

Chapter 491

Women, magical species. It's really a magical species. To tell the truth, these parasites are rare. The director of the digestive department has never seen them in the hospital for half his life.

It's disgusting. It's terrible, but it's also a little terrible. The enlarged parasites have already made Wang Hong goose bumps all over her. I'm afraid it's impossible to talk about it. It's diaphragmatic, just like a toad crawling on the back of bare feet.

"Come on, come on. Zhang Yuan caught insects in the endoscope room! Big bug. " She started calling people in the QQ group of young people in the hospital with her mobile phone. It is estimated that it is not for the parents to see, but for everyone to feel together.

There are too many things that should be done in the hospital. Generally, no one will agree to such a cry. Even if she is the Secretary of the Communist Youth League Party committee, it is useless.

To tell you the truth, I don't know whether this position is a cadre among leaders, but among a group of young people who have just graduated, this position is generally ridiculed, especially in technical units. Some people probably wouldn't pay it if they didn't deduct any expenses from their wages.

But take Zhang Yuan. These two words are different. Zhang Fan vigorously promoted the general examination rotation system in the hospital's surgery and Gynecology system. Now internal medicine has begun to learn from others. Moreover, Zhang Fan holds the signing power of learning doctors in his hand, and many young doctors rushed to the endoscopy room with these two words.

Zhang Fan took the tissue forceps. When the insect was about to enter the corner, he grabbed the last protruding genitalia of the insect. Circles of swollen genitals were clamped by Zhang Fan with pliers.

The director of the digestive department closed his eyes, "it's too rough. Even if you want to clip it, you should also clip the middle part of the insect. What's the use of you clamping the last genitals? This place is very fragile because of mature congestion. Hey!"

Although she didn't say it, she was completely hopeless. Is the sharp tooth on the tissue forceps fake! She decided not to give face to Zhang Fan in the future! Anyway, Zhang fan can't manage the internal medicine.

The common problem of technical units is that without technology, there is no authority.

Of course, Zhang Fan didn't want to leave only the insect's genitals as evidence or go to the medical examination. Isn't this the insect's final sprint? He can only drag it at its tail.

Steel teeth and metal teeth of endoscope are exquisite. They are generally made of titanium alloy. Why not use gold and silver? Because special titanium alloy can inhibit the formation of bacteria, while other metals can't.

When the insect threw up its disc genitalia, Zhang Fan gently grabbed it with the steel teeth of the tissue forceps at the moment it was about to enter.

How about the strength? Because the steel teeth of the tissue forceps are very sharp and can't have substantive blessing, but form a small space that just can't let the genitals of the insect disc pass through.

The body can pass, but the swollen genitals can't. It is such a space, that is, the super feeling of Zhang Fan's hand is expressed incisively and vividly here.

As long as it is a substance composed of protein, it has a feature that it can not be congested. Once congested, the original structure will become thinner and brittle, and the gravity between carbon based chains will become smaller. Therefore, it is not a steel gun. It should be light and careful. It is easy to break at this time.

Zhang Fan doesn't dare to pull the insect. The suction cup on the insect doesn't suck 10000 on the intestinal wall. At least it's estimated that there are 1000, so the adsorption force is very strong. As long as the force is too strong, it can only leave the genitals.

Thanks to Zhang Fan's system, the exercise of hand feeling in the system is really very accurate. Without the system, Zhang Fan's unmarried and virgin temperament can't be grasped. He can only hold the genitals of insects.

Of course, single Wang is even worse. It's estimated that she broke the female's genitals directly.

When Zhang Fan caught the bug, the director of the digestive department finally turned to look at the monitor. When she saw that Zhang Fan didn't break the bug, her mouth opened.

"Zhang Yuan, don't drag hard, don't use reckless force, slow, slow, and use skillful force bit by bit."

This sounds very reasonable. In fact, it's all nonsense. Otherwise, why doesn't she grasp it? Because this strength is too difficult to control, easy to say and too difficult to do.

At this time, the director of the digestive department nailed her eyes to the tissue forceps and the body of the insect. Her hands were pinched and nervous. Her heart was in her throat.

She knows the fragility of this thing too well. Don't mention the doctor's operation. If the patient has a severe cough at this time, it may have wasted all her previous efforts.

"Yes, that's it. Yes, that's it. Chief Zou, don't move!" The director of the digestive department waved her fist as if she were operating. He said and comforted chief Zou.

Zou section chief, at this time, even if it hurts again, he can bear it, because he has found the culprit, because there is hope, so Zou section chief, his teeth are tight, his face is white, and he doesn't say a word.

Wang Hong called on many young doctors in the hospital. Although it was a big night, the young people were young after all. Some came to the hospital from home.

There are many people, you whisper, she whispers, the voice is not small" Just drag it. What's Zhang Yuan hesitating about? Look, the tail of the insect is swollen. " As soon as I heard this, I knew it was a surgical single dog.

"Zhang Yuan, how awesome. How stable and strong! " It is estimated that this is a female doctor who wants to study.

Zhang Fan held the trigger firmly in his hand, controlled the strength to death, and then gently pulled it. The adsorption force of the insect was too strong.

With a gentle tug, the naked eye can see that the insect's body is elongated and thinner, but the insect doesn't step back. At this time, I dare not pull again. If I pull again, it will break.

Now be patient and take time.

Look who consumes who, just like walking a fish, you must not use reckless force. When the worm wriggles, Zhang Fan uses some force to pull the worm out a little, and then maintains a backward force, which is neither small nor small. It is a principle to let it consume physical strength.

Pull, pull, pull a little bit. At this time, make a table, the energy table of Zhang Fan and insects.

Insects eat a small amount of nutrient solution in the small intestine, because chief Zou hasn't eaten for three days and has enema countless times, so the nutrient solution can be ignored.

Zhang Fan eats delicious rice cooked by Shaohua, with meat and vegetables. According to the amount of energy, Zhang Fan wins a game.

But according to the energy conversion, Zhang Fan loses a game. The small eggs that people can see

from the microscope eat giants that grow by more than one meter in a month or two. Even if Zhang Fan has a system, he is not their opponent.

Therefore, at present, the advantages of Zhang Fan and insects are equal, which can be said to be equal.

Stalemate, Zhang Fan and insects are in a stalemate. Zhang Fan's sweat begins to tick. Sweat begins to seep everywhere on his head and nose. This physical cost is not much less than moving bricks.

Zhang Fan is tired, and the insect is definitely not easy, because now Zhang fan can feel that the insect's forward force is much smaller.

Zou section chief can't hold on. He hasn't eaten for two or three days. Even if he lies down and puts aside his legs, he can't hold on. The foreign body in the anus is too TM uncomfortable. Zou section chief has an idea of trying to vomit and spit out the stuff in the anus from his mouth.

You come and I pull. Zhang Fan, who is sweating, is more difficult at this time. It's not because he is out of strength, but because his hands are sweating. He feels that his hands are a little slippery. He feels that he can't grasp the trigger.

"Mother! Why is this thing so fierce?" Zhang Fan began to curse his mother in his heart.

Lv Shu is on the night shift. There is nothing wrong with the Department. She has come to join the fun. The Department of gynecology has seen too many disgusting things. For this, it is just a little diaphragmatic for this kind of insect at most.

She saw the sweat on Zhang Fan's head and gently took out a paper towel to wipe Zhang Fan slowly. The two have cooperated with many operations together, and there is still a certain tacit understanding. Zhang Fan turns her head slightly, and she knows that she wants to wipe there.

Seeing LV Shuyan wiping sweat for Zhang Fan, several doctors who wanted to study regretted smashing their chest, "why don't I have this eyesight, ah!"

"Zhang Yuan, how about a bottle of glucose? I think the insects are almost at the end of their strength. Let's have a drink and we'll take care of it." Then someone asked. There are still a lot of smart people.

"OK, take a breath." Zhang Fan also feels thirsty. Bit by bit, Zhang Fan insisted on pulling and dragging.

When Zhang Fan drank glucose, he almost let the insect escape. Because the insects also exert more force, the blood is slowly recovered from the genitals.

If Zhang Fan hadn't been staring at the insect's body all the time, he would have let the insect run away.

The insect is adjusting, and Zhang Fan has to adjust accordingly. Anyway, you don't move, and I don't move. As long as you move, I'll drag your ass and operate obscene.

It is estimated that the bug is also unmarried. He is worried. With the stalemate of time, the bug began to creep like a water wave. At this time, it turned into a posture that the whole body wants to jump.

Zhang Fan knows that the bug is not hit.

Just when the bug was about to make the last Bo, it was late and fast. Zhang Fan suddenly turned the lens, and his hand grasping the trigger used a little more strength.

The monitor shook violently, and the director of the digestive department was a little dizzy, but his eyes didn't leave. Zhang fanmeng turned around and the insect was turned over by Zhang Fan.

Then the abdomen of the insect magnified by the endoscope is completely displayed on the display. Two rows of long suction cups grow from head to tail, like the milk (a) room of a sow, or like flesh colored buttons of clothes, hanging on the abdomen of the insect.

Even more, and because this thing is like a suction cup, it keeps relaxing and contracting, just like the lips of a toothless old lady, it keeps looking for something and wants to suck.

It can be imagined that rows of toothless old women have only mouths, and countless toothless lips that keep sucking are hung in rows on their pink to white abdomen. And in the intestines, in the red intestines. It's really a horror movie.

Even if it's not a horror film, the density and sucking action means that doctors have no fear of density. Otherwise, under the enlarged display, this pink sucking can definitely stun several people.

At this time, Zhang Fan's eyes become sharp and his movements under his hands become faster. It's absolutely unambiguous when you're sick. If this thing turns over and adsorbs to the intestinal wall, Zhang Fan doesn't know whether he won or not, Zou section chief estimates that he can't hold on.

With both hands, "hold it, it's coming out soon." Zhang Fan gave a big drink, and then his hands began to draw back quickly and steadily. Like a cobra biting its prey, it retreats rapidly.

The bug didn't make the doctors vomit. As a result, a group of doctors began to feel dizzy and sick because of the rapidly retreating display.

"Director, help open the anus." Zhang Fangang said that the director of the gastroenterology department has begun to open up. In the end, it is the director of an old doctor. Zhang Fan doesn't have to tell him about this.

Along the fiber tube of the colonoscopy, miles and miles, along with the sticky liquid, the colonoscopy began to retreat, "prepare oval forceps, don't use toothed forceps." Zhang Fan said as he stepped back.

"The oval forceps are ready. It can't run away." The director of the digestive department answered.

"Come out, come out!" Wang Hong tightly covered her mouth and was afraid of insects entering her mouth, but her voice could come out. The girl is really excited. It's so exciting.

With the pulling out of the enteroscope, Zou Ke was relieved with a long sound, and the sticky insects were pulled out.

Without the magnifying effect of the electron microscope, nothing can be seen, that is, a longer rice noodle, or a movable rice noodle.

