

Chapter 321

Get on your horse and take another ride. Many times when you hear this word, it seems very funny. In fact, this is continuation, this is tradition. If you are lucky, you can meet someone who can help you get on the horse and give you a ride. Really, you are lucky. Are there many such people? There are many medical industries, but other industries are not clear.

After the two leaders nodded, the rest was left to Zhang Fan. There are a lot of preparations before the operation. First, the doctor can talk to the family members after confirming the operation. Otherwise, the family members agree to the operation. As a result, the doctors disagree and don't do the operation, which will be troublesome.

The family agreed to the operation, and then paid all the expenses. The next step is to make preoperative preparations for the children's body. Although the herdsmen look at many cattle and sheep, once an animal's plague comes, one dies, and then the income from the cattle and sheep sold every year also needs to prepare forage in winter, so there is not much cash.

Baiyin Tibu and her sister went to raise money. The cost of the operation is not high, that is, more than 3000. It is estimated that the operation will take more than five hours, that is, the doctor's labor. The recognized cost is a little more than 3000. The real big head is on fixed consumables, drugs and blood.

This kind of orthopedic consumables is not much made in China. And they are children. They also decide to use imported ones at home. This is the parents. Although the conditions at home are general, for children, especially for the treatment of children, parents will find ways to make good use of them as much as possible. While preparing the child for the operation, Zhang Fan also cares about Bart's parents' contribution through Shaohua.

The shortest preoperative preparation for this operation is two weeks, which virtually increases the treatment cost to the patient's home. Otherwise, why does head nurse Miao Juan have a high EQ? She is too good at doing things. After she saw that the director attached great importance to little Bart and knew that Bart's conditions were very ordinary, she directly changed Bart from an ordinary ward to a single room, but the cost was still calculated as the price of an ordinary room.

"Zhang Fan, you come!" Miao Juan stood at the nurse's station and shouted to Zhang Fan who had just come out of the ward.

"What's the matter, head nurse." Because Miao Juan introduced Jia SuYue to Zhang Fan. Although she didn't succeed, Zhang Fan was grateful. Usually, Miao Juan brought an acquaintance to see a disease or something. Zhang Fan did things for others, and what she did made Miao Juan feel very face-saving. This is how the relationship comes down. Miao Juan is also concerned about Zhang Fan's patient and helps

Zhang Fan worry. Because she is also a gossip. If there is any gossip in the hospital, she will also "ha ha, OK, invite me to dinner in the evening, remember!" With that, Jiang Nini went to work happily.

Zhang Fan looked at the girl's slim back, meditated a little, took out the phone: "Shaohua is busy, I'll tell you something!"

Chapter 322

The best thing in the world is that someone likes you. However, the relationship between men and women is also one of the world-class problems. There are too many individual differences in this thing, which can not be really quantified.

Zhang Fan doesn't have much experience, but he always knows how to reduce ten meetings. Anyway, we must not give others any hope or opportunity. The youth of life is just a few years. Zhang fan can't and dare not delay others. No matter what the other party is running for, it's not Zhang Fan's business, but you should know what you want to do.

"Not too busy. What's the matter. Didn't you have an operation today?" Shaohua asked on the phone.

"I was busy preparing for little Bart, so I didn't have surgery today. In the evening, I'd like to invite my colleagues in our group to dinner with you. "

"OK, have you chosen a place? I'm calling to book a seat. What would you like to eat?"

"Well, a transferred doctor, a female doctor, came to the Department. It seems to mean something to me, so I want to invite them to dinner with you. " Zhang Fan's voice dropped several tones, deeply afraid that others would hear it.

"Ha ha, I'm so happy. I thought I could see black stone alone. I didn't expect my eyes were right, OK! I'll book a hotel now. Don't worry, it won't embarrass you. "

"Well, good."

After hanging up, Shaohua bit his lip. Then he picked up the phone and called Jia SuYue, "Yue Yue, why. Can you come out? "

"Yes, I'm in a daze." Jia SuYue's work is really leisure, which can be regarded as a pension position.

"Come out quickly and go shopping with me. I want to buy clothes and I want my hair done. "

"Are you okay? What? I quarreled with your family Zhang Fan. Do you want to spend money to dispel your hatred! OK, wait for me. I'll be right there. Absolutely accompany to the end. " Anyway, Jia SuYue just watches the excitement and is not afraid of big things.

Shaohua really doesn't have a sense of crisis, but although she knows Zhang Fan very well, she has to guard against it.

Her mother once told her that if a woman can't change her man and maintain her family, she will be a woman in vain.

The family is run by people, not by their feelings alone. Men are young children, and they always have an unrealistic heroic dream.

"What's the matter? What's the matter? Why did you quarrel? How much are you going to spend today. Go to Vientiane exchange! If you don't spend more, your family Zhang Fan will never feel bad. " Jia SuYue came in a rage.

"What, no quarrel. It's ~ ~ "when Shaohua saw that Jia SuYue really came, he began to regret it again and was a little reluctant to give up money.

"What's the matter. You're not getting engaged! God, you didn't tell me. " Jia SuYue made a fuss.

"Ah! Keep your voice down. " Shaohua quickly took Jia SuYue for a few steps, left the door of the unit a little, and said, "Zhang Fan wants to invite his colleagues in their department to dinner. It seems that a female doctor is interested in him. He wants me to go with him. I see! "

"What? Ha ha, no wonder, I feel a sense of crisis now. You said you were OK before. Since Zhang Fan was together, you have been reluctant to give up all kinds of things. Instead, you have made Zhang Fan look like a human. " Jia SuYue nagged and scolded Shaohua.

"All right! Aunt, forget Vientiane exchange. It's too expensive. Just buy some ordinary clothes. " Shao Hua said.

"How can you do that? If you don't go to Vientiane exchange, what will you do if you are compared by others?"

"I don't know how many beautiful people there are in the world. If you rely on clothes to close his heart, you might as well forget it earlier. How bad it is to be on guard against this and that. Just buy some clothes today and don't embarrass him. "

Shao Hua suddenly wants to be the same. Yes, it's not necessary. If so, Zhang Fan wouldn't call. Besides, she believes in her own vision and Zhang Fan's character.

"Well!" Jia SuYue was stunned by Shaohua. Isn't this the kind of love she wants!

"What's the matter? The more." Shaohua looked at the stunned Jia SuYue and asked.

"I also want to have such a reassuring boyfriend. I won't let go. It's like raising an unfamiliar dog. It's gone in the blink of an eye! "

"Look at what you said. You have too high an eye."

"Is it tall? Maybe. "

Shao Hua really didn't go to Vientiane exchange or do his hair, so he tied his hair and combed a horsetail, and then bought a nice looking dress in Bangwei.

In about 10 years, bonway and other pure clothing brands were quite famous. In the tea vegetable market, people with a fairly good income bought their clothes.

You can buy some cheap clothes, but the treat place can't be too low-grade. After all, they are colleagues. Maybe they can help him at work in the future, so Shaohua is really not stingy when ordering a restaurant.

Eight bowls, tea vegetable market is a more characteristic restaurant. Although it sells Chinese food, it is strange that the tableware is based on Western food, with complete knives and forks. Of course, there is no shortage of chopsticks.

Nondescript business methods, but the business is very good. And the price is not cheap. Shao Hua and Zhang Fan seldom go. They can definitely spend 200 yuan after a meal. They still don't drink and Zhang Fan is half full. This is really expensive in small cities, but in this way, the restaurant is full every day. It can only be said that tea is greedy!

"First go to your village, your settlement, and find the local person in charge to affix their official seal here. When you get back, I'll take you to the Civil Affairs Bureau to complete this procedure. In this way, the state can give your little Bart a subsidy for surgery. "

"Thank you! Thank you, doctor! You are Bart's Bodhisattva! " Bart's mother's rough hands hold Jiang Nini's little white hands. She doesn't know how to thank others. Just keep saying thank you, tears can't stop.

They have borrowed all their relatives and still need a lot of money. Moreover, even cattle, sheep and livestock can't be sold in this season when grass is just emerging. Now they can suddenly get subsidies. A good thing they can't think of is that noble people help them. It's really like dazzling sunshine in the gray sky.

"It's okay. Don't cry. Go back and seal." There is nothing wrong with women made of water. Jiang Nini looked at Bart's mother crying, and her nose began to sour.

Little Bart didn't know why his mother was crying. He snuggled up in his mother's arms with innocent big eyes, slowly stretched out his little hand and gently wiped away the tears on his mother's face.

"Mom, don't cry. Bart, be good! Don't eat ice cream again. "

"Well! Don't cry, don't cry. Bart is good, Bart is good, mom is happy, happy! Ah! " After Jiang Nini went out, Bart's mother couldn't stop crying.

Are you happy? Happy, but why cry? I don't know!

Chapter 323

Hospital, a special place. Something that ordinary people can never forget can happen every day. But for medical staff, some things are really helpless. No one is born with a heart of stone and compassion.

When Jiang Nini returned to the Department with red eyes, Zhang Fan took a look and didn't speak. No need to persuade, no need to comfort. If you want to do this, you will have to face it sooner or later.

"Go, change your dressing." After about ten minutes, the girl estimated that she had calmed down. Zhang Fan said when he started shaking in front of Zhang Fan again.

"Annoying!" Because Zhang Fan promised to invite her to dinner, the girl was also very happy. Put on your mask and hat and push the dressing car to change the dressing. This is work, this is daily life.

"I'm so tired, ouch! My legs are broken. " Xue Fei, who had the operation, shouted deliberately when he saw Zhang Fan.

"OK, I'll treat you to dinner today." Zhang Fan wrote the medical record and said to Xue Fei, Wang Yanan and Xiao Li who came in.

"Don't think of sending me off with a bowl of minced meat noodles. At least it has to be oiled meat noodles and barbecue." Zhang Fan takes the initiative to treat him. How Can Xue Fei let him go.

"OK, I'll take you to eat fried meat noodles later. One is not enough for two."

"And barbecue."

"OK, no problem. Wang Yanan, Xiao Li, we'll have a big meal later. I'm really tired from work recently. Relax today and I'll invite you to a big meal. "

"OK, you're waiting for me here!" Xue Fei quit.

"Ha ha, you'll die of oily meat. It's also fun to shout tired. I did all the surgery today. " Wang Yanan felt very happy when he saw Xue Fei eat flat. Zhang Fan's technology, she thinks she can't surpass, but Xue Fei thinks she will surpass soon, so she unconsciously takes Xue Fei as her opponent now.

