

## Chapter 601

Was treated like a child. A bunch of big guys didn't think much, so they began to discuss it directly.

"Er!" Zhang Fan also made a boring scene. Opinions expressed, well, opinions expressed, that's all. No one pays attention to you!

"Let's go!" Zhang Fan was a little embarrassed and said to Professor Li Cunhou that this place, at this age, can't roll like a three-year-old.

"I can do, I can do, you let me do, you have to believe me!" Let the armed police take you to the mental hospital every minute.

"In fact, there is nothing great outside the brain. Let me tell you, the current level outside the brain, not to mention China, is on the side of Laomei. In fact, most doctors outside the brain do God's work!"

Li Cunhou stopped laughing at Zhang Fan at this time and immediately began to enlighten Zhang Fan.

When Zhang Fan opened the door of the ward, suddenly someone said in the crowd behind him, "wait! Which boy of tea vegetable, wait. "

Zhang Fan looks back and doesn't smile. It turns out that in this world, there is little difference between you laugh and don't laugh. It's useless to be unable to smile into a flower.

Quietly grasp the handle on the door and quietly look at the crowd ten steps away.

"Did you have an operation with me?"

The great director of the golden mean outside God seemed to have some influence when he heard about tea Su and Zhang Fan. However, he has been in contact with too many people during the operation in one year. There are many noble people and things. It's not too much to say.

If it weren't for Zhang Fan's amazing surgical performance, really, he would never think of the young man in this small place.

"Yes, director Liang!" Zhang Fan didn't say much. In fact, people's courage is just a little bit. The old ancestors have finished, work hard and decline again!

After confirming Zhang Fan's identity, director Liang smiled and said to the people around him, especially several academicians: "he is not a general foreigner! Hehe, he did the operation of the Qin family boy, and he took out the bullet stuck in the cervical spine! "

Then he said with certainty again: "he was the main knife at that time. When I arrived with the orthopedic director of Shuitanzi, he had already started the knife. He was brave enough and had strong Kung Fu!"

"Oh! In those years, it was him who did the operation. When did I say that there was such an orthopaedic expert in the northwest who dared to move the medulla oblongata!

Boy, you're already qualified. Come on! Discuss together. See if you can bring us any new ideas. "

Although the old academician standing at position C did not smile, his face has been much softer. People with ability will be respected in most cases.

This has nothing to do with age!

On this sentence, they continued to discuss without waiting for Zhang Fan to express his position. Only director Liang gave Zhang Fan an encouraging look.

The others, as if nothing had happened, withdrew their eyes from looking at Zhang Fan.

Genius, almost all the people standing here can call it genius. Hearing an operation shocked everyone. Think more. Let you participate in the discussion. It's all for face.

This seems to say that doctors are very arrogant. It's hard to say whether they are arrogant or not, because this industry is too special.

Do hundreds of millions of business and lose~ Maybe I can wipe my tears. I'm still a hero when I stand up.

But medical treatment can't. People die and there's nothing left. People in this line are always cautious. The farther they go, the more cautious they are.

"Who, well done!"

"What a fart. I killed a patient on the operating table last time." In this sentence, you can almost make people in the industry deny all your achievements.

Zhang Fan didn't say to turn around and walk away, but walked steadily and stood on the third lap. At this time, the people around him turned their heads and smiled at him gently, and then automatically gave way to a position.

It's so strange that when there is no record, others think he is air. Now he can finally enter this circle.

Li Cunhou is neither going nor not going. Finally, he came to Zhang Fan's back. After all, Zhang Fan was invited by him.

"Surgery, surgery is necessary, but is it necessary to operate on the brain stem?"

"Don't report?"

This sentence is in exchange for contempt. Everyone's speaking order seems to have no rules at all.

In fact, everyone has a steelyard in their heart. They are all the descendants of the capital's medical God. When they are at the same level, they are older than their age.

Just like toasting in a wine shop, you should have your own positioning. If you make a toast in advance, others will laugh at you. I won't take you with me next time I drink. Maybe I'll treat you as a clown.

This is the broad and profound Chinese wine culture. After studying the wine culture, you can definitely do something as long as you don't die and your liver is not bad.

However, if the Danas of Mordor came at this time, it would not be so harmonious. I can't fight because someone is pulling in the back.

Everyone spoke in turn. Zhang Fan didn't say that if he was ignored, he would be unhappy. People should have a certain city government.

These leaders' speeches have taught Zhang Fan a lot, a lot, how to avoid the most important diseases, how to reduce more injuries, and how to avoid some unexpected factors before and after surgery.

To be honest, this level of discussion is really like a brainstorming, which is quite valuable.

When the last big man finished speaking, Zhang Fan spoke. He didn't feel that he didn't have the right to speak

I have the right to speak when I stand here. Why not? Waiting for someone to ask? Where

Not all the people you meet in life are Ouyang, not all Lu Lao, and not everyone dotes on you. When you grow up, you have to rob and fight by yourself.

"Is it possible to dehydrate and accurately cut the patient's focus after the water in the brain stem is

removed without brain hernia.

Then, after a short period of lesion resection, maintain long-term dehydration. Maybe the patient is awake! "

Speaking later also has the advantage of speaking later. Zhang Fan combined the previous speeches and expressed his opinions more perfectly.

Everyone looked at Zhang Fan. At present, only three people advocate brain stem surgery, but most of them tend to be conservative.

"What Dr. Zhang said is not unreasonable. There are two difficulties here.

First, how to ensure the accuracy of surgery.

Second, this is also the problem brought by the first point. The accuracy of the operation can not be achieved. The edema caused by the injury is definitely more serious than now. "

The old man standing in position C looked at Zhang Fan.

If Zhang Fan's status doesn't need to have his master's status, if he has his master's status now, he will start the operation directly. What's the discussion? unnecessary.

There is no need to have the status of his master and martial uncle. With this status, Zhang Fan said that for surgery, everyone should start to help around this operation plan.

Even if Zhang Fan has his position in martial brother mordu, everyone will not question him after he said these words. But how to do it better.

But now, what he faces is how to guarantee!

Red mouth and white teeth say that they can do it. This is human life, which is related to international relations. Others take the reputation and status they have struggled for decades as a guarantee. You have nothing. Just say yes?

Medical treatment, when it comes to a top-level range, is actually the name, and the word-of-mouth.

Many, many operations, when the risk is very high, why should you do it? It's because you have security. You use the reputation you've fought all your life to guarantee it.

In that year, XXX. A special patient has island cell C change, which is the name of the two doctors who have struggled all their lives and the operation

The more high-end doctors, the more they cherish their feathers. Old military doctors with electric poles

and doctors who can cure all kinds of cancer are all dishonest swindlers.

Don't give me the right to speak. Once you give me the right to speak, I Zhang Fan won't give up this opportunity.

Call master and martial uncle as a guarantee? Not a hero! In those years, just like children fighting, Zhang Fan never called his own adults, cousins and cousins.

Yes, yes. If you can't fight, you have to fight. However, I'll come back to you when I go to practice for two days!

When he was a child, Zhang Fan had the strength to be cruel to himself. Generally, children one or two years older than him will not trouble Zhang Fan.

"Now, only the operation of primary lesions, not secondary lesions, just scratch the surface.

The disease will only get worse and worse over time. Is that right? "

Zhang Fan said calmly.

"Yes, it's a matter of time." The old man nodded and the others began to look.

"Moreover, there is only one chance of surgery. Even if the patient's condition is reduced after opening the primary focus, is there still a chance of secondary surgery? No! "

Zhang Fan took a breath and then said, "as long as someone can guarantee dehydration and no brain hernia, I can do the edema of this operation.

But when the bullet entered the brain stem in, the edema was worse than it is now. I still keep the information at that time. "

I also have achievements. Don't let me talk. Let me talk, I dare to do it, and I can convince you.

"I've seen the data of the operation you did in those years. It's amazing, but it was just oppression!" At this time, someone spoke.

"Yes, it's just compression, but the destruction intensity of the instantaneous energy of the trajectory is not comparable to this focus at present.

Please look! " With that, Zhang Fan began to take rhythm.

If you have the ability to speak, you will have the confidence. If you have achievements, others will have to listen.

"The lesions in the patient's brainstem are still superficial. As long as the operation is accurate and does not damage the substantive level of the brainstem, this is an alternative decompression operation."

Zhang Fan took everyone to the film viewing machine.

"Here, direct and gentle contact compresses the reflux obstruction of cerebrospinal fluid..."

Then, someone handed Zhang Fan a photoelectric pen. Because what Zhang Fan said is reasonable.

"And the surgical approach can enter the skull in the way of cervical comminuted fracture, here..."

Zhang Fan's mind became clearer and clearer the more he spoke, the more confident he became.

"The operation is too difficult! The probability of failure is high! One careless, will..... "

The old man who was captured by Zhang Fan shook his head.

"It's over here. We have no choice!" Zhang Fan looked at everyone's expression and said a little reluctantly.

If it's in tea, Zhang Fan said that the whole hospital should be mobilized now to have surgery, but there are too many things to consider here.

"Report it!" The academician gently shook his head. It was too difficult. The requirements of this operation were too high. He really couldn't make a decision.

Zhang fan can't convince others, but Zhang Fan's opinion is not nonsense, it's very insightful.

Zhang Fan was a little lost and left the ward with Professor Li Cunhou. After a while, director Liang also came after him.

"Don't be discouraged, young man. Your idea is very insightful, but sometimes we can't decide whether to operate or not.

However, if the superior agrees to the operation this time, I think you need help, don't you? "

Lao Liang smiled and looked at Zhang Fan.

"Director Liang, what do you mean?"

"I don't mean anything. Everything depends on the superior and the patient's country. However, I am optimistic about your operation plan. Can I help you? "

"Yes! Thank you, director Liang. "

"Ha ha, it should be me. Thank you. I'm really a little timid to let me take the lead in this operation.

Young is good! Have a good rest and don't think about it. Wait, there will be a conclusion. "

The discussion in the ward directly formed a report and submitted it. The superior attached great importance to it, and the meeting began with the formation of a small expert directly.

"At present, there are three surgical schemes. The first is conservative treatment after removing the primary lesion. The risk is small, and there is little possibility that the patient is awake. However, it can ensure that the patient's current state will not deteriorate.

Second, after the primary lesion is removed, the secondary lesion is treated with modified surgery. The risk is slightly higher. The patient may be awake, or the patient may become a vegetable permanently.

Third, completely remove the secondary lesions that have the greatest impact on the current symptoms. The risk is the greatest. If the operation is successful, the patient can recover soberly. If it fails, it is unlikely to get off the operating table. "

Academician C of the ward explained the mode, advantages and disadvantages of the operation to the leaders.

"Is there no way to make the patient awake with low risk?" The leader spoke.

"No!" These three surgical methods are the best choice at present.

"In this way, comrades in the diplomatic field also give feedback on this plan to our friends to see what they say.

Since people believe in us, we should make relevant preparations and prepare for all three surgical schemes. Be sure to prepare before the operation. " After the leader finished, he asked again.

"Who proposed these surgical methods?"

"The first is..."

"Dr. Zhang Fan? Didn't he come to deal with bedsore? Is he also a doctor outside the brain? "

"Well! His teacher is Lu Lao, a green bird. Although the suggestions he said are risky, the benefits are also high. "

The old academician couldn't explain. He could only introduce Zhang Fan from the side.

He was invited to treat his ass, but he didn't think about it. He even wanted to treat his head!

## Chapter 602

Medical treatment, medical treatment, a wonderful industry. Are you tired of doing medical treatment? Most of them are tired. There are no fishing in hospitals above grade 3B. Unless you are

Whether the income is good or not is not better than that of developed countries, and the income of the medical industry is also good. Of course, it is hard to say whether it is directly proportional to the time spent.

However, why are most front-line medical staff reluctant to let their next generation do this again.

This is the wonderful work of this industry. People outside are always exploring the red envelope problem.