Pink, slightly white pink, the insects ticking the sticky liquid were pulled out. This thing also knew that the end was coming and kept twisting its body, just like the rice noodles held by chopsticks shaking.

"Darling, it's so long." The director of the digestive department took gloves and measured the length of the insect. A good doctor's hand is his measuring tool. He knows how long it is.

In fact, Zhang Fan is at the end of a powerful crossbow, especially the right hand holding the trigger, which is almost not his own, sour and astringent. The little nurse in the endoscopy room looked at Zhang Fan's trembling hand and quickly took over the enteroscope.

"Zhang Yuan, come out. If you don't do it today, it's estimated that the bug will have to be taken out of the patient's mouth. Look at the mucous membrane on this thing. It's too slippery! "

"Er!" Some people can't hold on. They can accept it when they come out of their anus. Think about it. They wear it around in the feces. Finally, if they pull it out of their mouth, it's disgusting.

One issued "Er!" Chain, several female doctors are a little bad.

"Ha ha!" Zhang Fanqiang endured nausea and rubbed his hands. It's false to say no.

"What are you disgusting? What is this? If the insect is broken and the organs in the insect body flow to the esophagus and the taste buds of the tongue, it is sour and cool. I guess you won't dare eat rice noodles in the future. "

The director of the digestive department was also a wonderful work. How disgusting? Zhang Fan, holding his hands, couldn't help it. He quickly nodded his head, closed his mouth, never looked at the pink rice noodles again, and quickly stepped out of the endoscope room.

Lying on the window, he took a few mouthfuls of air. The cold air at night suppressed Zhang Fan's nausea.

"Zhang Yuan, do you work overtime. The hospital canteen made some noodles. Do you want to eat? " Today is the dean of logistics. When he was on duty, he greeted Zhang Fan very warmly.

After a long day of nausea, Zhang Fan finally vomited, noodles, rice noodles, shaking insects, rows of lips, sticky liquid. Zhang Fan vomited. This is the first time he has been vomited since he went to work!

The red one is carrot, the white one is pilaf, and some red mutton!

"Er!" Wang Hong, who followed closely, vomited when she saw Zhang Fan vomit in a pool on the ground. In the evening, for beauty, she ate some instant noodles and hurried to bed.

As a result, after suppressing the nausea for a long time, it began to spray out violently, and the non chewed instant noodles sprayed out from the girl's nose.

"Er!" The logistics Dean, who was burping, had a stomachache and made a reverse peristaltic muscle. His stomach tore his sphincter!

"Shit, it hurts me. A noodle is so powerful!"

Chapter 492

The human body, especially the organs between the viscera, is particularly repellent to foreign parasites. Microscopically, when there are parasites in the body, various immune factors are mobilized. Although they can't do it, they will always do it as long as the parasites exist.

Macroscopically, the body will send out all kinds of alarms. Abdominal pain, as well as some external symptoms, such as partial eclipse, diarrhea, and even a series of skin allergies.

When a symptom appears, it can be treated separately, but when these symptoms occur alternately collectively, it is necessary to rule out the existence of parasites.

Especially children, young children, after playing, do not wash their hands thoroughly, which is very easy to be infected with parasites. Once the children say that their stomachache and anal itch last for a few days, parents will be interested.

Zhang Fan didn't go home at night. He went back in the middle of the night and made the whole family have a bad rest. It's not worth it. There is a small suite with a single bed in his office in the administration building.

Moreover, the hospital operating room provides hot water 24 hours a day. To be honest, if you don't get married and become a single Wang, you don't have to leave the hospital.

Eat. There is a canteen. Although it tastes bad, it is cheaper and more convenient.

The hospital provides dormitories for the inpatient medical association.

There is no need to worry about wearing it. There are white coats in summer and winter. Someone comes to wash your clothes every week.

Really, the hospitalized dog actually lives in a paid prison. It is the rules and regulations of the hospital that supervise him. It is the pressure of life that urges him, so there is no police.

The hospital in the early morning is not brightly lit. However, the lights are flashing. In the doctor's office, older doctors are still typing and improving medical records.

Young doctors who did not take the examination of practicing medicine are still doing exercises at their desks with exercise books. The pace of the nurses did not slow down. They were in charge of those who had surgery, new entrants, and family members who secretly smoked in the corridor.

Zhang Fan took a hot bath happily. The bathroom in the operating room of the hospital is really thanks to Lao Huang. It's big, and the water from the shower is also massage.

If you let Ouyang decorate, it's not surprising that the old lady will get you a bath room with a ladle. When buying large equipment, the old lady pursues advanced, even if it can't be world-class, it should be mainstream, but for these small things, if she can make do with them, she will definitely make do with them.

As soon as I got up, the administration building was quiet, because today was the weekend and all the non clinical staff had a rest. Zhang Fan got up, washed his face and went to the special needs department.

In the early morning, after the insects were caught out. Zou section chief has begun to become comfortable. The dull pain in the stomach and the itching in the anus have disappeared.

That night, section chief Zou finally slept the most comfortable night in months. Human parasites are similar to wild animals. They come out day and night.

Moreover, such a long insect, not to mention tearing up the intestines, can pull the intestinal spasm by crawling on the intestines in rows of suction cups.

"Well, do you feel OK today?" When Zhang Fan arrived at the special needs department, he heard someone make another ward round. When he came in, Wang (a) Hong also arrived. After all, it was their patient in the digestive department, and Wang (a) Hong was the doctor in charge.

"Doctor, I'm fine. Really, I can feel it now. I'm not ill. Although I'm still a little weak, I can feel the intestines in my stomach are happy."

"Ha ha, that's good. You're at ease in the hospital. We'll take care of your body."

"Thank you." Zou said politely that he was always a little weak in front of these female doctors. He bare his buttocks (a), alas! I'm sorry.

As soon as Wang (a) Hong turned around and saw Zhang Fan, her smiling eyes turned into a crescent moon. It may be an experience of vomiting together. Suddenly, the relationship between them seemed to be much closer than before.

"Zhang Yuan, how are you. Did you sleep well? "

"Oh, good. Very good. "

"You!" They said you at the same time, and then looked at each other and smiled. This is probably the feeling of colleagues.

Zou section chief felt good, and Zhang Fan didn't speak much. From the special needs department, Zhang Fan went to the surgery building. Since he was in the hospital, he went to check the ward by the way.

During the ward round, Zhang Fan started from the low-level anorectal department. When Zhang Fan entered the anorectal department, the young doctors of surgery knew it. Zhang hospital paid an unannounced visit to the Department at the weekend.

Now QQ group, too convenient, do not need a notice. For a time, surgeons hurried to the hospital from all directions.

In the system, you can be stupid, lazy, or even chicken thieves, but you must not be blind. If the leader comes, you can't let others see you even if they catch you late. It's wonderful.

When Zhang Fan came to the second Department of orthopedics, he had been waiting in the office from the attending doctor to the rotation doctor. Wang Yanan yawned. She was on duty 24 hours last night and had emergency surgery. She didn't sleep all night. She couldn't stand it at this time.

"Zhang Yuan!"

"Zhang Yuan!" The voice of greeting kept saying, "it's all there. Let's go round the room. I'll come around." Zhang Fan said hello with a smile and didn't follow the ward round. I went to the nurse station and looked at the number of doctor numbers.

After Zhang Fan left, a group of doctors who were not on duty flew around. Finally, one weekend, these people don't want to stay in the hospital.

After a round of surgery, Zhang Fan has a number in mind about the number of patients in each department. Without any special patients, he drove away from the hospital.

The hospital is busy, but there is still a group of experiments waiting for Zhang Fan in the animal laboratory of tea element University. At present, the portal system has begun to collect data for a large number of operations.

There is still a problem with skin allogeneic transplantation. The area is stuck at 20%. Once this area passes, the failure rate directly appears dozens of times. Zhang Fan keeps modifying different surgical methods, but the effect is not very obvious.

However, compared with the original, only Zhang fan can do it alone. Up to the current 20%, the improvement is not one or two points. Professor Li Housen is also very satisfied.

Schools in the capital are rich and powerful. Compared with Zhao Jingjin's timidity, Professor Li Housen is really a big hand. Experimental animals are large experimental animals such as dogs.

Ouyang treated Professor Li Housen, Professor Zhao Jingjin, and brother Lu Ning very well. He stayed in a hotel designated by the government for a long time and paid wages. He didn't ask much. He just went out a few days a week.

Thanks to the participation of Professor Li Housen, the dermatology department of tea vegetable city hospital has developed very rapidly. It was originally a marginal clinical department. As a result, under the leadership of Professor Li Housen, more than 20 doctors in the Department have been recruited, and many new surgical projects have been carried out, and the number of patients has also increased rapidly.

After a morning's experiment at tea vegetable University, Zhang Fan has to go home to clean up. He also has to prepare to fly to the bird market in the afternoon. There are more and more patients in bird market.

Because Zhang Fan's surgical cure rate for huge tumors in the liver center is very high. Many patients come from other places.

Today, Shao Hua will also go to the bird market to study inside the banking system. The unit has sent

several young people to top up.

"If you don't come again, I'll find you. Hurry up." Shaohua picks up his clothes at home. Zhang Fan is dizzy when he looks at Shaohua's big box.

"Girl, you go for a few days. Do you need such a big box?"

"Of course. Three days to go! " Shao Hua gathered up his lovely little nose.

"All right!" Zhang Fan has nothing to prepare for himself. He is familiar with everything. He helped Shaohua clean up for a while. The girl is too careful. She even has an umbrella.

"Be careful on the road!" Shaohua's parents sent Shaohua and Zhang Fan out.

Zhang Fan drove to the tea vegetable airport. Shao Hua, sitting on the co pilot, put sunscreen on his arm. "The sun is too big. It's estimated that the bird market is more sunny. Come and bring your face closer. "

As he spoke, Shaohua also smeared a little sunscreen on Zhang Fan's black face.

"What is your constitution?" Zhang Fan is very concerned about this issue.

"What's the Constitution? It's a three-day meeting at the headquarters of bird market."

"Do they arrange accommodation?" Zhang Fan asked while driving.

"You can't do that. You can solve the accommodation yourself. I have to find my own hotel. Our unit is very stingy. We only reimburse 100 yuan for business travel every day, which means that we are allowed to stay in a youth hostel.

None of the old staff are willing to go to the meeting, and only our new comers can't help it. You don't know, five people have joined the unit in the past year or two. Bullying! " Shao Hua muttered angrily.

"Hehe, it's OK. I'll arrange your accommodation. " Zhang Fan said happily.

"Yes, you. There are several of us. It's not good to live separately." Shao Hua's little face is a little red.

"Are the rest of you going to live together?" Zhang Fan is a little depressed.

"No, three people seem to be going to relatives' homes. There are two more people, not sure yet. " Shao Hua's voice was much lower.

