

Complete Martial Arts Attributes

Chapter 1951: Phoenix Golden Feather Blade! (5)

"You!" Tang Cheng's inner turmoil continued.

Now he finally understood why this snakeman wanted them to die.

He realized that their leader must have known this astonishing information, which was why he had shown that peculiar look in the end as if he had something to say but couldn't.

Gasp!

As these memories rushed through his mind, Tang Cheng's scalp went numb, and he couldn't help but draw in a cold breath.

Everything suddenly made sense.

He didn't know what kind of person they provoked.

The snakeman in front of him was utterly terrifying!

He had gradually driven his team to this point, and now, their entire Swift Wing Team was on the verge of destruction. The three martial warriors outside couldn't possibly stand against this snakeman.

If anyone had a chance, it was likely only himself.

If he could capture the snakeman, perhaps they might have a slim chance of escape.

However, he had his doubts. His earlier speculations had poured cold water on his desires.

He didn't have the time to think about the Buddha's Sutra anymore.

At this moment, his sole focus was on escaping the clutches of this snakeman.

Knowing that he had concealed his identity and pushed him into this dire situation, he had no doubt this snakeman wouldn't let him escape easily.

Therefore, he needed to prepare for the worst.

Tang Cheng took a deep breath and made a concerted effort to calm himself. He looked intently at Wang Teng.

"Oh, it seems you've already accepted reality," Wang Teng uttered in surprise. Just a moment ago, this guy had seemed overwhelmed by the Buddha's Sutra, but now he appeared to be back to his senses. It was quite interesting.

It appeared that underestimating any genius martial warrior from the Stellar Academies was a mistake. They might be arrogant and even blinded by their self-interest, but they weren't foolish.

Tang Cheng didn't say anything else. His expression was extremely grave. His spiritual power surged furiously as he activated his domain power to its maximum.

He would no longer underestimate the snakeman in front of him. There was only one thought in his mind. Kill this guy at all costs.

Boom!

The golden mist around them churned vigorously, and streaks of golden lights darted rapidly within the mist. Only their afterimages were visible.

However, when Wang Teng activated his Real Eyem he discovered that those golden streaks were actually the Phoenix Golden Feather Blade. He couldn't help but be amazed.

At one glance, he saw a few hundred Phoenix Golden Feather Blades.

Before activating his domain, Wang Teng found it challenging to deal with three Phoenix Golden Feather Blades. Yet, there were a few hundred of them now.

He felt a tingling sensation on his scalp, and his mouth felt slightly dry.

Good lord!

There were so many Phoenix Golden Feather Blades.

He couldn't help but wonder where Tang Cheng had obtained these powerful treasures.

Taking a deep breath, he suppressed his self-confidence. As Tang Cheng activated his domain, he felt the increasing pressure.

This domain is at least at the fifth rank. With the Phoenix Golden Feather Blade, its power will be terrifying. Regular fifth-rank domains won't be able to match this combination.

His thoughts raced, and he finally settled on his Flaming Magnetic Meteor Domain.

Only this domain might be capable of contending with Tang Cheng's power. He had already utilized his Frost Domain, and the consumption was significant. He couldn't execute it again.

Therefore, he had no choice but to unleash this immensely powerful mixed domain, as it was his only hope.

Wang Teng's gaze sharpened, and without further hesitation, he unleashed the domain energy within him, causing it to spread in all directions.

Boom!

Strange ripples surged and instantly transformed into a red domain, opposing the golden domain of Tang Cheng.

"Huh?" Tang Cheng squinted. His gaze landed on Wang Teng's domain and he was astounded.

"Condense!" At this moment, a resounding shout came from Wang Teng's mouth.

Within the red domain, massive stone spheres congregated towards the center, forming a colossal sphere resembling a small asteroid.

Boom!

Flames erupted from the sphere and an intense heat spread throughout the domain.

Tang Cheng was increasingly horrified. With a determined look, he bit his lip and slammed his palm onto his forehead, releasing the last of his spiritual power. It merged with the golden mist around him.

Clang!

Suddenly, a clear and resonant chirping sound echoed within the golden mist. The hundreds of Phoenix Golden Feather Blade had merged into a magnificent and mystical golden phoenix, soaring high within the golden mist.

As the divine golden phoenix appeared, blood commenced to flow from Tang Cheng's seven orifices on his face. His face contorted with anger as he locked his gaze on Wang Teng.

Wang Teng was flabbergasted. He immediately pointed a finger toward the massive sphere above him, infusing it with a thread of energy of laws of origin.

"Die!" Tang Cheng no longer hesitated and shouted madly.

Clang!

The divine golden phoenix behind Tang Cheng let out a resounding cry and flapped its enormous wings, charging straight toward Wang Teng.

"Go!" Wang Teng shouted and extended his hand, pointing downwards.

Boom!

The massive sphere, like a shooting star with a long trail of flames, plummeted down.

Chapter 1952: Complete Victory! Gains! (1)

In the domain.

A spectacular scene unfolded.

On one side, a massive fireball resembling an asteroid descended from the heavens with a terrifying momentum.

On the other side, a gigantic divine golden phoenix, surrounded by an endless shower of golden mist, created long, feathery tails behind it.

Clang!

Amidst a clear and melodious chirping, the two finally collided in mid-air.

Boom!

The divine golden phoenix seemed to transform into a golden arrow, colliding with the massive fireball. Golden light continuously radiated from it, attempting to disintegrate the enormous fireball bit by bit.

However, the flames on the stone sphere were no ordinary flames. They were the condensation of Wang Teng's unique divine flames. Suddenly, they transformed into an endless sea of fire, almost filling the entire sky of the domain.

Due to the flames, the golden mist couldn't harm the core of the stone sphere at all.

At the same time, the power of Magnetic Force erupted, causing the massive fireball to carry an unparalleled force of descent, relentlessly pressing down on the divine golden phoenix.

Clang!

The giant divine golden phoenix emitted a mournful cry from its mouth, flapping its wings continuously, trying to halt its downward momentum.

Batches of golden light scattered down as if it was struggling in its dying moment.

Tang Cheng bellowed, and from his seven orifices, more and more blood flowed, making him appear extremely fierce and terrifying.

The divine golden phoenix soared into the sky, but its efforts were in vain.

Boom! Boom! Boom!

The asteroid-like fireball continued to press down, meter by meter, slowly descending. If it weren't within the domain, the space would likely have been crushed by this terrifying force.

Such a terrifying attack, if directed at a true celestial body in space, would be enough to destroy it outright.

Even a supergiant star would be unable to withstand such an assault.

Fortunately, the Scorpion King Star was created by a powerful being so it was sturdy and extraordinary. The inner structure of the planet was even engraved with the patterns of heaven and earth, making it resilient and resistant to collapse.

Of course, this was not information accessible to outsiders.

Most martial artists only knew that this planet could withstand attacks from heaven-stage and even universe-stage martial warriors, but the specific details remained unknown.

At this moment, the divine golden phoenix could no longer hold on, emitting a series of mournful cries from its mouth as its body began to disintegrate.

Streaks of golden light burst from the divine golden phoenix, transforming into the true form of the Phoenix Golden Feather Blade.

"Pfft!"

Tang Cheng spewed a mouthful of blood, his eyes widening with an expression of unwillingness.

He was unwilling to accept this reality, and his eyes brimmed with determination.

With a furious roar, he shouted, "Phoenix Golden Feather Blade!!!"

As his roar echoed, the massive divine golden phoenix instantly exploded into countless golden lights. These lights interwove in mid-air, forming what seemed like a golden web that enveloped the enormous fireball.

Boom! Boom! Boom!

A deafening roar filled the air, and this time, it was the massive fireball that couldn't hold on any longer.

Under the relentless assault of the golden web, explosions erupted around the fireball, and its enormous core began to disintegrate.

Large chunks of rock with flames fell from the sky.

Wang Teng's expression couldn't help but tighten. He hadn't expected that this person's final outburst would have such terrifying power.

Without further hesitation, he directly triggered the power of origin within the enormous fireball.

Boom!

In the next moment, a terrifying force of the law erupted from inside the fireball, creating an unimaginable impact.

Boom! Boom! Boom!

The golden web instantly shattered, and streaks of golden light shot out, landing on the sandy ground below.

Splat!

Tang Cheng ejected out a mouthful of blood once again, his face turning ashen. His spirit had completely withered, and a hint of despair appeared in his eyes. He could only watch in horror as the massive fireball thundered toward him, his entire face shrouded in fear.

Boom!

The fireball finally smashed into his body, exploding with a deafening roar.

"No!"

A piercing scream erupted from the center of the explosion, but it was quickly drowned out by the thunderous noise and ceased to exist.

"Sigh!"

Wang Teng, watching this scene, finally let out a long sigh.

The Metal Armor Flaming Scorpion was floating below him, acting as a bystander the entire time. Its eyes filled with astonishment.

Was this the true force of its master?

Scary!

This was too scary!

It couldn't help but gulp, its heart overwhelmed with shock. It was unable to utter a word and could only stare blankly at everything.

People outside the domain couldn't see what was happening inside, but they quickly realized that the golden domain was crumbling inch by inch, eventually disintegrating into numerous golden particles that scattered into the air.

On the contrary, the crimson domain still stood high above the desert, radiating scorching heat.

The domain floated in the sky and, from a distance, resembled a small sun.

The result was obvious!

As the crimson domain dissipated on its own, a enormous figure emerged, and it was none other than the Metal Armor Flaming Scorpion.

A figure stood on the back of the Metal Armor Flaming Scorpion. It was Wang Teng.

He was holding someone in his hand.

That individual hung lifelessly, with his head drooping and his body devoid of vitality, as if he had lost all life.

Cang Yu and Little Qing'er were astounded.

He won!

He really won!

One individual single-handedly defeated three heaven-stage martial warriors. It was unbelievable.

In their eyes, each of those three extraterrestrial humans was extremely formidable, but not one of them could loss "ZeLe".

In the beginning, they had feared the worst.

Cang Yu was even prepared to sacrifice herself to hold back the six heaven-stage martial warriors so that Little Qing'er and Zele could leave first.

Chapter 1953: Complete Victory! Gains! (2)

While she claimed she could eventually break free from the six extraterrestrial humans, she had her doubts.

The strength of the extraterrestrial heaven-stage humans was simply overwhelming. Even she would find it extremely difficult to come out unscathed when facing six of them simultaneously.

With the slightest misstep, she might fall here.

But then, unexpectedly, "ZeLe" unleashed a burst of power and single-handedly dealt with three of them.

The situation was suddenly reversed.

They, who were supposed to be in a disadvantaged position, had become the ultimate winners.

Little Qing'er was even more stunned than Cang Yu.

Although her awakening had endowed her with unparalleled talent, surpassing most individuals even within the Seven Stellar Academies.

But, her power was still at the planetary stage, and she had only recently reached that level. Her horizons had yet to expand fully.

Heaven-stage martial warriors were still beyond her reach.

So, in her eyes, those six extraterrestrial heaven-stage humans were truly terrifying, akin to gods.

That's right, gods!

In the eyes of many native martial warriors, heaven-stage martial warriors were considered god-like beings of a planet.

Yet, her daddy had the power to defeat the gods!

This was something she found hard to accept.

No matter whether she doubted Wang Teng's true identity, at this moment, he was fighting in the guise of Zele, and this was the reason for her profound shock.

The remaining three heaven-stage martial warriors from the Swift Wing Team had fallen silent. They were filled with despair.

They were in dire straits by now and had taken quite a beating even under the combined assault of Elizabeth, Cang Yu, and the others.

If not for the last glimmer of hope in their hearts, they would have given up long ago.

But now, even that last glimmer of hope had been completely extinguished.

"Run!"

"We must escape!"

The three of them exchanged a glance, their eyes filled with determination as if they had made a very difficult decision.

They had already attempted to escape multiple times, but under the siege of Elizabeth, Cang Yu, and the others, they couldn't break free.

With the last glimmer of hope in mind, they had decided to continue fighting.

However, at this moment, they had lost all wish to fight. The snakeman holding Tang Cheng was looking at them serenely from afar.

They couldn't help but feel a chill, wanting nothing more than to leave this place.

At any cost!

Boom!

Boom!

Boom!

In an instant, the three of them exploded simultaneously. They were making a final, desperate effort, willing to deplete their Origin Of Life if necessary. Otherwise, they were doomed to die today.

They unleashed their respective domains at the cost of their Origin Of Life, forcibly increasing their power.

They aimed to break through the siege of Elizabeth and Cang Yu using this last-ditch effort.

"Trying to escape!" Elizabeth's lips curled into a faint smile.

Seeing that Wang Teng had decisively emerged victorious, she no longer needed to hold back.

She could finally act without restraint.

A brilliant yellow light converged on her body, forming layers of yellow dragon-scale-like armor that covered her form, creating a frightening defense.

Simultaneously, an even more formidable yellow light pillar coalesced atop her two massive dragon horns, gathering the power of the origin and then fiercely struck forward.

Boom!

The yellow light pillar swept through, exploding upon the domains of the three men.

Intense reverberations echoed all around, and their domains were instantly shattered, with the yellow light pillar ruthlessly striking their bodies.

Screams of torment filled the air, and the three men widened their eyes in disbelief, instantly engulfed by the yellow light pillar.

O((⊙_⊙))o

Cang Yu, who was standing nearby, also widened her eyes, her face filled with confusion.

After fighting for a long time, she thought that this ultimate stage imperial-level spiritual pet only had this little ability and couldn't deal with the three heaven-stage martial warriors.

However, she had underestimated it.

This ultimate stage imperial-level star beast hadn't even used its full strength. It was merely restraining the three of them and had no intention of defeating them.

"Even his spiritual pets are so powerful?!" Cang Yu looked at 'Zeke' in the distance and sighed.

As a peak heaven-stage martial warrior, she felt that she was too weak.

At this moment, Wang Teng flew over from a distance and, upon seeing this scene, couldn't help but complain.

"Elizabeth, I haven't had enough fun yet, and you've resolved them all in one swoop."

"Um... Master, I thought you didn't want to play anymore," Elizabeth hesitated for a moment and said sheepishly, "They have a breath left. Would you like to continue?"

Wang Teng: ...

Cang Yu: ...

Little Qing'er: ...

What kind of words was this?

Continuing when they have only a breath left? This spiritual pet was a devil!

Cang Yu and Little Qing'er looked at it strangely. They felt that if the heart of this spiritual pet with a young lady's face was cut open, it would probably be black.

"Elizabeth, you seem to have turned evil!" Wang Teng was speechless too.

"Cough, Master, you're complimenting me. I learned it all from you," Elizabeth coughed and said.

(#~#)

Wang Teng gave her an exasperated look, indicating that he wouldn't take the blame for this.

Who praised you anyway?

You're accusing me without reason.

Cang Yu and Little Qing'er's expressions turned strange.

There was something off about this master and servant!

While they were speaking, the yellow light pillar slowly dissipated, and the three heaven-stage martial warriors reappeared, falling to the ground with their battle armor shattered and drenched in blood.

They struggled to stand up, their bodies swaying, almost unable to support themselves. They coughed up blood in large amounts, their eyes filled with fear as they looked at Elizabeth.

Chapter 1954: Complete Victory! Gains! (3)

The three of them didn't expect the ultimate stage imperial-level spiritual pet to be so terrifying.

Wang Teng slowly descended from the sky and then floated over to the three of them.

Honestly, it was hard to get used to this snakeman body in a short time. Fortunately, he could just hover in the air without needing to touch the ground.

Cang Yu and the others didn't know what he was planning, so they flew over as well.

"What... what do you want?" The young man named Wright looked at Wang Teng in fear, wanting to step back but stumbled and fell to the ground.

"Hey, weren't you just raving about how much you liked the snakewomen beauties? Why are you acting so weak now? Can't you even stand up?" Wang Teng teased, looking at him with a smile.

Wright's face turned green, and he wished he could give himself a couple of slaps.

If he had known from the start that these snakemen were so tough, he would never have said those things.

It was too late now!

Words spoken cannot be taken back.

It was clear that this snakeman held grudges. He remembered what was said.

On the other hand, Cang Yu and Little Qing'er were surprised.

Was he seeking revenge for them?

Was this fellow really 'Ze'le'?

If he was, how could he be so powerful?

But if he wasn't, why would he seek revenge for them?

At this moment, the two women found themselves caught in the whirlpool of doubt.

"Brother... I actually don't like snakemen, do you believe me? I was just making a joke," Wright made a final struggle, speaking somewhat sheepishly.

"Oh?" Wang Teng looked at him with a somewhat amused expression. "You don't like such beautiful snakewomen? Are your eyes blind, or do you think mine are?"

Wright: ...

It seemed like there was no right answer.

Saying that he didn't like them wasn't right, but saying that he liked them was wrong too.

What should he do?

He was filled with bitterness, his gaze trembling, and the muscles on his face involuntarily twitched.

Cang Yu and Little Qing'er looked at each other's expression as if they had eaten a bitter gourd. They were having a hard time controlling the corners of their lips. They wanted to laugh but they didn't dare to.

After all, this wasn't a good time to laugh.

"Can I... like them?" Wright probed.

"What? You do have improper intentions after all," Wang Teng's face changed, his gaze becoming extremely dangerous. The Lightning Slap appeared in his hand.

Wright: ...

Cang Yu and Little Qing'er were stunned too. They hadn't fully recovered from Wang Teng's antics.

They felt that he was quite... shameless.

The extraterrestrial human was completely played with by him.

However, this shamelessness didn't make them dislike him.

Elizabeth and the others were long used to his antics. They knew their master better than anyone else. They were currently floating in the air, watching the spectacle.

All that was left was a few plates of fruits and they could enjoy the show.

The three massive beasts surrounded the three people, emitting a subtle but potent pressure that was far from ordinary.

The other two heaven-stage martial warriors glanced at the three ferocious beasts above them and swallowed their saliva. But, they still tried to maintain composure.

They could tell that the snakeman had no intention of letting them go. He was just toying with them now.

"If you want to kill or torture us, do as you wish. Don't think you can toy with us," the pig-human race martial warriors suddenly snorted.

"Huh? You're quite tough." Wang Teng looked at the other person in surprise, then suddenly turned and approached him. The Lightning Slap in his hand was now emitting dazzling lightning. "Come on, let me see if your forehead is as tough as your mouth."

Cold sweat appeared on the pig-human race martial warrior's forehead.

The other combat warrior from the Swift Wing Team wanted to speak, but seeing this scene, he immediately closed his lips and took a step back.

"You..." The pig-human race martial warriors wanted to say something, but Wang Teng didn't give them any chance. The Lightning Slap in his hand suddenly struck down.

Bang, bang, bang...

Swoop! Boom!

The pig-human race martial warrior was just putting on a strong front. He couldn't resist Wang Teng's attack at all. The Force he had just activated was instantly shattered by the Lightning Slap, which then solidly landed on the warrior's head.

"Ah..." The pig-human race combat warrior let out a horrifying scream. His pig head expanded at a visible speed, making it impossible to look at.

Wright and the other combat warrior felt their hair standing. Their hair stood on their ends.

When they witnessed this up close, they realized how terrifying and gruesome this method of attack was.

Under the thunderous assault, the pig-human race martial warrior's body trembled uncontrollably. His gaze rolled back, and his head became charred and swollen.

This torture wasn't just physical. It was psychological too.

This was inhumane!

In no time, the pig-human race combat warrior convulsed and dropped to the ground. He had started with a single pig head, but now he had two large ones.

Cang Yu and Little Qing'er couldn't bear to watch. While this method was satisfying, they found it inhumane.

"It's your turn!" Wang Teng turned to the other two and grinned.

The two combat warriors shuddered. They took three steps back in unplanned unison and shouted, "Don't come over!"

"Don't be nervous. It'll be over in a moment. Who wants to go first?" Wang Teng asked.

Chapter 1955: Complete Victory! Gains! (4)

Silence.

The two of them turned silent. Then, they pointed at each other.

"Him!"

The same tone and words came out of their mouths at the same time.

Cang Yu: ...

Little Qing'er: ...

Look at what he had done to them!

Even Elizabeth and the others were speechless.

They were turning against each other.

"Never mind, you two don't need to fight. You'll both get your turn," Wang Teng shook his head with a wry smile and swung the Lightning Slap at the young man named Wright, who had caught his displeasure.

"Ah!"

Another piercing scream filled the air.

Bang, bang, bang...

Swoop! Boom!

Soon, Wright collapsed, turning into another pig-headed young man, convulsing all over.

The last martial warrior couldn't help but swallow hard, trembling uncontrollably.

This person was too scary!

He was a devil, right? He must be!

Wang Teng didn't show any mercy, striking swiftly with his Lightning Slap and creating a graceful purple lightning arc that landed on the other man's head.

Bang! Bang! Bang ...

Swoop! Boom!

After a series of brutal beatings, he turned into a pig's head too.

Finally, the last warrior fell as well. Three pig heads lay on the ground, convulsing, moving in unison, as if they had fallen ill.

Wang Teng looked at his "masterpiece" with satisfaction... No, he was looking around at the attribute bubbles and nodded silently.

He didn't work so hard for nothing. All these attribute bubbles were his rewards.

After collecting the attribute bubbles, Wang Teng lost interest in tormenting them and sent them on their way.

A few more attribute bubbles popped up.

When you shear a sheep, make sure to shear it clean!

Wang Teng silently swept them over with his spiritual power and picked them up.

Constellation Force (Earth)*12500

Divine Level Earth Talent*1800

Cosmos Realm Spirit*6400

Universe Realm Enlightenment*5900

Earth Domain*3500

Origin Of Life*800

Constellation Force (Metal)*13800

Divine Level Metal Talent*2200

Cosmos Realm Spirit*5200

Universe Realm Enlightenment*5500

Metal Domain*4200

Origin Of Life*950

Water Constellation Force*15000

Divine Level Water Talent*2400

Cosmos Realm Spirit*4500

Universe Realm Enlightenment*4800

Water Domain*4600

Origin Of Life*760

...

A series of attribute bubbles merged into Wang Teng's body and mind, instantly boosting various aspects of his attributes.

First, there was the constellation Force.

Three constellation Forces!

Earth, metal, and water!

These were the attributes of the three heaven-stage martial warriors.

Boom!

A thunderous sound suddenly emanated from within Wang Teng, indicating that he had broken through in one of these elemental attributes.

Metal! Wang Teng felt the surging constellation Metal Force within him, and a glint of excitement flashed in his eyes.

Constellation Metal Force: 10300/50000 (cosmos stage fifth level)

He needed more than 3000 points of the constellation Metal Force to break through. Now that he had 13,800 points of the constellation Metal Force, he was able to reach the fifth level of the cosmos stage without any obstacles.

On the other hand, the earth and water elements hadn't reached the requirements for a breakthrough.

Constellation Earth Force: 22700/30000 (cosmos stage third level)

Constellation Water Force: 15300/40000 (cosmos stage fourth level)

Wang Teng looked at the attributes board and was satisfied. The increase was significant.

While there was no immediate breakthrough, these attribute bubbles would prepare him for future advancements.

Next were the three talent attributes. It was undeniable that the students of the Swift Wing Team were every talented individuals. Despite not being the strongest in the Swift Wing Team, all three of these heaven-stage martial warriors had reached the divine level for their talents, which was quite surprising.

However, Wang Teng's water talent had reached an unprecedented immortal level. This divine-level water talent was useless to him.

Wang Teng sighed uncontrollably.

His progress had been too fast, making these divine-level talent attribute bubbles somewhat of a waste. Nonetheless, the other two talent attributes hadn't gone to waste.

Fortunately, the other two talents weren't wasted.

Divine Level Metal Talent: 9500/50000

Divine Level Earth Talent: 10500/50000

Then, there was the universe realm Spirit attribute. He received 16,100 points in total. It was a sizable amount.

Wang Teng suddenly felt a sense of clarity in his mind, as his greatly expended spiritual power was now showing signs of recovery.

Spirit: 42600/200000 (cosmos realm)

In this wave, Wang Teng's spiritual power had surged significantly.

It went from more than 20,000 points to more than 40,000 points.

He could only blame himself for raising the limit of his spiritual energy so much that he needed 200,000 attribute points to reach the perfected stage.

If it was a normal cosmos realm holy spirit master, his spiritual energy would have reached the fourth level of the cosmos realm.

Now, he was only at the second level of the universe realm.

However, it was important to note that Wang Teng's second-level universe realm was stronger than an average second-level.

Besides that, his universe-realm Enlightenment increased too. There were 16,200 points of it, which was very close to the increase in his Spirit attribute values.

Of course, the level of his Enlightenment was much higher.

Wang Teng realized that most of these talented martial warriors had universe realm Enlightenment. It was impressive.

At the very least, he had yet to encounter a talent from the Stellar Academies who didn't possess universe-realm Enlightenment.

Enlightenment: 119400/300000 (universe realm)

After the Enlightenment attribute, there was the Domain attribute. The three heaven-stage martial warriors had mastered powerful domains, and they had three different domains.

During the final outburst, a considerable number of attributes were dropped.

The domains of these three martial warriors had reached the sixth rank. Hence, they were of great help to Wang Teng's enlightenment.

Chapter 1956: Complete Victory! Gains! (5)

Wang Teng merged the Earth Domain into his Flaming Magnetic Meteor Domain. His fifth-rank domain rose rapidly and reached the sixth-rank.

It became Wang Teng's first domain to reach the sixth rank.

Before this encounter, Wang Teng's domains reached a maximum of the fifth rank. They were at the actualization phase so they were more powerful than normal sixth-rank domains.

However, they were still in the fifth rank. They still had some distance to cover in terms of insight compared to the sixth rank.

The gradual progression of Wang Teng's domain strength was essential, and it could not be achieved all at once.

Flaming Magnetic Meteor Domain: 200/6000 (sixth-rank)

The Metal Domain used to be at the fifth rank but now, it reached the sixth rank too.

Metal Domain: 120/6000 (sixth-rank)

Actually, Wang Teng's five-element domains could all be considered to have reached the fifth stage. This was because his Five-element Sword Domain had already reached the fifth rank, and it contained the insight of the fifth stage for each of the five elements.

His Water Domain rose too. It went from the fifth rank to the sixth rank, which was a huge leap.

However, the Water Domain was mainly merged into the Netherworld Domain so it was Wang Teng's Netherworld Domain that rose.

Netherworld Domain: 350/6000 (sixth-rank)

While the domain has been elevated to the sixth rank, the focus has shifted, resulting in a deeper insight into the Water Domain within the Netherworld Domain. The insights of other aspects such as the Sea Gravity Domain, Water Lunar Domain, and Water Cloud Domain may be slightly less profound.

Of course, with the Water Domain insight reaching the sixth rank, the enhancement of other domains becomes a natural consequence.

It just required some time for Wang Teng to comprehend and he will naturally elevate them to the sixth rank.

After all, his water talent had already reached the immortal level, making his insights into domains and even the power of laws much easier compared to regular warriors.

After reviewing all these attribute bubbles, Wang Teng turned his attention to the last one.

Origin Of Life!

The fact that those three martial warriors unexpectedly released Origin Of Life attributes was a pleasant surprise for Wang Teng.

Wang Teng suddenly thought about their final outbursts and couldn't help but peek at the three of them, his expression becoming rather strange.

These three guys probably didn't expect that their outbursts would benefit him, right?

Origin Of Life attributes were not something you would typically stumble upon.

Typically, respectable individuals would not drop Origin Of Life attributes easily. It is only when you push your Origin Of Life to a certain extent that it might surface.

Wang Teng certainly lucked out this time.

It seemed that in the future when he encountered enemies, he should exert some pressure.

If you don't push them a bit, how would you know if they have hidden potential?

There were 2,510 points of Origin Of Life attributes in total!

It wasn't much, but it wasn't little either.

For Wang Teng, increasing his Origin Of Life was always a good thing.

After absorbing these attribute bubbles, he couldn't help but close his eyes contentedly, feeling his entire body trembling.

Only one word... satisfying!

He looked at his attributes board.

Origin Of Life: 102510

The last time he broke through the cosmos stage, his Origin Of Life attribute had just reached 100,000 points. Now, it had increased further.

In reality, every increase in Origin Of Life was a tremendous stroke of luck for a martial warrior.

Sometimes, one point of Origin Of Life could be a matter of life or death, let alone these 2,000 or more points of Origin Of Life.

Finally, Wang Teng looked towards the distant attribute bubbles. When he defeated the silver-horned man, the lady with long wavy hair, and the divine spirit master, they also released numerous attribute bubbles.

In his view, the attribute bubbles from these three martial warriors must be better than the ones from the previous three.

That was why he saved them for last. After all, good things needed to be enjoyed slowly.

The best rewards were meant to be enjoyed at the end.

These attribute bubbles were like blind boxes, and nobody knew what was inside.

But based on his experience, Wang Teng could make some educated guesses.

This sense of anticipation only increased his excitement.

Without further hesitation, he swiftly collected all the attribute bubbles with his spiritual power.

The battle had just ended and the bubbles wouldn't disappear so quickly.

Which was why he waited until now to collect them.

One by one, the attribute bubbles, under the influence of his spiritual power, soared towards Wang Teng and merged into his body.

Fire Constellation Force*18500

Divine Level Fire Talent*5000

Cosmos Realm Spirit*8500

Universe Realm Enlightenment*9100

Fire Silk Finger*5800

Crimson Snake Spear*7000

Fire Domain*5600

Origin Of Flame*1300

...

These attribute bubbles came from the silver-horned man, and as Wang Teng had guessed, they contained more attributes than the previous three warriors.

Most importantly, the silver-horned man was a genuine fire-element warrior.

Among the various attributes, one of Wang Teng's preferred attributes to use was the fire attribute.

As the attribute bubbles merged into Wang Teng's body, they transformed into pure constellation Fire Force, some circulated through his body, some entered his Inner Cosmos, and some entered his spiritual body, increasing his spiritual power. Some dissolved into his comprehension, boosting his understanding.

Three of the attribute bubbles gave rise to different insights in Wang Teng's mind.

Almost simultaneously, in his mind, several human-shaped figures emerged.

One figure was practicing a finger technique. As the figure pointed, flames condensed and turned into fiery columns bursting forth, accompanied by the presence of a mystical Fire Silkworm.

Another figure demonstrated a spear technique, brandishing a battle spear that swirled into serpentine fire patterns, releasing incredible power.

The last figure sat in a lotus position, exuding a strong fire domain power, creating a mystical and intense aura.

Chapter 1957: Second Wood Spirit Body! Phoenix Blood Crimson Gold! Departure! (1)

In Wang Teng's mind, three human-shaped light figures appeared, and three different insights were integrated into his memory.

Fire Silk Finger!

Crimson Snake Spear!

Wang Teng's eyes gleamed, and he quickly absorbed the insights related to two martial arts techniques.

The Fire Silk Finger was a universe-stage battle technique. It was on par with the Tyrant's Finger.

The reason the silver-horned man's Fire Silk Finger seemed to be at a disadvantage when clashing with Wang Teng's Tyrant's Finger was mainly because the man underestimated Wang Teng, not because Fire Silk Finger was weak.

If Wang Teng executed it, the Fire Silk Finger wouldn't be weaker than the Tyrant's Finger!

Obtaining another battle technique delighted Wang Teng.

Fire Silk Finger (universe stage): 4800/5000 (well-versed)

5,800 points of attributes allowed Wang Teng's Fire Silk Finger to skip the foundation stage and reach the well-versed stage.

He was just 200 points short of reaching the specialized level, which left Wang Teng somewhat frustrated.

Without dwelling on it, he looked at the other battle technique, the Crimson Snake Spear.

Undoubtedly, this was a spear-type battle technique and it was also at the heaven stage.

It was even slightly stronger than Fire Silk Finger, at least approaching the eternal stage battle techniques.

Spear-type battle techniques were rare. Even Wang Teng had only encountered a few of them.

Those previous spear techniques didn't even reach the universe stage so he wasn't interested in practicing them.

However, this Crimson Snake Spear had reached the pinnacle of the universe stage so Wang Teng reluctantly took a look, thinking it might come in handy in the future.

Moreover, he had acquired a spear from the silver-horned man, which he had just examined and found to be a high-quality universe-level weapon.

He then looked at the attributes board.

Crimson Snake Spear (universe stage): 1000/8000 (specialized)

With 7000 attribute points, Wang Teng's Crimson Snake Spear directly reached the specialized stage, which was a bit better than Fire Silk Finger.

Then came the insights into the Fire Domain!

The silver-horned man's domain power had reached the sixth level, which provided significant assistance to Wang Teng's understanding of the Fire Domain.

Wang Teng's Fire Domain merged into the Flaming Magnetic Meteor Domain. When he absorbed insights into the Earth Domain earlier, the Flaming Magnetic Meteor Domain had already reached the sixth level, with the Earth Domain holding more weight. The Fire Domain was at most at the fifth level.

Now that the Fire Domain had been elevated, the Flaming Magnetic Meteor Domain also increased in rank.

