself. I don't think the tea vegetable hospital will be so shameless!"

"What do you know? Don't you read journals? The quality of the core journals published by the frontier hospital is the best." the school flower looked contemptuous.

"Two people a dormitory, equipped with computers, bathrooms and toilets, are you free to combine, or according to my distribution, forget it, or I'll distribute it, otherwise you'll be mixed with men and women, and our dean won't be happy!"

Like fooling children, Wang Hong put a group of students in obedience.

As for the teacher's residence, Zhang Fan specially explained that he would stay in the expert building, whether lecturers or professors.

The students began to show off and called around: "ha ha, Lao Li, have you arrived at the hospital? We just arrived. It's a little far away. Of course you're close. Hey, don't say that. How many of you are in one room.

What? Four people, do you have a bathroom? No, do you have a computer? No, do you have air conditioning and floor heating? "

The other party was asked, "are you confused in the fucking car? Do you think I came to be the director of the hospital?"

"Ha ha, we have two people! Ha ha!"

Then NIMA's friendship boat turned over!

Chapter 1470

"Debugging is complete!"

At three o'clock in the morning, Zhang Fan's phone rang. Zhang Fan specifically explained that he would call him no matter when the laboratory was ready for debugging. Originally, he was an engineer and several doctors in the hospital had been busy. He couldn't help. He was a little embarrassed. He dumped a 13 to show that he attached great importance to it.

As a result, Zhao Yanfang took it seriously and called him at 3 a.m. after notifying Zhang Fan, Zhao Yanfang said, "OK, you know, I went to bed. I'm too tired!"

Then hung up. Zhang Fan silently put down the phone, gently patted Shaohua who woke up, and silently said in his heart: he will never install 13 again!

Early in the morning, Zhang Fan stared at two dark circles and hurriedly ate two eggs and went out. As soon as I arrived at the experimental building of the hospital, I met Ouyang. Ouyang looked at Zhang Fan's two dark circles and wanted to stop talking from the first floor to the 18th floor.

Finally, he couldn't help it. Looking at no one around him, Ouyang said, "it's important to go to bed on time when you're young! You'll have everything in good health!"

It was very implicit. Zhang Fan was embarrassed to explain.

Many people came to the laboratory. Of course, few came from surgery, that is, Li Cunhou, Zhao Jingjin and Luo Zhengguo came as presidents, and none of the others, from the director to the doctor, came.

Surgeons now feel that their Dean is no longer doing his job.

As for the internal medicine department, not only did the director come, but jumabek even took all the breathing doctors except those on duty. It felt like relying on the crowd tactics to fight the war of annihilation.

Regardless of everyone's curiosity, Zhang Fan looked at his eyes and went straight to the person in charge of the engineer, "have all debugging been completed?"

"After the completion of Zhang hospital, all indicators meet the P3 laboratory standard, that is, the area is a little small, and no further air treatment can be done. Otherwise, I think this laboratory can be upgraded to P4 level!"

It doesn't matter if Zhang Fan arrives. There are many buildings. There is still an empty building over there, but it is estimated that some capitalists in the high tech Zone don't want to.

"Hard work!"

"Everyone, enter in batches. Today you can visit it. When the pilot project starts, people who have

nothing to do will not come here. After all, this place is under strict control."

Zhang Fan seems to be telling everyone. In fact, he is telling jumabek.

Lao Ju is stubborn and determined to die. He has an attitude of never giving up until he reaches his goal. These days, he comes to Zhang Fan if he has nothing to do, and he comes to Zhang Fan if he has nothing to do. Zhang Fan feels like he has no place to hide.

Wearing protective clothing, a group of five people slowly entered the laboratory to visit. Ouyang touched the brand-new equipment in the laboratory and said, "what costs money is good."

"This is the test plan. See if there is anything to add?" Zhang Fan didn't go in, but found Zhao Yanfang and handed over the test plan sent by the younger martial brother to Zhao Yanfang in the office printing area of the laboratory.

"Did you write it?" Zhao Yanfang, who made Zhang Fan have two dark circles under his eyes, looked surprised. "You didn't stay up late last night to write this, did you?"

"What do you think?" Zhang Fan replied angrily, "Oh, I thought..." he didn't think it was right. He didn't speak again, but bowed his head and began to read the plan.

"Leader, yes, I think you can be the head of scientific research in the future. The writing of this plan is quite good and has a high level. It hasn't been engaged in scientific research for seven or eight years, but it doesn't have this level!"

"My younger martial brother helped me polish it. Don't do so many things, OK? Now let you find out the problem!" Zhang Fan is a little shy and it's difficult to put the knife into the scabbard.

Nima is always so hurtful.

"Yes, there is no problem with the process, that is, your DNA transcription protein needs to catalyze a ribose protein that can modify the translation of TB virus. Have you seen it or read the papers in that three stream journal?"

Moreover, you didn't describe the nature of the protein or the pseudo composition of the riboprotein. The leader can't do this. Do you know that the nature of the translated and modified protein will be different if any condition changes? "

Zhang Fan has really seen this. In the experiment in the system, he modified this protein through tuberculosis bacterial DNA, but this thing can't be said.

"Is this a professional question? Do you just say this idea is feasible?"

"In theory!" Zhao Yanfang glanced at Zhang Fan and thought to herself, where did you get so angry.

"In theory, we can have a try."

"I can't attend to it. You have to find someone! Or you can go by yourself!"

Zhang Fan's teeth are broken. I really want to say what's the use of you, but Zhao Yanfang has wrinkles in the corners of his eyes. He's embarrassed to open his mouth.

At present, the scientific research of tea element almost depends on Zhao Yanfang to put out the fire everywhere. Lao Li can't count on it. Now he is busy with his own skin allogeneic transplantation.

"OK, I'll try again, but you're all right. Come and have a look. It's all novices and infectious..."

Zhao Yanfang sighed, "you're going to kill me. OK, I'll take care of them for a month at most. You can't find someone quickly, otherwise you really can't. There are a lot of things in the surgery. Fortunately, there are ma Yichen and them, otherwise I won't have time to come."

Zhang Fan has many things to do. He has to find primitive tuberculosis, which needs to go to a more remote county. Zhang Fan decides to take Shaohua, the old man and the old lady to Saicheng this weekend. Also, the students have come, and the teaching side should also take a look.

Zhang Fan is not free tonight, because the first tea vegetable Fellowship will also attend. Also visit a university professor from bird market. Zhang Fan feels numb when he thinks about it.

It seems that I'm getting busier and busier. I feel like I'm stuck. While thinking, while going out, Zhang Fan felt that he was going to get his little elder martial brother, otherwise the scientific research would really kill Zhao Yanfang.

It was estimated that it was four or five o'clock when I went to bed last night. I got up early today. That's not good.

"Hey, our microbial teacher is not in the dormitory. He won't be confused and sneak back to the bird market."

Luo Shuwen, the leader of the student team and also known as the flower Department by the students, stood at the door of the teacher's dormitory and asked three or four licking dogs behind him.

Luo Shuwen is a girl of mixed blood. It is said that her grandparents are Lao maozi's aristocrats. This is not uncommon in the frontier. In those years, Lao maozi had many so-called royal families in the frontier, and her grandparents were descendants of Kirgiz and Kazakh.

Then grandpa and grandpa have Mongolian, Hui and Uyghur lineages, while her grandmother came here to do business from Jiangsu and Zhejiang, and her mother is also Han. Anyway, the girl said that if their

family spent the festival together, sometimes they had to hire an interpreter.

However, the girl is really beautiful. She has delicate skin color, three-dimensional facial features and black eyelashes. She is as long as a doll. The template comes like hanicz. I don't know whether it is the improvement after mixed race or why. If the girl is beautiful, her IQ and EQ are extremely high.

When she came to tea this time, she was ready to find a way to contact scientific research at the undergraduate stage, and then strive to enter the academician's door. In the Frontier Medical College, she had the greatest chance to enter the academician's door. So after she cleaned up her dormitory, she brought three or four little male dogs to the teacher to ask.

As soon as I was about to ask someone, I saw the president of the tea vegetable hospital shaking hands with his teacher one by one in front of the expert building with an old man and sister Wang Hong.

Zhang Fan is already the goal of the young generation in the frontier. We think he can be the president, so can we! There are more opportunities to go directly to prefectures and counties without going bald in big cities!

Many school dregs think so, but Luo Shuwen doesn't think so. "Senior sister!" she wants Zhang Fan to pay attention to her. Of course, she doesn't want to have sex relations. People who think so are dirty. She wants to enter the laboratory.

It's better to have a promising laboratory. She doesn't want to go to the successful laboratory, because she is also a chore, and she may not be able to learn anything.

"Luo Shuwen!" Wang Hong greeted with a smile and whispered to Zhang Fan, "the captain of this group of student teams, learning is great!"

Zhang Fan nodded slightly, and several teachers and professors kept praising the girl. Zhang Fan thought to himself, what does NIMA think.

"Hello, classmate Luo!" Zhang Fan took the initiative to say hello with a smile, and then said to the lecturer of Microbiology: "our laboratory doesn't boast. It's much better than that of the University. You can go to see our P3 tomorrow when you have time. It can almost be said to be a quasi P4. Most people can't go in!"

After all, being a teacher is still a little reserved. Luo Shuwen looked anxiously and Wang Hong smiled. "Dean, I think I can choose some excellent students to visit, such as classmate Luo."

Zhang Fan slightly expressed a more embarrassed face, "the next step is mainly to study TB. You all know TB. It will be infectious. I think you..."

"Dean Zhang, you can let the teacher take us. In fact, when we were in school, we had been exposed to some low transmission tests. If you don't believe it, ask our teacher!"

"Well, there can only be three places. Although I am the Dean, I still have to obey the order of the laboratory leader! Also, there is a salary to go to the laboratory. This is according to the basic salary of our tea vegetable hospital. Not much, just a little more than 10000 a month!"

Looking at Luo Shuwen's excited expression, and the microbiology teacher tried to pretend not to be excited. Zhang Fan thought in his heart, well, the thugs are coming, and now he needs to take the lead. I don't believe it. I can't get it out!

Although a layman has money, he is also a layman, so it is really difficult to want a layman. There are no hands available for tea, and the microbiology teacher in the bird market happens to be a thug. Who makes the doctors in the infectious diseases department lose heart.

A grass-roots team was established. The team leader Zhang Fan and Zhao Yanfang, the deputy team leader, the microbial lecturer of Niaooshi Medical University, the deputy team leader, director Huang and director Zheng, the team members, five doctors in the Department of infectious diseases, and three students led by Luo Shuwen of Medical University, guide Lu Ning outside the staff!

In this way, the TB experiment led by the dean of tea was established, and Lao Ju wanted to come, but this guy had a bone in the back of his head. Zhang Fan thought this guy also wanted to get TB. As soon as he asked, he knew that people wanted to get lung bacteria through the laboratory. NIMA could do it, but Zhang Fan refused.

It's not easy to twist it into a rope. Let you come in and break it up again. I have no place to cry. Zhang Fan sternly rejected Lao Ju!

Chapter 1471

After entering the fortress, Shaohua's eyes lit up when he saw the tea test car as long as the train skin. He whispered to Zhang Fan, "you're good. You said you took the teacher's mother to travel. As a result, you fooled the old lady to work!"

After walking for more than six hours on the snow covered highway of more than 200 kilometers, the old man and the old lady have long fallen asleep in the car. It is no exaggeration to say that the snow covered highway is tea in winter. If you go further to the west, bulldozers have to be prepared to open the road every winter.

"Hehe, by the way! It's mainly to accompany you to travel and find some tuberculosis specimens here by the way!" Zhang Fan explained to Shaohua with a smile that Shaohua was happy even though he said he was coming for tourism.

Really, she understands that Zhang Fan's present is not relying on his parents, but on his own efforts.

Although he also wants Zhang Fan to accompany him wholeheartedly, Zhang fan can try his best to make himself happy after work. Shaohua is really satisfied.

The confused old man and woman also woke up. The old man was sleepy. Old man Lu opened his eyes and smiled! "Are you here for a free clinic? Just in time, let huazi take the old woman around, so I won't go."

When Zhang Fan came, he just asked Wang Hong to inform the president of the local county hospital. As a result, not only the county hospital came to Saicheng, but also the government came to help. As soon as Zhang Fan's car arrived, he saw mengke running towards Zhang Fan with a smile on his face.

"Why is he here?" Zhang Fan said in wonder, "Meng Ke, Dean Meng, isn't he the dean of the township health center in subutai?"

Mengke and Zhang Fan knew each other very early. When they first went to the countryside, they went to mengke's health center. Later, the president of quark county hospital delegated Zhang Fan to the garrison, which was also the mengke health center.