"Ha ha, you are naughty. There are five people in total. Three people went to relatives' house. The other two are estimated to have arrangements, ha ha!" Zhang Fan is dying of laughter. Shaohua's expression

like a little rabbit is so cute.

"Hate, ignore you." Shaohua blushed and turned to look out of the window.

At the airport, there is a special parking space for the night. Zhang Fan didn't care much about the license plate given to Zhang Fan at the beginning, but he understood the benefits of this thing a little longer.

First of all, his car has never been checked by the traffic police, and there are tolls and parking spaces

As soon as he entered the airport hall, Shao Hua met a colleague, who was also a girl. It seems that he may go to work soon, because what he wears is still very student-oriented.

"Sister Hua, it's nice of you to fly to the bird market. I thought I couldn't meet my companion. Hey, hey, this is my brother-in-law. He's so handsome. Is it for you, sister Hua? You are so happy. "

Although the little girl looks like a student, she can speak and is enthusiastic. Zhang Fan likes such a discerning girl.

"Hehe, he is my boyfriend, Zhang Fan, going to the bird market with us. This is Chen Juan, my colleague. " Shao Hua was happy when her colleagues praised Zhang Fan. Everyone likes to listen to good words.

"Hello, brother-in-law. I've heard from my colleagues that sister Hua's boyfriend is a knife from the municipal hospital. I finally saw him today. He's still a handsome knife, hehe. I admire your doctor. "

The little girl is so talkative that Zhang Fanya can't cover her smile.

"Hello, hello. Ha ha! "

Line up and put your luggage. The little girl is also diligent and runs back and forth. On the plane, the three changed their positions and did it together.

Shaohua sat in the middle. When the plane entered and ran and began to accelerate, Shaohua felt that Zhang Fan was a little nervous. Because Zhang Fan dared not breathe. His waist was straight and his legs were tight.

Shaohua's small hand quietly held Zhang Fan's hand and leaned his head against Zhang Fan's shoulder. Zhang Fan, who was a little nervous, felt better and slightly relaxed his shoulder, so as to make Shaohua more comfortable. As soon as his spirit was scattered, he was not very nervous.

After the plane was stable, the little girl sitting on the other side talked more. When the flight attendant began to make water, Zhang Fan knew that the little girl's mouth was really sweet. Opening her mouth was her brother.

"Brother, give me a cup of coffee!"

"Brother, you look so handsome in uniform. Can you bring me another cup of coffee!"

"I thought I was really handsome. It turned out that you, a little colleague, took handsome as a mantra." Zhang fanslightly whispered to Shaohua disappointed.

"Pooh!" Shaohua couldn't help laughing " Handsome, you are the most handsome in my heart. Although it's a little dark, ha ha. "

"Hey!" Zhang Fan, who was a little proud, was not in the mood to talk.

After a journey of more than 40 minutes, it seemed that the plane had just climbed into the sky and began to prepare for landing " Sister Hua, this way, it's good to take a taxi here. " The little girl seems to have good family conditions. She often takes a plane and is very familiar with the airport of bird city.

"Don't worry, wait first. Where are you going? Have you found the hotel yet? " Shao Hua took the little girl's hand. Shao Hua is very good. He takes good care of his younger colleagues when he goes out.

"I'll go to my aunt's house. What about you? Why don't you go to my aunt's house too. It's very close to taking a taxi, but it's a little away from the meeting place. "

"Thank you. Don't worry about me. We don't take a taxi. Someone will pick up Zhang Fan and send you to your aunt's house first." There were many people, and Zhang Fan was busy with his luggage.

After a while, the director of the Fifth Department of hepatobiliary surgery of the affiliated hospital came.

"Zhang Yuan! Come on, give it to me. " Seeing Zhang Fan carrying his luggage, he hurried forward a few steps and had to help Zhang Fan carry it.

"Sister Hua, why is my brother-in-law here? It's such a big formation!" The little girl looked at the big Mercedes Benz and put out her little tongue.

Before Shaohua could speak, Zhang Fan hurried to introduce each other and got on the bus. The pick-up platform at the airport could not stop for a long time. This time, the traffic police under command had come this way.

After sending the little girl, the director of the Fifth Department of hepatobiliary directly sent Zhang Fan and Shaohua to the hotel. For the convenience of Shaohua, Zhang Fan specifically said to be in a hotel closer to the bank's headquarters.

Zhang Fan declined the banquet given by the director of the fifth hepatobiliary department. He didn't want to bother others too much.

Chapter 493

In order to travel to and from the bird market, whether the two directors of the affiliated hospital or qualified patients, they will find a hotel near the hospital. After all, it is close to the hospital, and Zhang fan can have more rest. The traffic jam in the bird market is very fierce. I don't know if the city has reached the front line, but the traffic jam is approaching the front line.

But this time, because he wanted to accommodate Shao Hua, Zhang Fan lived in a hotel near the financial circle of bird city for the first time, surrounded by some large shopping malls and large enterprises.

Love doesn't exist, save doesn't exist, and it can't be connected or moved. In all kinds of insurance and financial industries, almost rich enterprises have buildings in this street, and one enterprise has one building, which is slightly worse than the postal system. Only one mailbox is hung in this street.

In this case, there is a boss who is said to be in the wine industry. The enterprise is not very famous in the country, but it is still very powerful in the frontier. People's ice beads are five or six hundred per bottle.

Therefore, the standard of this reception is very high. Zhang Fan and Shaohua are arranged in the only foreign chain hotel in bird city.

And it's a suite on the top floor. Zhang Fan and Shao Hua walk in front of the waiter. The handsome young waiter pushes Shao Hua's box and holds Zhang Fan's bag. Zhang Fan wants to help, but they won't let him live or die.

There are thick carpets in the aisle, various oil paintings on the walls, and one or two female statues without arms from time to time.

"Many foreigners!" Shao Hua tightly pulled Zhang Fan's arm. To tell the truth, the girl stayed in such a high-end hotel for the first time. She was a little uncomfortable.

"Well, there are many. Are you hungry? When you're ready, let's go to dinner first. You are familiar with the bird market. Let's go and have some good food later. It's my treat! " Zhang Fan said proudly.

"Do you have money?" Shaohua looked at Zhang Fan suspiciously.

"Yes, I haven't spent all my pocket money yet." Zhang Fan smiled.

At the door of the suite on the top floor, "here is your room card, sir and madam. At the end of the right side of the corridor is the hotel cafeteria, and on the left is the bar. However, if you need a door card to get in and out, please take the door card. "

The guy is very polite and professional. He has a slightly bowed waist and has a modern housekeeper's style.

"Thank you!" Zhang Fan took the card and people smiled.

"Thank you!" People smiled again, and Zhang Fan wondered. What's the matter with this man! Zhang Fan looked at the room number and his clothes. No problem. Then Zhang Fan looked at Shaohua in wonder.

"Do you need a tip?" Shaohua asked uncertainly.

The young man smiled even more. But he didn't nod or shake his head.

"Is twenty OK?" Shaohua took a twenty note and hesitated to ask. She would never give more. The girl is very good at living.

"Thank you! I wish you a pleasant stay. " Took the bill and the boy left.

"Ha ha, I'm so happy. If it weren't for me, you'd be stuck here today." Shao Hua is happy for his intelligence.

"No wonder I said to help him with his things. He didn't want to live or die. He was waiting here." Zhang fan can't argue with him for 20, so he feels a little rusty.

When I opened the door, there was no peculiar rancid smell of the hotel, but a slight smell of lavender flowers.

The suite is really big. There is a hall, leather sofa, boss's desk, boss's chair and computer. Moreover, the thick white carpet makes the room several grades in an instant.

The big French windows are almost as big as a wall. Two bedrooms, one big and one small.

"How much is it for this night?" Shaohua couldn't help sticking out his tongue looking at the decoration inside.

"I don't know. It's probably not cheap." Just put things down, when Zhang Fan hesitated, the director of the second hepatobiliary Department of the affiliated hospital called.

"Zhang Yuan, how's it going? Have you arrived at the hotel?" The other party's polite voice came from the phone.

"Here, here. It's a little extravagant. Just give me a standard room... "

"Ha ha, my boss is worried that you can't rest well. You can rest assured. My company has booked a suite in the hotel for a long time, which is specially used to entertain distinguished guests. As long as you are satisfied, everything else is not a problem. "

"Thank you, thank you. Thank them for me. " Hearing that it was a long-term private room, Zhang Fan's uneasy heart was much less. Anyway, he asked for money when he was empty!

"Zhang Yuan, what shall we eat in the evening. I think you like vegetarian food. Why don't we have steamed vegetables. There is a steaming restaurant in niaoshi. It's done well... "

"Thank you, thank you. I'm here with my girlfriend this time. Hehe, I won't bother you."

"Well, ha ha, have a nice weekend in Zhang Yuan." After hanging up, Shao Hua also came from the bedroom, "who? Are you going out? " After leaving tea vegetable, Shao Hua is a little sticky when he arrives at a strange hotel.

"Another department director. Are you ready? Go to dinner. I'm hungry. "

"Right away. Where to eat?"

"Why don't you eat in a hotel? It just cost me twenty dollars to ask for directions." Zhang Fan said with a smile.

"Such a high-end hotel, do you need to wear a dress to eat here?"

"What? Isn't your work clothes a suit? "

"Ah! Ah ah, I'll kill you. " Shao Hua's work is a joke.

It is said that their unit wants to spend a lot of money to buy international brand clothes for employees. Half of the clothing expenses are paid by the unit and half by the individual. Shaohua's salary and bonus in that month were deducted by more than 3000.

Shao Hua didn't expect anything at that time. Think about seven or eight thousand clothes. How good they were. As a result, when the clothes came, the brand was a foreign name, but I didn't know which country it was from or which international brand it was.

That's all. As a result, Shaohua can sing opera on his body. When he puts on his pants, his waist is mentioned to his chest, but his feet haven't been exposed yet. Shaohua is angry. If he didn't love his more than 3000, he almost had to wring his clothes.

The two made a scene in the room for a while. When Zhang Fan was confused about the explosion, Shaohua ran away "Dead, aren't you hungry? Let's go. "

"Ah! Let's go. " Zhang Fan pulled his leg and went out with a zigzag step.

"Go and have a look first. If it's all evening dresses, let's not go in and lose face. Let's eat somewhere else." Shao Hua stood at the gate of the self-service and sent Zhang Fan in to have a look.

People from small places are shocked by the luxurious decoration of the hotel. Shaohua is a little... Not to mention inferiority, but he doesn't want to lose face in this regard.

There was a big English name at the self-service door. Zhang Fan looked carefully and didn't know it because it was written in fancy. After entering the restaurant, Zhang Fan looked and smiled.

"Gone, there are a lot of people, and I saw the prawns." Zhang Fan immediately went out and said to Shaohua. Zhang Fan hasn't seen such a big shrimp for a long time since he left Qingniao.

