

## Chapter 201

Weekend time always slips away inadvertently. It's already Sunday night before you do anything. Ma Wentao's Hospital hasn't been filmed yet, and Zhang Fan is not in a hurry. Take your time. This kind of thing can't be urgent.

Shaohua is also very busy these days. Jia SuYue is crying at home. Her parents have no way to persuade Shaohua. Because of Zhu Bing, Jia SuYue was a little angry with his boyfriend. People are like this. They hope for wisdom when they are brave and quiet when they are wise. Anyway, they will never be satisfied.

"I said a few words to him, and then pretended to be angry and left. But he didn't even coax me. From my anger to my leaving, he was an expression and didn't respond at all! It's been three days. I couldn't help looking for him. I found him drinking coffee with a girl! "

"Well! Then you won't slap me twice when you go up! " Shaohua looked anxiously at Jia SuYue's face and found no scars.

"No, I left quietly!"

"Why?"

"I don't know! Huazi, have you ever quarreled with Zhang Fan? "

"Not yet. He's busy all day. He's tired like a dead dog when he comes home. He lies on the sofa and doesn't do anything. I'm sometimes angry, but I can't bear to watch him fall asleep at any time!" Shaohua stroked Jia SuYue's hair and said gently.

"Huazi, do you think women should not pursue their love and dreams? Should they find a similar man and get married and have children?" Jia SuYue said with red eyes.

"It's to pursue love and dreams, but the more you think about it, what should you do when love is faced with daily necessities? You can't breathe under the pressure of daily trivial things. How can you pursue your dreams? I also dream of walking in the street with Zhang Fan hand in hand. I go to see peach blossoms in spring, spend summer in the forest, pick grapes in autumn, and lie in his arms like a cat in winter, but now even chatting is a luxury. "

"Do you regret it?" Jia SuYue asked.

"What do you regret? Although Zhang Fan is not romantic and a little dull, he gives me a sense of sureness and confidence. There are no boys at home. My father sighed when he was a child. Since there was Zhang Fan at home, the old man spoke differently. " Shao Hua said with a little pride.

"What do you think I should do? I really like him! "

"When you live at home, you should pay attention. Look at this situation. People don't pay special attention to you. You really have to think about it, or you will regret when you get married in the future."

"Huazi, I want to leave here!" Jia SuYue said pitifully.

"Well, don't say that. You can't even support yourself when you go out, and your parents are worried. Come on! Wash your face. The more beautiful I am, the more afraid I am of this little setback. Clean up LISO, stand in front of Lejie and tell him loudly: get out! "

"Cluck!" Jia SuYue made Shaohua laugh!

Tangyuan has recently reached the most difficult period. Her weight has decreased significantly, but the aggravation of hunger and the bad habits she has developed in the past three years have begun to invade again. She can't control her mouth. At this time, we can't blindly emphasize self-discipline. After all, not everyone's self-discipline is very strong.

After two days of observation, Zhang Fan decided to take medicine. Medical diseases focus on prevention and treatment rather than treatment. At present, due to various factors, hospitals put the cart before the horse and focus on treatment rather than prevention and treatment.

There are drug advertisements on TV channels and high-end hospitals, but there is no formal and professional out of hospital health publicity. Then, the good doesn't come bad. All kinds of so-called healthy food, health equipment and physiotherapy equipment take the opportunity to carry out various courses. Some people's anti old money has been ruthlessly cheated away, and they have also lost a lot of diseases.

Endocrine stopped such an old man. He is still a leader at a high level. A group of swindlers came from other places and contracted the highest-grade hotel conference room in chasu city. Then they distributed advertisements to the elderly in some nursing homes and dry rest homes, saying that they invited experts from the capital to visit the leaders to visit the veteran cadres in chasu city. Moreover, there are regulations for this kind of visit, and there are no places for consultation until a certain level.

This is a fire. Cadres at a certain level pay great attention to this level. If the level is not enough, they will find a way to send money to treat themselves for consultation. Those who are not ill should say they are

uncomfortable and have to go for consultation.

In just one week, millions were swept away by swindlers. A few years later, this group of swindlers was caught in a different place before they knew about it. This is still high-end. The low-end ones are directly inside the community. They call the elderly under the guise of free eggs, and then start brainwashing!

If a regional hospital regularly organizes large-scale expert doctors to preach health, this kind of thing should be very few! But no one pays attention to this matter. Tens of billions of chronic disease funds are consumed in hospitals and drugs a year.

Tangyuan can't hold on. Zhang fan can't waste his efforts, so the treatment of Tangyuan enters the secondary prevention stage. This drug treatment is only used for patients with increased disease risk due to obesity, not for beauty.

Orlistat, a weight loss drug with less side effects, is a selective inhibitor of intestinal pancreatic lipase. It does not affect appetite, but can block fat absorption. The side effects are relatively minimal, that is, increased defecation.

"Tangyuan, I gave you medicine today, but this is your last chance of medical treatment. If you can't control yourself, we can only meet in surgery next time."

"Doctor Zhang, I must be obedient and stop eating! Even if you starve to death, you won't steal it! " Tangyuan vowed.

"I hope so!"

A month, a whole month, is like an eagle. Tangyuan is tired, and Zhang Fan is even more tired. They finally overcome their bad habits. The weight of Tangyuan finally begins to drop day by day.

"Thank you, Doctor Zhang. Without you, I might really be fat. "

"No exaggeration. Other doctors will help you. After you leave the hospital, you must stick to it. When you stand on the T-stage again, I can boast! Come on, girl. "

"Thank you!" Tangyuan with tears hugged Zhang Fan. Zhang Fan stood at the door of the Department, watching the still fat but light tangyuan.

"How's it going? Have you got anything? "

"Oh! Teacher, there is a harvest! It's very big. " Dilibel stood beside Zhang Fan like a ghost and asked.

"Have you ever thought about delving into internal medicine?"

"I haven't thought about it yet! I don't think my character is suitable for internal medicine! " Zhang Fan

quickly put on a clear attitude.

"Ah! It's a pity. Go ahead. You can get out of school! I hope you will go further in the future! "

"Thank you!" Zhang Fan followed suit and hugged the lonely old lady. Dilibel looked cold and warm. The ups and downs of her life did not wipe out the kindness in her heart!

He is a respectable old man!