"Why, what have you done. Trying to buy us off? Come on, big or small. You, silly, let Zhang Fan sell it. He's a thief. " Xue Fei quickly shifted the direction of public opinion.

"Love goes or not. All right! Let's get down to business. These days, we should worry more about Bart's preoperative preparation, especially traction. We must pay more attention to Bart. Dr. Jiang ran down the subsidy from the Civil Affairs Bureau. "

"Really? Good boy! " Then he turned and looked at Wang Yanan deliberately. This thing is just heartless and heartless. How annoying is it.

"Look what I'm doing. My relatives are not in the Civil Affairs Bureau. Besides ~ ~ "Wang Yanan can't be excited by Xue Fei.

"All right, all right! Dressing change, writing medical records, writing medical records. Paste the test sheet of the test sheet. Brother Xue, hurry up. People don't say anything about Xiao Li's thin body. You'd better hurry to change your dressing. "

Zhang Fan interrupted the two people's meaningless quarrel. It's OK for everyone to know this kind of thing. It's meaningless to take it out for comparison. If Xiao Jiang hears it, it seems that everyone is unconvinced. It's unnecessary.

"Your meal is really delicious and difficult to digest." Xue Fei is like this. He's stupid. He's a thief at the critical moment. They have so many doctors in one session. He and Zhou Chengfu stayed in orthopedics, and they can become Lao Gao's disciples. Say he's smart. If he doesn't make progress for a day, he will definitely rely on his work.

Wang Yanan was really angry with him, and then Zhang Fan interrupted what he wanted to say. At this time, the girl's chest fluctuates too much. Bite your lips and forcibly endure your temper. I've really made progress. It would have broken out before.

"Well, be angry with him. You have to be angry with him sooner or later. He did it on purpose. Besides, everyone is not stupid, everyone knows, and you don't have to think you are Superman and can't tolerate the negation of others. "

"Why did you say he was like this?" Wang Yanan said reluctantly.

"Come on, you cheer up and try to improve the level of operation. When your operation is better than him, you will clean him up on the operating table and scold him as a grandson. He can't answer back."

"Well, Pooh!" The girl must have imagined the future and laughed.

This is exercise. For Zhang Fan, it is a kind of exercise. How to appease and gather up his teammates. If you want to go far in the future, you should go hand in hand both in technology and in dealing with people.

Before leaving work, Zhang Fan went to Lao Gao's office. "Director, are you busy after work? There are many patients in the group these days. Everyone is a little tired. And just today, Dr. Jiang ran down Bart's subsidy. I thought about inviting everyone to dinner. If you have nothing to do, go too. "

"Really, this little Jiang is really a warm-hearted and good girl. All right, you go. I won't go. I have to go home and have a rest. Thank Dr. Jiang for me. After all, people use personal relationships. "

"OK, let's go." Zhang Fanming knows that Lao Gao won't go, but he has to say hello. This is a matter of respect or rules. At least Lao Gao is still their nominal team leader.

After contacting Shaohua, Zhang Fan also drove the car. Recently, the road is blocked badly, and Zhang Fan rarely drives. Today, the hotel is a little far away, and it's rush hour. It's inconvenient for several people to take a taxi, so they have to drive there.

Jiang Nini felt cheated. She didn't hear clearly at that time. Zhang Fan said to invite you to dinner. It was you, not you. Now, when she saw that everyone in the group went, she couldn't laugh, but she tried to keep smiling.

"Ah! When can I buy this car?" Xue Fei, sitting in the co pilot's position, touched the interior of the car and said with envy.

"When you stop playing mahjong, there is still some hope." Wang Yanan said disdainfully.

"Who forbids me to win one that day?" Xue Fei couldn't hear others ridicule his mahjong skills. Although he really came home for the first time, he lost every time in his wife's words.

"Just you? forget it. Li lisuo can't recite his multiplication formula and won the car. "

"Come on, I'll recite it to you!" Xiao Li held her mouth and smiled secretly. Although Jiang Nini smiled again, she was a little reluctant. At this time, he was not in the Department, and Zhang Fan didn't care much about them. Moreover, he secretly glanced at Jiang Nini from the reversing mirror and didn't dare to speak again.

Zhang Fan thinks clearly. He must not give other girls a little thought. No, then he will suffer endless trouble. Although it doesn't sound like a man of all kinds, he is also a man.

Jia SuYue wanted to see who liked Zhang Fan, but Shaohua didn't take her. It is estimated that the girl is too curious. Shaohua booked a box early. I told my family that I didn't go back to dinner with Zhang Fan in the evening, and then I waited for Zhang Fan and them quietly.

It's time for her to have no ripples in her heart. Although the relationship between her and Zhang Fan was not established for a long time. However, it seems that two people have lived together for centuries. She knows what he thinks and he understands what she thinks.

Maybe they were husband and wife in their last life!

Chapter 324

"Shao Hua!" Wang Yanan shouted when he saw Shaohua. Zhang Fan didn't say to treat Shaohua. Of course she didn't know.

"Hehe, you're off duty. Come on, come in and sit down. It's estimated that you've been standing for a long time. Hurry up and have a rest. " When Shaohua saw Zhang Fan and them, he got up with a smile and said to everyone.

"Let me introduce you, Shao Hua, my girlfriend. This is the big brother of our group. I was kind to me when I went to the hospital. Now I've helped me a lot, Xue Fei, Dr. Xue. " Zhang Fan stood beside Shaohua and said.

When Zhang Fan introduced, Wang Yanan stood behind Xue Fei, facing Xiao Li and Jiang Nini, silently learning Zhang Fan's words, but his face was full of ridicule!

"Hello, brother Xue. Please help Zhang Fan more in the future. " Shaohua didn't understand Zhang Fan's Department, but he said it very well.

"Don't worry, don't worry, sister-in-law, don't worry, sure." Xue Fei's face began to shine.

Wang Yanan wanted to speak, and Zhang Fan hurriedly said, "this is Dr. Li, a doctor who works very hard. He will definitely be a very good physician in the future. "

"Hello, Dr. Li, do it quickly. Zhang Fan hasn't praised anyone like that. It seems that he really admires you! " Shaohua doesn't know which girl has a crush on Zhang Fan, so she's also testing.

"No, no! Mr. Zhang is great. " As she spoke, the little girl blushed. She just left the University and didn't adapt to this introduction and this environment.

"This is Dr. Jiang. He is very excellent. When deciding on a department in the future, it is estimated that the directors of internal medicine will break their heads and rush for her. The medical records are written quickly and well, and they are serious. "

"Hello, Dr. Jiang, I really admire you. I read Zhang Fan's internal medicine book. It's really thick. I don't know how you finished it. " Shaohua said with a smile.

"Hello. It's nothing. I'll finish it, but I may not go to internal medicine in the future. Maybe I'll stay in surgery. Zhang Fan, what do you think of my surgery? " The girl also said with a smile.

"It's her. The little girl is really beautiful." Shao Hua stood aside and looked at them with a smile. He didn't look worried and angry at all.

Jiang Nini is also a son of an official. Although she is new to society, she already has certain skills in how to speak, what to say and the purpose of speaking.

After saying this, she looked at Shaohua from the corner of her eye. She didn't find Shaohua angry. She was still calm.

"Hehe, I'm not qualified. Asian male, I don't need to introduce it. "

"Why don't you introduce it. Or she'll be jealous again. " Xue Fei interposed.

"Save it. You are everywhere. Shaohua and I have been classmates since we were small." Wang Yanan glanced at Xue Fei and took Shaohua's hand.

"Sit down, sit down. Take your order, brother Xue. You're really tired recently. " Zhang Fan beckoned everyone to sit down.

People are like this. The more you step on him, the harder he gets. If you hold him, he will be embarrassed“ Don't mention it. One person orders one dish and one person orders one dish. I'm embarrassed to eat what you said. "

"You still ~ ~" Wang Yanan was about to ridicule and was held by Shaohua“ Let's drink more water and jujube beauty tea. Asian male, you see, your lips are all the same, and your hair is dry. Don't surgeons drink much water? "

Shaohua said while pouring water. This action let Jiang Nini see. She suddenly seemed to find that Zhang Fan and Shaohua were very similar. At first glance, it was not amazing, but the slow contact seemed to be a bit of an attractive temperament that was unclear.

During the banquet, Shaohua didn't give a cold shoulder to anyone. Jiang Nini also showed a little at the door, and then didn't say to deliberately target or say anything.

They are all adults. She knows Zhang Fan's mind. Moreover, Shao Hua is generous. She won't and can't let herself down. No matter what she wants in the future, she must hold her posture today.

This is Shao Hua's excellence. If you really want to make the other party tear their faces, even if Shao Hua understands and believes Zhang Fan, there is absolutely no way to ensure a good mood, and it is also a shame. So at the beginning, she inadvertently raised the other party to a height that she couldn't make. This may be EQ!

"The little girl is really good. It seems that the small stone is becoming more and more attractive. " After dinner, several people were also embarrassed to disturb Zhang Fan's world, so they didn't let Zhang Fan send it again.

"Hi! You don't know me yet. If I were the same as before, no one would look at me more than you. This is also your credit. Thank you! "

"Hey, you're talking more and more. I wasn't worried at all. I was a little worried when you said that! That's sweet. " The two were bored with each other.

What is sweetest? The sweet tongue of a lover. What is the softest? Marshmallow, of course!

There are people in the court who are easy to handle affairs. Maybe it makes sense. Xiao Jiang did not ignore Bart because of Zhang Fan. She can't do it. She's also a soft hearted girl. In this world, there are still more good people and more soft hearted people.

Soon, little Bart's subsidy came down. The Baiyin TiB family really don't know how to thank Jiang Nini.

The preparation before the operation is almost the same. The instruments to be used are also specially contacted from the bird market. This kind of operation is too few in small cities, and the equipment manufacturers in tea vegetable city do not have this kind of equipment.

Although the operation plan was formulated, as soon as there was time, Zhang Fan, Lao Gao and Lao Wang looked at Bart's image examination again and again.

No matter how much preparation is made before operation, doctors should have the appearance and mentality of doctors. To be honest, if the patient gives his life to you, you should be worthy of this trust. In fiction, if you depend on this job to support your family, you have to be worthy of this salary.