Later, because Meng Ke and Zhang Fan were familiar with each other, they often photographed the nurses and doctors in the health center to study in the city, and then the health center became very popular. Later, they sold all the sheep, horses and cattle on their grassland, and then they were promoted to the position of president of Saicheng county hospital.

"Darcy, miss me!" Seeing Zhang Fan get off the bus, Meng Ke hugged Zhang Fan and patted Zhang Fan's back like a drum.

Moreover, he whispered to Zhang Fan, "I'm the president of the county hospital now! Hey, I never dreamed of it. I was promoted by your light."

Zhang Fan smiled helplessly. He knew that this guy was a little similar to Batu. Although he looked simple and honest, he was clear in his heart.

"Director Wang Hong informed us that you were coming, and I was so excited that I couldn't sleep. You

see, not only the people from the hospital came, but also the people from the government came to help. Look, the one in the distance is the deputy county magistrate."

Seeing Zhang Fan arrive, the leader in charge of health in Saicheng also walked over quickly. Although it is not a system, but after all, he is in charge of health. In the future, he asked to go to more places for Zhang Fan, and although Zhang Fan is young, he is higher than him.

"Hello, Zhang Yuan!"

"Hello, tulsun county magistrate!"

Zhang Fan smiled and shook hands with each other. "Just call me Lao Tu! The people of Saicheng welcome you! It is said that the tea vegetable hospital is going to treat tuberculosis for the people of Saicheng. The people of more than a dozen surrounding pastures have come to the county since yesterday."

The leader in charge of health did not emphasize that others should not call him president like jumabek.

Zhang Fan looked up and saw that many people had lined up in the hall of the county hospital. The construction of the hospital is really good. In recent years, the state has also made great efforts to the grass-roots hospitals. The hospital like a small foreign building is very elegant.

Fortress is a special place. There are 13 ethnic groups in the frontier. It sounds like a good feeling, but this place has high mountains and dense forests. It's almost rare to see agriculture. Most of it is animal husbandry.

They are very mobile. Although their registered permanent residence is in Saicheng, they are in other counties in summer and come back in winter. Therefore, there are often three people in a family this year. Maybe they will become several when they come back next year.

Census screening is almost impossible. This is why Zhang Fanlai is looking for TB strains here. Originally, Zhang Fan wanted to go to the countryside with the surgical director of the county hospital. Unexpectedly, Meng Ke was here, which saved trouble.

Deeply afraid that Zhang Fan didn't know his credit, Meng Ke said hurriedly: "Zhang Yuan, you call. With the support of the government, I sent many people to the grassland. There are people from a cavalry company."

"Hard work, hard work." Zhang Fan thanked.

"It's not hard. What's hard is that we haven't done enough. Zhang Yuan, you should come here more in the future. Your appeal is quite strong. I learned that the president of tea vegetable hospital came to Saicheng in person. Many elderly people who can't walk were carried to the county by their families."

After a little greeting, old man Lu and old lady Shao Hua also got off the bus. Zhang Fan wanted to introduce them, but he was stopped by the old man with his eyes, and Zhang Fan gave up.

"You take the old lady to the hotel. When I'm finished, we'll go to the forest farm here!" The hall is full of tuberculosis patients. Zhang Fan doesn't want Shaohua to contact. It doesn't matter if you eat a bowl of rice yourself, but it's not necessary for Shaohua to be exposed to this danger.

"OK, don't worry. Be careful yourself." Shao Hua is leaving.

"What is this?" The leader in charge of Health asked.

"My wife and my family elders. I haven't been to Saicheng. I know the scenery here is good, so..." Zhang Fan introduced me with a smile.

"Ouch, distinguished guest, distinguished guest! All right, Zhang Yuan, don't worry about it and leave it to me." Without waiting for Zhang Fan to reply, he called the director of the tourism administration directly, "send a flower of our tourism administration to the Saicheng hotel to receive the wife of the president of the tea vegetable hospital!"

Zhang Fan didn't insist either. It's good if you don't enter the lampblack, okay! However, Zhang Fan has no intention to change this atmosphere. He just wants to collect disease strains smoothly and treat these patients who have not received standardized treatment.

Seeing Shaohua leave the hospital under the guidance of the county officer, Zhang Fan wants the old man to leave too. After all, master is a general doctor, not an infectious diseases department, but the old man doesn't want to! "Boy, don't look down on people. When I treated tuberculosis, you couldn't read!"

After Shaohua left, Zhang Fan asked Wang Hong to take down the mask and white coat from the test car. Wang Hong helped the old man put them on, and Zhang Fan packed them here.

Entering the hall, Zhang Fan was unhappy! Because he found that many cough patients and ordinary patients were mixed in line for treatment.

"Wang Hong, what's going on? Why not make an isolation area! Do you know some basic knowledge of infection?"

Zhang Fan certainly won't criticize mengke. What do you know about the goods that are busy shearing wool on the grassland every summer.

"I....." Wang Hong's grievances can't be explained, but the leader is angry, accept the criticism first, and then find a chance to speak slowly when it's done.

"It's my fault. It's my fault. I think the hall is so big and well ventilated. It should be all right. Ouch, Zhang

Yuan, don't scold director Wang. Director Wang asked me to isolate. I think..."

"Come on, quickly get out of an isolation area and let those doctors without masks withdraw. We can enter the tea vegetable hospital. Brother, this line, at the level of county hospital, must not be careless.

Do you remember Dean Zou of quark, the successor of Dean Batu. He used to be the director of the ICU of the tea vegetable hospital. Later, after taking office, he said that since he became the president of the county hospital, he had not slept well and was worried every day.

Brother, I made a mistake and was taken care of by others because other seats were not hot! "

After all, they all met in the past. In those years, people also gave Zhang Fan a special treat to slaughter sheep. That's the fireworks. Zhang Fan also wants to remind him. It's up to him to listen or not!

Soon, the quarantine area came out. Zhang Fan, Zhao Yanfang, old man Lu, director Huang of the infectious diseases department, and the four infectious diseases doctors who decided to stay in the laboratory were all armed and began to sit down for treatment.

"Do you have a low fever?"

"Do you have a cough?"

"Is there blood in the sputum?"

Zhang Fan and Zhao Yanfang kept consulting and drawing blood with the doctor's advice. "Zhang Yuan, Mr. Lu asked you to go there and Dr. Zhao to go there."

"Good!" After Zhang Fan handled the patient in his hand, he got up and left. When he came to Wang Hong, "I just wronged you!"

"No, no, nothing!" Wang Hong's eyes are red. She didn't expect Zhang Fan to apologize!

After entering old Lu's outpatient ward, Zhang Fan saw a young girl sitting in front of old Lu, wearing a fur coat. Of course, this fur coat is not the kind worn by city beauties, but a sheepskin coat with wool.

"This is transferred from gynecology!" After seeing Zhang Fan and Zhao Yanfang, old Lu said.

"Check it first!" Then Zhang Fan said to the girl, "Hertz, what's wrong?"

Hertz is the girl's transliteration. Zhang Fan's language talent is too poor, so he will say one or two non-standard national languages.

"Belly, there seems to be a doll in the belly, dangling! And cough and itchy ass!" The young girl said embarrassed, lowered her head, big black eyes, and secretly looked at the young male doctor in front of

her.

"Married?"

"No!"

"Is there an object?"

The girl blushed, looked up at Zhang Fan and shook her head. In fact, girls on the grassland mature earlier than those in the city, because they have seen all kinds of animals with green hair in spring since childhood, so Zhang Fan must ask clearly.

"Lie down!" Then he glanced at Zhao Yanfang and said to the girl, "I'll give you a physical examination!"

It's not like seeing the girl Zhang Fan, but actually Zhang fanxin can't trust Zhao Yanfang's physical examination. Just like Zhao Yanfang can't trust Zhang Fan's scientific research, doctors don't trust others in their fields, only believe in themselves.

The girl lay on the examination bed and began to undress. Anyway, it's hard to take it off. Because of the fur coat, the rope is tied firmly. Zhang Fan glances at it. This thing has no technology and can't be solved at all.

When I took off my clothes, my wheat colored belly bulged slightly and looked really like I was pregnant.

But Zhang Fan put his hand on the girl's stomach and knew that NIMA was a doll. It was clearly a belly of water.

With the force of Zhang Fan's hand, it pressed on his belly, and the bowel sound began to rise. It was like a fart detour into the abdominal cavity. The young girl was embarrassed to close her eyes.

"Does it hurt?"

"Well, it hurts. You should be gentle!"

After the inspection, old man Lu asked, "how's it going?"

"A high probability is tuberculous peritonitis, ascites are coming out!"

"There's a high probability. This is peritonitis. Look at the girl's anus!"

Although the girl was ashamed, she obediently took off her pants. After the thick robe was taken off, the smell of Blood Fermentation mixed with the sour smell of fat covered came to my face.

Really, many people think that gynaecologists and male gynaecologists will be beautiful. In fact, NIMA

deceives people. If you don't get boring in life, you have a strong state of mind. It's also beautiful. Fart!

The girl's anus is obviously red and swollen. The swollen skin seems to be smeared with pink lipstick, but the center is pink and the periphery is full of white spots. It's really like a little red. There are all kinds of scratching marks around.

"This is typical tuberculous peritonitis with perianal infection!"

Only at this time did Zhang Fan understand that the old man has a grudge!

"I think this girl should smoke ascites as soon as possible!" The old man didn't finish what he said!

"Yes!" Zhang Fan nodded. There was no problem around the anus, mainly ascites. The girl's wheat color was not sun dried, but there was a problem with her liver. This was the main reason why the old man called Zhang Fan over.

Chapter 1472

The predecessor of Saicheng hospital was a talent. Many hospitals were contracted by a certain field for various departments. For example, a famous capital hospital was contracted, and then said under the banner that it could treat all kinds of cancer.

As soon as he became a president in the 1990s, the president secretly contracted out the operating room without showing any mountain and water leakage. Then when the atmosphere was a little tight, the president resigned and went to the sea, and the boss took off to get a private hospital. Anyway, this guy was in trouble. Even if he was dismissed, he could still be a doctor, You can still stay here until you retire, with thousands or tens of thousands of pensions.

But now I have to jump out and fight against Ouyang. This is ignorance of life and death.

Ouyang directly made a phone call and called the Saicheng government, "is it according to corruption and bribery, or according to the epidemic situation?"

Ouyang directly called the big leader of Saicheng. After he said something, he just said, you see what to do. If you don't deal with it, I'll deal with it!

Ninima, the leader of the city, cried. Is this something that can be handled according to the epidemic situation? "Check, check, he definitely has something to do with drug dealers! What's this called!"

Originally, the leaders who pretended not to know also came to the hospital in person. Tieqing sat down in the hospital with a face, "I work here now and work here with the doctors of tea vegetable hospital. They don't refund me!

I'd like to see if our doctors in Saicheng can still use it. And be a trained doctor from time to time! "

He is also desperate. Really, sometimes you have to admire these bailihou's wisdom, which most people can't think of!

Treatment, a patient in one ward, a doctor in six wards and seven nurses, all kinds of treatment began in an orderly manner.

The whole surgical ward in Saicheng is like a cold. You don't have to go in. Standing downstairs, you can hear the incessant cough inside!

Chapter 1473

"Dean, the European hospital has gone to the government, and other secretaries have come to the hospital to work. Do you take time to say hello?" Looking at Zhang Fan with a little Kung Fu, Lao Chen whispered to Zhang Fan.

In fact, Lao Chen didn't feel at ease about Ouyang's trouble with the government. He didn't say anything else. He was afraid of Ouyang's age. The most important thing is that Zhang Fan is young and can't make more enemies!

Lao Chen thinks comprehensively for Zhang Fan.

Zhang Fan was stunned. He was not stupid. The practice in the dean's position, to tell the truth, put a pig on such a large stall, and he can be a little obedient over time. "Forget it, the old lady is shirtless. Although we don't want to make things big, we can't pull the old lady's hind legs. Just don't know. I'm talking. Am I younger than his official?"

At the last sentence, Zhang Fan was reluctant.

"Oh, yes, I think it's bad!" Lao Chen smiled and was right when he thought about it. The little Dean of his family did not give money to the boss of tea vegetable. He was really not afraid of the boss of Saicheng.

"Well, don't stay in the hospital. Let others say you're bad. Take Xiao Chen to see my teacher's mother. We won't give others the face of the boss of the city. There's nothing wrong with us. Don't neglect the old lady!"

As soon as Lao Chen heard this, he immediately said, "don't worry. I'll drive there. I'll drive your car there. I'll take the old lady around in person. The dean is working and I'm going to travel. I'm really a little embarrassed!"