"Tell me about it. You don't say I won't go in. " The girl is still tender after all.

"Hey, hey, there are people in suits and dresses." As soon as he said this, Shaohua was ready to go "What's the hurry? Listen to me! " Zhang Fan held Shaohua. "They are waiters in suits and dresses. The guests at dinner are dressed casually! "

"Let me take a bite!" Shaohua knows what happened. She was molested by Zhang Fan.

The quality of the hotel is very high, and the quality of the cafeteria is not bad. However, most of the diners seem to be ordinary people one by one. They can't afford to live in suites or self-help?

Chinese people are really willing to eat.

Zhang Fan and Shao Hua didn't ask for money for dinner, because they had VIP room card, and the meal was free. The treatment was really good.

Shrimp, prawns, prawns with thick arms for children, crabs. A big crab can put a plate of big crabs. Fish, all kinds of sea fish.

"Slow down. Oh, how ill I have to treat you. You look like you're worthless." Shaohua looked at Zhang Fan's mouth and ate all the soup. While wiping it for Zhang Fan, he chatted.

The frontier is too big, China is bigger, and tea is the farthest city from the sea. Sometimes the seafood in the supermarket is given to Zhang Fan. Zhang Fan doesn't eat it, so he can't eat it. Take it home and thaw it. OK, the smell of smelly fish and rotten shrimp all over the house.

"What else do you eat? I'll get it for you. " Zhang Fan has dried a fish, several prawns and crabs, as well as some abalone and scallops.

"Bring me some drinks and snacks. Just tomato juice for the drink. No chocolate for dessert, just the most common. I want to eat some staple food. Take less and take one first. "

"I also want to eat some seafood. The shrimp here is really good." With these words, Zhang Fan continued to set out.

After a while, Zhang Fan came with a high plate. Shaohua looked at the food Zhang Fan was carrying and was almost speechless“ When I go out later, I'll go first and you'll go later! "

"Why!" Zhang Fan asked reluctantly while eating.

"I don't want money, and I can't eat like this. I'm convinced you. Haven't you been full at ordinary times?"

"I'm full!" Zhang Fan is good at eating shrimp and crabs. The meat in the hard shell of shrimp and crabs is eaten by Zhang Fan.

"Why do you eat so much today?"

"Silly, the meat of these shrimps and crabs is only a few Liang. It looks like there are many, but in fact there are not many. Give me a drink. As soon as I couldn't hold it in my hand, I took a cup. "

Zhang Fan ate and drank. He really ate a round belly. Although he usually eats a lot of delicious food, Zhang Fan really likes seafood.

Fortunately, seafood is not allergic. If allergic, Zhang fan can cry to death.

Watching Zhang Fan eat more and more delicious, Shaohua, who was already full, couldn't help taking another bite and didn't think it was delicious. But Zhang Fan just eats very delicious.

"It seems that you are quite suitable for living by the sea. I think this prawn is no different from the small green shrimp we usually eat. The meat of the small green shrimp is still tender. "

Shaohua looked at Zhang Fan with a little pity and greedy for her.

"Well, in fact, the shrimp and crabs here are just average." Zhang Fan said while eating. If the restaurant owner hears this, it's estimated that he can beat Zhang Fan out. It's too bullying. He eats so much. That's what he said at last!

"I went to Qingniao the year before last. Who was the host. We have one table. If others don't eat seafood, I can eat it alone. It is estimated that the chef is of high level and tastes very fragrant! The taste here is still a little bad. "

Zhang Fan is a bit of a layman. Seafood is a fresh thing. Can it be compared with those fished out for a few hours and a few days!

"Do you like bluebirds?"

"Like it!"

"Do you like tea?"

"Like it!"

"Where..."

Before Shaohua finished asking, Zhang Fan said, "I'll take you to see the prosperity and scenery all over the world. Without you, it's the same everywhere I go. With you, the world will make me feel beautiful. You are the most beautiful scenery in my eyes. "

"Hehe, what else would you like to eat? I'll take it for you." Shao Hua's smile made him happy. Not to mention others, in fact, little girls are more emotional and more easily moved by words than little boys. Of course, even if you have experienced for thousands of years.

The restaurant is really high-end, and the waiters are well trained. They don't eat as much as Zhang Fan, but they have a different expression. The highest level of eating self-help is to help the wall in and out.

Of course, Zhang Fan didn't reach any realm. Few medical students dared to overeat because they were afraid of pancreatitis. If Zhang Fan had no system to convert a little energy, Zhang Fan could not eat so much.

However, compared with some gluttonous, Zhang Fan's appetite is nothing. Zhang Fan has a characteristic of eating buffet. He doesn't eat dessert and drinks. He also drinks a little and doesn't touch the wine. I don't eat fruit, so I eat more.

With enough food and drink, Shaohua accompanied Zhang Fan out of the hotel and took a walk in the bustling financial street. The pedestrian street in the evening is very lively, square dance, children's

laughter, and some discount shopping malls.

"I used to like the prosperity of big cities, but after working in small places for a few years, I feel a little uncomfortable here. I always feel too noisy." Shaohua took Zhang Fan's arm and walked slowly down the street.

"There are more people here. If you go to see other communities, it's actually similar to tea. Isn't tea vegetable square like this at ordinary times, girl? Pay attention to your mentality. Don't think you're from a small place. With your face and figure, you look like a girl in a big city. Who are people from small cities? "

There is a difference between systematic and non systematic. The biggest difference is in mentality. Zhang Fan doesn't think there is anything here, but Shaohua always feels a little free when looking at the towering buildings and busy streets around him.

"Maybe!"

They ate and walked for a while, but they didn't go far, so they returned to the hotel.

"I'm going to take a bath. Don't come in or peek."

"Well! Um! Yes! " Zhang Fan nodded his head like a dog.

The bathroom was made of ground glass. Zhang Fan had known for a long time. As a result, what he didn't notice was that there was a curtain in the bathroom. With a click, Shaohua buttoned the door, clattered, and Shaohua pulled the curtain.

"Ah! I'll go. When did the curtain come out? "

"Girl, do you want to rub your back and massage? Professional! "

"No!"

"Girl, do you want a towel?"

"I've taken it myself. Don't disturb me and watch TV! " Shaohua is impatient.

"Well, just look." Lying on the sofa, Zhang Fan pressed the remote control and glanced at the bathroom with the curtain pulled from time to time.

The sound of water splashing was like a drum beating on Zhang Fan's heart.

"Mandarin duck bath! hey. Two birds are taking a bath. Hey, hey! " Zhang Fan is a little obscene. What's shaking in his mind is this very rare word.

Chapter 494

There are three slows for female officers: taking a bath, making up and going out, especially taking a bath and going out. Boys say to go and rarely procrastinate.

Of course, the speed is fast, and the quality is not comparable to that of girls. Although the foam on the head is not washed, there is always a sense of do things carelessly.

Shao Hua quietly came out of the bathroom. The girl struggled in the bathroom for a long time. "Look at his performance. If he performs well, then..." the girl seems to have prepared something and carefully let the water wash her body.

Gently open the bathroom, with a slight smile, bare feet, slowly step on the soft pure white carpet, scallion toes, just like lanolin jade.

The girl thought about all kinds of situations in the bathroom, "he will be rude, gentle, polite, or stunned." Imagining his lover erha's expression, Shaohua couldn't help laughing.

As a result, when Shaohua has shown his best side. Seeing the scene made Shaohua angry, but he was very distressed.

The remote control of the TV fell on the carpet. Zhang Fan's hand fell on the edge of the sofa, his head tilted on the edge of the sofa, his face towards the bathroom, his mouth slightly opened, snored gently, and there was bright saliva on the edge of the corner of the mouth.

At the beginning, Zhang Fan was as excited as a cat's paw from excitement to expectation. He looked forward to it very much. As a result, waiting, Zhang Fan fell asleep unconsciously.

After all, I slept in the office last night. Although I didn't stay up late at night, I always didn't sleep well. I was half asleep and half awake. At this time, because Zhang Fan is too full, his brain is excited and he is endless fatigue.

Shao Hua's graceful Bai Zhuo said, "I'm so angry!" The girl immediately took off her bathrobe, took out the clothes she had brought in the box, dressed neatly and cleaned up neatly.

He went to Zhang Fan and said in his ear, "it's dawn! It's time to go to work. "

"Oh, I'm so numb." Zhang Fan was sucking saliva and lying for too long, shaking his numb arm. Look again, Shao Hua is dressed neatly.

"It's dawn?"

"Hehe, not yet. Go take a bath. After washing, have a good rest. " Shaohua looked at Zhang Fan's deformed face and couldn't bear to tease him.

"Go, I'll wait for you!" Zhang Fan looked at Shao Huagang coming out of the bath with water vapor in his hair. He was a little greedy. As a result, Shaohua tricked him into the bathroom.

Smelling Shaohua's body fragrance, Zhang Fan washed his body quickly. Well, although he washed quickly, he didn't let go of the place to wash. For this kind of thing, single dogs don't understand and can't wash. Single dogs usually wash their heads.

After Shaohua and Zhang Fan entered the bathroom, he quickly prepared a change of clothes and pajamas for Zhang Fan, immediately entered the small bedroom, and then closed the door with a click. The girl tilted her mouth and fell asleep sweetly.

Zhang Fanting looked at the muscles in the mirror, looking at the muscles in the mirror. Well, it was not bad, and he rarely spun a little Shao Hua perfume, brushing his teeth and gargling.

As a result, eh! There was no one in the living room and no one in the big bedroom. When I pushed the door lock of the small bedroom, "madam, I'm coming!"

"The lady is asleep!" Shao Hua is lying in the quilt and laughing is a happy one“ Blame yourself, not me. " Shaohua thought.

There's no way. Zhang fan can only go to bed honestly. Looking at the big landing window and the big moon on the plate, Zhang Fan looks under himself, alas! sleep

Zhang Fan's advantage is that he sleeps when he sleeps. Anyway, sooner or later, he doesn't worry and has a better mentality. Well, after comforting himself and his brother, Zhang Fan snores and sleeps, still sleepy.

Zhang Fan slept sweetly, and Shaohua couldn't sleep over and over. She didn't sleep like Zhang Fan. She suddenly changed her place. The girl lost sleep. She couldn't sleep over and over. When she took out her mobile phone, it was more than 3 a.m. and her eyes were like a bright bulb.

Quietly, his ears leaned against the door. There was no sound outside. Shaohua, wearing pajamas and barefoot, quietly opened the door. Zhang Fan's breathing voice had come from the bedroom.

Sneak your little head into Zhang Fan's bedroom, will you! Zhang Fan had long slept until his nose blistered. Shaohua bit his teeth, gently climbed to Zhang Fan's side, leaned slightly against him, and listened to Zhang Fan's breathing. Shaohua finally felt at ease and slowly entered sleep unconsciously.

