

Clan Cultivation 98

Chapter 98

In the booklet, Lu Xuanji glanced at the woman's appearance and so on, but didn't go too deep into it.

In the cultivation world, there are no ugly women.

The cultivator is in harmony with the heaven and the earth, and the spiritual energy washes the body and root bones, all of which are outstanding in appearance.

Moreover, the more powerful a woman is, the more beautiful she is.

As for the few female cultivators who became ugly, most of them were caused by exercises;

Looking at the roster, Lu Xuanji had a slight headache.

I don't know how to answer.

Old Ancestor Ye came with sincerity and refused directly. This is not a slap in the face of this Old Ancestor!

He hit an ancestor of the Zifu, and the Ye family will feel better in the future.

This Old Ancestor Ye was very helpful to the Lu family, so it would be unreasonable to refuse directly.

Accepting a woman may reveal some of his secrets, and may reveal the secrets of Ye Feixuetian's spiritual roots.

"Ancestor, I already have a Taoist partner, so I'm not suitable. If a woman from the Ye family enters my room, what is the status? This is a wife or a concubine!" Lu Xuanji thought about it. "If the ancestor wants to marry, he can find other juniors of the Lu family. Among the younger generation, they are very good."

"Haha, mortals say they have wives and concubines, and they have names. But cultivators like me don't pay attention to these things. What we pay attention to is to help each other and seek the Dao together." Ye Liuyun said with a smile: "As for who is high and who is low, it is up to their sisters to go. Let's discuss it. The juniors of the Lu family are not worth the old man visiting in person."

Speaking of this, Ye Liuyun couldn't help but scolded: "You junior, you are long-winded and not at all refreshing."

Lu Xuanji said, "The younger generation is obsessed with the Dao and has no time for men and women."

"Junior, why do you say cultivation?"

Ye Liuyun asked.

"Nature is for longevity!"

Lu Xuanji said firmly.

"Cultivators live forever, but how many people can live forever?" Ye Liuyun said: "Longevity is too vague, how many people become Zifu, and how many people become Jindan? Longevity is hard to find, many monks choose to take wives and concubines, stay The next generation will continue from one generation to the next, and live in the memory of future generations. This is another kind of longevity. I wait for the monks, not only to live for ourselves, but also for the family. "

"Those ancestors of Yuan Ying, ancestors of Jindan, when they reach a certain age, will accept dozens of female cultivators, or even hundreds of female cultivators, increasing the number of children. Only when there are more children can there be the so-called Jindan family. Yingshi family. There are no descendants, no matter how much treasure inheritance, who will it be left to?"

Lu Xuanji said, "Senior, why do you value me so much?"

"At the beginning, the ancestor of the main line just said that he wanted to win you one or two. I just nodded and didn't care too much. But after reading some information, I found that you are very

difficult!" Ye Liuyun said : "I noticed you for the first time after you became Foundation Establishment."

"At that time, you were very inconspicuous. You only had three spiritual roots, and you didn't awaken any special physique. If there were no accidents, the sixth floor of the foundation building was your limit."

"But you have refreshed my understanding time and time again. First of all, Old Ancestor Jin plans to accept you as a disciple..."

"That's luck..."

Lu Xuanji said.

Ye Liuyun waved his hand, stopped his words, and said, "That's just the first time, that's all. But the second time, during the battle of Baihu Mountain, you used [Sky Fire Art] and [Spring Breeze Spirit Wood Art], Both of these minor supernatural powers have reached the stage of completion, which shows that your understanding is very high, and the understanding of many Zifu majors is not as good as yours. Especially the completion of [Spring Breeze Spirit Wood Technique] means that you become a second-level spiritual planter. If you are lucky enough to successfully cultivate [Spring Breeze Wood Spiritual Art], you can become a third-grade spiritual planter, but it is impossible... It is too difficult to achieve a successful Spring Breeze Wood Spiritual Art!"

"You have a three-level probability of becoming a major repairer of the Zifu, which is worth my Ye family's gamble. If you win the bet, you will gain the Lu family's hundreds of years of friendship and gain a son-in-law of the Zifu; if you lose the bet, the loss will not be lost. It's just a loss of a female cultivator from the Lu family."