The noise is earth shaking. In fact, if you give him a red envelope, you turn around and sue him. It's hard to say in this life, but he won't have less trouble in three years. Income is not proportional to risk. In a word, it doesn't pay!

You can never see what is really wrong. Red envelopes? If you think about it, you can see it clearly. Is it still a problem?

After Zhang Fan left the ward, Professor Li stopped talking and looked constipated. Zhang Fan really doesn't want him to suffer.

He said, "come on, Lao Li, we've been fighting in a trench for half a year. How come we're separated soon."

"Zhang Yuan!"

"It's Zhang Fande. Why are you becoming more and more polite."

"I still think it's easier to call you Zhang Yuan. I won't go around anymore.

Let's put it this way. Do you think other people can think of your surgical plan? "

"Well, can't you think of it? I think it should be OK!" Zhang fanleng said after thinking for a while.

"Good! Then, there is another question. If today's patient is a billionaire, do you think you will have the opportunity to put forward a plan? "

"You mean...?"

"Yes, you know! I won't say more. If in terms of skin, I can help you.

However, I really have no good way out of my mind. If you have a reliable assistant, get in touch.

There is no hatred or love for no reason. If you succeed or fail, you should think about the consequences.

Even if I am a villain once, I still choose to stand high, find a flat place to live, and go to a wide place.

After all, the patient is not an ordinary person. The preparation to be done is to prepare in advance. That's all you say, and it's up to you to listen or not. "

With that, Professor Li pursed his mouth and patted Zhang Fan on the shoulder. Looking at him, it is estimated that he is also uncomfortable.

"Thank you, Lao Li!" Zhang fan understands. If he doesn't understand it again, even if he has a system, his future is limited.

In fact, all industries are the same. When you only want to be slightly better than ordinary people, relying on technology may nourish you for a lifetime.

Only when you can crush all your peers, you may be able to stop by heart.

However, when you don't reach the rolling state, without a qualified EQ, 90% of you have to die on the road.

Lao Li is gone. He was able to help Zhang Fan in this way, also because of the incense with Zhang Fan.

If Zhang Fan doesn't take the lead in this operation, will no one take the plate, it will underestimate the heroes in the world.

On a certain node, someone will definitely stand up. But it was because Zhang Fan stood up before the

node arrived.

If people want to be noble, they must be selfless. Why wait for a node? Just about to stand up.

In fact, who is not the breadwinner, whose more than ten years or even decades of struggle is in vain.

Seeking advantages and avoiding disadvantages are human commonalities. There is no need to be harsh. Zhang Fan stood up and disrupted some people's steps.

Will someone jump out and make trouble? Will anyone stand up and blame? There is no second place in literature and no first place in martial arts. Medical technology is embodied in treatment. But when the patient's identity is special, no one will jump like a clown.

Life is not a TV play. I will only look at you quietly, watch you rise and fall, watch you end sadly, or ignore it directly.

This is also the reason for the rampant circles in the medical industry. Through interests, through some kind of interconnected relationship, form a small-scale force unit, and then advance and retreat together. Of course, when interests exceed the content of the circle, there are also dogs biting dogs.

This is why in the medical industry, there is no famous expert trained purely abroad. You're awesome, aren't you? We won't take you!

Everyone was not optimistic about the scientific research project of that year, but someone bit his teeth and finally did not know why. He introduced foreign capital and succeeded!

People who have not formed a chain of interests and have become famous or controlled... Appear. I just don't take you to play. What can you do for me!

Director Liang dares to stand up because he can't do the operation, and he knows very well Zhang Fan's level. It's better to let this unknown person succeed than let others succeed.

Moreover, if Zhang fan can succeed, he can also be regarded as a meritorious minister. Even if he has no credit, he also has hard work.

Unsuccessful? I'm not the surgeon!

Really, in fact, sometimes things in life are better than TV dramas.

Don't say anything high-end. Even for drinking between friends, some people will play with their mind to rely on wine and don't want to pay the bill.

A little doctor who doesn't know where he came from wants someone who is about to climb to the top to help you. Why are you my immediate family?

The colder Zhang Fan thinks, the more he thinks, the more lonely he feels. He's not a lonely star in the sky. He'll go as soon as he says he'll go.

Originally, he thought that everyone should be a person who is divorced from low taste and has been a very noble person, but when you think about it carefully, there are only a few resources

What should I do? Run? Bite your teeth? Bet on Professor Li's villain? That's like putting yourself above the meat case.

After thinking through it, Zhang Fan took out the phone and first called his master.

"Master!..." Zhang Fan said the matter directly without politeness and greeting.

Well, there is still warmth in the world, otherwise the world is really a cold earth.

"Well, are you sure?" Lu Lao didn't say much, but asked a rhetorical question.

"I'm sure I can do this operation." Zhang Fan said firmly that this time is not a time of humility.

"Good! I'm catching a plane now. It's estimated that I can come to the capital in the afternoon and wait for me! "

"Yes!" When Lu Lao didn't even stumble, just wait for me!

Zhang Fan's tears almost came down. It was hard for Zhang Fan to speak.

Nine out of ten people are unhappy in life. Everything is going well. Zhang Fan sat alone in a small restaurant near the capital hospital, waiting quietly.

"Do you have to let the white haired master catch the plane every time? Won't I have surgery in the future?

No, I want to have my own team, my own strong team, my own handy team, and my own team with the same aspirations. "

Zhang Fan, sitting in a daze in the restaurant, will bite his teeth and pinch his fist. Let the landlady who was going to clean the table dare not come forward.

If it was in ancient times, it would definitely be: "that black guy makes me panic! I'm afraid he's not a big eater. Let him have a bowl of noodle soup! "

Suddenly, Zhang Fan stood up. The landlady almost sent out the calculator in her hand as a dark youth.

"Xue Xiaoqiao, would you like to be my assistant? Not reluctantly, the operation is difficult and risky. If you fail, you may never have a chance to reach the peak again. Dare you? "

"Zhang Yuan, you're teasing me. Don't you drink? " Xue Xiaoqiao at the other end of the phone has been like honey recently.

The recognition of his girlfriend has really made Dr. Xue a little happy this time. It's been too long!

"I'm sober. If I don't want to, I'll forget it." Zhang Fan is going to hang up. It has been said clearly. There is no need to have a result. Sometimes, if there is no result, it is the result.

"No, Zhang Yuan. You'd better make it clear. " Xue Xiaoqiao is not happy. His family education is straightforward!

Zhang fan can't control the leak at this time. Even if Xue Xiaoqiao trumpets, not everyone cares about it.

.....

"Zhang Yuan, are you sure?"

"Yes!"

"Good! Wait for me. I'll ask for leave now. How can such a thing be less than me! "

The warm blood of young people is really a very, very precious thing. When the blood is cold and the heart is cold, it is really

"I'll ask for leave for you. You wait for news!"

"Good!"

After hanging up, Zhang Fan immediately called Ouyang.

"Dean!"

"What's the matter. What's wrong with the sound? Is things not going well?"

You can't do anything. Don't force it. I'll be a doctor at ease in the future. "

Ouyang is a person who has dealt with all kinds of patients all his life and fought with Lao Huang all his life. As soon as she listens to Zhang Fan's voice, she knows that Zhang Fan has encountered something difficult.

"It's a little difficult, but I think I can resist it."

"Well, if you can carry it, you can't always escape. Come on, what do you need me to do?"

On the other end of the phone, Ouyang with iron blood raised his triangular eyes. His voice was stiff, but his heart was hot.

"I need an assistant outside my head to make Xue Xiaoqiao arrive in the capital today."

"OK, I'll let Li Zixiong go too. He's a little older. If necessary, I can also get to the capital today. I also know several old people who came to the frontier and went to the countryside in those years! "

Ouyang's last words were unequivocal.

"Dean, not for the time being. I'll call when I need it. "

"OK, feel free to contact. I'll arrange for them to leave immediately."

After hanging up, Ouyang called the medical office, "inform director Li Zixiong and Dr. Xue Xiaoqiao to come to my office immediately."

With that, Ouyang began to contact the director of tea vegetable airport.

Then Xue Xiaoqiao and Li Zixiong took the 120 seat of the hospital and went straight to the tea vegetable airport.

.....

Green bird, old Lu set out. Lu Lao's face on the bus was calm and could not see his joy and anger at all. However, the phone in his hand was pinched tightly by the old man.

Before leaving, he informed his elder martial brother Wu and the rest of his younger martial brothers.

"Elder martial brother, do you have a familiar young doctor outside the brain? The level is better, but you can't be too old, Zhang Fan... "

"Younger martial brother, are there any young doctors who know each other outside the brain?"

"Medical department, put the outside of the brain..."

Although it is not the capital, the north south hospital gathers together several young experts outside the brain. For them, it is the same to play.

A phone call. Although they are all foreigners.

Just as old Lu set out, old Wu also set out. Their destination is the same, which is the capital.

Old Lu made up his mind to stand on the stage for his closed door disciples. Even the experts outside his brain are looking for young people. The glory of the main knife Zhang Fan must not be taken away.

"Bullying? I'm not dead yet ~! Aren't you going to kill? I'll see who can win today! " That's what the old man thought.

The older people are, it seems that their temper is getting better and better. In fact, it's not. If they can't lose their temper, they are helpless. They are old and frail and have no right to speak.

However, people like Lu will only be old and firm, old and spicy.

Mighty, mighty, old Lu and old Wu took the young doctor and got on the plane to the capital.

Capital, "do you think he can do it?"

"It's hard to say! What do you think? "

"I can't see it either."

"Ha ha!" Look at each other and smile.

People, old Lu, who can't do medicine, said that people can eat people.

Although the Foreign Affairs Officer explained his illness again, in fact, everyone is a layman. I heard what China said.

They began to discuss. Vegetative people are similar to death. Now we need the old man to open his eyes and say a few words.

I can't say a word. What else is the operation? However, we still have to do what we should do.

"We need time to discuss!"

This time is too precious for Zhang Fan. Here, in fact, he has no voice.

One afternoon, the other party gave back the results and chose the third operation.

It is hoped that the Chinese government will certainly restore the health of the elderly through years of love.

Although Zhang Fan proposed the operation, considering that Zhang Fan is an unknown doctor, the government wants other doctors to do the operation.

Candidates are a problem when the government says that this operation can be used as a qualification assessment.

Many doctors have made more detailed surgical plans. Starting from the operation of each step, the details are incomparable, and even the risk coefficient and corresponding measures caused by each step are included in the table.

Do you want it? No one, do you want a lot, which also makes everyone hesitate and embarrassed.

Old Lu and old Wu have gone to Beijing. The first time, they rushed to the hospital.

"Zhang Fan, where are you? Come to the hospital. "

The arrival of Mr. Lu and Mr. Wu directly turned into a turbulent and violent situation.

The hospital has formed a leading group, which will report to the government after all matters are decided.

When Mr. Lu and Mr. Wu appeared in the hospital, the government and the leading group of the hospital were alarmed.

When you reach the position of Lu and Wu, you move like a ground dragon.

What's more, this dispatch can almost be regarded as the largest and oldest school of Chinese surgery. Who dares to underestimate it.

"Old Lu, old Wu... How did you disturb everyone." Health leaders are big.

Can you afford it? Do you want to do it or not? These bosses can ask their superiors to come out and apologize every minute.

"Hehe, there's nothing to do. My despairing student doesn't do a good job in general foreign studies, so he has to do it outside his head.

I didn't expect that his extracerebral surgery could really be seen in the past. This time I heard that there was a special patient who needed help with dehydration.

Our hometown, you see if it's OK. Human rehydration and dehydration is, after all, the most basic knowledge for foreigners! "

I'll fix the dehydration and rehydration first. We're also reasonable. We don't just mess around.

Old people become fine. Old Lu's face that wants to replace Zhang Fan for surgery is green.

"What a bully!"