Flaming Magnetic Meteor Domain: 3100/6000 (sixth-rank)

Gaining 5,600 points in the Fire Domain didn't directly raise the attributes of the Flaming Magnetic Meteor Domain by 5,600 points. Instead, it increased by 2,900 points.

This wasn't surprising, considering that the Flaming Magnetic Meteor Domain was a fusion of multiple domains, and an increase in one aspect wasn't enough to cover the entire domain.

Nonetheless, the Fire Domain's advancement to the sixth level was helpful for Wang Teng's subsequent improvement of the Five-element Sword Domain.

With these three insights boosted, another type of insight emerged in Wang Teng's mind—the enlightenment of the laws of origin!

Insights into the laws of origin undoubtedly held a higher position than understandings into domains. Hence, they appeared only after the previous three insights had been absorbed.

In Wang Teng's mind, a silhouette sat cross-legged. A peculiar insight into the laws of fire origin formed a series of runic symbols around him, resembling runic chains.

The power of these runic symbols swept through Wang Teng's entire mind and gradually melded into his memory.

It was as though these runic symbols had been etched into his memory.

Origin Of Flame: 1700/20000 (second-rank)

Wang Teng's Origin Of Flame had already reached the second-rank. He gained 1,300 points of it, allowing his comprehension of his Origin Of Flame to rise.

It was worth noting that the silver-horned man's insight into the laws of fire origin was indeed substantial, having reached the second level. Otherwise, Wang Teng's insight wouldn't have progressed.

Aside from that, there were some relatively ordinary attributes.

In terms of Force, Wang Teng's constellation Fire Force rose but it wasn't enough for a breakthrough.

Constellation Fire Force: 33000/50000 (cosmos level fifth level)

His talent remained at the divine level. 5,000 points of divine-level fire talent allowed Wang Teng's talent to rise.

Divine Level Fire Talent: 11400/50000

His Spirit and Enlightenment features increased as well.

Then, He turned his attention to the attribute bubbles left behind by the woman with wavy long hair. He had his eyes on her wood-element talent.

Without any hesitation, He picked them up.

Water Constellation Force*15500

Divine Level Water Talent*4600

Water Domain*4200

Wood Constellation Force*17600

Second Wood Spirit Body*3500

Wood Domain*6200

Cosmos Realm Spirit*7800

Universe Realm Enlightenment*1200

...

Second Wood Spirit Body! Wang Teng's eyes lit up with amazement as he felt a change in his body.

This transformation was rapid and incredibly peculiar.

In just a short time, Wang Teng's body underwent a complete metamorphosis.

Suddenly, he had a sense that he could control all plant life. His gaze swept over the surroundings, and he immediately sensed the presence of some withered plants beneath the desert's surface.

It seemed that even these lifeless plants could be revived and controlled by him through the Second Wood Spirit Body.

It's a physique! Wang Teng's eyes shimmered. He was excited.

What a rare find!

He had collected a special body structure that he had never possessed before.

And it was a wood physique.

Chapter 1958: Second Wood Spirit Body! Phoenix Blood Crimson Gold! Departure! (2)

Second Wood Spirit Body: 3500/10000 (first-rank)

Currently, Wang Teng's Second Wood Spirit Body was only at the first rank.

When Wang Teng acquired the Second Wood Spirit Body earlier, he gained some insight into this physique. He realized that a first-rank physique could control plant life at the planetary stage.

To control more powerful plant life, he would need to advance the Second Wood Spirit Body to a higher level.

It seemed that the long-haired woman had a limited understanding of the Second Wood Spirit Body. Otherwise, if she could control plant life at the cosmos stage, Wang Teng would have faced a significant challenge.

With the Second Wood Spirit Body, the number of plant life forms he could control wasn't limited to just a few. As long as he had enough Force in his body, he could control a continuous number of plant life forms.

Just thinking about being surrounded by a bunch of cosmos-realm plant lifeforms was enough to send shivers down one's spine.

Fortunately, he had eliminated the long-haired woman, and he had obtained this unique wood physique.

Even if he encountered someone with similar or identical physiques in the future, he wouldn't need to fear.

He was confident that his mastery of this physique would surpass others.

This Second Wood Spirit Body is a very rare physique. It seems I'm quite lucky. Wang Teng thought with a slight smile.

Next, Wang Teng directed his attention to two kinds of domain power. The Water Domain fused into the Netherworld Domain, raising the domain to the sixth rank.

Netherworld Domain: 1350/6000 (sixth-rank)

The increase wasn't substantial, adding only 1,000 attribute points to the Netherworld Domain from the opponent's 4,200 water domain attributes.

Then, there was the Wood Domain. He received 6,200 points of it. It was quite a lot.

The woman with the long wavy hair had a high level of comprehension in her Wood Domain, higher than her Water Domain.

It was clear that her wood-element abilities were her hidden trump card. She was forced to use them by Wang Teng.

Wang Teng's Wood Domain had reached the fourth-level actualization phase and the fifth-level normal domain. Currently, the only attribute he received was the normal domain attribute.

6,200 points of attributes allowed his Wood Domain to reach the sixth rank of a normal domain.

Wang Teng was only at the early stages of comprehending the actualization phase of domains, and he wasn't yet able to convert every type of domain into the actualized version. This would take time and practice.

However, even achieving a regular sixth-rank domain was rather remarkable. Most ordinary cosmos-stage martial warriors couldn't comprehend their domains to such an extent.

Even prodigies found it challenging.

If Wang Teng were to return to the Stellar Academies now, his strength would likely surpass most of the talents in the current cohort.

The divine-level water talent he received from the long-haired lady was wasted again. Wang Teng felt helpless.

Lastly, there were the attribute bubbles left behind by the divine spirit master. Wang Teng's eyes sparkled with anticipation. The previous two hadn't disappointed him, and he hoped this last one wouldn't either.

Without hesitation, he immediately collected all the attribute bubbles.

Metal Constellation Force*16500

Divine Level Metal Talent*4300

Cosmos Realm Spirit*14500

Universe Realm Enlightenment*21000

Phoenix Golden Feather Secret Scripture*3500

Phoenix Golden Feather Domain*6500

...

The Phoenix Golden Feather Secret Scripture! Wang Teng's eyes lit up.

Without much thought, a scene began to play out in his mind...

In an instant, his mind was filled with golden lights, weaving and converging into a mystical golden bird.

This bird had long feathers and was bathed in golden light, with a golden mist surrounding it, giving it an aura of mystery.

Moreover, it gazed exactly like the mystical golden phoenix displayed by the divine spirit master earlier.

Chirp!

The mystical golden phoenix danced in mid-air, and its melodious chirping resonated, followed by countless golden light spots that disappeared into Wang Teng's mind.

Wang Teng's comprehension also came to an end.

I didn't think that I would be able to get a secret spirit cultivation scripture! Wang Teng's eyes shimmered. He was elated.

This was a secret spiritual scripture!

Every spiritual secret scripture was rare.

What's more, the Phoenix Golden Feather Secret Scripture had reached the universe stage, and it wasn't even complete. The divine spirit master only learned up to the universe stage.

If it was complete, it could reach the eternal stage!

An eternal-stage spiritual secret scripture was an extremely precious and rare treasure.

Moreover, this secret scripture combined cultivation methods and battle techniques.

It even contained a method for forging a soul weapon.

The soul weapon was none other than the Phoenix Golden Feather Blade that the divine spirit master used before.

Thinking of this weapon, a glint of determination flashed in Wang Teng's eyes. His soul power swept across the desert.

Boom! Boom! Boom!

Beams of golden light swept through the sand, emerging from the desert, converging towards Wang Teng, and arriving by his side, flying around him.

Cang Yu and Little Qing'er gazed over in surprise.

Especially Cang Yu. There was a hint of curiosity in her eyes.

Wasn't this golden light the weapon used by the divine spirit master?

Oh right, this 'Zele' is a divine spirit master too?

Wang Teng didn't pay attention to the expressions of the two of them. He extended a hand, and a golden light slowly descended into his palm.

Chapter 1959: Second Wood Spirit Body! Phoenix Blood Crimson Gold! Departure! (3)

It was the Phoenix Golden Feather Blade!

This was a special spiritual weapon that looked like the feather of a bird!

This was the first time Wang Teng saw a spiritual weapon like this. He found it interesting so he observed it carefully.

The Phoenix Golden Feather Blade was forged using the Phoenix Golden Feather Secret Scripture. It could be used with the Phoenix Golden Feather Secret Scripture.

Also, based on the Phoenix Golden Feather Secret Scripture, there were a total of 33,333 blades!

When his spiritual power reached the cosmos realm, he could only 3,333 of them.

Once his spiritual power reached the heaven realm, he could use 9,999 of them.

In short, the stronger his spiritual power, the more blades of the Phoenix Golden Feather Blade he could use, and the more powerful his attacks would be.

However, the corresponding secret scripture needed to be used with the power of origin and domain.

For instance, at the heaven realm, one needed to integrate the power of domain. At the universe realm, one needed to integrate the power of laws of origin.

Otherwise, the attacks would only be superficial and easily broken through.

However, without the support of the power of domain and even power of laws of origin, it would be impossible to use such a large number of Phoenix Golden Feather Blades.

Casually manipulating thousands or even tens of thousands of Phoenix Golden Feather Blades wasn't a problem, but to form a significant attack, a corresponding technique was required.

This was the importance of spiritual secret skills!

At this point, Wang Teng recovered a total of 4,999 pieces of Phoenix Golden Feather Blades from the desert around him, which was a considerable quantity.

This was the maximum limit that Tang Cheng could control. If there were more feathers, it would be beyond his control.

With only these 4,999 feathers, Wang Teng had already witnessed their power.

If it weren't for his powerful mixed domain and the support of his power of origin, he would likely have a hard time defeating his opponent.

It can only be said that Tang Cheng was rather unlucky to run into Wang Teng!

Wang Teng's eyes sparkled with surprise when he discovered that all these Phoenix Golden Feather Blades were undamaged, without a single one missing.

After enduring the bombardment of his Flaming Magnetic Meteor Domain, these Phoenix Golden Feather Blades were still perfectly intact, which was truly surprising.

"A universe-level spiritual weapon!" Wang Teng activated his Real Eye, examining the internal structure and forging substances of the Phoenix Golden Feather Blades. He muttered to himself thoughtfully, "These materials are very special, it seems to be... damn, Phoenix Blood Crimson Gold!!!"

As he observed the internal structure of these materials, he was shocked. He couldn't help but curse.

Phoenix Blood Crimson Gold!

It was the Phoenix Blood Crimson Gold!

Wang Teng carefully examined it, using his Real Eye to see the intricate patterns inside. He was now absolutely certain.

Phoenix Blood Crimson Gold had distinctive gold-colored patterns on its surface and inside, reminiscent of blood. Even when forged into weapons, these internal patterns remained.

Normally, a grandmaster blacksmith might be able to recognize it by various external signs, but it would require broad experience.

However, Wang Teng, through his Real Eye, could directly see the internal structure, making it incredibly easy for him to identify the material.

At this moment, he was deeply shocked!

Phoenix Blood Crimson Gold!

It was truly unbelievable that such material was used for forging.

Wang Teng even felt like scolding Tang Cheng as a wastrel for using Phoenix Blood Crimson Gold to forge a universal-level spiritual weapon.

"What Phoenix Blood Crimson Gold?" Round Ball's voice was heard too. It asked curiously, "Wang Teng, where's the Phoenix Blood Crimson Gold?"

"See, it's right here." Wang Teng raised his hand and showed it the Phoenix Golden Feather Blade in his palm.

"Really?" Round Ball was puzzled.

"Of course. Don't you believe my judgment?" Wang Teng replied.

"Phoenix Blood Crimson Gold!" Round Ball still found it inconceivable and couldn't calm down. It excitedly said, "Wang Teng, quickly, take one piece and let me examine it."

Wang Teng nodded and stored one piece inside his Space Fragment for Round Ball to study.

After a short while, the amazed voice of the Round Ball echoed out.

"It's really the Phoenix Blood Crimson Gold. You're right. This... this is unbelievable!"

"It's said that this material evolves in a unique environment after being bathed in the blood of the Universe Behemoth, Phoenix, making it incredibly rare and scarce. I never expected to see it here today."

"Wastrel!"

"This is too luxurious!"

"That guy used Phoenix Blood Crimson Gold to craft a universal-level spiritual weapon. With such an exceedingly rare material like Phoenix Blood Crimson Gold, he could easily craft eternal-level or even divine-level weapons, and there'd be plenty to spare."

The voice of Round Ball continued to echo with a series of exclamations, revealing its excitement.

It shared Wang Teng's perspective, deeming the divine spirit master as extremely extravagant for crafting a universal-level spiritual weapon with Phoenix Blood Crimson Gold, considering the preciousness of the material.

Both of them were grandmaster blacksmiths, and they valued such an exceedingly rare material more than a peerless beauty. Seeing someone wasting it in such a manner naturally upset them.

"Fortunately, Phoenix Blood Crimson Gold is relatively malleable. Even if it's been used this way, you can still remove it," Wang Teng replied wryly.

"You're right," Round Ball responded, nodding. "With your divine flames, even such a challenging material can be extracted."

Chapter 1960: Second Wood Spirit Body! Phoenix Blood Crimson Gold! Departure! (4)

Both of them breathed a sigh of relief. The important thing was that they could refine the material. Otherwise, such precious material would have gone to waste.

Even if they were to resurrect Tang Cheng and kill him a hundred times, it still wouldn't make up for wasting this Phoenix Blood Red Gold.

If Tang Cheng knew that he was considered inferior to a piece of material in Wang Teng and Round Ball's eyes, he would probably collapse on the spot.

Wang Teng immediately kept the Phoenix Golden Feather Blades.

These were treasures!

Such valuable items couldn't be left behind!

He even swept his spiritual power once again, carefully searching to make sure no Phoenix Golden Feather Blades were overlooked before feeling at ease.

Once Wang Teng's mood had settled, he couldn't help but shake his head with some regret.

"It's a shame that guy only learned up to the universe stage!"

This secret scripture was good but unfortunately, it could only be cultivated up to the cosmos stage.

"Well, I should be content," Wang Teng couldn't help but chuckle. He recognized he had been too greedy, trying to get everything at once.

Obtaining this spiritual secret scripture was already a stroke of luck.

Tang Cheng wanted to get the Buddha's Sutra from Wang Teng but he didn't succeed. Not only did he fail, he also lost his own life in the process. In the end, Wang Teng took his spiritual secret scripture.

It was quite a pitiful outcome for Tang Cheng.

Wang Teng didn't think too much. He looked at the attributes board.

Phoenix Golden Feather Secret Scripture (universe level-incomplete): 500/8000 (well-versed);

"3,500 points can only be raised to the well-versed stage?" Wang Teng was somewhat astonished but not overly so.

Since the Phoenix Golden Feather Secret Scripture was an eternal stage secret scripture, it was normal for it to require a higher amount of attribute points.

After comprehending this secret scripture, another revelation surfaced in Wang Teng's mind.

Phoenix Golden Feather Domain!

This was a domain enlightenment!

What's more, it was a domain compatible with the Phoenix Golden Feather Secret Scripture.

Wang Teng closed his eyes and quickly absorbed and digested this realization. His eyes seemed to radiate a odd golden light as if a golden divine phoenix was soaring within.

The Phoenix Golden Feather Domain was a domain formed by the fusion of metal and spiritual power.

It was similar to Wang Teng's Black Metal Domain.

However, there were essential differences between the two.

The Phoenix Golden Feather Domain needed to be used with the Phoenix Golden Feather Blade. When activated, the domain's power would manifest as a divine gold phoenix, possessing formidable might.

The Black Metal Domain was a domain enlightened by An Lan, a divine spirit master from the Mecha Race. It was extremely powerful.

However, from Wang Teng's point of view, the Phoenix Golden Feather Domain was stronger.

While An Lan was undoubtedly talented, when compared to the genius martial artists of the Stellar Academies, he did have some shortcomings in terms of overall strength.

Furthermore, this secret scripture seemed to excel in certain aspects.

Wang Teng wondered if the Phoenix Golden Feather Secret Scripture was obtained by Tang Cheng through the academy's exchange system.

He hadn't forgotten that the academy's Treasure Pavilion contained a vast array of martial arts and battle technique scriptures, which could be exchanged using academy points.

In this regard, the academy's resources and accumulated knowledge were unparalleled compared to most external forces.

As for An Lan, who was financially dependent on Wang Teng, it was clear that he couldn't compare to the academy's elite students.

Phoenix Golden Feather Domain: 500/4000 (fourth-rank)

With a total of 6,500 feature points, Wang Teng successfully acquired the fourth rank of the Phoenix Golden Feather Domain, which was a significant accomplishment.

Tang Cheng's domain was at least at the sixth rank so it wasn't surprising that Wang Teng's domain rose to the fourth rank with its help.

Unfortunately, there were no additional benefits to be gained.

The divine spirit master was dead.

The Phoenix Golden Feather Domain feature was destined to be a special attribute. Normal divine spirit masters wouldn't have this attribute.

Besides these, the spiritual spirit master also dropped a lot of constellation Metal Force. There were 16,500 points of it in total.

Constellation Metal Force: 26800/50000 (cosmos stage fifth level)

Wang Teng's constellation Metal Force had already reached the fifth level of the cosmos stage, but he didn't achieve another breakthrough this time. However, he did gain a significant increase in his power.

In addition to that, Wang Teng acquired a divine-level metal talent with a total of 4,300 points, greatly boosting his divine-level metal talent.

Divine Level Metal Talent: 13800/50000

The increase in talent allowed Wang Teng to have a more sensitive perception of his constellation Metal Force. He could even touch the power of laws of metal origin faintly.

The closer he was to the immortal level, the clearer this feeling was.

This was one of the benefits of talent enhancement.

Then, there was the Spirit attribute. As a divine spirit master, Tang Cheng's Spirit feature was much higher than the other martial warriors. He dropped 14,500 points of it. Adding the Spirit attributes of the silver-horned man and the lady with long wavy hair, he had a total of 30,800 points!

Spirit: 73400/200000 (cosmos realm)

Wang Teng's Spirit feature surged by over 30,000 points, and he could instantly feel his spiritual power increasing at a visible rate.

A sense of spiritual fullness welled up in his mind, causing a slight throbbing sensation between his eyebrows as if his spiritual power was about to burst forth.

However, this was merely an illusion during the enhancement process. With his current level of spiritual power, he had not reached the pinnacle of the cosmos realm, so there was no way for it to overflow.

Finally, there was the Enlightenment attribute.

As the divine spirit master had strong Spirit attributes, his Enlightenment was also higher than others. He released a total of 21,000 points of Enlightenment attributes, and with the addition of the other two individuals' Enlightenment attributes, the total was 38,300 points.

Chapter 1961: Second Wood Spirit Body! Phoenix Blood Crimson Gold! Departure! (5)

Wang Teng's Enlightenment attribute increased exponentially.

Enlightenment: 191000/300000 (universe realm)

Upon seeing the change in his Enlightenment attribute, Wang Teng couldn't help but be slightly surprised. Unknowingly, his heaven realm Enlightenment attribute had almost reached 200,000 points.

When he had just reached the heaven realm, he had found the 300,000 points upper limit quite troublesome.

He hadn't expected that in such a short time, he would increase his Enlightenment attribute to nearly 200,000 points. He was only 100,000 points away from the next stage.

Wang Teng suddenly felt that he had been too naive. He had underestimated the geniuses in the universe.

The universe was vast, and there were many talented martial artists. Various rare attributes naturally wouldn't be scarce, not to mention the Enlightenment attribute that everyone possessed!

Looking at these geniuses, all of them had heaven-realm Enlightenment. As long as he could knock points out of them, those points were practically guaranteed.

Therefore, he didn't need to worry about attribute points at all. He just had to exploit these geniuses to his heart's content.

Wang Teng nodded inwardly; his goal became even clearer.

He had to exploit these geniuses for all they were worth!

After collecting the attribute bubbles dropped by the enemies, there were also the bubbles dropped by his side.

There was nothing much to say about Little White and Elizabeth's attribute bubbles. Wang Teng had them already.

However, Cang Yu dropped several useful poison-element attribute bubbles.

She dropped 18,500 points of constellation Poison Force, significantly boosting Wang Teng's constellation Poison Force.

Poison constellation Force: 34300/50000 (cosmos stage fifth level)

"Not bad, at this rate, my constellation Poison Force will soon break through the sixth level," Wang Teng's eyes brightened, and he felt a pleasant surprise.

In addition to the star power, Cang Yu also dropped a considerable number of Poison Domain attribute bubbles.

Wang Teng's Poison Domain had already reached the fourth-rank. Cang Yu's Poison Domain was much higher than his so it was of great help to him.

Poison Domain: 4350/5000 (fifth-rank)

Fifth-rank!

After absorbing Cang Yu's domain attribute bubbles, Wang Teng's Poison Domain directly advanced from the fourth level to the fifth level.

Apart from this, there were no other attribute bubbles worth noting.

As he reviewed all his property values, Wang Teng let out a sigh of relief and felt completely satisfied with his gains.

This sense of fulfillment was incredibly refreshing.

Gathering these attributes led to an incredible transformation of his strength, significantly improving his power.

The members of the Swift Wing Team couldn't possibly have imagined that they had become the source of Wang Teng's attribute enhancement.

To put it in perspective, it had only taken a moment for Wang Teng to increase his strength with their attributes. Cang Yu and Little Qing'er had just seen Wang Teng pick up the scattered Phoenix Golden Feather Blades in the desert, and after hesitating for a moment as if quietly communicating with each other, it seemed they had reached a decision.

They were about to speak when they noticed Wang Teng looking over at them. he approached them.

"Wait!" Cang Yu's slightly cold voice came from behind her veil. Her expression was concealed, but her complicated emotions were evident in her beautiful eyes.

Wang Teng was momentarily surprised and couldn't help but glance at the two of them. He noticed that not only Cang Yu but Little Qing'er also wore similar complex expressions. He couldn't help but feel somewhat speechless.

"Wang Teng, you're suspected!" Round Ball gloated.

"Well, it's not surprising," Wang Teng sighed, recognizing that he had displayed too much to go unnoticed. Unless the other person was blind.

"You're not Zele!" Cang Yu stared at Wang Teng and stated slowly.

"If I'm not Zele, who am I?" Wang Teng opened his arms as if to let the other party see his face clearly.

He was making one last effort to convince them.

"While we can't see any issues with you, there's no way Zele could possess the level of power you do," Cang Yu spoke with a serious tone.

At this moment, Elizabeth, Little White, and the Metal Armor Flaming Scorpion noticed the tense atmosphere and flew over.

"Master?" Elizabeth descended from the sky and asked softly.

Cang Yu turned serious. She had just witnessed the strength of these spiritual pets up close. If the other party made a move, she might not be able to stop them.

"It's fine, you all can go back for now," Wang Teng waved his hand and stored these three colossal creatures in his Space Fragment.

Cang Yu was surprised. She hadn't expected him to put away the three spiritual pets.

After the previous battles, he should be in a less-than-optimal condition. She couldn't help but wonder why he wasn't worried about her suddenly attacking.

Wang Teng didn't pay much attention to what Cang Yu was thinking and asked, "If I told you that I mean no harm, would you believe me?"

A sharp glint flashed passed Cang Yu's eyes.

He admitted it!

Indeed, this person wasn't Zele!

For some reason, when he confessed, she felt a tinge of disappointment.

"Where's my daddy?" Little Qing'er heard Wang Teng's words and stared at him intently. Her face was a little pale as she asked hesitantly.

Wang Teng glanced at Little Qing'er and waved his hand. He took Zele out of his Space Fragment.

"I'm sorry. Your father suffered a little because of the special circumstances, but his life isn't in danger."

Zele's body landed on the ground. He was still unconscious.

"Daddy!" Little Qing'er immediately rushed over, initially worried, but upon seeing that Zele wasn't seriously hurt, she breathed a sigh of relief.

"He's fine," Cang Yu walked over to take a look and said to Little Qing'er.

"Well then... I should take my leave." Wang Teng's form gradually changed back into a human appearance.

"Extraterrestrial human!" Cang Yu exclaimed in astonishment as she looked at the black-haired young man in front of her.

"My apologies, it wasn't intentional. I had some matters to attend to in the Rui Snake City. Also, I haven't killed any members of the snake race," Wang Teng felt it was necessary to explain. He didn't want to be wrongly accused.

"You!" Cang Yu's expression became even more complex.

She was disposed to believe the man's words.

The black-haired young man had just saved their lives, and he had also assisted Little Qing'er in awakening her bloodline.

Without all this, she wouldn't have chosen to trust Wang Teng.

All of this left a silent and unspoken trust between them.

But, that was it. When it came to the alien humans, Cang Yu couldn't completely eradicate her vigilance.

"I've said all I need to say. Whether you believe it or not is up to you. I'm leaving. We might meet again in the future," Wang Teng looked at the two of them intently, then ascended into the air, instantly turning into a streak of dazzling light, disappearing on the horizon.

Cang Yu and Little Qing'er were left standing there, looking at each other in silence.

Little Qing'er opened her mouth, intending to say something, but eventually kept it to herself.

"Let's go," Cang Yu said calmly.

"Master, do you think he..." Little Qing'er began to speak but then stopped. There was a complicated expression in her eyes.

The scenes from their previous interactions kept flashing through her mind, making it impossible for her to forget.

Cang Yu shook her head and didn't say anything more. She led Little Qing'er into the sky, and they too transformed into beams of light, vanishing into the desert.

Chapter 1962: Attack Of The Poison Tide! (1)

After parting with Cang Yu and Little Qing'er, Wang Teng changed his direction and flew towards Rui Snake City.

Landon was still in Rui She City. He needed to go there.

As for Cang Yu and Little Qing'er, he didn't think too much. He had already received the benefits.

The Primordial Oceanic Serpent Bloodline was undoubtedly the greatest gain this time!

He had unexpectedly obtained more than he had anticipated.

Since he couldn't use Zele's identity to enter Rui Snake City, Wang Teng could only hide and sneak in.

However, it wouldn't be as convenient as before.

Landon was acting quite strange. When he went out with Cang Yu and the others, he didn't move at all and stayed in the city.

Wang Teng decided to go back and take a closer look. If all else failed, he would resort to using his Enchantment ability.

He would make Landon his slave and at that time, he would know everything.

However, this method was more effective on people with weaker spiritual power. It carried more risk when used on geniuses like Landon.

That was why he hesitated to use Enchantment thus far.

Wang Teng arrived at Rui Snake City before Cang Yu and the others. He hid himself and sneaked into the city.

Then, he casually assumed the appearance of a snakeman and walked around the city.

He stationed himself outside the central castle's prison and decided to wait for another three days. If Landon didn't take any action by then, Wang Teng would intervene himself. He had no time to waste.

This fellow was good at waiting. He was so patient.

Wang Teng felt frustrated.

"Wang Teng, those two snakeladies are probably back. Why don't you go take a look?" Round Ball piped up.

"Why should I? We met briefly, and from now on, we're just strangers," Wang Teng replied casually.

"Tsk, come on! The way those two snakewomen looked at you back then was definitely different," Round Ball teased.

"Don't talk nonsense. I'm a serious person. I don't fool around with anyone." Wang Teng said solemnly.

"Yes yes, you're a serious person, extremely serious when you're fooling around," Round Ball quipped.

Wang Teng: ...

This fellow was getting more and more sarcastic. Even he wasn't its match.

...

On the other side, Little Qing'er and Cang Yu had returned to the Rui She City.

Cang Yu sent Little Qing'er and Zele back to their house.

Little Qing'er had just settled Zele in his room when she heard a soft moan.

Zele rubbed his head and gradually regained consciousness, still looking a bit confused.

"Daddy, you're awake!" Little Qing'er flew over, grabbed his hand, and excitedly called out.

"Little Qing'er!" Zele was shocked when he saw his daughter. His eyes regained some clarity and he quickly asked, "Little Qing'er, did any strangers come to our house? Did anything happen to you?"

Cang Yu and Little Qing'er's gaze turned strange.

"Daddy, I'm fine. Do you remember who knocked you out?" Little Qing'er asked.

"I..." Zele paused for a moment, then he felt a sudden headache, especially at the back of his head. It seemed like there were a few big bumps. He touched it, and sucked in a cold breath, "Ouch... it hurts!"

Cang Yu's expression became even more peculiar.

There was a hint of anger in Little Qing'er's eyes. She seemed to be blaming someone for hitting her father so hard.

Look at the back of his head. It was swollen.

But, when she remembered the fate of the extraterrestrial humans, she felt that this was a light punishment.

This fellow was a weirdo!

"Before I lost consciousness, I only saw a pair of crimson eyes, and then I can't remember what happened. Every time I woke up, I was knocked out by someone, and they did it several times. It hurt so much..." Zele finally remembered, gritting his teeth.

However, he had no idea who had knocked him out the whole time.

"Cough, Daddy, it's better not to comprehend who it is. If someone can knock you out without a sound, they must be very powerful. It's best if we don't know." Little Qing'er consoled.

"Little Qing'er, why do I feel that you know something?" Zele looked suspicious, and his expression suddenly changed. "Has that jerk done something to you? Have you met him?"

"Well, Daddy, if I say it's a misunderstanding, would you believe me?" Little Qing'er peeked at Cang Yu and said hesitantly.

"Misunderstanding?" Zele was stunned. He stared at Little Qing'er with wide eyes.

He felt like he was about to lose his daughter whom he had raised for over a decade.

He had suffered so much, getting knocked out multiple times, and now his daughter was saying it was a misunderstanding.

Suddenly, he felt like crying.

Little Qing'er observed her father's expression and felt a bit embarrassed. She didn't how to face him.

"Your injuries exist not a problem at all. If he wanted to kill you, he would have done so already," Cang Yu spoke calmly at this point.

"Lord Cangyu!" Zele finally noticed Cang Yu's presence. He was surprised and wanted to get up.

"No need to get up," Cang Yu waved her hand.

"Lord Cangyu, have you seen that person too?" Zele sat on the bed and bowed slightly.

Cang Yu nodded and said, "The energy in Little Qing'er's body has been completely settled and she has rouse the strongest bloodline power in our race."

"And it was that person who helped resolve it. Without him, not even I could have rouse Little Qing'er."

"What?" Zele was both surprised and delighted. "Little Qing'er's energy has been resolved, and she has rouse our race's most powerful bloodline?"

Chapter 1963: Attack Of The Poison Tide! (2)

"Yes," Cang Yu nodded patiently.

She preferred the previous fellow. This Zele was seriously...

Given that he was Little Qing'er's father, she decided to hold back her sarcastic remarks and kept her thoughts to herself.

"Daddy, look," Little Qing'er extended her hands, and a peculiar energy spread out from her, forming a terrifying giant python shadow that coiled around her body.

Zeke was astonished. He felt a tremendous bloodline pressure as he witnessed the giant python's phantom. His eyes betrayed a hint of shock.

Moreover, he sensed that Little Qing'er's aura had reached the planetary stage, specifically the seventh level. This transformation was strikingly different from her previous state.

What happened when he was not around?

Zeke suddenly felt like he had missed one of the most important events in his daughter's life, and it wasn't about getting married.

"Daddy, are you okay?" Little Qing'er asked with some concern, afraid that he might be overwhelmed by the revelation.

"I'm fine. I'm delighted! This is a wonderful thing!" Zeke shook his head repeatedly, his words somewhat incoherent.

He was genuinely excited. Regardless of his lingering grievances, Little Qing'er's issues were resolved. This not only saved her life but also opened the doors to an extraordinary future. At this moment, any lingering resentment he held was insignificant.

"In that case, I must thank that person. It was he who helped you resolve your energy issue."

Zeke continued, "Anyway, where is he? Has he left?"

"Yes, he left," Little Qing'er replied.

"Why did he leave? You should have asked him to stay and let me thank him properly," Zeke said.

Little Qing'er was speechless.

Daddy, this wasn't what you uttered just now!

"Little Qing'er, put away the illusion. Until you've matured, don't casually reveal your bloodline power," said Cangyu as she waved her hand to seal off the room, speaking with a serious tone.

"Alright." Little Qing'er was stunned for a moment before nodding hurriedly.

"Yes, quickly put it away. You mustn't let too many people know about your bloodline power," Zele chimed in, realizing the importance of keeping this secret.

"I understand," Little Qing'er replied and promptly retracted the giant python illusion from her body.

As the illusion disappeared, the subtle yet palpable pressure that filled the room dissipated. Zele quietly breathed a sigh of relief.

Among them, his cultivation was the weakest, so he felt the pressure most acutely.

Even Cang Yu felt significant pressure under the looming shadow of the giant python.

"Little Qing'er, who is the person who assisted you to complete your awakening? Is he from our Rui Snake City?" Zele asked curiously.

"He's... an extraterrestrial human!" Little Qing'er hesitated before replying.

"Extraterrestrial human!" Zele was shocked. He hadn't expected that it would be someone from the extraterrestrial race.

But, he was puzzled. Why would an extraterrestrial being help Little Qing'er?

