

The Charismatic Charlie Wade Chapter 3951

The master class mentioned by Kelly West is a high-end training class led by the top Rhode Island School of Design in the global design field. It is also the top-notch skill training class in the entire interior design field. It is known as the world's top design The cradle of the division.

Just like the Lakeside University established by the owner of Ali Barbar back then, those who can enter are basically very powerful domestic entrepreneurs or young entrepreneurs with great potential.

In addition to accessing the industry's top knowledge, technology, and academics, this kind of place can also reach the top of the industry's pyramid in one step.

Once accessible, it is equivalent to connecting the most cutting-edge resources of the industry.

The master class at Rhode Island School of Design is much more difficult to get into than Lakeside University.

Before the closure of Lakeside University, it selected about 50 domestic entrepreneurs each year.

However, the master class of the Rhode Island School of Design only selects fifty people from all over the world each year.

Moreover, since this master class is basically from the West from the host college to the teaching professors, there will be a very serious resource tilt for Western countries in terms of enrollment every year.

Among the 50 places, there are at least 35 places allocated to Western designers, and there are not even ten places left for Asia.

Therefore, looking at the entire China, there are no more than three designers who can participate in this master class every year.

Claire had been fascinated by this master class for a long time, but never expected that he would have the opportunity to participate.

She knew that Kelly West was the leader of this master class, so she was in worship and fascination, so she consulted her about the specific situation of the master class.

What she thinks is that if she can successfully be selected into a certain master class after ten years, it will be a great honor.

Kelly West also knows that with Claire's current qualifications, it may not be possible to be selected into the master class in another ten years.

However, as the leader of the master class, she has the right to a specially approved quota, and this year's quota has not been used yet.

If this quota is given to Claire, it will definitely enable Claire to make a big breakthrough in the field of China Design.

Fei Kexin also felt that this was a very good entry point. In the last five days before the auction, she must go all out to accumulate favors on Claire and add hope to herself.

So she immediately said to Kelly West: "I'll call Claire and ask her to have a meal together at noon. Then you can mention this to her to see if she is interested. "

Kelly West smiled slightly: "Ms. Fei can rest assured that Claire's interest must be very great, because when she consulted me for the master class before, her eyes were shining. This is every designer. One of his ultimate dreams. Moreover, since the master class has been in existence for so many years, there are still very few designers who can participate in the master class in their 20s. If she first came to participate, then she would be the first Asian master under 30. Class students, just this title can make her famous in the Chinese design circle."

“Okay!” Fei Kexin nodded, with a bit of excitement in her expression, she said: “Kelly, you help me with this. The Fei family will never treat you badly. In the next year, Fei There are more than 300 hotels around the world, and at least one hundred of them will start to renovate. By then, I will give all hotel designs to your studio!”

Although Kelly West is a top designer and earns at least tens of millions of dollars a year, in the final analysis, she is far from being a true billionaire.