## Chapter 603

The situation in the medical sector, in detail, is hard to say and boring. But you can take a very similar thing as an example.

It's like a warlord in the early years. From childhood to Dadu, the sphere of influence has been almost divided.

The division between North and south is very obvious. Why is it so obvious? Can ordinary hospitals in the North no longer see the hospitals in Mordor? Or do hospitals in the south look down on hospitals in the capital?

No, it's because of the way of management.

For example, a little doctor starts to play strange and upgrade from a young age. Through hospitalization, climbed over the main treatment, and rose to the vice high.

At this time, when you want to upgrade to Zhenggao, there are many soft and hard conditions.

The hardware has reached, but sometimes you have no problem with the software card for several years. How many years can a person have? Therefore, blending is needed at this time.

How to blend it is to have a little personal friendship with higher-level Hospital experts. This relationship may not help, but it will not be an obstacle.

The promotion of doctors in hospitals below the provincial level is high, and the final reply is all experts from the provincial medical expert database.

How to make friendship with such experts and use money? No, just ask someone to have an operation. Go to someone else's Hospital for further study.

The promotion of provincial experts is generally in the magic capital in the South and in the capital in the north.

Therefore, the sphere of influence is divided. Even doctors in township hospitals, if you think about it carefully, they also have factions.

Township doctors need to study. They usually go to the urban area, and most of the doctors in the urban area study in the province.

One said, my master is so and so of the provincial hospital. Then, the township doctor will consciously become an apprentice.

Slowly, the medical industry obviously has some regional colors.

At the top hospitals, various experts began to compete. This kind of competition, competition is status, competition is power, competition is money, competition is academic authority.

Then, when a top expert is formed, the expert vaguely forms its own small system.

When the country needs it, just like the rescue force, people from all directions and small systems come with people and horses.

Who is more powerful, who is more powerful, at this level, is the record.

Moreover, the real big man can't get kickbacks or commissions at all. It's no need. He just walks around and flies a knife, which is enough to bring the house with a swimming pool.

If you take another step from the big man and become a top doctor, darling, most people don't dare to think about it.

At the bottom of the medical industry, woodlouse is very popular, and people can be scolded. Anyone can manage it. But as long as you get to the top, seriously, if a feudal official wants to see others, you have to make an appointment.

You can not use a computer, you can not talk about financial high-tech, but you can not help but get sick? Therefore, this industry is very wonderful.

The big guys are always advocating that you have a better attitude towards seeing a doctor and don't take a commission. The lower level doctors always prescribe medicine with a cold face.

.....

When Lu and Wu took people into the hospital, the level of the reception team was also improved a lot, almost to the ministerial level.

You Zhang Fan has parents. Am I an orphan?

However, Zhang Fan takes a great advantage here. Western medicine surgery, from the earliest Yangcheng hospital, is the person who didn't learn medicine well and later became the father of the country. He was a primary school apprentice in this hospital.

All surgical departments, except orthopedics, are developed from general surgery.

To be tacky, the generations of Lu and Wu are here. When the ancestor of Chinese surgery entered the operating room, even Zhang Fan, whose heart is like still water, was shocked. The equipment is too high-end.

Not to mention the others, just one surgical CT has made Zhang Fan jealous of these Hicks.

At the beginning of the operation, Zhang Fan took the lead, with the first help of the doctor of magic capital, the second help of Xue Xiaoqiao and the third help of the doctor of Bluebird.

Secretly took a breath, and Zhang Fan said calmly, "the operation begins!"

Not for steamed bread, for breath. At this time, Zhang Fan was not just for surgery.

In order to gain Ouyang from thousands of miles away, and for the dusty master and martial uncle who came from other places.

It's to let people who despise him have a look.

I'm coming, I did it! I'm not worse than others!

## **Chapter 604**

Surgery outside the brain was actually bloody at the beginning. Craniotomy, although this bone has only a thin layer, it is very tough because of its internal structure like a honeycomb.

Craniotomy, in a hospital with poor equipment, when the patient can't be sent out in case of intracerebral hemorrhage, and then encounter an extracerebral doctor with two knives who rarely performs surgery, it can scare people to death.

However, for Zhang Fan, who was born in orthopedics, craniotomy is too simple and exquisite. 30x medical equipment is almost world-class.

Very handy, electric drill, customized in Germany, scalpel customized in Switzerland.

Zhang Fan sometimes wondered that a rotten blade was really surprised by comparison.

Some blades with special relations are not disposable. They are directly sexual. They open a skin. Sometimes when they are opened to the general level, the knife is blunt and must be replaced, otherwise the original cutting will become sawing!

Zhang Fan opened his head and the experts sitting in the electric classroom stared at the display screen and looked at it quietly. Looking at the overall situation from a small point of view, they kept making comparisons in their hearts.

"Hehe, the strength in your hand is not small."

"The cattle ploughing the fields are more powerful! What's the use? "

Looking at Zhang Fan's very exquisite craniotomy, the slightly younger doctor in the meeting said it was useless, but he thought: "it seems that he needs to hire a strength trainer sometime. This guy is too comfortable."

Older people often say that today's people are rough, impatient and purposeful, and no previous people can survive.

In fact, no wonder young people today. In the past, when they were young, although their living standard was average, everyone was the same. Looking around, whose underwear didn't have a patch.

In the past, if anyone had some technology, the state would send a house, and even organize and arrange his wife. But now, just a little technology, sometimes you can't even get a registered permanent residence. Can you not worry.

The audience whispered in the hall. Lu Lao and Wu Lao, who specially supported Zhang Fan, were also watching Zhang Fan on the display in the meeting hall.

"His technique is very clever. According to his age, he is really gifted."

In the past, I saw Zhang Fan doing general surgery because he was the starting major of Wu, and according to the level of Wu, how many people in the world can surpass him.

Therefore, he used his decades of experience to see Zhang Fan's operation and always found some flawed redundant movements.

The more refined the operation, the higher the level. One cut can achieve the goal, which is absolutely less damage than two cuts.

But today, looking at Zhang Fan's other professional operations, the old man suddenly felt that the boy was really powerful!

Ordinary foreigners are often invited by other departments to do joint surgery. Mr. Wu has not seen others open their skulls. But he really hasn't seen such skillful and exquisite operation as Zhang Fan.

Just like eating new walnuts just out of the market, lift the scalp with hair follicles slightly blackened.

After opening, because of the fast operation speed, the blood vessels in the inner layer of the scalp have not seeped out obviously, and the inner layer of the scalp is wrapped with red blood vessels.

It's like a cheese pizza with shredded carrot and a little cold.

But you can't turn it over. When you turn it over, it's a little white and black hair follicle. It's full of small dots with eyes and mouth. It's really like a scorched pizza, and then sprinkled a lot of sesame seeds on it.

The bone structure of the skull is very similar to Nestle's one yuan waffle. After biting, the upper and lower bones are the chocolate layer, and the air containing tissue in the middle is the sandwich of the waffle.

This structure can not only fight, but also resist shock waves and keep warm, but the biggest problem is poor heat dissipation. Therefore, the head is afraid of heat and cold.

Sometimes it makes sense to pull out other people's clothes and fight a group fight, but it also shows that your CPU can't work.

When Zhang Fan opened his head, he moved very fast. Zhang Fan, holding his breath, brought his technology to the extreme.

After two years of systematic drawing and watching films, we have long come to the situation that there is no picture in our eyes and there is a picture in our hearts.

The patient's brain structure has been reconstructed by Zhang Fan in his mind like a three-dimensional picture.

"His speed is about to slow down!" Some doctors in the meeting began to estimate secretly.

No matter how fast, beautiful and awesome the craniotomy is, I'm a carpenter. Don't slow down after you have the ability to enter the skull!

"People who can fool old man Lu and old man Wu so close are definitely not fools. They will slow down."

This kind of dialogue is much the same. Many people say this kind of words in the venue. It's like that as soon as Zhang Fan slows down, his level will drop immediately.

This remark really didn't come true today, and the people in the venue didn't feel it deeply.

But Zhang Fan's assistants were really surprised " Too familiar, too old! How did this guy practice. It's estimated that this guy has scratched thousands of pig brains. "

No, it's strange. Zhang Fan is absorbed, eyes to hands. Ophthalmic forceps in hand.

And they were not only surprised, but also angry. Zhang Fan is holding his breath and concentrating, and they are really cooperating with him.

Blood vessels. Zhang Fan doesn't need to use the hook baffle as protection. He directly puts down the pliers. Looking at it from the other side, he almost feels that Zhang Fan is running towards the blood vessels.

"It's so exciting." The magic extrabrain doctor from the United States almost didn't swear. He scolded his mother directly in his heart.

Among the three assistants, his level is the highest, that is, he has leisure to scold his mother in his heart. Where can the other two separate their spirit from their stomach.

Zhang Fan doesn't speak during the operation. It's all action instructions. When you need to pull the hook, use the surgical forceps directly, and then look at each other.

Lu Lao and Wu Lao are really experts. Although they are young, they are definitely experienced people. They can't reach Zhang Fan's technology, but they still have no problem cooperating with Zhang Fan.

And Xue Xiaoqiao is not bad. He can give up his ancestral industry at home, and his kung fu is also good.

Shua! Shua! Shua, the surgical forceps are in the brain tissue, just like cutting tender tofu, going on rapidly.

The camera directly transmits the action operated by Zhang Fan to the audio-visual education room.

"I'll go! This is not eating watermelon seeds, this is the brain! " Not to mention whether the city is deep or not, Zhang Fan's operation, the blood vessels under the surgical forceps are clearly exposed. Zhang Fan doesn't need protection directly. Sometimes, he continues to separate without reaching the visual conditions.

"Steady, really steady. A natural surgeon. " Although he is not an extrabrain doctor, old Lu and old Wu are too aware of this separation.

The separation of the brain is different from that of other tissues. When other tissues are separated, blood vessels are weak, but in the brain, blood vessels are strong.

This soft tissue not only does not damage blood vessels, but also very clean separates brain tissue, and the speed is not slow at all.

In this way, it has surpassed too many doctors. Wu Lao and Lu Lao couldn't help exclaiming.

## **Chapter 605**

What is success? People have different definitions. For the doctor profession, it's really hard to say whether success is success or success is success.

However, what we know now is that you are not famous, you have no status, you have no right, and it is not easy to take another step forward.

Separation, continuous separation, hemostasis, finally, after entering the brain tissue, it began to appear in large numbers.

Zhang Fan is too arrogant. There is almost no bleeding in the cortical layer of brain tissue. He is too familiar with the anatomical structure.

"Put on the hemostatic gelatin!" It seems that when you see Zhang Fan's hemostatic gelatin, everyone's breathing is much smoother.

Usually, after craniotomy, ordinary doctors almost have to use three or four bags of this thing. But Zhang fan used it for the first time after entering the skull.

Saving is not saving. The hospital is a big waste, and doctors at this level don't think about how to save, but how to make the operation better.

Hemostatic gelatin is generally composed of polyethylene at the lower end. This material must not be used in the brain. Because this thing won't decompose and absorb.

The high-end is collagen, special collagen. As like as two peas of green arrow gum, a small white strip is melted into the blood instantly and then adhered to the surface of the bleeding vessel.

Human body's bleeding, different organs, different bleeding methods. Big blood vessels and heart bleeding are the most terrible. Just like whales spit water, there is no problem ejecting a height of three or four meters.

Brain hemorrhage is exudation. Just like digging a pit by the sea, although there is no obvious running water, after a while, the sand pit is full of water.

So is the brain. This thing is really a big piece of fat wrapped in a big bag of blood.

"Boost!" Zhang Fan said to the anesthesiologist.

"Good!" Lu Lao's assistant was a young doctor, but the anesthesiologist directly brought the most high-end personnel of Qingniao.

This kind of anesthesiologist doesn't need to discuss with any cardiologist at all. For him, he is an anesthesiologist in the anesthesiology department and an expert in internal medicine.