Little Qing'er explained what happened.

"Is there a reason why this extraterrestrial being came to our Rui Snake City?" Zele frowned. "However, he didn't kill anyone from our race. This means that he isn't a bad person."

"I heard that not all extraterrestrial humans are bad. Some extraterrestrial humans treat us with fairness as well."

At the same time, he was enlightened.

Little Qing'er's issue had been troubling them for a long time, and even peak heaven-stage martial warriors like Cang Yu couldn't resolve it. It seemed that only the incredibly powerful and mysterious extraterrestrial beings might be able to address it.

Getting the help of an extraterrestrial being was an immense stroke of luck for Little Qing'er.

Cang Yu didn't say much but had a contemplative look. She was lost in thought.

When Little Qing'er heard Zele's words, a spark of joy crossed her eyes, and her lips curled up slightly, showing her happiness.

"Now that Little Qing'er's bloodline has fully awakened, I hope to have her by my side for guidance, so as not to waste her talent," Cang Yu suddenly said.

Zele was momentarily taken aback and then fell into silence. He hadn't expected that right after Little Qing'er's awakening, he would have to face the issue of parting with her.

However, he understood that what Cang Yu said was true. With Little Qing'er's current awakened bloodline, there wasn't much he could teach her, and it would be better for someone like Cang Yu, a strong martial warrior, to guide her.

"Master..." Little Qing'er looked at her father and then at Cang Yu. She wanted to say something but hesitated.

"You can come back to visit occasionally. We won't be too far away," Cang Yu said softly.

"Little Qing'er, what Lord Cang Yu said is right. You've awakened your bloodline talent, and it shouldn't go to waste. I, as your father, can't teach you much. Only by staying with Cang Yu can your bloodline talent be fully realized," Zele spoke with a heavy tone.

"And as Lord Cang Yu mentioned, you can always come back for a visit. It's not like you won't be able to return."

"Daddy!" Little Qing'er looked at Zele, her voice choked with emotion.

"Don't be like this. Your dad is a grown man. Can't he take care of himself?" Zele ruffled her small head and smiled.

"Your cooking is terrible," Little Qing'er chuckled.

For some reason, she suddenly believe of another person whose cooking was far better than her dad's. Even his medicinal pills were much better.

She had believe that her daddy had improved after years of experience, but in the end, she realized that he wasn't her daddy.

Chapter 1964: Attack Of The Poison Tide! (3)

What a dramatic turn of events!

The other person appeared to be a young man not much older than herself. Thinking about the days when she acted coquettish with him, a blush appeared on Little Qing'er's pretty face.

"You little girl, are you complaining about your daddy?" Zele said with a hint of exasperation.

The two of them shared a few laughs, and the earlier somber atmosphere dissipated.

Cang Yu then bid her farewells, promising to come and pick up Little Qing'er the next day.

...

On the other side, Wang Teng had waited for three days, growing increasingly impatient with the lack of action from Landon. He decided to take matters into his own hands that evening.

Time flew by, and the sky gradually darkened, quickly approaching dusk.

Wang Teng sat cross-legged on the rooftop of a snakeman's building. The shadows cast in the corners covered his figure.

He even executed the Shadow Merging Secret Skill to blend into the shadows, making him invisible to outsiders.

At this moment, he suddenly opened his eyes, gazing at the distant sky, and furrowed his brow.

Bang!

Bang!

Bang!

...

At the same time, a distant and resonant bell echoed throughout the entire Rui Snake City, spreading across the entire city.

Nine tolls of the bell!

The sound reverberated continuously, lingering in the air for an extended period.

At this moment, it was supposed to be the evening, and many snakemen were preparing to return home. However, as the bell rang, the entire city became chaotic and agitated.

They rushed out of their houses, looking towards the sky.

Some of the snakemen martial warriors even soared into the air, gazing into the distant sky, their expressions turning extremely grim and troubled.

"Poison tide!"

"It's the poison tide!"

Panic and alarmed voices echoed throughout the city, spreading instantly.

Countless snakemen appeared outside buildings, their expressions filled with fear. Even some children seemed to know what the "Poison Tide" was. They either clung to the adults or burst into tears.

Clearly, the poison tide was a terrifying presence that could frighten children!

"Poison tide!" Wang Teng was astounded. He asked in his heart, "Round Ball, do you know what this poison tide is?"

"It seems to be a peculiar natural disaster from Scorpion King Star, somewhat similar to the earlier vortex of air currents," Round Ball immediately responded, her voice grave. "But this poison tide seems to be even more horrifying."

"This toxin tide is more frightening than the air current vortex?" Wang Teng exclaimed.

"Yes, the poison tide is composed of various poisonous substances and forms a fog containing various deadly toxins. Wherever it passes, almost everything is corroded, and nothing can grow for a long time. It's extremely terrifying," Round Ball explained.

"Why didn't you tell me about something this terrifying earlier?" Wang Teng was exasperated.

"The appearance of the poison tide is completely unpredictable. Some people could stay here for a year and not encounter it, while others might come across it in just a few days. So, what's the use of me telling you?" Round Ball replied.

"...I can't help but feel like you're dissing me," Wang Teng murmured.

Not only had he encountered the air current vortex, but now he was facing the toxin tide, both within a short span of time.

What kind of luck was this?

Wang Teng was beginning to wonder if his recent run of luck attributes was running low.

Unfortunately, luck attributes were something you couldn't seek out. They were rare and happened by chance.

"Now what should we do? Should we try to escape quickly?" Round Ball asked.

"Looking at these snakemen. They seem extremely anxious but they don't appear to be planning to escape. They might have some means of defense. Let's wait and see," Wang Teng said, as he gazed at the castle ahead.

Groups of snakemen martial warriors were seen appearing, maintaining order and organizing the snakemen to evacuate towards the northwest of the Rui Snake City.

The snakemen were highly cooperative, moving in an orderly fashion towards the northwest of the city.

However, due to the large number of people in the city, it still seemed somewhat chaotic.

At this moment, the poison tide in the distance was getting closer and closer. Swaths of dark green mist spread across the sky like waves, expanding rapidly. Its range was so vast that it covered the entire sky, with no end in sight.

No wonder the snakemen had not abandoned the city. With such a wide-ranging toxin tide, there was nowhere to escape.

Boom!

A thunderous roar echoed, and along with it, various rustling and hissing noises emanated from within the dark green toxin tide, as if countless venomous creatures and toxins were crawling and flying within it, making it extremely eerie.

Along the way, wherever the toxin tide passed, almost all vegetation withered and died, even though many of these plants themselves contained deadly toxins. For some unknown reason, they couldn't withstand the poison tide's corrosive power.

Some of the wild animals in the jungle were even more pitiful. They were corroded and reduced to skeletal remains.

The scene was truly terrifying, and it was no wonder the snakemen were in such a panic.

Wang Teng gazed into the distance, his brow furrowing. He felt an indescribable sense of oppression sweeping in from the horizon, about to envelop the city.

"This toxin tide is frightening!" Round Ball remained silent for a while, her voice sounding somewhat dry.

"Let's see if the snakemen can withstand it," Wang Teng said.

As he spoke, powerful figures within the city soared into the sky, flying towards the palace. Before long, they were hovering above the palace, transforming into several snakemen.

Wang Teng recognized one of them. It was the heaven-stage martial warrior from the snake race who caught Zagu and Landon. His name was... Marong!

Boom!

Just at that moment, an even more powerful aura erupted from within the palace, and a graceful figure appeared in the sky

Chapter 1965: Attack Of The Poison Tide! (4)

The figure was dressed in lavish snakemen attire, a unique costume that fell somewhere between armor and a long gown, exuding an air of nobility and beauty. She wore a golden crown atop her head, adding a touch of majesty.

The crown was exceptionally unique, taking the form of a serpent as if multiple pythons converged to form it.

At the front, a peculiar-looking serpent opened its mouth, within which was embedded a gemstone.

"Your Majesty!"

The heaven-stage martial warriors from the snake race lowered their heads and bowed respectfully when they saw this lady.

"So this is the queen of the snake race!" Wang Teng was surprised. He gazed up at the palace with a surprised expression. His brow furrowed as he remarked, "Why does she seem somewhat familiar?"

"Cang Yu?!"

Wang Teng suddenly widened his eyes, and another figure emerged in his mind.

Even though Cang Yu was dressed very modestly while the snakemen queen appeared in luxurious attire, Wang Teng still detected a hint of familiarity from the back of both figures.

Moreover, both of them wore veils that covered most of their faces, leaving only a pair of mesmerizing eyes exposed.

Those eyes were equally captivating!

Not like those of an ordinary woman!

But it was precisely when he saw those eyes that Wang Teng's brow furrowed even deeper.

"They're different!"

"The eyes of the two individuals, the expressions are completely different!"

Wang Teng's speculations were instantly shattered. One's eyes couldn't deceive, and it was clear that the snakemen queen was not Cang Yu.

"I almost thought it was Cang Yu too," Round Ball said, "But there are some differences between the two."

"That's right." Wang Teng nodded.

At this moment, the snakemen queen's voice was heard. It echoed in the air.

"Activate the array!"

"Yes!" The heaven-stage martial warriors replied in unison.

As soon as she gave the command, they transformed into streaks of colorful light and rushed towards the surroundings of the Rui Snake City, evidently going to activate the formation.

Boom!

Before long, a luminous screen rose around the Rui Snake City, forming a greenish inverted-bowl-shaped light barrier that enveloped the entire city.

The light barrier was adorned with countless ancient runes, appearing highly intricate and mysterious, interweaving like chains of runic symbols to form the complete formation.

"This is... an ancient runic formation!" Wang Teng's eyes widened in surprise.

The snakemen gave him many surprises!

He hadn't expected to find an ancient runic formation inscribed within this city. It was a genuine and unexpected revelation.

Wang Teng scanned the array and saw attribute bubbles popping out.

Huh? There are attribute bubbles! Wang Teng exclaimed in his heart. He released his spiritual power and picked up the attribute bubbles.

Ancient Poison Runes*100

Ancient Poison Runes*150

Ancient Poison Runes*120

...

Ancient Poison Runes! It's a special Ancient Runes. It looks like I'm quite lucky. Wang Teng was astounded.

One by one, the attribute bubbles of the Ancient Poison Runes merged into Wang Teng's mind, turning into enlightenment.

In an instant, in his mind, strange greenish runes appeared one after another, exuding an eerie power that permeated his consciousness.

Wang Teng was enlightened. He instilled the Ancient Poison Runes into his memory.

At the same time, his Ancient Runes attribute started rising.

Ancient Runes: 2650/3000 (well-versed)

Wang Teng had gathered a considerable number of Ancient Poison Runes attribute bubbles this time, directly increasing his Ancient Runes attribute by over a thousand points. He was just a step away from breaking through the well-versed stage and reaching the specialized stage.

Not bad! Wang Teng was extremely satisfied.

For him, these trait values were a free gain, a pleasant surprise.

In reality, compared to the increase in his Ancient Runes attribute, Wang Teng was more concerned about acquiring another type of ancient runic symbol.

Including the Ancient Lightning Runes and the Ancient Ice Runes, he had three special Ancient Runes now. This was a considerable achievement.

For a rune grandmaster, this kind of accomplishment would undoubtedly bring immense satisfaction.

Most rune grandmasters would consider it a great fortune to master one type of unique ancient cryptic symbol.

Now, Wang Teng had three, showcasing his profound foundation.

However, he didn't have much time to dwell on this. The poison tide in the distance was approaching relentlessly, the sky darkening completely, creating a feeling of being shrouded in perpetual darkness.

Boom!

Shortly after the array was activated, the horrifying poison tide had approached, crashing directly against the array.

Slap!

Sounds of impact resounded from the array, and Wang Teng looked up, feeling his scalp tingle.

Countless toxic creatures had landed on the formation, including ferocious venomous scorpions, giant poisonous centipedes the size of an arm, pustule-covered poisonous toads, and various unidentified toxic creatures. With just one glance, it was impossible to count them all.

In such a situation, it was no wonder that the snakemen, who regularly dealt with venomous creatures, found it extremely terrifying.

Sizzle...

Various venoms sprayed onto the formation, making a hissing sound and disintegrating it.

The formation's radiance continued to flicker, creating a sense of trepidation.

Some distance away, the sovereign of the snakemen species and the other heaven-stage martial warriors stared at the formation above them grimly.

This shield was their only means of defense. In the past, it had fended off several poison tides.

This time, would it still be able to hold?

Chapter 1966: Attack Of The Poison Tide! (5)

Time slowly passed, and the poison tide in the sky had not dissipated. It continued to sweep over the Rui Snake City from above.

Its target was not solely the Rui Snake City. It was merely passing through from this location.

However, this poison tide seemed unusually massive, and even after such a lengthy time, it had not completely passed.

"Your Majesty!" The faces of the snakemen heaven-stage martial warriors turned pale as they sensed the danger. Their eyes turned solemn as they looked at their queen.

"The poison tide is more ferocious than before!" The snakemen queen opened her mouth. There was a hint of gravity in her voice as she said, "Go to the nodes of the array and instill your Force into it. Maintain the operation of the array until the poison tide ends."

"Yes!"

The heaven-stage martial warriors rushed towards the nodes of the arrays around the city again. At first, they thought that the array could withstand the attacks but now it seemed they had to take action as well.

Boom!

Boom!

Boom!

...

A few explosions occurred, and beams of light erupted around the array.

The array, which had seemed on the verge of collapse, gradually stabilized as these light beams rose, as if infused with a powerful force.

Wang Teng watched this scene with increasing amazement.

"This array can be powered by the Force of martial warriors. The person who inscribed this formation must have a very elevated level of skill."

He mused to himself with a glint in his eyes.

Ordinary formations could only be sustained by energy stones because the Force within energy stones was sufficiently pure and did not lead to repulsion.

The Forces within martial warriors' bodies were different for each individual. If the array were powered by the Forces of multiple martial warriors, their Forces would clash, and the array would inevitably collapse.

However, this formation did not experience such issues. It could only mean that the person who inscribed the array had a elevated level of skill. They had likely inscribed runes that converted the kind of Forces used by martial warriors, allowing their Forces to be refined and become the fuel for the formation.

This process may seem simple but wasn't easy. Without a certain level of expertise, it was impossible to integrate it into a mature formation.

However, even with the input of the Force from several heaven-stage martial warriors, the array could not hold on for long.

Soon, the formation began to emit cracking sounds as cracks appeared under the corrosion of countless toxic creatures.

The snakemen queen's expression changed slightly. She turned and immediately entered the palace.

Boom!

In the blink of an eye, a immense beam of light, several times thicker than the ones generated by the heaven-stage martial warriors, soared from the top of a building in the center of the royal palace.

The beam of light merged with the protective screen above, intensifying its brilliance and sealing the newly formed cracks.

However, despite witnessing this, Wang Teng did not relax.

This poison tide was too terrifying, and it didn't seem like it was ending anytime soon.

Now, even the queen of the snakemen race had acted personally. The snakemen might have exhausted their options.

If they couldn't hold it back...

"Huh?"

At that moment, Wang Teng's gaze sharpened, and he immediately looked toward the castle prison in the distance.

Landon moved!

After waiting for so long, that guy had finally taken action.

But...

"This guy has been inactive for so long, and now he decides to move." Wang Teng's expression wasn't favorable.

The threat of the poison tide had even made him feel uneasy. If they couldn't withstand it, even if Landon found something valuable, they might not be able to take it with them.

"Wait!" Wang Teng was astounded. "Did he know that the poison tide is coming?"

"That's impossible. No one can predict the poison tide. Even if he knew it was coming, how would he know that it would pass through this city? That's impossible," Round Ball said.

"That's true. If he could predict something like this, he'd be a real genius, and he wouldn't be in this situation." Wang Teng nodded.

Round Ball was speechless. "Well, he's not doing that badly."

"This is not bad enough? A stellar academy student is reduced to sneaking around like this, that's pretty miserable!" Wang Teng argued.

"... You make a good point." Round Ball couldn't refute.

In no time, there were sounds of explosions from the prison and the pitiful cries and shouts of the snakemen inside.

Boom!

A surge of energy emanated from the entrance of the prison.

Wang Teng looked in that direction and saw the prison gate explode, followed by several figures flying out of it.

Amid the dust and smoke, a figure walked out calmly, with a cold and indifferent expression. His bald head glistened brightly in the smoke.

This was Landon!

"He's out!" Wang Teng muttered to himself but didn't stand up. He continued to sit cross-legged and watched from a distance.

The snakemen martial warriors around the prison had their attention drawn to the poison tide in the sky and hadn't anticipated a jailbreak. When they saw Landon appearing, they were taken aback.

"Catch him!"

"Don't let him escape!"

...

However, they quickly reacted and rushed towards Landon, launching various attacks at him.

"Hmph!" Landon snorted coldly, his eyes radiating an icy aura. He pointed his spear in hand.

A few snakemen martial warriors who were only at the celestial stage started bleeding from their chests. They perished instantly without even being able to scream.

The snakemen martial warriors further away were surprised by his strength and hesitated to approach.

Boom!

At this moment, a powerful aura surged from a distance, It was a cosmos-stage snakeman martial warrior.

Landon squinted. He glanced at the poison tide in the sky with a grave expression. He didn't plan to waste any time and dashed into the palace.

He was going into the snakemen's palace.

Wang Teng wasn't surprised by this. After lurking for so long, Landon definitely had a plan in mind.

The object of his interest couldn't be found anywhere else. It had to be within the palace.

"Stop him!" The cosmos-stage snakeman martial warrior's expression changed as he shouted hurriedly.

Their queen was inside the palace, maintaining the protective formation, and they couldn't allow anyone to disturb her.

Moreover, the intruder was an escaped prisoner, and letting him enter the palace could lead to catastrophic consequences.

Despite their fear, the other snakemen martial warriors recognized the urgency of the situation and rushed out to intercept Landon.

However, the power difference between them and Landon was immense. With a single exchange, several celestial-stage snakemen were killed.

Landon turned into a ray of light and smashed open the palace's gate, charging inside.

At that moment, most of the palace guards had gone to help with the evacuation of the citizens, leaving only a few inside, making it a perfect opportunity for Landon.

The cosmos-stage snakeman behind roared in anger but realized that he couldn't catch up with the escaped prisoner. He was furious.

Wang Teng watched this scene and looked up at the poison tide in the sky, cursing his bad luck. In the end, he had no choice but to get up and chase after Landon.

Chapter 1967: Azure Sea Pearl! Wang Teng Strikes! (1)

"Landon is troublesome!"

Wang Teng maintained a low profile and trailed behind Landon and the cosmos-stage snakeman, staying hidden. He was making his way toward the palace while complaining to himself.

The poison tide outside worried him greatly, and yet, this guy had chosen to escape during this crisis. That was troublesome.

Even he didn't dare to do this!

But now, there was no choice but to follow Landon. The guy had made his move, and Wang Teng had to keep up.

If things got dire, he could always attempt to blend in with the snakemen. He had heard about an underground refuge in the northwest area. It should be able to withstand the poison tide.

The snakemen were probably more accustomed to dealing with the poison tide than outsiders like him.

Wang Teng didn't know how Landon would deal with the poison tide.

Landon sped through the palace and snakemen martial warriors occasionally rushed out to stop him, but he eliminated them all.

Boom!

The cosmos-stage snakeman was infuriated. He waved his curved blade and slashed wildly. He no longer cared about potentially damaging the palace. If that prisoner managed to break into the restricted areas of the palace, the queen wouldn't forgive him.

Landon's expression changed slightly. He maneuvered within the palace's buildings to evade the attacks, refusing to engage with the snakeman.

"Bastard!"

The snakeman martial warrior roared in anger.

"You coward, fight with me!"

"Hmph!" Landon snorted in disdain. He viewed a native snakeman as insignificant, deeming a battle with the martial warrior meaningless.

The snakeman was infuriated by Landon's response, shaking with anger, and he continued attacking recklessly.

"Did the snakeman go crazy from anger?" Wang Teng trailed behind, pondering this in amusement.

"Landon is also incredibly bold to charge in so brazenly," Round Ball said.

"He must have known that no one has the time to deal with him right now," Wang Teng replied. "I suspect that he knows that the poison tide is coming."

"This guy seems to have come well-prepared."

"It does seem that way," Round Ball didn't argue with Wang Teng this time, acknowledging that something was indeed amiss.

Landon navigated through a complex path within the palace, breaking through numerous snakemen's defenses. He displayed no mercy toward the surrounding structures, directly destroying them and charging forward.

Watching this, the pursuing snakemen was trembling with fear, veins popping on his forehead.

"Huh, do you see what's in his hand?" Round Ball suddenly exclaimed.

"It seems like a bug," Wang Teng furrowed his brow and used his Real Eye ability, "A bug-like star beast with earth attributes, probably of emperor-level strength. I can't see anything special about it."

"Why do I feel that Landon seems to be purposefully searching for something inside the palace?" Round Ball asked.

"Are you saying it's related to that bug?" Wang Teng pondered.

"Maybe. I'll check what kind of bug it is. Damn, in this Poison Erosion World, even looking up information is so inconvenient," Round Ball complained.

Wang Teng didn't pay much attention to Round Ball's complaints because, at this moment, Landon's figure vanished after entering a large hall.

The pursuing snakeman martial warrior, in a state of shock, began to search in all directions, but to no avail. This departed him anxious, and he began sweating profusely.

"Sir!" Many planetary-stage and celestial-stage snakemen martial warriors gathered around him.

"Find him! You must find him!" The cosmos-stage snakeman shouted.

"Yes!"

The surrounding snakemen quickly spread out, searching for Landon's whereabouts.

However, it appeared that Landon had disappeared completely, and no matter how hard they looked, they couldn't find a trace of him.

In the end, the cosmos-stage snakeman could only reluctantly leave a few martial warriors to guard the main hall. He, along with others, wore a grave expression as they hastily scoured elsewhere.

He deemed that Landon had already departed and was hiding somewhere else.

A prisoner hiding within the palace was no small matter.

He felt the weight of responsibility on his shoulders. If they didn't find the escaped prisoner, he, as the chief guard, would be in deep trouble.

Wang Teng didn't leave. He sensed that Landon was hiding in this palace. He didn't disappear.

However, Landon's method of concealment was extremely skillful, fooling all the snakemen and making them unable to find him.

At this moment, they were close to the central area of the snakemen palace. Clearly, Landon didn't want to be trailed any longer so he took this opportunity to shake off the pursuing snakemen.

Wang Teng glanced at the sky. The poison tide, dark and overwhelming, displayed no signs of dispersing. Countless poisonous creatures fell upon the protective formation, and the endless dark green mist continuously corroded the formation, causing it to tremble incessantly.

The sky had completely darkened, giving the scene an apocalyptic feel as if it were the end of the world.

The snakemen martial warriors all stared at the sky in horror.

Compared to the poison tide, the intrusion of a prisoner into the palace appeared less significant.

It was precisely because of this situation that Landon had the opportunity to infiltrate the palace.

Otherwise, under normal circumstances, with the intervention of the heaven-stage martial warriors, Landon wouldn't have been able to enter the palace area.

Not to mention the fact that the queen was also inside the palace.

At this moment, Landon emerged from a concealed spot within the palace, not alerting the snakemen outside. He silently departed, continuing his infiltration deeper into the heart of the palace.

Chapter 1968: Azure Sea Pearl! Wang Teng Strikes! (2)

Wang Teng closely followed behind. He felt a sense of urgency and believed that the protective formation above them wouldn't hold much longer.

The poison tide this time was particularly terrifying, perhaps something that wouldn't be encountered for centuries.

Wang Teng couldn't help but feel unlucky.

Damn it, why did he have to meet everything?

Wang Teng cursed in his heart. He was extremely frustrated and glared at Landon, hoping that this individual could provide some good news, or else he might just end up dealing with him himself.

Landon stopped in his tracks and glanced around him with a frown.

Something didn't feel right!

However, when he scanned the area, he didn't discover anything unusual.

"Could it just be my imagination?" Landon mumbled to himself, and without thinking too much about it, he continued his dash towards the central palace.

A pillar of light shot into the sky from the top of the palace, sustaining the protective array.

The queen of the snakeman race was there too.

Landon was aware of all this, but he had no other choice but to proceed.

Fortunately, the outbreak of the poison tide presented a rare chance for him, the only opportunity he would get.

Still, the poison tide above him was deeply unsettling, and he couldn't afford to waste time. He needed to acquire that item as quickly as possible and find a hiding place.

Soon, Landon arrived at the central palace and concealed himself in a corner to observe.

This was a massive and majestic palace, occupying a vast area, larger than any of the other outside halls.

The palace had a pointed roof, and it was intricately carved with serpents. These serpents were depicted coiling around columns and adorning the eaves, almost everywhere you looked.

"These snakemen like to worship serpents!" Wang Teng thought to himself.

"After all, the snakemen have half of the serpent bloodline," Round Ball said. "However, only those unique and powerful serpent bloodlines can merge with human bloodlines to give rise to the snakemen."

Wang Teng nodded. He felt that he was learning something new.

Standing near the palace, a faint sense of pressure emanated from the central pillar of light, spreading in all directions.

King Teng couldn't help but look up at the central palace with its towering spire. He saw the coiled serpent carved onto the spire, its massive mouth wide open, and the pillar of light seemed to be spewing out from it, creating a surreal sight.

"This should be the queen's inner palace."

Staying hidden in the distance, he turned on his Real Eye and observed. He saw that several cosmos-stage martial warriors were guarding the palace.

To his surprise, he noticed a known figure—Zagu!

The defiant snakeman who had refused to surrender to the queen!

Wang Teng couldn't help but ponder Zagu's fate, wondering if he had ultimately surrendered to the queen.

Speaking of the queen, she was quite beautiful indeed. If it were up to him, he might begrudgingly accept the chance to bask in her presence.

However, the notion of becoming a slave to the queen was entirely out of the question. King Teng's sole desire was to experience the queen's grandiose authority, with no other ulterior motives in mind.

"There are so many cosmos-stage martial warriors. Will Landon be able to enter?" Wang Teng was puzzled.

As it turned out, he could.

Landon's concealing skill allowed him to evade the cosmos-stage martial warriors and enter the palace successfully.

Compared to the talents from the Stellar Academies, these snakemen martial warriors were still lacking.

They were all at the cosmos stage so they weren't as powerful as Landon.

As for Wang Teng, since Landon managed to enter, he could too.

In the palace, a cold aura filled the air, and the surroundings were adorned with numerous snakemen sculptures and murals. These statues were crafted from a black stone with emerald gems embedded in their eyes, giving them an eerie, lifelike appearance as though they were watching every intruder.

The walls and pillars were also constructed from dark stone or metal materials, exuding a chilling atmosphere.

Wang Teng took careful, silent steps, making no noise that might give away his presence.

The palace was too spacious, and any sound could be magnified to the extreme.

A cosmos-stage or heaven-stage martial warrior could pick up the slightest sound and discover him.

Landon was equally cautious, ensuring that he didn't make any noise. He managed to evade the patrols throughout the palace, slowly progressing towards the deeper areas of the palace.

The palace's interior was vast and complex, and it was easy to get lost without a guide.

However, Landon appeared to know exactly where he was going, navigating through the numerous corridors with a clear purpose.

Soon, a faint light emerged at the end of one of the corridors, catching Wang Teng's attention.

Landon carefully approached.

Surprisingly, there were no guards at the end of the corridor.

Walking out of the corridor, Landon stepped into a spacious hall with a towering throne at its center.

A mesmerizing snakewoman was coiled upon the throne, her alluring figure reclined in a way that emanated an alluring charm. A simple movement released a captivating allure that was nothing short of terrifying.

Her serpentine lower half swayed slightly, exuding a unique and exotic allure.

Undeniably, the queen possessed a charisma that surpassed all other snakewomen.

Even someone as resolute as Landon couldn't help but be momentarily captivated upon seeing her up close.

Fortunately, Wang Teng had already seen Little Qing'er and Cang Yu, two charismatic snakewomen, and he had developed some immunity. Therefore, the queen didn't affect him as profoundly.

Chapter 1969: Azure Sea Pearl! Wang Teng Strikes! (3)

However, that strange sense of familiarity surged within him once again.

The queen of the snakemen race really looked a lot like Cang Yu!

Wang Teng couldn't help but scrutinize the queen for a moment as the thought continued to occupy his mind.

Yet, upon closer observation, the disparity between them grew obvious.

There was a huge difference between the queen of the snakemen race and Cang Yu.

For some reason, Wang Teng shook his head in disappointment

"Wang Teng, take a look. It seems like the core of this formation is that throne," Round Ball suddenly spoke up.

"I see it," Wang Teng replied silently, having already noticed it. The surface of the throne was covered in intricate runes that now shimmered faintly. The queen's hands were resting on the armrests, and tendrils of Force flowed from her hands into the throne.

On the back of the throne, there was a stone wall covered in complex runes that were similarly radiating a faint glow.

Attribute bubbles dropped from the stone wall and floated in the air.

Wang Teng released his spiritual power and picked up the attribute bubbles.

Ancient Poison Runes*80

Ancient Poison Runes*130

Ancient Poison Runes*100

Azure Posion Serpent Array*1

Ancient Poison Runes*160

...

"Huh?"

As the attribute bubbles entered Wang Teng's mind, he suddenly paused, his eyes gleaming with an unusual light.

Those attribute bubbles transformed into dark green runes, some of which were the ancient poison runes he had acquired earlier, while others were newly obtained.

Regardless of the source, Wang Teng's proficiency in Ancient Runes had once again improved.

Ancient Runes: 600/5000 (specialized)

Within a few seconds, his Ancient Runes mastery went from well-versed to specialized.

Wang Teng suddenly felt that his understanding of Ancient Runes had become much deeper. The same ancient runes, now in front of him, carried a different level of comprehension.

These runes gradually vanished, etching themselves into his mind.

Subsequently, a massive formation appeared in his mind, composed of countless complex and mysterious runes, slowly rotating and emanating potent fluctuations.

The Azure Poison Serpent Array!

This was an immensely powerful array!

Based on the insights appearing in his mind, Wang Teng knew that this Azure Poison Serpent Array was a divine-level formation.

Divine-level arrays were arrays that only divine-level rune masters could create. They were extremely powerful.

Furthermore, this array was an exceptionally rare poison-element array.

Using the Azure Poison Serpent Array to counter the poison tide was indeed an ingenious idea, effectively fighting poison with poison. The individual who laid out this formation displayed remarkable creativity.

In no time, Wang Teng successfully incorporated the insights of this formation into his mind, mastering it.

On the other side, it was evident that Landon had observed the current state of the queen. A slight smile curved his lips.

The queen couldn't move while maintaining the formation. This was his opportunity.

If not, he wouldn't be a match for this heaven-stage martial warrior.

As for the massive array, he didn't concern himself with it. To him, it was merely a tool to distract the queen.

Landon scanned the hall. Based on the bug's senses, the thing he was seeking was here.

Where could it be hidden?

But after scouring extensively, he found nothing, and his expression turned grim. he frowned.

Wang Teng, observing from behind, stroked his chin while also keeping an eye on the sky above.

The hall's dome had opened, revealing the sky's condition.

Under the relentless assault of the endless poison tide, the Azure Poison Serpent Array showed signs of crumbling. Fine cracks appeared on its surface.

The queen wore a serious expression, her eyes gleaming. She seemed to have made a decision and slammed her hands onto the armrests of her throne. The strength within her body swelled out.

She was channeling all her internal Forces into the formation to sustain it.

This was highly perilous!

Although she was a heaven-stage martial warrior, the Azure Poison Serpent Array was a divine-level array. The energy it required was enormous. If it kept absorbing Forces without restraint, the queen would be drained.

However, it was precisely because it was a divine-level array that it could withstand the terrifying poison tide. Otherwise, everyone in the city would have perished.

Landon's gaze flickered and landed on the queen. Since he couldn't find it elsewhere, the object he was looking for had to be with the queen.

However, she was currently operating the formation, so he didn't dare to make a move.

Even if he did, he might not be a match for her.

Wang Teng was surprised when he saw Landon stopping his search.

"Wang Teng, he's waiting for the queen to exhaust her Force," Round Ball said.

"Yeah," Wang Teng nodded, quickly deducing the intruder's intentions.

This fellow dared to lay his eyes on the queen. He was quite bold.

As moment passed, even after the queen had unleashed all her Forces into the array, it was still unable to withstand the overwhelming poison tide.

This particular poison tide had been persisting for an unusually long duration, and its impact was terrifying, leaving her feeling powerless.

In just over ten minutes, beads of sweat formed on the queen's forehead, and her complexion turned pale.

She was nearing her limit.

Crack...

Chapter 1970: Azure Sea Pearl! Wang Teng Strikes! (4)

Cracks continued to spread across the formation. The light shield formed by the array couldn't withstand it anymore.

The queen's face darkened as she clenched her teeth, and she unleashed another burst of energy.

This time, she didn't just release her Force. She released her bloodline power too.