"Don't go to surgery these days, and don't be on duty. Adjust your state and make every effort to prepare for the operation. " Lao Gao said to Zhang Fan.

"OK, director."

"I'll report to the dean. Prepare for surgery on Monday. "

"OK. I haven't had surgery recently. " Lao Wang also nodded. Then he said to Zhang Fan, "Zhang Fan, you and the hematology department should make sure that the blood is ready. Last time, I had to use blood. As a result, there was not enough blood. There's a lot of bleeding in this operation. Don't be afraid of the hematology department bothering you. "

"OK. I'll go and confirm it later. " Zhang Fan said.

On Monday, Bai yintibu's family filled the corridor, looking serious“ Don't be afraid, mom is waiting for you outside. Just a minute! " Bart's mother grabbed the child's hand.

"All right, sister, let go. The nurse is waiting. " The nurses in the operating room did not show impatience, but stood quietly waiting for the farewell of mother and son.

Chapter 325

Fear, for adults, there are too many things that can bring fear to them, such as sitting in a bumpy small plane like a tractor. The biggest fear of children is to leave their parents.

Bart was lying on the flat car with antibiotics hanging from one hand. The operation was too big. Intravenous antibiotics had been given a day before the operation. The other hand tightly grasped the corner of the patient's clothes. Although it covered the quilt, the flexion and curling of the body was still obvious. With his head on his side and innocent big eyes, he looked pitifully at his parents far away. I wanted to cry, but after looking at the two sisters in white coats around me, I didn't dare to cry.

The flat car disappeared at the end of the corridor. Bart's mother didn't know what to do. The two trembled and didn't know where to put it. They kept crossing and rubbing, muttering and talking.

Huaguo hospital, as long as it reaches the comprehensive level III. There is a rule. There are three super large departments, general surgery, respiration and orthopedics, and the leaders of many hospitals are from orthopedics. Then orthopedics all kinds of high-precision, but it is strange that such a tall place can't connect with a little finger.

Zhang Fan is already waiting in the operating room. Bart is the patient of their group. He was supposed to let Wang Yanan go to the operating table. As a result, the girl is a little uncomfortable these days, so she let Xue Fei go. I don't know what kind of deal she made with Xu Xian privately.

Xu Xian happily entered the operating room, looked at director Gao, and then said to Zhang Fan, "Dr. Zhang, can I be the third assistant for this operation? Mr. Xue has diarrhea. "

Before Zhang Fan spoke, Lao Gao said, "he's itchy again. You said, "why doesn't he improve at all?" Zhou Chengfu left. Although he left quietly, Lao Gao was still a little sad.

Xue Fei and Zhou Chengfu were his disciples brought out at the most difficult time. They were not his own son, but they were also the two with the deepest feelings. The scene of three people holding together to keep warm in those days was vivid. But now, one left the master for his own future. The other is directly out of tune.

Although Zhang Fan is also his disciple, for Zhang Fan, he always feels that he lacks something. Perhaps what he lacks is the process of teaching. Zhang Fan got up so fast that he didn't notice. He was about to look up. So speaking of Xue Fei, Lao Gao is a little gnashing his teeth.

Everyone knows Xue Fei's problem. Zhang fan can't explain it if he wants to. At this time, Xue Fei is definitely not in the Department. He may have played mahjong with his aunts long ago.

"Xiao Xu, which major are you?" Lao Wang gloated and asked with a smile. Lao Gao's disciples are proud if they don't work hard. Compared with Lao Gao, his disciples are much more powerful. One by one, several leaders are more powerful, but they can't compare with Zhang Fan!

"Director Wang, I graduated from spine orthopedics." Xu Xian had already stood with Zhang Fan to watch X-rays and MRI, but as soon as he heard Lao Wang's question, he quickly turned around and answered.

"Oh! Spine orthopedics, which hospital assigned you to joint orthopedics. Isn't this a waste? It's inappropriate. I have to ask. "

After Xu xianding, orthopedics was divided into three, so there was such a thing. When Lao Wang said this, Xu Xian couldn't answer.

Xu Xian was practical and capable. Of course, Lao Gao was reluctant to give up. He rolled his eyes at Lao Wang and said, "what's wrong? He's an orthopedic doctor first."

"Pick up the patient!" The head nurse's voice came. The head nurse in the operating room helped the itinerant nurse bring Bart in " Children, don't be afraid. It doesn't hurt at all. Just sleep. " Then he gently touched Bart's small face with bristles and goose bumps.

Little Bart lay on the bed, holding the head nurse's hand tightly with his non injected hand. Although the head nurse is usually evil, she really has affinity for children.

"Sister! Don't go! " After the head nurse sent them to the place, she was ready to have a few words with Zhang Fan. As a result, Bart, who had not spoken since he came out of the ward, blushed and spoke.

"Ouch, ha ha, good, obedient, sister won't go." The head nurse was really happy. She was really happy to let such a pure child call her sister. Her heart blossomed.

Although Bart, like a lamb, was nervous and afraid, the head nurse's gentle comfort was the only thing he felt he could rely on in this strange and strange place.

Put your little hand into the quilt, then trembled and took out a thing, "send you, thigh stone!" Bart didn't know where to find a bone that seemed to be an animal. It looked a little jade. It looked like Bart's favorite.

Bart's pure eyes are like a clear spring. The head nurse, a young woman who had experienced many

storms, suddenly had a sour nose and tears came down directly.

"Thank you! No, sister. "

"Sister, take it! Bi Shi, bless. "

"Well! Sister, sister! You will be my brother in the future. " In a strange environment, although he didn't know what surgery was, he also knew it was not a good thing.

Innocent, pitiful, but with very sincere eyes, it directly moved the head nurse who is also a call of the wind and rain in the operating room“ Hey! What is missing is precious. The sincerity of the child world is so precious in the adult world. " Lao Gao also felt a little deep.

"Yes." Lao Wang nodded involuntarily. The head nurse took the wolf leg stone given by Bart, and the other hand held Bart's small hand. She couldn't stop crying until Bart slowly fell asleep under anesthesia!

"I'll wash my face. Zhang Fan must be careful! " The head nurse stood in front of the operating room and specially said to Zhang Fan.

"Don't worry!" Zhang Fan nodded. The itinerant nurse helped Xu Xian disinfect, while Zhang Fan, Lao Gao and Lao Wang brushed their hands. Lay sheets, cover holes and towels when everything is ready.

Zhang Fan put on gloves, took the scalpel handed over by the instrument nurse, and wiped the skin to be cut with an alcohol cotton ball. He looked at the clock hanging on the wall of the operating room and said softly, "the operation begins."

Bart is on his stomach. In this position, there is a special operating table. Many people have taken a bath and massaged in the big bath. It's the kind of bed with a hole at the head of the bed that can put their face down.

Zhang Fan's main knife, Lao Wang's first help, Lao Gao's second help and Xu Xian's third help. The air pressure of Zhang Fan's operation was relatively low. Before the operation, little Bart came again. All of a sudden, the atmosphere of the operation became more depressed.

No one has the desire to speak, which may be the sorrow of adults! Simple things are luxuries that can no longer be obtained.

The scalpel opened a hole in the young skin, and the skin was pulled a white line in an instant, which is the dermis. Then the handle opens the subcutaneous tissue. Then change the electric knife and start hemostasis.

Surgery, as long as it is a traumatic operation, must enter layer by layer according to the physiological level, and stop bleeding layer by layer. Experts, especially some surgeons who pay attention to details, look at their operation, just like art.

It is clean, neat, well-organized, anatomically clear, and almost no bleeding can be seen in the whole operation field. Some doctors with poor skills do not know whether they are in pursuit of speed or do not understand anatomy. The level is not clear, and the bleeding in the field of vision is really like a slaughterhouse.

Continue to extend inward, expose the spinous process, cut the supraspinous ligament, and then gently separate the cut ligament to both sides“ Periosteal stripper. " After leaking bone, Zhang Fan said softly.

The operation nurse accurately handed over the periosteal peeler to Zhang Fan. On the operating table, there is something particular about passing things. Sharp tools, such as knives and scissors, should be delivered with the sharp blade pointed at yourself.

When it is passed to the other party, you must make a downward movement until the other party makes the opposing force, and then you can let go. On this detail, many nurses have to practice many times. Is it simple? Simple, but you must practice this action into a subconscious action and let your muscles have memory to be qualified.

This is not demanding, because there is nothing lucky on the operating table. Some special equipment may be just one. If it falls underground during transmission, it is an accident directly.

Zhang Fan clings to the spinous process with a periosteal stripper, pushes the thoracic paravertebral muscle to the tip of the transverse process from under the periosteum, and stops when the lumbar spine is exposed to the outside of the articular process.

"Gauze!" Lao Wang stared at Zhang Fan's actions. Lumbar surgery without saying anything else, this bleeding is very much. Human evolution is very advanced. As long as it is around the bone, it will be accompanied by large blood vessels and important nerves.

The spine not only supports the body, but also protects the derivation of the brain, so there are many large blood vessels. During the operation, the large blood vessels can be avoided, but the small blood vessels separated from the large blood vessels cannot be avoided from being damaged.

When doing surgery, we should pay attention to the eyes and hands. When the master knife says the command, others don't have to think about it. For example, at this time, there are two bleeding in the lumbar bypass.

Zhang Fan also said simply: "stop bleeding." Which to stop first, which to stop later, how to stop bleeding, whether to use gauze or electrocoagulation knife, these are rules, these are rules and regulations, and these are knowledge.

Moreover, both assistants and nurses must keep an eye on the operator's steps.

After Zhang Fan took the gauze handed over by Lao Wang, he began to fill it. During the operation,

many bleeding does not leak but exudes. When the muscles are separated from the bones, it is like sweating blood. At this time, it is impossible to stop bleeding with an electric knife or silk thread. This requires gauze compression to stop bleeding.

And the gauze during the operation cannot be dry gauze. It can only be used after being soaked by normal saline. This is not a bandage. If a piece of dry gauze is handed at this time, Zhang fan can directly drive the assistant and instrument nurse down. Because the tissue under the skin is very delicate, dry gauze is like sandpaper.

"Pull away." Zhang Fan said a word to his assistant after filling gauze.

They're not new. They're ready. As soon as Zhang Fan opened his mouth, Lao Gao and Xu Xian opened their skin with a retractor to expose the surgical field of vision as much as possible.