"This guy is so fierce. Too brave! It's already broken. He asked me to step up! "

In the meeting hall, when hearing Zhang Fan's order to boost the pressure, it really ignited the agitation, and everyone whispered one after another.

It's good, good, bad and bad. Just like boxing, when the other party's fist comes, you may be hit with your eyes closed, but you will not hit your eyes and other important organs.

But if you open your eyes and face your fists to avoid, with high technology, you can directly avoid each other's fists by relying on the feedback of your eyes. If you have poor technology, people will directly be a closed eye fist and hang you up.

Now Zhang Fan is facing his fist with his eyes open.

The blood pressure rose little by little. The anesthesiologist took medicine little by little. He looked at the dose of the medicine with his eyes and stared at Zhang Fan's expression with his eyes.

Zhang Fan is definitely not the type with poor technology. When the pressure rises, the bleeding accelerates. I saw Zhang Fan's three ophthalmic forceps holding hemostatic gelatin and entering from the side strangely.

Two tweezers in the left hand, one in the right hand, and two tweezers on the left are like two finger zen.

Pop! Gently press on the brain tissue, and then the ophthalmic forceps of the right hand are inserted into the middle of the two finger zen very accurately and quickly.

"Hiss!" Directly is the sound of sucking air conditioning. The inspiratory sound of the operating room assistant came from the sound.

And the inspiratory sound in the venue seemed to match, and appeared one after another.

"Too bold, too bold. He doesn't look at who is lying on the operating table. It's too big, too big, really too big. "

An old man in his fifties outside the capital spoke directly. This technique is only used when it is absolutely necessary. In general, let alone use it. Ordinary doctors have never seen it.

"Is something wrong? Is the patient's vital signs in crisis? " Old Lu turned around and asked.

"But..." the half-aged expert was speechless. He felt uncomfortable. It was like swallowing a boiled egg. He couldn't go up or down. He was caught in the esophagus, trachea and throat. His chest was stuffy to death!

"Three pieces of gelatin set the world!" This kind of operation doesn't need dozens of pieces of gelatin. I'm sorry for the force of this operation, but Zhang Fan only used three pieces and directly solved the bleeding.

"Depressurize!"

"Copy that!"

Surgery, this kind of teamwork. Once the chief surgeon cannot suppress his assistant.

The chain reaction is very troublesome.

Many people think that doctors should be attentive and meticulous on the operating table.

This situation accounts for the majority. When the skills of the main knife and the assistant are similar, and the position in the Department is similar, trouble comes.

"Why don't you do that? Why are you doing that? No, it's too damaging!" The chief knife and assistant took the lead, and anesthesiologists and nurses began to be at a loss.

This is why there is a three-level system in the hospital. Zhenggao takes the deputy high, the Deputy High takes the attending, and the attending takes the hospitalization. Never said the subtropical high took the subtropical high.

Separation solution and perfect hemostasis. Zhang Fan entered the lesion. The secondary focus is in the brainstem.

Human organs, how to say, are divided into autonomous organs and non autonomous organs.

For example, the tongue is non autonomous. You can go deep into the other person's mouth or hide it in your own mouth so that the other person can't find it.

This autonomy is not autonomy. It doesn't mean people's own will, but their brain. It seems very contradictory!

In fact, generally speaking, I just don't listen to you. Those who obey are not autonomous, and those who do not obey are autonomous.

For example, the anus has a line. The outside of the line is obedient, and the inside of the line is not obedient. This function is as like as two peas. You can order your lips to contain ice cream, and you can also order the anus to cut your stool.

But you can't command the esophagus to hold the meatball, and you can't command the inside of the anus to contract and suck in the stool.

The brain stem of the brain is the real boss. The human body gives all the most important heartbeat and breathing to the brain stem.

Moreover, the most terrible thing about autonomous organs is not the constant problem of clamping, but that this thing is unreasonable.

Involuntary organs, a needle of anesthetic, what do you want to do, don't resist at all, wake up with your head covered and your head covered, and your face is cute.

But not autonomic organs. This thing, such as illness and tumor, sometimes almost destroys the organs to one in ten. It still continues to work, just like a lone hero.

But sometimes, foreign things, such as doctors' hands and instruments, gently touch its body.

After that, it began to look for life and death like a memorial archway hero without chastity.

Can I give you a collective death in an instant, motionless, work? The beauty of thinking is such a wonderful thing.

The brain stem is the general leader to manage these wonderful flowers, so it is more wonderful. When Zhang Fan entered the brainstem, the secondary lesions obviously lay on the brainstem.

A good team has one of the most outstanding C leaders, but people in other positions are also excellent people.

This time, Mr. Lu equipped Zhang Fan with one of his assistants, which is absolutely powerful. Dehydration, the anesthesiologist's medication is very accurate.

The originally edematous brain stem, like the sister in the gym, was covered with water beads, but it was not greasy.

If the brain stem dehydration can't meet Zhang Fan's requirements, Zhang fan can't take off the outer membrane of the brain stem, that is, the sister's coat.

Just like the plastic film of the box, the swollen brain stem is tightly wrapped by the outer membrane.

When you touch people, you will definitely be unhappy with this thing, and then give you a strike directly, which won't scare you to death.

The dehydrated brain stem is like a little child wearing her mother's mink coat. The doctor can take off the mink coat without touching your body.

Of course, this metaphor is to say that Zhang Fan, a doctor with this technical level, has no such technical level. Even if people wear fat clothes, they don't take off their clothes carelessly, and as a result, they are gone.

Many people don't understand what the outer membrane is. In fact, it's very simple. Eat hot pot, want a complete brain flower, don't cut it.

Then cooked, but people with heavy taste can not cook, and if they are not cooked, they feel more obvious.

When you bite it gently, the pig brain will have a little sense of breakthrough, which is caused by the outer membrane of the brain.

Of course, he doesn't understand Wang Wang Wang. When he takes a bite, he will only say that it's too

cooked and there's no blood!

After seeing the brain stem full of water beads, Zhang Fan looked up slightly and nodded to the anesthesiologist.

Anesthesiologist, the boss of Bluebird anesthesiology. At this time, when he saw Zhang Fan's nod, he was a little proud.

Although I didn't speak, sometimes the recognition between technologies really has a sense of achievement than the so-called pleasure of life.

Give you five thousand, you may be happy for ten minutes, and then start thinking why not give fifty thousand.

The recognition of technology is different. What kind of feeling is the same as drinking a cup of century old pure wine ten years later. It is so beautiful. The language description is pale in front of this feeling.

It was really easy. Zhang Fan started to peel the coat of the brain stem with tweezers in one hand and pliers in the other.

"Dimming!" With Zhang Fan's voice, the 30x itinerant nurse stood behind Zhang Fan with a footstool, his head against Zhang Fan's head, and very accurately probed the light on the lesion.

"How about director Zhang?"

"Yes!"

Between doctors, when you don't know what to call him, you call him director. It's absolutely right.

Small hospitals, even the nurses of provincial hospitals, to tell the truth, most of them are girls from ordinary families. They will have them in vain, but there are few rich.

But top hospitals are different. Most doctors in such hospitals, especially young doctors, come in through examination step by step.

The nurse is different. Maybe a little girl can pull out a leading uncle of some department. It's no exaggeration at all.

Take off your clothes. Zhang Fan is good at it. Especially the clothes for taking off organs, Zhang Fan is too particular. Just his hands trained in the system.

On the level of surgery, Zhang Fan may not be famous all over the world. But on the accuracy of his hands, Zhang Fan said he was second, and absolutely no one dared to say first.

Too accurate, too gentle, in the brain stem unknowingly, Zhang Fan pulled out his coat.

"The signs haven't changed at all. It's too stable!" Just as Zhang Fan took off his brain stem clothes, many doctors in the meeting were staring at the monitor.

Breathing, blood pressure, pulse, striated silk unchanged!

"Yes, it's too stable. Which hospital does this guy come from?" At this time, everyone really began to pay attention to Zhang Fan.

"I think it's really less homework for him. Look at his hands. They're really stable. It's time to make him more difficult."

Old Wu looked at Zhang Fan's hands. He didn't know whether he envied Zhang Fan's youth or Zhang Fan's stable and abnormal hands. He asked old Lu directly.

"Well, I also think I underestimated him. Originally, I have regarded him very highly. Unexpectedly, I underestimated him."

Lu also felt that Zhang Fan's talent should not be wasted. He did general surgery and orthopedic surgery. His steady and accurate hands were sometimes not very obvious.

However, for craniocerebral surgery, these hands have too many advantages. These hands are comparable to robot hands. At this time, they are really amazing.

When the adventitia of the brain stem was stripped, the focus appeared naked in front of Zhang Fan's eyes.

"Cryosurgical forceps! Put on a pair of gloves!" Zhang Fan said to the instrument nurse.

The focus of this operation is like a small sarcoma on the arm. Fortunately, it is superficial. If it goes deeper, the patient estimates that his breathing and heartbeat have long been disordered.

No knife can be used to remove the focus in this place, and no sharp knife can be used. The best is laser, but the laser will produce heat, and no one can guarantee whether it will cause the patient's life crisis.

Therefore, the conventional way is to kill with drugs. As for whether it will relapse, it is not a matter of this operation.

Because Zhang Fan has a pair of super stable and accurate hands, he did not choose the conventional method, but used cryosurgical forceps.

The special refrigerator in the hospital is super expensive. Many people think it is bribery! In fact, it's not. Generally, the refrigerator at home can freeze at most minus ten degrees. It's amazing.

But the special refrigerator in the hospital has no problem at minus 40 degrees, and there are even refrigerators at minus 80 degrees.

At this temperature, not to mention ordinary instruments, conventional bacteria can freeze into slag.

"What is he doing?" When hearing that Zhang Fan asked the nurse to prepare refrigeration equipment, the doctors were really not calm.

This is a bit of a technical crush on them. You are a doctor invited to be an ass, even if you are a child of Qiu school. You can also do craniocerebral surgery, even if you can do craniocerebral surgery. You can even crush us with unconventional surgery.

"Shit! Is he a member of the extrabrain discipline? " When this is done here, we will not doubt whether Zhang fan can have an operation. Now we doubt whether this guy will come to the capital!

There are so many meals. Who is not afraid of such a young, strong person with such a strong background.

In fact, Zhang Fan's Kung Fu really made everyone cold. Instead, Zhang Fan's other shortcomings were covered up.

For example, the diagnosis of the disease, Zhang Fan is not so powerful. Although not the donkey of Guizhou, Zhang Fan really needs to improve.

Knowing this, Lu and Wu looked at the young man on the monitor with a smile.

## **Chapter 606**

People are actually quite smart. Don't let him understand the principle. If he understands the principle, he will find out how to deal with it sooner or later.

For example, diseases, such as this functional disorder and which functional disorder, are diseases for which the principle cannot be found. They can only be dealt with in general, and hormones are on the left and right.

Therefore, diagnostics is not only the first clinical knowledge for medical students, but also a subject that can not be thoroughly studied all their life.

The simplest and most difficult subject. Simply put, it's just a few symptoms that can be remembered in any way.

It's too difficult to say it's difficult. If you want to master it, it involves almost all medical knowledge, even knowledge outside medicine.

That's why elderly doctors can't hold meatballs even though their trembling chopsticks under their hands.

Relying on his experience, his vision, his life experience and decades of knowledge, sometimes you can see diseases that young doctors can't see at a glance.

This is what Zhang Fan lacks. There is a system that can continuously improve his technology, but some things have no experience and experience. They are always like a newly baked purple clay pot with a fire.

Moreover, medical knowledge is as vast as smoke, where can he go.

However, how many people can really see through in the world? Zhang Fan's precise and stable operation has made the people below unable to sit still.

The frozen instrument was brought over by the nurse with thick gloves and then clamped with sterile oval forceps.

