

Clan Cultivation 95

Chapter 95

Huhu!

The ground fire surged out from the ground. After experiencing the restraint of the refractory brick formation method, it turned into an orange flame and rose up on the ground.

Above the flame, is a big tripod.

There are three tripods, with round belly and two ears.

Sky Crystal, Tree of Vitality, Jade of Creation, etc. entered the cauldron one after another. Along with the burning of the earth fire, they turned into one after another of liquid, pure and flawless, without much impurities. With the traction of True Yuan, these liquids began to integrate into the cauldron, improving the cauldron's grade.

Chi Chi!

The liquid is slowly merging into the cauldron, improving the quality of the cauldron.

After half a day, the initial fusion was completed.

Then, another talisman appeared in the void, like a bird's husk, dragons and snakes flew, iron hooks and silver strokes, and merged into the cauldron.

After a while, the second talisman merged into the cauldron, one after another, and the last eighteen talismans flashed in the cauldron, with bright golden light and bursts of sound.

The ground fire is burning, constantly burning its roots, and impurities are discharged one after another.

About half an hour later, the ground fire began to die out gradually.

The light of the cauldron was fading, and it turned into an ancient bronze cauldron. It was not surprising, ordinary and quiet.

"Second-grade Spirit Artifact has become!"

Lu Xuanji flashed a flash of joy.

Put away the Heaven Repairing Cauldron, enter the dantian, and enter the Great Cauldron with True Essence.

Buzz!

The Heaven Repairing Cauldron was running endlessly, purifying the true essence. After a while, a trace of the true essence was spit out. The amount of the true essence was decreasing, but it became more pure, like an ordinary iron block turning into refined steel.

The real essence was purified to the eighth level.

"Heaven-Mending Cauldron, it's not bad for the name of Heaven-Mending, it can make up for the innate deficiencies of monks."

"Two Spiritual Roots need one Pure Yang Pill to purify the True Essence to the eighth level; Three Spiritual Roots require three Pure Yang Pills to purify the True Essence to the eighth level. If there is no Pure Yang Pill, it can only cost two or three. It takes ten years to polish the real yuan and purify the quality of the real yuan. But with the Heaven Bridging Cauldron, it only takes two years to polish the real yuan to the seventh level."

"The Heaven Patching Cauldron can be lent to the Great Elder, but it is best to use the name of Old Ancestor Jin, otherwise there will be trouble."

Lu Xuanji thought about it.

Many immortal clans perished, largely because the public and private are unknown.

Given too much, the family perished.

Running the exercises and purifying the True Essence with the help of the Heaven Bridging Cauldron, the True Essence goes in and out, and in the process of continuous tempering, the quality is improving.

With the improvement of the quality of the real essence, Lu Xuanji used the real essence to temper the meridians, temper the dantian, temper the flesh, temper the blood, temper the bones, temper the internal organs, and there is no A neglected place has been tempered in place.

After the foundation was established, not only was the quantity of real essence increased, but the quality of real essence was also improved, and the physique was also steadily improving with the help of real essence tempering.

After one year, the real essence tempering was over, and every trace of real essence had an amazing lethality.

Stab it!

A streak of True Essence hit the floor, leaving a hole in the sturdy stone slab.

The power is amazing!

In the cave, Lu Xuanji took out the Heavenly Spirit Iron, the Earth's Mother Magnet, the Five-Colored Soil, the Stone of Creation, etc., and began to refine the fourth natal treasure - the Swallowing Cauldron.

The swallowing cauldron belongs to the yin cauldron.

Four feet, square belly, two ears.

One after another, the materials are melting and refining.

Time flies, and in the blink of an eye, fifteen years have passed.

In the cave dwelling, a square tripod stands in it. The square tripod is about one meter high, mighty and domineering.

Huhu!

Lu Xuanji breathed a sigh of relief, and Dading succeeded in refining.

Swallowing the Heaven Cauldron, the difficulty of refining is somewhat beyond imagination. It is only the second rank, but it has stopped many times, adjusted the refining direction many times, and scrapped some materials. Fortunately, the refining was successful.

Huhuhu!

The swallowing cauldron was running, and the surrounding spiritual energy was like a tide, entering the inside of the cauldron.

Gradually, pure spiritual fluid appeared at the bottom of the cauldron.

These spiritual liquids were transformed from swallowing cauldron absorbing spiritual energy. They are pure and flawless, and can be directly absorbed and refined. The effect is similar to the effect of spiritual stones.

The spiritual liquid condensed every day is equivalent to ten spiritual stones.

The spiritual liquid is volatile, and I tried to keep it in some magical instruments, but it dissipated the next day.

Only in the swallowing cauldron, it can be preserved for a long time.

The spiritual liquid condensed every day is equivalent to ten spiritual stones, and a year is 3,600 spiritual stones.

Ten years, a hundred years, a thousand years, and over the years, the amount of resources accumulated is astonishing. This is already equivalent to a wealthy spiritual mine, and it is continuously exploited.

Swallowing the Heaven Cauldron, worthy of the name of Swallowing Heaven, swallowing the heavens and the earth for his own use.

Thinking of this, Lu Xuanji smiled happily, very happy.

The Three Spiritual Roots, after reaching the Foundation Establishment, do not have many advantages.

The three spiritual roots make the Purple Mansion as much as the five spiritual roots build the foundation.

There is hardly much hope.

Maybe the moment when the life essence is exhausted, it is only the sixth floor of the foundation.

Going on the road of magic seems to be the only hope.

However, the combination of swallowing cauldron and mending cauldron greatly increased the hope of achieving Zifu.

Swallow the Heavenly Cauldron to convert the spiritual energy into pure spiritual liquid, which can be absorbed as a spiritual stone to increase the speed of cultivation;

The Heaven Repairing Cauldron, purifying the True Essence, swallowing the medicinal pills, refining the Spirit Stone, causing the True Essence to be vain and unstable, etc., com perfectly compensated.

Combining the two together, the hope of accomplishing the Zi Mansion has increased from less than one percent chance in the past to ten percent.

"I'm eighty years old."

Lu Xuanji calculated his age and suddenly sighed.

The deceased is so stubborn that he does not give up day and night.

At the age of six, he awakened his spiritual roots and embarked on the path of immortality; he learned basic common sense in the realm of self-cultivation for three years, entered the first level of Qi training at the age of nine, and improved to one level in almost four years on average, and achieved foundation building at the age of forty-nine.

Now, he is eighty years old.

On Earth, sixty-sixty-sixty, seventy-year-old rare, eighty-year-old.

On Earth, he is already an old man.

But in the cultivation world, he is just a young man.

The age of a monk is not divided according to years, but according to the proportion of life expectancy.

Twenty percent of life expectancy is juvenile before, 20 to 40 percent is young, 40 to 60 percent is middle-aged, and more than 60 percent is gradually into old age.

The lifespan of Zhuji is two hundred and forty years. At the age of eighty, he is only one of the three watchmen of his life, and he is still a young man.

This is why, after many old monks broke through the realm, they quickly recovered from their old age to their middle-aged appearance, as if they were rejuvenated.

Because after the breakthrough, Shouyuan has increased significantly, and the proportion of life has returned to middle age, even youth.

In the foundation period, the lifespan is too short.

This is also because Lu Xuanji mainly studied spiritual planting masters, and alchemy was omitted.

Because there is no time.

It takes at least thirty years for alchemy to succeed.

Keji cultivator, another thirty years.

There is not enough time for cultivation, and there is no time to learn alchemy.
