

Clan Cultivation 50

Chapter 50

It's a bit long.

Lu Xuanji frowned slightly.

A little impatient, a little impatient, but still waiting patiently.

Three months later, the game was over, and the results appeared.

[The information stored in the mobile phone is limited, and the deduction ability is limited. Only 30% of the deduction has been completed, and the rest is still being improved.]

Seeing this result, Lu Xuanji breathed a sigh of relief.

This proves that [Fate Deduction] is not omnipotent, and there are certain limitations and deficiencies.

This is a good thing. If fate is omnipotent, he would have to worry.

[Li Huojian (deduced to 100%), Wings of Freedom (deduced to 100%), Bu Tianding (deduced to 100%), Swallowing Heaven Cauldron (deduced to 100%), Qisha Gourd (deduced to 100%) , Chaos Map (deduced to 10%), Void Boat (deduced to 20%), Void Armor (deduced to 20%), Stealing Claw (deduced to 1%), God Killer Hammer (deduced to 10%), Inheritance Shadow Sword (deduced to 20%), Optimus Prime (deduced to 20%), Immortal Shield (deduced to 10%), Calamity Bow (deduced to 90%), Celestial Mirror (deduced to 10%), Hunyuan Lotus (deduced to 10%), Six Desires Red Dust Map (deduced to 20%), Dongtian Eye (deduced to 20%), Aion (deduced to 2%)]

"Nineteen magic weapons, I simply don't have enough qi, blood and true essence to nourish them!"

Looking at the [combination magic weapon] designed by the mobile phone, Lu Xuanji had a slight headache.

He couldn't afford it at all.

Everyone knows that the more magic weapons, the stronger the combat power.

But many people can't afford it.

The magic weapon needs to be stored in the dantian, and the real essence and qi and blood are used to warm up the magic weapon to improve the combat effectiveness of the magic weapon; but once there are too many warm and nourishing magic weapons, it will slow down the training speed.

Therefore, many cultivators are walking on the road of breaking all laws.

Life is just to cultivate a magic weapon, because I can't support it.

A small number of monks with strong mana are only able to cultivate two or three at most.

If there were really nineteen magic weapons, he would only be sucked dry by the magic weapons.

"But not now, but in the future!"

Thinking of this, Lu Xuanji breathed a sigh of relief.

But looking at the level of deduction, he frowned.

Among these nineteen magic weapons, most of them have not been deduced yet, and some are stuck in bottlenecks due to insufficient materials; some are slowly improving because of the difficulty of refining treasures.

According to the actual deduction, there are only five spiritual tools that can be refined, Li Huojian, Wings of Freedom, Heaven-Mending Cauldron, Swallowing Cauldron, and Qisha Gourd.

There are not only the map of the spiritual tool, the refining materials, but also the refining method, which is written in great detail.

"This is the horror of big data!"

Lu Xuanji sighed.

Then I calculated these materials and the required spirit stones.

With the existence of Fang City, many refining materials can be purchased. If not, there will be merchants from the store to communicate with other areas.

There are no materials that cannot be bought. If they cannot be bought, there are not enough spirit stones.

Li Huojian needs 200 spirit stones, Wings of Freedom needs 500 spirit stones, Heaven Repairing Cauldron needs 3,000 spirit stones, Swallowing Cauldron needs 5,000 spirit stones, Qisha Gourd needs 1,000 spirit stones, and the total is close to 10,000. Doling Stone

Lu Xuanji cleaned his pockets, only three thousand spirit stones were left.

"Qisha Gourd, Tiantian Cauldron should be temporarily abandoned. We should refine the three magic weapons, Li Huojian, Wings of Freedom, and Heaven Bridging Cauldron!"

Lu Xuanji made a decision.

A magic weapon for attacking, a magic weapon for running, and a magic weapon for suppressing luck and healing.

The first one was the cheapest, and it was made more reasonable with minor modifications on the basis of the traditional fire attribute flying sword.