The surgical forceps frozen at minus 80 degrees are cold around. Zhang Fan had already brought two pairs of gloves.

He was very fast and grabbed the pliers with thick gauze. At this time, he can't be slow, he must not be slow.

Although the pliers are frozen, its mass is too small. If the speed is slow, the temperature will rise and the meaning of freezing will be lost.

Zhang Fanfei quickly took the pliers. The cold pliers were padded with gauze and two pairs of gloves, but the temperature of the pliers was too low, and his hands had felt its cold.

Not slow! Zhang Fan did not dare to hesitate. At this time, his stability was brought into full play.

Brain stem, right on the brain stem. I saw him cut in hard. The pliers with slightly open mouth and cold breath rushed directly to the brain stem.

Sometimes, I really can't think about it. When I think about it, I open my mouth slightly, and then directly fill my head with one

What is the macroscopic appearance of the human nervous system. It's actually a big tadpole.

The big head, and then slowly thin, and the brain stem is the connection between the brain and the spinal cord. Here is a round stick, just like the corn ice cream bought in summer, very similar.

Generally, it's slow here, but it can't be slow now. If the temperature of the pliers rises slowly, it won't work.

Zhang Fan's speed is very fast. In fact, he is a little smart. He points to it.

The pliers with slightly open mouth, in Zhang Fan's hand, gently bit the lesions on the surface of the brain stem.

No more force is needed. The temperature of the steel pliers directly freezes the lesion, just like the frozen chicken in the freezer. The ice flower visible to the naked eye slowly rises from the bottom to the top of the lesion.

No blood!

No blood!

No edema at all!

"Handsome!" The assistant of Mordor said directly.

This hand is really handsome. Zhang Fan's pliers bite the focus, but the gauze is padded on the brain stem. At this point, the gauze makes the freezing stop outside the brain stem.

"Well, this operation!" Choked. Someone really choked at the meeting.

Who doesn't know that freezing is the best and least damaging way to remove the focus.

However, TN's operation has too high technical requirements for doctors. It is often that they can't eat the fox. Instead, they provoke a coquettish. Their hands shake slightly and people hang up. This is not impossible.

Zhang Fan's hand came out. In the future, if they encounter this kind of operation again and use drugs to kill them, they will really feel loved a hundred times.

It's hard for a doctor who works a little harder to die. I can't do such high-end technology!

Some doctors who are good at Kung Fu are a little excited. "It's OK, ha ha, I can go down and try. He can. Why can't I, ha ha!"

Zhang Fan has no time to listen to others' praise. By this time, the forceps had adhered to the lesion. The left hand and five fingers stretch out without talking.

Pop! The nurse put another conventional eye forceps on Zhang Fan's left hand.

The five fingers of Zhang Fan's left hand were like magic. When the pliers turned a somersault, Zhang Fan took it in his hand like a table tennis player holding a soldier's racket horizontally.

In surgery, almost all doctors take pliers in this way. They don't put their fingers into the ear ring, and only gynecologists and obstetricians put their fingers into it.

Therefore, when a young male doctor takes forceps like this, he will definitely be laughed at in surgery. Women hold the law!

This is also a gynecologist. I don't admit that I'm a surgeon. My sister doesn't have a sense of belonging. I might as well be one of my own.

A good surgeon is definitely a doctor who can fight left and right. He can't say that his hands are right and left. Congenital?

No, it's self-discipline the day after tomorrow. This kind of discipline is abnormal. We must practice until we reach out subconsciously, regardless of left and right hands. When the left and right spiral magnetic tubes, there must be no difference in the sense of weight, speed and speed. This is our ability.

The pliers of the left hand touched gently, just like kissing a sleeping lover. The mouth of the pliers touched the waist of the lesion.

The freezing of this temperature must not be met. If it is half cut, it will be a shame. Surgery, beautiful surgery, pay attention to integrity.

Yes, you cut off the necrotic tissue, but look, darling, you've made a moon cake filling!

Who doesn't pursue perfection!

.....

When the lesion was completely knocked down, Zhang Fan also breathed a long sigh of relief. Compared with the brain stem, there was no one who could beat Zhang Fan's steady hands in other places.

But Zhang Fan is not proud!

I don't know how young I am. Most of the sky and earth are not as big as me. Time doesn't leave a trace, but there are full articles of regret. Others don't say, an ignorant first love can make many people, and how many people can cry with some wine.

Zhang Fan has no such feelings, because when he should be young, frivolous and greedy for love, Zhang Fan looks for food all over the world. Unfair and fair, the hardships of his early years have brought his mentality into a mature period early.

When the heart is stable, the hand can be stable!

"Wake up!" Zhang Fan straightened his waist and said to the anesthesiologist.

"Good!"

When they saw that Zhang Fan had completely removed the lesion, the two old people couldn't help stretching their waist. They sat as long as Zhang Fan had the operation.

Old, how many years. It hasn't been like this in years. How lucky Zhang Fan is!

The secondary focus was removed, and the most difficult difficulty was relieved. The remaining primary lesions are much simpler.

However, in the brain, although it is not as dangerous as the brain stem, it is not enough to say that it will kill people, but it is not a problem to get a hemiplegia.

Moreover, because the primary focus is in the patient's language center area, Zhang Fan has to be careful. If he really wants to make others dumb, it will be a big deal.

The country is waiting for the old man to get up and talk. As a result, you make people dumb

At this time, it's up to the anesthesiologist. Anesthetics should not only make the patient feel pain, but also make the patient awake.

It's too difficult to keep the patient awake without saying, but also to keep the patient from being irritable. When he is awake, he can't be irritable.

This kind of irritability can not be avoided as long as it is a person. Don't say a pipe is inserted in the trachea. Even if someone puts his finger into your nose, you can break the opposite square.

In this case, we must use diazepam drugs. More patients sleep, less patients jump up and pull out their trachea!

Therefore, this level should be quite high.

If local anesthesia, needless to say an anesthesiologist, a person who can understand the instructions can use it, but general anesthesia should be at this level. hard! Super hard.

However, for the boss of Bluebird anesthesia, it's a little fun! That is, old Lu has great face. Otherwise, people can rush to stand for you. It's so beautiful.

As the patient began to wake up slowly, Zhang Fan also began the operation“ Move your eyes! " There is no greeting. No matter who lies on the table, Zhang Fan won't greet.

Because time does not allow.

The old man was still confused, but when he saw a strong man wearing a mask and hat, he still cooperated and moved his eyes.

"Stick out your tongue and make a sound! Come on! " This kind of time is not polite. If you are polite and polite, maybe the patient will have to bargain with you.

The knives are all inserted into the forehead. You can't say, "who am I, where am I!"

The old man, with his trachea inserted, turned his eyes and made a sound, just when the old man was busy.

Zhang Fan has started to use a knife. This place is not as dangerous as the brain stem.

As long as the safety of large functions is guaranteed, there is no way to consider small functions, so we can only give them up, because the focus is here.

As for whether you will drool when you talk or when you see a beautiful woman, the doctor really can't guarantee it.

Dig a little, just like pulling out the ears of a child with an ear scoop, gently dig out the cerumen.

Or just like a child digging cream cake carefully, dig gently with a small spoon.

Here's a nonsense that's not nonsense. Cerumen, that's what people say. It's up to you whether you dig it or not.

But don't dig for children and don't be cheap. Once dug, the mucous membrane of the ear canal is damaged. The child may have otitis media after catching a cold, which is painful.

Zhang Fan bit by bit removed the lesion, and no obvious abnormality was found in all functions of the patient. The focus resection at this time is very interesting.

It's like pulling a brain flower in boiling water with a small knife. When people are thinking and talking, the brain is also moving.

Just like a big maggot wriggling in the soft steamed bread, up and down.

After the scalpel gently removed the focus, the brain was still wriggling. It didn't feel uncomfortable without a piece, which means that Zhang Fan didn't destroy the patient's functional area.

After Zhang Fan removed the lesion, he carefully observed the state of the patient and the state of the brain. He nodded to the anesthesiologist and said, "OK!"

There's no need to talk. Everyone is an old doctor. After Zhang Fan finished, the anesthesiologist directly turned the man over again. There was no anesthesia for ten seconds. This is the technology.

With the removal of the lesion, the operation also began to enter the tail.

At the beginning of the operation, everyone watched quietly. Maybe someone was waiting for Zhang Fan to get down. Then they would definitely ignore Zhang Fan and watch the jokes of Lu and Wu.

But with the development of Zhang Fan's operation, everyone changed from sitting quietly to whispering.

When Zhang Fanliang showed his super steady hands and left and right fighting each other, everyone changed from whispering to the buzzing vibration of mobile phones!

what are you doing? They are asking about Zhang Fan. They have to have a bottom in their hearts about which stone this guy jumped out of.

Lao Liang didn't move. He quietly looked at Zhang Fan in the monitor. He didn't speak or send a message. He knew Zhang Fan. He knew Zhang Fan.

However, he didn't expect how long it would take. The rash young man in those days has now become a fleeing Poplar with heels.

Will he hate Zhang Fan? Absolutely not. I'm not a stranger. Why do you want to be evil?

They are all doctors in the medical industry, and they are also doctors in the capital. It's too easy to inquire about a doctor.

After a while, Zhang Fan's information was fed back to them like a resume.

Zhang Fan, male, doctor of Chasu Municipal People's Hospital, assistant to the president of the Municipal People's Hospital, orthopedic resident, under the guidance of old Wu Qingniao.

The top ten outstanding youths of Chasu city won the collective third class merit once for participating in rescue and disaster relief.

He participated in the improvement of liver giant tumor resection. At the annual meeting of the liver society, he observed the operation and successfully removed the huge tumor. He published his paper in the top medical journals in Europe and America and was the second author.

He has participated in the scientific research of skin allogeneic transplantation, and his paper has been published in the top medical journals in Europe and America.

Under his leadership, the tea element city hospital has become a liver disease research center and a skin transplantation laboratory.

"Shit!" When seeing this feedback, many people have such a sentence in mind.

Orthopedic doctor, dry liver, dry skin, and extracerebral surgery today. Pull a calf?

After the implementation again, everyone returned, and the expression returned to the beginning. As for the mood, it's hard to say.

However, the original noisy venue changed back to the original. Everyone quietly looked at Zhang Fan in the display.

You're awesome. Yes, you're awesome. We're not playing with you, okay? You're awesome, aren't you? We don't discuss you. We ignore you!

This kind of thing, ordinary people can't imagine, but it really exists.

On a podium in a small country, people who make many ordinary people cry are no better than Zhang Fan, but what can they do.

In a word, I won't play with you.

No matter how powerful you are, you can take people to grab the operation, but you can't take people to grab our right to speak. No one will stand up and speak.

Zhang Fan began to finish. Zhang Fan was not ready to fix the skull. Although the operation was very fine, no one could guarantee whether the patient would have craniocerebral edema.

Only when we wait for the second stage operation, we can get a steel mesh,

Therefore, Zhang Fan didn't close his skull, but pulled the layer of refreshing pizza and sewed it directly together.

Then, you can see that the old man's head is like a child's skull fontanelle is not closed, and the peristalsis of the brain can be seen directly with the naked eye.

The operation is over!

## **Chapter 607**

At the end of the operation, the patient was awake when the secondary lesions were removed. However, in order not to cause psychological trauma to the patient, Zhang Fan found that there was no problem and asked the anesthesiologist to turn the patient over.

The three cornerstones of surgery, sterility, hemostasis and anesthesia, are indispensable. The invention of antibiotics has improved the survival rate of patients after surgery by N grades.

The scientization of narcotic drugs has increased the survival rate of patients by N grades.

In the early years of surgery, foreign doctors tried their best to knock the patient out and do the operation, and some drunk the operation. Anyway, in the end, you can wake up with more pain regardless of how hard you beat and how drunk you drink.

It's hard to say whether the previous surgery treated the disease or not. In the end, the patient's fear of the doctor is true, which is directly fatal.

