

## Chapter 196

"Don't cry! Everything has a father. You see, your eyes are swollen. Aren't you hurt?" Lao Lu pitifully held his daughter in his arms. For many years, Jijia didn't rely on him so much after high school. His very independent daughter is really scared today! The old road's Distressed were all pulled together.

"When I came out of the bathroom to wash my hands, a hooligan came to pester me. After Zhu Bing knocked him down, he quickly let me into the box. When I came out, he had fallen into a pool of blood. Woo, woo, woo!" Lu Renjia finally said the sadness in her heart, but who can she tell about her inner guilt and regret!

In the operating room, the director outside the chest said to Zhang Fan, "Dr. Zhang, are you going or me?"

"Let me go, director. This man is my friend. I was also present today. I felt very uncomfortable not to do anything for him." Zhang Fan said to the director outside his chest.

"OK, you go. I'll be your assistant." The director outside the chest nodded. No way, in the extrathoracic surgery, other doctors in the hospital don't have to ask. He took the main knife directly, but Zhang fan can't. Zhang Fan's level is no worse than him, and his technique is more stable, because Zhang Fan is younger.

At the beginning of the operation, this kind of operation usually takes the fifth rib into the chest, especially for this critically ill patient. First, the bleeding of the chest wall is not considered, and the chest is opened directly. Fortunately, Zhu Bing is a mirror man. Mirror person means that "the heart is on the right and the liver is on the left". The five zang organs and six viscera are all in tune, just like the imaging principle of plane mirror. It is common sense that the main internal organs of the human body "the heart, spleen and stomach are on the left, and the liver and gallbladder are on the right". Mirror people are extremely rare, and the probability of all organs growing back is only one in a few million.

That is, Zhu Bing is the descendant of a martyr. Otherwise, it is almost impossible for him to enter the police force in this situation, and the first round of physical examination was brushed down.

After thoracotomy, Zhang Fan cleared the blood clot, and then found the bleeding point. Although it was not a large blood vessel, it was also a large blood vessel. After Zhang Fan quickly pressed it with his fingers, he said to the anesthesia and itinerant nurse, "speed up the infusion speed and put dexamethasone directly into the pot."

Then start to deal with the bleeding point. There are many compensatory vessels of this artery. There is

no need to connect, and there is no time to connect, because the intercostal artery and internal thoracic artery are also bleeding. After suturing the bleeding point in the chest, Zhang Fan asked, "what are the vital signs?"

The anesthesiologist hurriedly said, "it was not measured just now. Now it can be measured, 8050mmhg. It is estimated that it can be improved after this liquid is input."

"Good!" Zhang Fan didn't talk nonsense. He directly began to suture the intercostal artery and internal thoracic artery. The evolution of the human body is too advanced. If a blood vessel is ligated, the blood vessels in all directions will compensate and improve the circulation. The lung tissue is bleeding badly. Zhang fan can't stop the bleeding by himself after suture and ligation, because it is a large pulmonary blood vessel. Although the bleeding is much smaller than that before suture and ligation, it still keeps bleeding.

Zhang Fan hesitated. He didn't want to cut off the lung lobe. Zhu Bing was too young, and he was still an Interpol. He retained the lung lobe surgery. As long as Zhu Bing recovered, he was no different from normal people, there would be an additional postoperative scar. If he cut off a lung lobe, it is estimated that Zhu Bing will leave the Interpol team in the future!

Watching Zhang Fan stop the operation, the assistant is the director outside the chest, so he asked, "what's the matter, Doctor Zhang. Is something wrong? " As soon as he said this, the anesthesiologist quickly looked at the monitor and said, "Dr. Zhang, the blood pressure has risen by 10060mmhg, and the breathing and heart rate are stable."

"No. Director Liu, I want to know whether this lung lobe will be removed or not. " Zhang Fan said to the director outside his chest.

"Although it's stitched, you see it's still bleeding. This can't be kept."

"As long as everything is done, this man will have no chance to be a criminal policeman in the future." Zhang Fan said with a little pity.

"Dr. Zhang, this is really super lucky. Do you still think about these things? Cut it! " The director outside the chest said without hesitation.

"Then cut it!" Zhang Fan said sadly. Just then, the head nurse of the operating room came in. She looked at the itinerant nurse. The itinerant nurse nodded to the head nurse. This meaning is very clear, that is, the operation is very smooth and the patient is saved!

Then the head nurse stood behind Zhang Fan, gently patted it on Zhang Fan's back, stretched out his

head and looked at the process of the operation. The smell of young women is very obvious, and when you enter the operating room, you must wear surgical clothes, especially thin clothes!

After reading it, he said to Zhang Fan's ear, "Dr. Zhang, what's the matter? The dean and leaders outside are waiting for news. The professor of Dida has also contacted. Is it necessary to let Professor Dida fly over, but I guess you and director Liu should have no problem."