Retractor is the most feared thing for surgical inpatients, especially general foreign inpatients. What's this thing like? It's an L-shaped blunt alloy. It's very hard. Ordinary people can't deform it.

Orthopaedic dry retractor is better. It's really sad for ordinary foreigners. The large retractor is estimated to be the same size as the bending of an adult's arm. For operations such as gastrectomy, the second and third AIDS do one thing from beginning to end and pull their stomach with stable strength.

The surgical site is too deep. They can't see that after four or five hours of surgery, they just pull it blankly. If it's a little bad, the operator is not happy. After an operation, both hands and arms won't move.

After opening the surgical field of vision, we entered the critical period of the operation. This is the time to reflect the level of the performer. How to adjust and how much to adjust is too difficult.

In the image data, when looking at the spine and when opening the body to look at the spine, it is directly different. In terms of image data, you also have a general concept.

The operation will open those places that need to be adjusted, and the longest is no more than ten centimeters. The anatomy is not clear, or the technology is not in place, and the bone to be adjusted cannot be found.

It's not a joke, let alone the spine. Just a simple plate removal after clavicle fracture. Before the operation, the clavicle and steel plate can be touched directly on the skin, as if they were just a little under the skin. It seems very simple.

But in fact, when the operation is single, the hole towel is covered, the scalpel is drawn, the subcutaneous tissue swells, then bleeds, and the muscles are pulled. ok What about the steel plate? Can not find! This has happened to many transferred doctors.

Now what Zhang Fan has to do is to change the deformed whole, or let it grow in the expected direction

in the future.

Then we must first destroy its original connection. It's very dangerous at this time, because the spinal cord is in front of the spine. This position is fixed, not because the patient is lying down. For example, the skin on the back should be in front of the spine according to normal. In fact, the professional language on the operating table is not like this, but just the opposite.

Time has slowly passed for more than an hour, almost two hours. Zhang Fan and Lao Wang sweat directly like beans. They can't wipe it. They directly put a towel on their forehead.

Bone biting forceps are the pointed nose vises that we usually use. Zhang Fan bit open the bone bit by bit, and then used a scraper to remove all the broken bones, cartilage and soft tissue between the spine bit by bit.

The cleanliness here must be clean. Because once a small bone mass enters the spinal cord, the light is the postoperative inflammation, and the heavy is the patient's lifelong lumbar pain or corresponding limb numbness.

Take care of this. Here comes the most dangerous step of the operation. At this time, we should adjust the position. Before adjusting the position, we should first separate these abnormal bone blocks.

How to separate? People who have eaten the animal spine know that the spinous processes of the spine are stacked together. If they want to separate at this time, they have to split. Yes, it is forced splitting. At this time, it can't be light or heavy.

If it's light, it can't be split. It will increase the fragments of bones. It's heavy. The spinal cord is ahead“ Click! Click! " Zhang Fan bit his teeth and split the spinous process twice.

Zhang Fan didn't realize how difficult it was, but Lao Gao and Lao Wang, the voice was like cutting on the tip of their hearts, and their hearts were hanging. If you slip your hand or exert too much effort at this time, the consequences will be unimaginable.

Xu Xian is also sweating, although he graduated with a master's degree. But the difficulty of this operation is counted in provincial hospitals.

Chapter 326

Other industries do not know, but at present, in the medical field, what is the difficulty, that is, the formulation of a postoperative return visit and expected big data, but the human body is too complex. Without a large test base, it is impossible to make a clear estimation. But this matter is too expensive, and there are no substantive economic benefits, so!

And the return period of this industry is too long. You have to endure when you are the youngest and most short of money. Most industries also need to endure, but this industry has endured for a little too long. Five years of undergraduate education, three years of transfer and five years of hospitalization are the most smooth. It's not until you're in charge of the treatment that you have a little foundation, but during this time, you've gone through a group of people.

Then a large number of medical students filled the civil service, and some medical students worked as drug agents and other industries. No matter how much they hate or hate this industry, they will definitely miss him who once wore a white coat in the dead of night!

The sense of achievement between life and death is so beautiful! Every rescue, adrenaline soared like a roller coaster. Snatch a man alive from death. What kind of feeling is really hearty, and this feeling is addictive.

"Director, prepare the bone graft." After splitting the spinous process, Zhang Fan turned his head and said to Lao Gao. For a small amount of bone defects, osteoblasts will slowly fill the defects. If such a large defect is like this, it can't be filled.

"Good!" After Lao Gao has placed the automatic puller. Go to the sterile table next to the instrument nurse and start preparing the allogeneic bone for bone grafting.

Bone graft, the best bone is actually the patient's own bone, but Bart is too small to take, so he can only place allogeneic bone.

"Doctor Zhang, I'll wipe your blood." Although Zhang Fan's chop was very accurate and gentle, a lot of blood splashed on Zhang Fan's face and eyelids.

This kind of operation is a little better. If you do knee arthroplasty, it is called flesh and blood. Generally, when you do knee arthroplasty, the operator must wear glasses like windproof glasses. Because it is necessary to cut the coarsest femur of the human body, when the cutting machine cuts, bone marrow, blood and a small amount of soft tissue directly splash out with the cutting machine.

The itinerant nurse dipped in Bromogeramine solution and gently wiped the blood off Zhang Fan's face, "OK, Doctor Zhang."

"Yes!" Zhang fan can't even thank you. He said that the injury of this operation is too great. We should hurry up the operation time.

How is this operation done? In fact, it is also simple, that is, to separate the deformed bone blocks connected up and down first.

Then adjust the position. Then place the fixed alloy instrument from the upper and lower bone blocks. Then slowly correct the deformed spine through this alloy instrument.

"Vertebral root hook." After cleaning up the broken bones in the operation area, Zhang Fan said to the operation nurse.

Two hours have passed since the operation. Now is the time to place titanium instruments. Everything done at this time must be determined three times.

Because at this time, once the device is implanted, there is no way to modify it. At this time, if there is a mistake, the operation will fail directly. There is no way to make up for it. There is such a big place in the human spine. Once there is a mistake, if you want to start again, it is not a dream.

The upper and lower spine, several bent spines, began to place corrective instruments. What does it mean? It's quite simple in popular terms, such as a curved sapling.

To correct it, first drill a hole in a relatively straight place and put a perforated nut, which is the vertebral root hook. In turn, drill a perforated nut at the interruption, lower end and bottom of the sapling, or directly drill a hole on the ground.

Then use an iron rod to pass through the hole at the upper end of the nut from the top to the ground, and then tighten the nut. In this way, with the growth of the saplings, the curvature becomes smaller and smaller, and finally becomes straight.

"Director Wang, help me." Zhang Fan took the vertebral root hook and placed it at Bart's pedicle. The vertebral root hook is actually like a screw with a screw. What kind of expansion screw is commonly used in peacetime, and then a buckle is connected at the top of the screw. Like a question mark.

The tool for placing the buckle is like a bottle opener for red wine, but it is not used to pull out, but to drill into it" Doctor Zhang, all right, let's start. " Lao Wang grabbed the nailer and confirmed it for Zhang Fan.

"OK, I'll start." One circle, two circles and three circles. The thickness of bone is different and the number of circles is different. This is not wood or brick. You can't turn it casually. If you turn it through, it's the spinal cord.

One lumbar vertebra, two lumbar vertebrae and three lumbar vertebrae have been on seven. Such a screw is imported in thousands. Titanium alloy, because this metal has relatively stable properties, it is

not easy to electrolyze in the body and is not easy to infect.

Screw up the screws. It's not a hard job, but in this way, Zhang Fan's sweat has been soaked in his hand washing clothes. If the surgical clothes were not particularly thick, it's estimated that the surgical clothes would be soaked.

Here comes the hardest work. The orthopedic implant rod is a straight titanium alloy rod. I don't know how hard it is, but it's probably the hardest metal Zhang Fan has ever seen.

Because the spine originally has radians, now we should straighten the implant rod to a certain radian, a specific radian, an radian that can make the spine develop towards normal physiological curvature. Why are there several other female surgeons? Orthopedics is really very, very few, because orthopedic surgery has a lot of work, not to mention women. Men with poor body and less strength can't do it.

Orthosis is not a tall thing, especially this kind of metal orthosis, which is very simple. It is three triangular fixed circular iron pillars placed on an iron lump.

"Dr. Zhang, I'll do the early orthopedics. You can do the fine-tuning later. You've had surgery for more than two hours." Xu Xian spoke.

"It's all right. I'll come! " On the operating table, Zhang Fan is too independent. Don't talk about Xu Xian at this time. Even Lao Gao, Zhang Fan is not at ease.

"Leave it alone. He won't trust anyone." Lao Wang understands Zhang Fan. Doctors are like this. Only what they do can they rest assured.

Zhang Fan took a titanium alloy rod about ten centimeters long and put it into the orthosis. Xu Xian grasped the orthosis with her hand. Zhang Fan had a bone biting forceps in his left hand and a bone biting forceps in his right hand, holding both ends of the titanium alloy.

"Have you got it?" Zhang Fan asked Xu Xian.

"All right."

"Hey!" With Zhang Fan's dull sound from the nasal cavity, the titanium alloy rod began to bend with the naked eye. It was really bent alive.

This kind of orthopedic is very laborious. First, straighten to a certain radian. Once the expected radian is not reached for the first time, it will be more laborious to fine tune in the later stage.

It's too hard. It's too bent. It's too hard. People don't move. And the number of orthopedics can't be too many, because the metal has a degree of fatigue. Repeated violent orthopedics can't be seen by the naked eye. In fact, the metal can't be used anymore. After it is installed, it won't take long to break!

Therefore, one-time molding is the best, which requires considerable familiarity with force control and understanding of this material. Zhang Fan blushed and bent the titanium alloy rod in one breath, which was very beautiful and in line with the expected radian.

Zhang Fan holds a little hot titanium alloy rod to draw on the lumbar spine. Although it feels appropriate to the naked eye, he still needs to draw. At this time, the hammers are installed directly without comparison, but it is estimated that the operation will not be done.

When Zhang Fan was making a gesture, Xu Xian was stunned directly“ This guy is not very strong. Why is he so strong. The real animals! Such a thick stick can be straightened in place at once. It seems that I have to go to the gym to roll iron in the future. ”

Lao Wang and Lao Gao were surprised. Looking at Xu Xian, Lao Wang was a little stunned. Lao Wang smiled and asked, "Xiao Xu, do you have an object?"