"Hey, you're also a job! All right, let's not flatter each other!"

Zhang Fan helplessly looked at the smile on Lao Chen's face and echoed. Seeing the patient coming in, he sent Lao Chen away.

Shao Hua is young and fine. If the old lady is said by the staff, the old man will feel very uncomfortable, so Zhang Fan is not at ease.

In fact, Zhang Fan is still too young to understand the ideas of people in the official career.

Originally, Zhang Fan thought he was torn up with Saicheng, and the old lady would be wronged. As a result, when Lao Chen went, there was no grievance. Originally, it was accompanied by two small officers from the microscope office.

As a result, the boss of the micro office, together with the director of the women's Federation, and the best guide compiled by the Tourism Bureau, drove to Wenquan Township in a special car for veteran cadres of Renda.

The name of this township directly starts with the hot spring, that is, the road is too winding, otherwise it is definitely a good place. The natural sulfur rich self heating hot spring is said to be very good for some skin diseases and the elderly.

Especially because there is no commercial development, it is directly surrounded by township leaders to create pure natural hot springs, rather than some bathhouses with extreme commercial development. There are no outsiders here. Every year, some rich wives come.

This time, the county said, don't go if you have nothing to do. Leave it to the wife of the dean of tea vegetable!

Shao Hua didn't know. If he knew, he wouldn't go. In the car, Shao Hua looked sad, "Shiniang, do you think this infectious disease would be very dangerous? When I looked at it at the door of the hospital,

there were a dark group of people inside, master and Zhang Fan..."

Shao Hua is a layman. When he heard about infectious diseases, like most people, he tried to avoid harm. At that time, he wanted to take Zhang Fan and old man Lu away, but there was no way. His own men ate this bowl of rice.

Can he go?

No!

Zhang Fan has no psychological pressure, but Shaohua's sadness can be described as restlessness.

"It's all right. You're young and don't know. The country has become richer in recent years, and this disease is much less. When I was young, your master and I could encounter this disease almost every day. As long as the preventive measures meet the standard, nothing will happen.

Hua Zi, it's time for you to have a child. If you give half of your heart to the child, you won't be so sad. It's hard to be a family member of a special line! "

.....

There is no airtight wall in the world. It depends on others. The number of tuberculosis in Saicheng was so large that it didn't take a day to spread to tea.

Because the horse meat and intestines in Saicheng are popular every winter, almost everyone has eaten tea.

"Shao Hua, where are you? What? You went to Saicheng. God, you have to be careful. You have to be careful. I heard..."

"Ya Nan, where are you? Didn't you go to Saicheng? It's said that Saicheng is surrounded by the police! It's also said that many people have been infected with tea. Is it true or false?"

Jia SuYue called Shaohua. Shaohua was not in the mood to talk nonsense with her. He said a few words and ended the call.

Jia SuYue was unwilling and felt that Shaohua had become the president, and his wife began to hide. Then call Wang Yanan.

Wang Yanan had just had an operation. When he heard the phone call, he looked confused. "Why don't I know? The superior didn't notice? Your father heard it at the meeting?"

Wang Yanan still believes in the official language. In fact, the carrying and infection of this disease are two different things. Therefore, according to prevention and control, tuberculosis infection is not even

grade A, mainly because the disease continues.

"Oh, my God, you are too Buddhist as a doctor. OK, I won't tell you more. Can you contact me? I want to have a physical examination."

"You didn't finish it until the first half of the year. How can you do it again! Oh, my aunt, I'm still busy this afternoon. There are four operations waiting for me!"

"I only ate horse meat yesterday!"

Wang Yanan doesn't understand. Is there a necessary connection between NIMA eating horse meat and physical examination?

Before we finished here, the operating room began to shout: "Ya Nan, the patient is coming!"

Wang Yanan said directly, "well, I'll have an operation. Let's talk when it's over!" Just hung up.

"It's really unreliable. You don't worry about me at all. Are you still a sister?" Jia SuYue pouted.

In fact, she doesn't know that when many doctors answer the phone during the day, they are really the same as those who drive out thieves. Before they are polite, the other party hangs up the phone. Many people are a little dissatisfied with this doctor friend.

This is really not a doctor's neglect, but sometimes I really can't help myself. When he has nothing to do, he can politely say good, good, good, hang up and hang up with you for a long time. After all, they are all social people. Who is not in society!

Jia SuYue felt his throat itchy, so he called Shaohua again. As soon as Shaohua heard this, Jia SuYue felt uncomfortable, his throat itched, and he felt infected. At this moment, Shaohua was a little worried.

At the right moment, Lao Chen also rushed over. She hesitated to hold the phone. You don't have to talk about Lao Chen. He can probably guess what you want to do!

"Mr. Shao, is there anything inconvenient for Zhang Yuan? Tell me that it is also my responsibility as vice president to solve the difficulties of the hospital's family members. Don't disturb Zhang Yuan for small things."

Shaohua hesitated and told Lao Chen. Lao Chen is too confused. This is the wolf grandmother with little red riding hood. Looking at the kind eyebrow and good purpose, he actually controls everything in the hospital.

"What a big thing. You support the work of Zhang Yuan too much. It won't work. It won't last long. If there's something you can't do in the future, I'll trouble Zhang Yuan!"

Old Chen said Shaohua blushed. It's like Lao Chen asking Shaohua for help again!

The imaging department said, "it's rare. Chen Yuan called through the back door. I want to see who made our Maitreya Buddha open a golden mouth."

Lao Chen is better in the hospital. Anyone can ask him and help him as much as possible, but he rarely asks people. Even if he asks people, he usually goes to Zhang Fan Ouyang and never speaks to others.

After a while, Jia SuYue went into the hospital in fear. It was not that she was afraid of death. The main reason was that she really ate horse meat at the unit party yesterday, and the trail was carefully spread with nose and eyes. What's more terrible is that the unit took one away at 120 in the morning.

It is said that it was an infectious disease, which made Jia SuYue a little afraid. In fact, 120 took away one with diarrhea. I don't know whether he ate too much or unclean. He pulled it into his pants, and then he hit 120.

"This woman is beautiful! Who is old Chen? How can he know her and explain it? Old Chen loves his feathers!"

"You know a fart, Lao Chen doesn't know, and the people above Lao Chen don't know?"

"You said Zhang Yuan?"

"You're stupid. Zhang Yuan knew each other. Zhang Yuan called directly!"

Two small doctors in the imaging department watched Jia SuYue hide in the corner and gossip.

The director of the imaging department received him personally. After listening to Jia SuYue's complaint, the director of the imaging department wanted to laugh but didn't laugh. However, he was very face saving and personally got on the machine to check Jia SuYue.

"Remember to take off your underwear!" Because it was explained by Chen Yuan, the director specially explained that he wanted to shoot more clearly.

Because many underwear have steel rings, after shooting, it seems that there are two holes in the chest.

Jia Su became more and more confused. As a result, she bit her teeth and really took off her clothes! The director was silly. "What are you doing? What are you doing? Put on your clothes!"

Jia SuYue is crazy. She thinks she's taking off her coat!

Then he got on the instrument with a face of shame and anger. The director held his mouth and it was estimated that his mouth was bitten by his teeth!

I really can't laugh.

After the inspection, Jia SuYue didn't take the inspection report and ran away! While running, he scolded Zhang Fan: ouch, the subordinates of local goods are also local goods. Black local goods, black local goods, ouch, I'm ashamed!

They all went out of the hospital. As a result, Wang Yanan was not at ease. After asking Shaohua, he learned about Jia SuYue and came to the radiology department. As a result, the director of the family was paralyzed with laughter. Then Wang Yanan was embarrassed to hold Jia SuYue's small underwear in the back, "what are you running? Your things are down!"

Jia SuYue felt that he would never come to the tea vegetable hospital again.

This is probably the epitome of an ordinary person who knows bad news!

.....

"The tea vegetable hospital doesn't pay much attention to rules and regulations. Has the city informed them to come down? Has the city informed us to receive them? We received them kindly..."

In the fortress government, someone shouted abuse.

However, although some people don't say it, they say in their heart, "if you have the ability, go and say it to the dean of tea vegetable face to face. Don't say the Dean, just one Ouyang can tear you!"

Because the director of surgery at Saicheng hospital has been suspended.

.....

Zhang Fan doesn't worry about these things. After standard treatment, the strains are complete.

"Zhang Yuan, I seem to have found the protein you said!" Zhao Yanfang pressed her trembling body and called Zhang Fan.

Originally, Zhao Yanfang came with the mentality of fooling around with Zhang Fan. It turned out that she really seemed to have found something.

As soon as Zhang Fan heard this, he said, "NIMA has finally found out. If she doesn't find out, I can't help it! There's really no drop. If she doesn't find out, what do you want me to fool you!"

Chapter 1474

Medical research is slightly different from other scientific research, because sometimes people feel that they are going to succeed. It seems that they have found a useful thing, such as a variable protein. Then they spend a lot of human and material resources to study it. Finally, they find that this thing is pure variability, has no ability to change key problems, or it is too destructive.

It's like a man who finds a Meiniang, beautiful. When he grabs a Meiniang, he wants to fool around. As a result, he takes off his pants and finds that the other party is bigger than himself. This mentality is often encountered by medical researchers.

Zhao Yanfang called Zhang Fan and was really excited, because so far, all the information in Zhang Fan's test plan is consistent and all expectations are achieved steadily. This made Zhao Yanfang excited.

Of course, before the last step of taking off your pants, the excitement can only be a small range, small groups of people excited together.

Zhang fan can't get away. Scientific research is important, but treating patients is more important. This thing has no choice. Scientific research is to see a doctor. It can't be said that it's for scientific research. The patients at hand have given up.

"What now?" Zhao Yanfang asked Zhang Fan as soon as she recovered her excitement.

"Go on, what, do you think there's a problem?" Zhang fantou is big. Do you want to ask me such a simple question? Am I wrong about you? I put you in the position of scientific research head of tea vegetable hospital. Now you ask me what to do?

"The preliminary work and experiments are basic. Even if an undergraduate can do it, he can do it according to the picture and be patient, but the later experiments must be carried out by experts.

In particular, the difficulty of protein superposition in the plan is more than my heart but less than my strength. I was born in transplantation. When it comes to protein modification superposition, I can't take it down. It is estimated that President Li is a little sure. "

As soon as Zhang Fan listened, he understood. Now the door is open. As a result, he found that the threshold is too high. Can't get in!

Lao Li, Li Cunhou, has almost run away from the capital in recent years. A fat scholar who was originally a flesh and butter is now so thin and thin that he doesn't know that he has diabetes. Moreover, now Lao Li's experiment has been regarded as a national project, and now he can't take it out at all.

Zhang Fan hung up the phone and became more and more sad. NIMA, the Dean, was too oppressed. Let alone become the Dean, even the acting director, could print the ass marks of beautiful medical representatives on his desk.

But I have become the dean. Today I worry about where to ask for money, tomorrow I worry about where to dig someone, and the day after tomorrow I have to think about how to cheat the Medical University in the bird market.

Really, sometimes, Zhang Fan feels that he is not a dean, but a pit filling master.

Looking back at his master, Zhang Fan sighed. The old man is getting old. Let the old man go to the laboratory, OK! But NIMA let the old man live or not and shook her head.

Zhang Fan takes out the phone and calls Qingniao's junior brother Lu Ning. Others come to talk about conditions and treatment. Junior brother is much more convenient.

"Are you ready? I've even got your underwear ready here. Why haven't you come yet?"

Zhang Fan started with a tone of questioning his teacher, not bullying others, which is also a way and method.

What do you say about Lu Ning? Unlike other elder martial brothers, other elder martial brothers are grumpy, and Lu Ning is especially like his own master. It feels like an old-fashioned cultural man.

"Hey, the resignation has been approved. I thought I was very important. Unexpectedly, the report was typed. People signed it directly without hesitation!"

Younger martial brother, there is a feeling of resentment. Zhang Fan is really laughing in his heart. NIMA helps me too. Zhang Fan especially understands this matter. This is the same as that when Batu was arrested, the new president cleaned up Zhang Fan when he came to power. The reason is the same.

"Brother, it's not that you're unimportant, but that you're too important. People are afraid of you. If you make a big research, can people's position be stable? All right, my dear brother, I'm going to die here. Don't be sad about spring and autumn.

I'll ask the hospital to buy you a ticket, just tomorrow! "

"Do you know the spring and Autumn period? I like to cheat all day. I have to clean up what happened! I can't shake my hands to get tea."

Lu Ning was amused by Zhang Fan.

