

## **Complete Martial Arts Attributes**

### **- Chapter 2180: Legacy In The Grand Universe Hall! (2)**

#### **Chapter 2180: Legacy In The Grand Universe Hall! (2)**

With these thoughts, Wang Teng felt much more balanced.

Moreover, it seemed that the president wouldn't trouble him for choosing another master.

Wang Teng breathed a sigh of relief and couldn't help but ask curiously, "President, do you know who my master is?"

He was quite curious about his master's identity. Unfortunately, his master loved to play mysterious and wouldn't tell him. It was really annoying.

"Since he didn't tell you, I can't say much. I can only say that he has an inseparable connection with our Stellar Academies." The president paced with his hands behind his back and said slowly, "When the Seven Stellar Academies recruit disciples, we can all use Seven Stellar Academies. The students who enter Seven Stellar Academies undergo the academy's assessment, but they also face another assessment, which no one knows about. However, it's clear that you've passed it."

Assessment? Could it be deciphering Spiritual Hollow Mountain? Or reaching the summit? Wang Teng was a bit curious, speculating in his mind.

"Let me see the token in your hand," The president said.

Wang Teng regained his senses and passed the token to the president.

After receiving the token, the president carefully examined it in his hand, his expression becoming more complex.

For a token to make a god-stage existence, especially the president of the Stellar Academies, to show such a complex expression, indicated that the token was truly extraordinary.

Wang Teng hadn't taken a close look at the token since he got it.

At this moment, his gaze also fell on the token. The token was entirely purple, adorned with peculiar patterns. The engravings were mysterious, and the token bore no words. Whether on the front or back, it appeared the same, making it impossible to distinguish between the two sides.

"Indeed, it is him," the dean murmured, returning the token to Wang Teng. "Keep it safe. Don't lose it. Being able to have that existence as your master is your destiny."

The two true god-stage beings exchanged a glance, hesitant to speak. The disciple they had set their eyes on seemed to have disappeared.

It was regrettable and frustrating.

They had high hopes for Wang Teng. His talent was undoubtedly the highest among the geniuses they had seen in years, surpassing all others.

Unfortunately, such a genius was now beyond their reach.

Wang Teng was unaware of the thoughts of the three god-stage figures. He simply nodded and pocketed the token.

Without the need for the others to explain, he understood the critical importance of the token.

Now that he had no idea where his master was, he could only rely on this token to maintain his identity.

Judging by the demeanor of the president and the others, it was evident that his master was an influential figure.

So, holding onto this token was paramount.

Also, when he left, his master seemed to have said...

He was taken in as a direct disciple?

Originally, he was just a disciple-in-name, with the possibility of having his status revoked at any time. How did it suddenly change to becoming a direct disciple?

Was it because of the Chaos Constellation Scripture?

Wang Teng's expression was somewhat peculiar. Did his master, after discussing with him for ten days and nights, finally succumb to his talent? Thus, he directly upgraded him from a disciple-in-name to a direct disciple.

This unexpected change in treatment caught him off guard.

Nevertheless, it was a good thing. At least, he was now firmly holding onto this powerful thigh. Unfortunately, he still didn't know his master's name, so he couldn't use his master's identity to act recklessly.

Speaking of which, could his master be preventing him from doing so by not revealing his name?

"For so many years, that person has never taken a disciple before," the president sighed.

"Never? Were there no others who entered that mountain before?" Wang Teng asked curiously.

"At least, no one within our Seven Stellar Academies has ever entered," the president asserted.

"No one has entered before? It doesn't seem very difficult!" Wang Teng was surprised. He entered that mountain without even understanding what was going on.

The president and the other two god-stage martial warriors were speechless.

This kid had quite the audacity.

If it wasn't difficult, why would no one have entered for so many years?

That was all the geniuses from the Seven Stellar Academies over the years, including those with astonishing talents that amazed the entire universe. However, without exception, none of them could gain recognition to enter that mountain. This indicated the immense difficulty involved.

However, they couldn't refute it because Wang Teng had indeed entered that mountain and successfully become a disciple.

Of course, they wouldn't argue with a junior over such matters.

"President, can I still seek another master?" Wang Teng asked, his eyes twinkling.

"You still want to find another master?" The president was caught between laughter and tears.

"Well, my master isn't around, so can't I find another mentor who can guide me in his absence?" Wang Teng casually remarked.

The two god-stage martial warriors were speechless again. Their expressions turned strange.

If they had such a disciple who, immediately after becoming a disciple, turned around and sought another master, they might consider slapping this rebellious disciple on the spot.

"Is it not allowed?" Wang Teng asked.

"Forget about it. If your master finds out about this, he might kick you out."

"No."

"He might slap you to death."

The president glanced at Wang Teng and said.

"In the future, you can continue to cultivate at the Stellar Academies as usual. If there's anything you don't understand, you can seek guidance from the academy's instructors. I'll make sure they provide you with all the assistance and guidance you need."

## **Chapter 2181: Legacy In The Grand Universe Hall! (3)**

"Really?" Wang Teng's eyes lit up.

He had never intended to seek another master. This was just a ploy to gain some advantages. Unexpectedly, it turned into a pleasant surprise.

"Good lad, you dare to trick me." The president also realized this clever student had outfoxed him. He pointed at Wang Teng, chuckling and shaking his head.

The two true god-stage beings also found it amusing. They increasingly felt that Wang Teng was to their liking

Unfortunately, this outstanding disciple had been taken away, and they couldn't get him back. It was truly frustrating.

"I'm speaking the truth. I didn't trick you." Wang Teng chuckled. "Also, I'm a student of Stellar Academies. With my talent, if it goes to waste, don't you think it would be a pity?"