Zhang Fan's operation is over. The atmosphere in the operating room was very warm. Zhang Fan's skills convinced several assistants.

"Get to know each other again! Chen Yifang, chief extracerebral doctor of magic Du Wu (a) police general hospital! "

Young man, although not as good as Zhang Fangao, the skin exposed by the mask and hat is much whiter than Zhang Fangao.

And a pair of peach blossom eyes, which is a bit like a boy and a girl. The voice is also a little sweet. Coupled with the Putonghua of modu tone, it makes people feel soft.

However, although the voice is soft, the emotion is true. The handsome man with peach eyes is a little excited holding Zhang Fan's hand.

"If you have a chance to come to Magic City, you must contact me!"

"Yes, I will. Thank you today."

"Ha ha, I should thank you for letting me learn another surgical style. It's super handsome!"

After the handsome man finished, the doctor of Bluebird came over with a smile, "Zhang Fan! Chen Jiang, Lu Ning was my buddy in the upper and lower bunks in college. I knew you.

At the beginning, Lao Lu said that you were the best orthopedic doctor in general surgery. Now I can say that you are the best orthopedic doctor in extracerebral surgery. Ha ha! "

"Thank you! Thank you! " Zhang Fan couldn't help holding each other's hand and saying thanks. Although they all came looking at the face of old Lu and old Wu, Zhang Fan must be grateful.

"Be polite to me. When you have time, I'll go to the frontier with Lao Lu."

.....

"Wang Mingfeng! Good operation, young man. It's nice not to let your master lose face! Keep trying. "

After all, anesthesiologists are much older than Zhang Fan, so although it seems to be a language of education, it is actually a kind of encouragement.

"Thank you, thank you!"

"Oh, no, your master promised to give me a good go. You don't have to thank me. "

.....

"Zhang Yuan, I, you don't have to be polite to me. If you're really sorry, just give me a few days off. I want to take my girlfriend to Kanas, see the hundred mile long scroll, and go... "

Zhang Fan originally wanted to thank Xue Xiaoqiao for his words. He choked them in.

"You can really pick the time!"

"Hey, hey."

"OK, I'll give you ten days!"

"Half a month!"

"Five days."

"Ten days!" Zhang fan can't help it. The doctors in the hospital are too nervous. They are almost a radish pit. If they want to get sick, they have to make an appointment in advance, unless they really can't get up.

The mood in the operating room was warm. Even the nurses came and shook hands with Zhang Fan.

Especially the nurse in charge of extrabrain, "director Zhang, welcome to our hospital for surgery in the future. You're doing very handsome!"

"Thank you!"

The electric classroom is very strange. Zhang Fan's operation is over. Although the discussion is not enthusiastic, the voice is not small.

"Hey, I heard that the citation rate of your intracranial paper was very high last time. Let me study it when I have time."

"Hey, look what you said. You don't want to write. The doctors under your hands are very powerful."

Talk about everything, and even talk about how to maintain the prostate, but I didn't say this operation.

Isn't this operation wonderful? It's against my heart to say it's not wonderful, but it's wonderful. I don't talk about it. Can you jump in my eyes?

Then, talking and talking, everyone slowly dissolved. One or two walked while talking, and naturally left the electric classroom.

Although I sometimes speak very mean, what he says is really reasonable.

Colleagues want to die together. Sometimes, when the level is low, I can't feel it, and when the benefits are huge, it's not without it.

Old Lu and old Wu have seen too many such things. They didn't put this kind of thing in their heart at all.

Instead, they discussed how to give Zhang Fan's homework at home!

Anyway, it's not a subject. If Zhang Fan didn't have nothing to do, they might never think of these people.

At this time, government officials are embarrassed. The first is that who can successfully complete the operation will be the investigation standard for the director of the Department of the capital hospital.

Now we can't let Zhang Fan be the Department Director of the capital hospital. It's estimated that

Second, although Zhang fan can not become the director of the Department of the capital hospital, how to reward him?

pay? The government is relatively passive in this regard. It has to make a lot of reports, not to mention giving a million yuan or tens of thousands of yuan.

When the surgeon really got it, he probably forgot this time.

Give orders to the tea vegetable hospital to promote Zhang Fan? It's a little too much of a fuss. A huge office directly gives orders to a small hospital in a small place. Can it be said in the past?

When the officer fed back this matter to the main leader in charge of the general office, it was the leader after all. After a little thought, people thought about it.

He said, "it's simple. After you're busy here, you..."

"You're still the director!"

.....

"Master, martial uncle! ~" After the operation, Zhang Fan entered the Audio-Visual Education Hall and found that there was no one in the huge Audio-Visual Education Hall except master, martial uncle and government officials.

Zhang Fan suddenly felt astringent in his throat and sour in his eyes. He felt that it was difficult for master and martial uncle to do it.

As for the status of Shifu and martial uncle, if it weren't for him, you could come to this place to rely on the old and sell the old, and look at other people's faces! Zhang Fan thought more and more sad.

As if he hadn't seen Zhang Fan's sad expression, old Lu leaned comfortably on the sofa and said, "what is the basis of surgery? It's a general foreigner. Don't look down on a general foreigner.

Look at your recent homework. Can't you read it without a translation dictionary?

Do you know how we came here?

Without teaching materials, my master threw a book so thick for our martial brothers. " The old man made a gesture, which meant that it was as thick as Kangxi's dictionary.

"Don't say much. Just say it directly and learn this book next week. You preview!

How do we preview, you know. Directly copy books, go to work during the day, have surgery, and stay up late at night.

If you copy a book, you can almost recite it. Where are you. So, I discussed it with your martial uncle.

After that, you will come to Qingniao in two weeks and your martial uncle in a month.

how. Can you do it? "

"You can do it!"

"Well, yes, put away your little daughter. People live by themselves, not others say or see.

Go and wash your face! "

.....

## **Chapter 608**

County doctors can't see Township doctors, and city doctors can't see County doctors. Mordors don't like the capital, and doctors in the capital don't like the whole country.

Ninety percent of the surgical textbooks before the fifth edition were written by doctors in Hanwu.

After the sixth edition, the capital and the devil divided the world equally. So that by the time of the eighth edition, the health management department had to change the situation.

Then, like scattering millet, some leaders of the national provincial-level third-class hospitals have the opportunity to appear and can slowly appear on the teaching materials.

However, the university subjects of internal and external women and children are still divided equally between Mordor and the capital.

Why do you value this so much? In fact, this is the right to speak, which is a kind of

Lu Lao originally wanted to take Zhang Fan to see the world, but he was stopped by Wu Lao.

"It's not necessary. If you have the ability, you don't need to be introduced. Others will automatically know you. If you don't have the ability, it's useless to know anyone.

His most important thing now is to study. Before you and I were 40 years old, which day did you say you didn't read and study?

This line is like sailing against the current. If you don't advance, you will retreat. The rest is dispensable. "

"Yes, I'm a little worried. Zhang Fan, you go to the government to report. It is estimated that they will have a meeting to study.

You don't have to worry about me and your martial uncle. Remember to report to me every half month and to your martial uncle every month! "

"OK, I remember, master..."

Zhang Fan wanted to say thank you, but he couldn't say it. The old man waved his hand and left with Wu.

They are friends all over the world, but they are also known all over the world. They came to the capital. Some people knew that they had come to the capital and had been waiting at the gate of the hospital for a long time.

The two old men left. Zhang Fan's business is not over yet. The government is not worried about whether to go first. He has to go to the ward to see the patients who have undergone surgery.

This is the general doctor's rule. Under the operation number, one is to see if the patient has acute bleeding, and the other is to comfort the patient's family members.

Zhang Fan takes Xue Xiaoqiao and Li Zixiong to vicu. They want to return tea with Zhang Fan, so they follow Zhang Fan to rounds.

Go to the door of vicu, Zhang Fan has no choice. To tell the truth, it's hard to tell how the patients feel in the hospitals in the capital, but none of the doctors who come here for further study don't swear.

Entering the operating room depends on the face of the nurses who specially manage the operating clothes at the door of the operating room. They are more or less big local people, and there are not a few who can't enter the operating room in the capital.

Just because I wasn't polite to the people at the door.

It's really difficult for Zhang Fan to enter uicu. He didn't have the doctor's access card and told the nurse. As a result, people were embarrassed. Zhang Fan thought about it and didn't worry about it.

"Go back to our own hospital!" Zhang Fan stared at the ward for three seconds and said calmly.

"Zhang Yuan, don't take it to heart. In this place, few people come to study every year. People have arrogant qualifications. I came to study at the beginning.

I bought melon seeds and snacks for the door god of the operation mouth every day. I was stunned and maintained for half a month before I could have a hand washing suit. Ha ha! "

"It's all right! Let's go. " Zhang Fan didn't say anything. He looked calm. No one knew how he felt. Maybe

As soon as Zhang Fan came out of the hospital, the government officials came“ Hello, director Zhang. I'm the chief of XX section under the general office. "

"Hello!"

After a brief exchange of greetings, the other party said, "Zhang Yuan, the leaders of the general office are very grateful for this operation. They also asked me to say hard work to you on behalf of my office ~!"

"It's all right. It's not hard. It should be." Zhang Fan smiled.

"Considering the particularity of patients, we are not ready to report to you and find a reporter to report, nor can we give you specific commendation.

However, the leaders still attach great importance to it. If you have any difficulties, you can put them forward, such as life and work. "

After the other party finished, he quietly waited for Zhang Fan's words.

"Let them give you a place for outstanding youth!" Xue Xiaoqiao was lying beside Zhang Fan's ear. It seemed that he was whispering, but the people across the road with a loud voice could probably hear it.

Zhang Fan touched the ear that was called by Xue Xiaoqiao, but he didn't blame him, although Zhang Fan knew that Xue Xiaoqiao must have been intentional.

Then, Zhang Fan stared at the officer. Zhang Fan also thought it impossible, but he couldn't afford it. Maybe someone else was generous and really gave one?

"Ha ha!" The other party estimated that he had already cursed his mother in his heart. The officer with good quality, Chengfu and self-restraint didn't swear in his mouth, that is, he shook his head.

"Let the government give Zhang Yuan a certain bonus! If you don't hold a commendation meeting, you can always hold a commendation meeting in the industry! "

Xue Xiaoqiao was pushed away by Zhang Fan. His ears couldn't stand it. He simply spoke openly for Zhang Fan.

Is government money easy to take? And a commendation meeting! It's really whimsical. Don't say that the government won't open it. Even if the government does, Zhang Fan doesn't dare to answer it.

Without certain contribution, dare you stand on that platform to receive recognition? After an operation, I wanted to be a meritorious person. Xue Xiaoqiao is also no one.

This time, the officer smiled directly, not smiling, but as if he had been amused by a joke.

"I think you'd better consider being more specific." People speak at a high level. To be more specific, it means that you want to be big or small!

"No request, it should." Zhang Fan refused directly. Other Zhang Fan didn't know, but he sold instant noodles and knew a truth. What he bought was never smart enough to sell.

Don't you want to be specific. I won't say it. It depends on what you give.

"You are now an assistant dean at the regional level. Do you think there is a suitable hospital in niaoshi? I think you can go to niaoshi's Hospital as a vice president."

"Vice president of bird market!" Zhang Fan doesn't have to think about it. Don't give it to me. Just then, Ouyang's phone came in.

"How's it going?" The old lady was always worried. She pinched the time, estimated that the operation was over, and then called Zhang Fan.

"Dean, everything is going well!"

"That's good, that's good! That's good. All right, come back early if you have nothing to do. If you want to travel around the capital, just stay a few more days. " Ouyang is going to hang up.

Zhang Fan walked away a few steps and whispered to Ouyang on the phone: "Dean, before the operation, the government said..."

Zhang Fan told Ouyang about this kind of thing. Zhang Fan still has no bottom in his heart. He really doesn't know what he wants.

