

Clan Cultivation 49

Chapter 49

After the banquet was over, Mt. Nagaki regained its calm.

On Changyuan Mountain, where the spiritual energy is most concentrated, Lu Xuanji opened a cave, Ye Feixue opened a cave, and the two caves were close together.

I settled in Changyuan Mountain, focusing on cultivation, and leaving other sundries to outsiders.

Although the Lu family has declined and lost its nine-story property, there is still one spiritual ore, one hematite ore, three spiritual mountains, and more than a dozen shops, etc.

All these industries were handed over to the monks in the late stage of Qi training in the family who came to take over.

As for the foundation-building cultivators in the family, they mainly focus on cultivation.

Low-level monks work hard to earn money to support high-level monks; high-level monks work hard to improve their cultivation and protect low-level monks.

In the instructions of the first elder, the cultivator of the foundation should not leave Changyuan Mountain easily, this is for safety reasons; even if he wants to leave, he will leave quietly, and he must go together to avoid being killed by the enemy halfway.

In the cave, Lu Xuanji opened the storage bag.

In the storage bag, pour out spiritual ore, hematite, mysterious iron crystal, mithril, fine gold, etc., about dozens of materials.

"The phone is going to be upgraded."

Lu Xuanji called, and the phone appeared on the palm of his hand.

The Xiaomi mobile phone is about the size of a palm, the screen is black, and the whole is flashing silver.

At this moment, the phone screen changed.

Some text appeared.

[In the process of mobile phone upgrade, upgrade now, or delay?]

【Upgrade now】

At this moment, a black vortex appeared on the phone, and immediately the spiritual ore on the sword ground was swallowed up.

Then, the phone was changing and entered the shutdown state.

[While the phone is turned off, the system upgrade will be completed after three days]

Just like that, the phone went silent.

Time passed, and after about three days, the phone started to restart, and a water bottle mark appeared on the screen, showing the digital format [1%...4%...10%...20%...89%...]

Finally reached 100%.

The phone is changing, the screen is flashing, and it is being upgraded.

A blue lotus flower appeared, exuding tranquility and peace.

brush.

After a while, the Xiaomi phone returned to calm, turned into a stream of light and entered the sea of knowledge, dormant.

Lu Xuanji checked the Xiaomi phone.

The mobile phone was upgraded to become a second-grade spiritual weapon.

After the upgrade, the storage and computing functions of the mobile phone increase,

[Document Management], the number of books that can be stored has increased from 100,000 to 300,000.

[Fate Deduction] The breadth and depth of the deduction are increasing.

In addition, a function has been added, [Baidu Map]

[Baidu Map] is mainly a map function, click the screen, and the world map will appear immediately.

There are simple topography, river distribution, and endless sea above.

The sea area is much larger than the land area.

Then, it kept shrinking, and it was located on a continent in the east.

Shrinking again, the map shows the one hundred thousand mountains, Chu country, Yue country, endless forest, etc. Many of them are not marked on the map, they belong to no-man's land, and there are monsters, insects, etc. running rampant. As for human settlements, it is only a small part of the map.

The map is constantly shrinking, and as the map shrinks, the mountains, rivers, terrain, etc. on the map are also becoming more accurate.

When the map was shrunk to a hundred miles, it clearly showed Changyuan Mountain, Lingtian, Medicine Garden, rivers, lakes, people walking, etc. Everything was clearly visible.

There is also a small point.

The white dots represent mortals.

The little red dots represent Qi cultivators.

The yellow dots represent the Foundation Establishment cultivator.

The little blue dots represent the cultivators of the Purple Mansion.

As for Jindanxiu, it cannot be shown.

"Baidu Maps, this is to help me know myself and my enemy and win a hundred battles. Whether it's a battle or running away, there are options."

Lu Xuanji flashed a flash of joy.

Suddenly I thought of the experience of going to Shiwanda Mountain a few years ago.

At that time, when I entered it, the mobile phone [Fate Deduction] was in a frenzied warning scene.

Because there were monsters who came to investigate, his information was captured by monsters.

At the same time, the information of the monster was also captured by the mobile phone, and the mobile phone gave corresponding reminders according to the level of the information.

are passive.

But now, relying on [Baidu Map], he can take the initiative to investigate and get information in advance.

"[Baidu Map] will be detected by those monsters?"

Lu Xuanji asked.

【can not】

Listening to the answer from the phone, Lu Xuanji breathed a sigh of relief.

While playing with the phone again, Lu Xuanji realized that the three functions of the phone, when used in combination with each other, are more powerful.

For example, in [Fate Deduction], it is necessary to have a massive knowledge reserve in order to conduct deductions. The strength of the deduction depends partly on the information reserves in [Document Storage].

[Fate Deduction] and [Baidu Map] are superimposed and used, which can actively conduct exploration and reserve enemy information in advance.

Familiar with the functions of the mobile phone, after playing for a while, Lu Xuanji began to try [Fate Deduction]

[What natal magic weapon should I refine?]

Lu Xuanji has an input problem.

During the Qi training period, there is no need to refine the magic weapon of birth destiny, and you can buy spiritual tools at random in some shops.

But at the foundation-building stage, many monks will try to refine the magic weapon of their destiny.

[The natal magic weapon is the most suitable for monks, and can be continuously upgraded as the cultivator upgrades; when entrusting the natal magic weapon to fight, it saves two layers of true essence compared to the same type of magic weapon, and at the same time increases the power by as much as two layers.]

[Host, you can try refining the magic weapon of your life.]

[Magic weapons are divided into two categories, one is mainly attacking, and the other is mainly auxiliary.]

[Mainly attack, can be divided into melee type, speed type, strength type, sneak attack type, etc.]

[Auxiliary is the main type, which can be divided into escapism, luck, calculation, augmentation, healing, storage of true essence, insight, etc. The improvement of the host's combat power is limited, but it can increase the host's other attributes.]

[Suggestion ①: The host can refine the wing-like magic weapon, and can increase the pig's foot escape technique, which can be used to save life at critical moments. Only by surviving can there be a future]

[Suggestion ②; The host can refine the cauldrons. People take food as the sky, and the tripod was originally a food-making tool, but later it became an artifact for sacrificing the sky. With the tripod as a magic weapon, you can suppress your own luck and make yourself lucky.]

[Suggestion 3: The host can refine the augmented artifact, which can temporarily increase the explosive power of the pig's feet and kill the enemy]

[Suggestion 4: The host can refine a combination magic weapon, and refine a set of magic weapons. This magic weapon can be used in melee combat, sneak attack, escape, hide secrets, suppress air transport, increase combat power, heal wounds, and store True Yuan, can see into the heavens and so on.]

"Adults can do multiple-choice questions, and children naturally want all of them. Choose four..."

Lu Xuanji immediately made a decision.

[The deduction is continuing, it will take about three months]
