

Clan Cultivation 44

Chapter 44

"Xuanji, I know you have always been low-key, you don't like to cause trouble, and you don't like to be in the limelight, but after the foundation is established, it will not only improve the morale of the family, but also improve the cohesion of the family. When people's hearts are scattered, the team is not good. I took it. But as long as people don't get confused, it's not a big problem."

"The two nearby Zifu families and the 18 foundation-building families will be invited over to exchange some feelings. On the one hand, our families are constantly competing with each other; on the other hand, we have to join forces to fight against the Danyang faction. It's being squeezed by the Danyang faction."

Speaking of the latter moment, the Great Elder looked solemn and began to say something to Lu Xuanji.

These things, the past moments do not need to know.

But after Lu Xuanji established the foundation, he was qualified to know.

The Danyang sect is one of the three major sects of the Chu State, occupying the 12 counties of the Chu State and administering more than 300 cultivator families. The continuous collection of taxes and offerings from the subordinate cultivator families made the Danyang faction more and more prosperous, while many cultivator families became more and more impoverished.

To join the Danyang faction, it takes 20 years for a cultivator in the sect to reach the peak of Qi; but to stay in the family, it takes 30 years, or even 40 years to reach the peak of Qi.

Similarly, if the cultivator family wants to buy the foundation pill, they often need 15,000 spirit stones; but in the Danyang faction, they only need 10,000 spirit stones. In the Danyang faction, foundation building Dan is not only cheap, but also numerous.

The Danyang sect has abundant resources, and many geniuses in the family have joined the Danyang sect. The elders and patriarchs in the family can't stop it, because blocking the children's good future may lead to the hatred of the younger generation in the future.

While sucking blood from the major families, constantly exploiting them, and accumulating a lot of wealth; on the other hand, using these wealth and absorbing some geniuses to join, the sect became stronger and more prosperous.

But the cultivator's family, not only the wealth has been exploited, but the talents of the family are still passing away, which can be said to be more and more difficult.

Many cultivator families have been developing for decades, but they have not been able to develop for hundreds of years, and some are still declining.

Not only that, every time you fight a hundred thousand mountains, fight against monsters, and fight against demons, you must recruit monks from the monk family, rush to the front, and try to go to some dangerous areas. Many monk families are often injured after the war. move bones.

Although, the Danyang faction also gave compensation strategies. For example, if a foundation-building cultivator was killed in battle, the foundation-building dan would be compensated.

But a Foundation Establishment Pill is comparable to a Foundation Establishment cultivator.

Taking the Foundation Establishment Pill only has a three-level probability of becoming a Foundation Establishment cultivator, which is much inferior to a living Foundation Establishment cultivator.

The Danyang faction, while exploiting taxes, scavenging for talent, and at the same time, was attrition due to war, constantly consuming the power of the major families.

Many cultivator families not only fail to develop, but also decline at a certain stage.

"Aren't they going to resist?"

Lu Xuanji asked.

"Resist, how can you resist? Danyang Sect has three Jindan ancestors, any resistance is courting death." The elder said: "What we have to resist is not the King of Hell, but the little devil. The little devil is the most difficult to deal with. In order to resist the Danyang sect Those little ghosts, our

Wu family, Ye family, Lu family three families, and some small families have maintained a tacit understanding."

"You and Xiaoxue's foundation building banquet will not only be held, but also a big one."

"The poorer you are, the more you can't open the door, the more you have to be well-dressed, and the more you have to be in high spirits."

Seeing the Great Elder say this, Lu Xuanji could only nod his head, and could only agree to the banquet.

In order to show the strength of the family, the first elder also wrote a letter to Lu Tianwen, the elder of the Danyang faction, asking him to return to the family and show up at the banquet to suppress the situation.

In order to prepare the scenery for a full month, the high-quality spirit rice, monster meat, spirit fruit, spirit wine, etc., cost more than 2,000 spirit stones, which will make the family's offerings relatively nervous. Trapped in hardship. Some feel like a swollen face and a fat man, but it must be done.

Because if you don't do this, you can't deter a group of people.

The weaker you are, the more you need to dress neatly, and the more you have to pretend to be forceful; on the contrary, those powerful cultivators, because of their strength and confidence, do not need to pretend to be forceful, but can dress casually and calmly.

Danyang School, in the medicine garden.

Lu Tianwen flipped through the letter and sighed, "There is something wrong with the Lu family. I have to go back... Otherwise, the collapse of the Lu family will not be good for me."

After collecting the letters, he directly asked the elders of the sect to take leave.

Packed up everything, left the sect, and walked towards Changyuan Mountain.

Walking with the sword, it took more than 20 days to reach Changyuan Mountain.

"Meet Uncle."

At the gate of the mountain, Lu Xuanji met the uncle of the Danyang faction.

This uncle, at the age of twelve, left the family and went to the Danyang School.

In the early moments, the uncle received some support from the family before gaining a firm foothold in the Danyang faction; similarly, after the uncle became the foundation, he also gave the family some help. The Danyang faction has established a certain network of contacts.

In his spare time, this uncle would go home and live for a while.

But his relationship with the Lu family also faded after his parents took over one after another.

"you have grown up."

Lu Tianwen said dryly, somewhat unfamiliar with this nephew.

But among the unfamiliar, there was a hint of surprise.

When this nephew's family was in decline and resources were scarce, he only took the Foundation Building Pill once to be successful in foundation building. It seemed that his talent and aptitude were very good.

There is only a 30% chance of becoming a Foundation Establishment cultivator.

The first time he took the Foundation Establishment Pill, it was the success of the Foundation Establishment, which was called a genius.

Among the sects, many cultivators took it twice or three times in a row, and finally succeeded in establishing the foundation.

"Uncle, the training speed is a little slow, it's just the fourth floor of the foundation."

Lu Xuanji frowned slightly.

This uncle was only 30 years old when he was building a foundation, but now he is 110 years old, and he is only building the fourth floor, so the speed is a little slow.

"Nephew, sects have the benefits of sects, and families have the benefits of families. The sects cultivate you to make you work well. In the Danyang sect, the benefits are very good during the Qi training period, the tasks are relatively few, and the training time is relatively small. It's a long time; but after entering the foundation, the tasks are relatively complicated, and the training time is relatively reduced... I think this is not bad, at least before sitting, I have a chance to attack the Zifu."

Lu Tianwen said with a smile.

In the family, it is the opposite. During the Qi training period, the tasks are more complicated and the training time is relatively short; but after the foundation is established, the tasks are relatively easy and the training time is relatively long.

This is the difference between the family model and the sect model.

It's hard to say whether this model is good or bad.