The second piece is relatively expensive, and the material cost is huge.

The third magic weapon is continuous optimization on the basis of innovation.

In front of the cave, he told the elder to go down the mountain, and at the same time, he took out a thousand spiritual stones in advance.

"Okay, this is for you!"

The Great Elder nodded and said, directly spending a thousand spirit stones and recording them in the booklet.

"Before going down the mountain, you'd better disguise yourself!"

The first elder handed over the bag of spirit stones and warned.

"Under the rules of the Danyang School, the major families live in peace. Even if there is a conflict, it is the sword fight, but there are always people who can take advantage of the law!" said the elder.

Lu Xuanji nodded.

Walking and walking, they arrived in front of Ye Feixue's cave.

Just as he was about to knock on the door, the door of the cave had the words "Long-term Retreat."

All he could do was stop and wait at the entrance of the cave.

When it was time to reach the cave, I vaguely felt that the spiritual energy was fluctuating violently, and it seemed that I had reached a breakthrough level.

Boom boom boom!

At this moment, as if sensing something, the Great Elder released the restriction of the spiritual veins.

Immediately on Changyuan Mountain, the supply of spiritual energy to various cave dwellings stopped temporarily, and all the aura was supplied to this cave dwelling.

The number of auras born on the spiritual meridian is limited every day, and the aura supplied to each cave is also limited, and it will be gone after it is used up.

But at the moment of designing the cave dwellings, these were taken into consideration. The spiritual energy of many cave dwellings could not be used up at all, and there was still a surplus.

But at this moment, when Ye Feixue broke through, there was a lot of demand for spiritual energy.

Huhuhu!

With a large supply of spiritual energy, Ye Feixue's breakthrough speed accelerated.

"She's going to make a breakthrough, just in the past three years, she's about to make a breakthrough... This speed is a bit fast!"

Looking at this scene, Lu Xuanji felt a touch of sadness in his heart.

About three days later, a breath burst out, and after three breaths, it disappeared.

At this moment, the door of the cave opened.

Ye Feixue's figure appeared, with graceful posture, slender body, graceful curves graceful curves, graceful and graceful, swaying and graceful. A pair of eyes are bright and long, with joy flashing in the crystal, and a trace of tenderness in the bright eyes.

The breath fluctuated a bit, and it seemed that it had just broken through, which made it difficult to control the power perfectly, and the breath leaked out.

"You broke through and entered the second floor of the Foundation Building!"

Lu Xuanji asked.

"Yes, it's just a lucky breakthrough!"

Ye Feixue said that she was lucky, but the corners of her mouth were curled up, as if she was saying to praise me!

"No, it's only been three years since you broke through the foundation building. You have improved a level, and the speed is a bit fast. Even the root of the sky is not as good as you."

Lu Xuanji was calculating the time, and suddenly felt that something was wrong.

After the foundation is established, the speed of cultivation will be relatively slow. The three spiritual roots are upgraded by one layer in twenty years, the second spiritual root by one layer in ten years, the different spirit roots by one layer in eight years, and the Tianling root by one layer in five years.

If you take some medicinal herbs, the speed of cultivation will be accelerated.

If you are willing to spend money, the cultivation speed of the Three Spiritual Roots can be comparable to that of the Heavenly Spiritual Roots.

In the past three years, Ye Feixue has not taken any medicine pills.

Three years to upgrade to one level, faster than Tianlinggen.

"Could it be that you have awakened a special constitution!"

Lu Xuanji asked.

"After the foundation was established, I noticed some changes in my body. It seemed that I had awakened a special physique. This physique is very general, and it's not very useful. It's just that the training speed is faster!" Ye Feixue said flatly, as if picking up random on the road. To three spirit stones in general.

Listening to Lu Xuanji, his teeth hurt slightly.

Old Versailles.

What does it mean to have a very average physique, it doesn't have much use, it's just that the cultivation speed is faster.

Why don't you tell me, my father is the richest man and only gives me five million pocket money every month.
