

The Charismatic Charlie Wade Chapter 3696

Therefore, there are already tens of thousands of people, and they still have to spread their soldiers everywhere. If they are expelled in one place, they must immediately set off to the next place to temporarily settle down.

If they can have a fixed base, then for them, it is equivalent to having a home.

Charlie said at this time: "By the way, I think you can go to the Gulf of Aden first to determine the situation of the frontier base. At the same time, you will also discuss the specific division of the overall team with your core team. As for the Syrian side, when I finish the work at hand, I will go there in person and talk to them. You can come with me when the time comes."

Abbas immediately respectfully said: "Subordinates obey orders!"

Charlie said again: "Before you leave, choose one from the five-star warlords in the Wanlong Palace, and give him a dozen or twenty powerful subordinates, and let them stay in Aurous Hill from now on."

"Okay MR. Wade, I will arrange it before I leave!"

At this time, Charlie received a document from Ziva Hank. The document listed all the ship information and photos of Yisu Shipping. In addition, it also included the new ships ordered by Yisu Shipping and other companies. Information on second-hand ships acquired by the company.

Charlie handed the phone to Abbas, and said: "Look at the specific information of these ships, and choose one that is suitable for use as a sea base."

Abbas picked up the mobile phone with both hands. After checking it carefully, he said to Charlie: "MR. Wade, I think this is a 30,000-ton bulk carrier very suitable. The deck is flat and the area is large enough. At least it can parking six helicopters, the interior is full of large cargo warehouses, and it is relatively convenient to transform. A little modification can at least meet the accommodation problem of hundreds of people, and with a load of 30,000 tons, it can also carry sufficient fuel supplies and ammunition. It's more than enough to deal with those pirates."

Charlie smiled and said: "This is the longest and smallest cargo ship in Yisu Shipping's hands. It has been eliminated and dismantled after three years of standards. You also chose this one because you want to save me money. ?"

Abbas hurriedly said: "MR. Wade, saving money is only part of the reason. The most important thing is that we really don't need to occupy a bigger and better freighter. In fact, 30,000 tons are a bit wasted. To deal with pirates, I think the ship is smaller. It doesn't matter."

Charlie nodded and said earnestly: "This ship is not only for you to use as an offshore base. After you start to undertake security work in high-risk areas in the future, the transportation of personnel and materials can also be completed by this ship. "

After speaking, Charlie reminded: "You must be as prepared as possible. In addition to helicopters, you will be equipped with several high-performance speedboats. Although the ships used by pirates are not large, they are fast and highly maneuverable. You have to decide on some effective coping strategies."

Abbas solemnly said: "MR. Wade can rest assured that by then we will develop a complete operation mode to integrate the armed escorts, maritime bases, coastal bases and rear bases on merchant ships in the best way. A freighter escorted by the Wanlong Temple encounters any danger!"

Charlie smiled and said: "I absolutely believe in the strength of the Wanlong Palace. I am looking forward to seeing you encounter pirates several times and fought a few beautiful naval defense battles. By that time, business will continue. Come here!"