"What you have, just a few broken clothes, what to clean up, a wife without a wife, children without children, just a broken car and house, what to clean up."

"I still have a lot of books. Many of them are out of print. What do you know!" Lu Ning said reluctantly.

"Brother, there's really going to be a death here. You'll come tomorrow. I'll send someone to clean up for you!"

On entanglement, how could Lu Ning entangle Zhang Fan? Finally, he compromised and promised to fly over tomorrow.

Zhang Fan is really relieved to hang up the phone.

The phone hung up here, and the secret phone rang. Zhang fantou was big. NIMA won't have an accident again.

"Comrade Zhang Fan, I'm the office secretary! Where are you? Is it convenient? The leader wants to talk to you!"

"Good leadership!" As soon as Zhang Fan heard this, he understood that nothing had happened. Generally, in case of an accident, the boss calls, the office or the Secretary, and they are all straight to the point. Where is it so slow to ask where you are? Is it convenient.

Something really happened. Even if you are fighting with your husband and wife, you should stop.

"Zhang Fan, tell me the truth, is the infectious disease in Saicheng serious?"

"Leader, I'll report to you first. It's not serious according to the intensity of infection! 90% of the patients are carriers, but they are not infected. Moreover, no drug-resistant patients have been found so far."

As soon as he said this, the leader seemed to take a sigh of relief.

Then, Zhang Fan said: "according to the treatment situation, it is very serious here. Most patients' treatment is not standardized, and even most patients have not entered the hospital for formal treatment."

"Is there any difficulty?" You can tell who to lead as soon as you hear it. Zhang Fan is going to make a request.

"Lack of money, lack of funds, lack of treatment equipment, lack of..."

"Comrade Zhang Fan, I also talked to you on the phone after consulting experts!" The leader immediately stopped Zhang Fan from talking. NIMA, is it appropriate for me to build another hospital for you.

Zhang Fan didn't blush at all. He didn't feel uncomfortable or unnatural after being exposed, as if nothing had happened.

He continued: "leader, let the experts come down and have a try. You know, we have used nearly 50000 or 60000 gasoline from tea vegetable to Saicheng these days. The mountains are closed by heavy snow, and doctors and nurses are running around.

Really, it's no exaggeration at all. At present, although all patients are formally treated, once there are drug-resistant patients or a flu, it will be serious. Leader, are you asking Lao Yang of the bird City infection hospital?

What does he know? He hasn't been to the grass-roots level for many years. He doesn't even go to the clinic in the hospital. If the grass-roots level is not controlled and the flu breaks out, this is a big problem. "

"Don't care who I consulted, Comrade Zhang Fan. Don't exaggerate your function words. OK, I have two million special funds that haven't been moved. This is the funds I'm going to get for agriculture, rural areas and farmers next year..." the boss was a little unwilling and thought that maybe Zhang fan could save himself some money.

As a result, Zhang fancai didn't care about you. When he asked for money, he spent it according to your bank card, just like a certain field.

"Leaders, look ahead and eliminate the danger of a county with high incidence of tuberculosis. Let alone others, this is serious good governance. If in ancient times, the local people would give it to you..."

"Come on, Comrade Zhang Fan, I've given you the money. You must ensure that the dangerous flames are eliminated. I heard rumors in the bird market." Then he was afraid that Zhang Fan would continue to think about his face endlessly and ask for money. He quickly hung up the phone.

The bird market boss sat in his chair and wondered why NIMA had the feeling of calling her creditor.

However, for Zhang Fan's ability to work, he was still assured that he was a little expensive and a little meat pain. He finally saved some money at the end of the year, and was poached by Zhang Fan with a shovel. He felt that Zhang Fan was scaring himself, but he thought again, forget it, just think he was cheated by experts.

It's too common for serious experts to fool leaders. Finally, the country had to set up a special audit department to let experts deal with experts.

"Why hasn't there been any news from the tea vegetable laboratory recently?"

"It's said that debugging is over."

"Really, money is NIMA cool. The P3 level laboratory has been running in less than a week. Our school's laboratory hasn't been debugged for a year."

"Hee hee, let me tell you about the workers in the tea element P3 laboratory. A doctor took the lead. Zhao Yanfang, you know, was born in transplantation. The other is the director of the infection department who hasn't seen a core journal published in 30 years."

"I'll go. Isn't this nonsense!"

"What's more, let a university lecturer of Microbiology be the team leader. The professors are not, but only one lecturer. The rest are either clinical undergraduates who have not graduated from the university or have not engaged in scientific research for ten thousand years."

You said that Zhang Fan, a tea vegetable, is not cheating on his title. What is he doing? Everyone has paid attention to it recently. He must ask you to buy scientific research projects or achievements. "

When the leaders of the seasoning network stopped, some small sparrows claimed to know the inside story, and then kept teasing Zhang Fan.

Tea vegetarians are angry and worried. For example, the lecturer can't sit still and is deeply afraid of being destroyed. However, the teacher hasn't become a professor yet. He has a thin skin and can't bear to quit.

As a result, in the afternoon, Zhao Yanfang appeared in the experimental group and began to issue confidentiality agreements. Not only the main researchers, but also the miscellaneous students, had to sign them.

"I don't really want to buy other people's achievements!" Lecturers are afraid. They won't be caught in reform through labor!

Chapter 1475

There are too many sad people these days. The leaders of Saicheng are worried that the superior leaders have severely criticized him. Fortunately, they have not been accountable, but the superior leaders rarely scolded him for half an hour. In fact, he didn't know that the leader of the leader was blacked by someone, and the anger broke out on him at last.

Also sad is Jia SuYue. These days, the girl has a heart to ask for leave and doesn't go out, because when

she goes out, she feels that others are pointing at her, especially who wants to talk about a tea vegetable hospital. Her ears are like a little white rabbit.

Of course, the most sad thing is the bird market lecturer in the tea element laboratory. I didn't sleep all night. I thought about it all night. The next day, I stared at the two regiments of black and blue, as if I had been beaten. I went to the laboratory and gritted my teeth and signed a confidentiality contract.

He also wants to do well. If Zhang Fan doesn't have the face to really buy other people's achievements, he will quit. However, he doesn't want to fight. After all, can he be a leader if he can have the face!

In the laboratory, the atmosphere was very tense. Yesterday, Zhao Yanfang asked everyone to sign a confidentiality contract. The doctors in the tea vegetable hospital signed it without looking. To be honest, this thing is the same as the patients looking at their own cases. It is written in clouds and clouds, can use professional words, and there is absolutely no common language. Therefore, the contract is not something that a small doctor can understand.

Doctors in the hospital understand that no matter how hateful it is, he will not buy other people's achievements. After all, he still needs face, although heimajiang has no achievements in scientific research.

Curiosity finally asked the lecturer to sign. As soon as the lecturer signed, several undergraduates who did chores signed one by one.

To tell you the truth, Zhang Fan's attention to lecturers and undergraduates seems to be very good for professors and lecturers. In fact, Zhang Fan is optimistic about these undergraduates. Finally, Professor Zhang Fan feels that he can't get a newly graduated doctor back with great efforts.

After all, the professors of Niaooshi Medical University are not particularly tall. As for the lecturers, they just have better cost performance.

After signing the contract, Zhao Yanfang began to explain the results of the current experiment in detail. When he learned that the laboratory had found modifiable protein, the undergraduates were still confused like the children of the large class in the kindergarten and looked at the legendary Dr. Zhao in front of them.

It is the lecturer who can't close his mouth and his eyes will fall off. People are engaged in basic medicine and microorganisms in the foundation. They can't know more about TB cells. When they see this research result.

Holding Zhao Yanfang's arm, he asked: "really? Is this true? Really? It won't fool scientific research funds!"

"Hehe, is our hospital short of money?" Zhao Yanfang proudly raised her head and was slightly moved in her heart.

Yes, she has gone through many universities and scientific research groups, making doctors and bosses like enemies for three cents and two cents. Even the shameless boss sent money to the doctor. A few days later, he said that his wife had a miscarriage and asked for the money back.

Too much, too much.

Here, Zhang fanduo is a stingy man. Now the leaders of the hospital don't have a special car. Ouyang has an Audi that lies prone from time to time. That's why it was eliminated by the government. The rest of the leaders, Lao Chen, who uses the most cars, are the worst 120 people in the hospital.

But in scientific research, the lion opened his mouth and thought that Zhang Fan would not give it. The meat on Zhang Fan's face was trembling, but he still paid the money in full. And life is more generous to her. Although the villa doesn't live by itself, the villa beside the virgin forest, the villa listening to the birds in the morning, is false.

Really, she hasn't left here. There is a kind of gentleman who treats me as a national, and I will report to you as a national!

"Publish papers? I think the most important thing now is to publish papers in authoritative journals as soon as possible after determining the nature. Confidentiality agreement is not useful. This thing is a layer of paper. If others hear a little information and a larger specialized laboratory wants to understand it, they can go ahead of us immediately."

The lecturer is worried. From the original spectators to the present anxiety, people are like this. If you want to close others, they still think you have no strength. Only when you are as hard as an iron bar can you make most people fall in love.

"Well, now we need to work overtime to improve the experimental data. We not only need to improve it, but also push the experiment forward, so we have to work overtime these two days!"

"Evening data is OK. This is the basic work and what I'm best at. But I'm not good at pushing forward, especially the superposition of proteins. This is too difficult!"

The lecturer said seriously.

When this sentence was finished, Zhao Yanfang nodded in her heart. She felt that this person would like to recommend Zhang Fan, which is the best leader of the basic laboratory in the future. Duty, hard work, honesty, that's enough!

"The person who takes the next step has reached the tea element. It is estimated that he will enter the laboratory in the afternoon. He is the doctor of Bluebird!"

Before he finished, Lu Ning entered the laboratory under the leadership of Li Cunhou.

Nominally, Li Cunhou is the eldest and Zhao Yanfang is the second. In fact, Li Cunhou is busy with an allogeneic transplantation. Like a fire under his ass, he used to go to the clinic twice a week, but now he goes to the clinic twice a week.

Zhang fan understands that after all, if he can enter the scientific research of the national development plan, he will be too sorry for the money and people Zhang Fan got from the digital hospital and the golden mean hospital.

This time, Zhang Fan brought Lu Ning, which made Li Cunhou feel that someone who could finally do something came. Otherwise, he would be embarrassed to see Zhao Yanfang lose weight day by day.

"Ha ha, everyone is here. I'd like to congratulate you first. Unexpectedly, I really didn't expect that the Caotai team in other people's mouth and the despised miscellaneous army succeeded! What I was afraid of was not research, but that you couldn't bear the pressure.

I'm afraid you'll break up before you get to the point, but today, you are the pride of tea vegetable hospital and our medical researchers! "

Lao Li is telling the truth. He really couldn't spare time at the beginning. Listening to Zhang Fan's Caotai team, he felt an inexplicable sadness in his heart.

How worried I was, how happy I am now.

I'm happy, I'm sure I'm happy, especially several undergraduates. Their mouths are cracked. Although I don't know how to succeed, I just succeed.

"Next, let me introduce you to Lu Ning, Dr. Lu, the head of the youth national laboratory and the personal disciple of academician Lu. This time, your test plan is checked by Dr. Lu."

This time, Zhao Yanfang understood. No wonder Zhang Fan was so arrogant when he showed it to himself. It turned out that there was someone behind him!

Clearly a Shandong wuerlang figure, but it is a simple and honest Lu Ning with a slight bow. The smile on

his face is kind, which is not in line with the posture of riding a Tibetan mastiff.

Overtime, overtime in the laboratory began.

One day, two days, tired, just squint in the lounge next to the laboratory, but the diet is really good. The canteen of tea vegetable hospital is open 24 hours. If the Department is too busy, call the logistics director directly and send you anything you want.

When Lu Ning entered the laboratory, his hair was slick. After three days, it was like holding a chicken nest.

"How's it going?"

"The superimposed protein is unstable. 60% can modify the gene of the strain, resulting in the obvious weakening of the virulence of TB strain. However, 40% are still normal or the strain is enhanced. I think there is a problem there."

Finally someone discussed it with himself. Really, it's too painful to fight alone.

Zhao Yanfang and Lu Ning discussed various problems arising from the experiment.

After one week, the protein superposition was successful, and more than 90% of the strains began to weaken their virulence until they died.

In fact, what this thing is, is to modify the small tadpoles of the strain, so that the factors of infection and virulence can be modified, and then strengthen the vitality of the small tadpoles, so that they occupy the normal genetic factors.

To put it bluntly, it is to do something to turn TB cells into silly white and sweet strains with problems in non-toxic reproduction.

"Zhang Yuan, success!"