In the morning, when a ray of sunshine enters the room, Zhang Fan wakes up. His perennial habit makes it impossible for Zhang Fan to stay in bed. At this point, he doesn't need an alarm clock and naturally wakes up. Stretch out, eh, soft.

Zhang Fan turned his head and saw Shaohua leaning against him like a kitten with a slightly cocked mouth. Thin pajamas, Donald Duck with a big mouth on his chest sticking out his tongue, as if laughing at Zhang Fan.

Hey hey, Zhang Fan couldn't help pinching, "don't make trouble, I want to sleep." Shaohua still closed his eyes. He fell asleep too late last night. It would be a sweet time to sleep. Shaohua threw out his annoying big hand.

Young and powerful, but time did not allow. Zhang Fan reluctantly kissed Shaohua's small mouth, got up to wash, cleaned up, drank a mouthful of warm water, and the phone came in " Zhang Yuan, I've come to pick you up. It's in the hotel lobby. Have you had breakfast? "

"No, I'll come down right away." Zhang Fan hung up the phone, sent a message to Shaohua on his mobile phone, and then hung the don't disturb sign at the door.

Last night, Zhang Fan was picked up by the director of the Fifth Department of hepatobiliary surgery of the affiliated hospital. In the morning, Zhang Fan was picked up by the director of the second Department of hepatobiliary surgery. They have united front.

"Zhang Yuan, how was your rest. The rooms in this hotel are good. "

"Very good, that is, the room is good." Zhang Fan exchanged greetings with the director of the second hepatobiliary department, and then got on the bus.

"Zhang Yuan, what shall we have in the morning?"

"Just a little. If you have porridge, you can eat porridge. If you don't have porridge, you can drink some water and eat some steamed bread."

Zhang Fan said he had porridge. He must have porridge. After a while, Zhang Fan was taken to a seemingly exquisite porridge shop. Because of the operation, Zhang Fan simply asked for a bowl of white rice porridge and two steamed buns. He didn't even ask for steamed buns.

What did Zhang Fan eat? The director of the second hepatobiliary Department came as it was. They ate and talked, and the driver was on another table“ Zhang Yuan, there are three surgeries today. Originally, there were two. As a result, the boss of the wine industry had to ask you to operate automatically. He had to add him today. "

"Oh, is it also a huge tumor in the liver center? I don't have any opinions about the three operations, but I'm a little nervous about the time. It's estimated that the third operation will be in the evening. Can the patient live?"

Zhang Fan took a bite of big white steamed bread. The white steamed bread is really white. It seems to be made of superior flour.

"Wine boss, he is not a disgusting tumor, but a benign liver tumor. Because you have done a good operation, people have to let you do it yourself." The director of the second hepatobiliary Department explained with a little embarrassment.

"Oh, is it confirmed?"

"Confirmed."

"There's no big problem." Zhang fanlue said after meditation that the difference between benign tumors and malignant tumors is too big. Although it's just a word, the nature is really very different.

Chapter 495

"Are the preoperative preparations ready?" Zhang Fan asked while eating breakfast. As for others, it was not Zhang Fan's turn to worry. This was the work of his own department, and he could arrange it anyway.

To say a bad word, Zhang Fan is a monk invited to read scriptures. How to read it is Zhang Fan's business. As for who to read it, Zhang fan can't intervene or won't intervene.

"Ready. Zhang Yuan, the surgical patients this afternoon are relatively young. Do you think you can let me do the early stage? " The director of the second hepatobiliary Department said with a smile.

"Hehe, it seems that the director has learned something. OK, you can try it this afternoon." A director of the family opened his mouth, and Zhang Fan must give face. And Zhang Fan is also willing to popularize this operation as soon as possible.

The operation is arranged in the order of easy to difficult. The operation of the wine boss comes first. To tell the truth, a small operation will be performed before two major operations. Really, it's a great skill!

The boss of the liquor industry, who wandered all over the south when he was young, was an agent in his early years. It is said that he sold no less than hundreds of tons of Lafite in 1982.

At that time, the country had just started and was very curious about everything outside. As long as everything with letters was easy to sell, his first pot of gold started with foreign wine.

Then, not satisfied to be a second dealer, he simply did it himself. How about frontier wine? It's hard to blow, but every one in the country is a rival in the frontier.

Wine boss, I can't help drinking. I've been drinking for decades. I'm so rich. My life is really good. This guy just drank a benign liver tumor.

Rich, capital and well-informed are not ordinary. He was originally prepared to go to the mainland for medical treatment. He learned that the liver tumor of the affiliated hospital has been at the forefront of the country, which is more convenient.

No, three days after the tumor was found, the operation was scheduled.

Tumors, except the heart, almost all human organs have the possibility of canceration. Moreover, malignant tumors not only bring death, but also a series of social and family problems.

This tumor has also been pulled out by the medical community to become a subclinical discipline. At present, the medical community has debated the causes of a large part of tumors without a definite number.

There are three kinds of treatment, surgery, chemotherapy and radiotherapy. The operation methods include thorough operation and palliative operation. In a word, all cancers that can be operated on are good. I'm afraid there are almost no operations.

There is almost no way for laymen to understand tumors in professional terms. If you want to explain it thoroughly, you can't say it clearly without more than 100000 words. What genes, what inducements and what mutations are too complex and too complex.

In popular words, it's very simple. Malignant tumor cells are bad people who are disobedient and disobedient to work arrangements. From the moment it was born, it didn't listen to the arrangement of the organization.

If the organization makes it grow towards a circle, it won't listen. If it has to grow into a square and don't listen to orders, the body organization will arrange people to clean it up.

So many tumor cells are picked out by the human immune system at birth. But there is also a part, the body can not die, can only grow by it.

Can eat and drink, Zhang is fast, and will grow in another place. With the development of time, the body can't support cancer cells, and people die.

Benign cells are another kind of cells between obedient cells and non obedient cells.

The body tissue makes it grow into a circle. It listens a little, but it is not completely obedient, and then it becomes an ellipse. Although it is much rounder than the square, it is still a little worse than the circle.

Fortunately, its appetite is smaller than that of malignant tumors, and it is also shy and doesn't like to do slap, so it won't metastasize. But although the appetite of this thing is smaller than that of malignant tumors, it is much larger than that of normal cells.

Just like a person who ate hormones, he suddenly became fat, grew tall and fat in his organs, and became strong. He began to bully his normal cells.

Malignant tumor cells do not bully normal cells. They are directly hanged. Without leaving a little nutrition for normal cells, they can starve nearby normal cells in a few days.

Benign tumor is bullying. It grows fast, tall and fat. It uses its huge body to lie on the body of normal cells. In a short time, the problem is not big, but in a long time, it is a problem.

Such as benign tumors in the liver. It will oppress various pipelines, resulting in the blockage of the internal structure of the liver, and various problems will occur in the human body.

Moreover, benign tumors, after all, are not normal cells. When they become more and more, sooner or later more cells will appear. Moreover, compared with normal cells, it is more likely to have disobedient cells in its body.

That is, the malignant transformation rate is higher. Therefore, benign tumors should pay more attention to surgery and complete surgery.

After dinner, Zhang Fan and the director of the second hepatobiliary Department went to the hospital. Hepatobiliary doctors waited in the Department early. Although they didn't go to work, almost all the doctors in the Department came.

"Zhang Yuan!"

"Here comes Zhang Yuan!"

"Zhang Yuan, you drink tea."

Zhang Fan said hello with a smile and went to see the doctor.

The first patient was the boss of the wine industry. Although he was wearing patient clothes, he looked like a bad stubble. Deep eye socket, white eye benevolence is much more than black eye benevolence. Inadvertently, I always think he is staring at people.

"Expert Zhang, what a bother. Great grace does not say thanks. Everything depends on action. " The wine boss is very polite, but Zhang Fan doesn't take it seriously. Just listen to such people, and Zhang Fan doesn't want to make deep friends with them.

It's not necessary. People pay medical expenses. If Zhang Fan eats this bowl of rice, he must treat them well. As for the others, just listen.

Zhang Fan would rather deal with good ordinary people than with people whose worth has become a number. When money reaches a certain order of magnitude, it is actually similar to floods and beasts. Although it does not hurt people, it may inadvertently bring bone breaking disasters to ordinary people.

"You're welcome. I'm relieved." Zhang Fan smiled. After a physical examination, he left the ward and went to the ward of two other patients.

The physical condition of the other two patients is relatively poor. Weight loss and chronic pain have made them lose their only energy and spirit.

"Does it hurt?" Zhang Fan gently did an abdominal examination.

"Well, it hurts." One of them, a man in his thirties, is lying on the hospital bed. He is a relatively small patient at any time today.

"Doctor, please use more snacks. The family depends on him. " The gaunt woman next to her put her hands together and said good words to Zhang Fan.

Although she has a smile and a flattering face, her smile is more ugly and uncomfortable than crying. Poor man!

"Don't worry, I will do my best." Zhang Fan nodded gently and said a few words kindly to his family members and patients. Then he took the doctors to another ward.

"Good doctor, master, we are lucky. When we meet a good doctor, you can be saved. You must have confidence. The child is still waiting for his father at home." The flowing wife gently stroked her man's cheekbone protruding face.

Say a good word, say a warm word, it's not difficult, it's really not difficult. In particular, the doctor's one or two warm words may really give the patient courage.

Chapter 496

Resection of benign liver tumors is not difficult. This kind of surgery, compared with malignant tumors, is like one in the sky and one underground. And benign tumor, it despises normal cells.

It is self-contained and wrapped with a layer of clothes on the outside. To put it more popularly, it is to press a hole with your fist in the normal tissue of the liver, and then put a plastic film. There are benign tumors in the plastic film.

The operation is very simple. First ligate the surrounding blood vessels, then peel them off a little, peel them off, stop bleeding, close the abdomen and end.

Of course, everything is simple to say. It's not that time to do it.

A doctor, the most common doctor, five years of undergraduate course, three years of rotation, one year of retractor, one year of simple non consumable surgery such as appendix and hernia.

If the doctor is skilled and can be a man, then at this time, the doctor who teaches begins to let go slightly and let the doctor do the peripheral operation of the liver, that is, a simple gallstone cholecystectomy. Note that these are all open operations.

When your hands are familiar, you will start to do laparoscopy. Continue the above round and another round. First learn to make a hole, then learn to use laparoscopy to do the appendix, and then the gallbladder.

Here someone will ask, laparotomy has great damage, laparoscopy is advanced, and why do you still learn laparotomy. In fact, the truth is very simple. For example, not all appendicitis can be done by laparoscopy, but all appendicitis can be done by laparotomy.

A doctor who can't open the abdominal cavity is not qualified to do laparoscopy. Wait for this general doctor, boil bald head, boil old years.

When the green boy turned into a greasy uncle, the director slowly began to contact the liver when he was about to enter the countdown to retirement.