"Oh! With the director. ”

"You see, Zhang Fan doesn't. The Hairy boy has strong firepower!"

"Well!" Xu Xianhan came down. The operation went well. Lao Wang couldn't help but want to talk. Zhang Fan was so annoying that he hardly spoke from the operation. It was too hard.

Zhang Fan glanced at Lao Wang and said nothing. The old man couldn't be coquettish. The head nurse is a little excited today. Otherwise, old men and young women can be annoying to death.

"Zhang Fan, see if it's appropriate." Lao Gao handed the repaired allogeneic bone to Zhang Fan. Zhang Fan looked and said, "just right." If at ordinary times, Zhang Fan absolutely wants to boast, but once he has an operation, Zhang Fan seems to have changed his posture of not entering strangers.

Zhang Fan took the allogeneic bone, and then shook it gently with his hands one by one. Although he did it himself, this final examination must not be missing. If you forget this step, well, surgery is the time to torture.

At least a week, as long as a month, it is estimated that you can dream every day that the screw falls off.

"Install the implant rod and fix it." Zhang Fan said that several people could not help straightening their bodies, which was the most critical step of the operation. Zhang Fan gently stuck the orthotic implant rod from the first fixed nut to the last nut. The orthotics was very successful, as if it was specially tailored for Bart.

Then gently and steadily turn the nut driver counterclockwise until the hand feels that the nut is in place, and then tighten it clockwise to prevent the nut from sliding. Tighten one by one, and finally push the implant rod clip into the top of the hook with additional force.

OK, the placement of the implant rod is completed. Is the operation finished? No, that's half done. To pull the deformed spine over, such instruments must be inserted into both sides.

This is like a curved small tree. Pulling on one side can pull the bending degree, but there is also a risk of breaking the small tree. The best thing is to put one on the opposite side to resist the tension.

After fixing the screw, Zhang Fan confirmed it again, and then said to Lao Wang, "come to Director Wang, let's change our positions." On the operating table, especially this kind of plane surgery, one assistant usually stands opposite the operator.

Now we have to do the other side, so Zhang Fan wants to change positions with Lao Wang. Lao Wang saw that Zhang Fan had set his position. He wanted to say: let me do it, but he looked at Zhang Fan and refused to recognize him. He looked like a wolf and didn't speak.

At least it's a director. He asked Zhang Fan to refuse. Isn't he ashamed. So I didn't talk much, so I began to change positions with Zhang Fan.

For the doctors themselves, this sterile area is actually stipulated as follows: the sterile area below the neck, above the surgical garment lace, and the sterile area from hands to shoulders. Once you have the operation, whether you are polluted or not, the rest is regarded as a polluted area.

What is the operation suit like? In fact, it is made of a particularly thick cloth into the shape of a raincoat. When wearing it, it is opposite to the raincoat, that is, the button side of the raincoat is on the doctor's back. But there are no buttons on the surgical clothes. They are all fixed by cloth belts.

General surgery is to try not to move around. If you have to change the position, you must change the position back to back when they meet. Novice doctors are often scolded by nurses in the operating room for violating aseptic operation.

The position is fixed, and the fixing on this side is much faster. Repeat the above steps. After four hours, the operation was finally fixed. Zhang Fan looked at the spine fixed by titanium alloy and smiled gently.

Because he seemed to see Bart grow up. Strong as a mountain, straight back!

"Flush!" Xu Xian took over Lao Wang's position and helped Zhang Fan wash. With the last experience, Xu Xian no longer asked for stitching.

It's not necessary. He wants to replace him, but this guy is deeply afraid of taking credit for himself. He won't even let the suture. He's stingy! Xu Xian glanced at Zhang Fan and feigned in his stomach.

Outside the operating room, Bart's mother and grandmother read silently and looked forward to it. Bart's father kept walking in the corridor. Look at the time on your mobile phone from time to time.

This mood, especially for parents. Really, not ordinary anxiety. One is looking forward to the success of

the operation, the child can jump out, the other is worried about the failure of the operation, what should they do. Their hearts would be like shrinking together, and they didn't dare to breathe. I'm afraid it will affect the doctors in the operating room.

"Bart's family!" The head nurse is much better now. After the operation, we should inform the family members that this is usually the work of a small nurse. Today, she rushed to do it.

"I am! I am!" Bart's father strode over.

"I'm Bart's mother! Doctor, I'm his mother." Bart's mother, who had been sitting on the stool for a long time, stumbled over.

"Bart's operation has been completed. The operation is very successful. It has been sent to the ICU. You can visit a person at the specified time tomorrow morning." Then he added, "don't worry! It's okay."

In this sentence, Bart's parents fell to the ground in mid air "thank you! Thank you! Thank you, doctor!"

"I'm a nurse. You're welcome. Keep your voice down. There are others undergoing surgery. All right, go." The nurse entered the operating room. Light footed back to the operating room.

"Bart has finished the operation. Let's go back." The old woman with ears on her back dropped her rosary beads to the ground. Her toothless lips trembled and looked at Bart's parents. Bart's mother held her mother-in-law and said.

"Done? Where's Bart? Why didn't he come out? Don't deceive me! Where's my grandson." The old lady watched the nurse come out and go in, and now her daughter-in-law said so.

The anxious old lady, with muddy tears, grabbed Bart's mother and desperately wanted her grandson.

"Mom, I really don't lie to you!"

Chapter 327

People! Although in recent years, the world has been filled with all kinds of negative emotions, on the whole, when Chinese people suffer, most of them complain about themselves and say that their life is bad.

It's not too obvious when enjoying meat. And can also understand the suffering of others, and will do it when you can help others. Such people still account for a large number in China. Yes, there are some people who love to show off, but generally speaking, the Chinese people are still relatively gentle.

Bart was personally sent to the ICU by the head nurse and anesthesiologist. Before leaving, the head

nurse gently put the thigh stone on the small table at the head of Bart's bed.

"This is the doll's favorite thing. Let's have a snack. I hope he can see it for the first time when he wakes up." The head nurse explained to the ICU nurse.

"OK, head nurse. When the shift is over, I will specially say it to you. " A little nurse smiled and said to the head nurse in the operating room.

"Thank you, Xiao Chen. How's it going? Is it time to take the intermediate exam? Read well. Try to pass the exam once. "

"OK, head nurse, I'll work hard."

Four hours later, Zhang Fan glanced at the clock on the wall and rubbed his numb calf. "Dr. Xu, let's go. I'll invite you to dinner. It's time for dinner. Have the directors gone? " Xu Xian came to help the market. No matter how much help he gave, he had to show it to others.

Colleagues are like this. You pretend you don't know once and you pretend you can't see twice. When you really need help, others won't see it. When it comes to a few dollars, many people often feel unnecessary. In fact, such small things are more important than major events and must be done in place. Because of major events, ordinary people really can't help!

"No, I'll go to the canteen. Dr. Zhang, the measurement of spinal torque seems to me that you can determine it by measuring it casually. How did you do it? "

"For the measurement of this moment, you must first clarify the patient's deflection angle ~ ~" the two said as they walked, Zhang Fan said. These things are obtained, experienced and refined by Zhang fan through countless operations in the system. The operation can not reach a certain number, so it is difficult to understand. In the real world, it's really difficult to achieve this amount of surgery.

But someone asked today, and Zhang Fan didn't plan to save himself. Why is western medicine stronger from generation to generation? systematization? Standardization? Or is western medicine simple? This estimate should not be the main factor.

Therefore, Zhang Fan believes in a word in medical knowledge, and what he learns must be taught. Hospitals, especially the third class hospitals, most of the teaching doctors are worried that the following students or apprentices don't learn, rather than thinking about how to get the following

students.

Of course, as a student, if you can maintain the teacher better, you will learn more and faster. This is mutual. You have a high and cold appearance. Will the teacher ask you to learn?

Xu Xian couldn't help asking. Zhang Fan did so beautifully. His tutor estimated that he didn't do as well as Zhang Fan in this regard. He was also very nervous. Zhang Fan was very dominant during the operation. He also saw that it was the same not only to him, but also to the director. To say no is to say no. It is estimated that Zhang Fan's performance is too excellent, so the directors dote on him. Xu Xian is also envious of this.

So when he asked questions, he was also ready to ridicule or ignore Zhang Fan, but if he wanted to learn something, he had to bow his head, and he was ready.

Unexpectedly, Zhang Fan explained it very carefully, starting from the principle. For fear that Xu Xian didn't understand, he kept making gestures with his hands.

"Miss Zhang, Miss Zhang, can I get a notebook. Although you speak very clearly, I think I should write it down and understand it again. " Xu Xian knew as soon as she heard that Zhang Fan didn't hide anything. He was talking about real things.

"OK, you're welcome. Call me teacher. Don't you laugh at me? I'm an undergraduate and you're a master. Call Doctor Zhang, Xiao Zhang Ducheng. It's really not good. Call old Zhang Yecheng. I'm really ashamed of you calling the teacher. " After the operation, Zhang Fan recovered and smiled first! Absolutely amiable.

"Well!" Xu Xian looked at Zhang Fan again and again. He didn't know whether it was true ridicule or true humility. Zhang Fan, with a modest smile on his face, can't see that it's ridicule. Xu Xian himself feels a little small.

Hurriedly said, "Hi! OK, Lao Zhang, it's my treat today. "

"How can you do it? You helped the farm today. How can you work and pay for it. It's me. " Suddenly, the relationship between the two seemed so close.

"OK, I've been waiting for a long time. A suture takes longer than the operation." Because Zhang Fan explained to Xu Xian, he wasted some time in the operating room. Lao Wang, I smoked two cigarettes in the dressing room and haven't come yet. I was a little angry when I saw them.

"Director, you didn't go back to rest. I thought you went back to rest and wanted to buy you food. " Zhang Fan bent a little and said to Lao Wang with a smile.

"Come on, don't do that. Laugh and set me up. You said that this spinal surgery has been brought to

your department. Do you have to give me a joint next time? " Lao Wang deliberately asked Zhang Fan with a straight face.

How to say, anyway, Zhang Fan knows that the old man is not angry. He may have started on the operating table for a long time, but he is a little angry. But he didn't dare to open the hole, otherwise Lao Gao wouldn't be able to explain.

