

Chapter 4940

According to the method recorded in the “Nine Profound Heavenly Scriptures”.

The phoenix bone vine is like nuclear fuel.

Once activated, the medicinal properties rapidly increase, so almost in an instant,

The powerful medicinal power surged out from it.

Charlie immediately wrapped the powerful medicinal properties together with the prepared medicinal materials with aura.

Immediately afterward, the phoenix vine, which was activated by the spiritual energy,

Completely penetrated its medicinal properties into all the medicinal materials like magma.

Just like nuclear radiation, these medicinal materials are also undergoing,

Earth-shaking transformation under the action of Phoenix vine.

It can be said that all the medicinal materials in front of Charlie have completed a certain degree of mutation at this moment,

And the medicinal properties have also undergone a reborn evolution under the dual action of Phoenix vine and aura.

What surprised Charlie most was that when the phoenix vine was activated,

Its powerful medicinal properties quickly formed an unimaginable law of operation in the aura wrapped in it.

It is like a gaseous planet, constantly rotating, expanding, and collapsing towards the center under the action of aura.

And when it spins faster and faster, it is like a super powerful centrifugal pump,

Frantically extracting spiritual energy from Charlie's body.

Originally, Charlie controlled the output speed of the aura himself,

But he soon discovered that the speed of the aura output was no longer within his control,

And it soon changed from active output to being extracted.

It didn't take long for the spiritual energy in his body to be drawn away,

And the vortex, which was spinning as fast as a gaseous planet, began to rotate faster and faster,

And the degree of collapse inward became more and more terrifying.

The man quickly collapsed from a large ball with a diameter of more than one meter to the size of a football.

However, its density has grown exponentially at an exponential rate.

Charlie felt that his spiritual energy was soon showing signs of being unsustainable,

So he grabbed a Cultivation Pill without thinking, and immediately stuffed it into his mouth.

The surging spiritual energy was just melted from the medicinal pill,

And before it was warm, it was immediately sucked away by the swirling vortex.

He suddenly found that he was a little too optimistic before.

Two Cultivation Pills, it seems won't be able to hold this ghost at all.

So, he didn't dare to wait for the spiritual energy to be consumed,

So he immediately swallowed another Cultivation Pill.

And the speed at which the vortex rotates and collapses is still accelerating.

At this time, it has collapsed from the size of a football just now to the size of a baseball.

However, this thing shows no sign of stopping, and it seems to be turning more and more fierce.

And the aura in Charlie's body soon showed signs of being unstoppable.

At this time, he was already a little horrified.

He never imagined that this thing had such great power,

It was almost equivalent to using a centrifugal pump to draw blood from his body,

How could the blood in his body withstand such a violent pumping?

But now he has opened the bow without turning back the arrow, he can only grit his teeth,

Take out another Cultivation Pills, put it in his mouth, and pray in his heart:

“Don’t let me take another Cultivation Pill... Cultivation Pill is the most useful elixir for me right now.”

“If I lose four or five or more Cultivation Pills just for refining Reshaping Pills,”

“It would be a dream to wake up and cry...”

Charlie thought so, biting his head, and put the third Cultivation Pills into his mouth.

Like the previous two Cultivation Pills,

The spiritual energy of this Cultivation Pill was quickly drawn away, even faster than before.

Charlie felt exhausted, so he gritted his teeth and scolded with difficulty: “Today is really a big loss!”

After that, he took out another Cultivation Pill, intending to swallow it and hold on.

And at this time, the vortex has already accelerated to the extreme.