A gigantic virtual image of a serpent appeared around her. It was the Primordial Oceanic Serpent.

However, this Primordial Oceanic Serpent, when compared to the one that had manifested through Little Qing'er earlier, appeared somewhat smaller and less substantial. It lacked that overwhelming sense of ancient majesty that was almost unbearable.

To Wang Teng, it appeared that this manifestation of the Primordial Oceanic Serpent was only a facade, lacking the formidable bloodline power that Little Qing'er possessed.

The Primordial Oceanic Serpent Bloodline had three abilities—Intimidate! Plunder! Enslavement!

Yet the image before them seemed to possess, at best, the power of intimidation.

The queen hadn't awakened her bloodline power completely. She had merely managed to stimulate it.

"It appears that this group of snakemen all share the Primordial Oceanic Serpent Bloodline," Wang Teng murmured to himself.

As the phantom of the Primordial Oceanic Serpent manifested, the queen channeled streams of her bloodline's power into her throne.

The intricate runes on the throne and the stone wall behind it blaze with dazzling red light.

Roar!

Roar!

Roar!

...

In an instant, thunderous roars filled the air, echoing through the heavens and earth.

Above the array in the sky, massive serpentine figures appeared abruptly. These were composed of concentrated energy, coiling in the skies to defend against the poison tides.

"This might be the ultimate form of the Azure Poison Serpent Array," Wang Teng remarked, his eyes gleaming with anticipation as he observed the intricate patterns in the sky.

With a tinge of hope in his eyes, he wished for the complete unleashing of the array's power to withstand the poison tide, allowing them to overcome this challenging situation.

After her outburst, the queen's complexion had turned deathly pale, and she appeared fragile and drained.

The array no longer required her to sustain its operation, as she had poured her entire reservoir of energy into it.

She sat upon her throne, swallowed a small pill, and closed her slender eyes to recover from her previous exertions.

Swoosh!

At the same time, Landon finally acted. He knew that he couldn't wait for the snakemen queen to recover. If not, all his efforts would be in vain.

A cold gleam of light struck towards the queen, and as the attack materialized, Landon revealed his presence and charged directly at her.

"Who is it?!" The snakemen queen's eyes snapped open, and a cold light radiated from them. She shouted, extending her hand and flicking her fingers towards the approaching intruder.

Bang!

A muffled sound reverberated within the great hall.

The cold radiance had been deflected by the queen with a single flick of her finger.

Landon staggered back over ten steps, his hand trembling slightly while gripping his spear, a look of disbelief on his face.

The queen's complexion turned slightly paler, though her face was veiled and not entirely visible. Her cold gaze fixed firmly on Landon. "Who are you? How dare you intrude into my palace?"

"Who I am is not important. Give me the Azure Sea Pearl, and I'll leave immediately!" Landon responded.

"How do you know about the Azure Sea Pearl's existence? Who are you?" The queen's eyes widened slightly as she asked with a cold tone.

"Azure Sea Pearl!" Wang Teng was stunned. He asked, "Round Ball, do you know what this Azure Sea Pearl is?"

"I don't know." Round Ball shook its head.

"As expected, the Azure Sea Pearl is with you. Give it to me!" Landon didn't want to waste any more time. He assailed the queen again, thrusting his long spear towards her.

Boom!

Grayish-white flames burst forth, forming scorching spear radiance that surged with intense heat in the somewhat chilly great hall.

"Hmph!" The queen snorted and summoned a battle sword into her hand, slashing forward.

Boom!

Their attacks collided and unleashed an explosive shockwave in all directions.

The queen let out a muffled grunt, her countenance growing slightly pale as she fell against her throne, a trickle of blood staining her lips.

"It seems you're running out of strength," Landon sneered. Stepping forward, he swiftly positioned himself in front of the queen, his long spear pointed at her throat.

Swoosh, swoosh, swoosh.

At this moment, there was a rush of wind as figures swiftly entered the grand hall. Among them was the snakeman called Zaghu.

"Your Majesty!"

The snakemen martial warriors were appalled when they saw this scene.

"Don't come over or I'll kill her," Landon uttered coldly.

"Bastard!"

"How dare you disrespect the queen!"

"Release her majesty. If not, you won't be able to depart today!"

...

The snakemen martial warriors were shocked and furious. Murderous intent seemed in their eyes as they shouted.

If it weren't for the queen being held hostage, they would have already rushed forward to kill this audacious intruder.

Wang Teng watched coldly from the sidelines and had no intention of getting involved.

He didn't know what the Azure Sea Pearl was, but the fact that Landon had gone to such lengths to acquire it meant it must have significant value.

However, getting the Azure Sea Pearl wasn't easy. He preferred to let Landon continue his efforts and wait until he secured the pearl before taking action.

In his view, getting the Azure Sea Pearl from Landon would likely be much easier than taking it from the queen.

Chapter 1971: Azure Sea Pearl! Wang Teng Strikes! (5)

"Master!"

At this moment, an anxious voice echoed from the passage on the left side of the great hall.

Wang Teng was taken aback and quickly turned to see a familiar figure rushing in from that direction.

"Little Qing'er!"

Wang Teng was flabbergasted. He could hardly believe his eyes as he stared in disbelief at the figure rushing towards them.

What on earth was happening?

Why was Little Qing'er here?

And she referred to this queen as her master?

Wasn't her master Cang Yu?

Countless questions flashed through Wang Teng's mind, and then a sudden realization struck him like a bolt of lightning. His eyes widened in surprise.

Cang Yu was Little Qing'er's master. If Little Qing'er called the queen her master, didn't that mean the queen was Cang Yu?!

But he had just carefully examined the eyes of both individuals, and they looked different!

Moreover, Cang Yu and this queen had significant differences in their demeanor and aura.

Most importantly, Wang Teng used his Real Eye to look at both Cang Yu and the queen's appearances so he knew that their faces were entirely different.

How could they be the same person?

Wang Teng was left baffled, unable to make sense of the situation. He had a hard time understanding what was happening.

Could it be that Little Qing'er acknowledged the queen as her second master?

That seemed to be the only possibility!

After all, Little Qing'er had awakened the most powerful ancestral bloodline of the snakemen race, which naturally made her highly regarded. It made sense for her to be trained by the strongest member of the race.

"Little Qing'er, don't come over!" The snakemen queen looked at Little Qing'er and calmly cautioned her.

She maintained a composed and unwavering demeanor, showing no signs of panic or being under someone's control.

"Master!" Little Qing'er looked at the snakemen queen worriedly. However, she still obediently stopped in her tracks, watching from a distance.

"Are you an extraterrestrial human?" The queen looked at Landon and asked calmly.

"That's right." Landon didn't deny it. He nodded calmly and continued, "You should know what kind of people we, extraterrestrial humans, are. Don't try to assert your queenly authority. It won't help you. Just give me the Azure Sea Pearl and I might spare you without causing any harm."

"Extraterrestrial humans? Hmph, what an extraterrestrial human!" The snakemen queen suddenly chuckled.

"Why are you laughing?" Landon frowned.

"I'm laughing at how proud you extraterrestrial humans always are," the queen remarked calmly, her smile fading.

"Enough of your nonsense. Your array won't hold much longer. Hand over the Azure Sea Pearl quickly," Landon said impatiently, detecting the queen's anger. However, he couldn't be bothered with it and frowned as he spoke impatiently.

"What's so great about the extraterrestrial humans? We know another extraterrestrial human too. He's stronger than you, and he's my friend. If you hurt my master, I will ask him to take revenge for me," Little Qing'er shouted in anger.

"You know an extraterrestrial human!" Landon frowned again. He didn't expect these snakemen to know someone outside of the Stellar Academies. This was out of his expectation.

"She's probably talking about me, isn't she?" Wang Teng, hidden in the shadows, wore a strangely bemused expression.

"I think it's you!" Round Ball giggled and said, "This little girl knows how to use her words. She is putting on an act."

"That's because she's getting desperate," Wang Teng rolled his eyes, then rubbed his chin, puzzled, "But did she just call me her friend?"

"Well, who knows, maybe she just wants to mislead that Landon," Round Ball teased.

"Tsk." Wang Teng pouted.

"That's right. My companion can defeat six heaven-stage martial warriors alone. Can you do it?" Little Qing'er glared at Landon without backing down.

"Defeat six heaven-stage martial warriors alone?" Landon was shocked. He wondered if it was a senior from the Stellar Academies.

His countenance darkened.

Damn it, how could the snakemen have such a powerful background?

Landon was particularly wary of students from the Stellar Academies, especially the older ones.

If he offended those seniors now, it would be troublesome when he returned to the academy.

"This little girl sure knows how to talk," Wang Teng chuckled.

"How does it feel to be praised in front of others?" Round Ball teased him.

"Not bad, it feels pretty good!" Wang Teng nodded with a smug expression.

Round Ball: ...

Landon's countenance turned gloomy, and he finally stated coldly, "Even if there were other extraterrestrial beings here, today, you won't stop me from taking the Azure Sea Pearl. Hand it over!"

With that, he forcefully pushed his spear forward, the sharp tip piercing the queen's fair skin on her slender neck, drawing a trickle of blood.

"You!" Little Qing'er glared at him in anger. She couldn't believe this guy was unyielding, even after she mentioned other extraterrestrial humans. She was running out of options.

"I will never pass the Azure Sea Pearl to you. Don't even think about it," the snakemen queen said calmly.

"Aren't you afraid of death?" Landon's gaze turned sharp as he glared at the snakemen queen.

"If you kill me, you won't be able to leave this place today," the snakemen queen said.

"Do you think you can stop me with just these people? What a joke." Landon snorted.
"Since you want to die, I'll fulfill your wish. Do you think I don't dare to kill you?"

The instant he finished speaking, flames spurted out from the tip of the spear.

"Hmph!" The queen's eyes flashed with an unusual glint, and she let out a cold snort. A burst of Force erupted from her, blocking Landon's attack.

Boom!

The queen was forced back, and a mouthful of blood sprayed from her mouth.

During the brief conversation with Landon earlier, she had managed to recover some of her Force. However, Landon's attack was too close for her to evade, and she had to withstand it.

The sudden eruption of Force had also caused her injury.

"You're seeking death!" Landon, seeing that the queen still had some resistance left, unleashed a fierce attack without holding back.

He had decided to kill this queen and then seek for the Azure Sea Pearl later.

He was convinced that the Azure Sea Pearl was on the queen.

If all else failed, he would trade the queen's body for the Azure Sea Pearl. He didn't believe that the snakemen would not care about the queen's corpse.

Boom!

The fiery spear glow, carrying the scorching heat of flames, pierced towards the heart of the queen.

With no way to retreat, the queen was undoubtedly facing her death!

"Your Majesty!"

The snakemen martial warriors shouted in astonishment.

The spear glow erupted at such close range so they had no time to rescue her. They could only watch as the spear intent pierced towards the queen's heart.

"Master!" Little Qing'er screamed.

Wang Teng sighed and, in the next moment, his shape flickered. He still decided to take action.

In the next moment, right beside the queen, the space slightly distorted, and a shape suddenly stepped out. He reached out with his hand and grabbed the long spear.

Boom!

Green flames erupted from the hand, ruining the gray-white flames on the spear glow.

Chapter 1972: What Physique Is This? (1)

Boom!

A green flame swept out, and a figure appeared next to the queen.

The young girl below, upon seeing this figure appear, showed a delighted expression on her pretty face and was on the verge of shouting out.

But she realized she didn't know the person's name.

She couldn't possibly call him 'daddy', right?

That would be embarrassing!

The snakemen queen squinted slightly when she saw Wang Teng's silhouette. There was a hint of surprise in her eyes.

The other snakemen were also surprised but as they saw their queen being rescued, they breathed a sigh of relief.

"It's you!"

Landon was stunned and speechless, his eyes widened in disbelief as he looked at the person who had just appeared.

He couldn't have imagined that he would encounter the one person he least wanted to see in this place.

He desperately wished this person was an imposter, but the unique green flame made him all too certain that the person before him was indeed the one he least wanted to see.

Divine flame!

Only a divine flame could destroy his Ash Flame easily.

Bastard!

Why was this fellow here?

Landon felt like he was about to have a breakdown. His scalp tingled and his head was on the verge of exploding.

No one could understand his current state of mind.

What the f**k!

"Are you surprised? Are you shocked?" Wang Teng looked at him with a smile and asked.

Landon: ...

Pleasantly surprised? More like surprised my foot!

Landon wanted to punch that smiling face when he saw it. He wanted to smash that face that he despised so much.

But he couldn't do it. He just couldn't.

This was infuriating!

"Brother Wang... Wang, why are you here?" Lan Deng forced a smile with a twitch at the corner of his mouth.

He felt like he could salvage the situation. Although Wang Teng had intervened suddenly, it didn't necessarily mean he was taking the snakemen's side.

Maybe he just thought the queen was attractive and wanted to play the hero?

"I just happened to be passing by," Wang Teng said with a grin.

"Well, what a coincidence!" Landon replied with a stiff smile.

"Our fate runs pretty deep, don't you think?" Wang Teng said with a meaningful look.

Landon: ...

What kind of fate is this? It feels more like a cursed fate.

(*^▽^*)

Little Qing'er wanted to laugh. The atmosphere was so serious, but that guy had managed to make it both funny and awkward.

"By the way, Brother Landon, what are you doing here?" Wang Teng asked, pretending to be curious.

"I'm not doing anything; I was just passing by," Landon replied with a straight face.

"Aren't you here to find the Azure Sea Pearl?" Wang Teng cut through his lie, grinning.

Landon: ...

He knew, yet he still asked!

This jerk was indeed quite devious.

At this point, he was well aware that Wang Teng had likely been in the hall the entire time and had overheard his conversation with the snakemen queen.

But Wang Teng insisted on pretending he had just happened to pass by, which was incredibly infuriating.

What drove him to the brink of madness was that he almost believed it.

"Brother Wang, since you already know, why bother asking as if you didn't?" Landon took a deep breath, wiping the smile off his face, and asked in a calm tone.

"Just wanted to confirm," Wang Teng said with a grin.

Landon found that every time he spoke with this guy, he couldn't help but feel a surge of anger for no apparent reason. Taking another deep breath, he furrowed his brow and asked, "What do you want?"

"Brother Landon, can you tell me what purpose the Azure Sea Pearl has?" Wang Teng asked.

"I can't tell you," Landon replied coldly.

"This isn't right. Given our relationship, it's heartbreaking that you won't tell me," Wang Teng said, appearing genuinely saddened.

Landon felt the corners of his lips twitching.

What kind of relationship did they have?

It was more like a blood feud.

The Parkers family had been at odds with this guy for a long time, and as a member of the Parkers family, Wang Teng was unlikely to let him go.

However, for now, they hadn't completely torn each other apart.

No!

It ought to be said that this guy was exceptionally good at putting on an act. He always had the appearance of harmlessness, yet no one realized if he would strike ruthlessly at any moment.

Even he felt pressurized when he was facing Wang Teng.

It was the pressure of encountering a formidable opponent.

His harmless facade seemed to pale in comparison to Wang Teng.

He had to admit that his acting wasn't as good as Wang Teng's.

"How about we work together to obtain the Azure Sea Pearl first, and then discuss the rest later?" Landon quickly changed the topic.

Little Qing'er's expression tensed up.

Was he also here for the Azure Sea Pearl?

The other snakemen, who were unaware of Wang Teng's identity, thought of him as another extraterrestrial human with hidden intentions, and they watched him like hawks.

Even though he had just saved the queen, perhaps it was just a case of one dog biting another. No one realized if this individual was an enemy or a friend.

They were extremely vigilant against the extraterrestrial humans.

On the other hand, the queen remained calm, giving a subtle signal to the other snakemen to wait and see how the situation unfolded.

"That idea... is not a good one," Wang Teng shook his head.

Landon remained expressionless, knowing that Wang Teng wouldn't easily agree.

"I don't even know the aim of the Azure Sea Pearl, so why would I take it?" Wang Teng asked.

"I can only tell you that the Azure Sea Pearl is of great importance," Landon replied.

"Who knows if you're trying to deceive me and use me as a tool," Wang Teng uttered with a nonchalant smile.

"In that case, please step aside. I'm taking the queen with me. Brother Wang, you shouldn't be interested in the queen, right? I've heard some people have a thing for this type, could you be one of them?" Landon gazed deeply at Wang Teng and suddenly smiled.

Chapter 1973: What Physique Is This? (2)

"Oh, you've figured it out. Look at how beautiful she is. Of course, I'll like her," Wang Teng said, surprised.

The Queen: ...

Little Qing'er: ...

The other snakemen: ...

This fellow was daring!

Wang Teng's response was somewhat unexpected for Landon. He didn't anticipate that this person would have such a thick skin, openly admitting his intentions in front of the queen.

"Since that's the case, I won't disturb you any further," Landon's expression changed a few times as he prepared to leave.

"Since you're here, why rush to leave?" Wang Teng chuckled lightly and took a step, suddenly charging towards Landon.

"You!"

Landon's face changed drastically. He didn't expect Wang Teng to be so quick to resort to violence. This guy was truly unpredictable, a capricious troublemaker.

One second, he was still smiling. The next, he might attack you.

His expression turned cold. Gray-white flames congregated around his spear as he stabbed it out.

Since Wang Teng had initiated the attack, there was nothing more to say. it was time for a battle.

During this period, he had improved his strength at the Stellar Academies. He believed that even though he might not be on par with the monster before him, he wouldn't be too far behind.

He didn't believe that Wang Teng could keep him here.

As a genius, he had his self-confidence.

Wang Teng manifested an ice-blue long spear in his hand, and a chilling aura swept out, transforming into icy spear lights.

"What is this?"

Landon's pupils constricted.

He knew that Wang Teng possessed various types of Forces, such as the five basic elements and lightning, all of which were incredibly powerful.

He didn't expect his Ice Force to be so powerful too.

The chill contained in this spear made even a fire-talented martial warrior like him feel the challenge.

What was even more unexpected was that this guy was using a spear!

Boom!

In the next moment, the two clashed in mid-air, their attacks colliding, each unleashing its formidable power.

Flames and ice raged within the grand hall.

Half fire, half ice!

Little Qing'er was forced to retreat to a corner of the hall.

The other snakemen also stepped back, their expressions filled with grave concern.

These two extraterrestrial humans were both cosmos-stage martial warriors, so why was their power so overwhelmingly strong?

Only Little Qing'er knew just how potent Wang Teng was. He could defeat even heaven-stage extraterrestrial humans. How could a cosmos-stage extraterrestrial human be his match?

Beat him up! Little Qing'er clenched her fist and shouted angrily in her heart.

In the clash of these two forces, the fire power was clearly at a disadvantage, with some of the gray-white blaze being frozen.

Bang!

As the force of their powers clashed, Landon's figure was forcibly pushed back.

"How is this possible?"

Landon's eyes displayed disbelief as he immediately retreated, evading the surging ice spear lights.

His Ash Flame, while not on the level of a divine flame, was a highly unique form of flame. Ordinary ice couldn't even withstand it, let alone freeze it.

The fact that the ice could freeze his flame meant that it had to be at least twice as powerful as his flame.

Did Wang Teng possess some special ice?

Landon's thoughts raced, and he was overwhelmed by this sudden idea.

Controlling a divine flame was one thing, but if he also controlled some special ice, he didn't know how to describe Wang Teng's monstrous abilities.

It seemed like there was nothing that Wang Teng couldn't possess.

Two completely opposing unique powers within one body - wasn't he afraid of conflicts and explosions?

What if one day he lost control, and his body exploded?

He didn't even dare to entertain such thoughts, but Wang Teng appeared to be completely unaffected.

"Let's take this outside!" Wang Teng burst through the grand hall's vault and soared into the sky outside.

Landon's gaze flickered for a moment, and he followed him outside.

Inside the grand hall, there was a core array, and he didn't dare to recklessly engage in a fight there. If the array were destroyed, the poison tide would flood in, and he wouldn't be able to escape unscathed.

"Master!" Little Qing'er hurriedly rushed to the queen's side when she saw them leaving. She held her up worriedly.

"Your Majesty!"

The other snakemen martial warriors came over too.

"I'm fine." The snakemen queen waved her hand.

"Your Majesty, who is that extraterrestrial human? Do you know him?" Zagu asked carefully.

He had completely pledged his loyalty and willingly served as a protector on the queen's side.

Most importantly, the queen was exceptionally beautiful. That was the only reason!

He had initially misunderstood the term "serving the queen." It didn't involve that kind of servitude.

Actually, at this point, he would willingly serve her if asked.

However, the queen wasn't that kind of person.

But it was true that the queen liked handsome men and didn't favor those who were unattractive, so her attendants needed to be good-looking.

This gave rise to all sorts of strange rumors.

The queen glanced at him with a regal demeanor and didn't respond to his question. Instead, she calmly said, "You all can withdraw and guard outside the grand hall."

Zagu was taken aback, realizing he had spoken too much and that the queen might be displeased with him. He quickly dropped his head.

"Your Majesty, don't you want us to stay here to protect you?" Another attendant asked, concerned.

"No need, he can handle it. You all can leave," the queen said.

"He can handle it?"

Zagu and the others were momentarily stunned but quickly understood. They naturally knew who the queen was referring to, but they were astonished by the queen's confidence in that particular outsider.

Chapter 1974: What Physique Is This? (3)

It looked like the queen was very familiar with the extraterrestrial human.

Did the two of them know each other?

Wait!

Was this the extraterrestrial human that Little Qing'er mentioned just now? The one that was able to defeat six heaven-stage martial warriors alone?

Gasp!

They exchanged glances with one another and gasped. Then, they looked at Little Qing'er.

Little Qing'er's expression confirmed their suspicions even more.

Could it be that powerful individual?

Someone who single-handedly defeated six heaven-stage martial warriors alone, what kind of being was that?

They wanted to ask.

But, looking at the queen and Little Qing'er's expressions, it seemed they didn't want to discuss it further. They naturally didn't dare to inquire further and took their leave.

In the sky, Wang Teng and Landon stood facing each other.

"Are you determined to stop me?" Landon asked with a cold expression.

"You won't get away today."

Wang Teng looked at him with a smile on his face. He immediately made his move, focusing spear lights on his long spear and thrusting them out.

Since his ice talent had reached the immortal level, he had become more and more comfortable using the power of ice, and his ice-element combat techniques flowed effortlessly without any awkwardness.

Boom!

In an instant, a universe-stage battle technique was activated, carrying immense domain power as it struck.

Ice Devil Spear!

The power of ice condensed at a point, forming a terrifying spear light.

At the tip of the spear light, there seemed to be a dazzling, ever-shifting cold brilliance, with a subtle release of domain power.

Landon's pupils constricted. Force surged out of his body, and the gray-white flames appeared to have been fueled, rapidly surging and swirling on the long spear in his hand.

"Gray Flame Dragon Spear!"

A cold shout rang out from him.

Boom!

In the next moment, the long spear thrust forward, and the gray-white flames instantly coalesced into a fearsome dragon of flame, roaring as it met the attack, bringing forth a wave of scorching intent.

The dragon-shaped attack of condensed flames also possessed domain power.

Roar!

The fire dragon roared, sweeping over and fiercely colliding with the ice spear lights ahead.

Boom!

Force explosions resounded and echoed in the sky.

At this point, the two were completely unrelenting, both determined to defeat the other.

They didn't have to worry about damaging the surroundings any more.

Hence, their attacks were naturally more ferocious and terrifying than when they were in the palace.

The power of domain erupted from the mouth of the gray-white flame dragon, rushing toward the ice spear lights.

Endless flames engulfed them, completely submerging them.

But...

In an instant, an extreme chill surged from within the ice spear lights, and domain power erupted instantly.

The ice froze the gray-white flames!

The fearsome fire dragon roared as it tried to struggle, but the flames on its body continued to freeze inch by inch.

Crackling sounds continued to echo, the sounds of freezing.

This scene was astonishing. Even the flames were frozen, making it hard to fathom the strength of the ice's chill.

All the snakemen fighting warriors, including Zagu, watched the battle in amazement, and when they witnessed this, their eyes widened in shock.

Too powerful!

These extraterrestrial humans were really powerful!

The queen was quickly restoring her Force. When she was taken captive earlier, she appeared calm and composed on the surface, but her heart was filled with anger.

She was the queen of the snake race but she was held hostage by an extraterrestrial human. This was a humiliation.

Thus, she didn't watch their battle. Instead, she sat cross-legged on the throne in the great hall and focused on restoring her Force.

Little Qing'er gazed at the sky, her eyes were filled with Wang Teng's figure. She kept expressing her amazement.

He was so strong!

Boom!

An blast rang out as the flames of Landon's dragon exploded, and the powerful attack dissipated in the sky.

Landon's face looked extremely ugly, and he was thrown tens of thousands of meters away by the residual Force, barely stopping in a very disheveled state.

"Damn it! His ice Force is only at the first level of the cosmos stage. Why is it so strong?"

Landon's gaze flickered furiously. He was flabbergasted.

He was at the third level of the cosmos stage and was a fire-element fighting warrior. However, he was completely suppressed by Wang Teng.

What he couldn't accept was that Wang Teng's ice Force was only at the first level of the cosmos stage.

Defeating the stronger opponent!

For a genius, this was undoubtedly a huge insult.

But Wang Teng didn't care about what he was thinking. He didn't give him a chance to react. He stomped the void beneath his feet and turned into a streak of ice-blue brilliance, charging towards Landon.

"You forced me into this!" Landon's pupils contracted, and he roared, "Dragon Blood Battle Physique!"

Boom!

Before he completed speaking, endless gray-white fire erupted from his body, turning into a vast sea of gray-white fire that filled the sky.

Then, at an astonishing speed, the gray-white fire retracted and wrapped around Landon's body.

Patterns of gray-white fire appeared on Landon's flesh, and an incredibly powerful aura burst forth from within him.

It was as if a terrifying beast had awakened inside him.

His body began to expand, visibly growing taller.

In an instant, he transformed into a small giant.

The fire enveloped his body, making him look like a flame giant emerging from the fire.

Roar!

Faintly, there seemed to be a dragon's roar emanating from within him.

As his body expanded and stretched, the vibrations of his blood and bones produced a sound that resembled a dragon's roar, giving it a strangely dragon-like quality.

Chapter 1975: What Physique Is This? (4)

"Sigh!"

At this moment, Landon's eyes were crimson, but within his pupils, there seemed to be a mass of gray-white flames burning. The gray-white flame patterns at the center of his eyebrows also appeared to ignite, forming a true flame. When he opened his mouth, a burst of scorching heat emanated.

Even the space before him twisted.

Wang Teng's eyes flickered with surprise, but he didn't show any signs of backing down. In the next moment, he appeared instantly in front of Landon and thrust his spear at him.

"Roar!"

Landon roared angrily at Wang Teng, but instead of using his spear, he retracted it. He then launched a powerful punch.

Boom!

The fist imprint exploded and slammed into Wang Teng's spear.

The spear's icy force and freezing energy shattered instantly, sending countless shards of ice scattering in all directions.

"Interesting!" Wang Teng's eyes sparkled with excitement.

He hadn't expected that Landon's transformation would bring about such a dramatic change in his strength. His physical power alone had become incredibly formidable.

Swoosh!

Suddenly, Landon transformed into a blur, moving at an incredible speed. He appeared above Wang Teng's head in an instant and unleashed another punch towards him.

The gray-white flames coalesced into a fist imprint, pressing down.

"Hmph!" Wang Teng snorted. He was thinking too much if he wanted to suppress him. He retracted his ice-blue spear and then threw a punch towards the sky.

Five-element fist!

Boom!

The fist imprints exploded as they collided with each other.

Wang Teng was pushed back several hundred meters, showing a hint of surprise on his face.

"You managed to push me back!"

"Die!" Landon, seeing that his attack had an effect, became even more violent. He shouted at Wang Teng and punched him with murderous intent.

Below, Little Qing'er clenched her fists nervously.

Why are you shouting so loudly? Do you think transforming is impressive? I can do it too. Let me show you what a true dragon physique is! Wang Teng rolled his eyes angrily and shouted in his heart. True Dragon Battle Physique!

Boom!

A peculiar force spread throughout his body, and the Emerald Glazed Flame instantly engulfed him, manifesting the power of the battle form.

Green flames filled the sky, completely enveloping Wang Teng, concealing what was happening inside from view.

Landon's fist imprint fiercely struck the flames but was like a stone sinking into the sea, swallowed without a sound.

Landon's pupils constricted. He looked at the green fire fearfully.

After a while, the green flames slowly parted, revealing a figure that made Landon's pupils shrink to the size of pinpricks.

Inside the flames, Wang Teng's figure slowly emerged. At some point, he had developed a layer of dragon scales composed of green flames.

The lifelike jade-green dragon scales resembled true dragon scales.

They covered his body, but Wang Teng hadn't undergone a massive transformation like Landon or emitted scorching heat.

Wang Teng appeared to have contained everything within him.

Yet, a subtle, indomitable dragon aura emanated from him.

Landon's expression shifted slightly as he felt a suppression originating from Wang Teng's bloodline. His Dragon Blood Battle Physique started to grow restless under the aura emanating from Wang Teng's unique physique.

What kind of physique is this? Landon was flabbergasted. His eyes continuously flickered with disbelief.

"Come on, let's have some fun now," Wang Teng beckoned to Landon, extending his hand and curling his finger.

"Roar!"

Landon's transformed state made him easily irritable. Upon seeing Wang Teng's gesture, he erupted in anger and roared. His anger overcame his sense of awe, and he continued charging toward Wang Teng.

Boom!

Wang Teng sneered and vanished from his original position. His speed was astonishing, and as he moved, he created sonic booms in the air.

In the next moment, the two clashed in mid-air, without wielding weapons. Instead, they engaged in a physical brawl, throwing punches at each other.

Boom, boom, boom...

Wang Teng executed his five-element fist with the help of his powerful physical body. The Forces of the five elements exploded and turned into fist imprints that slammed onto Landon's body.

Landon initially managed to defend himself, but he quickly found himself at a disadvantage. The fist imprints shattered his defenses, and the flames covering his body couldn't withstand the overwhelming power of Wang Teng's fists.

Bang, bang, bang...

A muffled sound echoed as Landon's body in mid-air seemed to turn into a punching bag, constantly deforming under Wang Teng's relentless blows.

Little Qing'er, observing from below, was left in awe, her wide eyes staring in astonishment.

"So... violent!"

She was shocked as this was her first time witnessing such a brutally straightforward mode of attack.

When Wang Teng fought with the other heaven-stage martial warriors, he was like a real formidable warrior. He defeated all his opponents with his unparalleled power of domain.

However, at this moment, he seemed like a different person entirely, displaying overwhelming violence in a way that left his opponent helpless.

For a young girl, such a scene would typically not attract her attention, but as she watched Wang Teng relentlessly pounding his adversary, she inexplicably felt her adrenaline surging. She clenched her fists unconsciously, swinging them a couple of times.

Then, she suddenly realized she had gotten carried away and stuck her tongue out in embarrassment. Glancing around, she was relieved that no one had seen her.

She certainly didn't want to be labeled as a violent enthusiast.

Meanwhile, Zagu and the other snakemen were drenched in cold sweat as they watched, their foreheads pounding with anxiety. They knew they were lucky they hadn't provoked these extraterrestrial humans, or else they might not withstand a single punch from them.

Roar!

In the sky, Landon roared in anger, resembling a wounded beast, continuously howling but ultimately impotent.

He couldn't withstand Wang Teng's relentless assault. Every attempt to counterattack was suppressed by Wang Teng's offensive onslaught, leaving him powerless. Then, more punches would land on him.

Gradually, Landon lost his ability to resist. The fiery patterns on his body, formed from the flames, gradually dissipated, no longer able to sustain his use of the Dragon Blood Battle Physique.

Boom!

Wang Teng, deeming it enough, delivered a punch to Landon's face, sending his physique hurtling through the air.

Immediately after, Wang Teng dashed forward and appeared above Landon, delivering a powerful stomp.

Bang!

Landon's body contorted, and he spat blood, crashing down towards the ground like an arrow released from a bow.

Boom!

Almost instantly, his physique hit the ground in Rui Snake City, creating a massive crater that shattered the stone-paved surface, leaving a spider web of cracks surrounding the impact.

A cloud of dust rose into the air.

Wang Teng gradually descended to the ground and approached the deep pit that had formed.

Landon struggled to his feet, coughing up blood continuously. His physique was covered in injuries and he stared at Wang Teng in astonishment. He couldn't comprehend what he was seeing, particularly the blue serpent scales covering Wang Teng's body.

"What kind of physique is this? Why are you so strong?"

Landon's voice came out hoarse, filled with an incredulous sense of bewilderment.

He couldn't fathom why this guy had always had such inexplicable means at his disposal.

If Wang Teng had been superior in some other aspect, he could have accepted it.

But to lose in the very domain that he took the most pride in, the Dragon Blood Battle Physique, was something he couldn't accept.

The Dragon Blood Battle Physique was the most powerful physique in the Parkers family. His Dragon Blood Battle Physique had also reached the fourth rank, far surpassing most of the talents in the family.