"Hi! I'll set you up. I'm still a little tender. Besides, I don't have the courage, do !! Originally, it's right to give you another operation, but you know, I'm just a little hospitalized. You have to talk to our director about this! " Zhang Fan turned to Lao Gao as soon as he turned.

"You, the real one is black and bright! Let's go and have dinner. " Lao Wang smiled and falsely ordered Zhang Fan and said.

"You are still the director to take care of me. We must treat you and Dr. Xu to a good meal today. "

"I won't take care of you, and you don't pay me much attention. Someone paid the bill today. Hey! No, your boy just told Xiao Xu about spinal positioning, didn't he? "

"Explore, explore each other."

"Dr. Zhang, it's very good. There were some vague places in the past. He told me so today. I really want to suddenly become clearer." Xu Xian said sincerely.

"Tell everyone in the orthopaedics department about it sometime, and I'll listen to it. I think you really have a set of positioning. How about it? I can't bear it. " Lao Wang deliberately urged the general.

"Director, you see what you said, there's nothing to be reluctant to give up. It's just a little trick, but I'll give a lecture to all teachers. Is it a little too ~ ~"

"Stop fooling around, orthopedics. Even if there are three orthopedics now, who dares to treat you as a little doctor. I'll discuss it with Lao Gao later. Find a time to start the class. "

"All right!" Zhang Fan is a little embarrassed. It's all a little doctor. After all, the level of this industry is still very strict.

"Steal the music. You know, it's even the Kaizong school. Three orthopaedics departments in a third-class hospital stop the operation to listen to your lecture. Go and ask Chen Qi to see if he has this ability. " Chen Qi changed jobs to create three orthopedics, and Lao Wang was also unhappy.

"Ha ha!" Zhang Fan couldn't speak and giggled. Although the Kaizong school is a little too much, if you really tell the things and level, Zhang Fan's position in orthopedics has been recognized by the government and the people.

Xu Xian looked at Zhang Fan with envy and pinched his fist secretly. He had begun to plan. He went to the gym to sign up for a class first, and then tried to go to the liver.

Because the example is beside him!

Chapter 328

Spring, tea and air are fragrant. Although tea is a small city in the northwest, the climate is not like other cities in the northwest. Here, spring has the appearance of spring. The trees sprout, and the hairy spring rain cleans the city.

In a very slow-paced City, cherry blossoms and many unknown flowers in full bloom on the streets have been very brilliant. The color of people's clothes also began to look beautiful.

Slowly changed the clothes with black and yellow as the main color in winter, and the slim bodies of the girls also showed up. There are more children who have been hiding all winter, and there are laughter and laughter everywhere.

The old men and women who can jump have thrown off their big fans and started all kinds of square dance. The old man who couldn't jump was sitting in a wheelchair greedily absorbing the energy of the warm spring sun.

The overall rhythm of the city is still slow. The rickety bus takes half an hour, and there are not many people taking the bus. Anyway, the city is not big, so I can't wait. It won't take long to get rid of my legs. If it's a little farther away, I can sit in the horse drawn cart of the Uygur uncle. It's cheap, and I have the posture of being a rich landlord.

After their operation, Zhang Fan lingered for a while, and it was more than two o'clock at noon. It was time for dinner. Zhang Fan goes out, squints and looks at the bright sunshine. He hasn't been exposed to the sun for a long time.

Although the pace of the city is slow, the doctors and nurses working in hospitals are not slow. It's really dark. The sun hasn't come out when I go to work in the morning. Noon is usually in the Department, and most of the hospital offices are in the shade, which is to give the bright room to the patients. Then after work in the evening, the sun is almost setting.

The spring sun is neither arrogant nor impetuous. It is warm on the body, making people drowsy and

intoxicated“ Zhang fan drives your car. Lao Gao has gone to the hotel. ”

When Lao Wang said this, Zhang Fan turned his face to Lao Wang, "director Wang, who else. It can't be Bart's family. " Another thing Zhang Fan didn't say is that the BART family's conditions are general. If it's the BART family, Zhang Fan is going to find an excuse not to go. Although he couldn't stop others, he couldn't eat a meal in any mouth.

"Equipment manufacturer! The equipment was transferred from the bird market, and a business manager came. You have to invite us to dinner, or you have to invite us out through an energetic person. "

"Oh!" Zhang Fan nodded his head. Zhang fan drives the car out, and Lao Wang and Xu Xian get on the car.

"You are really good, boy. This car is not cheap. " Lao Wang got on the bus and asked the co pilot.

"By the way, the chief safety belt. Where? " Zhang Fan didn't want to say, so Lao Wang didn't ask. Face is given to each other. Lao Wang didn't do the kind of thing that he had to break the casserole and ask in the end.

"I think I'm going to buy a car, too. You can go fishing or something when you're free. Having a car is more convenient after all. "

"That is, with a car, the scope of life first becomes larger. If there were no cars, our living radius would be within a radius of five kilometers. " Xu Xian sat in the back row and followed Lao Wang's words. He also said one.

"Director, do you have a driver's license?" Zhang Fan asked.

"No, I'll sign up tomorrow. How about you accompany me to buy the car when I buy it. "

"OK, no problem." Zhang Fan said with a smile.

"By the way, how much is the driver's license and how long will it take?" After asking, he turned to Xu Xian and said, "Xiao Xu, do you have a driver's license?"

"Neither did I." Xu Xian said, then squeezed his fist, "well, you must learn your driver's license, which is also a life skill!" I thought in my heart.

"Well!" Zhang Fan's cold sweat came down. He really didn't know how much the driving school cost and

how long it would take. His driver's license came from a wrong way.

"About 2000 or 3000, I forgot."

"How long have you studied?"

"It seems to be half a month!" Zhang Fan said hesitantly.

Tea is on the border, so-called relying on mountains and rivers, and there are many border trade businesses. Stan is connected here, and it is very close to their original capital, so there are many people who make a fortune by doing border trade.

Today, the middleman is such a boss. In his early years, he sold clothes to Stan and the Soviet Union. In those years, several of them raised money together and ordered from Yangcheng manufacturers. Stan or Russia wanted clothes of any brand.

Then these people made a lot of money. Later, too many Chinese people came to do it, and slowly there was no profit. However, after making some money, he left the business early.

How to say, although their life is relatively good compared with others, few of them have really made a lot of money. He is one of the people who have made a lot of money.

The boss's surname is Cao. He is very cosmopolitan. After making money, he went directly to Kazakhstan and somehow contracted a small local copper mine. As a result, after mining for half a year, it was found that this vein was completely associated with gold, and it also reached the exploitable level.

Lao Cao, who had planned to make a little money, didn't know whether he was too lucky or too bad. Because of this mine, he lost a leg, and finally took a path led by the Stan state. He saved the mine, and then he got out of control. It is estimated that the current value can exceed 100 million.

At that time, boss Cao's younger brother worked hard to pull old Cao from Stan state to the municipal hospital. His operation was performed by Lao Gao, Lao Wang and their masters for boss Cao. The relationship between several people who come and go is also familiar.

Before entering the door, Zhang Fan heard a man's forthright laughter. How to say, maybe money is a man's waist. After Lao Cao became rich, he became more and more popular.

Because the leader he met at that time is said to be very powerful now, boss Cao has been involved in a wide range of business in recent years. Almost all basic drugs for medical use in Stan are made in China.

Lao Cao directly monopolized this business. Although it was some cheap sugar and salt water, it could not stand a large amount. In Lao Cao's words, this business was no worse than the gold mine in those years, and there was no fight or killing.

"Ha ha, Lao Wang!" A middle-aged and elderly man dressed in a very old style, wearing a gray old-fashioned double breasted cloth jacket, his trousers are also very loose, and he also holds a string of green hand strings with smooth oil and water in his hand.

"Boss Cao, this body is getting stronger and stronger!" Lao Wang said with a smile.

"Of course, I am now a practitioner in the medical industry! Ha ha, come and sit down. Are these two? "

"The orthopedic talents in our hospital, Zhang Fan, Dr. Zhang, this is Xu Xian, Dr. Xu. Are excellent young doctors. This is boss Cao, big boss! " Lao Gao introduced with a smile.

"What boss? It's tacky to say boss in front of you. Just look up to brother Cao. Sit down and you'll be a good doctor. " Lao Cao warmly pulled the hands of Zhang Fan and Xu Xian.

Lao Cao spoke, and his assistant quickly opened the chair for Zhang Fan and Xu Xian.

"Oh! It's not easy. It's been many years and we're old. You can't keep this hair. Just keep a bald head. There is no hair, but the prostate is often rebellious, hey! I dare not take a swig of water. " After everyone took their seats, Lao Cao said with emotion.

"Yes, decades have passed in a twinkling of an eye." Lao Gao nodded and said.

"You too. You know you're busy in one day. I'll take you there sometime that day." Lao Cao meant to go to stan.

"Ha ha, those who eat this bowl of rice have time. It's better for your boss. " Lao Wang said with a smile. In the room, there was a man in his thirties, probably an equipment manufacturer, who always smiled and didn't speak.

"All the guests are here. Let's start!" After talking to the assistant at the door, Lao Cao said to Zhang Fan and Xu Xian, "you two, this is our first time to deal with. Don't be polite. This is manager Yang, who is in charge of spinal instruments in huirui, northwest area. Director Gao and director Wang are familiar with them. You will contact more in the future. He's very nice! ~ "

After introducing the middle-aged man next to Zhang Fan and Xu Xian, Lao Cao smiled and said to everyone: "before drinking and sober, I'll take out everyone's gifts. Don't get drunk and forget to beg!"

As he spoke, the assistant took out some boxes“ I got some jade pieces. Stan didn't recognize this thing. Although it can't compare with Tian Yu, it can be seen in the past. " Saying this, he put the boxes one by one in front of the people.

"Why? Boss Cao, it's not appropriate." Lao Gao said.

"It's all right. It's not worth money. It's just a gadget. How many years have we had a relationship? I

don't understand it? Don't worry, take it and play! "

"Thank you, boss Cao." After Lao Gao and Lao Wang had a look, Lao Wang opened the jade and took a look. He knew it was mountain material. It was really not very expensive, so he took it down.

Zhang Fan and Xu Xian didn't say anything. They came with ears about the big guys.

"Two teachers, this is my business card. Our company only entered the Northwest market this year. Please give me more advice in the future." Here, manager Yang whispered business cards to Zhang Fan and Xu Xian.