Zhang Fan knew that he would succeed. When he didn't call, he didn't have that sense of expectation. He always felt like he knew his cards or winning numbers. He really didn't expect much.

But when the phone called, I couldn't help being excited.

"Hard work! Hard work!"

"Thank you, senior brother Lu. If he doesn't come, it will take at least one or two years to make progress! Another thing is when and where the paper will be published. If it is published, the next experiment will certainly not be of this scale. You should be prepared.

How long will you stay in Saicheng? "

"At least another week! I not only want to thank elder martial brother, but also reward our scientific research instructor!" Zhang Fan thought.

"Well, let's take a break today. Tomorrow Dr. Lu Ning and I will come and meet you. It's not clear on the phone."

"OK, I'll ask Lao Chen to arrange the car. You don't have to worry about others. Go and have a good rest. I heard that you haven't even left the door of the laboratory recently. It's no good. Your body is a revolution..."

For Zhang Fan, Zhao Yanfang was very respectful, but she couldn't hear each other. She was young and had to pretend to be an old autumn mark. When she called, she felt that she wasn't calling her peers, as if she were calling her master. Zhao Yanfang hung up quickly!

The other party hung up! Zhang Fan was slightly embarrassed and wanted to go on, but there was no one nearby. Zhang Fan reluctantly installed a mobile phone. I thought, there's no one anyway, and I don't have to be embarrassed!

.....

Shao Hua and old lady Lu have soaked enough in the hot spring this time, because in winter here, a snow can't even seal the door for you. The old lady can't get out when she is old, and then the government escorts are very enthusiastic.

It can be said that as soon as he opened his eyes, he soaked in the hot spring after dinner. The first day was very good. A week later, Shaohua felt that he had taken off a layer of skin.

Although he really didn't want to, Shaohua listened to the old lady these days and understood that what Zhang Fan did was very important. Moreover, at the critical moment, he endured the peeling of his soles and continued to take a bath!

Chapter 1476

"Black buy buy river is not in, I feel the hospital is not angry, and everyone is dead. Yan Yuan's long face is like a thief. He guards at the gate every day to catch being late. Hey! Originally he thought that the European hospital didn't care, but now Yan Yuan is standing directly at the gate."

After the ward rounds, the little nurses in the department took time to talk while changing their dressing.

The current leadership of the hospital has completed the running in. Yan Xiaoyu was unwilling to think about when the tea vegetable hospital was the springboard when she first came here. Now she really takes herself as a member of the hospital, especially after Zhang Fan gave her a lot of business.

The face of the strong woman leaked out. Not only was she not tired, but she automatically raised her requirements to a higher level.

For example, being late in the morning, to tell the truth, most units have this phenomenon. For example, last night, in order to satisfy their wife, they fought a little too much. For example, children stay in bed in the morning. In fact, Zhang Fan doesn't pay much attention to this matter. As long as you don't delay your work, as long as you can treat patients well.

Even if Zhang Fan saw him late, Zhang Fan pretended not to see. When he met someone younger than himself, he even joked, "Hey, you're late. Your chief nurse has entered the office and is waiting to be deducted!" A happy expression made the little nurse and doctor's teeth itch.

But Yan Xiaoyu is different. Ouyang used to be late. She stood in the window, opened a small crack in the curtain, looked secretly, and then wrote it down in a small notebook. One day, she can scold you like a treasure.

Yan Xiaoyu is directly at the gate. Like the section chief of the security office, he will stop you if you are late and keep asking: Why are you late, why are you late, what are the reasonable reasons for being late early in the morning, and where are the reasonable reasons for being late.

She has a big head to ask. When she meets someone who is eating cakes and steamed bread while walking, she is even prevented from entering the hospital. Don't affect the image of tea vegetable hospital.

Everyone wondered when the image of tea vegetable hospital would not give way to eating steamed bread!

Of course, Zhang Fan knows, but he never says that tightening and loosening is the king's way. It's too tight to watch the door. It's too loose. Everyone can't come in and go out like walking through the city gate.

"You can be quiet. Don't mention Yan Yuanchang. I'm afraid of being implicated by you. Let's talk about black buying and buying river! You said that it was the end of the year, and he didn't prepare the year-end bonus. At this time in previous years, Lao Chen asked him to send out people all over the mall to see what is more popular."

"I don't know. I went to Saicheng. What fun is there in Saicheng! I won't send horse meat this year. Hey, I want a mobile phone!"

Zhao Yanfang did a good job in keeping secrets. Let alone outsiders, even the staff of the hospital didn't know.

Zhang fan can't come. Zhao Yanfang, Lu Ning and the team leader of the laboratory, the lecturer of bird market can only go to Zhang Fan.

The party urged the director of the logistics office of the hospital to send a car before dawn, and the director did not delay. This time, a warrior was specially obtained from the army. Because it was snowy to Saicheng, the 120 of tea vegetable hospital was a little dangerous.

There are permanent troops in the hospital. The relationship between the two units is very good, because the food here is better than the troops. Zhang Fan is never stingy in food. The hospital doctors and nurses eat as much as the resident troops do, and he doesn't want food.

This surprised and annoyed the army leaders. They ate too well. What can the soldiers do when they come back.

To my surprise, Dean Zhang, who was stingy enough to pull out a certain level, didn't think about asking for food. He didn't want it for him. I'm really surprised.

Eat well and drink well. The relationship must be good. Otherwise, a logistics director who is not recognized by the government can call a military vehicle?

Zhao Yanfang was a little better for the bumps along the way, because he adapted to sitting more. However, he bumped Lu Ning and the lecturer. Lu Ning and the lecturer supported their waist all the way. If they got carsick, it was just that their bumpy waist hurt.

"Master!" When Luning arrived in Saicheng, he went to see the old man at the first time. The old man is wearing a thick mask and a group of physicians to treat tuberculosis these days. He usually says that Zhang Fan doesn't work hard, but the old man is more motivated than Zhang Fan now.

"Ah, why are you here? I'm afraid you're not fooled by your younger martial brother?" The old man saw Lu Ning smile on his face, then felt wrong, and suddenly asked.

"Hey, hey, you're all here. How can I not come!" Lu Ning didn't tell the master about his successor.

There's no need to worry the old man.

However, the old man has never seen anyone. From the head of state to the ordinary people, there are not hundreds of thousands of people to deal with. Just think about it. "OK, it's OK to come. Your junior brother is in a mess. He wants to do everything and can't do anything well.

Help him when you come. Your teacher's wife still talks about you and says she misses you. Go and see her when you're finished! "

"Well, how are you?" Lu Ning's eyes are hot. The old man is always so considerate.

"I'm good. My appetite is better than before. I don't eat more. I'm like your younger martial brother as a long-term worker day by day. I can't afford to send here today or anywhere tomorrow. He has more power than the leaders of the Ministry of health."

He is willing to say what he wants, but he has to say Zhang Fan!

Without Zhang Fan, it is estimated that Lu Ning is the heir of the old man. However, although there is Zhang Fan now, the old man is still very worried about Lu Ning, because among a group of disciples, this boy, like himself, has ideas in scientific research.

Unlike other disciples, especially Zhang Fan, who only wanted surgery wholeheartedly, he said that the sky was good and the earth was good for his scientific research inheritance, but none of them could see them learn their scientific research skills, which also made the old man feel a little uncomfortable in selecting people in those years.

"I'll hang up a second job. You did all the work!" Zhang Fan looked at the paper and said.

The lecturer was shocked on his face. He felt that he had a hallucination. Let's let such an important paper say let's let it go. It won't be the third push of the crown prince!

He swallowed and dared not speak. After all, I'm not familiar with it.

Zhao Yanfang was very direct: "don't ask for trouble for us. You didn't do the work, but the main idea is yours. Hang up a communication. OK, this is not the focus, but what to do next?"

Lu Ning's greeting with the old man was over. In fact, he was kicked out by the old man without saying a few words. The old man was busy to see a doctor.

Lu Ning also nodded and said to Zhang Fan, "the next work is not what a hospital can do. If you don't say anything else, you can't throw all the two million you want to come in without a bubble."

Zhang Fan thought, "the reagent has been made in the laboratory, and now it is time to apply for experimental drugs. This should be fast and take the formal way. It is estimated that it may not be

approved next year."

The lecturer was surprised. NIMA had said the paper well, but now she has to test the medicine and doesn't take the formal way.

The cold sweat came down, "people who can know TB so well actually want to go astray. How can this person, the Dean, think more and more frightening!"

According to the routine, it is almost time to enter the clinical phase III or even the clinical phase IV. But now the NIMA animal experiment on tea has not been carried out. It's necessary to test the medicine. It's too bold.

As we all know, various drugs are indeed listed according to clinical trials, phase I, phase II, phase III and phase IV, but there is another special case.

When Zhang Fan finished, Lu Ning thought and said, "it's OK, but I need my master."

Zhao Yanfang asked in surprise, "don't you want to make money from this?"

According to her understanding of Zhang Fan and the way Zhang fan operates antiemetic drugs, how can Zhang Fan make a special case?

"Some money can be earned, some money can't be earned. You have to have professional ethics and antiemetic drugs. Do you think patients buy more in the future, or do they buy more in another way?"

Zhang Fan didn't laugh, but asked solemnly.

"Well!" Zhao Yanfang covered her forehead and didn't want to talk.

"Tuberculosis drugs are different. They are a poor disease. They can't be cured because of tuberculosis. As a result, there are no houses that have lost their wealth. It's meaningless."

"Am I wrong about him?" The lecturer was confused. He thought the two weeks were better than his ten years in school.

"You decide that you are willing to go to Trinidad and Tobago, but what about the paper and where to send it?"

"New England Journal of medicine or cell journal can be. You can do it. I'll go to master and European College now."

With that, Zhang Fan left.

Zhao Yanfang and Lu Ning looked at each other. Lu Ning said reluctantly, "younger martial brother, it

was the same in Qingniao! I'm used to it."

"Just get used to it!" Zhao Yanfang also reluctantly replied.

As for the lecturer, NIMA shouted in her heart, "what did NIMA say? Since you don't let me understand, you pull me to do Maomao!"

.....

"Go?"

Ouyang has been making trouble with the government these days. The fortress government and the tea vegetable government are restless. Anyway, she's all right. The tea vegetable government is almost calling grandma.

After listening to Zhang Fan's call, the old lady let the government go first, but when she left, she said, "when I'm finished, I'll come back!"

Old man Lu was surprised to hear that Zhang Fan said he was going to leave.

Taking special cases is actually experimental medication and emergency use. When the emergency is over, some procedures have to go. But the end result of this drug is that when you finish the procedure, maybe other pharmaceutical companies have taken the lead.

"I think so. Tuberculosis drugs, especially for patients with drug-resistant bacteria, are really life-saving drugs. If you can use them as soon as possible, use them as soon as possible." Ouyang supports Zhang Fan.

"OK, it's good for you to have this idea, but the approval is estimated to be troublesome."

Old man Lu thought!

"Not afraid, let him call the general manager!" Ouyang smiled, as if to say, is this still a matter? There's nothing I can do. Now that I have something, is it difficult to get approval?

Zhang Fan nodded and said to old man Lu and Ouyang, "I think so too!"

The old man turned his mouth!

Zhang Fan took out the confidential phone and dialed it out.

Of course, this phone call is not directly to the general manager, because the general manager didn't leave a private number for Zhang Fan!

But there's a call from the director of the Nanhai office.

To tell you the truth, you are not qualified to make this call until you upgrade!

Toot! Toot! Toot!

Three times, the phone was connected.

Zhang Fan didn't speak. The other party first asked, "Hello, Zhang Yuan. I'm Secretary Li of the Secretariat. What can I do for you?"

It is estimated that the other party's landline is caller ID, which is very advanced!

"I have something I want to report to the leader. Could Secretary Li please inform me?"

"What is the specific aspect of Zhang Yuan?"

"Tuberculosis drugs, especially a new treatment method and drug found for the repeated attacks of drug-resistant TB patients in treatment!"

It is estimated that the other party is recording. After Zhang Fan finishes, it takes about four or five seconds for the other party to politely say, "OK, Zhang Yuan, I have filed a record. I will report it as soon as possible. Please wait patiently!"

Then he hung up the phone.

Old man Lu looked at Zhang Fan and Ouyang. "This boy doesn't brag!"

Chapter 1477

"There are a large number of doctors in 30x hospital who have been studying tuberculosis cells unremittingly. Although I can't understand the report you sent, it has been recognized by many experts in 30x hospital.