That is, Zhang Fan has a system, no system. At the age of a dog, he wants to have liver surgery and endure it. There is no luck in the matter of human life.

Sometimes, when you think about it, doctors want to rush to the top of the world in the industry.

In fact, just like cultivating immortals, if you want to get ahead in this industry, you need the excellence of your origin (school), the reputation of your school (Mentor), your talent and efforts, and the size of your gang (hospital).

Zhang Fan was really lucky. With the system, he came to a small place after graduation, had the opportunity to practice his skills, and met good leaders and teachers. It was really bad luck.

In fact, benign tumors of the liver can be done in municipal hospitals, not to mention provincial hospitals, but Zhang Fan has to do it himself when people pay a flying knife fee.

When Zhang Fan entered the operating room, the patient lay quietly on the operating bed with his upper body naked and a catheter inserted below. The rich or ordinary people, lying on the operating bed, are not afraid. Zhang Fan has never seen it.

The patient has not been anesthetized yet. After seeing Zhang Fan enter the operating room, the patient forced his face to show a smile. He hasn't spoken yet. He just wanted to speak. As a result, the anesthesiologist gave the drug. The patient was numbed and turned over in an instant, his tongue and eyes.

After the patient was arranged by the anesthesiologist, he disinfected and paved the surgical hole towel. At the beginning, Zhang Fan washed his hands and entered the operating room. The nurse quickly smiled and put on surgical clothes for Zhang Fan.

As the nurse tied the belt of clothes behind Zhang Fan, Zhang Fan stood beside the instrument nurse's operation vehicle, wearing gloves. And my mind is full of all kinds of tests of patients.

The results of imaging, such as CT, MRI and pet, suggest that the liver tumor is benign, and even the tumor markers in the laboratory suggest that the patient's tumor is benign, but the results of these examinations can only be used for reference, not as a diagnosis.

What is the gold standard for tumor diagnosis? It is to cut it down for pathology. Before there is no pathology, the diagnosis of patients is a question mark, that is, an uncertain diagnosis.

Therefore, during the operation, it is necessary to reserve the operation space for deterioration according to the standard of nausea and tumor. In surgery, there is a very classic saying: God is unwilling to correct a wrong incision.

When the hand rises and falls, there is no way back, and there is no way back for the doctor to repent. Therefore, when a doctor raises his knife, he must have a clear mind, which has been trained from easy to difficult and from small to large for many years.

The patient is ready for the operation. The head is high and the feet are low. Venous catheters have been implanted in both arms. Antibiotics are input on one side and energy is input on the other. In fact, these two channels are reserved for blood transfusion in case of accident during the operation.

Incision, Zhang Fan chose the subcostal incision. Many doctors like the median incision, which is the incision from the xiphoid process to the navel. It has many advantages, because the knife edge is in the middle, and the operation plan can be adjusted at any time due to the condition. There are many disadvantages. The biggest disadvantage is too much damage.

For benign liver tumor surgery, it's too simple for Zhang Fan. Most of the slightly famous instruments in the operating room are matte, and the only thing that can reflect light is the blade of the scalpel.

When a little cold light reflected from the tip of the knife, Zhang Fan began. The skin is like tofu, which is gently drawn in a big arc by Zhang Fan.

Separate the muscles, open the peritoneum, and click with the sound of surgical bending forceps! Click! With the sound of click, Zhang Fan opened a big hole in his abdomen, and the liver was exposed in front of the doctors.

Liver, liver with benign tumor, is very strange. Normal liver is like an irregular shaped blood tofu, flat and tender.

The liver of the wine boss is different. The painting style of his liver with benign tumors is completely different, like the liver with muscles, like digging a piece of meat from a Belgian blue cow.

Although it doesn't look as uncomfortable as malignant tumors, it's not as lovely as a normal liver.

Normal liver is just like little Zhengtai, which makes people feel pity or closeness.

The liver with benign tumors is like a giant stone Johnson. I can't wait to take a needle to let the air out of his body.

"It looks benign." Zhang Fan looked at the bumps on the surface of the liver and said to the two directors of the operation. Without waiting for their reply, Zhang Fan began to probe into the patient's body with both hands.

This is a necessary step in tumor surgery. No matter benign or malignant, the surgeon must make a diagnosis of the organs around the patient's liver with his own hands.

This action is like the action of shuffling cards with both hands after playing mahjong. Zhang fanshuang touched the organs around the liver and found no abnormality.

Then he said to the itinerant nurse, "electric knife!"

"Electric knife?"

The itinerant nurse looked at Zhang Fan and two directors of hepatobiliary surgery. The girl accompanied the doctors of hepatobiliary surgery on many operations for this benign tumor. None of them used an electric knife. They were separated by hand.

Before Zhang Fan didn't want to get through, this kind of operation will also be separated with his bare hands. However, since Zhang Fan wanted to get through, it can be said that there are moves but no moves. How to reduce the damage, how to come, how fast and how to come.

"To Zhang Yuan!" The director of the Fifth Department of liver and gallbladder was in a hurry. Seeing that the nurse hesitated a little, he said in a hurry.

"Hehe, it's all right. Give it to me." Zhang Fan smiled. The little nurse was helpless and handed the electric knife to Zhang Fan.

Then, I saw a faint smoke rising, the electric knife flying in Zhang Fan's hand, and there was no blood in the liver tumor.

"Beautiful!" The director of the second hepatobiliary Department couldn't help saying.

Chapter 497

Bare handed peeling is like peeling the film on the surface of cooked egg shell and protein. This layer of skin of some eggs is very difficult to peel. If it is still a hot egg, it is even harder to peel.

Single Wang's hands are fast, but he has no skills. This kind of egg can't be seen after peeling. The protein is almost finished, leaving the egg yolk. As like as two peas egg, the liver benign tumor is stripped.

Fast, peeling is not clean, slow, and the operation time becomes longer, which will increase the probability of infection. When you're strong, you either break the tumor or hurt the liver.

This kind of operation is not difficult, but it is very trivial. The tumor must be stripped clean. This thing leaves something that is born again by wild fire. Maybe it will become cancerous after the second recurrence.

Therefore, a doctor with a good operation must have a rhythm to peel this thing, just like an old driver stripping beautiful women's clothes, otherwise it is very boring. It can be imagined that for a fist sized egg, how many times do you have to use tweezers to clean the skin on the egg surface with tweezers? Anxious people may throw away all the eggs.

Zhang Fan is such a rhythmic doctor. He can't play Shaohua or your little egg! Holding the egg in one hand and the electric knife in the other hand, gently insert the middle finger of the electric knife into the gap between the liver and the tumor.

Gently insert it, then gently shake it left and right, and then pull it out. Around the oval tumor, Zhang Fan's middle finger goes in and out. The blood supply of the liver is very rich, and the blood supply of the liver, whether benign or malignant tumors, is more abundant.

Their blood vessels, like spider webs, derive countless small blood vessels from the liver and enter the tumor. Zhang Fan's white fingers entered their gaps and came out with blood.

Then press the tumor slightly towards the other side to expose the bleeding place. Directly use an electric knife to directly enter the bleeding point. Gently, Zi! As soon as the smoke comes out, it's over and continue.

Light water, hold the electric knife in a steady hand, and accurately electrocoagulate in a small space. No more, no less. I can't even see the scar of electrocoagulation.

It's so accurate that the director of hepatobiliary surgery can't praise it. In a network language: your uncle is still your uncle, although young.

In the smoke, the tumor was slowly dug away from the liver. When Zhang Fan cut off the last adhesion with an electric knife, the benign tumor of the liver was completely cut off by Zhang Fan.

This thing is like a big boiled egg. It's a little tough to pinch. I feel like I can squeeze out the water inside. How to say, it's a bit like a steamed bread made of superior flour. Pinch it and let it go. It can definitely bounce back.

"Knife!" Zhang Fan took this thing in his hand, far away from the incision area of the patient, Zhang Fan said to the nurse.

During the doctor's operation, the instrument nurse is not idle. She should know what instruments the doctor needs next, put them at hand and be ready to deliver them at any time.

When the doctor doesn't want the instruments, she wants to wipe the instruments stained with blood. There are hundreds of instruments. She must get them at the first time. This is all tempered.

Zhang Fan took the scalpel, put the cut tumor into the curved plate and cut it directly with a knife. Just like cutting watermelon, he cut the egg into four pieces.

"Look, there's no problem with the tissue in the tumor."

"Yes, Zhang Yuan. It's normal inside. It's not rotten."

All three assistants stretched their necks for a look. Malignant tumors grow too fast and too fierce. Generally, the cells in egg size malignant tumors can't pass in because of nutrition, so they are absolutely rotten, just like a rotten corpse starved to death. This is why patients with malignant tumors are prone to high fever infection.

Benign tumors do not. The organizations inside and outside are the same.

What is the benign tumor cut? In fact, it is very similar to durian. It is tender and water. However, because of the existence of blood vessels, the color is red with white, or just like brain flowers.

"Let the family have a look, and then take a quick medical examination."

"OK." After receiving the tissue belt, the itinerant nurse went out with a bloody tumor.

After a while, the medical examination report is benign.

Close your stomach.

Closing the abdomen, the last step of the operation, is also a tangled step, because the operation is about to be completed. If there is anything to do during the operation, the chief surgeon will be nervous.

Before that, the doctor must go through the operation in his mind. Are you satisfied with hemostasis?

Has the source of the disease been completely controlled? Is it clean? Has the anastomosis been handled? Will internal hernia occur! Is the drainage tube in place? Do you need any special leakage.

These issues must be clear. Otherwise, wait for entanglement, so doctors should not only concentrate on the operation, but also remember the operation steps clearly.

There is a proverb in general surgery: after the abdominal cavity is opened, the initiative is in your hand. You can do whatever you want, and the operation can be bigger or smaller; After abdominal suture, the initiative is in its hands. You have to look at its face. For example, you have to deal with abdominal distention, lower blood pressure in the middle of the night, and you have to come from home.

Zhang Fan quickly went through the operation steps in his mind and began to close his abdomen.

After the two operations in the morning, Zhang Fan was a little tired. One more operation will not only increase the workload of more than one hour, but also double the energy of the doctor.

After the operation, Zhang Fan reluctantly ate a few mouthfuls of rice. There was another operation in the afternoon. After eating, Zhang Fan quickly lay on the ground of the operating room. He had to squint for a while, and it didn't take long. As long as he had more than ten minutes, his energy would be different.

Just as Zhang Fan was undergoing surgery in the Affiliated Hospital, a private plane from Almaty flew directly to niaoshi airport. The leadership level of the pick-up was not low. The big leader of bird City oil and an official of the Chinese Ministry of foreign affairs appeared at the airport.