"Come on! Come on! Come on! Pick up the glass. To our lost youth, to their youth. " Zhang Fan doesn't drink, and Xu Xian doesn't drink either. The two directors can drink more or less. Lao Cao Shun takes him as an introducer. The most important thing is that he needs people.

The country is as like as two peas. Thirty years, thirty years ago. In the early years, when China was a poor household, Stan was already very rich. Because of the Soviet Union, they lived very well.

But in a few years, the big brother and the second brother separated. Stan also went alone. Anyway, it was specious to learn from Russia and then the United States.

Stan is rich in minerals. Other countries, not to mention only one natural gas, but also half of China's natural gas comes from their own country. So this country is also wonderful. Those with money are very rich, and those without money can starve to death.

The public medical system in Stan is free for all. Although it is free, there is a lack of doctors and medicine, and the medical means are rough. A fracture may amputate you, and there are too few talents trained by yourself because of the national education system. So people with some money come to China to see a doctor.

But there are still some people who are inconvenient to see doctors abroad. What should we do? We can't go to other countries to find doctors through the Ministry of foreign affairs. Therefore, foreigners like Lao Cao who can talk have a place to play.

Lao Cao came this time just to contact some doctors. After all, tea vegetable city is not far from Stan's capital. This is also the sadness of small countries. The language is chaotic. The official language is Russian and the folk languages are Kazakh and Mongolian. Where can ordinary people speak Mandarin! Even if it is taught in school, it is not a grade worse than what some people have said since childhood.

Then, because of the restructuring in that year, a large number of oligarchs were created. Although the country is rich in resources, in fact, ordinary people really live in general.

But on the other hand, the poor neighbors are getting worse and richer. Some people in those years estimated that their intestines are broken into several sections now!

Chapter 329

There is an old saying in China that people's eyes are dark. They can see that the first three steps are genius. It's hard to say anything about those people in those years. After all, man is a herd animal.

For example, house prices are common people. There are still few people who can see the general trend. Who can think of the current house prices! So take one step at a time. It's not easy to live in the moment.

Had surgery all morning. Tired and consumed a lot, Zhang Fan didn't talk much. Lao Cao and Lao Gao were not curious about their conversation. It was too far away and unnecessary. And he has a big secret, so there are few things that can arouse his curiosity.

If you're not curious, eat it! Northwest cuisine, although it can't talk about any system, can't compare with other systematic dishes, but northwest cuisine has a characteristic, that is, massiness! Large plates, less vegetables and more meat. From pork to beef, from chicken and duck to fish.

Wrapped with eggs and starch, in the pit of roasted Nang, the capsule pit meat is stuffed with fruit trees. When you go down, the fat and lean mutton, with a trace of fruit aroma, explodes directly in the cavity. The taste is really, too fragrant. The special meat aroma keeps turning in the taste buds.

It is said that cold water fish can only grow about three or four centimeters a year. It is said that this kind of fish with palm size is almost thousands per kilogram. The tight but not stiff fish meat is stained with soup and has a different taste.

Zhang Fan eats fast and much. Xu Xian is not curious about their chat, but he cares about Zhang Fan very much, "my God! Shit! So you can eat." Zhang Fan's appetite really frightened him. Xu Xian, who was already full and stopped eating, couldn't help eating more.

Lao Gao and Lao Wang, after many things, can be regarded as people and thieves to Lao Cao. They are not excited about Lao Cao's proposal at all. What dollar, what high salary, they are not excited at all. Medical treatment is a matter of human life. There are too many unknown risks. If you are not careful, there will be problems. Moreover, it is said that there are gangs in Stan country.

Lao Cao said that it was more dangerous to go to some high-level to see a doctor for surgery. Lao Gao

and Lao Wang didn't have a quarrel directly. Boss Cao saw that the two directors were not excited at all, so he said the second plan.

"The two directors of the hand and foot hospital don't know." Lao Cao took a sip of the tea cup and looked at the two directors.

"Well! Probably understand." Lao Gao said in a strange tone. He wanted to say something more. As a result, Lao Cao interrupted him. Looking at their strange expressions, Lao Cao directly said: "how long has the small hospital been developing? You see, it will get up now. We can also set up such a hospital in the free trade zone. The hand and foot hospital is ~ ~ "

"This Doctor Zhang has something to do with the hand and foot hospital. He knows this better." Lao Gao quickly said what he wanted to say. He was worried that Lao Cao would say something impolite, which would make him unable to come down the steps.

"Oh! Ah! " Lao Cao was really shocked. He didn't expect that Dr. Zhang, who sat on one side like a passer-by and had no sense of existence, was the boss or shareholder of the sibling hospital. This kind of thing, people a little, he knows.

"Ah! It's true that the waves behind the Yangtze River push the waves ahead. Dr. Zhang really, unexpectedly, the hand and foot surgery in the private hospital of chasu city is second to none. You are this! " Boss Cao was a little embarrassed and quickly raised his big finger to boast about Zhang Fan.

"Hehe, just get it. It's all friends' help!" Zhang Fan said with a smile. As soon as Zhang Fan said this, it showed that he was the boss of the sibling hospital.

"If you lift heavy weights lightly, it's great!" After thinking about it, Lao Cao said, "Dr. Zhang, have you ever thought about establishing a hospital in the cooperation zone?"

There are cooperation zones in many cities all over the country, but this cooperation zone here is a little special. How to say, the cooperation zone here should be regarded as a fully closed trade center established by two or three neighboring countries led by China, with a huge area.

Taxes here are reduced or exempted. There are many things in China, but there are very few things in Stan. Stan is worse than the Soviet Union, and its light and light industries are not good.

Sometimes, born in it or without comparison, you can't feel the strength of the country. As soon as China says to build, it will start construction in two months, and high-rise buildings will be pulled up within half a year. This infrastructure is really great in China. Moreover, within the cooperation zone, there are almost all kinds of goods from all over China.

In contrast, in several other countries, the construction is slow, not to mention, there are few products, not fur, all kinds of gemstones or chocolate, and then some so-called handicraft products. Take a closer look, sister, the origin of these handicrafts is a black!

The capital of Stan is not far from the border. The goods at the port are pulled from China in batches. Goods can be bought with money, but talents are different. They don't lack skills, but those who have skills are willing to go there, so Lao Cao was entrusted to ask for a doctor or build a hospital in this common area.

Boss Cao can't get high-end doctors to practice medicine, so he wants to build a hospital in the cooperation zone. After all, the cooperation zone is set up in the uncertain area of the border between the two countries. The management here is cross cutting. It's always more convenient for people with status to see a doctor here than to come to China.

Zhang Fan listened to him and smiled, "now I'm too busy to come." Lao Gao nodded when he heard Zhang Fan say this. He was really afraid that Zhang Fan would be lost in front of money.

As soon as Lao Cao heard this, he gave up. Zhang Fan was too young. Lao Cao felt that Zhang Fan was a doctor with some skills or a competent parent. He still focused on Lao Gao and Lao Wang.

Bart's operation was quite successful. The government was already worried when there was no feeling inside the hospital. Why? Because every year, the state has a special free treatment fund for congenital diseases, which is earmarked for special purpose and directly supervised by special personnel. The local government can't embezzle it.

There was no way to do it before. Even if the state gave money, there was no way to do it, because no one would do it. No one in the municipal hospital accepted this piece, and no one paid attention to it for a long time. However, this time is different. Jiang Nini handled the subsidy for Bart through the Civil Affairs Bureau.

Of course, the Civil Affairs Bureau should be responsible. Is the money used for surgery, the treatment of this congenital disease, and whether it has been used for him. This was a secret visit, but I found that it was amazing. The municipal hospital is really cow now, and the provincial capital hospital has not carried out any projects. They have successfully carried out them.

Escalation, level by level escalation. This is a good thing. Everyone is proud. Of course, Zhang Fan doesn't know these things yet.

After dinner, he sent several people home. Zhang Fan took the piece sent by Lao Cao and went home. I had a major operation in the morning and had a rest at noon. I can go to the Department later in the afternoon.

Shaohua's mother and father are not at home. If Zhang Fan and Shaohua don't go home for dinner at noon, the old couple won't cook. That's it when they are old. If the child is not here, it's estimated that

they can make a living.

Shao Hua's mother's food market has remained unchanged for thousands of years. The old lady has a habit. She doesn't buy many dishes every time. Just a little, enough to eat and fresh. Old man, I went to Zhang Fan's new house. There is still some finishing work in the decoration. He has to worry about it. The days go by like this day by day, full and peaceful.

Orthopedic doctor, there are two seasons that you least expect. In winter and summer, there are many falls in winter, especially the elderly. They slip out and slip and support the ground with their hands. The lighter wrist fracture, the heavier one is the femoral head fracture.

In summer, many people drink and fight. Especially at night market stalls, after drinking too much, there are people who specially make trouble, crackling down, either with a broken head or a fracture, and these people come to the hospital in the middle of the night.

When I was sleepest, these people came with their heads broken and bleeding. If you have a clearer mind, you can treat and see a doctor safely. Those who are not drunk not only do not cooperate with the treatment, but also sometimes get drunk with doctors and nurses in the hospital. So, in the summer, surgeons begin to have headaches.

After a sleep, Zhang Fan saw that it was more than five o'clock, got up, washed his face and returned to the hospital. Zhang Fan saw that there were only a few transferred doctors in the Department, and the others were not there.

"Xiao Li, where are the others in our group?" Zhang Fan sat in front of the computer, opened the electronic medical record, wrote the medical record and asked Xiao Li.

"Sister Ya Nan went for a consultation. Mr. Xue went out in the morning and didn't come back. Nini was called by the medical department. " While writing the medical record, Xiao Li told Zhang Fan the whereabouts of several people.

"Medical service? What's the matter? " Zhang Fan wondered. Generally, it's not good for the medical department to find a doctor. Either the medical record fails or the patient complains.

"I don't know." Xiao Li is also confused.

"All right." They settled down and began to write medical records.

When he was about to leave work, Xue Fei came back and went into the Department. He had no love on his face. He knew at a glance that he had been robbed by several of his aunts. This thing, kill without repentance.

"Hey!" After entering the Department, everyone ignored him, so he sat aside and began to sigh.