Lu Xuanji listened, sweating all over.

Inside and out, this old ancestor of the Ye family saw through.

Lu Xuanji said, "Is it worth it? Sacrificing a woman's happiness for the benefit of the family?"

Ye Liuyun said with a smile: "I was born in my Ye family. As a female cultivator of the Ye family, I have to contribute to my family. I usually eat my Ye family's meals, and leave at critical moments. How can there be such a good thing."

At this moment, there was a hearty laughter.

"Meet the seniors!"

The Great Elder went out and walked forward.

"Yes, yes, you are half a step into the Purple Palace!" Ye Liuyun suddenly felt something and asked directly.

"It's just a fluke. Ancestor Jin lent me a treasure, so I can break through!"

The first elder took out the Heaven Patching Cauldron and waved it to Lu Xuanji.

In the action, show off.

There is even some fox-fake tiger-like taste.

Lend the Lu family a treasure to help him break through. This is why Patriarch Jin values the Lu family.

Somewhat intimidating the Ye family.

The ancestor said again: "Three years later, Xuanji will go to the Ye family on a blind date, and then we will talk about other things!"

"Alright!" Ye Liuyun nodded and said, "See you in three years!"

Say goodbye and leave.

"Elder, how long have you been through?" Lu Xuanji asked curiously.

"It took two years to compress the true essence and purify the true essence to the eighth level; I took the Zifu Dan again, opened up 108 small meridians in the human body, and passed the third difficulty; the remaining medicinal power only opened up a hundred channels. Acupoints. Next, it takes twenty years to use the water-grinding technique to overcome the fourth difficulty!"

"Right now, it's only three and a half difficulties."

The Great Elder spoke calmly, but his mood was not at all calm.

Lu Xuanji asked, "Ancestor, three years from now, I won't really go to the Ye family!"

"Go, why not go!"

The first elder sat on the chair, poured himself a cup of tea, and said calmly: "Xuanji, your mentality is not good, you must re-recognize yourself and re-evaluate your potential. In ordinary moments, it doesn't feel good. Arrived. But when I set foot in the Purple Mansion for half a step, I realized the nine difficulties of the Purple Mansion, and every step forward, how difficult it is."

"But Old Ancestor Ye said that you have a three-level probability of becoming the Purple Mansion. This is looking at you highly, and it is also proof of your potential. Once you become the Purple Mansion, it will change the structure of the Lu family, and even change it. The pattern of several nearby forces."

"The most important thing is that Old Ancestor Jin intends to support my Lu family to fight against the nearby Ye family, Wu family, Sun family and other forces."

The Great Elder said, "Let's be here, we don't talk about feelings or love, we talk about reality and interests."

"In the realm of self-cultivation, families, sects, scattered cultivators, etc., seem to have different forces, but they are essentially similar. If you want to survive, you must become a strong person, or depend on a strong person. A foundation-building cultivator can create a cultivating family, It shelters tens of thousands of people; a cultivator of Zifu can shelter millions of people; Jindan overhaul, sheltered comprehension families, scattered cultivators, various markets, etc., the number is even more.

"The lifespan of foundation building is only two hundred and forty years, and it will also die. Once a foundation building monk of a cultivating family falls, and there is no new foundation building cultivator to replace, this cultivating family will collapse, not be divided up and annexed. , is slaughtered and enslaved."

"The world of self-cultivation is essentially the cruelest jungle world, where the weak eat the strong, killing and bloodshed constantly!"

"Cultivating talents is the most important thing. Those foundation-building seeds and Zifu seeds are the hope and future of a force. To cultivate geniuses, it takes a lot of resources. Growing up requires a steady stream of resources."

"Zifu family, only the birth of the second Zifu family can be considered relatively stable and can bear greater risks. But in Qingshui County, whether it is the Ye family, the Lu family, or the Wu family or the Sun family, it is impossible to give birth to the first family. The two major repairers of the Purple Mansion, why is this?"

The first elder asked questions and put forward an assessment.