Five million, they won't give it! I want 50000. I think it's not easy to open my mouth to the country. It seems to be a bit of a loss!

Zhang Fan's technology has improved. In fact, his mentality is still ordinary people.

"Hehe, this thing. I tell you, if your master does this operation, it is estimated that he can go to the national podium.

Nothing else, just icing on the cake. And you, don't think too high. He wants what he gives.

And be careful not to put too much emphasis on personal interests, okay? It's not good for your future development.

Even if we want personal interests now, it is also a small head. We should have a long-term vision. "

When Ouyang said this, Zhang Fan extinguished the fire of desire in his heart.

"Where can I get equipment for the hospital?" Since personal interests do not bring any benefits, I will give benefits to the hospital. There will be no mistake!

"Ha ha, you can have this. Don't be stingy. Don't talk about hundreds of thousands of color Doppler ultrasound. If you want it, you have to be big.

If you want a few million, you may have hundreds of thousands. "

Ouyang, who was standing by the window, called. As a result, he was excited and gave Zhang Fan advice.

"OK, Dean, I understand!"

"Remember, speak tactfully, but we must reflect our difficulties."

At this time, Ouyang wanted to negotiate in person, but she underestimated Zhang Fan. Although Zhang Fan is not mature in some aspects, after two years of edification, he has already had some of Ouyang's

After the call, Zhang Fan smiled and said to the office officer, "sorry, the hospital leader's call.

In fact, even if I don't do this operation, others can do it. My coming to the capital is an improvement for myself. There's really no need to embarrass you for me. "

Listening to Zhang Fan's words, the other party completely became very polite.

"What you said is modest. If you don't raise money for meritorious service, it will chill the hearts of technicians. Please be sure... "

Before he finished, Zhang Fan spoke.

"I'll forget it myself, but this time I came to the capital, I really saw the world.

In our frontier, there are many diseases because the equipment can't keep up, and there are many, many regrets.

So, taking this opportunity, I wonder if you can help us. "

The officer thought a little, thought about the explanation of the leader, and then said, "you can put it forward. We can go to the meeting for details."

"Oh, in fact, the equipment required is not much or large. It's just a small piece. It's really not a big equipment in the hospital.

Is whether the surgical CT can equip us with one. The main reason is that our hospital has developed too fast recently.

Otherwise, we'll buy it ourselves. Since the leaders care about us this time, please help us. "

Zhang Fan finished, and the other party's face didn't change at all. Xue Xiaoqiao and Li Zixiong looked at Zhang Fan like monsters.

"My God, it's dark enough. Zhang Yuan dares to open this tooth!"

"Er..." Li Zixiong went down directly.

Surgical CT is not big, not much, but this thing is not cheap, better, tens of millions, there is no problem! Zhang Fan's mouth is really big.

The officer's face remained unchanged, not that he was not surprised, but that he did not understand. Zhang Fan is bullying laymen.

"OK, please type a report on this matter. If you can, we will promise!"

"OK! OK! " Zhang Fan smiled like a thief, holding each other's hands again with great enthusiasm.

"What's your personal problem?"

"No, I don't have to think about it personally. I don't have to worry about the leaders!" Zhang Fan knows that this kind of thing is of no great benefit to him personally. He just gives full play to his character.

"Really not?"

"Really not!"

"Well, Dr. Zhang is a model for our study. In that case, our leaders also explained that director Zhang came in a hurry.

But when we go back, we must pay attention to talents. Please, the car is ready. We will personally take you back to the frontier. "

That's what they're prepared for. The people from the general office of the government should personally send Zhang Fan to the frontier.

If Zhang Fan makes a personal request, there will be no seeing off. If he doesn't make a personal request, they will send Zhang Fan back to the frontier.

It sounds like Zhang Fan has suffered a little. Can't I go back by myself if you don't give it to me?

In fact, this is the Tao inside.

The car is not a red flag, but four laps. It's not a high-end car with four laps, but an A4.

Get on the bus and go straight to the airport.

This time, Zhang Fan's treatment is not high, but it is not low. At the entrance of the airport, after a simple inspection, the car drove directly to the apron.

I've seen a car pick up at the airport, but I haven't seen a person send directly to the airport.

Zhang Fan is also stupid. Then the officer personally took Zhang Fan on the plane. First class! When he came, Zhang Fan was on the plane of the drag racing party. His chair hurt his ass.

This time it's different. Zhang Fan, Xue Xiaoqiao and Li Zixiong are first class.

It's not Zhang Fan. They can't afford this first class. When they pay for it on weekdays, they always feel that it's a bit unfair to sit in first class.

The officers did not fly first class. There are standards for their travel.

Just after Zhang Fan got on the plane, the official letter of the general office was also sent to the border province.

Our cadre XXX will take flight XX with Dr. Zhang Fan and arrive at niaoshi on the x day. Please contact the relevant departments of Frontier Province!

In just a few words, preparations have begun on the border.

Zhang Fan is coming!

Zhang Fan was personally sent by the leaders of the general office!

In the airport, the red carpet began to be paved.

In the past, Zhang Fan was famous for tea, but he was just a doctor.

This time, it's different. People in bird market don't know how embarrassed Zhang Fan's trip to the capital is, but what they know is that Zhang Fan has been recognized by the government and the capital.

Just like preaching, now Zhang Fan's status in the frontier is instantaneously high. I don't know how many grades.

"Will the list of experts come out?"

"It's already out."

"Take it back and refer Dr. Zhang to the expert Council!"

"Yes!" The little clerk in the bird market can't close his mouth.

Zhang Fanjin is already the youngest one in the expert database. Now he is on the Council.

Darling, this is the rhythm of taking off. Members of the Council, who is not the president of the provincial hospital.

Even the Secretary of the hospital can't get in.

The little officer looked at Zhang Fan's information. The column of age directly stimulated the officer.

The plane landed, landed steadily“ Civil aviation pilots are still mature! " This is what Zhang Fan wants to say when he gets off the plane.

When the cabin door opened, I saw a lot of black cars parked on the side of the plane, all cars, all four circles.

Red carpet pavement, a group of elderly people, waiting in line to shake hands with me Zhang Fan!

"Hard work! Dr. Zhang, you are a model of our frontier! "

"Hard work!"

"This is frontier XXX"

"This is frontier XXX"

Zhang Fan is a little confused! However, I am still happy. What kind of loneliness and powerlessness is too painful during the trip to the capital.

Here, Zhang Fan finally thinks he is a character. Who can't be proud!

## **Chapter 609**

Shanda, for an ordinary person, this welcome is really Shanda. Other Zhang Fan didn't understand, but all the presidents of provincial hospitals came.

And they're still behind!

The people who greeted Zhang Fan were more enthusiastic and more polite. It was almost noisy with gongs and drums.

Get on the bus. Although it's an Audi, the license plate number is almost zero.

And this time with mounted police. Zhang Fan sat in the back row, and there was an elderly man sitting with Zhang Fan.

"Doctor Zhang showed his face to our frontier. In the past, we all felt that culture and education were no more than Yumen pass. We all felt that we were an overseas place on the edge of the mountain.

ha-ha. This time, when I learned that Dr. Zhang is so excellent in the capital, I drank a glass of wine for you.

The news is so exciting. This shows a problem that the health cause in our frontier has made great progress.

Dr. Zhang, I think you have wasted your level by working in tea vegetarians. You should come to the capital to give more room to your level.

After the discussion in the team, the affiliated hospital is the strongest outside the brain. They urgently need an executive vice president managing outside the brain to lead them to a higher field.

What do you think, Dr. Zhang? "

When he just graduated, let alone the executive dean, as long as he gave the establishment, which department of the provincial hospital, Zhang Fan could go happily.

In those days, such things were things that Zhang Fan dared not think of.

But now, it's like a provincial hospital, the executive vice president of a provincial hospital. As long as he nods, Zhang fan can get it easily.

Although there are certain external factors, it also proves from another aspect that Zhang Fan's two years of hard work is worth it.

"Thank you. Thank you for your strong support to our medical industry. As for coming to the Affiliated Hospital, I really can't do it.

Because during this period of time, I have to study. "

Zhang Fan said with a smile. The most important thing is self-knowledge. In tea, Zhang Fan is nominally an assistant. In fact, he is the executive dean of surgery.

However, he also knows that he has no interest in the executive dean. When I first took office earlier, I still worked hard.

As a result, he found that he was not made of this piece of material. If there were no Ouyang, Zhang Fan would have to change places if he had to change the dean who didn't deal with it.

The vice president of a provincial hospital, who didn't come up slowly after many years of deep cultivation in the local area.

The president of a small hospital may have parachuted by relationship. Big hospitals, especially the provincial top hospitals, you try, airborne? If you can't fall, some awesome experts can bully you to death.

This is why there are few foreign leaders in provincial hospitals.

Zhang Fan is not afraid of business, but he has no mind to manage administration. To the Affiliated Hospital, you can be as free, special and beautiful as tea!

Therefore, Zhang Fan refused directly.

"It seems reasonable that you can be recognized in the capital. What, did your teacher ask you? "

Since he wants to receive Zhang Fan, of course, he must be clear about Zhang Fan's information.

.....

Next, there will be no nutrition. The largest reception hall in the frontier. Under the huge picture of national unity, Zhang Fan was warmly welcomed as the guest of honor.

"Zhang Yuan, Congratulations! I didn't expect you to be so powerful outside your head. Ha ha, I thought you were following the path of ordinary foreigners.

It's my fault. I'll give you a fine. " With that, the president of the affiliated hospital had a drink directly, and then didn't wait for Zhang Fan to speak.

Directly took a red application, "this is what our hospital is looking forward to. Please be a distinguished expert of our hospital! "

For this, Zhang Fan smiled. Distinguished expert! For a doctor, this is honor.

Then, the president of the provincial people's court and the president of the second Provincial People's court, one by one, came to Zhang Fan personally and sent a letter of special employment.

Zhang Fan's young body sits straight in the middle of a circle of middle-aged and elderly people, especially conspicuous. At the regional level, Zhang Fan is a success.

Ouyang was stunned when he learned that what Zhang Fan wanted was bedside CT and special CT in the operating room.

"How dare he?"

"Well, can we type our report. I guess... "The director of the medical department also can't believe it. This hospital really dares to open teeth.

"Needless to say, the report must be called, and it must be called immediately. What big unit did he kindly promise not to perform? "

"Good! Through the tea government? "

"What does this have to do with them! Don't pay attention to them, otherwise the report won't know when it will be sent. "

Ouyang has begun to think that this CT is hers.

Capital, Zhang Fan couldn't get into vicu. He turned and left! The government officer doesn't understand. He just comes to complete the orders of his superiors.

Lao Li had to call Zhang Fan: "Zhang Yuan, it's unkind! I didn't say a word when I left. I'm still waiting for you to have an operation. "

"Brother, you people in the capital bully students. I can't even get into the ward! But the primary lesions have been resolved.

There's no problem with transplanted skin! Elder brother, the older you are in the Jianghu, the less daring you are. "

Zhang Fan teased Professor Li on the phone. Since this incident, the relationship between Zhang Fan and Professor Li has been one step closer.

"You left in anger this time. Although it sounds a little wronged, at your age, you have the right and ability to go in anger.

Brother, I really envy you. However, I believe that when you come again, I may need to look up at you, not at the same time! "

Lao Li made a meaningful remark.

"Brother, I'm serious. I... "

"Oh, Zhang Yuan, don't be modest. I'm looking forward to that day! Contact more in the future. If you don't come, I'll be ready for surgery. "

"OK! More contact. " After hanging up the phone, Zhang Fan was stunned for a while. He remembered

the empty electric classroom, the mood when he stood at the door of vicu, and his confusion in a small restaurant after calling master at that time.

Although he didn't swear in his heart, he must go to the capital again, just as Professor Li said, next time

In the bird market, Zhang Fan had many familiar people. There are doctors in the hospital and many patients. This time, Zhang Fan's name was called in the bird market.