Even Strachey, who participated in the League Of Talents with him, couldn't be compared to him.

It could be stated that, at this moment, Wang Teng had completely crushed his proudest accomplishment and even trampled on it without mercy.

- Chapter 1976: They Type That He Should Never Offend! (1)

Chapter 1976: They Type That He Should Never Offend! (1)

A massive crater was left in the ground as Landon climbed out of it, looking disheveled, his gaze locked onto Wang Teng approaching from a distance.

He couldn't accept this outcome.

His fourth-rank Dragon Blood Battle Physique lost to an unknown physique. What a joke.

So he was eager to understand what kind of physique Wang Teng was currently using.

The draconic aura, and the blue dragon scales on Wang Teng's body, all indicated a strong connection to dragons, similar to their Parkers family's Dragon Blood Battle Physique.

Did Wang Teng indeed possess a physique related to dragons, similar to their family's Dragon Blood Battle Physique?

During the League Of Talents, he had sensed that Wang Teng had a physique strikingly similar to their own.

From the looks of it, his physique was stronger than their family's one!

Little did Landon know that at the time, Wang Teng's physique hadn't yet undergone its transformation and still consisted of the Dragon Blood Battle Physique. It wasn't just similar. It was the same.

But now, the Dragon Blood Battle Physique had transformed into the True Dragon Battle Physique (fake). It had already transcended and was many times stronger than the Dragon Blood Battle Physique.

"Will you believe me if I say that this is your Parkers family's Dragon Blood Battle Physique?" Wang Teng said with a smirk.

Landon was stunned for a moment. Then, he shook his head and said, "Impossible!"

"Our Dragon Blood Battle Physique could never be like this!"

"Who said it's impossible? You've only bathed in dragon blood and had the luck of the draw to obtain this physique. How much do you truly understand about it?" Wang Teng shot back, his voice filled with disdain.

Landon felt dumbfounded and was on the verge of cursing.

What did Wang Teng mean by 'luck of the draw'?

What did he mean by 'how much do you understand about it'?

Their family had spent countless ages researching and understanding the Dragon Blood Battle Physique. How could they not understand it?

Also, even if they missed something in their research of the Dragon Blood Battle Physique, could an outsider like Wang Teng possibly know more about it than they did?

This was ridiculous!

This bastard was definitely trying to deceive him!

He was tricking him!

Landon was convinced that Wang Teng couldn't possibly know more than he did.

"Don't look at me as if you don't believe me. Let me tell you secretly, my physique is the advanced version of the Dragon Blood Battle Physique. It's really impressive and powerful!" Wang Teng said mysteriously.

Landon: ...

To hell with being powerful!

To hell with being impressive!

He didn't know what to say anymore.

He couldn't believe a word Wang Teng was saying.

He knew their family's physique inside out, and there was no way this transformation could be part of it.

"Really, believe me. Anything is possible. You just haven't executed the Dragon Blood Battle Physique to its maximum potential." Wang Teng assured, continuing to spout nonsense.

Lan Deng retorted, "Then tell me, how can we bring the Dragon Blood Battle Physique to its full potential?"

"That won't work. I can't just tell you such crucial information for free. You'll have to exchange it with something of equal value," Wang Teng replied.

Landon was taken aback. Initially, he didn't trust Wang Teng at all. But when he heard this response, he started to consider it.

No one would trust in unconditional benefits.

However, when there were certain conditions, it could be easier to gain someone's trust.

Especially if they considered themselves clever.

"What information do you want to know?" Landon asked, his eyes flickering.

"Tell me the function of the Azure Sea Pearl and I will reveal the secret of the Dragon Blood Battle Physique's transformation," Wang Teng said.

"How do I know if what you're saying is true?" Landon retorted.

"It depends on whether you're lying to me," Wang Teng chuckled.

"Alright, I'll tell you," Landon said, giving Wang Teng a deep look. He nodded and added, "But we have to say it simultaneously."

"Agreed!" Wang Teng nodded.

"The Azure Sea Pearl can control serpent-type star beasts. It's very useful to me," Landon said.

"Absorb various dragon bloodline powers, causing your constitution to transform, and naturally, the Dragon Blood Battle Physique will become more powerful," Wang Teng explained.

Both of them spoke almost simultaneously.

However, Landon's expression changed suddenly. "You're playing me. We've tried this method before, and dragon bloodline power can't make the Dragon Blood Battle Physique transform," he exclaimed.

"Ah, you've tried it before? That's too bad!" Wang Teng replied with a hint of regret.

He still wanted to fool the other party!

He didn't expect to be exposed the moment he opened his mouth.

As for the effects of absorbing dragon bloodline powers, it was unclear what might happen.

Transforming a constitution was not an easy feat.

"But you haven't told the verity either. The Azure Sea Pearl can control the serpent-type star beasts? If it's such a simple function, why would you go to great lengths to come here?" Wang Teng stated as his expression turned cold, staring intently at Lan Deng.

Lan Deng sneered in response, saying, "Tit for tat!"

Wang Teng sighed, "Well, I didn't want to resort to unconventional methods. Okay, let's make it simple. Now, are you going to admit defeat on your own, or should I help you admit it?"

Landon felt the muscles on his face twitching when he saw the Lightning Slap in Wang Teng's hand.

He was very familiar with this thing.

Many talents suffered from it during the League Of Talents.

Even the female martial warriors who were called goddesses weren't spared.

Such humiliation was intolerable for any genius, especially when it occurred in front of a crowd.

Chapter 1977: They Type That He Should Never Offend! (2)

Back then, he made a timely concession to avoid suffering such humiliation in public

But now, he found himself facing the same situation.

Landon's gaze flickered.

Should he give it a try?

He couldn't bear the thought of admitting defeat so easily.

He had always believed that he was not inferior to anyone.

He had stood behind Strachey before, biding his time, and now that he had entered the Stellar Academy, he continued to bide his time, all for the sake of obtaining that unique divine flame.

He believed that as long as he obtained that divine flame, he could surpass the person in front of him.

However, things weren't going as planned.

He hadn't even acquired the divine flame yet, and he was already dealing with a setback just to meet the prerequisites for obtaining it.

If he couldn't obtain the Azure Sea Pearl, capturing that divine flame would remain a pipe dream.

He refused!

He refused to give in!

He had invested so much and endured for so long to obtain that divine flame.

How could he just bestow up now?

Landon's head dipped slightly, and then he suddenly raised it. His eyes underwent a peculiar transformation, resembling the eyes of a dragon, exuding an icy and majestic aura.

"Hmm?" Wang Teng's gaze immediately sharpened.

Boom!

In the next moment, the gray-white flames seemed to be ignited by some unknown power, erupting once again from his body.

Wang Teng resided within these flames, surrounded by his blue flames, displaying no fear.

He didn't try to stop Landon's transformation.

This change reminded him of Strachey's semi-dragon state. Landon, being a talented member of the Parax family, probably owned the same ability.

The semi-dragon state allowed him to drop more useful attribute bubbles, so if his opponent was willing to transform, Wang Teng would eventually harvest more rewards.

Sometimes you have to take advantage of any opportunity that comes your way!

He was confident that he could defeat his opponent, even if he was in his semi-dragon state, so he wasn't afraid.

Suddenly, the gray-white flames rapidly retreated, disappearing entirely back into Landon's body.

"Ah!"

Landon roared towards the sky, veins popping out on his forehead. Waves of scorching hot energy radiated from his head.

Boom!

A terrifying wave of power detonate forth from his body.

This fluctuation was many times stronger than Strachey's semi-dragon state.

Simultaneously, Landon's body began to undergo a strange transformation. His body rapidly expanded, muscles bulging, and his tattered clothing detonate apart, revealing a series of scale-like armor on his body, glowing like flames.

His hands morphed into claw-like appendages resembling dragon's claws.

He even sprouted two peculiar dragon horns from his forehead.

His teeth became razor-sharp, like a row of serrated blades. When he opened his mouth, a searing hot breath escaped.

The alteration he was undergoing at this moment was undoubtedly much more terrifying than when he activated the Dragon Blood Battle Physique.

Even his aura had become quite formidable, resembling that of a genuine... wait, no, it seemed to be transforming him into a half-dragon!

To Wang Teng, this appearance seemed to be somewhat lacking compared to the Solar Dragon Race's transformation.

The Solar Dragon Race's members would turn into full-fledged solar dragons, foregoing their human appearance. Under such circumstances, their unleashed power was not to be underestimated.

However, the Solar Dragon Race wasn't a real dragon. There was a difference between them.

Thus, between the Parkers family's Dragon Blood Battle Physique and the Solar Dragon Physique, it was hard to tell which was stronger and weaker.

What was clear, though, was that Wang Teng's True Dragon Battle Physique (pseudo) was undoubtedly more potent than both of their physiques.

Despite the "pseudo" label.

"Roar!" Landon's alteration was complete, and he let out a furious roar, sending scorching waves of air sweeping towards Wang Teng.

"Well, that's ugly!" Wang Teng wrinkled his nose and waved his hand in disgust.

This half-dragon alteration was far more grotesque compared to his True Dragon Battle Physique (pseudo). He found it quite unsightly.

To think Landon treated it as his trump card, using it only when he had no other choice.

Wang Teng couldn't be bothered to use such a form, even in dire situations.

"Wang Teng!" Lan Deng roared, glaring fiercely at Wang Teng, then stomped his foot.

Boom!

The ground shattered asunder, creating a deeper pit than before. The surrounding rubble was sent flying into the sky by the unseen force.

Landon's transformed form resembled a streak of gray and white, rising from the pit and arching through the air. His body radiated scorching heat.

The air around them started distorting due to the high temperature.

In the next moment, Landon descended from above, plummeting towards Wang Teng. He extended his clawed hand, aiming to slash at Wang Teng as if he wanted to tear him apart.

"Hmph!"

Wang Teng coldly snorted and extended a finger, directing the gathering of his Fire Force.

Fire Silk Finger!

A detonate of flames shot out from his fingertip.

Bang!

The pillar of fire struck fiercely against Landon's claw, producing a heavy thud.

"Get lost!" Landon coldly roared and, with the power of fire on his claw, shattered the pillar of fire in an instant.

However...

Just as the pillar of fire crumbled, a fire silkworm shot out from within, darting towards Landon's claw.

"What?!"

Landon was slightly startled, but he quickly sneered, reaching out his hand and gathering flames that formed into a gigantic flame hand.

Boom!

The moment the flame hand took shape, the fire silkworm reached it and collided violently, producing an intense explosion.

Chapter 1978: They Type That He Should Never Offend! (3)

The flames billowed out in all directions.

The fire silkworm, despite its small size, caused the flames to explode upon impact, creating a large hole in the fiery hand. It continued its relentless charge towards Landon.

Landon's pupils suddenly contracted as he had no time to react. He could only watch as the fire silkworm pierced through the gaping hole in his palm.

Splat!

In an instant, the fire silkworm passed through the palm of his hand, causing blood to flow freely.

"Roar!" Landon howled in pain.

He withdrew furiously with an ugly expression. His injured arm kept trembling, and a large amount of blood flowed down.

However, the flesh on his wound was squirming. It was healing quickly.

"Come again!" Wang Teng shouted. He charged forward and punched his fist out.

Landon roared in anger. He didn't back down and charged forward. His physique had gotten stronger after his semi-dragon state. He wasn't willing to admit defeat just now and wanted to fight with Wang Teng again.

Boom! Boom! Boom!

The two of them continued to exchange blows, moving from the ground back into the sky, their fist imprints colliding violently and producing terrifying explosions.

They appeared as if they had transformed into two gigantic fireballs. One was wrapped in gray-white flames, while the other was surrounded by green flames. They kept clashing, separating, and then clashing again.

"Is that extraterrestrial human not dead yet?"

"He's back on his feet."

So powerful!"He's so powerful!"

"Why does he look like... a dragon?"

"Is this the power of an extraterrestrial human? It's truly incredible!"

The snakemen martial warriors were filled with amazement as they watched the battle in the sky, their faces showing a mix of astonishment.

Zagu felt parched. He had always considered himself a genius among the snakemen, confident in his cosmos-stage strength that allowed him to battle with universe-stage martial warriors. But now, observing the battle between Wang Teng and Landon, he couldn't help but feel a sense of defeat.

There was just no comparison!

The difference was truly immense!

How do they cultivate to become so strong? Why was the difference so huge?

Little Qing'er looked at the battle in the sky and was deeply moved. Her eyes trembled slightly.

At this moment, the queen opened her eyes and gently moved her serpentine tail to stand beside Little Qing'er. She placed her hand on her head.

"Master!" Little Qing'er exclaimed in surprise. "Are you alright?"

"I've recovered a bit," the Queen replied. She then asked, "Do you have any insights after watching their battle?"

"Master, they are both incredibly strong!" Little Qing'er exclaimed.

"This is the strength of the extraterrestrial humans. All the extraterrestrial humans I have encountered possess remarkable abilities," the snakemen queen said. She looked up at the sky and continued, "However, that person's ability seems to have exceeded the other extraterrestrial humans."

"Surpassing the other extraterrestrial humans? Are you referring to him?" Little Qing'er was astonished.

"Yes, among those extraterrestrial humans, he can be considered a genius among geniuses," the Queen confirmed.

"He's... that powerful?" Little Qing'er was shocked, finding it hard to believe the extent of Wang Teng's strength.

She knew that Wang Teng was powerful but she didn't expect him to be so powerful in her master's eyes.

"You'll find out soon. The other extraterrestrial human is absolutely no match for him. Although I don't know why he hasn't used his full power yet, winning is only a matter of time," the Queen said calmly.

"Yes." Little Qing'er nodded. If he could defeat heaven-stage martial warriors, the cosmos-stage extraterrestrial humans wouldn't be his match either.

But...

For some reason, for the first time, felt a desire to explore the outside world. She wanted to see what was beyond.

The Queen cast a glance at Little Qing'er's eyes and felt a slight stir in her heart, but she chose not to say more and continued to observe the battle in the sky with her disciple.

...

Boom!

In the sky, after exchanging punches, both of them retreated.

Landon was panting, his gaze focused on Wang Teng with bloodshot eyes.

Why!

Why, even after using the dragon's blood, undergoing a semi-dragon transformation, and greatly enhancing his physical strength, was he still unable to defeat this person?

Was Wang Teng's physique really this strong?

"Your fists are pretty tough, and your transformation has some use, but... it's still not enough!" Wang Teng said, smiling at Landon.

Ancient God's Body!

Activate!

In an instant, a series of thunderous sounds erupted from Wang Teng's body. His blood flowed like mercury, and his heart beat violently.

An occult golden pattern appeared on his forehead.

Boom!

A more powerful aura erupted from his body.

Wang Teng had already activated the True Dragon Battle Physique (pseudo). With the addition of the Ancient God's Body, Wang Teng became extremely terrifying.

Even if he stood there calmly, he seemed like an awakened universe behemoth. The aura he emitted was suffocating.

Landon, initially consumed by anger upon hearing Wang Teng's words, was now taken aback. He saw the overwhelming aura erupting from Wang Teng's body, and his irises constricted as if he had witnessed something unbelievable.

Could Wang Teng's physique still become stronger?

What monster was this?

The instant Wang Teng activated his Ancient God's Body, he explosively surged forward, leaving a trail in the sky. Without giving Landon time to react, he unleashed a powerful punch.

At this point, Landon had no choice but to face it.

"Roar!"

A roar erupted from his mouth, and his body turned into a blur as he met Wang Teng's attack head-on.

Chapter 1979: They Type That He Should Never Offend! (4)

Boom! Boom! Boom!

The two of them struck once again.

Landon released all the power of his domain. The fourth-rank fire domain was condensed within his fists. With a terrifying impact, he smashed the space as he attacked.

Every punch was a domain.

However, Wang Teng's Flaming Domain had just reached the sixth rank, two levels higher than Landon's.

This was a complete domination!

Every punch Wang Teng threw contained the power of the domain, and it was enough to crush Landon.

Faced with Wang Teng's attacks, Landon quickly found himself unable to defend. His fist imprint shattered, and Wang Teng's attacks struck him forcefully.

Boom!

Landon was sent flying, his dragon scales exploding into a spray of blood and leaving him in agonizing pain.

"Impossible!"

His eyes were bloodshot, unable to accept the fact that, even after activating his semi-dragon transformation, he was still crushed by Wang Teng.

How was that possible?

"How is it impossible? You're just too weak," Wang Teng's calm voice echoed, and he suddenly appeared at Landon's side, delivering a sweeping kick.

Boom!

Landon's expression changed dramatically, and hastily, he raised his fists, crossing them in front of his chest. However, the immense force caused the dragon scales on his hands to explode, and there was even a faint sound of bones cracking.

At the same time, his body flew out uncontrollably. Blood spurted out of his mouth.

"You're too weak!"

Wang Teng's voice was heard again. This time, it was behind him.

Landon quickly turned around and threw a punch without thinking, but the fist hit only a lingering shadow.

"Your speed is too slow!" Wang Teng's voice still came from behind him.

Landon only felt a gust of wind hitting him. The back of his head hurt badly, accompanied by numbness and bursts of lightning, causing his vision to go black.

"So, after all this time, you haven't made any progress?"

Wang Teng's voice remained calm as if he were chatting with a friend, but the words he spoke infuriated Landon to the point of wanting to spit blood.

Despite his significant speed increase in his semi-dragon form, he still couldn't keep up with Wang Teng's movements.

He frantically attacked in all directions, wanting to force Wang Teng out of hiding.

But, it was useless.

The more flustered he was, the less chance he had of keeping up with Wang Teng's movements.

Bang!

Landon's head took another heavy hit to the back, followed by a series of thunderous bangs, making his already confused mind even more chaotic.

"Weak, so weak!

"Why are you so weak!"

"You're not my match!"

Wang Teng's voice kept coming, driving Lan Deng into madness.

"Wang! Teng!"

Landon looked up to the sky and howled madly. He was on the brink of insanity and his eyes were filled with bloodshot veins.

(っД°;)っ

Little Qing'er gave a frightened expression when she saw this scene.

What she had thought was just an act of violence from Wang Teng now seemed incredibly brutal.

Is this guy that fierce?

Even the queen of the snakemen race felt the corners of her lips twitching. She couldn't bear to look at them.

As for Zagu and the other snakemen martial warriors, their understanding of Wang Teng's brutality had deepened significantly. In their hearts, Wang Teng had been categorized as "never to be messed with."

This extraterrestrial human was much more terrifying than the other extraterrestrial humans!

In the sky, the battle had reached its final moments. No matter how Landon struggled, he couldn't escape from Wang Teng's grasp. His dragon scales had been completely shattered, even breaking one of the horns on his forehead, leaving him looking quite miserable.

However, his head had several new prominent bumps, making up for the lost horn.

Boom!

Landon's body fell limply to the ground, completely devoid of resistance. His body slowly reverted to its original appearance, but he continued to be twitching involuntarily. However, he hadn't lost consciousness. He stared up at the sky, his face expressing one thought—

Doubting his life!

Little Qing'er and the queen of the snakemen stared with wide eyes at Landon, who had suddenly dropped in front of them. Both their faces displayed a sense of bewilderment, with slightly open, rosy lips.

What was going on?

Was it just a coincidence?

He came back the same way he went out.

Most importantly, he looked pretty miserable. The way his eyes appeared vacant, he seemed to have experienced some kind of mental breakdown.

Martial warriors weren't afraid of failure.

But, if his mentality was shattered, it would be hard for him to continue on the martial arts path in the future.

Thud!

At this moment, Wang Teng dropped from the sky, landing gently in the hall. He surveyed the situation inside and wore a somewhat awkward expression.

"Uh, sorry, it was purely accidental!"

Little Qing'er and the queen of the snakemen race stared at his face without blinking. It was hard to tell that he didn't do it on purpose.

"I'll handle this for now."

Seeing that the two were ignoring him, Wang Teng smiled awkwardly and walked over to Landon. He looked down at him, shook his head, and sighed.

"You know, you didn't have to struggle like this."

"Whether you endeavored or not, it would have been the same. You're just too weak."

"Look at yourself now, it breaks my heart."

"I honestly didn't want this to happen. We're friends, and if I hadn't lost control, I wouldn't have beaten you like this."

...

Landon: ...

His facial muscles twitched uncontrollably, and for the first time, there was a hint of change in his lifeless gaze as he stared at Wang Teng.

Little Qing'er: ...

The Queen: ...

Chapter 1980: They Type That He Should Never Offend! (5)

This guy is just shameless!

He beat someone like this and he's still talking like that.

Can't you have some dignity?

"Even if we're not friends, there's no need for it to get this far. If you had told me about the Azure Sea Pearl information earlier, I definitely wouldn't have beaten you..."

Wang Teng kept rambling on.

Little Qing'er and the queen of the snakemen race couldn't stand it anymore.

"Cough~"

The queen cleared her throat.

"Is your throat bothering you, Your Majesty?" Wang Teng turned and asked upon hearing the sound.

Little Qing'er's expression turned strange.

The queen remained silent for a moment and then said coldly, "No."

"Do you have any other concerns?" Wang Teng inquired.

"The array is on the verge of collapsing," the queen looked towards the sky and calmly stated.

Her tone was as if she was discussing a matter of little importance.

The sky was falling but it didn't matter.

The corners of Wang Teng's eyes twitched. He looked up at the sky.

Then...

Boom!

An explosion was heard.

In an instant, the entire Rui Snake City seemed to be trembling, even the palace they were in began to shake.

The array... was broken!

The Azure Poison Serpent Array, which had held on for so long, finally couldn't withstand the pressure.

Wang Teng turned his head towards the queen, his face filled with bitterness.

She said it was on the verge of collapsing.

It had already collapsed!

At a time like this, the queen still had the heart to tease him. Her character was rather evil.

Wang Teng was frustrated.

But he didn't have time to think about it.

At this moment, a massive gap appeared in the array in the northern part of Rui Snake City.

Instantly, countless poisonous creatures poured out of the gap. A dark green mist filled the air, like torrents of dark green rushing in, terrifying beyond belief.

"Oh no!"

"The array is broken!"

The martial warriors in the Rui Snake City were in a state of shock. Their faces turned pale, and they began to panic, shouting in terror.

Many ordinary snakemen who had not yet reached the shelters were immediately overwhelmed by the surging poisonous creatures, emitting screams of agony.

The snakemen martial warriors fought desperately, launching various energy attacks, but faced with the overwhelming number of poisonous creatures, they quickly found themselves in dire straits.

"Your Majesty!"

A figure sped from a distance and appeared above the palace. It was Marong, the heaven-stage martial warrior.

"How many people haven't entered the Thousand-Serpent Cave yet?" The queen inquired in a serious tone.

"About one-third of the people are still outside," Marong replied with a pained expression.

The snakemen queen's expression changed. She said to Zagu and the other guards, "Go and block the poison tide to allow the others to enter the Thousand-Serpent Cave as soon as possible."

"But..." Zagu and the others wanted to say something.

Their duty was to protect the queen, and there was still an extremely dangerous individual here. Even though they were not a match for Wang Teng, leaving like this seemed inappropriate.

"Go!" The snakemen queen said coldly.

"Yes!" Zagu and the others replied hurriedly.

Figures sped out of the palace, heading towards the poisonous star beasts outside.

At the same time, more snakemen martial warriors from within the city charged out to engage and eliminate various poisonous star beasts.

Fortunately, the snakemen were accustomed to living on the Scorpion King Star, a planet filled with poison, making them well-versed in dealing with various poisons.

Moreover, the breach in the city was not too large, and most of the invading creatures were below the emperor level in strength.

With their combined efforts, they could barely manage to handle the situation.

Wang Teng furrowed his brow, his expression turning increasingly grave as he walked towards the throne within the palace.

Little Qing'er and the queen were standing beside the throne.

"Little Qing'er, I need to borrow the power of your bloodline," the snakemen queen suddenly said.

"Master, what should I do?" Little Qing'er nodded sternly and asked.

"Place your hand on the throne and activate your bloodline power," the queen instructed.

Little Qing'er nodded. She promptly extended her hand, placing it on the armrest of the throne.

Boom!

A terrifying phantom of the Primordial Oceanic Serpent emerged, instantly surging to thousands of feet in height, exuding a dreadful aura.

Among the invading creatures, many were of the serpent variety. In response to this phantom's appearance, all the snake-like star beasts cowered in fear, no longer assailing the people.

Even other types of poisonous creatures momentarily halted, their eyes filled with dread.

"That is..."

Many snakemen were astounded. They gazed at the colossal serpent phantom that had abruptly risen from the palace.

"That's our ancestral serpent!"

"It's our ancestor!"

Soon, someone recognized the Primordial Oceanic Serpent, and they shouted in astonishment.

"Her Majesty must have taken action. Everyone, give it your all, and we can certainly hold off the poison tide!" Marong's eyes gleamed, and he shouted.

The snakemen were instantly filled with a strong fighting spirit and sped towards the surrounding poisonous star beasts.

The shattered formation had left them feeling despair, but the appearance of the Primordial Oceanic Serpent gave them a glimmer of hope.

Inside the palace, as Little Qing'er released her bloodline power, the runes on the throne and the symbols on the stone wall behind it once again lit up, sending a beam of light shooting into the sky, merging with the array.

The broken array gradually showed signs of healing and resealing.

Upon witnessing this, Wang Teng couldn't help but stop in his tracks, his eyes showing a hint of surprise.

Chapter 1981: Don't Be Afraid! (1)

Wang Teng initially considered taking action, as he possessed the Primordial Oceanic Serpent Bloodline and even had Poison Force, making it quite effortless for him to operate the Azure Poison Serpent Array.

He might even be able to last longer than the queen.

After all, just like Little Qing'er, his Primordial Oceanic Serpent Bloodline bloodline was fully awakened.

Granted, his level of awakening seemed to be not as profound as Little Qing'er's since he inherited the bloodline from her.

Nevertheless, it didn't matter much. With Little Qing'er unleashing her bloodline power and the attribute bubbles descending at this moment...

Wang Teng's eyes lit up, and he immediately started collecting them.

Primordial Oceanic Serpent Bloodline*150

Primordial Oceanic Serpent Bloodline*200

Primordial Consciousness*1000

...

Wang Teng's eyes gleamed as he realized that he had only obtained a total of 350 points of the Primordial Oceanic Serpent Bloodline this time, which was far less than last time, leaving him somewhat disappointed.

Primordial Oceanic Serpent Bloodline: 2150/10000 (first rank)

However, Wang Teng also knew that the situation this time was different from the last time. Last time, Little Qing'er's bloodline had just awakened and burst out in an instant, naturally causing more attributes to drop.

But this time, it was just being stimulated, and the bloodline had already stabilized, so it was naturally impossible to drop as many properties as last time.

Wang Teng was content. At least there was an improvement. Even a small gain is still a gain.

What surprised him, though, was that he once again acquired the Primordial Consciousness attribute.

This Primordial Consciousness was quite useful. He used this attribute when facing those six heaven-stage martial warriors.

When combined with Bloodlust, it became even more useful.

Even the auras released by the six heaven-stage martial warriors couldn't do anything to him.

Primordial Consciousness: 3700/10000 (first rank)

This time, he received 1,000 points of Primordial Consciousness. The Primordial Consciousness attribute reached 3,700 points. Wang Teng felt that his understanding of the Primordial Conscious had deepened, and the profound sense of vastness in his mind had become even more mysterious.

A strange radiance flickered in his eyes as if containing boundless vastness, like a true ancient being.

Soon, he returned to his normal state, and that peculiar feeling seemed to have never existed.

Wang Teng was a bit disappointed that this time he didn't acquire the three immortal level talents attributes.

Then, he looked in Little Qing'er's direction. He had initially been prepared to take action, but since Little Qing'er and the others had already acted, he had some idle time and decided to take stock of his recent gains.

During the previous battle, Wang Teng had already gathered all the attribute bubbles that had dropped from Landon.

Constellation Force (Fire)*8500

Divine level Fire Talent*1000

Cosmos Realm Spirit*3600

Universe Realm Enlightenment*3200

Ash Flame*1300

Dragon Blood Battle Physique (fourth-rank)*11500

Dragon's blood*1

...

Hmm, this is quite a good haul! Wang Teng's eyes brightened. He had not paid much attention earlier but upon closer inspection, he realized that the attribute bubbles dropped by the other party this time were unexpectedly good.

Constellation Fire Force: 41500/50000 (cosmos stage fifth level)

8,500 points of constellation Fire Force. This wasn't a small amount. It allowed Wang Teng's properties to rise to 41,500 points. Very soon, he would break through the fifth level of the cosmos stage.

Divine Level Fire Talent: 12400/50000

His divine level fire talent increased by 1,000 points. Landon's fire talent wasn't weak. He had the fourth-rank Dragon Blood Battle Physique as well as the divine-level fire talent.

Spirit: 46200/200000 (cosmos realm)

Enlightenment: 194200/300000 (universe realm)

Next were the cosmos realm spirit and universe realm Enlightenment attributes. They couldn't be compared to the six heaven-stage martial warriors but it was still a sizable gain.

There were also 1,300 points of Ash Flame. As the attribute bubbles merged into his body, the gray-white flame in Wang Teng's Inner Cosmos grew bigger..

Wang Teng didn't pay much attention to it. To him, the Ash Flame was just a bonus. It wouldn't get much attention.

Then, there were 11,500 points of the fourth-rank Dragon Blood Battle Physique!

Landon's outbreak this time was quite fierce, and the attributes he dropped were quite substantial. There was a total of 11,500 points, far exceeding the attribute bubbles he had dropped before.

Dragon Blood Battle Physique: 13800/40000 (fourth-rank)

This was not bad. When Wang Teng's Dragon Blood Battle Physique increased, the True Dragon Battle Physique (fake) would increase too.

True Dragon Battle Physique (pseudo): 5600/40000 (fourth-rank)

The True Dragon Battle Physique (pseudo) didn't increase as much as the Dragon Blood Battle Physique but it was still an improvement.

For Wang Teng, this was all good news.

One type of attribute could enhance two different attributes, making it a cost-effective gain.

What truly left Wang Teng amazed was the last attribute sphere – Dragon's Blood!

Landon dropped a drop of dragon's blood!

At this moment, the drop of dragon's blood was floating in Wang Teng's Inner Cosmos.

Is this a real dragon's blood? Or... Wang Teng's eyes exhibited a peculiar expression as he glanced within his Inner Cosmos to examine the drop of dragon's blood.

Boom!

Suddenly, Wang Teng's consciousness was pulled into the blood, and a scene unfolded before him.

A massive beast was killed, and then a powerful individual extracted a drop of blood from the beast's body.

That's right!

The blood of that massive beast, after refining, yielded only a single drop.

And that drop of blood was the one currently inside Wang Teng.

Originally, this drop of blood had been consumed by Landon, but the system had found a unique way to reclaim it and then bestowed it to Wang Teng.

A star beast harboring the bloodline of a true dragon! Wang Teng had a moment of realization.

So, this drop of blood was not the true blood of a real dragon but the result of refining all the blood within a star beast carrying the bloodline of a true dragon into a single drop.

In essence, this drop of blood was incredibly close to being the true blood of a real dragon.

Chapter 1982: Don't Be Afraid! (2)

If I'm guessing correctly, the Parkers family is probably using this 'Dragon Blood' to activate the Dragon Blood Battle Form, achieving that semi-dragon transformation. Wang Teng speculated.

This method seemed powerful, but it carried certain risks. A slight misstep could lead to being overtaken by the wild beast consciousness within, making it impossible to return to human form.

The reason Landon became irritable and aggressive after using the semi-dragon transformation was because of the influence of this dragon's blood.

What use does this dragon's blood have for me? Wang Teng absentmindedly stroked his chin, unable to think of its immediate utility. He certainly didn't want to end up looking like Landon did earlier, as that appearance was quite unattractive.

He didn't like it.

Without dwelling on it any further, Wang Teng simply stored the dragon's blood, and the drop of the dragon's blood instantly flew into the center of his Inner Cosmos, into the black hole.

In reality, this process took only a brief moment.

Wang Teng looked at Little Qing'er at this moment. Beads of sweat covered her smooth forehead, her soft hair clinging to her cheeks, and her fair complexion slightly pale.

It was evident that in just a short time, she had depleted a significant portion of her bloodline power.

While Little Qing'er's bloodline power was strong, her overall strength was still relatively weak. Even the queen had weakened after using her bloodline power, and Little Qing'er was in no better shape, especially considering she was much less experienced.

However, the gap in the formation in the sky was gradually closing, and the number of poisonous creatures entering the city decreased

The snakemen martial warriors in the city felt less pressured.

"It seems I won't need to intervene!" Wang Teng breathed a slight sigh of relief.

At this moment, with the combined efforts of Little Qing'er and the Queen, they barely managed to maintain the array.

However, Wang Teng's thoughts had hardly taken shape before reality delivered a heavy blow to him.

Boom!

A loud and violent rumble echoed out, and at the gap, a massive star beast suddenly thrust its way out from the green mist and crashed down.