They did the experiment according to the paper you sent all night, and the experiment was successful! This is a great good thing for the country and the people. Although I can't personally go to tea vegetable to celebrate and thank the white soldiers where you fought, the country will not forget you, and the people will not forget you! "

Although on the phone, it can be opened outside, which makes a group of people around Zhang Fan inexplicably feel hot-blooded and wet in their eyes.

Many people will be, people do not kill for themselves, or human nature is evil. In fact, this thing is really

hard to say, otherwise why would it be moved. Really, when the country won't forget you, Ouyang's tears came down.

When was the old lady weak in front of people? Although a line of clear tears left, her iron blood face won't make people feel that she pretended to be a little daughter!

"Experimental drug use is a very serious problem. After several rounds of expert discussions and the vote of experts in the field of tuberculosis, we agreed to start experimental drug use!"

Zhang Fan was excited when he said this and stopped talking about others. "Thank you, thank you, thank the leader."

"It's me who should say thank you, but there's a problem. I think it's still necessary to say that most experts believe that the conditions of tea vegetable hospital are not mature. They suggest that experimental drugs be carried out in the capital!"

"Well!" Excited for a long time, blood for a long time, the last sentence directly made the people around unhappy.

"Leader..."

"Just ask, they say that the tea vegetable hospital doesn't have the conditions. Why can't they get it out? What conditions don't they have? Say it. Is this ambiguous statement made by professionals?"

Zhao Yanfang didn't like it first, that is, the leader was too big to shout, otherwise she would have robbed the phone and quarreled. Here, she began to talk reluctantly around Zhang Fan.

Zhang Fan's tight and slow cover has been heard by the leaders.

"It's understandable that comrades have opinions, but I also have several experts. Do you have a remote conference center? We can have a remote teleconference. Let go and let everyone say!"

"I can't explain it!"

"Is there a teleconference center here?" Zhang Fan asked Lao Chen. Lao Chen would look like watching the owner eat the golden hair of bones. It was quiet and distressing.

"No, no, no, but here, there is a, there is a remote consultation room!"

He didn't expect that Zhang Fan would give him a chance to speak on such a key phone. Didn't he see that the European Academy secretly cleaned his throat several times!

However, sometimes this thing is thinking about three times five divided by two, but it really goes up, that is, 38 pull 28!

Outsiders may not know or have seen it in the news. The so-called remote diagnosis and treatment conference center is a rare disease that has not been seen in a century, and the patients are dying. Then through the remote conference center vigorously developed by the state, experts thousands of miles away can remotely guide local doctors through the consultation center, and then the patients can come back to life, Jump up 100 meters and run for ten seconds!

In fact, to be honest, this is bullshit.

In 2008, the state felt that the technology of grass-roots hospitals was shrinking sharply, but what measures could be taken to solve the medical contradiction in a short time? Then I don't know the expert gave me some advice.

Nationalization has made great efforts to get a nationwide networked video diagnosis and treatment. To tell the truth, this effort costs a lot. When Penguin videos were not popular for watching beautiful women, the state made such a system in grass-roots hospitals. To tell the truth, it was really advanced at that time.

As a result, the whole country could not go on. Because it was too chaotic, it was castrated into various provinces for internal consultation first.

As a result, later, even the provinces could not continue, and this thing became a decoration, a huge decoration.

First of all, the consultation should be coordinated through the two hospitals, because the consultation cost is only 30 yuan, 10 yuan for experts and 20 yuan for the network center.

The network center can't control the doctors of the superior hospital. At the beginning, it was an administrative order. The subordinate hospital must be present within half an hour if it applies for any expert to consult.

Nima paid ten yuan for an expert who was already busy and didn't touch the ground to consult. The expert with a good temper wouldn't say anything. When he met the expert with a bad temper, he

consulted for five minutes at the beginning. People scolded the doctors in the lower level hospital first.

Dare not scold the network center, scold the lower level doctors, or have some capital.

"Can't you see such a simple disease? It's obviously an intestinal obstruction. You have to be diagnosed with abdominal pain for investigation. You're careless about human life!"

Then, in front of the family members and patients, the director of the lower level hospital or the attending doctor scolded the dog blood nozzle, so that the doctors of the lower level hospital's originally hot heart also cooled down.

Not to mention other aspects. Originally, this thing was not a business, and the network company wanted to make money through this hair removal. Finally, the lower level hospitals did not take the initiative and the higher level hospitals did not support it. The network remote consultation center invested by the state only appeared in the news!

Entering the network center, like the live broadcasting room of later generations, all kinds of lights and microphones are really not backward in future generations.

Hold video conference and tripartite video conference, and the general manager will be the referee. On one side is the expert team of tea vegetable hospital, with Zhao Yanfang as the main debater and Zhang Fan as the mascot. On the other side, 30x and experts from the golden mean and the capital general hospital of pulmonary medicine are the main experts.

The meeting was full of gunpowder at the beginning.

"First of all, the current scientific research force of tea vegetable hospital is insufficient. For such an important subject, we should gather the advanced medical forces of the whole country to implement and manufacture it in the shortest time. How many TB patients and how many TB families..."

The general manager nodded and then motioned for the tea vegetable to speak. Zhao Yanfang couldn't hold it. If Zhang Fan hadn't pulled her arm, she would have stood up and began to interrupt each other's speech.

"Since you say so, let me also say that, first of all, why didn't you make a breakthrough in this subject? How many most advanced scientific research forces in the country have been gathered and how much scientific research funds have been spent, why didn't you make a breakthrough!"

Zhang Fan quietly gave Zhao Yanfang a thumbs up and said well!

Ouyang quietly pushed Zhang Fan. When Zhang Fan saw it, Ouyang's hair was shiny and greasy. He didn't know whether it was saliva or going to the bathroom to clean it up.

The old lady gave Zhang Fan a white look, which means that you should be serious at such a high-level

meeting. You represent our tea vegetable hospital. The general manager is watching!

Zhang Fan flattered Ouyang with a smile.

"Moreover, we are the first discoverer and manufacturer. We know the context of this subject best. Now we get to the capital, and then you start all over again. This is not only a waste of scientific research funds, but also a crime. How many families and tuberculosis families are looking forward to it..."

Zhang Fan looked at Zhao Yanfang in surprise and thought, darling, this NIMA is quite Ouyang's style. She even attacked each other in the other's tone!

Why is the old lady so clever today? When Zhang Fan looks back, Ouyang takes reading glasses and takes notes seriously. Zhang Fan thinks that NIMA's sun is coming out from the West today?

In fact, this is the difference between administrative cadres and scientists.

"After all, we have a national source of disease here..." seeing that 30x and the experts of the golden mean let a female general clean up, and the director of the general lung hospital came out.

"We are about to close the city now. Here..."

"After all, rural patients are still larger than urban patients, and there are many patients here!" Zhang Fan quickly interrupted Zhao Yanfang's speech. NIMA can't break the pot with a hammer!

Although the tea vegetable government is stingy all day, I can say a word of conscience. People have supported it enough in the past two years. If you really let the leaders pay attention to it, it is no less than throwing bombs in the sky for the tea vegetable government. I don't know how to die.

The two sides quarrel. To tell the truth, the experts sometimes quarrel endlessly, and the general manager can't listen anymore. However, he also understands that if it is set here in the capital, everything must start again.

If it's tea, the conditions are a little worse.

After the two sides pause a little, the general manager seizes the opportunity to speak. Sometimes it is not easy for leaders to speak in expert meetings, especially in professional meetings. "Can the scientific research equipment of tea vegetable hospital support the follow-up research and development of this subject?"

Zhang Fan looked at the old man in the video and thought, darling, the leader really didn't give it in vain. The two sides pulled their skin for a long time. If they were ordinary laymen, they were fooling the two groups of people. I don't know who to listen to.

But the old man caught the point at once.

The expert group on this side of the capital stopped talking!

In fact, they know very well that NIMA's P3 laboratory, which has just been launched, is known as P4. It's the best laboratory for tea. You say it may be troublesome to get anthrax, but it's more than enough to get TB.

However, even if you know it in your heart, you don't know it in front of you. If you don't say a word, how can you send shells to the enemy!

"We have the most advanced laboratory here. Director Wang of your digital research institute said last time that he would like to borrow it. He said it was better than any P3 in the capital!" Zhao Yanfang doesn't care. If she can't seize this opportunity and let her run away, she will regret it all her life.

"But your scientific research software is not good. Look at your membership. The team leader is from orthopedics, and the deputy team leader is from organ transplantation. The team leader is a lecturer in microbiology, and the team members are all college students who have not graduated.

What can an orthopedic doctor do! This is not a bone! "

Nima's face is black. She has been a good man for a long time. Finally, NIMA was dragged as a tail!

Ouyang recorded in his notebook, "the scientific research leaders have an average standard in speaking. In the future, we should pay attention to the solemn meeting at this level!"

Lao Chen's face is also black. Scolding Zhang Fan is tantamount to scolding him.

When Zhang Fangang was about to speak, the general manager smiled and said, "look, look, experts are experts after all. We can find out the problem at once. I suggest that the next step of scientific research should be carried out in the tea vegetable hospital, and the major hospitals in our capital should send the top scientific research force to support tea vegetable.

In those days, there were experts on the third line, but now there are experts on tea, which is also a kind of good talk! "

After that, he didn't wait for others to say anything. He knew it was difficult for experts, because he was also an expert in those years. Therefore, he said directly: "comrades, we can't have regional differences and family views. This topic is a great good thing for the country and the people.

We should unite sincerely and develop drugs and technical means as soon as possible, which can be regarded as the title of a good doctor of the country!

Based on the opinions of experts, I think it is necessary to set up a super team as soon as possible with tea based and capital experts as the backing! "

Ouyang frowned and wrote in his notebook: "grasp the key points, convince people with virtue and reason, this is the level!"

Chapter 1478

On the Chinese side, especially before the collective resolution, NIMA can use all kinds of tricks, such as 36 tricks and all kinds of grandson's art of war. It's just useful, regardless of seniority. Therefore, especially before some resolutions, you can definitely reflect the historical details of a great Millennium country.

The research and development of tuberculosis drugs is more difficult to make money. Even if we get a monopoly drug, the main demander in the end is actually underdeveloped countries, especially some countries. Give it to me and I want it! If you sell money, I'm sorry, I can't afford it.

In China, this kind of medicine can't be sold at a high price. How to describe it? In fact, it is the difference between tobacco and salt. Although it is not very accurate, it probably means this. For example, when men's anti vomiting drugs entered China, they cost seven or eight hundred.

This is the cigar, which is rubbed out of the beautiful woman's thighs. As for the tuberculosis drug that Zhang Fan is getting now, it is salt. Can salt sell at a high price? Yes, NIMA tofu is monopolized and can sell the world's richest man, not to mention the indispensable salt.

But this thing can't work in China!

Once this drug is developed and determined to be a revolutionary drug, NIMA will have a halo in an instant.

Originally, the two sides were like a big wolf dog who tore at a bone for a long time. As a result, when the plan was determined, they immediately became a comrade in arms in the trench.

"President Zhang, ha ha, you're in surgery. I'm in internal medicine and infectious diseases. Although I haven't dealt with much before, I still know you very well. In this way, I'll bring my team over tomorrow.

You can rest assured that the team structure is very perfect, and the most important thing is that after tea, all actions are under command. In order to get on the right track as soon as possible, I would like to ask, tea vegetable hospital is convenient for TB research. What else is missing? I'll see if I can bring it. "

When the general manager's hammer clanked, director Xia of the capital general hospital of pulmonary Sciences jumped backwards first. While others were not paying attention, he took the microphone and began to communicate with Zhang Fan.

Zhang fanslightly was a little uncomfortable. He just blushed and scolded each other with a thick neck. In less than three seconds, he had to hold each other's hand and tell his heart. He was stunned for several seconds. Zhang fancai said with a smile: "I still know director Xia's fame. When I was a student, you were the editor in chief of the textbook of the Department of infectious diseases!

There is a shortage of tea here. You don't know. There are poor mountains and rivers here. There are no talents and equipment. Even the membrane of the stethoscope is broken. We are reluctant to change it. Stick it with adhesive tape and continue to use it! "

In an instant, director Xia couldn't laugh. Originally, Zhang Fan didn't adapt. He still felt that he was a doctor. It was estimated that he was a leader of highly skilled talents. As a result, he didn't expect that the boy had such a thick skin after he adapted.

And NIMA in front of the general manager! Now, it's director Xia's turn to get used to it.

To tell the truth, except Ouyang and Lao Chen, who are tea vegetarians, others, including Zhao Yanfang and junior brother, are not used to it.

and,

Not only director Xia didn't adapt, but Zhang Fan said that in a moment, including the general manager, he didn't know whether to speak or not. The old man thought it better to leave here early.

