

Chapter 5357

When Charlie said that it was difficult to accept it, Mateo felt that his blood was about to bleed dry.

This medicinal cauldron was passed down by the ancestors of Taizhen Dao. For hundreds of thousands of years, dozens of patriarchs of Taizhen Dao have used this medicinal cauldron to make alchemy.

Seeing that the treasure, which has been handed down for thousands of years, was taken away by Charlie, Mateo felt that after his death, he would have no face to see the ancestors who were too virtuous.

But right now he has no room for turning around, this thing has already been in Charlie's hands, he can't beat him, talk to him, or scold him, his whole body is completely crushed in front of Charlie.

Therefore, Mateo's current thinking is that if he can save his life in this situation, it will be considered as the blessing of the patriarch, so how can he have the heart to get back the medicine cauldron?

So, he could only smile and said respectfully: "Master Wade, you just accept it, this medicine cauldron will be yours from now on..."

Charlie nodded, and while untying the cloth pocket, he revealed the ancient clothes inside. The three-legged bronze tripod glanced at Mateo, and said, "You promised yourself. I'm not cheating on you, am I?"

He asked again: "Are you doing it voluntarily?"

Mateo nodded, letting his tears fall on the ground, and kept saying, "It's voluntary, it's voluntary..."

Charlie nodded in satisfaction: "It's voluntary."

Then he took the three-legged medicinal cauldron out of the cloth pocket.

As the three-legged medicinal cauldron was taken out, there was also a faint smell of medicinal materials.

Charlie looked at the cauldron in front of him, and couldn't help but sigh that this thing is indeed very exquisitely made. The shape of the vessel is simple, and the lines are round, which makes him feel pleasing to the eye, and everything is so well-proportioned.

Moreover, the whole body of this thing is shiny and extremely smooth, and it feels very smooth to the touch. Don't know if it's because the material is good, or because Taizhendao and the patriarchs made it well.

However, Charlie didn't think there was anything special about this medicinal cauldron. After all, he had seen a lot of antiques. If you want to say that the ancient copper and bronze wares are more elegant than this medicinal cauldron, it won't be wrong. Those bronze wares known as national treasures are not one in a million.

Just when Charlie thought that this was most likely an ancient souvenir, he subconsciously poured a little spiritual energy into it to test it. This test didn't matter, he just felt the medicine cauldron humming and shaking in his hand!

However, the other people around him did not notice the change in the medicine cauldron.

Immediately afterward, Charlie realized that inside the medicine cauldron, there was an extremely complicated formation, just like his own soul-piercing blade and thunderbolt, all formations were stored in the magic weapon, and the formation was activated by aura method to achieve the effect of the formation.

Charlie didn't know what kind of formation was in this medicine cauldron, but he felt that the rotation speed was astonishingly fast, as if it was especially used to condense some kind of material.

Combined with this thing, it looks like a medicine cauldron for refining medicine, so he immediately came to the conclusion: this should be a special magic weapon for refining medicine with spiritual energy!

At this moment, his heart suddenly surged with excitement.

Before refining medicine, he used spiritual energy to condense medicinal materials directly. The reason why he didn't use any utensils was that the strength of ordinary utensils simply couldn't bear the temperature of spiritual energy when refining medicinal materials for a long time.

Moreover, according to the "Heavenly Scriptures", although the medicine cauldron has no offensive power, it is considered to be relatively difficult in the magic weapon, and the internal formation of the medicine cauldron of this magic weapon level can be the blessing of aura.

The efficacy of medicinal materials can be better refined, and even achieve the effect of sublimation.

In other words, if Charlie takes the materials of the Rejuvenation Pill and refines them with spiritual energy, the result will be an ordinary Rejuvenation Pill, but if he puts the medicinal materials into this medicine cauldron and refines it, the result will be Rejuvenation Pill Plus.

The efficacy of Rejuvenation Pill Plus must be stronger than Rejuvenation Pill, but how much stronger depends on the rank of the medicine tripod itself.

Refining medicine, in some respects, is very similar to iron smelting.

If it's just refining medicine with spiritual energy, it's like the ancients smelting iron. Although high-calorie charcoal is used with a bellow, it can barely reach the temperature required for iron smelting, but because the temperature is not enough, the quality of the smelted iron is below the high temperature of modern industry. In front of the blast furnace, it was still a lot worse.

And this medicine cauldron is equivalent to a blast furnace in modern iron smelting!

The same iron ore, if the most primitive method is used, can only make some swords, but if it is smelted from modern blast furnaces, it can be used to make aircraft, cannons, and even aircraft carriers.

Moreover, to make alchemy with bare hands, you can only refine some low-grade pills. Once you reach the middle and high grades, you must have a medicine cauldron to refine them. Therefore, this thing is also of great significance to Charlie's future development!

At this time, Charlie was naturally very happy.

However, he was also a little curious. This Mateo was just a Taoist priest who practiced martial arts and had no aura at all. How could he use this medicine cauldron to refine medicine?

Thinking of this, Charlie couldn't help asking: "Master Hong, I'm curious to ask you, what do you usually use this thing for?"

Mateo's eyes were fixed on the medicine cauldron, eyes full of reluctance and pain, muttered in his mouth: "I usually use this medicine cauldron to make some decoctions, or elixir for beginners."

"To be more straightforward, how do you use this medicinal cauldron?"

Mateo explained: "It is to add some charcoal fire to the bottom of the cauldron, then pour the medicinal materials and water into it, and boil it with a slow fire...in fact, It's the same as cooking traditional Chinese medicine in a casserole..."

"Using charcoal fire?" Charlie was startled and flipped over the three-legged medicine cauldron, and sure enough, he saw traces of being blackened by charcoal fire at the bottom, and it seemed that it was burned by a charcoal fire.

Smoked roasting is no longer a few years, decades, or maybe even hundreds of years.

Charlie couldn't help thinking in his heart: "Dan it, these stupid Taoist priests of the Taizhen Dao actually use charcoal fire to burn the magic weapon, it's really a waste of nature!"

Thinking of this, he asked again: "Could it be that your patriarchs used this medicinal cauldron with charcoal fire to make alchemy?"

“That’s right.” Mateo said subconsciously: “The medicine cauldron was originally used in this way. If this medicinal material is boiled with fire without adding water, how can there be any other way to refine it into an elixir? Is it possible to use the three flavors mentioned in the myth?” Really hot?”

Charlie couldn’t help laughing.

It seems that Taizhen Dao got this medicinal cauldron by accident, and he didn’t know how to use it at all.

It can also be seen from this that in the thousands of years of Taizhen Dao’s history, there are so many generations of descendants, no one can master the spiritual energy, and it is indeed a bit sad to think about it.

However, Charlie couldn’t help wondering: “Since so many people in Taizhen Dao don’t know the actual usage of this medicinal cauldron, why do they regard this as the treasure of the sect?”

Thinking of this, he deliberately asked Mateo: “What’s the difference between your medicine tripod and the casserole used by ordinary people to cook medicine?”

“You say it looks good, and it’s not very good-looking in bronze. Do you think it has any other cultural value?”

“There is not even a model on it, even if it is old, it can’t be sold at a high price, why do you still treat it as a treasure? Is there any secret in it that outsiders don’t know?”

“This... ..” Mateo didn’t want to say it at first, because, after all, this is a secret that is not passed on by the teacher.
