

Super Rich Dad Chapter 597-598

Chapter 597

Jiang Hao smiled after hearing this, so he got up and picked up his luggage and spoke, 'Since it's fine, I'll go and find a place to settle down and wait for your news.'

Dean Jiao nodded at Jiang Hao and was about to get up when he did. The phone next to the table suddenly rang.

Jiang Hao looked at the phone and couldn't help but faintly stare at it, while Dean Jiao gave him a slightly embarrassed look on his face.

Then he picked up the phone and said in a deep voice: 'Is something wrong, why are you suddenly calling me here?'

A female voice on the phone suddenly spoke anxiously, 'A patient has suddenly been brought in downstairs. It's an emergency and I need you to come down and take a look!'

Hearing these words, Dean Jiao glanced at Jiang Hao with some difficulty. After a moment's contemplation, he said back, 'Well, I'll come down.'

After hanging up the phone, Dean Jiao smiled at Jiang Hao and said, 'A patient has been delivered downstairs, it looks like there is some trouble, do you want to go with me?'

The reason he said this was also to test out what kind of standard Jiang Hao was through this opportunity.

To know that his Northern Chinese Hospital wasn't just some small family where anyone could come in!

Jiang Hao looked at Dean Jiao and smiled slightly before speaking, 'Since Dean Jiao has invited me, then I will accompany you to take a look.'

After taking a look at the expression on Dean Jiao's face, Jiang Hao knew that he just wanted to test himself on this patient.

There might not be much about other medical arts in Shangdian, but there was a detailed introduction to the profound Chinese medicine.

After so long. He also had a certain degree of proficiency.

So when faced with President Jiao's invitation, Jiang Hao did not have any fear in his heart, but rather a touch of excitement.

After the two of them went downstairs together, a nurse was waiting anxiously by the stairs.

Seeing Dean Jiao coming down with Jiang Hao, who had just come for an interview, he froze slightly and hurriedly came up and said, 'The patient is in the emergency room, with rapid breathing, narrow pupils, convulsions and a little blood in his urine!'

President Jiao frowned at these words, 'Who is in charge of the emergency room today?'

The nurse spoke sharply, 'The one in charge of the emergency room today is Dr. Ren, but he seems to be a bit overwhelmed!'

'What about Dr. Xu, he should be at the hospital today. Has Dr. Xu been notified?'

The nurse nodded slightly before saying, 'Doctor Xu has been notified, he will arrive in three minutes!'

After hearing this reply, Dean Jiao was visibly relieved.

Jiang Hao was walking beside them and noticed that he seemed relieved to hear this Dr. Xu.

So he asked, somewhat puzzled, 'What, is this Dr. Xu very good?'

The nurse looked at Jiang Hao and didn't say anything, while Dean Jiao looked at Jiang Hao with a smile and said, 'You'll know later if he's good or not.'

After saying this, Dean Jiao looked at Jiang Hao and faintly stared at him, then said in a deep voice, 'Xiao Li ah. You go and get a white coat for Dr. Jiang.'

After hearing this, Xiao Li, the nurse at the side, glanced at Jiang Hao with slight confusion.

Then nodded her head. Then she sent the duty room to take out a white coat and handed it to Jiang Hao: 'I can't find a suitable one here for a while, so you can make do with it for now.'

Jiang Hao took the lab coat and nodded, then followed behind Dean Jiao into the emergency room.

Inside, a doctor was somewhat anxiously watching the patient convulsing, and two nurses were giving the patient an injection next to him. And preparing the ventilator!

Dean Jiao frowned and looked at the doctor and spoke, 'Old Ren, what is the patient's condition now, why does it look a bit like epilepsy?'

Dr. Ren suddenly heard the dean's words, so he turned his head and nodded respectfully to the dean before speaking, 'Right now I'm not quite sure what the patient's condition is.'

Speaking of this. He coughed lightly before opening the book and speaking, 'The patient's current physical condition has blood in the urine, convulsions, narrow pupils, no trauma to the body, and epilepsy is ruled out!'

Dean Jiao frowned at this, 'Could it be epilepsy and the blood in the urine is a complication?'

Dr. Ren wiped a handful of cold sweat from his forehead, 'I'm not sure about that, let's wait until Dr. Xu arrives, I'll stabilize the patient for now!'

After a slight hesitation. Dr. Ren looked at the nurse who was giving the injection and continued, 'After this injection, give the patient another 20g of sedative!'