Don't think that the old man can get something for tea vegetable with a wave of his big hand. In fact, the higher the position, the more cautious, because once the opening is made, there is no doubt that many presidents will come to Beijing the next day to complain.

So after seeing Zhang Fan start the performance, the general manager didn't know whether to laugh or not, and then the old man said, "please ask experts for the remaining specific technical problems, and the staff of the Ministry of health will specifically participate in the coordination. I will..."

I don't know whether it's really busy or what. Zhang Fan tilted his mouth and felt as if he had missed hundreds of millions.

When the general manager was replaced by the leader of the Ministry of health, the people on both sides were directly unscrupulous. It is said that the Ministry of health manages the hospital. In fact, as long as there are no problems in the hospital, first, you can't appoint or remove the president of others, and second, you can't give much money.

Therefore, when we were in close combat, the leaders of the Ministry of health closed their mouths and frowned, as if they were considering some world problems. They would never judge the speeches of the two sides.

Because he knows this very well. If he wants to have a voice, he has to pay. Haven't you seen Zhang Fan already selling tickets? If you want to come, you can come with tickets.

Director Xia of the General Hospital of pulmonary sciences has constipation on his face. He has never seen such a shameless one.

Director Xia despised Zhang Fan in his heart, but he was laughed at by 30x and the golden mean, "you don't know him. The deputy director of general foreign affairs in our hospital is still detained by him as a tea vegetable coolie!"

The chief director of 30x infectious diseases department looked at director Xia, who was laughing at schadenfreude. The golden mean is also true, and director Xia will not be spared.

In fact, it's not unintentional, it's intentional. Now the experiments have been formulated, and the results are certain. Now squeeze out one by one.

They are all foxes for thousands of years. Don't play Liaozhai for anyone.

Xia, director of the General Hospital of pulmonary Sciences, bit his teeth and chopped his feet, "have you ever studied tea in this area of refractory interstitial pneumonia?"

As soon as he said this, Zhang Fan took a breath of air conditioning. Medically, once there is an interstitial, it will be more troublesome. Because you can go to thoracic surgery or respiratory medicine. It sounds like there are many departments that can be treated.

In fact, it forms an existence that everyone cares and doesn't care. Moreover, the diseases in this place are relatively small. It is estimated that there is no professional doctor to study in places like the capital and other cities, not to mention tea plants, which are smaller provincial capitals.

So Zhang Fan knew that boss Xia was going to make a heavy bet. 30x and the golden mean are worried.

"Come on, Lao Xia, you've been friends for many years. What's your hurry!"

"I'd love to! I like to cooperate with Dean Zhang of tea vegetable!" Then he said to Zhang Fan in the video, "if you want money, I don't have much scientific research funds as a director, and I can't get funds

for you. If you want equipment, the equipment is national and hospital, and I can't get it for you.

However, this subject is currently being studied by my project team all over the country. Do you dare to take it? If you dare to take it, you should be responsible for all scientific research funds, all laboratories and reagent consumables. "

Director Xia looked at Zhang Fan with a serious face.

Nima didn't expect it. I didn't expect it. Zhang Fan originally wanted to get a ticket. How could it be that geese don't pluck their hair.

As a result, unexpectedly, Zhang Fan immediately said, "funds, what a big thing. Tea vegetable hospital is now combined with the Ministry of energy. Director Xia, you don't know. We pay almost tens of millions of natural gas dividends a year.

Moreover, our laboratories are established according to the most advanced standards of Jinmao. Several laboratories are empty. You don't have to queue up when you want to use them! "

"This NIMA is shameless!"

I don't know whether to scold director Xia or Zhang Fan. Anyway, the two directors of the golden mean and 30x have an iron face.

The golden mean bears part of the treatment funds. They are not short of money. In local areas, the infectious diseases department is a department where everyone sees and hides. But when we arrive in the capital, this department is the top priority, and the country has made great efforts.

So, people don't want money, don't they? God NIMA stethoscopes are bandaged!

30x looks at Lao Xia on the left. Lao Xia has a topic and is free. After all, it is a local hospital. Although director Yang of 30x also has a topic, his identity is different. He is not as free as Lao Xia. Look at director Luo of the golden mean on the right. Director Luo has money, but he doesn't have so much money!

Nima got it around. Finally, she was trapped. Director Yang of 30x didn't know what to say. He knew Zhang Fan too well.

Because 30x and Zhang fan are still cooperating and have cooperated before, the leadership of the hospital is saying that Zhang Fan is a strict supervisor, and a round stone should take back tea.

Therefore, he looked at Zhang Fan eagerly. Really, he wants money, no money, no subject. But if you don't participate in this TB, don't you work hard in vain for so many years. And if the hospital knows it didn't participate, the president can pull the skin down.

Seeing that director Luo of 30x didn't speak for a long time, Zhang Fan knew that the director really

couldn't get anything.

"Director Luo, I have to ask you a favor!"

"Zhang Yuan is very polite. It's very polite. You have something to tell me!"

The alliance of the three chambers collapsed!

"Well, we have a group of undergraduate students, junior interns. I'm going to let them stay in tea until graduation in my senior four and five. However, there is a shortage of internal medicine teachers here. Surgery is enough. My Master Lu Lao and my elder martial brother, the gastrointestinal director of Marubeni country, Dr. Zhao Yanfang, these experts can barely take them with me.

But internal medicine is a little worse. We can't harm people's children. No, if it's convenient for you, take some slightly better teachers and tell them about internal medicine. Of course, we should start from the beginning and end. We can't run halfway, otherwise we will delay the study of other students!
"

"Is this a show?" The director of the golden mean secretly asked director Xia of the General Hospital of pulmonary science.

"This is not a show off. Although he is young, he has too many minds. This is to set the standard for Lao Luo. All the surgical teachers are academicians. You can't get a newly graduated doctor in internal medicine to fool him. At least you are an outstanding young man!

Hey, what is he doing? Is it used by a group of undergraduates! What kind of doctor NIMA can't bring out! "

Lao Luo shook his head, but he didn't say anything. It's none of his business anyway!

30x Lao Luo had constipation on his face. He knew it was not so easy. "I'll go back and ask our dean!"

The tone of voice really says how much grievance there is. It seems that Zhang Fan not only bullied him, but also picked his teeth and didn't give him money.

"OK, don't worry, don't worry. Anyway, director Yu on the West Lake and old clock on the other side of Yangcheng contacted me. Especially old clock, he also wanted to come. The main reason is that he didn't come from TB. I don't want him very much. If he can't do it, he can do it reluctantly!"

Nima, who was angry at this, got up and left.

The leader of the Ministry of health saw that the meeting was coming to an end and just wanted to say that's it. As a result, Zhang Fan spoke to him!

Zhang Fan almost shouted: want to run? It's not that easy!

Chapter 1479

"Director Ge!"

"President Zhang!"

To tell the truth, the leaders of the Ministry of health are not afraid of Zhang Fan at all, even the General Hospital of pulmonary cough and 30x are not afraid of Zhang Fan, but it is because they have asked Zhang Fan, and because Zhang Fan has made the superposition method of tuberculosis protein. Although they don't say it, they are still respected in their heart.

To tell you the truth, technology is relatively simple.

As for the leadership of the Ministry of health, it's different. People don't ask Zhang Fan and don't rely on Zhang Fan to produce results. Therefore, when Zhang Fan called director Ge, the director who just raised his ass did it again while tidying up his tie.

If the general manager hadn't given the order, he wouldn't sit here and listen to a group of people arguing. Of course, when Zhang Fan called him, he knew what the little Dean wanted to do, because he was the God of wealth of hospitals and experts, specializing in funding.

China has really invested a lot in scientific research funds. According to the data obtained by Zhang Fan, China's current scientific research funding is second only to Jinmao, ranking second in the world.

In China, the funds of various cities are also different. The top three are: capital, magic capital and Jinhe! As for tea, just like its status in all Chinese cities, we can't look at it from the top, but from the bottom!

The sources of scientific research funds are partly government and partly enterprises. In the early years, the government accounted for the main source. Later, enterprise scientific research began to go hand in hand.

As for the Ministry of health, although it is not a rich department, it says that its funds are stretched

every year, but people also have a lot of money in their hands, and their money is mainly invested in Colleges and universities in their own department.

As for direct investment in hospitals, even if people have money, they will not invest in a hospital. In previous years, some directly affiliated hospitals are their own sons. As for provincial hospitals, if you want money, go to your superior unit. My position is supervision, not intuitive.

Sounds like a tongue twister. In fact, one is a real son and the other is a dry son. Nominally, they are all sons, but there are still some close and distant relatives.

The general manager asked director Ge to attend the meeting. Although he didn't say it clearly, the meaning is clear. Please support if necessary.

Of course, if you don't open your mouth, people will be happy to pretend to be stupid.

"Director, our grass-roots hospitals need leaders' attention. Although we have done a little bit, we still hope that leaders can come to our hospitals more and see our grass-roots hospitals more."

Zhang Fan smiled at director Ge and said cordially.

"Zhang Yuan's criticism is right. Our work is not in place, but the tea vegetable hospital is not a grass-roots hospital according to the conditions. Last year, we visited thousands of grass-roots hospitals and updated some equipment of grass-roots hospitals according to the 835 health plan..."

Zhang Fan is stupid. The other party's tainima is invulnerable.

Director Ge looked at Zhang Fan's expression with straight eyes. He was as happy as flowers in his heart and thought, "boy, you're still young. Treat me as the same steamed bread as the three of them? I'll teach you a good lesson today!"

"You're right! We're going to apply TB test for the progress award of this year's frontier provincial science and Technology Commission!"

Zhang Fan has no choice but to take out his killer mace. In a word, he can pull you thousands of miles.

Speaking of the matter of wrangling, I have a real joke about the health system to tell you.

It was said that one year, infectious diseases were more serious. In one city, everyone was fine during the afternoon meal. Everyone could eat hot pot on the street. As a result, at seven or eight o'clock, the city was ordered to close the city!

To tell the truth, China's executive ability is really strong.

A lesbian worked in another city. After dinner, she drove to another city. As a result, she was sent home by the person in charge of closure as soon as she reached the intersection of the expressway.

It doesn't matter. Female colleagues are very happy and don't have to go to work!

But the laughter hasn't stopped yet. It's silly to send it home. My husband and her best friend are lying in bed doing indescribable things!

This is also common. The most important thing is that it takes a month to close the city!

Then, the three people were sealed in a house for a month, really this month, and then the three people kept calling outside to separate! Not together, the result is useless. The person in charge of health is responsible. He pulls it over the phone, but he can't. He must stay for a month!

It is said that when the seal was unsealed, the man dunima had the idea of escaping.

Director Ge couldn't sit still. If it's a casual technological invention, he won't lift his eyelids, but if Zhang Fan gets the quota of TB invention in Frontier Province, NIMA's Ministry of health will lose its adult.

"Zhang Yuan, in fact, we also attach great importance to some scientific and technological inventions. For example, can we apply for some scientific research funds based on the superposition of TB protein in tea element hospital? Although it's not much, there are still millions!"

"Really? Can you? Can a hospital that is not a site also apply?"

"Look at what you said, isn't the tea vegetable hospital a hospital? It's a hospital managed by the Ministry of health. Zhang Yuan, don't look outside. I still have feelings for the tea vegetable hospital, so you can write an application..."

"We lack a little more. I hear that the highest level of funds in the Ministry is tens of millions!"

Director Ge couldn't laugh. "There are so many rumors, rumors. Even if there are, they have been accumulated for more than ten years. President Zhang really doesn't have the highest six million. It's not issued at one time. It's one stage at a time."

"Oh! Let me apply. I know that director Ge attaches importance to us!" As soon as Zhang Fan heard it, he understood that stage by stage, this is really chicken ribs. Listen, he gave six million.

But if you get this six million, you really need to get a debt collection company! Director Ge looked at Zhang Fan and seemed not very satisfied. He directly began to curse his mother: "this boy, NIMA took the Ministry of health as the Ministry of energy!"

.....

After the video is turned off, the consultation room of Saicheng hospital becomes the conference room of tea vegetable hospital.

"It's not easy for us to meet. We'll have a short working meeting. The first thing is to apply for the scientific research project of the Ministry of health. It's a lot of six million. President Li is responsible for this piece. You're familiar with asking for money!"

Li Cunhou didn't know whether to laugh or get angry. He nodded helplessly. He was really familiar with asking for money!

"Zhang Yuan, you also got 2 million yuan from the leader of the frontier. This scientific research project of the Ministry of health has been applied for. What about the frontier?"

Just after that, Zhang Fan felt that he had put six million into the bag, and Lao Chen immediately reminded him.