When Zhang Fan entered the operating room, he ignored Shaohua. After Zhang Fan left in the morning, Shaohua was almost late. He fell asleep too late last night. As a result, the sun was in mid air. The girl hurriedly put on her clothes and went to the meeting.

In the afternoon, Zhang Fan asked the director of the second Department of hepatobiliary surgery first. As a result, the director of the second Department of hepatobiliary surgery didn't do it. A thousand times is better than one side.

He saw that Zhang Fan's operation seemed very easy and simple. He felt that he was almost the same. As a result, when he was in the middle of the tumor, he was a little timid.

No doctor will be brave in surgery. This time he is stuck in this place, so he can only continue to observe and figure out. Maybe he can cross this barrier by watching more than a dozen more. It is estimated that it will take some time when he can really operate independently.

After Zhang Fan took the position of the main knife, he went on with the operation. As soon as Zhang Fan started the operation, it was different immediately. When the director of the second hepatobiliary Department performed the operation, he was like a three-year-old child holding a tripod.

He didn't know whether he was afraid or not. Anyway, the onlookers were afraid and trembling, and Zhang Fan's operation was like an art, which could make people give a pleasant praise!

"Well, it's delicious." In the afternoon, after the meeting, Shaohua ate the cake and waited for Zhang Fan in the cake shop near the affiliated hospital.

Frontier cake shop, the most famous cake shop, the grapes are ripe!

Chapter 498

The farther away from the grassland, the worse the quality of dairy products is. The dairy products in the bird market are not as good as tea. Tea yogurt is not famous, because it is not long in summer and ferments when it is out of the cold storage for a day.

When the weather is hot, Zhang Fan likes to drink tea vegetarian yogurt. He comes out of the cold storage and takes a cold and beautiful bite. It is slightly sour and sweet, and can directly cool from head to foot.

The cake made of local milk has an indescribable taste. Although the shape is single, it can be better than the mellow taste. Especially the milk cake made by ethnic minorities at home is mellow but not greasy.

The special wooden barrel is pounded with a wooden mallet for several hours to separate the butter. There is no drop of water for the dough. It is all made of skimmed milk and baked bread. It smells like wheat mixed with milk.

The round skin is slightly scorched hot bread, covered with a layer of butter. People who like to eat sweet, coupled with the frontier specialty sour plum sauce, my God, people in big cities can't enjoy that taste at all.

When Zhang fan used to go to school, he never paid attention to eating. Just eat enough. It's better to have meat. After falling in love at work, his mouth began to pick up.

Cakes are rarely eaten, but Shaohua likes to eat, especially chocolate cakes. When the grapes are ripe, Shao Hua is eating the dark chocolate cake while waiting for Zhang Fan to call.

Meetings in which leaders do not attend are like herding sheep. After the projector releases the information, the people who sign start to leave one after another.

"Why don't you call!" Shao Hua looks at her mobile phone and finally comes to the capital. She wants to go to the mall with Zhang Fan. Although she doesn't have any necessities to buy, she doesn't come to the capital for nothing if she doesn't go shopping.

After Zhang Fan took over the operation, the speed was raised“ Here, there are large vessels. You must be careful and pay attention when stripping. "

Zhang Fan told the two directors what they needed to pay attention to and demonstrated at the bottom of his hand.

Quantitative change has achieved mastery after qualitative change. On the one hand, Zhang Fan has really become a great success in liver surgery. After the operation, Zhang Fan went to the surgical ICU to see the patient of the current operation.

The drainage tubes were unobstructed and there was no fever“ Pay attention to the amount of fluid in the drainage bag tomorrow morning. Don't pull it out too early. Pay attention to the patient's hemoglobin and try not to transfuse blood if it is not necessary. " Zhang Fan saw the patient and made a postoperative explanation to the two directors.

Three points of treatment and seven points of care are not exaggerated at all. In particular, Zhang Fan's flying knife operation can't make rounds every day, so he can only explain the matters needing attention.

Fortunately, the two directors also need to learn from Zhang Fan about liver tumor surgery.

After the ward round, when Zhang Fan was ready to leave, the family members of the wine boss were waiting for Zhang Fan outside the ward.

"Director Zhang, please. How about my Lao Li's operation? "

"Not bad. The patient is sober. If he observes for another day tomorrow, he can be transferred to the general ward." Zhang Fan explained with a smile.

"Thank you. Thank you so much." Then he handed Zhang Fan a bag. Of course, the family followed a secretary or driver and also took two bags to another doctor.

"These are two bottles of red wine in our company's commemorative edition. They are not sold on the

market and are not worth much money. Director Zhang, please take them back and have a taste." The family smiled and said.

Chinese enterprises don't know about their products, but this kind of gift non-sale product is very good. The gift given by soy sauce manufacturers to valuable guests is two bottles of soy sauce with high-grade packaging. There is a golden pen in the middle of the soy sauce, which is unique in ingenuity.

Zhang Fan couldn't figure out whether there was any special intention in it, so he didn't want to take it. As a result, several other doctors had accepted it with a smile. While Zhang Fan was struggling, the head nurse in the operating room ran out.

"Zhang Yuan, two directors, the president's phone." The head nurse probably ran all the way, panting at Zhang Fan and two directors of hepatobiliary surgery.

"What's the matter?" Zhang Fan wondered that the provincial third-class hospital would never come to him for rescuing the patient. The provincial hospital also has a brand.

"I don't know. I just called to ask if the operation is over. If it's over, let's go to the hospital office quickly."

"Then go!" With that, Zhang Fan thanked his family and left quickly without taking anything. The other two directors were embarrassed. They went to see the Dean with gifts. Isn't that meat itching for a whip!

Before Zhang Fan knocked on the door of the dean's office, the dean of the Affiliated Hospital opened the door of the office, "listen to the voice, you're here, come in."

Is the dean of a provincial hospital a doorman? No, there must be something, so Zhang Fan really wondered. Entering the office, there were several people sitting on the reception sofa. When they saw Zhang Fan coming in, they also stood up.

There are several Zhang Fan, who is the director of the liver and gallbladder departments of the affiliated hospital.

"Come, come, Zhang Yuan, let me introduce you. This is the boss of Frontier oil and the Vice Minister of XX Department. Everyone else knows, so I won't introduce it. Ha ha. " While introducing, the president said to two strangers: "this is an expert in liver and gallbladder, Zhang Fan, president Zhang of tea vegetable city hospital."

"Hello!"

"Hello!" Zhang Fan shook hands with two fat middle-aged men and nodded with several other directors. The directors of hepatobiliary section 2 and hepatobiliary section 5 also came in, but the Dean didn't make a special introduction.

"Come on. Zhang Yuan sat down first and had a rest. " After Zhang Fan sat down, someone poured Zhang Fan a cup of tea.

"Thank you!" Zhang Fan took the water cup and put it on the table. He heard the president of the affiliated hospital say, "Zhang hospital, there is such a special thing now. Let the two leaders tell you. "

Zhang Fan nodded and didn't speak.

"Zhang Yuan, it's like this. One of our partners now needs a top hepatobiliary expert for surgery. They begged us.

The superior leaders attached great importance to it. Originally, we wanted to invite experts from the capital, but someone recommended you to us. You are already a top expert in the field of liver and gallbladder, and some are our own experts in the frontier. Here are the results of the patient's examination. Take a look. "

In fact, the boss of Dahua recommended Zhang Fan. His father went out of the hospital last week. He had a reexamination before leaving the hospital and recovered well.

He was worried and went to the capital again. There was little difference between the inspection in the capital and the inspection in the frontier. At that time, the expert who examined his father was a professor of the golden mean. At that time, he said, "this kind of operation may not be able to achieve such a degree even here."

Boss Dahua put his heart into his stomach as soon as he heard it. Although Dahua's main business is not petrochemical, it is also involved. So after learning about it, he recommended Zhang Fan to his superior leaders for the first time.

When he learned that Zhang Fan was in the Affiliated Hospital, the boss of petroleum came directly to the affiliated hospital to find Zhang Fan with the leaders of the government.

The president of the Affiliated Hospital originally wanted to stop the operation. The leaders attached so much importance to it. As long as it was done, wouldn't it be a good thing to show his face.

Therefore, all hepatobiliary directors at home in the affiliated hospital were called to the office. As a result, several directors didn't make a sound after seeing the inspection.

Chapter 499

China's medical treatment, which is said to be among the top in the world, is a bit boastful. However, after 2000 years, it has developed rapidly, especially after 2008. In the field of high-end medical

treatment, it is like taking stimulants and suddenly starting to overtake in the corner.

At the current level, some high-end medical technologies are also very powerful. In particular, some genetic engineering is not much different from the countries across the sea.

A chicken dies and a chicken crows. As the northern powers become less and less successful, the countries around China are more and more dependent on China. The port of tea is not about the overwhelming small commodities in Jiangsu and Zhejiang, temperate clothing and magic cosmetics.

Just one bird market pharmaceutical factory has made a fortune. Their drugs are sold to the mainland. They can't compete with mainland pharmaceutical enterprises, but they can sell to neighboring countries, which is still very fierce.

Cars of drugs at the port were sold to neighboring countries. Moreover, qualified people in neighboring countries have abandoned the big northern countries, and generally choose China for consumption and medical treatment.

Moreover, with the improvement of national development, the consumption of oil and natural gas in surrounding countries is also increasing. Although many regions of neighboring countries are nominally the land of a country, they are actually the territory of some tribes and tribes, and the local government may not speak well.

China needs their natural gas and oil as much as they have, and their wealth explodes like a balloon.

In the past, horse herders stopped riding and drove horse herders to herd sheep. The heads of various local tribes were even more powerful. But money belongs to money. It's not a big problem to see minor diseases, but there's no way to deal with a slightly more serious disease.

This time, the head of a tribe near the border between China and the other two countries was ill. In their early years, this place was poor and evil in Chinese.

The altitude is high and the climate is cold. I can't sleep without holding a lamb in my tent at night. Moreover, the folk custom is fierce. They go (a) private and sell (a) drugs. Anyway, the American and Soviet weapons left over from history are enough for them to live.

With the rapid rise of China, the Chinese exploration team found a lot of natural gas and some scarce non-ferrous metals in this place.

Then, China became polite. It used to speak with the armed police, but now it speaks in RMB. As a result, RMB still has great face and good effect.

Over the past ten years, they have become more and more confident in China. This time, the head was ill, and people directly asked China's oil companies.

The oil companies in the frontier are eager for them to come to the door. They originally wanted the leader to come to China for medical treatment, but because of some factors, the patients could not leave their residential areas.

If the other party can't come, send someone anywhere.

Zhang Fan received the patient's examination results handed over by the other party. The liver center tumor "The tumor is not small!" Zhang Fan stared at MRI and CT and said.

"Zhang Yuan, are you sure about this operation? The other party is our important customer. If you are not sure, you'd better..." The boss of Frontier oil looked at Zhang Fan and spoke.