The nurse turned her head and looked at Dr. Ren with some hesitation, but in the end she did not say anything and did as she was told.

The three of them watched as the patient gradually calmed down. Dean Jiao and Dr. Ren were obviously relieved.

However, Jiang Hao was a bit hesitant, as the patient's situation seemed to be a bit complicated. It wasn't as simple as it looked!

As he was pondering, a male voice suddenly rang out beside him, 'Dean. Doctor Ren, I'm here.'

Dean Jiao hurriedly turned his head and said, 'Old Xu, hurry up and see what this patient's condition is!'

Jiang Hao couldn't help but turn his head to look at the person who came, only to see a man with gold-rimmed glasses and an elegant appearance walking in.

As he passed by Jiang Hao, the other man also spoke with some confusion, 'Who is this?'

At this moment, Dr. Ren also noticed Jiang Hao and said, 'Yes, I didn't even notice it just now, who is this?'

President Jiao reached out and waved his hand, 'This is the one who came to our hospital for an interview, it's okay, it's okay, the patient is important now.'

Doctor Xu frowned slightly after hearing Dean Jiao's words, then spoke, 'In that case just stand aside and watch, just as a learning experience.'

Jiang Hao faintly stared at these words, then shook his head and smiled bitterly.

It was his first day at the North Mansion and he was so looked down upon... Forget it, let's see how good these people are.

Jiang Hao concluded that this patient's condition in front of him was definitely not as simple as Dr. Ren had just said!

There must be some other circumstances that had not been discovered, depending on how this Dr. Xu was doing.

If he couldn't find out, then the hospital was no better than that.

Just thinking about this, Jiang Hao suddenly heard Dr. Xu say, 'Hmm? The blood under his eyes is so heavy? Did you do a brain scan on him?'

Hearing this, Dr. Ren hurriedly replied, 'It's simply too late, the patient was in an emergency when he was first brought in, and I've only just calmed him down!'

Dr. Xu frowned and pondered as Dean Jiao spoke cautiously, 'How is it?'

'There's some trouble, I've come across patients like this over at the General Hospital before, it's likely to be a brain problem.'

Saying this he took the sheet in Dr. Ren's hand and looked at it and continued, 'And there are also symptoms of blood in the urine, much more serious than the ones I've encountered before.'

Chapter 598

Hearing this, Dr. Ren couldn't help but blush!

After all, emergency care is only emergency care, and sending it in time only increases the chances of survival.

It doesn't necessarily guarantee that the patient will be saved, as anyone with a little common sense would know.

But the families of the patients don't care about that. They know that the patient died in hospital!

If, as Dr Xu said, the patient could not be saved and died here, he would be held responsible!

'Doctor Xu, you have to save me, do something. Can you do something?'

Dr Xu looked at him and smiled bitterly, 'It's not that there's no way out, I'm just saying it's a bit of a problem.'

After saying this he coughed lightly and said calmly, 'Prepare asparagus. Amber, Antelope's horn, Musk, Chai Hu, Gui Zhi. Acorus calamus, Qing Yang ginseng, etc.'

Doctor Xu slowly named dozens of herbs, and the two nurses behind him patiently noted them down before going to prepare them.

Only after the nurses left did Dr. Ren speak with some hesitation, 'This, isn't this prescription used to treat sheep epilepsy?'

President Jiao also looked at Dr. Xu and nodded slightly, 'The patient is in a critical condition, is it too late for you to have these things prepared?'

Dr. Xu smiled, 'Don't worry. I will naturally have a way to stabilize him, just make sure he won't suffocate!'

As he said this, Dr Xu's face was full of confidence, as if everything was under control.

Looking at him with such confidence, both Dean Jiao and Dr. Ren also put their hearts down.

However, Jiang Hao, who was standing at the side, had a heavy face because he knew that this prescription might not only fail to cure the patient.

It might even kill the patient and hasten his death!

Jiang Hao was not a person who liked to meddle in things, but he was a doctor after all!

Thinking of this he spoke with some embarrassment, 'Doctor Xu. I think there might be some problems with this prescription of yours, right?'

The reason he said that was because he hoped that Dr. Xu would consider the prescription in more detail, he did not mean to question it!

However, when Dr Xu, Dean Jiao and Dr Ren heard his words, they all turned their heads and frowned at Jiang Hao.

Dr. Ren looked at Dr. Xu's face and hurriedly said, 'If you're a newcomer and don't understand, don't say anything, just watch properly!'