What does this mean? This is one woman married two. Provincial units also need scientific and technological progress, which has a quota every year!

Or else the boss can pay so happily?

"This, this, this!" Zhang Fan was silly, and then Zhang Fan looked at Ouyang.

The old lady thought for a moment and said, "the money we want is for the epidemic prevention of Saicheng!"

Zhang Fan's eyes lit up. Duma almost grabbed the old lady's hand and said you were so wise!

"Well, let's follow the method of the European Academy. After all, we are not in the health system!" Zhang fancai, no matter what province or ministry, who gives more money, we are who's people!

"Second, now that the superiors attach so much importance to the publication of papers, Dr. Zhao and Dr. Lu have a hard time. In addition, we can almost evacuate here in another week. This week, we can't take it lightly."

.....

In a week's time, everyone in Saicheng was afraid of becoming calm, because this is the most convincing evidence after the cured patients came out of the hospital one by one.

In particular, the doctors in the tea vegetable hospital have been praised by those who have been cured.

Old man Lu finally had no patient in his hand. Although he was a little tired, his inner sense of achievement burst. Because the old man was regarded as an expert in internal medicine, I heard that the tea vegetable hospital was about to evacuate. Many patients came to the hospital to invite the old man to be a guest. It's impossible not to go.

Other people don't have this treatment, including Zhang Fan, no one pays attention! This made the old man proud.

"I'm going to a party today. Give me a ride!" The old man proudly said to Zhang Fan. It's like saying, I don't do it. You can see when I do it. I'm still very powerful.

Zhang Fan smiled and said, "take me with you and let me touch it!"

"How can I do this? I'm invited, and I'll take you there again. It's not good!" The old man said no, but he had a pair on his face. Come and beg me. Don't beg me. The old man can't kill you today.

Old boy, old boy, Zhang fanle teased the old man, "master, take me!"

"Hey, well, by the way, call your junior brother and let's go together!"

Saicheng is a small county town that can't be found on a large-scale map, but this place was very powerful in the early years.

For example, when the Palace Museum wanted to study some early documents of the braid Dynasty, people all over the capital looked for people. As a result, the so-called yellow belt, purple belt and white belt didn't know the early text at all.

As a result, in Saicheng, several Xibo old men were invited to the capital, and they knew each other!

In addition, when it was said that the Manchu and Han banquet was restored, it was stunned that no one could get a few dishes. As a result, several Manchu chefs in Saicheng could.

So although this place is small, there is a hidden dragon and a tiger. Zhang Fan doesn't worry about whether he knows the literature or not. What can he do if he knows it or not? Today, the one who invited old man Lu was an old man who was said to have participated in the restoration of the Manchu and Han seats.

Man Han banquet, Zhang Fan has never heard of it. It doesn't mean that Zhang Fan is delicious. Zhang Fan wants to see the history of China.

Zhang Fangang was going to call Lu Ning, but Lao Chen came and said with a smile: "Zhang Yuan, a family of chefs in Saicheng, wants to invite our doctors and nurses to dinner this time! In the final analysis, whether you go or not, it is said that this family will be a Manchu Han banquet! If you go, will

you be held accountable!"

Lao Chen's mouth water came down. Although he was worried, NIMA was the naked temptation of Zhang Fan!

Chapter 1480

Some people like cities, tall buildings, silk stockings and beautiful legs! And some people like green mountains and green waters, old dog shinguard! Invite old man Lu and the tea vegetable hospital, who likes green mountains and green waters. His relatives were hospitalized. They learned that it was after xiasaicheng was treated by the tea vegetable hospital.

He called on some boring old men in the group to entertain the people from the tea vegetable hospital.

Although these masters wear rabbit skin hats and dog skin coats, it seems that ordinary people can't be ordinary. As a result, when they meet and chat, Zhang fancai finds that NIMA is really an expert among the people. The old man was one of the chefs who entertained Tanaka!

Several old friends cooked several big meals. It is said that it was a big dish that could only be eaten at the three banners in the Manchu and Han banquet in the early years. Most ministers wanted to eat it. They could only eat it if the emperor rewarded them with a face. After eating, Zhang Fan always felt that maybe he was a natural mudhead people, and he couldn't eat a taste of wealth.

It was the dumplings made of salmon that Zhang Fan ate and never forgot. In the past, Zhang Fan thought that the people here were mainly herdsmen, mainly sheep and beef. When chatting, he learned that they were not pure herdsmen, which was different from Mongolian and Kazakh.

They should be nomadic fishing and hunting. History Zhang Fan doesn't want to listen. The nagging old man can't tell clearly. Even if he makes it clear, Zhang Fan doesn't have that hobby.

He just wanted to know how the salmon dumpling stuffing was made. The dumplings were really delicious. One dumpling was held up with chopsticks. The dumplings the size of a small bowl had a shaking motion.

When you take a bite, you can't feel the thin dumpling skin at all. It's only full of fish meat, rich in

omega-3 (omega-3) fat, emitting a unique aroma. Not many soup juice is mixed with pure fish meat, and the aroma rushes left and right between lips and teeth. This taste can't be modulated by flavor essence.

It is suitable for fat and thin, with the aroma of fat and the sweetness of protein. It can not only give the mouth a full filling feeling, but also greatly stimulate the taste buds. When others were eating venison and camel meat, Zhang Fan, Shaohua and Lao Chen stared at the dumplings.

After a meal, he won't eat. When he got on the bus, he was still discussing camel meat. Lao Chen smiled and said, "they are hunting for wonders, not enjoying delicious food! Or Zhang Yuan can eat!"

Zhang Fan curled his lips. For a moment, he really didn't know how to reply. This is a compliment, but it seems to be swearing!

.....

The urgency of the experts, Zhang Fanzhen did not expect that the next day when he returned to tea, the experts from the third class hospital flew to the frontier from the capital like a charter plane.

Even the doctors of the General Hospital of pulmonary medicine didn't know why. The airport divided them into two waves before they were allowed to board the plane.

A group of Hula people arrived at the tea plant. 30x brought several doctors of internal medicine. Of course, academicians don't think about it. It's over to bring senior doctors.

The mediocre atmosphere as always. Before the person arrived, the money was first put into the account of tea vegetable hospital.

The lung hospital, it is said that Lao Xia's research team signed a 20-year labor contract with the hospital before leaving, which was released by the General Hospital of lung.

This makes Zhang Fan very dissatisfied, "can't people be more honest? How can they count on the contract!"

Zhang Fan is also helpless. He is a man of the golden mean. He can't dig. Lao Li and Li Cunhou were completely desperate before Zhang Fan picked up the leak. People are rich, and Zhang Fan really has nowhere to talk.

30x is even more troublesome. They are all on-the-job and have titles. Zhang Fan is big. Someone else killed a yellow star. Zhang Fan really can't catch it. I'm counting on the General Hospital of lung science to make a profit.

As a result, tanima, the leader of the General Hospital of Lung Science, was not a son! It's shameless for Lao Xia to see a 20-year contract for 60 years.

Zhang Fan spent half an hour swearing alone in his office.

In the laboratory, various groups have carried out experiments. They are willing to work immediately. Zhang Fan is also happy to save a meal.

Although the test plan has been clear, there is still a certain distance from success.

This test can be said to be a genetic test. In fact, it is to create a group of weak TB strains by changing proteins, and then inject TB patients after these TB strains are completely harmless.

When these weak TB strains enter the patient's body, they begin to compete for breeding rights with normal TB cells.

Therefore, at present, the weak strains have been tested. Now it is time to improve them to make them harmless, but also make its reproductive function powerful! Otherwise, you can't just be weak. If you don't make it harder, how can you rob other people's wives!

This kind of experiment is sometimes a matter of luck. If you are lucky, the laboratory process will become faster. If you are unlucky, just wait.

Sometimes tens of thousands of times of culture may not be able to find a suitable strain. Therefore, the workload is still quite large.

.....

"The paper is out! Look!" Lu Ning and Zhao Yanfang appeared in Zhang Fan's office at the same time. Lu Ning was dragged out of the laboratory by Zhao Yanfang.

"Well, yes, no problem, from format to demonstration, no problem, yes, very good! Publish!"

Zhao Yanfang glanced helplessly. "Can you take a closer look, just like your operation, it took me and Dr. Lu several nights to get it out."

"I've read it carefully. I'm still very relieved of you." Zhang Fan smiled. To tell the truth, Zhang Fan is still stumbling to get a pure English paper. He wants to find Dr. Zhao's paper for others. Isn't this a joke!

In front of Zhang Fan, Zhao Yanfang sent out the paper. The corresponding author Zhang Fan, Zhang Fan and Zhao Yanfang were listed as a common work. Originally, Zhang Fan wanted to give it to Lu Ning. People came all the way and made great contributions in the early stage of the experiment.

As a result, Lu Ning said: you are more useful than me! Zhang Fan was embarrassed. None of the three paid much attention to this.

It goes without saying that if Zhao Yanfang really cares, he will stay in the West Lake and follow her teacher, old Xia. There is no paper. After all, old Xia is not only the leader of Chinese transplantation, but also healthy and lively.

As for several projects in the hands of Lu Ning's family, if old man Lu hadn't applied for leaving himself, Lu Ning might have directly become a Jieqing in a few years.

Of course, Zhang Fan is not so urgent. Although he was laughed at by his old man and laughed at by people in the industry, Zhang fannei still felt that his talent was in surgery.

What several people didn't know was that when they issued their papers, in the expert building, the microbial lecturer in the bird market trembled, holding a copy of the paper, reading word by word, when he read his name in the second work.

The man is not old, but the bald boy lies on the bed and tears can't stop flowing down.

He remembered when he was a graduate student and when he was a doctoral student. When he remembered that his title paper was denied, he really didn't expect that he had done some basic experimental work. He didn't think that he could be hung on the paper at all.

He knew the weight of the paper too well. Although he was envious at that time, he always knew his weight and that Zhang Fan was generous. He might give himself some allowance or compensation. Unexpectedly, Zhang Fan didn't ask at all, so he hung him on the paper.

His tears soaked the towel, really. Sometimes, the pressure of the academic circle is often unspeakable, especially now the colleges and universities implement the system of no progress or retreat.

If the lecturer can't go further within two years, he will be dismissed by the University. Really, this kind of dismissal is not only a loss of work, but also a denial by the organization. Therefore, lecturers who fail to make progress in the first year often feel special anxiety in the second year.

.....

In half a month, the doctors of the tea vegetable hospital had a serious experience of what scientists in the capital are.

It is normal for doctors to stay up late. Tea vegetarians also stay up late without saying a word during surgery or rescuing patients, or even work shifts.

But this time, they were shocked.

After a group of experts came to tea vegetable, we all know that it was the top team in the capital who came to tea vegetable, but they got out of the car and entered the laboratory without seeing anyone.

Then for half a month in a row, the laboratory was brightly lit and shadowy every day. In the past, doctors in tea vegetable hospital felt that their work was the most tiring.

Unexpectedly, the lights in the laboratory have taught them what is the most tiring in the past half a month.

"Zhang Yuan, report to the leader, the strain characterization is completed! You can use experimental drugs!"

On the phone, Zhang Fan could hear the suppressed excitement and cheering in the laboratory.

.....

"Good! Good, great!" The leaders couldn't help being excited. Even if the general manager was not a medical expert, he knew too well about the disease of TB. When he was still a treasure digging team, once a comrade was infected with the disease, he would almost be a loser.

The approval document for applying for drug test soon came to Zhang Fan. The boss of the Ministry of Health told Zhang Fan to be careful. This is a matter of human life.

Zhang Fan, with his heavy approval, felt for the first time that this talkative organization and leader really have a lovely that people don't get bored with.

At the beginning of drug test, first contact major hospitals to invite a group of severe TB patients and a group of mild TB patients.

Most people will find it difficult to find severe patients and easy to find mild patients, because in terms of quantity, after all, the number of mild diseases is huge.

As a result, the number of severe patients with tea demand exceeded the standard, while the lack of mild patients was three or two sparrows.

This drug test should first be given to mild patients to see if there will be accidents, whether the drug is stable and whether it will cause any adverse consequences.

Only when there is certain data can we use drugs for severe patients, because there is no data for mild patients. Once we use drugs directly for severe patients, there will be a major accident, which is troublesome.

But this research can't afford to delay!

"What should I do?" Each leader of the test team shall hold a meeting.

"Either wait or keep looking?"

When someone proposed to wait, Zhang Fan disagreed, "if there is no mild disease, we will treat the severe one. We can't delay! When the result is obtained, everything is easy to say. Waiting is a crime!

If something goes wrong, I'll be responsible! "