"Bad luck, I want to wash my hands in a golden basin. Zhang Fan, why do you think I carry it like this. I've been beating all day, but I don't even have a fart. "

"The head is not suitable, the others are OK. The gold basin is not gold basin. Didn't you count it! It's interesting for you to write a medical record quickly. Xiao Li has been sitting all day. "

"Well! Livestock, no compassion. " Talking, he began to write medical records reluctantly. After writing for a few minutes, he asked again, "where's Wang Yanan and Xiao Jiang. How can we just write medical records for the three of us? "

"Wang Yanan must have been pulled down to the clinic. Xiao Jiang went to the medical office. "

"Infirmary, what are you doing?" Xue Fei is also worried about this, which is a common problem of doctors.

"Complain about playing mahjong during your working hours." Zhang Fan comes at will!

"Nonsense." Xue Fei looked at Zhang Fan and didn't want to talk to him, so he began to write medical records.

"Oh, why don't you get off work. Director Xue, why didn't you touch it a few times. " Dr. Zhao, the attending of the other group, came in.

"There are a lot of medical records. Dr. Zhao, have you finished your medical records?" Zhang Fan asked. Xue Fei didn't come out of the state of losing money and ignored him.

"Hey, can you finish it? Several unqualified medical records were called back last month." Say words, also turn on the computer and start codeword! No, start writing medical records.

At this time, a woman dressed in professional or formal clothes, holding a child, followed by grandparents like children, several people stormed into the Department.

Chapter 330

In recent years, children have become more and more refined and expensive. Many habits handed down by many elders are not suitable for the society, or are they slowly abandoned by people because they are not so tall.

Nothing else, just one, urine meson. Many parents think that the diapers imported from the pill country cost more than ten yuan, or the diapers from the United States are the best and most advanced. What the elders said is too lame, unclean and unscientific!

In fact, the urine meson made by ourselves is really clean after high-temperature disinfection. Compared with this diaper, it's just a little troublesome. It doesn't have such strong absorption.

Women who come to the department work in the Education Bureau, which is relatively strong. When they got married, they were not young. When they had children, they didn't trust their parents in law, so they let their parents take care of their children.

When the child was a little over two years old, he was out of breath and kept saying, "my back hurts, my back hurts." The woman's face is also bad. The child hurts in her arm and she hurts in her heart.

It turned out that the child didn't want to stay at home and had to go to his mother. The old couple took their children to find their mother who was about to leave work. Mother simply took her children to the square after work.

Children can just walk and are curious about everything. Walking, I saw a pool of water stains. Adults know it's dog's urine at a glance.

Seeing that the child was going to step on it, the child's mother was worried, grabbed the child's little hand, and then lifted the child.

The dog's urine hid, but the child immediately began to cry loudly "It hurts, it hurts." His mother grabbed the child's left hand. At this time, the child cried loudly with his right hand holding his left elbow.

"Mom, look!" The woman was anxious to see it. As a result, the child didn't let her mother move anything. She cried even more when she touched it. At this time, the old couple also rushed over. The old man said at a glance, "hurry to the hospital. You are such a big man. You can't take a child well. Can you lift your arms and legs like that? Won't you hold it?"

Looking at the poor look of the child, the old man felt uncomfortable. The woman walked in front with the child and the old couple walked behind. Grandpa had a bad temper and kept talking in pieces.

There is a slightly larger community hospital near the square. Hurry up, the woman went in with the child in her arms. Let's talk about community hospitals. General community hospitals are slightly better than internal medicine. After all, internal medicine has lower requirements for operability. And surgery,

it's hard to say.

In the community hospital, there was a young female doctor. When she saw the baby holding her arm and not moving, she first asked her to take an X-ray. As a result, she was stunned when the film came out. The child's X-ray was too ugly and many structures were not developed. She couldn't see what was going on.

"Go to the city hospital ~! It's probably a fracture. " Fracture is defined as three, reverse movement, bone friction, and refusal to move. The female doctor probably didn't study orthopedics well.

As soon as this was said, the child's mother's face turned white. Without a word, I took a taxi to the municipal hospital. Registered in the emergency department. As a result, there was a patient with abdominal pain in the emergency department, shouting in the emergency department.

The woman waited for a while. She couldn't wait. Then she took the child to pediatrics. There are also many pediatricians. There are children with antipyretic stickers on their forehead everywhere. A child is accompanied by at least three adults, and the corridor is full of people.

"Don't jump in the line, we've been waiting for a long time!" Women are anxious to jump the queue, but everyone comes to see a doctor for their children and is in a bad mood.

"My child has a fracture. Let the doctor see it first. It's troublesome." The woman pleaded.

"My child still has a fever of more than 40 degrees. Line up." Seeing that there was going to be a quarrel, the pediatrician came and said, "all right, all right, stop quarreling. Where did the child break? " Queuing is good, but this is a special place. Diseases have priorities.

"Arm, on the way, I pulled the child's arm, and then the child shouted that his arm hurt. This is a film taken in the community hospital. Show me. It's a fracture." The child's cry, the parents' complaints and the whispers of other parents are running away.

"Dislocated. Go to orthopedics. " The pediatrician was too busy, so he said a word.

"Serious or not! Ah! " Before the woman finished speaking, the doctor had brought a stethoscope to see the other children.

The woman hurried to the orthopedic department with her child. After entering the Department, she found an older doctor, that is, Dr. Zhao, who had just entered the door.

"Doctor, show me. The child kept shouting, "my arm hurts." Lao Zhao was also upset at this time. Although he said it lightly, he actually called back a lot of medical records, and the deputy director of the medical department in charge of medical records said a few words about him.

"Nothing." He looked at the X-ray and said. Children's radial head subluxation can't be seen on the X-ray, and he is upset about how to change the medical record, which is a little perfunctory.

The child had no strength to cry. The woman was worried and pushed around. Finally, she was perfunctory, and she broke out directly.

"What kind of doctor are you? Without looking at it, you say it's okay. Can you be responsible, ah! My child has a problem. Can you be responsible? What's your attitude. Don't even take the film and say it's okay. Is that how you become a doctor! Still human? " Women are also in a hurry.

"That's how I see a doctor. Show me an X-ray. It's good. Why should I be responsible? If I'm a person, I'll ask you for it." Dr. Zhao was also angry. One day after the operation, he asked the medical office to clean up. He was not in a good mood.

They were just right, angry to angry, but obviously Dr. Zhao also felt that he had a bad attitude and was unjustified, so his speech momentum was weaker. The woman finally broke out, grabbed the head of the speech and began to scold Dr. Zhao in a very loud voice.

How to say this. Generally, a patient comes to the Department, especially if the patient finds a doctor first. If the doctor doesn't speak, it's inconvenient for other doctors to come and see him.

However, this quarrel, we had to come to persuade. Women scold and children cry. It's really a mess. Unable to persuade, the more the woman said, the more excited she became and the more sad she became. She cried and scolded. Anyway, she spilled all her resentment on Dr. Zhao. Dr. Zhao could talk back in front, but he was scolded stupid in the back!

"All right, all right! Stop crying. "

"Calm down!" The more you persuade a woman, the more she won't stop. How to say, this thing is catching up.

"See a doctor or not, the dolls are crying like this, and you're still making trouble. If something happens to the doll again, it's useless for anyone to be responsible. Well, give me the child and I'll show you. "

Zhang Fanyan looked at women and began to appear irrational, so he spoke " Can you? No, find your director, find your leaders, I'm today ~ ~ "

"Give it to me! How come there are so many things! " Zhang Fan went to the woman and gently hugged the child. The child's arm hurt, and the woman didn't dare to hold it tight, so Zhang Fan gently held the child over.

"All right! Don't make any noise ~, go and find out if I Zhang Fan is qualified to see a doctor for your baby. " This time is not a time of humility. Although parents doubt it, it is understandable that who is not a son of man. The child came and the woman stopped talking.

Although looking at Zhang Fan's youth, looking at Zhang Fan's serious expression and positive tone, the woman didn't scold, "doctor, it's not me. That's not what I meant. The child cried ~"

"OK ~! Quietly, stop talking. What a big thing. Baby, does this arm hurt? " Zhang Fan held the child and pointed to the child's left arm.

Many people think that children are not sensible. In fact, such a big child knows a lot. Now he hurts badly, but when he sees the doctor in a white coat, he still speaks, "here, my back hurts. Don't move! It hurts! "

Zhang Fan gently pinched his elbow and said, "it hurts and doesn't move. It hurts, baby, it hurts, mom! Mom ~! "

"Did you pull the child's arm hard?" Zhang Fan holds the child and looks at the child's mother.

"Yes, doctor, just pull it. The child shouted, "it hurts."

Radial head subluxation is particularly easy to occur in children aged two to three, and once this dislocation occurs, it is habitual dislocation.

Therefore, for children, when pulling (lifting) their hands, they should pull their sleeves at the same time. When adults and children play, they should pay special attention not to hold (lift) their hands alone. The doll's arm is still very young, not to mention it at will ~!

"All right, I see." With that, Zhang Fan sat down with the child in his arms. Then he said to Xiao Li, "do you have any snacks? Go and get some for the baby. Lollipops and yogurt are OK." When talking, the children listen again.

Then, while the doll is not paying attention. Zhang Fan held the child's forearm in one hand and turned it back. At the same time, he extended his elbow for a little traction. Then the other hand pressed the head of the front radius of the elbow with his thumb, flexing the elbow joint quickly and gently, and then rotated his forearm back and forth.

That is, in ten seconds, Zhang Fan's reset ended with a click and a sharp cry from the child. Everyone's attention was told by Zhang Fan to see Dr. Xiao Li. The child's mother wanted to say: when my baby doesn't eat snacks. I heard my baby cry sharply.

When I looked at the baby, I found that although the baby was still crying, compared with the previous crying, the crying at this time was different.

The change of the child is most clear to the mother. At this time, the baby is crying, and his eyes are still looking at Dr. Li. He is waiting for a lollipop.

"Doctor, are you ready?" The woman asked with uncertainty.

"Well! Remember, don't violently lift the child's arm in the future, and after one such dislocation, you must be careful in the future, otherwise it will be troublesome to cause habitual dislocation. Here, you hold the baby. Sit here and wait. "

Why wait a minute? After the dislocation, although Zhang fan can be sure that the reduction was successful, after all, the child is still young and the pain in front is too severe. At this time, he still dare not move his arm. We must wait for a while. After the child has less pain, let the child move his arm to be successful reduction.