This is the treatment of Da Na. The head nurse has a high EQ and can use his biggest capital without losing! This slight temptation, which is not explicit, can make people produce a ripple. If you really take it seriously, it's low-end. She, a young woman with high EQ, likes to play a secret affair to seduce you, but she will never take you seriously! This kind of thing, this kind of heat, only people will understand it when they are middle-aged. If Zhang Fan is an old man, he will smile knowingly and say with a frivolous smile: "the head nurse is fat again!" Then it's over.

But now Zhang Fan is a baby. He is not nervous about the operation. Instead, he let the head nurse gently paste it, which makes him sweat all over his head. When the head nurse asked, Zhang Fan didn't speak for a long time. The director outside the chest said, "Dr. Zhang should keep improving, but the patient has no big problem. No, Professor Di is here. What do you say, Dr. Zhang? "

"OK, don't come." Zhang Fan pressed his voice and said.

"Hehe, I knew my brother was very powerful." The head nurse patted Zhang Fan on the back and turned out of the operating room.

"Really, Dr. Zhang, there's really no need to tangle. This lung lobe must be removed. The compensation function of the human body is very powerful. It's not a big problem not to do extreme sports in the future." Director Liu outside the chest thought Zhang Fan was tangled.

"OK, cut it!" Zhang Fan said uneasily.

Open the oblique fissure, pull the lower lobe backward and the upper lobe forward to expose the inferior pulmonary artery. Because the upper (dorsal) segment artery and the lingual segment artery often originate from the left pulmonary trunk at the same level, the upper segment artery is ligated and cut off first. The basilar artery was dissociated from below the inferior lingual artery, ligated and sutured, and then cut off. Pull the lower lobe forward, ligate and cut off the inferior pulmonary ligament. The mediastinal pleura was pushed open, the inferior pulmonary vein was dissociated, ligated and sutured, and then cut off. Free the lower lobe bronchus, cut and suture the dorsal bronchus, and then deal with the basal bronchus.

This kind of operation is not difficult for Zhang Fan. As long as he deals with shock, everything else is not a problem, so he is not in a hurry. When he is in shock, he must be fast and slow. The bleeding is fierce and the rescue speed can't keep up. Once he changes from shock to multiple organ failure, it will take all the time.

But once the shock improves, we must be careful. Some people don't know medical treatment. They always feel that the operation done quickly is a master. This can be said: not necessarily.

The simplest is an appendectomy. Once a village doctor finished it in more than ten minutes! And a doctor in a third class hospital has done it for more than half an hour. Whose level is high?

The purpose of surgery is to treat the disease, not to drive a fast car. When it is not related to life, we should be cautious and cautious. After finishing the appendix in more than ten minutes, he absolutely did not enter according to the anatomical level, nor did he sew according to the anatomical level. Although he felt super fast, he was very unfriendly to the patient in the later stage, and the organizational structure was disordered. There should be something in the future, No one dares to move this place!

Surgery is not mowing. If the tissue is cut, it will not grow again. It can be said that the fault tolerance rate is very low. If you cut the grass wrong, you can say: ouch! I didn't notice, but can surgery say that?

Zhang Fan's little treatment and the development of science and technology have also made some operations simple and improved a lot. If the lobectomy had been done before, after the lobes were cut off, it would have to be carefully sutured one needle and one line. In other words, the popular point is to suture the balloon. If the suture is not careful, there will be air leakage after the operation, and the operation will fail. It is necessary to reopen the chest and suture! If that's the case, let alone the hospital, the patient's family can eat you!

And now it's much simpler. The stapler directly anastomoses the broken lung tissue, but it's a little expensive. Click 3000 yuan! Domestic ones are cheaper than 1000, but domestic ones have a disadvantage. As long as the anastomotic tissue is less, it may fall off. Although imported ones are expensive, they will not fall off as long as the anastomotic tissue is closed, unless the lung tissue falls off. Expensive also makes sense. One lung leaf Zhang Fan clicked eight times.

Outside the operating room, after the head nurse went out, she took off her mask and said happily to Ouyang: "report to the president, Dr. Zhang and director Liu. Don't bother the experts of Dida. The patient has passed the dangerous period. This kind of operation is not difficult for our hospital!"

Although there were a large group of senior leaders outside the operating room, she stared at Ouyang without glancing! This is why she has a general technical level, but she has always been the head nurse in the operating room. There is a fixed number for every Peck and drink. People are in society, and society is built by people. Sometimes the truth is really more difficult than science and technology. There are too many people. Technical dogs have low Eq. they can only explode their liver, otherwise they really can't get along! I have to scold here. It's ridiculous!

Ouyang was also shocked. He stabbed the dagger in his heart, which saved him! This directly subverted her medical knowledge for half her life, "really!" She hesitated to ask! Then he asked, "who is the master knife?"

