

## Chapter 244

Those who engage in technology have a threshold. Different industries have different thresholds and difficulties. The sad thing about the medical industry is that the threshold varies from person to person. It's actually very simple to think of it as a profession. If you struggle for seven or eight years to get a practice certificate, you can be a doctor who sees a cold in every corner of the city and spend your whole life.

If you have faith in it, then sorrow will come. Whether it is internal surgery, the old knowledge has not been fully mastered, but new knowledge has followed. When you are young, all kinds of people want to struggle, want to learn, and all kinds of people can't help fighting. When you have certain qualifications and experience, people are old. This is the sadness of the technology house.

Stay at home and watch animation and play online games all day. This is not a technical house, this is a otaku. Go to see hospitals above grade 3 B. the resident doctors and girls are a little better. Look at the professional books of male doctors. It's not hard to break two or three internal and external departments in a personal hygiene edition. That's why doctors don't have time and communication.

Surgeons in particular, if they want to get ahead, they must understand the anatomy, principle and pathology of their department, and memorize them. When they see an organ, they must have a three-dimensional diagram of its nerves, blood vessels and structure in their mind.

It's very simple, but it takes time and effort to accumulate. When you do this, a doctor is in his thirties and early forties. This is not enough. Next, you have to practice constantly. The human body is not an animal, not a car. You have the opportunity to practice your hands at any time.

Therefore, the leaders of the hospital are also very contradictory. They are anxious to let the doctors mature as soon as possible, but they dare not let go to practice. They can only take the new ones slowly. The hospital's platform plus self struggle and efforts can be considered mature only after the general experience of hospitalization. At this time, almost all the doctors were over forty.

This is still a doctor with smooth sailing. If you waste one or two years in the examination for practicing medicine and the edges and corners have not been smoothed when entering the Department, then the mature time should be moved back. Therefore, this hospital also pays great attention to interpersonal relationship. Office culture is more serious here. There is a problem in life. Originally, the appendix has been very mature, but there is no chance to do intestinal obstruction. What is the reason? Don't summarize, don't learn from experience, when you want to understand, great youth is gone!

Zhang Fan has more systems than others. Relying on the system and his own efforts, he has slowly broken away from the suppression of this culture. Genius. When a genius has come out, there is almost no strife in this field. Everyone is not stupid. When he can't hold down, why not push him up with the wind and water?

Now the municipal hospital is such a situation for Zhang Fan. When the operation achieves the urinary system, the director of Urology watched Zhang Fan start the urinary system operation without saying anything. He not only did not object, but also worked very hard to cooperate, for fear of a little neglect!

Now is the time for Zhang Fan to collect the results of his efforts in the past two years. After the tumor was removed, the progress of the operation was fast. Zhang Fan didn't speak, and others didn't speak much. This is a style. The main knife didn't speak, and the cooperating personnel were embarrassed to speak.

Cleaning, blood vessels, nerves and lymph nodes are very clean, and the surgical vision is also very clear. The three experts fully cooperate. At this time, looking at the surgical vision from the perspective of shadowless lamp, you can hardly see a trace of blood sparkling feeling, that is, a piece of red, the bright red of muscle and the bright white of fat. Let's say a more vivid metaphor. At this time, it is like a pig with dried blood and a pig with its abdomen cut open. It's no different from the whole piece of pork on the market.

"Fistula handle!" When Zhang Fan removed the bladder and reconstructed the ureter, Zhang Fan said softly.

The words were like a power switch. When Zhang Fan finished speaking, the dead environment in the operating room suddenly came alive“ Zhang Fan, wait for lymphatic disease examination. Now, the scope of cleaning is enough. Do you need to wait a little longer? " Asked the director of general surgery.

"Wait, I touched it. It's no problem. It's a normal organization." Zhang Fan answered while undergoing surgery.

If this were another young doctor, he would be driven off the stage, but Zhang Fan said so with certainty. Everyone is not surprised at all. This is the treatment of genius. After all, a genius who has emerged has not appeared in the municipal hospital!

"Director Zhang, no, come to the urology department. I'm old, too. Come on, I'll help you retire in a few years! After all, the urinary tract is a little larger than the anus and intestine, and the development is also a little stronger than the anus and intestine. " The director of Urology said with a smile. Zhang Fan doesn't know whether to go to the urology department or not, but this is really warm and inexpensive.

"Director, don't be modest. You can stand for at least twenty years! " Zhang fanlue looked up at Lao Li

and said.

"It is estimated that director Li has grasped some new spirit!" Lao Chen, a general foreigner, made a very subtle joke with Lao Li, that is, they are at the same level, almost the same age, and they are all at the director level. Otherwise, Lao Li will definitely turn over. This is a joke with Ouyang.

"Go, don't talk nonsense. You ordinary foreigners are waiting for director Zhang to bring out one or two disciples. It is estimated that there will be nothing for you in the future. "

"Ha ha, that's a good feeling. As long as Zhang Fan wants to start a school in general foreign education, I will definitely change jobs and become a stepping stone."

"Is that your ward round or our director Zhang's ward round?" Lao Li said with a smile. In fact, Lao Chen said this sentence to Director Wang of general foreign studies, which means that I have no intention of the position of director, but don't oppress me too much, or I'll change my job!

"Job hopping is beautiful. I'm going to give you all the major operations of general surgery. There's no way to be lazy." Director Wang also spoke outside the ordinary. In a few words, they have reached an unspoken agreement.

"Ha ha." Zhang Fan smiled meaninglessly. It's not that he can't understand them, but that he doesn't want to intervene. It's unnecessary. His present state is the best.

The anus cannot be preserved and the bladder is removed. This operation is really cruel. There are no two important channels for a person. It's better to be a little older. You can barely live. Because old people have long adapted to the inconveniences of this life, fistula may also solve the pain of prostate.

And it's too cruel to a young man. Anus and ureter are gone. What about urination? Fistula, artificial channel. On both sides of the abdomen, a little inward above the hip, one side is the urethral orifice and the other is the stool orifice.

After this operation, although it can save people's lives and the five-year survival rate is very high, the actual situation is that the older the age, the longer the survival time, the younger the survival time!

Full of dung smell and inconvenient life, but for a young man with limbs and other organs, this life state is really too cruel. Many people are depressed within a year or two, and their desire to live slowly disappears. People are social animals. Every time they automatically leave this group.

Then it causes other diseases until death. Because he can't get used to this state of life. At this time, the most important thing is the active intervention of hospitals, families and psychologists. It is very simple to say, but very difficult to do. At present, ordinary people can't enjoy this ~!

The operation was about to end. The three old men kept changing their sour lower limbs, and the chat stopped. First, Zhang Fan didn't like to chat, and second, they were tired.

After more than six hours, the operation is over!