Splat!

The poison star beasts that were frantically diving into the holes were smashed into pieces. Their flesh splattered everywhere and their bodies exploded. They smashed onto the defense screen like a pile of rotten meat. Colorful blood splattered everywhere.

Boom!

The entire array began to tremble, and the gap that was previously healing rapidly developed a series of cracks resembling spider webs.

In an instant, the sound of the array struggling under the heavy burden echoed throughout the city.

The snakemen martial warriors looked up. Their expressions changed entirely.

A terrifying giant python slowly emerged from the green mist, its massive body looming in the sky, even larger than the whole city.

The smaller poisonous star beasts in the vicinity hurriedly fled, not daring to approach in the slightest.

The giant python had an entirely jet-black body, with a triangular-shaped head, and on top of its head were protrusions that resembled metal, like two horns or extended scales.

Its body was covered in sturdy scales, resembling some form of golden iron, exuding a cold metallic luster.

What was most striking was the pair of wings on either side of its body, which seemed like fleshy wings. They stretched out gradually and flapped gently.

With each of its movements, the green mist in the surroundings dissipated, allowing people to see clearly.

"Gasp!"

Zagu and the others, upon seeing this giant python, involuntarily took a sharp intake of breath. They felt their scalps tingle, a chill running up their spines and into their heads.

"It's the Black Maned Python!"

Marong immediately recognized the giant python and exclaimed.

In the great hall.

When the giant python collided with the array, the queen immediately spewed a mouthful of blood, her complexion turning deathly pale, and her body nearly collapsing to the ground.

"Master!" Little Qing'er said with anxiety.

But she was not faring well either. While the queen had shielded her, Little Qing'er's face grew even paler, and her petite figure wavered as if on the verge of collapsing.

The projection of the Primordial Oceanic Serpent on her body trembled slightly as if it was about to break apart.

After all, the projection of the Primordial Oceanic Serpent was summoned by Little Qing'er. With her taking a heavy blow, the projection could not be maintained.

At this moment, the cold, unwavering gaze with vertical pupils in the Giant Black Mamba's eyes was fixed on the projection of the Primordial Oceanic Serpent in the direction of the grand hall. There seemed to be a hint of highly human-like greed in those vertical pupils.

"It's the Black Maned Python!" The queen looked up at the sky, her eyes showing a trace of astonishment.

"Black Maned Python?" Wang Teng's expression turned serious, but he couldn't help but stroke his chin. "Why does it sound familiar?"

"Come on, one of the tasks you accepted had a requirement to obtain venom from the Black Maned Python. Don't tell me you've forgotten?" Round Ball's exasperated voice sounded in his mind.

"Hahaha, I recall now. I took on too many tasks and forgot." Wang Teng chuckled awkwardly.

"You really something." Round Ball rolled its eyes and said, "This Black Maned Python happens to be a high-tier imperial-level creature, meeting the requirements, but its strength appears quite formidable, and..."

"It appears to be eyeing you while you're plotting against it!"

Wang Teng paused for a moment, then gazed at the Black Maned Python, realizing the situation. He said, "I didn't expect that the bloodline power of the Primordial Oceanic Serpent would attract this Black Maned Python."

"The Primordial Oceanic Serpent Bloodline has a deterrent effect on serpent-type star beasts, but it also has great allure. Most importantly, this little girl is too weak; otherwise, the Black Maned Python wouldn't dare to appear," Round Ball analyzed.

That makes sense!" Wang Teng shook his head.

The bloodline power of the Primordial Oceanic Serpent Bloodline was indeed powerful, but if the possessor was too weak, it was akin to having an innocent bystander carrying a priceless gem, which would inevitably attract unwelcome attention.

Chapter 1983: Don't Be Afraid! (3)

"Master!" Little Qing'er felt the Black Maned Python's greedy gaze from the ceiling and couldn't help but feel a sense of dread. She bit her lip and looked towards the queen.

At this point, the queen had finally realized that something was amiss. Her face turned pale and her gaze shifted several times. Ultimately, she gritted her teeth and urgently said, "Quickly, disperse your bloodline power. Don't continue."

She had underestimated the allure of the Primordial Oceanic Serpent Bloodline to serpent-type star beasts. Originally, she thought that with the array in place, it wouldn't attract powerful serpent star beasts from outside the array.

But unexpectedly, a powerful high-tier imperial-level star beast had been lured here.

She couldn't let Little Qing'er continue to use her bloodline power. Now, it was an imperial-level star beast, the next time it could be an ultimate stage imperial-level star beast or something even more powerful.

The more bloodline power Little Qing'er used, the stronger the fluctuations it produced, which would attract increasingly powerful serpent-type star beasts.

So she couldn't let Little Qing'er continue any further!

It was too dangerous!

In the queen's eyes, Little Qing'er was more important than all the snakemen in the entire city.

She was even more important than herself.

Moreover, with the appearance of the Black Maned Python, there was no point in having Little Qing'er persist any further.

The Black Maned Python was ruthlessly attacking the gap, and its destructive speed was undoubtedly faster than Little Qing'er's efforts to heal the formation.

Allowing Little Qing'er to continue would be futile.

In this situation, it was better to have Little Qing'er hide and evade the Black Maned Python's scrutiny. There might be a glimmer of hope.

Little Qing'er immediately raised her hand from the armrest of the throne and prepared to disperse her bloodline power.

She could no longer hold on!

The Black Maned Python seemed to have noticed Little Qing'er shaking her head, and a cold gleam flashed in its massive serpent pupils. It suddenly swung its body, and its tail struck the formation with a resounding impact.

Boom!

A violent rumble echoed out as the array once again trembled, and the sound of cracking became distinct.

The snakemen inside the city watched this scene in horror, their faces turning extremely pale.

Marong and several heaven-stage martial warriors looked extremely solemn. They had already expended a significant amount of their Forces in operating the array. Now, if the high-tier imperial-level Black Maned Python entered the city, they might not be able to resist it.

It would be a disaster!

"Marong, what should we do?" A heaven-stage snakemen martial warrior asked in a low voice.

Marong held considerable prestige among the snakemen. These people were currently in a state of panic, and they all looked to him.

"How many people haven't entered the Thousand-Serpent Cave yet?" Marong asked in a low voice.

"There are still some people in the west and south of the city who haven't come over. Now that poisonous star beasts have invaded the city, they want to come here, but with the hindrance of poison-type star beasts, it's difficult..." The heaven-stage martial warriors didn't finish his sentence, but the meaning was clear. With the poison-type star beasts obstructing them, it would be challenging for those snakemen to enter the Thousand-Serpent Cave.

"Shall we let the martial warriors enter the Thousand-Serpent Cave first?" Another heaven-stage martial warrior suddenly asked.

Everyone was stunned. Then, there was a short moment of silence.

They weren't the only city on the Scorpion King Star. They weren't the only serpentmen either.

If their warriors suffered too many casualties in this outbreak of poison tide, they might face difficulties when dealing with other serpentmen races in the future.

Boom!

In the sky, the Black Maned Python struck again, and it did so leisurely as if it were toying with its prey. A hint of mockery flashed in its cold vertical pupils.

The array could withstand the poison tide, but it was also like a prison, trapping those inside.

Crack!

A clearer sound of cracking came from the array, and the previously healing gap once again widened, spreading outwards.

"Don't hesitate any longer. Let the warriors enter the Thousand-Serpent Cave. We can't afford to take the risk!" The heaven-stage martial warrior's face turned pale, and he immediately shouted.

"Retreat!"

Marong gritted his teeth. He had no time to inform the queen so he had to make his own decision.

Bloodshot veins spread in his eyes, laden with heaviness and guilt. He shouted sternly.

"All martial warriors, retreat to the Thousand-Serpent Cave at the fastest speed possible!"

All the serpentmen martial warriors were stunned by his order. There was disbelief on their faces.

Were they supposed to abandon the ordinary snakemen?

"What are you waiting for? Retreat to the Thousand-Serpent Cave, this is an order!" Marong bellowed at them from above.

Since the decision had been made, there was no room for hesitation.

A second of hesitation could mean the loss of several lives.

This was all he could do.

Marong's voice woke the snakemen martial warriors from their daze. They understood the situation, gazed guiltily at the ordinary snakemen around them, and were ultimately forced to leave them behind.

"No!"

"Don't leave us!"

"Take my child, take my child away!"

"Help me, save me!"

...

The ordinary serpentmen who were abandoned instantly panicked, crying and screaming, their expressions filled with fear and despair.

In the sky above, the terrifying Black Maned Python's eyes sparkled with mockery, as if it found the struggles of those below to be very entertaining.

However, its main focus remained on the illusion of the Primordial Oceanic Serpent. That was its primary target.

Inside the Great Hall, during the earlier impact, Little Qing'er's body trembled violently, and she nearly fell to the ground.

Her body was already extremely weakened, and she had been preparing to withdraw her hand when she was hit by the array's shock. Blood was now trickling from the corners of her mouth, making her look tragically fragile.

Chapter 1984: Don't Be Afraid! (4)

"Retract your bloodline power!" The snakemen queen struggled to get up and urged her anxiously.

Little Qing'er's face was filled with panic. What should have been a simple action now felt like it required all the strength in her body.

Retracting her hand would involve breaking the connection to her bloodline power first. Otherwise, she would suffer a backlash.

As she had only recently awakened her bloodline, she couldn't easily control her bloodline power. To retract it smoothly, she needed to concentrate.

"Don't panic!" the queen noticed her struggle and, despite her anxiety, adopted a calming tone to reassure her.

"Alright!" Little Qing'er took a deep breath and nodded.

She was about to close her eyes, making an effort to control her bloodline power.

Suddenly, a hand was placed on her slightly tender shoulder.

The hand was large and exuded a comforting warmth.

"Don't be afraid."

At the same time, a calm and gentle voice slowly echoed in her ears.

Little Qing'er was stunned. She raised her head and looked at the person who spoke. A familiar face entered her vision.

The face, the hand, and the gentle voice all worked to miraculously calm her frantic heart. It was as if she had found a glimmer of... safety.

The next instant, a force that seemed to come from the same origin surged into her body through the large hand.

Little Qing'er felt as though she had been embraced by her father's warmth, safe and comfortable. As the power flowed through her, it revitalized her body, replenishing the immense expenditure of her bloodline power.

Her pale face gradually regained a rosy hue.

"You..." the queen wanted to say something, but at that moment, she was left speechless as she saw Little Qing'er's complexion.

"Get ready!" Wang Teng's calm and gentle voice echoed once again.

Get ready? Ready for what? Little Qing'er had questions in her mind, yet before she could voice them, her body instinctively relaxed beneath the influence of that voice.

Boom!

Suddenly, the bloodline power that came from the same source as her erupted.

A powerful aura rose from their bodies.

The bloodline powers merged into one, and the ethereal image of the Primordial Oceanic Serpent, which had initially been a thousand feet long, suddenly expanded and solidified, now taking on the form of a colossal creature that spanned ten thousand feet.

Most significantly, this image became incredibly tangible.

The scales covering its body, its intricate patterns, and even the ice-cold, majestic presence in its eyes all underwent a radical transformation.

It appeared lifelike.

It resembled a genuine Primordial Oceanic Serpent that had traversed the boundless river of time to arrive in the present world.

An endless sense of primordial grandeur emanated from the ethereal image of the Primordial Oceanic Serpent, enveloping the entire world.

"What is this?" The queen's eyes widened, her heart thrown into chaos, completely losing her composure.

Little Qing'er also widened her eyes in disbelief. Her small head was covered in question marks.

Outside, all the snakemen martial warriors and regular snakemen had stopped in their tracks, staring in awe at the Primordial Oceanic Serpent, which had transformed as if reborn.

Even Marong and the other heaven-stage snakemen martial warriors were dumbfounded at the sight, completely forgetting to think.

Why had the ancestral python's image suddenly become so large?

Beyond the barrier, the terrifying Black Maned Python's pupils contracted abruptly. Within its vertical pupils, a hint of fear surfaced. The aura emanating from within the barrier made it shudder.

Terrifying!

If the previous image had been seen by it as a mere infant, the image had now transformed into a terrifying adult behemoth!

Could there be an even more dreadful adult beast hidden in the structures below?

Its current feeling was like that of bullying someone else's child and then, suddenly, the parent emerging to settle the score with it.

And this parent was a super invincible muscleman!

One punch could make a monster like it cry!

Chapter 1985: How... Did You Do It? (1)

The sudden eruption of the image of the Primordial Oceanic Serpent left everyone in awe.

The image of the Primordial Oceanic Serpent, which had already reached a size of a thousand feet, was shocking in itself. Now, this image had once again expanded and solidified, which was truly unbelievable.

The profound aura permeating the heavens and earth was simply overwhelming, and many people even forgot to breathe.

Inside the hall, Little Qing'er, filled with confusion, stared at Wang Teng.

Why did he possess the same bloodline power as her?

Even the queen of the snakemen race was puzzled.

However, her question wasn't why Wang Teng had the bloodline of the Primordial Oceanic Serpent Bloodline, but rather how he managed to make Little Qing'er's bloodline power erupt to this extent?

The queen hadn't expected that Wang Teng would have the Primordial Oceanic Serpent Bloodline, as it was simply impossible

In her eyes, Wang Teng was an extraterrestrial human.

How could an extraterrestrial human who wasn't a snakeman possess the Primordial Oceanic Serpent Bloodline?

This didn't make sense!

So she was just puzzled about how Wang Teng managed to trigger Little Qing'er's bloodline.

"Relax, leave everything to me!" Wang Teng smiled faintly at Little Qing'er and said in a calm voice.

"Oh... Okay!" At this moment, Little Qing'er had completely forgotten how to think, and she could only nod blankly.

Wang Teng raised his head to look at the sky, his eyes showing a trace of coldness. How dare a mere high-tier imperial-level star beast act so arrogantly?

Blank Attribute, add it!

The Primordial Conscious attribute increased exponentially.

The Primordial Oceanic Serpent Bloodline attribute started rising too.

In response, the blank attribute rapidly decreased!

The enhancement of these two attributes required ten times the blank attributes to be spent. Without the sufficient accumulation of blank attributes by Wang Teng, it would have been impossible to use them at this moment.

Nevertheless, watching the rapidly depleting blank attributes, Wang Teng couldn't help but feel a bit reluctant.

In a blink of an eye, the Primordial Conscious reached the second rank. Wang Teng stopped it immediately.

Primordial Consciousness: 1/20000 (second-rank)

From the first rank to the second rank, there was a qualitative leap. The Primordial Consciousness that Wang Teng comprehended underwent a tremendous transformation.

The Primordial Oceanic Serpent Bloodline was different. After Wang Teng raised it to the second rank, it didn't stop. It continued rising. Then, it went to the third-rank, the fourth-rank...

Primordial Oceanic Serpent Bloodline: 1/40000 (fourth rank)

In a flash, Wang Teng raised his Primordial Oceanic Serpent Bloodline to the fourth rank.

The fourth rank was enough to deter a high-tier imperial-level star beast.

This was how frightening the Primordial Oceanic Bloodline was.

However, the consumption of blank attributes was also enormous. After a careful calculation, Wang Teng had spent over 630,000 blank attributes.

Heartache!

He glanced at his attributes board.

Blank Attribute: 3550000

"Not bad, not bad! I have 3.55 million left!" Wang Teng breathed a sigh of relief, and his heartache lessened slightly.

Then his eyes sharpened, and the bloodline power within him erupted completely.

Roar!

The Primordial Oceanic Serpent's shadow enveloping him and Little Qing'er opened its huge mouth and let out a deafening roar towards the Black Maned Python.

An endless ancient and vast power swept across the heavens and earth!

Boom!

The Black Maned Python immediately felt its bloodline being suppressed, and the compelling force made it want to submit.

However, it was still a high-tier imperial-level star beast and was extremely powerful. Its eyes showed resistance, trying to break free from the compelling force.

Oh? You still want to resist! Wang Teng sneered, and the Primordial Oceanic Serpent Bloodline surged within him. His pupils turned into vertical slits, and a strange force flowed out of his eyes.

At the same time, within the giant snake pupils of the Primordial Oceanic Serpent shadow, a peculiar force also emerged. It resembled a purple lightning bolt, rushing towards the Black Maned Python's eyes.

Roar!

The Black Maned Python, already in a state of struggle, couldn't react in time and was quickly overwhelmed by the strange power. It became dazed.

The power, resembling purple lightning, quickly gathered within the Black Maned Python's eyes...

Roar!

The Black Maned Python alternated between confusion and terror, thrashing madly as its colossal body tumbled through the sky.

The layers of dark green mist inside it kept churning, like boiling water.

The star beasts inside it fled.

On the Scorpion King Star, high-tier imperial star beasts were already considered dominant figures. While there might be more powerful beings out there, they rarely ventured from their territories and wouldn't usually appear in a poison tide like this.

So, this Black Maned Python was already considered a top-tier presence within this poison tide.

In its frenzied state, other poison-element star beasts dared not approach it.

However, the Black Maned Python's massive body still collided with the array, causing the already strained formation to shatter once again.

Seeing this, Wang Teng channeled his bloodline power into the formation to maintain its operation.

At the same time, a strange power surged from his eyes, emanating from the eyes of the Primordial Oceanic Serpent's phantom.

This force seemed to be the final straw that broke the camel's back, as the Black Maned Python's struggles gradually weakened.

The snake-like imprint of that purple electric force was imprinted deep into its soul.

Eyes were the windows to the soul. Though it appeared to congregate in the Black Maned Python's eyes, it was actually seared into the depths of its soul.

The desperation in its eyes eventually faded, as if it had given up completely. When it gazed at the Primordial Oceanic Serpent's phantom in front of it, it displayed a hint of reverence and slowly lowered its massive head.

Chapter 1986: How... Did You Do It? (2)

Silence!

The surroundings fell into complete silence.

All the snakemen martial warriors below halted their escape and stared at the scene in astonishment.

"The Black Maned Python... has submitted?!"

Marong's mouth was dry, his face filled with disbelief, and his voice was hoarse as he murmured to himself.

Other snakemen martial warriors exchanged puzzled glances, doubting their own eyes.

How could such a powerful Black Maned Python submit so easily?

This was a high-tier imperial-level star beast. It was extremely powerful!

How could it surrender so easily?

They didn't even know what had just happened.

In the great hall, Little Qing'er's head was spinning. She had awakened her bloodline power, but she hadn't fully grasped its abilities. She didn't know that the Primordial Oceanic Serpent Bloodline possessed such a strange ability.

The way Wang Teng had manipulated it had completely exceeded her understanding.

The Primordial Oceanic Serpent Bloodline could tame other serpent-type star beasts!

Little Qing'er felt like she had gained new knowledge.

On the other side, the queen also discovered a new possibility. She looked at the Primordial Oceanic Serpent in the sky and then at Wang Teng and Little Qing'er, her eyes filled with astonishment.

"You tamed the Black Maned Python?" She couldn't help but ask.

"I... I don't know," Little Qing'er replied, shaking her head in a bewildered manner.

The Black Maned Python seemed to have submitted, but she couldn't be certain.

"Yes," Wang Teng affirmed. Seeing the two of them looking puzzled, he simply nodded and said, "Let's repair the array first."

With the Black Maned Python no longer attacking, and the continuous infusion of bloodline power, the array was quickly restored and even reinforced.

The fourth-rank Primordial Oceanic Serpent Bloodline was indeed useful.

A little while ago, Wang Teng had elevated his bloodline power far beyond that of Little Qing'er. At this moment, his fourth-rank Primordial Oceanic Serpent Bloodline far exceeded hers.

Among the high-tier imperial-level and below serpent-type star beasts, the Primordial Oceanic Serpent Bloodline was unquestionably dominant.

As the formation was restored, no more poisonous star beasts could enter the city.

Even the looming presence of the Black Maned Python above the Rui Snake City discouraged many weaker poisonous star beasts from approaching.

Marong and the others regained their senses and were elated.

"Save the people!"

A shout came out of Marong's mouth.

He didn't have a choice just now and could only maintain his martial warriors' ability. Now that the array was healed, the star beasts in the city weren't a threat anymore.

"Kill!" The other snakemen martial warriors shouted and charged toward the star beasts in the city.

In the great hall.

The snakemen queen looked at Wang Teng and asked, "How did you do it?"

Little Qing'er couldn't help but gaze at Wang Teng, her large eyes filled with a strange light. Only she knew that he possessed the same bloodline power as her.

"This is... a secret!" Wang Teng smiled mysteriously at Little Qing'er after he finished speaking to the snakemen queen.

Little Qing'er's heart skipped a beat. It was so difficult.

On one side was her master, on the other was the man who had saved her multiple times.

She didn't know which side she should help.

The snakemen queen felt frustrated when she saw their expressions.

She raised this disciple for nothing!

"Let's go out and take a look!"

Wang Teng looked up and flew out.

Little Qing and the queen immediately followed, flying out through the dome of the grand hall, suspending themselves in mid-air, and observing the situation all around.

"Finally, we are temporarily safe!"

The queen heaved a sigh of relief, looking at Wang Teng with complex feelings in her eyes.

"Thank you!"

"No need to worry, I'm doing this for my own reasons as well," Wang Teng replied nonchalantly.

"The star beasts inside the city haven't been completely dealt with. Once I handle them, I'll lead my people to express our gratitude to you," the queen shook her head and said solemnly.

Wang Teng glanced around, furrowing his brow, and said, "I'll help you one more time."

As he spoke, several massive figures appeared in the sky. They were his spiritual pets.

"Kill the star beast!"

Wang Teng ordered.

"What in the world is happening here?" The Metal Armor Flaming Scorpion exclaimed, looking up at the sky in shock.

Little White and Elizabeth were equally startled, not expecting to see such a terrifying scene when they arrived. Their skin prickled with unease.

However, they quickly realized that a protective barrier covered the area above, keeping the swarm of poisonous creatures at bay. This brought them a sense of relief.

"Let's go, we can talk later," Wang Teng urged, giving the Metal Armor Flaming Scorpion a dismissive kick.

"Alright!" The Metal Armor Flaming Scorpion took it in stride and grinned before heading down to engage the star beasts.

Little White and Elizabeth acted at the same time, using their formidable power to crush the star beasts en masse.

Seeing the three formidable star beasts appear, the snakemen were initially startled but quickly realized that these star beasts were not their enemies.

"Don't just stand there, come and help!" The Metal Armor Flaming Scorpion noticed a few snakemen martial warriors standing idle and couldn't help but chastise them.

"Uh... Oh, right!" The snakemen nodded blankly and joined the battle.

"Put some effort into it! Have you had lunch? Kill, kill, kill!" The Metal Armor Flaming Scorpion shouted while hunting down star beasts, creating an enthusiastic and motivating atmosphere.

The snakemen around them were fired up by the scorpion's words and fought even harder.

Wang Teng couldn't help but smile and shake his head. This guy knows how to get things going.

Chapter 1987: How... Did You Do It? (3)

The queen had a strange look on her face, and her thoughts were unclear.

"Brother, is there something wrong with this scorpion's brain?" Little Qing'er plucked up her courage and asked Wang Teng.

Wang Teng almost burst into laughter.

"Hey, hey, hey, little girl, I heard that! Talking behind my back will make your nose grow longer," the Metal Armor Flaming Scorpion shouted.

Little Qing'er quickly covered her mouth, her eyes showing a hint of guilt.

"Hahaha..." Wang Teng couldn't hold back any longer and burst into laughter, saying, "Don't mind it. It's just an idiot!"

The Metal Armor Flaming Scorpion: ...

Unable to argue with Wang Teng's words, Metal Armor Flaming Scorpion could only tuck its head and keep quiet.

With the addition of Little White, Metal Armor Flaming Scorpion, and Elizabeth, the city's star beasts were quickly dealt with, and the efficiency astonished the snakemen martial warriors.

"Master, it's all taken care of!" Metal Armor Flaming Scorpion flew over, seeking praise.

Not bad," Wang Teng nodded. "But Little White killed more. If only your true ability is as powerful as your mouth."

"Haha!" Little White glanced at the Metal Armor Flaming Scorpion proudly.

"That's because Little White can split itself into multiple forms," Metal Armor Flaming Scorpion protested.

"Elizabeth killed more than you too," Wang Teng pointed out.

"She's an ultimate stage imperial-level star beast. I'm just at the mid-tier imperial level. The difference is huge." The Metal Armor Flaming Scorpion lamented, almost on the verge of tears.

You can't bully a scorpion like this!

Wang Teng couldn't help but tease, "You truly are the most useless one!"

The Metal Armor Flaming Scorpion: ...

Little Qing'er couldn't help but giggle when she saw its aggrieved expression even though it was huge.

"Little girl, even you're laughing at me," Metal Armor Flaming Scorpion glared at her, grumbling.

Startled by its reaction, Little Qing'er quickly hid behind Wang Teng.

Wang Teng allowed them to play around and didn't intervene.

He surveyed the entire city and noticed several attribute bubbles. With a sweep of his spiritual power, he collected them.

Constellation Force (Poison)*500

Blank Attribute*1200

Constellation Force (Poison)*300

Blank Attribute*800

Constellation Force (Poison)*600

...

One by one, the attribute bubbles merged into Wang Teng's body. As expected, most of them contained constellation Poison Force and blank attributes.

All the poison-element star beasts that entered the city were killed. Naturally, a large amount of constellation Poison Force would drop.

Although most of these star beasts were below the low-tier imperial level and not exceptionally powerful, their numbers more than made up for it.

The attributes they provided to Wang Teng were definitely not little.

Wang Teng didn't calculate the exact number of attribute points he gained but he knew that his Poison Force had a breakthrough after absorbing these attribute bubbles.

The Force in his body surged and broke through the bottleneck. Wang Teng's constellation Poison Force rose from the fifth level to the sixth level of the cosmos stage. It didn't stop. It continued rising.

Poison Constellation Force: 18500/60000 (cosmos stage sixth level)

Wang Teng glanced at his attributes board and felt quite satisfied with the results

His constellation Poison Force was once again in the lead, surpassing the other constellation Forces by a significant margin.

On this planet, it was undoubtedly the easiest to enhance his constellation Poison Force, as opportunities for growth were abundant and almost ever-present.

However, significant improvements often required unique opportunities.

Such as the Ghost Venom Abyss and the poison tide.

These opportunities came with substantial risks, and individuals lacking strength or unique capabilities might struggle to harness their full potential.

Besides the constellation Poison Force, his blank attribute had increased too.

Blank Attribute: 3626000

Seeing the changes in his blank attributes, Wang Teng's heartache lessened by another degree.

Realizing how much these poisonous star beasts could benefit him, he gazed ahead with a burning determination.

He couldn't help but wonder why he didn't notice earlier that, although the poison tide was incredibly dangerous, it was also an excellent opportunity to grow stronger.

"I wonder how long it will take for the poison tide to pass?" The queen looked up and suddenly said.

"I hope this poison tide will last a bit longer," he said.

The Queen: ...

Did she hear correctly?

This guy wanted the poison tide to last a bit longer.

"Ahem, I meant to say, this poison tide is a bit slow, that's what I meant," Wang Teng quickly corrected himself, coughing awkwardly.

"This time the poison tide lasted a long time. In the past, it would typically be over in two or three hours at most, but this time, it's been more than half a day," the queen said, furrowing her brow.

"Have you ever experienced such a terrifying poison tide like this before?" Wang Teng felt that something was amiss and asked.

"I've never met one before." The queen shook her head.

"What about longer durations? Are there any specific records, like it occurring once every thousand years?" Wang Teng inquired.

"Well..." The queen furrowed her brow.

She was still quite young and had only recently become the Queen. She hadn't ruled for even five hundred years, so she wasn't particularly familiar with this poison tide.

"This friend is correct. It seems like there is a large-scale poison tide every one thousand and two hundred years," Marong flew over from a distance and bowed to the Queen before speaking.

"Marong, do you know about this?" The snakemen queen asked.

"Yes, I've heard my father mention it before. If Your Majesty checks our clan's records, you should find relevant documentation," Marong nodded.

"In that case, it seems this poison tide follows a pattern," Wang Teng pondered for a moment, then urged, "Quickly fetch that documentation and let's see how long it will last."

Chapter 1988: How... Did You Do It? (4)

"I'll order someone to investigate immediately!" The snakemen queen nodded.

Wang Teng could only wait.

"Your Majesty!"

"Your Majesty!"

At this moment, the snakemen martial warriors from afar gathered around and respectfully bowed to the queen.

They appeared excited and when they looked at her, their eyes held admiration. Especially after the Queen saved the entire snake clan, this admiration had reached an indescribable level.

Even the ordinary snakemen were beyond grateful. Originally, they had no hope of survival, but the queen's last outburst had miraculously subdued the terrifying Black Maned Python, which had chosen to submit.

Furthermore, the power of the ancestral python that followed helped restore the array, saving them all.

In their eyes, it was all thanks to the queen.

Because the previous illusion was of their ancestral giant python, apart from Her Majesty, they couldn't imagine anyone else capable of manifesting it.

"Your Majesty, you saved the entire snakemen race. We are all deeply grateful," Marong smiled and said.

The queen was slightly taken aback, not expecting everyone to have misunderstood the situation.

She glanced at both Little Qing'er and Wang Teng, then shook her head, saying, "You've misunderstood. I wasn't the one who summoned the ancestral python spirit."

"It's not you?!" Marong was also surprised and looked at the queen as if he thought she was joking.

"The ancestral python spirit can only be invoked by someone who has awakened the bloodline of the ancestral python," the queen explained.

"Isn't it you who awakened the bloodline of the ancestral python?" Marong asked.

"It's not me. It's Little Qing'er." The snakemen queen pulled Little Qing'er over and patted her little head.

She hesitated over this decision. Exposing Little Qing'er's bloodline might bring trouble, but she didn't want to take credit for her achievements.

Also...

The queen glanced at Wang Teng and had other thoughts. That was the real reason she had decided to expose Little Qing'er's talent.

"Little Qing'er!" Marong was stunned once again. He looked at the little girl beside the queen in bewilderment. "How could it be her?"

He knew that Little Qing'er was the queen's most recent disciple, but he had never imagined that this young girl could be a genius who awakened the bloodline of the ancestral python.

"It's precisely because Little Qing'er awakened the bloodline of the ancient python that I took her as my disciple," the queen explained. "And she was able to awaken it smoothly because of... him."

As she said this, her gaze fell on Wang Teng.

Marong followed the queen's gaze and was stunned.

This extraterrestrial human!

That was impossible!

How could this extraterrestrial human help their race awaken their ancestral bloodlines?

This didn't make sense!

If these words hadn't come from the queen herself, he would have probably scoffed in disbelief.

While they were grateful to Wang Teng for rescuing the queen from Landon, it was challenging to believe that an extraterrestrial human could assist them in awakening their ancestral bloodlines.

But, he had to believe the queen.

"Moreover, it was him who truly saved everyone just now!" the queen said, looking at Wang Teng.

"What?" This time, Marong was utterly shocked.

The surrounding snakemen martial warriors also stared at Wang Teng in amazement.

Did this extraterrestrial human save them?

For a moment, all the snakemen found their worldviews shaken.

An extraterrestrial human saved them? This was unbelievable.

And wasn't it the ancestral python's manifestation that appeared earlier? How could an extraterrestrial human manifest it?

Everyone was filled with doubt.

Wang Teng didn't expect the queen to reveal his role, and he felt a bit surprised. Seeing the gazes of the people around him, he couldn't help but feel a little embarrassed.

It was an awkward situation!

"You don't need to doubt it. Little Qing'er is only a planetary-stage martial warrior, and no matter how strong her bloodline power is, she wouldn't be able to make a high-tier imperial-level Black Manna Python submit," the queen said, looking at the terrifying python above them.

Marong and the others quickly grasped the situation.

They had to admit that the queen's explanation made sense. A planetary-stage martial warrior, no matter how powerful their bloodline might be, couldn't possibly make a high-tier imperial-level Black Manned Python submit.

Their ancestral python bloodline, no matter how strong, couldn't achieve such a feat.

So it could only be attributed to this extraterrestrial human!

The gaze of Marong and his companions toward Wang Teng became more complex – a mix of incredulity, gratitude, and respect.

Zagu stood among the crowd and looked at Wang Teng.

This extraterrestrial human appeared to be of a similar age to him, but his strength was so formidable that it left Zagu feeling somewhat powerless.

He had initially believed he could compare to the talented individuals from the outside, but now, it was clear that he had been overly optimistic.

"So, from this moment on, he is not only the benefactor of our Rui Snake City, but also an eternal guest of our Rui Snake City!"

The queen looked at Wang Teng and suddenly spoke to the other snakemen.

"Noble benefactor, please accept our deepest gratitude!" Marong took a deep breath, gazing earnestly at Wang Teng, and then pounded his own chest, producing a deep and resonant sound.

Bang!

The other snakemen followed suit, pounding their chests and offering their respects to Wang Teng.