"Yes, Dean, when I went in, the blood pressure of the wounded had reached 12070, and the vital signs were stable. The main knife was Dr. Zhang and the first assistant was director Liu. And Dr. Zhang and director Liu personally determined it. "

"Good! You've been working hard! On behalf of the municipal Party committee and the municipal government, I thank you. Comrades on the medical front are good. President Ouyang is very good! I'm not proud at all. Such a difficult and dangerous patient can be rescued in time. I want to celebrate for you, but I also want to criticize president Ouyang. It's too modest! Really, when you said it was life-threatening, my heart hung for a long time, but it's good. It better shows that our doctors and our hospital are not arrogant and impetuous. " Lao Lu is very happy, not for anything else. He can't be happy just for his daughter. Otherwise, if he can't save it, it's estimated that his daughter's temperament will never get out of this shadow in his life.

"Thank you, leader! If we don't do enough, we will make persistent efforts. " Ouyang's face is red. He has been engaged in cardiology all his life. He is so ugly today.

Although Lu Renjia was born well and arrogant, she is not a girl who doesn't understand the world. At this moment, it's not the time for her to lie in her father's arms for comfort, nor is it the time for her to stand out. When she heard the head nurse confirm again that Zhu Bing was saved, her tears blurred her eyes and her body softened. This is the symptom after the adrenaline peak and valley subsided.

At this moment, Shaohua gently walked up to her, stroked her head, accompanied Lu Renjia in tears, and slowly said, "it's okay, you can rest assured, Zhu Bing is okay!"

"Shao Hua!" There were too many people. Lu Renjia stuffed his head into Shaohua's arms and cried quietly, with great sorrow and joy! The best result of an accident in life is this.

Knowing the result, the leaders didn't have to guard here. After leaving several policemen, the old road couldn't care about his daughter, patted her on the back, and then took a group of people directly to the conference room of the hospital.

First of all, he should report to the secretary. The secretary is also very concerned about this matter, and it has alerted the local military region“ Secretary, our excellent police comrades survived the rescue of doctors and have passed the dangerous period. Um! Already determined. "

"Good! Excellent! The good news is very gratifying. You won't use it here. Just supervise the next pursuit in the hospital. They must not escape. "

"Yes!" Hung up the phone, the old road's face changed, and a frightening chill poured into his face“ Now, director Chen reports on the pursuit. The Secretary attaches great importance to it. It's up to you whether we can give a qualified explanation to the people. "

"Report to the leader, at present, two people have arrived at the case, and three people are still chasing. They have entered the area under the jurisdiction of the border police. I have coordinated the border

police. It also informed the leaders of their instructions and shot them when necessary. "

"I work here now. If they escape today, I don't think I have the face to go to the municipal Party committee again, and so do you."

The office of the pursuit leading group was set up in the hospital conference room, and the telephone kept ringing.

After answering the phone, the police chief reported to Lao Lu: "through the emergency interrogation of the two suspects, we learned about their criminal history. These people are not only suspected of smuggling, but also have homicides in their hands."

"Go ahead and shoot! No mercy. We can't let the masses and the front-line police get hurt for a few scum. " Lao Lu sat on the throne and said with an iron blue face.

This pursuit team has nothing to do with Ouyang. Now she is very curious and confused. When did the hospital surgery become so powerful? Few people in the country dare to guarantee safety in such a difficult operation. After changing her hand washing clothes, wearing a hat and mask, she entered the operating room.

Zhang Fan and the director outside the chest are still undergoing surgery. The operation is fast and can be explained clearly in a few words. But it really needs to be done. It's very slow and a little bleeding needs to be handled in time. Not to mention such a big operation.

Ouyang entered the operating room without speaking. She went in quietly. As a medical expert, although she rarely came to the operating room, she still knew the rules of the operating room.

In the operating room, the anesthesiologist and the director outside the chest chatted again. Zhang Fan didn't speak, "Lao Chen, I heard you bought a car recently? Can you drive at your age? "

"Ah! I regret buying it. There's no problem driving it. It's just that parking is too difficult. There's no place to stop when I go back late at night. Sometimes I want to carry the car home. "

"You're hypocritical. There's no place to park. Give it to me and let me drive it every day. There are many parking places in my house. I'll pick you up at work in the morning and send you back after work."

"You pull ~ ~" before he finished, he saw Ouyang, "courtyard ~ ~"

Before he finished, Ouyang raised his hand to stop him. Ouyang was not nervous at all when he saw the atmosphere in the operating room. He was completely relieved. He was even more relieved when he turned around and looked at the monitor.

"What's going on?" She turned to Zhang Fan and asked after making sure Zhang Fan saw her. Although the old lady didn't come from surgery, she knew everything. She had a clean door.

"Officer Zhu is a mirror image. His heart is on the right side, otherwise it would be dangerous today!" Zhang Fan said while doing it. At this time, the operation is almost over and closed drainage has been indwelling.