"You know, Zhang Yuan, a tea vegetable, returned from the capital. I heard my teacher say that at that time, almost no one dared to stand up for the difficulty of extracerebral surgery.

Zhang Yuan went up directly under pressure. You don't know. It is said that foreign experts were halfway there.

Later, Zhang Yuan fought a beautiful turnaround, and our Chinese leaders specially received Zhang Yuan.  
"

"Well, I heard that too. Didn't you see the posture this time. When welcoming Zhang Yuan, the airport of bird city can hold a party committee meeting. "

The winner is always a legend.

.....

After the trip to the bird market, Zhang Fan really gained a lot. The letter of appointment of distinguished experts from n hospitals did not say, but also became a member of the Council.

Professor Zhao Jingjin is envious of this title. For regional doctors, this title is almost the peak they can achieve in their life.

Return to tea, Zhang Fan really can't wait to return to tea. Tea vegetable is a small border town, but it has its own family. Although it is not his hometown, it always makes Zhang Fan feel very comfortable.

"When will my brother come back. If I don't come again, I'll start school. " Jingshu is shopping with Shaohua in her arms.

"I'm back. I've arrived at the bird market. I'll be back tomorrow and the day after tomorrow. Don't be a train when you go back to school this time. My sister-in-law will buy you a plane. " Shaohua looked at his little sister-in-law and said with a smile.

"I have my own scholarship. I'm embarrassed to use your money."

"What are you talking about? You're still in school. It's right to spend your brother's money. Don't say such words again.

Otherwise, your brother thought I had to be so mean and stingy. You should think more about our land this time. "

"You've been promoted. Still thinking about the land?" Jing Shu looks at Shaohua in surprise.

"If I didn't get a promotion, I might hesitate. Now that I get a promotion, I must resign." Shaohua said firmly to Jingshu.

"Why? Do you think... "

"Silly girl, I know what you mean. Do you think I'll be embarrassed if I get your brother's advantage?

In fact, if your brother and I get married, it's natural for me to get his light.

I won't be embarrassed. I'm not the first or the last one to touch my husband's light. I'm sorry.

But not now. Have you found out? Your brother is getting better and better.

From doctors to assistant presidents, from counties and townships to provincial capitals, now cattle have gone to the capital.

If I continue to be a leader in the unit in the future, the superior leaders of some units or relevant units will entrust me to beg your brother.

Even if it's not difficult, if it's really difficult for your brother, do you say I agree or not.

Moreover, your brother has a soft face. Even if it is difficult for him, he rarely refuses others.

Anyway, I resigned. There's still time to take care of your brother.

In the future, I'll be beautiful at home. Maybe we can get rich, and then I'll raise your brother.

Hey, hey! " The more Shao Hua thinks about it, the more proud he is.

"Sister in law, my brother is so lucky. I envy my brother for finding such a good daughter-in-law. " Jing Shu leaned against Shao Hua's arms and said slightly coquettish.

Shao Huaneng thought that Jingshu was closer to her sister-in-law.

"Hehe, I am also a lucky man. You see, I'm more free now. I don't have to worry about house, car and ticket. My mother-in-law and sister-in-law are easier to get along with each other.

What else should I do as a woman? "

While they were shopping, Zhang Fan got on the plane. Because there was no way to determine the time, they didn't specially inform them of the time to go home.

Shao Hua didn't have to pick up the plane this time. The tea vegetable government came forward. Whether Zhang Fan is shining in the capital or not, I don't know about tea.

However, tea Su knows that Zhang Fan was received like a state guest in the bird market.

So, another round. However, in tea, Zhang Fan is much more complacent. Old lady Ouyang is his shield. What can be promised and what can't be promised, Ouyang helped Zhang Fan deal with it at the first time.

However, this time, Zhang Fan's mobile phone has a lot of phone numbers.

Is it easy for a doctor to be invited to have an operation in the capital? That's what people far from the capital think. Regardless of occupation, regardless of height.

## **Chapter 610**

"Zhang Yuanhao!"

"Zhang Yuanhao!"

"Zhang Yuan, Zhang Yuan, can you help my relatives? He has been hanging up your number for several days and can't get it. He often has headaches. He went to many places and didn't see it. "

After Zhang Fan went to work, his colleagues became more enthusiastic. The Chinese people's yearning for the capital is not an ordinary enthusiasm.

When the traffic was inconvenient, if anyone had a box of capital specialty Longxu crisp, my God, it could go from the street hair to the end of the street.

What's good? No, it's not delicious at all, but because it's from the capital.

Now, although the traffic is developed, people who may go to the capital can also go to the capital 30x hospital to fly a knife. Darling, there is such a person around. Who doesn't want to know quickly and who doesn't want to maintain.

When Zhang Fan went to the capital, others envied him. However, he knew that in the capital, he was nothing but Lu's disciple at best.

Therefore, the iron must be hard by itself. What if the diagnosis doesn't work? The liver is over.

What if there is no team to take action? Training is over. Zhang Fan doesn't believe it. If he's not in the capital, he can't become a climate?

Say Ouyang doesn't love power. She defends the vice president and Secretary like a thief. She wants to make them dumb.

Say she loves power, but those who support Zhang Fan and Ren Li, the director in her heart, can no longer support it.

This time, Zhang Fan specifically proposed to establish a backbone team of surgical departments.

Ouyang agreed without asking.

Jingshu's holiday is over. Zhang Fan and Shao Hua send Jing Shu to the airport. Zhang Fan's parents had already gone to the farm.

"Sister in law, brother, I'm gone. I'll come again in October. Hey, hey, when can you have a baby? "

"Go! Study hard and don't be reluctant to eat or wear. Don't worry about falling in love!

Remember this call. It's my elder martial brother, from mordu. If something urgent happens, call him. "

Zhang Fan tries to pretend to be an elder. His sister is getting older and older. Now many times, Zhang Fan feels that he is about to lose the feeling of taking care of children.

Although his elder martial brother doesn't have the Jianghu status of Shifu and martial uncle, it's really difficult for ordinary things in the magic capital.

Only his own sister, Zhang Fan, would explain it like this.

"I see!" Jingshu doesn't like to listen to her brother's nagging like an elder.

"Sister in law, hug!"

"Go to school and remember to find someone!" Shaohua whispered to Jingshu.

"Sister in law!" Jingshu said a little angrily.

Then he hugged his brother " I'm leaving. You have to listen to your sister-in-law. Don't be tired of yourself. Don't stand too long during the operation. "

"Well, go. Be careful on the way. Call when you arrive."

This time of separation, Zhang Fan was not as sad as sending his sister to school for the first time. Maybe he was used to it. Maybe he was relieved to see that his sister was very happy in all aspects.

"Zhang Fan, I've written my resignation report. Have a look." Sent Jing Shu away. On the way back, Shaohua took out the written resignation report to Zhang Fan, and she waited to discuss it with Zhang Fan.

"Huh? Unhappy at work? Aren't you all promoted? " Zhang Fan never took this matter to heart.

It's not that he doesn't pay attention to Shaohua, but that he doesn't feel the need to leave.

"Hehe, you, look at it. Do you agree to my resignation? If I became a housewife in the future, would you dislike me? "

Shaohua stares at Zhang Fan. Although Zhang fan drives a car, he doesn't have to look. He also knows that Shaohua is staring at him.

"Actually, I've wanted you to resign for a long time. How tired the bank work is. The box for money is so big. You have to do manual work as a woman.

Counting money every day is not my own. I have cramps when I count money.

Quit, absolutely quit, what housewife. Without a successful woman, there is no decent man.

I guess I can't wash my clothes without you. Look at me now. Walking in the street, who doesn't praise me for being handsome? Praise me for dressing appropriately?

It's all your credit. Without you, I'm on the street. It's estimated that everyone thinks I'm fleeing from Africa. "

Zhang Fan said this in his car in a state of oath.

"Hey, you're exaggerating. Originally, my little stone was very handsome, but it was a little black.

Then I really quit. I'd like to think about it. The family member of your temperate patient last time is the one

You know, that's the girl. " Shaohua was deeply afraid that Zhang Fan had forgotten, and specially emphasized it again.

"Well, I remember, what's the matter. What does she think? Don't just listen to her. Her house isn't here. Pat your ass and leave. Where can you find someone else.

Moreover, as far as her hobby is concerned, I really don't trust you to cooperate with her. "

This time, Zhang Fan is obsessed. Which girl is too terrible. When I think about it, Zhang Fan's egg is cold. It's really cold.

Originally, there were fewer Chinese girls than boys. Now, she has to consume part of it herself. Isn't it creating social contradictions!

Moreover, the most important thing is that she wants to cooperate with her daughter-in-law. Zhang Fan is not at ease when he thinks about it, so he specially emphasized it again.

"Ha ha, dead! That's terrible. People still don't like our small business. She contacted some essential oil manufacturers for me, and these people also promised.

As long as the flowers are qualified, they will come and take them away directly. "

Shaohua looked at Zhang Fan with a smile. If Zhang Fan hadn't been driving, she wanted to lean against Zhang Fan's arms.

"Oh, why not be a farmer? Want to be a spice tycoon? I don't understand this. Do what you think is appropriate. But the premise is not too tired. "

Taking advantage of the red light, Zhang Fan quickly turned his head and looked at his lover sitting next to him.

Shao Hua sat beside him. He was very quiet and had a special peace of mind. I guess this is love.

"How can we be tired? It's all mechanized. Moreover, many people on the farm know that we want to plant lavender and can sell it. Many people have come to contact us in advance."

"Well, the news is well informed!"

Zhang Fan looked at Shaohua in surprise. He knew that Shaohua and Shaohua's parents were definitely not big mouth people.

"It's not my aunt yet. She's in love with prayer now. My God, she organized the old men and women of the upper and lower farms.

I once met them in the small square of the farm. My God, which of their singing methods is like chanting scriptures. I really didn't hear them singing! "

"Well! Aunt, hi, you are really a god! ~ "

"Who said no. She learned that I want to plant lavender, okay? It's no use for a day. The whole farm knows it. She is a news station directly. "

Shao Hua is also a little unhappy.

"It's all right. Just say it. But don't make any promises. I don't think any girl is reliable.

It's not that we don't help others. You say that if we can really be promised to buy, there's no problem. I'm afraid that people will ruin their promise at that time.

After a hard year, no one bought it at last, which is a sinner. "

Zhang Fan specially said to Shaohua.

"Well, I didn't make a promise. I just said, "I want to plant lavender. I didn't say anything."

"That's good! My daughter-in-law is smart. " Zhang Fan looked at Kong and flattered Shaohua.

"Who is your daughter-in-law and makes you beautiful."

"By the way, it's more convenient for you to go to the farm every day and buy a car. Otherwise, you can drive this car. I'm close to the hospital now. "

"I don't want your car. Which license plate do you have? When I go to the county, the traffic police salute me. I don't know who I think I am.

I've been watching cars lately. But there are too few four S stores here. There are not many cars. "

"What car do you want. Let me ask for you? " Zhang Fan is curious to see his lover and what kind of car he wants to buy.

"Buying a pickup truck can not only pull goods, but also pull people. It is practical to be a tractor at a critical moment."

"Well! Isn't it easy to buy a pickup truck. Pickup four S stores all over the street. "

"No, I want to buy a new one. I heard that the new one is fuel-efficient and of good quality. It is said that the old engine was made many years ago. Which one is very old!"

Shao Hua holds the data like a financial fan. The girl is really interested.

Living at home is actually like this. When the old saying is over, you can't eat poor, drink poor, calculate unclear, and drink wind all your life.

"OK, send me a text message about the model and I'll ask you. I know the owner who sells cars in the bird market. "

"Well, OK." Shaohua kissed Zhang Fan.

With Zhang Fan's consent, Shaohua's resignation was also on the agenda. After work, she submitted her resignation report.