Chapter 1989: How... Did You Do It? (5)

Wang Teng was taken aback by this grand display of gratitude. He didn't expect the queen to do this.

Weren't they supposed to be highly hostile to outsiders, especially to him, an extraterrestrial human?

Why did they accept him so quickly?

Was it possible that his charisma was just too irresistible, even to the snakemen?

Indeed!

It seemed like his handsome looks made him popular wherever he went.

He chuckled to himself secretly. Then, with a dry cough, he said, "You don't have to be so formal. We're all friends here. No need to be so polite!"

"That's right, we're all friends!" Marong laughed heartily.

Little Qing'er, watching the scene unfold, couldn't help but feel a sense of joy.

Seeing that Wang Teng was being accepted by her people, Little Qing'er felt very happy.

"Brother, I don't know your name yet," she asked.

Wang Teng teasingly responded, "You didn't call me that before."

Little Qing'er blushed slightly and said, "Well, that was because you pretended to be my father. You don't look much older than me."

Wang Teng laughed heartily and introduced himself, "I'm Wang Teng."

"Brother Wang Teng!" Little Qing'er called out.

Marong and the others were surprised when they heard their conversation. It looked like they had known each other for a long time. What's more, they had some stories that outsiders didn't know.

Zagu couldn't help but feel a bit envious. In his heart, Little Qing'er was the second goddess after the queen, and now she was chatting and laughing with this extraterrestrial human. How enviable!

Amid the conversation, an elderly snakeman approached with an ancient scroll made of animal hide.

"Your Majesty, I found it. This is all the recorded information left by our ancestors about the poison tide," the elderly snakeman said as he presented the scroll to the queen.

"Let me take a look," Wang Teng said, his eyes shining with curiosity.

The elder glanced at the queen hesitantly. When she nodded, he handed the animal-hide scroll to Wang Teng.

Wang Teng didn't mind the details. He accepted the scroll and began examining it.

He quickly found the relevant records, and it was evident that large-scale poison tides had occurred approximately every 1,156 years. The previous one had been 2,389 years ago, and there were even earlier records.

These records were quite detailed, and it was not difficult to discern a pattern from them.

The interval of approximately 1,200 years was a rough estimate, and in reality, the timing could vary. The poison tide might come earlier or later than expected.

Wang Teng handed the animal-hide scroll to the queen, indicating for her to take a look.

She accepted the scroll and examined it carefully.

As she read, her expression gradually became more serious, and cold sweat formed on her back.

Large-scale poison tides were truly terrifying.

According to the descriptions in the records, each occurrence resulted in significant casualties.

Many snakemen branches were wiped out because of it.

However, the recent ones had appeared in different regions, so the snakemen of Rui Snake City hadn't paid much attention to the issue.

Moreover, several thousand years had passed, and even the snakemen's leadership had changed multiple times.

Some snakemen who had witnessed the horrors of the poison tide may have left records to warn future generations.

However, those who had never seen it firsthand wouldn't have a deep understanding or feel the need to be vigilant all the time.

This time, the large-scale poison tide happened to occur in the region where Rui Snake City was located, and the snakemen of this branch were finally experiencing the terrifying nature of such an event.

If the protective array were to completely collapse and allow the poison tide to invade the city, most of the snakemen within Rui Snake City would likely perish.

Even if they entered the Thousand-Serpent Cave, there was no guarantee of survival.

At this moment, the queen's expression became even more complex, and she looked at Wang Teng with gratitude once again.

Without him, their entire Rui Snake City might have been annihilated.

Even Little Qing'er, the snakewoman prodigy who had just awakened her ancient ancestor's bloodline, might not have survived.

"Master!" Little Qing'er said worriedly.

The queen patted her head and said nothing more.

After reviewing the scroll's content, she took a deep breath and passed it to Marong, who was curious about the situation.

Marong, after reading it, couldn't help but gasp, "This large-scale poison tide is truly terrifying!"

"Based on the records, this large-scale poison tide can last for three to five days. Yet, we have only endured half a day," the snakemen queen said in a low voice.

"This..." Marong's expression changed, and he fell into silence.

A heavy atmosphere descended upon the surroundings. The snakemen, who had previously been in good spirits, now had their faces turned pale. The large-scale poison tide was much more terrifying than they had imagined.

If they could barely hold on for half a day, what would happen if it lasted for three to five days?

Could they survive this ordeal?

At this moment, all the snakemen turned their attention to the queen and Wang Teng.

"Do you... have a way?" The queen's voice carried a tinge of bitterness. She bit her lip and said, "If you can help us through this life-and-death crisis, I can give you the Azure Sea Pearl!"

"Azure Sea Pearl!" Marong's expression changed. He wanted to say something but hesitated.

The Azure Sea Pearl was their most important treasure.

How could they give it to an outsider?

However, considering their current predicament, he fell silent.

If all their people are doomed, what's the use of keeping the Azure Sea Pearl?

"Really?" Wang Teng raised an eyebrow and asked, "Seriously?"

"Of course!" The queen nodded. "I will also tell you the true purpose of the Azure Sea Pearl. I believe you must be very curious."

"I definitely know more than that extraterrestrial human."

"Alright!" Wang Teng nodded. "I will help you survive this poison tide."

He had already planned to take advantage of this poison tide, even before the queen made her offer. Now, he gained another Azure Sea Pearl for free. He had every reason to accept.

The queen felt relieved when he agreed.

With his help, their chances of surviving this poison tide should be above 80%.

With his strength and an array of endless techniques at his disposal, he might not necessarily have trouble dealing with this large-scale poison tide.

This man was different from other extraterrestrial humans. His eyes held absolute confidence.

She believed that her judgment was right!

"Actually, you don't have to be so polite. We are friends, and helping friends is the right thing to do," Wang Teng added with a smile.

The queen: ...

If she hadn't seen Wang Teng's shameless side, she would have believed him.

"This is a pill that can restore your Force. Take it." Wang Teng didn't mind her gaze. He took out a jade bottle and threw it to the queen.

"A medicinal pill!" The queen was slightly stunned as she examined the contents. She was astonished and exclaimed, "Is this the highly precious medicinal pill crafted by the extraterrestrial humans?"

Eagerly, she poured out the contents of the vial, releasing a rich aroma of the pill.

"It smells so good!"

Chapter 1990: Entering The Poison Tide! Discovery! (1)

"It smells so good!"

The rich fragrance of the pill permeated the air, leaving everyone's spirits shaken.

Even those further away, like Marong and others, could smell the delightful scent of the pill. They looked at the pill in the queen's hand in amazement.

People nearby, even if they only smelled this scent, couldn't help but feel their mouths water and involuntarily swallow their saliva.

They had seen pills before, but rarely, and most of them came from extraterrestrial humans.

Even so, the pills they received couldn't compare to the one Wang Teng presented.

This was a grandmaster-level pill!

A single grandmaster-level pill was a treasure that would attract numerous strong individuals, not just within the Poison Erosion World but beyond.

After all, sometimes, a single pill could mean the difference between life and death.

Pills of this caliber, especially healing grandmaster-level pills, were crucial for survival.

If Wang Teng wasn't a grandmaster alchemist, he wouldn't have been so extravagant.

When Little Qing'er saw the pill, she couldn't help but remember when Wang Teng disguised as her father.

She had felt that the pills he crafted were much better than before, and she had thought it was due to her "father's" improved skills. However...

Come to think of it, was Brother Wang Teng an esteemed alchemist?

She curiously examined the pill, her nose twitching slightly as she smelled the pill's fragrance, which further surprised her.

So, this is a pill? It's indeed more potent than ordinary medicinal pills. The herbs inside are so complex. I can't distinguish the individual scents. Little Qing'er thought. She had learned a lot about herbs by staying with Zele and, despite her young age, knew more than most people. However, at the moment, she couldn't discern the individual scents of the herbs within the pill. Their aromas seemed to have blended together, making it difficult for an ordinary person to identify.

Nonetheless, she could sense the pill's incredible quality, which was undoubtedly far superior to the pills her father had crafted.

"This pill is too valuable! The queen looked at Wang Teng and hesitated.

With her keen eyes, she naturally recognized that this pill was not ordinary.

"Don't worry. I have plenty of pills like this," Wang Teng said casually.

The queen blinked her beautiful eyes, staring at him intently. She wanted to know if he was just showing off.

He had plenty of these precious pills?

Was he giving them away like cabbage?

Marong and the others were also stunned by Wang Teng's statement. In their minds, Wang Teng's image suddenly transformed into that of a wealthy individual.

"Wang Teng, stop boasting!" Round Ball quipped.

"Isn't it the truth?" Wang Teng replied with a hint of amusement.

Round Ball didn't know what to say.

Fine, you're the grandmaster alchemist.

"Eat it. The situation is critical, so there's no need to be reserved," Wang Teng said.

If he didn't know that the poison tide would last for three to five days, he might not have been willing to give away a grandmaster-level pill so easily.

"If you still feel uneasy, once the poison tide has passed, you can help me collect some herbs as compensation," Wang Teng added.

The queen fell silent for a moment. Hearing Wang Teng's words, she felt relieved and nodded, saying, "Very well, after the poison tide passes, I will have people collect herbs for you."

Wang Teng was mildly pleased.

There were many valuable or special spiritual herbs on the Scorpion King Star.

Some of which were required for his missions.

Collecting them alone would be time-consuming.

But, with the entire snake race assisting, it would be much more convenient!

Exchanging one pill for so much free labor was an excellent deal for him.

The queen, no longer hesitant, immediately swallowed the potent pill. A fierce surge of Force erupted within her, causing her expression to change.

She had not expected the pill to be so effective. Without wasting any time, she sat cross-legged in mid-air, closing her eyes to absorb and recover.

Marong and the others remained nearby, silently guarding her.

Wang Teng paid no attention to them. He knew that it might take some time for the queen to absorb the full power of the pill. Waiting around would be a waste of time.

He gazed up at the protective shield. In an instant, he dashed towards it.

He quickly arrived at the edge of the shield and observed the swarm of poison-tide creatures outside, his eyes flickering.

He had initially intended to venture outside and hunt down the poison-type star beasts within the poison tide. However, seeing the situation up close made his scalp tingle with apprehension.

"Sir Wang Teng, what are you doing?" Marong caught up with him and asked anxiously.

"I intend to go outside and take a look," Wang Teng replied calmly.

"Outside!?" Marong's face showed disbelief, thinking he had misheard. He asked again, "You really want to go outside?"

"Why not?" Wang Teng asked in return.

Marong was stumped.

This wasn't a matter of "can" or "cannot."

The poison tide outside was terrifying, and while everyone else avoided it, this extraterrestrial human seemed determined to venture out. It looked incredibly suspicious from any angle.

"Rest assured, I know what I'm doing." Wang Teng knew what he was thinking and smiled.

Marong gazed intently at Wang Teng. If it weren't for the knowledge that this extraterrestrial human possessed extraordinary strength and abilities far beyond the norm, he would have considered him quite reckless.

However, it was different for powerful individuals. Marong, at most, considered him a... madman!

"If you're going out, you'll need to take the array token with you. I have some extras here. Please take one," Marong said as he handed a dark green jade token to Wang Teng.

Chapter 1991: Entering The Poison Tide! Discovery! (2)

Wang Teng took it and examined it. He saw numerous runes engraved on it. With his knowledge of the Azure Poison Serpent Array, he quickly recognized the connection between the runes on the card and the array.

"Thank you!"

Wang Teng cupped his fists at Marong and dashed out of the protective shield.

Boom!

As soon as he appeared outside the array, a violent rumbling sound reached Wang Teng's ears. It seemed as if countless air currents were rapidly surging, carrying a poisonous mist that viciously swept in with the strong gusts of wind.

If one's physical body wasn't strong enough, this powerful wind could easily break through the skin, and the toxic mist within would enter the bloodstream, leading to unimaginable consequences.

Wang Teng activated his Ancient God Body, and with a resounding boom, his blood flowed vigorously as a mysterious and arcane golden pattern appeared on his forehead.

The immense power of his physical body surged forth, rendering him completely immune to the surrounding mist and winds.

"Little ones, it's time to work!"

Wang Teng waved his hand and summoned Little White, the Metal Armor Flaming Scorpion, and Elizabeth.

In the end...

As soon as it appeared, the Metal Armor Flaming Scorpion was buffeted by the fierce winds in every direction, almost toppling over.

"Wah, wah, wah!" the Metal Armor Flaming Scorpion cried out loudly. If it weren't for its extremely tough exoskeleton, it might have fared much worse against this onslaught.

Of course, this was a testament to Wang Teng's trust in them. Both Little White and the Metal Armor Flaming Scorpion had exceptionally durable outer shells, and these winds couldn't harm them.

As for Elizabeth, there was no need to mention her. Being an ultimate stage imperial-level star beast, she was impervious to the winds.

"Master, why have you come out here?" The Metal Armor Flaming Scorpion, with the assistance of Little White, managed to right itself and brandished its pincers, driving away the star beasts in the vicinity, while shouting.

"Enough with the chatter. Hunt down the star beasts," Wang Teng commanded sternly.

"Caw!" Little White raised its head and emitted a loud cry, charging directly at the poisonous star beasts surrounding them, beginning the hunt.

If there was one who obeyed Wang Teng's orders unquestioningly, it was probably Little White. It acted without a trace of hesitation.

"Kill! Kill! Kill!" The Metal Armor Flaming Scorpion wasted no time either, charging out and attacking the star beasts in the vicinity.

Elizabeth smiled faintly, nodded at Wang Teng, and also began her hunt.

Wang Teng gazed at the Black Maned Python.

This high-tier imperial-level star beast had already been imprinted with a spiritual mark by Wang Teng, and it had submitted itself to the Primordial Oceanic Serpent.

Now, as it saw Wang Teng, it slowly lowered its head, appearing quite docile.

Wang Teng touched out and placed his hand on its head. He sensed a chilling sensation and said, "Go!"

"Hiss!"

The Black Maned Python raised its head abruptly and hissed. Its massive body swayed as it charged into the mist.

The star beasts within the mist were dumbfounded!

Brother, whose side are you on?

The star beasts above the emperor level possessed considerable intelligence. They had originally believed that, even if the Black Maned Python was ferocious, it would not senselessly attack its own "kind." Little did they expect it to suddenly turn on them and charge in their direction.

Something felt amiss!

In an instant, the mist roiled violently, and one after another, the star beasts released pitiful screams, their bodies bursting open, turning into clusters of bloody mist.

Inside the already intensely foul mist, the scent of blood filled the air.

"Well done!" Wang Teng's eyes gleamed, and he didn't remain idle. Beams of golden light burst forth from his body.

Phoenix Golden Feather Blade!

This was the first time Wang Teng used this special spiritual weapon after he received it. Now, he had the perfect opportunity to test its power amid this poisonous tide.

According to the records of the Phoenix Golden Feather Secret Scripture, when one's mental power touched the cosmos stage, one could control 3,333 pieces of Phoenix Golden Feather Blade.

Wang Teng was curious to see how many pieces of Phoenix Golden Feather Blade he could utilize at his cosmos stage.

The heaven-realm divine spirit master made a total of 9,999 Phoenix Golden Feather Blades. This was the limit of the heaven-realm spiritual power.

However, at the time, he only used 4,999 of them because his strength had not yet reached the pinnacle of the heaven realm, and he couldn't utilize the full 9,999 pieces of Phoenix Golden Feather Blade.

For now, Wang Teng didn't need to use so many of them!

Before his spiritual power touched the heaven realm, he wouldn't need it.

At this moment, Wang Teng used 666 pieces of the Phoenix Golden Feather Blade, and streaks of golden light drew mysterious trajectories around his body. The Metal Domain was instilled in these mystical paths.

Wang Teng was performing the Phoenix Golden Feather Blade exactly as described in the Phoenix Golden Feather Secret Scripture. Each of his attacks was unpredictable.

Subtly, those golden trajectories seemed to connect, forming a golden mystical bird that flew within the mist. Wherever it went, it crazily harvested the lives of the poison-element star beasts.

Marong didn't leave when Wang Teng exited the array. Instead, he observed Wang Teng's every move from within the array.

After all, Wang Teng was the savior and esteemed guest of their snakemen tribe, and he didn't want to witness any mishaps befalling him.

Especially under his eyes. The queen would definitely blame him.

However, the subsequent scenes left him utterly stunned.

Summoning those three spiritual pets was one thing, as he had seen them before.

But seeing them unloose a massacre outside the array was a different story, and he felt that he had been naive.

Among the three spiritual pets, the crow and the scorpion were much stronger than ordinary cosmos-stage martial warriors. Even he, Marong, might not be able to defeat them easily.

As for the third unusual spiritual pet, it was extraordinarily powerful, reaching the peak imperial level. Marong admitted that he was not a match for it.

Chapter 1992: Entering The Poison Tide! Discovery!

(3)

Then there was the Black Maned Python, which surprisingly obeyed the commands of this extraterrestrial human. Marong finally believed what the queen had said. This outsider was the one who made the Black Maned Python submit, thereby saving them all.

It wasn't just him who saw this. Other members of the snakemen tribe witnessed the scene as well.

At this moment, their awe of Wang Teng came from the depths of their hearts. This extraterrestrial human was indeed exceptionally powerful.

Not only was the strength of his spiritual pets remarkable, but Wang Teng's strength left them in awe. The streaks of golden light shimmering within the mist took the lives of star beasts one by one, even creating a vacuum zone around him.

The speed at which he was reaping lives was truly hair-raising.

They couldn't help but wonder if they could withstand such an onslaught if they were in his place.

Marong kept his gaze fixed on Wang Teng's assault, his expression growing increasingly serious. He was dumbstruck.

This extraterrestrial human was too powerful!

As a heaven-stage martial warrior, he couldn't find any way to overcome this opponent. It was truly frustrating and disheartening.

Outside the array, Wang Teng's eyes shone with a peculiar light, and in the short time he had been using the Phoenix Golden Feather Blade, he had become exceptionally adept with them.

Not enough!

His eyes gleamed with excitement, realizing that he could control even more Phoenix Golden Feather Blades.

He used the 666 pieces of Phoenix Golden Feather Blade because his spiritual power was equivalent to the second-level cosmos realm. However, from the looks of it now, he could control more.

Swoosh, swoosh, swoosh...

Once again, streaks of golden light shot out from his body, converging into the intricate golden trajectories around him, making those trajectories even more complex and mysterious, and also more... dangerous!

Within a ten-meter radius around Wang Teng, a forbidden zone had completely formed, where no star beast could approach.

"Real combat is indeed the best way to improve!"

As he continued to use the Phoenix Golden Feather Secret Scripture, Wang Teng's understanding of it deepened, resulting in a significant increase in his attribute values.

His metal talent had been upgraded, and his Enlightenment had reached the universe realm. Thus, mastering the Phoenix Golden Feather Secret Scripture at the cosmos realm was a breeze for him.

At this point, he had already utilized 1,333 pieces of the Phoenix Golden Feather Blades and still felt that he had a lot of power left.

1,333 Phoenix Golden Feather Blades was the limit of the fourth-level cosmos realm spiritual power. Though his spiritual power was at the second-level cosmos realm, due to the extremely high ceiling set by the ancient entity, his second-level cosmos realm was equivalent to the fourth.

However, he hadn't expected that after reaching the limit of using the fourth-level cosmos realm of spiritual power, he still had energy to spare.

Wang Teng's eyes gleamed once again, and another 333 pieces of the Phoenix Golden Feather Blades were released.

The surrounding trajectories became even more intricate and difficult to discern, and their power increased significantly.

Roar!

Inside the mist, some powerful star beasts appeared to have been provoked, and a mid-tier imperial-level poison-element star beast charged directly at Wang Teng.

"Impudent!" the Metal Armor Flaming Scorpion shouted, eager to rush over and show off.

"Stay put!" Wang Teng snapped impatiently.

The Phoenix Golden Feather Blades around him converged into a single entity, transforming into a mystical golden sparrow. In an instant, it turned into a streak of golden light and shot out with terrifying speed.

Chirp!

The clear and melodious chirping resonated in the sky, piercing the ears and causing mental shock.

The mid-tier imperial-level star beast froze in mid-air for a moment, a look of confusion in its eyes. In the next moment, the mystical golden sparrow had passed through its body.

Boom!

There was an explosion and the entire star beast exploded. Flesh and blood splattered everywhere.

The Metal Armor Flaming Scorpion shuddered when it saw this scene.

Master is so cruel!

Luckily, I didn't go over.

Time to leave, time to leave!

The Metal Armor Flaming Scorpion ran away from Wang Teng dejectedly. It felt that Wang Teng didn't need its protection. He killed a mid-tier imperial-level star beast just like that. What a monster.

In the array, Marong's expression froze. He stared at Wang Teng absentmindedly before turning and leaving silently.

He wasn't needed here!

Rather than worrying about the other party, he should worry about himself.

No wonder the queen held this outsider in such high regard, even breaking the conventions to treat him as an honored guest. Their inherent beliefs couldn't be easily changed by simple gestures of goodwill.

"The Phoenix Golden Feather Secret Scripture is truly powerful. I was able to directly annihilate a mid-tier imperial-level star beast after using 1,666 pieces of Phoenix Golden Feather Blades," Wang Teng also felt extremely amazed.

Of course, if he met a divine spirit master at the same level, it wouldn't be so easy.

It can be said that in a certain aspect, the Phoenix Golden Feather Secret Scripture was extremely powerful, and if the opponent's spiritual technique was inferior to his, they would undoubtedly lose.

However, Wang Teng found that at this point, he had reached the limit of the number of Phoenix Golden Feather Blades he could use.

He wasn't dwelling on this limitation, though. He continued to use the 1,666 pieces of Phoenix Golden Feather Blades to hunt.

Furthermore, he no longer restricted himself to his current position and instead charged deeper into the mist. He wanted to see how thick this poison tide's mist was.

With the Phoenix Golden Feather Blades leading the way, Wang Teng was well-protected and perfectly safe.

"Huh?"

While flying, Wang Teng momentarily froze, as if he had discovered something. His eyes showed a look of astonishment.

"In this mist, it seems to aid in comprehending the power of the domain."

He came to a stop and closed his eyes to sense what was happening.

Streaks of golden light encircled him, and the poison-element star beasts from all around continued to charge at him, but they were all killed before they could get close to Wang Teng.

Chapter 1993: Entering The Poison Tide! Discovery! (4)

He continued to meditate with his eyes closed for a while, and then slowly opened them.

"It seems that a special domain has formed in here, related to the poison domain."

Wang Teng felt the faint but distinct presence of this domain power, and his eyes sparkled.

He was very surprised, as he hadn't expected this kind of unique domain power to exist within the mist.

Demon Lotus Poison Body, activate!

The next moment, Wang Teng's eyes flashed. He activated the Demon Lotus Poison Body and a black lotus flower pattern appeared on his forehead.

At this point, Wang Teng already had the golden pattern of the Ancient God's Body on his forehead, so the black lotus appeared beneath the golden pattern.

Between the two, it was as if the black lotus was gently lifting the golden pattern, and there was no conflict between them.

Fortunately, both of these patterns were relatively small and could coexist.

Wang Teng didn't think too much about it. He activated the Demon Lotus Poison Body to comprehend the domain power within it.

Simultaneously, his immortal-level poison talent was operating madly to comprehend the surrounding domain.

This immortal-level poison talent was already inherent in his body, which allowed him to sensitively perceive the special domain power within this mist.

Otherwise, even if someone entered the mist, they might not be able to sense it immediately.

Wang Teng was a bit excited. While sensing the domain power, he also scanned his surroundings to see if any attribute bubbles had dropped.

If there were attribute bubbles, it would undoubtedly save him a lot of effort and time.

Many attribute bubbles had dropped from the star beasts he had killed earlier. Wang Teng had picked them up directly without taking a close look. Now, he glanced at his attribute panel and was surprised to find that in just a short while, his constellation Poison Force was already close to reaching the peak of the sixth-level cosmos stage, not far from breaking through.

Suddenly, Wang Teng noticed several attribute bubbles with unique colors within the mist.

"That's it!"

He exclaimed in delight, and his spiritual power immediately reached out to retrieve them.

Although there were only a few attribute bubbles, they were enough to make Wang Teng feel the goodwill of this poison tide.

Look, he asked for it and they came!

This poison tide was quite understanding.

Poison Tide Domain*420

Poison Tide Domain*300

Poison Tide Domain*360

...

Several attribute bubbles immediately integrated into Wang Teng's mind, turning into insights.

A vivid scene appeared in Wang Teng's mind.

Endless black mist swept through, containing a deadly poison. Wherever it went, it was like an irresistible torrent. Within that torrent, various venomous creatures could manifest. They could be illusory or real.

But, when they pounced, they would unleash incredibly powerful attacks. Their fangs and claws were all venomous, and any touch would mean death.

Even the illusory venomous creatures could release domain power, and when a large number of venomous creatures erupted simultaneously, it would be terrifying.

The power of this domain was tremendous!

In just a short moment, Wang Teng completely absorbed these insights and comprehended the Poison Tide Domain!

More importantly, this domain was not just a simple domain. It had reached the actualization phase.

As an actualization phase domain, it could condense without dispersing, undergo some kind of transformation, and switch between the virtual and the real. It was far more powerful than an ordinary domain.

Poison Tide Domain: 80/2000 (second-level actualization phase)

Wang Teng never expected that the domain he comprehended here would be in the actualization phase. It was a pleasant surprise.

The name, however, seemed a bit hasty. It was named the Poison Tide Domain directly!

There were 1,080 points of Poison Tide Domain attributes. It was just enough for Wang Teng's enlightenment to reach the second-level actualization phase.

This was the benefit of collecting attributes. If Wang Teng had to comprehend it himself, even with his immortal-level poison talent and the activation of the Demon Lotus Poison Body it would take him a considerable amount of time to get started.

After all, the actualized domains were not easy to understand.

But with attribute collection, he could immediately get started and even reach the second level in one go.

In the future, when he tried to comprehend it on his own, it would be much easier.

Having a teacher to guide you is essential, but in the end, your practice depends on your efforts.

Collecting attributes was like having someone guide him into the door, although sometimes, he might be guided all the way to the end.

But the key was that Wang Teng could become stronger faster than others.

Anyway, when it came to poison domains, Wang Teng had already comprehended up to the fifth level in ordinary poison domains, but they couldn't compare to the second-level Poison Tide Domain.

Wang Teng believed that this second-level Poison Tide Domain in the actualization phase could almost compete with a fifth-level ordinary Poison Domain.

Based on his insights, the Poison Tide Domain was indeed very powerful.

Seeing the Poison Tide, he knew that the Poison Tide Domain would naturally be incredibly potent as well.

Wang Teng had tasted success and was vigorously searching for attribute bubbles while also trying to enhance the Poison Tide Domain by comprehending the domain power within the poison tide.

However, he soon realized that it was unlikely for the same area to produce attribute bubbles twice in a short period.

The insights obtained in the same area would overlap. For example, if Wang Teng continued to comprehend the same area where he had just found an attribute bubble, the insights he gained would be the same and serve no purpose.

So, Wang Teng had no choice but to continue moving deeper.

This was undoubtedly very dangerous, as no one knew what lay inside.

However, Wang Teng was skilled and fearless. With his Demon Lotus Poison Body and immortal-level poison talent, he was almost immune to most poisons, so he charged right in.

Chapter 1994: Entering The Poison Tide! Discovery! (5)

As he expected, the deeper he ventured into the poison tide, the less the poison affected him, and the higher the chances of encountering Poison Tide Domain attribute bubbles.

More and more Poison Tide Domain attribute bubbles appeared, and Wang Teng collected them all. His Poison Tide Domain was rapidly improving.

In no time, his Poison Tide Domain broke through to the third level of the actualization phase.

Poison Tide Domain: 120/3000 (third-level actualization phase)

This rate of improvement was indeed incredibly fast, almost like riding a high-speed train.

Wang Teng was advancing in what felt like a "bug mode."

With his Poison Tide Domain at the third level of the actualization phase, Wang Teng believed it could now rival a standard fifth-level Poison Domain.

He became increasingly excited, and his curiosity about the deeper areas of the mist grew. He was convinced that there must be more "treasures" waiting for him to explore.

Wang Teng's speed surged as he continued to ascend, turning into an arrow shooting upwards

He realized that the mist within the Poison Tide was incredibly thick, to an almost unimaginable degree.

He realized that the mist within the Poison Tide was incredibly thick, to an almost unimaginable degree.

If he kept ascending, he would soon approach the Scorpion King Star's atmosphere.

However, this was his perception, and he wasn't entirely sure if it matched the reality.

The poison tide had formed a unique space within, which might not correspond exactly with the outside world.

Bang!

Just at that moment, a breaking sound cut through the mist, causing the dense fog to roll violently.

Then, a dark figure burst through the fog and came hurtling toward Wang Teng.

Wang Teng's eyes narrowed slightly, and he let out a cold snort. He pointed forward, and the Golden Phoenix Feathers transformed into a golden divine phoenix that shot out.

Boom!

An explosion was heard.

The collision between the golden divine phoenix and the dark figure created intense waves of Forces that rolled in all directions, causing the mist to churn.

However, much to Wang Teng's surprise, the opponent did not die.

Gasp!

A screech rang out as the dark figure suddenly flashed and disappeared into the mist.

"A high-tier imperial-level star beast!" Wang Teng was surprised. Finally, after the Black Maned Python, he met another high-tier imperial-level star beast in this poison tide.

A high-tier imperial-level star beast was equivalent to a heaven-stage martial warrior. A mid-tier imperial-level star beast couldn't be compared to it.

"It seems to be a giant centipede," Wang Teng furrowed his brow, unable to see it clearly due to the high speed of the previous encounter.

Bang!

A sonic boom echoed as the dark figure reappeared in the mist to the left.

Wang Teng's eyes gleamed. He decided to meet it head-on without using the Phoenix Golden Feather Blades but relying solely on his physical strength. He charged towards it.

Boom!

With a powerful punch, he created a fist imprint.

At this moment, he had activated the Ancient God's Body, making his physical strength formidable, completely unafraid of the powerful physicality of the star beast!

Bang!

Wang Teng's fist seemed to land on an extremely hard metal, producing a dull sound, and a tremendous recoil force swept over him, causing him to fly back several hundred meters.

"So tough!" Wang Teng's eyes filled with astonishment.

The 3-star Ancient God's Body was absolutely invincible among the cosmos-stage martial warriors, even capable of competing with the average heaven-stage martial warrior.

But, in front of this high-tier imperial-level star beast, it seemed to fall short.

"It seems like my Ancient God Body needs further improvement. It's not enough now." Wang Teng shook his head, shook his fist, and silently chanted, "True Dragon Battle Physique!"

Boom!

The Emerald Glazed Flame surged out and quickly condensed on his body, forming lifelike dragon scales.

A scorching heat spread, filling the mist and causing it to roll violently, as if it had encountered a nemesis, producing a continuous hissing sound.

"Phew!" Wang Teng let out a breath, and the scorching aura distorted the surrounding space.

"Again!"

With a resounding shout, Wang Teng's figure turned into a blur and burst forward.

Gasp!

The black figure, seemingly having gained the upper hand from the previous collision, showed signs of arrogance. Its massive body swiftly appeared within the mist, abandoning its previous flanking tactics, and directly approached Wang Teng.

Indeed, it was a colossal centipede, with a black back and countless tiny legs beneath its belly, giving it a menacing appearance.

While moving, the myriad of legs worked in unison, granting the creature incredible speed.

Boom!

In a flash, Wang Teng appeared right in front of the massive centipede. He threw a punch at its head.

The power of his flaming fist condensed into a green fist imprint and came crashing down.

Gasp!

The enormous centipede didn't expect the sudden and terrifying increase in Wang Teng's physical strength. It bravely took his punch, letting out a pained screech as a result.

The punch forcibly sent the centipede's massive body into the thick mist. Wang Teng, moving like a shadow, pursued it, raining a flurry of punches upon it.

The massive centipede was caught off guard and continuously took blows, with the fist imprints landing all over its body, causing it to shriek in pain.

It twisted its body and wanted to break free from Wang Teng's pursuit.

The man and the beast continued to chase and fight their way deeper into the mist.

As they continued their fierce battle, Wang Teng realized that the centipede's exoskeleton was extremely tough. Even with his True Dragon Battle Physique activated, he couldn't deliver a decisive blow through sheer physical force alone. He decided it was time to unleash a powerful technique.

Hiss! Hiss! Hiss...

But at that moment, a series of hissing sounds echoed within the mist, sending shivers down his spine.

Wang Teng's expression changed drastically, and he hastily retreated.

Boom!

A mass of black liquid suddenly fell, landing precisely where Wang Teng had stood moments ago.

Sizzle...

Underneath this black liquid, the surrounding mist emitted sizzling sounds, as if being corroded. It was unbelievable.

The mist was already highly toxic, yet it was still corroded by this black liquid.

How poisonous was this black liquid?

Wang Teng's expression turned grave as he observed this scene. He then looked back at the centipede he had been fighting with earlier.