To tell the truth, when Zhang Fan entered the office, he was a little worried. He had no hope for such a young doctor. This customer is too important. Hundreds of millions of basic projects have been poured out because

The tone of the other party is neither polite nor polite, but it is slightly skeptical. Zhang Fan didn't care. He took MRI and CT in his hand and looked at the title of the examination film. It wasn't English.

"I can't promise anything without seeing the patient. I can only say that I have done this kind of operation, and it is a complete resection. The patient recovered well after operation. There is no recurrence or metastasis." Zhang Fan made it clear that I have experience in this kind of operation.

"I'm a layman. Don't worry about some words. This customer is very important. Have you done several such operations and are you sure there's no problem..." what's inside and outside is distrust.

"Not necessarily. It's a tumor operation, not an appendix operation. No one is sure whether it will transfer after operation. What I can do is to do it as clean as possible. As for others, I'm sorry, I can't guarantee it!"

Zhang Fan is a little unhappy. You don't trust me, but don't condescend. As a doctor, Zhang Fan patiently explained a few words.

In the teaching books, doctors are required to speak in this way, which can not lead to ambiguity between patients or family members in certain language. Really, medical care is not another industry.

Even if the appendix is operated on, there are many accidents. If a doctor patted his chest and said that the operation was absolutely sure, would you like it? If the doctor drank too much, he would be a liar with two knives.

Listening to Zhang Fan's words, the boss of Frontier oil was a little angry. Even the president of the affiliated hospital was very polite to him. He felt that Zhang Fan didn't respect him very much. He used appendicitis as an example, as if he was ignorant.

"Dr. Zhang, you should pay attention to it. The customer said that being bigger is very important to the country. Every word you say now is responsible. "

As soon as this was said, all the doctors present began to frown, including Zhang Fan.

"Sorry, I'm not sure! Sorry, I'm a little tired after a day's operation. I'm going to have a rest. " With that, Zhang Fan got up, nodded to the president and several directors of the Affiliated Hospital and left.

"This! This! " Maybe the boss of the oil company paid too much attention to this customer. He left when he saw Zhang Fan slapping his ass, and his face was blue. If he were an employee, he would have blown his hair long ago.

"Mr. Wang, calm down, calm down. In fact, Zhang Yuan is right. " The president of the Affiliated Hospital smiled and advised the green faced president Wang.

"Why? It's called irresponsibility. Is that what the doctor said? He can't even say how sure he is. I think his level is just like this! I'm not good at it. I have a good temper! " I don't think he has much contact with doctors in the hospital.

"Hehe, let me be impartial. In fact, this operation is similar to your drilling for oil. If you go down with a drill, you may be able to produce oil or not. Even if you see a patient, no doctor can guarantee that there is no problem with the operation. " The president of the Affiliated Hospital said it to the point.

"Hum! He has a problem with his attitude. " After listening to the president of the Affiliated Hospital, President Wang's face improved a little, but he was still not very happy. When he arrived at this position, even if he went to tea, the leaders of tea city should politely call him president Wang, but the little doctor said that if he didn't give face, he wouldn't give face. It's too much!

Zhang Fan was really tired after a day's operation. He was tired and impatient. Moreover, Wang was always a little aggressive. It was important to open his mouth and shut up. He didn't speculate. Zhang Fan didn't want to entangle more. After all, he is only a young man in his early twenties, and he has a system. It's false to have no temper.

Out of the office, he didn't go to his heart“ Zhang Yuan, Zhang Yuan! Don't be angry. I'll see you there. " The director of the second hepatobiliary Department saw Zhang Fan leave. He didn't stay much and

hurried out of the office. Then the director of the fifth hepatobiliary Department followed.

"It's okay. I'm not angry. You've been tired all day. Don't worry about me. I'll call my girlfriend and I'll take a taxi." Zhang Fan doesn't mean to trouble others.

"I'll give you a foot on the accelerator." How can the director of the second hepatobiliary department let Zhang Fan take a taxi? Moreover, he must send such a bad thing again.

Zhang Fan has no choice but to contact Shaohua first.

"Shao Hua, where are you?"

"I'm in the cake shop next to the hospital. What do you want to eat at night? I'm almost full!"

"Oh, well, I'll come to you." Zhang Fan hung up the phone and said to the two directors, "thank you. Don't send me. My girlfriend is in the cake shop next door. Don't bother the two directors. I can walk over. It's really..."

Before Zhang Fan finished, the phone rang again. Zhang Fan picked it up and had a look.

The phone shows: President Ouyang!

Chapter 500

"Dean!" After Zhang fan connected the phone, he nodded to the two directors, and then answered the phone while walking.

"Have you eaten yet? Have you finished all the operations today?" Ouyang asked Zhang Fan with a smile on the other end of the phone.

"Hi! Dean, did someone say something to you. Just say "take it." After Zhang Fan became the assistant to the president, Ouyang spoke more and more softly to Zhang Fan. If it had been before, Ouyang would have asked directly.

"Hehe, someone complained that the doctors in our hospital have a bad temper. What's going on?" Ouyang didn't say everything about the other party. The other party's original words were that Zhang Fan had no organization, discipline and education! But Ouyang didn't take it to heart. No matter how big the oil company is, it can't control her.

However, Ouyang still needs to ask clearly. After all, the volume of the other party is too large, and the leader of the health system is the leader.

"It's like this... He insisted on my promise. What he clearly didn't trust me. I didn't have anything, so he stood up and left the office." Zhang Fan told Ouyang exactly what happened.

"Oh, that's right. It's OK. They can do whatever they like. If there is such a thing in the future, you think it's difficult to deal with it, you can directly push it to the hospital. All right, no more. I have to watch TV dramas. " As soon as Ouyang heard the story, he didn't take it back.

Zhang Fan listened to the old lady's warm phone and felt really good, just like a warm current.

Zhang Fan left, and the boss of the oil company directly complained to the leaders of the medical system around him. China's medical system is quite special. For example, doctors are not directly managed by the government's health system.

The government's health system is mainly the power of supervision, but it has no direct management power. Therefore, people gave Ouyang's phone to the boss of the oil company through the tea hygiene system.

The boss of the oil company despised the vice minister, "when you are Mao's official, you can't even help a little doctor." Get through to Ouyang. Who is Ouyang? The old lady said nonsense and hung up.

Although President Wang sued, the problem was not solved. The directors of the affiliated hospital here were still very enthusiastic. As a result, the official was too bureaucratic and left one or two. It's just the president of the hospital.

"I don't believe it. Go to the capital!" With that, the boss also shook hands and left. The leader of the health system looked at the president of the Affiliated Hospital and smiled bitterly at each other.

The doctrine of the mean, the army 3xx, and even their own hospital of the oil system.

"This kind of operation is too risky! Conservative treatment! " The average expert is not Zhang Fan. People are so busy that they are disturbed at the weekend. They don't have a good face to give to the boss of the oil company. In a few words, they send off the boss of the oil company.

"President Wang, this operation is difficult, really difficult." In the hospital of the petroleum system, President Wang finally got some corresponding treatment. He was angry all the way.

"No one in the capital can do it?" Wang always doesn't believe it.

"This operation, according to the way of experts sent by the north, is interventional embolization without complete resection." The president of the petroleum system hospital said after some deliberation.

"Don't give me the whole technical term, you just say, can interventional embolization completely cure this disease! ~"

"Er!" President Wang's words really stopped the dean.

Liver tumor intervention, in fact, is to block the blood vessels around the tumor with drugs when there is no way to operate. It can not be completely cured, but it can delay the patient's life.

"Some experts from the south school have done it, but I haven't heard of it in recent years."

"Which hospital."

"The president of magic capital foreign hospital has done it!" The man pointed directly to the magic capital.

"Please contact me!" Mr. Wang didn't want to run away. He also saw that he was nothing in the eyes of other experts.

"Dean Wu, ha ha, excuse me, excuse me. I'm Lao Chen from the capital XX Hospital. We talked at the last meeting. " It seems that the other party remembered.

The Dean here immediately smiled like a flower. The top three hospitals in the capital and magic capital are also divided into 369. Foreign hospitals can enter the top three in magic capital, especially in hepatobiliary department.

Because Lao Wu is a disciple of the ancestral sect, now in surgery books, many hepatobiliary operations were invented by Qiu Lao. The hospitals in the petroleum system used to be very powerful, but these years are the new year of Wang Xiaor.

"Well, we have a patient here..." the dean said the patient's situation again, and then asked his subordinates to take photos of the examination and send it by e-mail.

"Wait and see what the other party says."

"It's still a reliable doctor in the capital and magic capital!" Mr. Wang didn't know if he was stimulated

by something. He even said such a sentence.

"Ha ha!"

Not long after waiting, President Wu of the Foreign Affairs Hospital of mordu called.

"Oh! I know, I know. oh got it. Thank you. I'm sorry to disturb you at the weekend! "

After hanging up, the president of the petroleum system hospital wondered and looked at President Wang.

"What do you say?" President Wang raised his body and asked.

"President Wu said that he was too old to perform this kind of operation. He said his last such operation was five years ago. "

"Isn't there a younger doctor? No other doctor can do it? Isn't that bullshit? " President Wang's hair stood up angrily.

"This kind of operation is too difficult. There are few that can be done in the world. Why should beipai intervene..."

"All right, why do you say that?" President Wang waved impatiently.

"However, President Wu said that he has a younger martial brother who is now doing this operation, but he can't guarantee that the other party will be able to do it." Lao Wu just heard from Lu Ning, but he didn't see it personally, and he didn't say it for sure.

"Yes! What hospital is his younger martial brother in? It can't be abroad! " President Wang's eyes lit up.

"It's not abroad. He said his younger martial brother was in Frontier Province!"

"Frontier Province? What's your name? " Wang always felt bad. There was a dark wind coming!

"Zhang Fan! Yes, it's Zhang Fan. It's easy to remember! " The president of the oil system confirmed.

"Zhang Fan? Zhang Fan of tea vegetable? "

"Yes, yes, that's Zhang Fan of tea. You know! "

"I know something!" Mr. Wang lay on the sofa, pinching the bridge of his nose and stopped talking“
Damn it, after a big turn, it turned to the boy again! "

By region, the main battlefield of the oil system is in the north, including the northwest, and the south is

the territory of the petrochemical system. But the two systems are also secretly holding their strength.

Here, the resources on the leader's territory are split in half by the petrochemical company and the oil company. President Wang has been the boss in the frontier for several years and can't go up. This is an opportunity, so he attaches great importance to it.

"What to do!" Mr. Wang thought with the bridge of his nose.

And Zhang Fan, this meeting has long forgotten this. Ouyang didn't say anything. What does he care about.

"Well, this dress is good."

"Let me buy you a hat! But your head is too big to look good in a hat! "

Looking at Shao Hua's cheerful appearance, Zhang Fan doesn't feel tired. They held hands and happily spent their short weekend.
