

The Charismatic Charlie Wade Chapter 3878

Fei Kexin asked incomprehensibly: “MR. Wade, I probably understand everything else, but why use less stone?”

Charlie explained: “From the perspective of feng shui, the material of stone is a homonym for wealth and wealth. It is naturally good for feng shui, but the cold of stone is yin, not suitable for the bedroom, which will affect the body.”

After speaking, Charlie said again: “The ancestors’ scientific methods are limited after all. They can use Feng Shui and Yijing gossip to infer that stone has an impact on the body, but they can’t make a scientific explanation.”

“But I saw a report some time ago that all natural stone materials are radioactive, and the radioactivity of stone produces a kind of radioactive substance called radon gas, which is colorless and tasteless. It has been confirmed by the World Health Organization. It is very carcinogenic to the human body and is one of the main culprits of lung cancer. It is second only to cigarettes. There are more stones in the room. Getting along with people day and night is like releasing chronic poisons for many years. It has a great impact on the human body. It’s just that most people don’t know anything about it. Even if they really get lung cancer, they can’t think that they are probably due to the natural stone at home.”

Speaking of this, Charlie couldn’t help sighing: “So it can be seen from this that our ancestors are indeed very intelligent. Although they do not have scientific theories and advanced technology, they can pass outstanding abilities. Comprehending a set of ways to understand everything in the universe, they were able to deduce the impact of natural stone on the body hundreds of thousands of years ago. After hundreds of thousands of years, scientists have detected the culprit and confirmed us at the same time. His ancestors had extremely advanced judgments on this matter.”

Fei Kexin couldn't help but admire: "I usually focus on economics and management, and I don't know much about science and engineering. This is the first time I heard about radon, but from what MR. Wade said, the ancestors did have extraordinary wisdom. This further proves that feng shui divination is indeed not nonsense."

Charlie said with a smile: "Ms. Zhan is so young, it stands to reason that she should be dismissive of Feng Shui."

Fei Kexin shook his head very seriously and said: "I have always been in awe of Feng Shui divination and I Ching gossip. Although I don't understand it very well, I really believe that this may also be related to my grandfather's ears and ears since I was a child."

Charlie nodded and said with a smile: "In recent years, there have been fewer and fewer young people in China who believe in Fengshui."

Speaking of this, Charlie said again: "Miss Zhan, there are basically so many things you can see right now. This house has excellent feng shui on the outside, and a little attention to the inside will surely be smooth. "

Fei Kexin nodded slightly and asked Charlie, "MR. Wade, how do you charge Feng Shui? Should I give you a check or direct transfer?"

Charlie waved his hand and said lightly: "It's not very troublesome, Miss Zhan doesn't have to be so polite. Besides, my father-in-law's painting and calligraphy association has also received a lot of help from Miss Zhan, so it's just a matter of courtesy!"