Beside the centipede, giant black shadows emerged from the mist, revealing even more high-level imperial-level centipede star-beasts.

These centipedes all looked similar, with green heads and black bodies, numerous legs, clearly belonging to the same species.

There was more than one centipede here!!!

The appearance of so many high-tier imperial-level star beasts was appalling.

Wang Teng's expression turned extremely serious as he carefully counted the giant centipedes. There were at least a dozen of them in this group.

Facing a single centipede was already daunting, and now, with so many of them gathered together, the countless legs on their undersides were truly hair-raising.

Hiss! Hiss! Hiss...

The centipedes were clearly not welcoming to Wang Teng, continuously hissing and warning him not to approach.

This situation puzzled Wang Teng, raising doubts in his mind.

What was wrong with these centipedes?

He suddenly thought of something and activated his Real Eye to look at the mist behind them.

In the next moment, his eyes lit up with intense radiance.

Buildings!

Deep within the mist, he could see extensive ancient buildings!

Chapter 1995: I'm Laughing At Your Naivety! (1)

Buildings!

Deep within the mist, there were ancient buildings!

And not just one building, but extensive structures with clear signs of age, suggesting a long and ancient history.

When Wang Teng noticed the unusual reaction of the centipede-like creatures earlier, he had a feeling that there was something peculiar about the source of the poison tide. That's what led him to use his Real Eye to investigate, and he was stunned by what he saw.

The complex of ancient buildings was vast, extending for an unknown distance, seemingly suspended above the mist, traveling with the poison tide.

It appeared that these structures would vanish when the poison tide receded.

Wang Teng gazed at the sight with a sense of wonder and a profound realization.

The buildings were incredibly ancient, bearing the marks of countless years, even through the shroud of mist.

He contemplated various possibilities, including the occurrence of large-scale poison tides approximately every 1,200 years. Could these ancient structures hold the key to understanding this phenomenon?

Was it a legacy?

Or something else?

If the large-scale poison tide were to disappear, would these ancient structures also vanish, returning to an unknown location, waiting for the next occurrence of the large-scale poison tide?

Hiss! Hiss! Hiss...

The hissing sounds of the centipede-like creatures around him brought Wang Teng's attention back to his immediate surroundings.

He took a deep breath, shifting his focus away from the ancient buildings and back to the group of centipede-like star beasts. His expression grew serious.

More than a dozen imperial-level star beasts guarded the area in front of the ancient buildings, and when Wang Teng had peered into the mist earlier, he sensed something uncomfortable within those structures.

That feeling wouldn't arise without reason. Although his Real Eye hadn't revealed any substantial danger, he was certain that some hidden risks existed inside.

his ancient building held unimaginable danger, and Wang Teng believed it was best to retreat.

Wang Teng's gaze flickered a few times. In the end, he chose to leave.

He realized that tackling this situation alone would be very challenging.

He must bring Elizabeth, Little White, the Metal Armor Flaming Scorpion, and even the Black Maned Python along.

These allies would provide significant assistance.

Without any hesitation, Wang Teng chose to retreat.

Time was of the essence, and he wasn't sure how long the ancient building would remain in place. If it disappeared, it would be a missed opportunity.

The centipede-like star beasts didn't pursue Wang Teng as he left, allowing him to depart. They emitted a few hissing sounds and then vanished into the mist.

Wang Teng headed back to Rui Snake City.

Elizabeth, Little White, and the Metal Armor Flaming Scorpion didn't go far. When they sensed Wang Teng's return, they returned immediately.

After a long battle, they were all feeling fatigued and needed rest to recover.

"I'm so tired!"

The Metal Armor Flaming Scorpion said with a weary tone, its long scorpion tail drooping with exhaustion. It seemed they had all worked hard.

"Catch!" Wang Teng was satisfied. He took out a recovery pill.

"Wow!"

The Metal Armor Flaming Scorpion's eyes lit up, and it immediately opened its mouth, swallowing the tiny pill that was barely large enough to get stuck between its teeth.

An intense energy wave erupted from its body, revitalizing its spirit.

"Caw... thank you, master!"

The Metal Armor Flaming Scorpion laughed like a crow and came forward.

Wang Teng didn't pay much attention to the thick-skinned creature and moved on to Little White, who had its head drooping. He took out another recovery pill and placed it in his hand, offering it to Little White.

Little White first affectionately nuzzled Wang Teng's hand, and then it opened its mouth to ingest the pill.

For creatures of their size, Wang Teng appeared rather small, which made their every move cautious to avoid accidentally injuring him.

In truth, it wasn't necessary to be so cautious. Wang Teng's physique was incredibly strong, and even if they attacked, they probably couldn't harm him.

Wang Teng then turned to Elizabeth and the Black Maned Python, tossing them pills to consume.

How extravagant!

Bulk distribution of pills!

Then, he scanned with his spiritual power, extending it through the mist to collect all the attribute bubbles that were released when Little White and the others killed the star beasts.

Poison Constellation Force*300

Blank Attribute*300

Poison Constellation Force*400

Blank Attribute*900

Poison Tide Domain*200

Poison Constellation Force*600

...

One by one, the attribute bubbles merged into Wang Teng's body and mind, some directly becoming the constellation Poison Force while others turned into insights.

Wang Teng's constellation Poison Force increased exponentially.

Although the attribute values of those bubbles weren't individually substantial, their sheer quantity made for a significant increase in attribute values.

Boom!

In an instant, Wang Teng broke through again.

His constellation Poison Force rose from the sixth-level cosmos stage to the seventh level!

This speed was simply beyond words.

In just two to three hours inside the mist, Wang Teng had broken through two levels, advancing from the fifth to the seventh level.

If it were anyone else, they couldn't even dare to imagine it.

Poison Constellation Force: 800/70000 (cosmos stage seventh level)

However, this was just a small breakthrough. Wang Teng was lucky. 800 points of attributes allowed him to advance to the seventh level and enter another realm.

The Poison Tide Domain attribute had increased too. However, Wang Teng had just raised it to the third level of the actualization phase. He hadn't reached the requirements for a breakthrough yet.

Poison Tide Domain: 600/3000 (third-level actualization phase)

Wang Teng glanced at it and stopped paying attention to it. His gaze then turned to the Blank Attribute.

Blank Attribute: 3686000

Awesome!

His blank attributes had indeed surged by several thousand points, which was quite a good harvest.

Afterward, Wang Teng summoned Little White and the others back into the Space Fragment. Then, he took out the array token and activated a portal to enter the array.

Chapter 1996: I'm Laughing At Your Naivety! (2)

Several poison-element star beasts nearby attempted to take advantage of the situation and enter the portal, but Wang Teng gave them a swift slap to deter them.

Raging Gale Palm!

The star beasts exploded and turned into bloody mist.

The rift in the array quickly returned to its original state.

Inside the array, Marong and others arrived upon hearing the news and stared at Wang Teng in astonishment.

He went deep into the poison tide for two to three hours and came back unscathed. This ability was astonishing.

"Mister Wang Teng, are you alright?" Marong sized up Wang Teng and asked.

"Do I look like something's wrong?" Wang Teng retorted with a smile.

"Well... not at all," Maron admitted, realizing that Wang Teng seemed perfectly fine.

"Where is the Queen?" Wang Teng asked, scanning the area for the presence of the queen but he didn't see her.

"Her Majesty is resting in the palace," Marong replied.

"Take me to her. I have some matters to discuss," Wang Teng requested.

"Alright!" Marong nodded and led the way, flying towards the palace.

In the present, he had placed Wang Teng on a level equal to that of the queen, and therefore, he didn't dare to show any negligence.

As they flew, the snakemen martial warriors in the vicinity cast awed glances at Wang Teng.

Before long, Wang Teng returned to the palace and met with the queen.

She was lounging on her throne, resembling a seductive snakewoman, exuding a unique charm.

Sensing Wang Teng's arrival, she slowly opened her slanted and beautiful eyes, radiating a glint of interest. She gracefully rose from her seat, her serpentine tail swaying as she welcomed him.

She had fully absorbed the effects of the pill Wang Teng had given her and had nearly fully recovered. She was now ready to maintain the array for an extended period.

However, she knew that the energy he had infused would keep the formation running for a long time, and there was no hurry.

The external poison tide was expected to last for three to five days, and she was prepared for a protracted battle.

Seeing Wang Teng's return, she received him with great respect.

This was because she had a very clear understanding of the effects of that pill.

This type of pill could quickly restore her own Force, which was not something that ordinary pills could compare to.

Anyone who could casually produce such a pill must have an extraordinary background.

In her eyes, this extraterrestrial human not only possessed great strength but also likely held a respectable status within his people.

Most importantly, Wang Teng showed goodwill towards them, unlike other extraterrestrial humans who often looked down on their indigenous culture.

This was undoubtedly an excellent opportunity!

"How are you recovering?" Wang Teng inquired.

"Thanks to your pill, my Force has fully recovered, but my bloodline power will still take some time," the queen calmly responded.

Wang Teng nodded, as he knew he couldn't help with the bloodline power. Transferring it to her would not be possible.

It wouldn't be easy for him to recover his bloodline power.

"You ventured into the depths of the poison tide. Did you discover anything interesting?" the queen asked.

"Yes, I found something intriguing," Wang Teng replied, surprised that she had picked up on it. He decided not to conceal anything and explained what had happened.

"An ancient structure!" The queen's eyes displayed astonishment. This was entirely unexpected to her.

She had originally thought that something terrifying might exist deep within the poison tide, which was why he was forced to come back. However, she was surprised to hear about the ancient structure.

"Indeed, I suspect there might be a legacy inside," Wang Teng mused, stroking his chin. He asked, "Do your ancient texts contain any relevant records?"

The queen fell silent for a moment, her eyes showing a hint of embarrassment. She responded, "I'll need to have someone check on it!"

Wang Teng looked at her oddly. He had a feeling that this queen might not have been the best student in the past.

She didn't seem to know much about various topics.

However, he didn't expose her and instead nodded, telling her to inform him once they had checked everything.

Leaving the royal palace, Wang Teng floated in the sky above Rui Snake City, closed his eyes, and focused on his inner thoughts while waiting for the results.

As time passed, over an hour had gone by.

Still, he hadn't received any news. However, he suddenly sensed a commotion on the right side of the sky above Rui Snake City.

Many snakemen martial warriors were gathered there, indicating that something unusual had happened.

Wang Teng furrowed his brows.

At that moment, Marong flew over urgently, and his expression appeared somewhat unpleasant. He quickly reached Wang Teng and hesitantly said, "Mister Wang Teng, there are a few extraterrestrial humans outside the formation. They want to enter the city. May I please ask you to go and see if you know them?"

For him to say these words, it was a favor to Wang Teng. In normal circumstances, they wouldn't even consider letting extraterrestrial humans inside.

No, they wouldn't even consider it.

They would just leave them to their own devices outside.

"Extraterrestrial humans!" Wang Teng was stunned for a moment. Then, he nodded and flew over with Marong.

The direction was toward the city gate, and outside the formation's light screen stood a group of people who looked extremely distressed. They were desperately resisting the poison tide that surrounded them from all sides.

The poison tide not only saturated the sky but also covered the ground with poisonous fog and various venomous star beasts. Even though these individuals were on the ground, they were still subjected to the onslaught of the poison tide.

These unfortunate individuals had encountered the poison tide on their way and had been running for their lives. Even when they took shelter in the mountains, they couldn't withstand the tide. They were ultimately forced to come here, where they saw the protective formation around Rui Snake City. This sight filled them with great excitement.

Chapter 1997: I'm Laughing At Your Naivety! (3)

"Open the array and let us in!"

The leader among them had a proud expression and shouted at the snakemen residents of the city as if giving them orders.

They were mostly heaven-stage martial warriors and were from the Stellar Academies, which gave them a sense of superiority on this planet.

In their eyes, the Scorpion King Star was just a mission planet, and the natives were like livestock enclosed in a pen.

They saw themselves as the masters.

In their perspective, would they humbly seek help from a lowly animal, even if they were in danger?

Clearly not. They would naturally expect the native inhabitants to assist them.

This attitude reflected the essence of human nature.

The queen had also appeared and watched the extraterrestrial humans from the city. She frowned at their arrogance.

These extraterrestrial humans were just like the others, continuing to see themselves as superior to the natives.

She shouldn't trust the other extraterrestrial humans just because of Wang Teng.

They were different!

The other snakemen martial warriors displayed anger on their faces. They had very little tolerance for extraterrestrial humans other than Wang Teng.

If these extraterrestrial humans had approached them with politeness and respect, the situation might have been different.

However, now they were in a vulnerable position, asking for assistance, but they still carried themselves with a sense of superiority. This naturally irritated the snakemen.

"Outrageous! If you don't open the array, we will destroy it!" Another heaven-stage martial warrior, infuriated by the snakemen's attitude, shouted defiantly.

They believed their strength was substantial enough to break through the formation if the snakemen did not comply.

The snakemen queen's expression changed slightly.

She could tell that most of these people had reached the heaven stage. If they insisted on breaking through the array, the defensive barrier might not hold up against their combined power.

The primary function of the formation was endurance, but it had a limited maximum capacity for withstanding external forces. If several heaven-stage martial warriors were to attack simultaneously, the resulting damage could potentially breach the formation within a short period.

However, their words and the disdainful attitude they displayed stirred the queen's anger.

"Hmph!"

A cold snort escaped her lips, her expression turning icy, even a hint of murderous intent flickering as she stared at the extraterrestrial humans.

She didn't understand.

They were all extraterrestrial humans. Why was the difference so huge?

If these extraterrestrial humans could treat them as equals, the situation might have been different, and they wouldn't mind opening the array.

At that moment, Wang Teng arrived, flying alongside Marong, and overheard the remark.

He landed next to the queen, nodded to her, and then shifted his gaze towards the extraterrestrial humans.

"Huh?"

When he saw the faces of the people outside clearly, a hint of surprise crossed his eyes.

He recognized these individuals, but it was not from personal acquaintance.

They had merely met before.

As Wang Teng arrived, it became apparent that those people also recognized him, as they all involuntarily paused for a moment.

"Wang Teng!"

The leader cried out in surprise.

This was the leader of Feng Mo's team, Wan Dong, whom Wang Teng encountered on his way here.

Feng Mo was also in the crowd, staring at Wang Teng behind the array, appearing somewhat bewildered.

Boom!

But there was no time for further thoughts, as the nearby star beasts charged at them, leaving him in a state of disarray.

Swoosh!

The poisonous star beast's claw cut across his shoulder, leaving a deep bloody gash with green-tinged blood splattering out.

The blood was bright red, but when it met the Force of a poison-element star beast, it immediately turned green.

Feng Mo's expression changed. Despite his poison-element abilities, he found himself struggling against the various poisons within the poisonous tide.

He quickly raised the sword in his hand, scraping off the poisoned flesh, and then took out an antidote pill to suppress the proliferate of the poison.

After taking these measures, his complexion became even more unsightly.

Throughout this journey, Feng Mo encountered numerous poisonous star beasts, and the constant battles depleted his constellation Force. If it weren't for the support of his antidote pills, he wouldn't have made it this far.

Feng Mo was the weakest member of the team, and in comparison to the heaven-stage martial warriors, he was indeed quite feeble.

In normal circumstances, when they faced danger, the other team members would lend a helping hand, considering their shared teamwork. However, in this current situation, everyone was preoccupied with their survival, making it difficult for them to assist him.

Despite this, others had saved him twice during their journey, allowing him to survive until now.

But compared to the rest of the team, he was the most battered.

This contrasting situation between Feng Mo and Wang Teng was quite apparent. While Feng Mo struggled on the outside of the formation, Wang Teng remained unscathed inside. This contrast made Feng Mo feel somewhat inadequate.

The expressions of the snakemen queen and the others changed when they heard Wang Teng's name.

Did they know each other?

The snakemen queen looked at Wang Teng vigilantly.

They had never trusted the extraterrestrial humans. Wang Teng was the first extraterrestrial human to gain their trust in all these years.

However, this trust seemed to waver slightly now.

Wang Teng, on the other hand, as if oblivious to the change in the queen's and her subjects' expressions, greeted Wan Dong with a cheerful smile. "Ah, isn't this... someone I know?"

"Wang Teng, both of us are from the Stellar Academies. Let us in," Wan Dong's look shifted as he spoke in a determined tone.

"You're my seniors so I should allowed you in. However, I'm in no situation to make such decisions. I'm just a guest here," Wang Teng replied regretfully, shaking his head.

e6173b1f43f7bd41e59c75ef8c0810faea51895a6cba4d548dd02bf9d3a634468653d30f0fe60e5e7ae29e5c8206baa19efe9e1f5fbd1da1319f53b0e742093171eb4b9fc44a87d3474f4f3a7a010fd7

Chapter 1998: I'm Laughing At Your Naivety! (4)

"That group of snakemen is nothing more than natives. If you ask, I refuse to believe they won't open the formation," Wan Dong squinted his eyes and spoke in a cold tone.

"Are you opening it?" Wang Teng turned to the queen and asked.

The queen had caught on to what was happening and said coldly, "The Rui Snake City does not welcome them."

"You see, you're quite unlucky. They don't welcome you," Wang Teng replied.

"Wang Teng, do you want to be our enemy?" Wan Dong's face turned extremely unsightly as he glared at Wang Teng.

"Do you want to be my enemy?" Wang Teng's expression changed, his demeanor growing cold as he stared at them.

"How dare you!"

"Wang Teng, who do you think you are!"

...

The people behind Wan Dong were becoming annoyed by the encroaching star beasts, and they erupted in anger when they heard Wang Teng's words.

Wang Teng remained unfazed, simply looking at them with a calm demeanor as if he were observing a group of clowns.

"Wang Teng, I admit that you have talent, and being a Star Ranking genius does sound impressive, but don't think too highly of yourself. Without growth, even the most talented individual amounts to nothing. Today, you don't understand the importance of respecting your seniors. I can teach you," Wan Dong glared at Wang Teng coldly, and his eyes emitted a dangerous gleam.

The atmosphere suddenly became tense.

Everything was ready for war!

The people behind Wan Dong were also glaring at Wang Teng with cold expressions, seemingly ready to act upon his command.

The queen and her subordinates had serious expressions and remained cautious.

However, they felt a strange sense of relief when they saw that Wang Teng and the others were not in agreement.

To them, concepts like the Stellar Academies and Star Ranking prodigies were beyond their comprehension and not worth understanding. They only knew that as long as Wang Teng wasn't with the other group, he was still their friend.

"Hahaha..." Wang Teng laughed. "Hahaha..." Wang Teng suddenly burst into laughter.

The queen and the others were taken aback, staring at Wang Teng in confusion. They couldn't understand why he was laughing at a time like this.

What was so funny about what the person said just now?

"What are you giggling at?" Wan Dong sensed the mockery in Wang Teng's laughter and became extremely displeased. He asked with a cold tone.

"Laughing at your naivety!" Wang Teng glanced at them and continued, "Just because you are older doesn't mean you can act arrogantly."

"Do you think being older grants you honor?"

"You've been practicing for countless years and are still at the heaven stage. It's quite embarrassing, and you dare to come here and act arrogantly?"

"A bunch of nothings."

"Teaching me to respect seniority? Who do you think you are?"

These words caused Wan Dong's face to turn red, then black, and finally, a shade of green.

His facial expression changed three times in an instant, which was quite a spectacle!

The people behind him wore equally unpleasant expressions. It was the first time they had been so blatantly ridiculed about their senior status.

Their past experience with junior members had always involved respect and deference to the seniority hierarchy, which had created a certain expectation that junior members should respect their seniors.

Moreover, their strength was indeed superior to that of new students, which naturally deterred the new students from provoking them.

But now, Wang Teng didn't even consider them a threat.

Even when facing a group of heaven-stage individuals, Wang Teng continued to berate them. His audacity was beyond what a normal person would have.

Feng Mo was left stunned. Even he couldn't help but feel a certain level of admiration for Wang Teng.

He dared to scold the senior students. Was he overestimating himself?

Wasn't he afraid the seniors would force their way in?

A group of heaven-stage martial warriors was no joke, and it was doubtful that the barrier could hold them back.

Even though Feng Mo considered himself a genius, he couldn't help but tone down his arrogance in the presence of the senior students, respecting the pecking order.

So why did Wang Teng act so arrogantly?

Feng Mo didn't understand.

On the other side, the queen and the others looked at Wang Teng with strange expressions. They noticed that this guy's skill at insulting people didn't seem much weaker than his strength.

What a sharp tongue!

"Ahem," Wang Teng cleared his throat and said, "Don't look at me like that. I'm not very familiar with them."

"We can see that," the queen nodded.

"Glad you can see that. It saves me from being thrown out with them later," Wang Teng remarked.

The queen didn't know whether to laugh or cry. This guy was indeed different from most other extraterrestrial humans.

He had his pride, but it wasn't the condescending type of pride towards the natives. It was a deep-seated self-confidence and pride that made him unafraid even when facing stronger individuals.

She had never encountered such a person.

Those extraterrestrial humans might appear proud, but they didn't have his kind of unwavering conviction. When they met someone stronger than themselves, they would bow and submit.

Their so-called arrogance only earned contempt from others.

"Wang Teng, you're looking for death!"

Wan Dong, annoyed and humiliated, yelled at the people behind him, "Break the formation for me!"

The group of people fought to fend off the surrounding star beasts and gathered together, getting ready to launch an attack on the array.

"Since you want to fight, I'll play with you!"

Wang Teng sneered and suddenly dashed out of the array. He held the array token in his hand, permitting him to pass through the barrier unhindered.

"Hahaha, fool! You dare to run out!" Wan Dong chuckled triumphantly, leaving his companions behind and charging directly at Wang Teng.

Initially, he wanted to shatter the array first, but when he saw Wang Teng running out on his own, his resentment towards Wang Teng placed catching him as the top priority.

"Earth Dragon Claw!"

A fierce call escaped his lips.

Chapter 1999: I'm Laughing At Your Naivety! (5)

His body unleashed a surge of constellation Earth Force, which coalesced into a massive earthy-yellow claw in mid-air. It viciously swiped toward Wang Teng.

Wang Teng's eyes flashed with determination as he let out a cold snort and fearlessly countered the attack. In the face of a heaven-stage martial warrior, he showed no signs of holding back.

Ancient God's Body, activated!

True Dragon Battle Physique, activate!

The Emerald Glazed Flame swept out and turned into flames. Wang Teng stepped out of the sea of fire and released his fist along with the flames.

Five-element fist!

The flames congregated into a fist imprint and smashed out with the terrifying physical strength of these two powerful physiques.

Boom!

The surrounding space collapsed, producing deafening noises.

This display of power caused a slight change in Wan Dong's expression, but his attack had already been unleashed, and it was too late to change tactics.

Bang!

Wang Teng's fist imprint formed by the green flame clashed violently with Wan Dong's sharp yellow claw, creating a tremendous and intense collision.

Crack!

A crisp sound rang out, and the seemingly sturdy and thick earthy yellow claw displayed cracks under Wang Teng's fist imprint.

In the next moment, the gigantic earthy yellow claw explosively shattered with a resounding "boom."

Wan Dong's expression changed once again. The scorching heat and immense power surged directly toward him.

He stumbled back ten steps before managing to halt his movement, his eyes filled with disbelief as he stared at Wang Teng as if he had seen a ghost.

The faces of the people behind Wan Dong were also filled with astonishment, clearly taken aback by Wang Teng's sudden burst of power.

Feng Mo wore an incredulous expression, finding it hard to believe what he had just witnessed.

What did he see?

The fact that Wang Teng had directly clashed with their team leader and gained the upper hand left them all in disbelief.

Wan Dong had been chosen as their team leader due to his superior strength, having reached the fourth level of heaven stage.

Wang Teng, on the other hand, was only at the cosmos stage. Yet he had forcefully pushed Wan Dong back.

It was unbelievable.

They were both freshmen. How could the difference be so huge?

This encounter had severely shaken his confidence.

The queen was well aware that Wang Teng's strength far surpassed the cosmos stage. He had even defeated a heaven-stage opponent in the past. Therefore, she had no concerns about his ability to overcome their current opponents.

However, the opposing group had more members, with seven heaven-stage martial warriors and another cosmos-stage martial warrior, who seemed to be the easiest to deal with.

So, she also charged out of the array, standing side by side with Wang Teng, gazing coldly at Wan Dong and his group.

Wang Teng gave the queen a nod, and without any hesitation, he capitalized on his advantage and struck out with another punch towards Wan Dong.

"Bastard!"

Wan Dong felt insulted. He was being suppressed by a cosmos-stage martial warrior and the other party was even chasing and hitting him. This was a great humiliation.

Boom!

His eyes gleamed with a cold light, filled with resentment. The constellation Earth Force in his body erupted.

"I don't believe that a cosmos-stage martial warrior like you can contend with me!"

Wan Dong snorted. His constellation Earth Force condensed into a fist imprint and he released a powerful punch.

As he launched the attack, the illusion of a mountain appeared behind him.

"Seven Mountains Crumbling Fist!"

Wan Dong roared, and the punch, along with the illusion of the mountain, descended upon Wang Teng.

"Hmm?" Wang Teng's gaze narrowed as he felt a different kind of power within this punch.

However, he remained fearless and used his Five-Element Fist to confront it.

Boom!

The two punches collided fiercely, creating a thunderous explosion. It seemed like they were locked in a standstill, unable to overpower each other.

However, at that moment, the mountainous illusion behind the yellow fist imprint suddenly released a tremendous burst of power, crashing down forcefully.

Bang!

The fist imprint condensed by Wang Teng showed signs of collapse as cracks began to appear, and in no time, it shattered, dissipating into countless flames.

Following that, the illusory mountain continued to press down towards Wang Teng.

"Hahaha." Wan Dong burst out laughing when he saw this scene. "Do you think you can resist my Mountain Cleaver Power with your fist imprints?"

Wang Teng's expression changed slightly. This time, he felt the unique power more distinctly.

"Mountain Cleaver Power?"

Without much thought, the power approached him, and Wang Teng swiftly threw out three consecutive punches, striking the illusory mountain head-on.

Boom, boom, boom...

Under the explosion of the fist imprints, their attacks shattered, unleashing shockwaves that swept in all directions.

Wang Teng was pushed back by the force.

The Mountain-Crushing Conscious tried to invade his physical body, but his body, strengthened by the overlapping of two physiques, had become incredibly robust, to an almost superhuman degree.

Especially the fourth-rank True Dragon Battle Physique (pseudo), which was genuinely capable of withstanding attacks from heaven-stage opponents.

Ultimately, he successfully dissipated the force.

However, Wang Teng's brief contact with that power triggered something in his mind.

Suddenly, a thought flashed through Wang Teng's mind.

Mountain Cleaver!

Star Cleaver!

He suddenly remembered the battleaxes he received in the Olant Federation. It was called the Star Cleaver Battleaxe, and it contained the Star Cleaver Ultima.

The Star Cleaver Ultima was similar to the Mountain Cleaver Power.

However, the Star Cleaver Ultima he had comprehended back then was quite different from the Mountain Cleaver Power displayed by Wan Dong at this moment. Wan Dong, as a heaven-stage martial warrior, had a profound understanding of the Mountain Cleaver Power that was beyond what an ordinary person could compare with.

Chapter 2000: The Hundred Thousand Talented Martial Warriors In My Constellation Society... (1)

This Mountain Cleaver Power is interesting!

But, it's not as good as my Star Cleaver Ultima!

Wang Teng's eyes were filled with a gleam of excitement. The Star Cleaver Ultima he had previously comprehended resurfaced in his mind.

However, he had only grasped the second level of this ultima, which was far from Wan Dong's profound understanding of the Mountain Cleaver Power.

If he could raise the Star Cleaver Ultima, Wang Teng would be able to use this power to suppress his opponent.

Initially, he had underestimated this Star Cleaver Ultima and hadn't paid much attention to it. However, after witnessing Wan Dong's Mountain Cleaver Power, he suddenly realized that this kind of power was by no means ordinary.

He scanned his surroundings and picked up the attribute bubbles Wan Dong dropped.

Normally, he would wait until the end of the battle to collect attribute bubbles.

But, he was particularly interested in finding out if any of them contained insights into the Mountain Cleaver Power

Constellation Force (Earth)*3000

Earth Dragon Claw*1200

Seven Mountains Crumbling Fist*1500

Mountain Cleaver Ultima*300 (tenth-level)

...

3,000 points of the constellation Earth Force entered Wang Teng's body directly. His constellation Earth Force rose a little.

Constellation Earth Force: 25700/30000 (cosmos stage third level)

Then, there were the two battle techniques.

One was a heaven-stage battle technique——Earth Dragon Claw!

Wang Teng had already experienced the power of this Earth Dragon Claw, and it was not bad.

When facing martial warriors of the same stage, this battle technique had an advantage.

Moreover, it was an earth-element claw technique, which was a skill he didn't have before, so it could fill a gap in his abilities.

In his mind, a vivid image appeared. A claw formed from the constellation Earth Force suddenly manifested, resembling a dragon's claw. It was incredibly sharp but carried a profound sense of weight. He fiercely clawed forward.

Boom!

With a single swipe, it left a deep claw mark on the ground, showcasing its impressive power.

Earth Dragon Claw (heaven stage): 200/3000 (well-versed)

1,200 points of attributes allowed Wang Teng to raise this battle technique to the well-versed stage.

The other battle technique was more powerful than the Earth Dragon Claw. It was a battle technique at the peak of the universe stage.

Seven Mountains Crumbling Fist!

Wang Teng found it incredibly appealing. He had witnessed its strength when used by Wan Dong, and now he directly picked up this technique.

A vivid image suddenly appeared in Wang Teng's mind.

He could visualize the gathering of the fist imprint, summoning seven mountainous virtual shadows from the void. These shadowy mountains were incredibly mystical, resembling actual mountain peaks, and exuding a majestic and imposing aura.

Boom!

The fist imprint traversed the sky, and the seven mountainous virtual shadows descended with it as if the heavens were collapsing and the earth was shattering, displaying an extreme and terrifying power.

This was the true might of the Seven Mountains Crumbling Fist.

Such an attack was something ordinary martial artists could hardly withstand.

"The seven mountainous virtual shadows!" Wang Teng's eyes sparkled with curiosity. Wan Dong had only displayed a single virtual mountain shadow with his fist imprint earlier, indicating that he had much room for improvement.

Wang Teng wondered how many mountainous virtual shadows Wan Dong could ultimately summon.

It left him curious.

The other party was a heaven-stage martial warrior. It was unlikely that he could only command a single virtual mountain shadow!

Wang Teng looked at his characteristics board.

Seven Mountains Crumbling Fist (universe stage): 500/5000 (well-versed)

Wang Teng's grasp of the Seven Mountains Crumbling Fist had reached the well-versed stage. He could conjure two mountain shadows.

At this point, he had a realization.

To condense seven mountain shadows, he needed to master it to a perfected stage.

Additionally, he needed to incorporate the essence of the attack to genuinely manifest the mountain shadows; otherwise, it would just be superficial, a hollow form.

Wang Teng looked at the last attribute bubble.

Mountain Cleaver Ultima!

As expected, it was the Mountain Cleaver Ultima!

What's more, it was the tenth-level Mountain Cleaver Ultima!

The deep understanding immediately merged into Wang Teng's mind, rapidly elevating his comprehension of this Mountain Cleaver Ultima to the tenth level.

Enlightenment flowed into Wang Teng's mind.

Learning from the experiences of others is a way to master new skills.

Mountain Cleaver is about crushing mountains.

Star Cleaver is about crushing stars.

The Star Cleaver Ultima was originally derived from the Mountain Cleaver Ultima. Now, with his new enlightenment, he could transform the tenth-level Mountain Cleaver Ultima too!

Mind you, his Enlightenment was at the universe realm, and his earth talent had reached the divine level. With such talent, he could relatively easily transform the insights of an ultima.

Even if it required some time, he could erase the time difference through the use of blank attribute points.

On the other hand, as Wang Teng absorbed the attribute bubbles, Wan Dong was stunned to see that Wang Teng had withstood his Mountain Cleaver Power, and disbelief filled his eyes.

"Impossible!"

At first, he thought that he could suppress Wang Teng with his proudest power, but in the end, Wang Teng managed to resist it.

This outcome was truly unacceptable to him!

Was Wang Teng really a cosmos-stage martial warrior?

This question loomed in his mind, making his expression even more unpleasant.

Roar!

Within the poison tide, the poison-element celestial body beasts once again charged towards the group. The weaker star beasts didn't dare to get too close, but the mid-tier imperial-level star beasts weren't afraid at all.

"Get lost!"

Wan Dong, impatient and with cold determination in his eyes, slammed his palm down, killing one of the mid-tier imperial-level celestial body beasts.

However, more and more poison-element celestial body beasts were advancing, and with the poison mist surrounding them, they had to keep their guard up and couldn't afford to be distracted.

Wan Dong's face showed signs of anxiety. They had been battling their way to this point, and their resources were already heavily depleted. They couldn't afford to be delayed any further.

"Break the array!"