After saying this, he continued, 'Our Dr. Xu was a first-class doctor at the General Hospital, and he has met countless cases. How old are you and how dare you start talking nonsense?'

Hearing this, Dr Xu's face eased a little: 'Young man. There are times when you shouldn't speak, so don't speak. I'm already allowing you to be here for the sake of the dean.'

Although his tone was flat, the look of lonely contempt in Dr. Xu's eyes when he said this was very harsh!

Dean Jiao coughed lightly after hearing his words. He reached out and patted Jiang Hao's shoulder.

'You've just arrived, I know you want to perform urgently, but now it's a big matter of human lives, you can't muddle through!'

The way Dean Jiao looked at Jiang Hao as he said these words. It was as if he was looking at a junior who had just arrived and was eager to perform.

But he didn't even expect that what Jiang Hao said was true!

Jiang Hao was slightly stunned at the three men's words, especially the way the dean looked at himself!

This made it a little difficult for Jiang Hao to accept, and just as he was about to speak up.

Just as he was about to speak up, Dr Xu, who was standing at the side, spoke up, 'Dean, I think it's better to clear out the irrelevant people, they're in the way here!'

Dr. Ren also helped, 'That's right, a young man who doesn't know anything has to be here to tell us what to do.'

The cynical tone made Dean Jiao's face look a bit uncomfortable. Along with that, the look he gave Jiang Hao was also a little less friendly.

'Cough cough, that. Xiao Shen, ah, you'd better go out. I'll talk to you after this place is over.'

Jiang Hao gave them a somewhat helpless look and shook his head as he sighed, 'Alright. I'll go out first.'

As soon as the words were said Jiang Hao intended to leave, but she paused when she reached the door.

Then turning to look at the crowd she said, 'Don't blame me if anything bad happens later, as I warned.'

Dr. Xu gave him a cold look, not even wanting to talk to him!

Dr. Ren spoke directly with a gloomy face, 'Get out! Is this a place for you to speak!'

Jiang Hao was too lazy to deal with such people, so he shrugged his shoulders slightly and left.

After Jiang Hao left, Dr. Ren looked at Dean Jiao and said, 'What kind of person is he? He seems to be the best in the world at such a young age.'

When Dean Jiao heard this, he did not say anything, but just looked at Dr. Xu, whose attitude was the most important thing.

Dr Xu methodically took out his needle bag and said while applying needles to the patient, 'Dean, this is not the person you said you were interviewing, is it?'

Dean Jiao nodded when he heard this, 'Well, he just arrived today and originally wanted to try his standard.'

After saying this he couldn't help but sigh, 'But I didn't expect him to be this kind of person.'

Dr Xu laughed coldly after hearing this and said, 'Although our hospital is short of people, not all small cats and puppies can enter!'

He didn't lower his voice when he said this, not to mention the emergency room, the people outside the door could faintly hear it!

Jiang Hao stood in the corridor and brushed his mouth off, he knew exactly what was going on in his heart.

He knew exactly what was going on. If he really followed his prescription and the patient didn't vomit blood, then it would be a real miracle!

A convulsion does not necessarily mean that the patient is having an epileptic fit, it could also mean that he has eaten something.

Blood in the urine doesn't necessarily mean complications, it could be something else!

If you don't rule out anything, you'll just randomly administer the medicine according to the patients you've met before, do you really think that experience is king?

Jiang Hao sat down on a chair and closed his eyes to recuperate, he was also a bit tired after two days on the train.

He was a little tired after two days on the train, so he should take advantage of the opportunity to rest a little now so that he could make his move later.

In the emergency room, two nurses brought the herbs that Dr. Xu needed after decocting them.

Dr. Xu used a syringe to slowly suck it up and then put it into the patient's mouth to inject it slowly.

The patient who had just taken the medicine gradually looked better and his face changed from the original boring purple to a normal colour.

Seeing such a change, Dr. Ren gave Dr. Xu a thumbs up and said, 'Why else would I say that the people at the General Hospital are just high, worthy of our hospital's gold medal!'

Although Dr. Xu was modest, the look of triumph on his face was unmistakable!

President Jiao also reached out and patted Dr. Xu's shoulder and said, 'Not bad, hahaha, just two hands stabilized the man!'

Dr. Xu shook his head and said modestly, 'It's only slightly stabilized now, we still have to study the treatment that will follow.'