"You little kid, now you're praising yourself." The president couldn't help but laugh.

"President, mark my words. Today, I take pride in being a member of the Seventh Stellar Academy. In the future, I will make sure the academy takes pride in having me." Wang Teng declared solemnly.

"Alright, I'll remember your words. I want to see how you make the academy proud." The president looked at him deeply.

Although he had said similar things to all new students on the plaza of the Grand Universe Hall, his requirements for Wang Teng were different now.

Making the Stellar Academies genuinely proud of a student was no easy task.

Wang Teng didn't say much. He had enough confidence in himself. As long as he became powerful enough, everything would fall into place.

"Well, you don't need to worry. What I said earlier still stands," the president reassured him.

"Thank you." Wang Teng expressed his gratitude.

"No need to thank me. Consider this your reward for reaching the summit of the Spiritual Hollow Mountain." The president grinned like an old fox.

"Ah..." Wang Teng opened his mouth, feeling a bit speechless.

Did he gain or lose in the end?

The president, amused by his embarrassed expression, suddenly asked, "Do you know where you are?"

Wang Teng smiled bitterly in his heart, returned to reality, and hesitated before saying, "The Grand Universe Hall?"

"Yes, this is the Grand Universe Hall." The president nodded and said, "The Grand Universe Hall is our Seven Stellar Academies' most important legacy ground. Since I brought you in, it's not just a random place to chat."

"Legacy ground!" Wang Teng was stunned. The Grand Universe Hall turned out to be a legacy ground. A gleam of light flashed in his eyes. Did the president bring him here for...

"This is the mystery reward I'm giving you." The president chuckled.

Wang Teng's eyes instantly lit up, and he hurriedly said, "President, from now on, you are the person I most admire in this Stellar Academy, the guiding light on my life's path."

"Stop buttering me up." The president couldn't help but shake his head with a wry smile.

"Wang Teng, if the president is the person you most admire, what are we?" The god-stage martial warrior with Lightning Force shimmering around him gave an ambiguous smile.

"All of you! All of you!" Wang Teng said awkwardly.

"Hahaha..." The three true god-stage beings couldn't help but burst into laughter.

"Alright, enough of the small talk." The president shook his head, restrained his laughter, and waved his hand. Suddenly, Wang Teng felt the surrounding scenery rapidly retreating, countless stars turning into dazzling lights, giving off a dreamlike feeling.

"Each of these stars represents a legacy. What kind of legacy you can obtain depends on your luck."

"Remember, you can only choose one!"

## **Chapter 2182: You Can Get Attributes From Everything! Star Formula Scripture! (1)**

Countless streams of light passed by Wang Teng as numerous stars in the Grand Universe Hall began to retreat.

After an unknown amount of time, Wang Teng gradually came to a stop, only to find that the surroundings had once again turned into the universe.

However, this sky was different from the one he had seen before. The constellations, nebulae, and other celestial formations around him were clearly distinct from the previous starry scene.

"What a mysterious technique!" Wang Teng observed the surroundings and couldn't help but marvel.

He then looked around, transformed into a stream of light, and rushed toward one of the stars.

"Every star is a legacy!"

"I can only choose one legacy!"

"I don't know how to choose. Let's take a casual look first."

Wang Teng quickly arrived in front of the nearest star, hesitated for a moment, and activated his Real Eye to examine it.

With the help of his Real Eye, the star seemed to shed its surface appearance, revealing its true form.

Beneath that starlight, there were strange runes, forming chains that entwined around the star.

Wang Teng's eyes flickered with a peculiar light. After some contemplation, he extended his spiritual power to make contact with the star.

Boom!

A roar echoed in his mind, followed by fragmented and chaotic information.

"So-called legacy turns out to be the insights left behind by martial warriors. The star in front of me contains the insights left by an earth-element martial warrior, including scripture, battle techniques, and even domain insights." A glint of brilliance flashed in Wang Teng's eyes.

However, this inheritance was only equivalent to that of a heaven-stage martial warrior and wasn't considered too powerful.

Wang Teng's gaze turned towards the deeper parts of the universe. According to normal rules, the stronger the legacy, the deeper it would be located.

Just as he was about to rush towards the deeper parts of the universe, he suddenly stopped in his tracks, rubbing his chin in thought.

I wonder if I can profit from this.

In Wang Teng's eyes, he could get attributes from everything!

As long as it was a treasure, regardless of whether he could profit from it or not, he wanted to give it a try.

So, Wang Teng decided to experiment.

He condensed his spiritual power into a "stick" and thrust it towards the star in front of him.

This was the experience he gained from farming attributes on the Spiritual Hollow Mountain.

No matter what it was, poking at it was the way to go.

Boom!

A resounding boom suddenly emanated from the light sphere, louder than before. A unique force fluctuation swept out, creating a counterforce that directly shook Wang Teng away.

Wang Teng didn't mind. His gaze was fixed on the glowing sphere, and his eyes lit up.

Sure enough, several attribute bubbles emerged, floating around the light sphere.

A slight curve appeared at the corner of Wang Teng's mouth. His spiritual power swept out, immediately picking up those attribute bubbles.

Star Earth Scripture (cosmos stage)\*3000

Earth Domain\*60

Earth Domain\*50

...

There weren't many attribute bubbles but Wang Teng was surprised.

"Star Earth Scripture!"

Wang Teng closed his eyes. A hologram appeared in his mind, sitting cross-legged and cultivating the Star Earth Scripture.

And it was the cosmos-stage Star Earth Scripture!

Wang Teng had previously obtained planetary-stage and celestial-stage Star Earth Scriptures, and now he had acquired the advanced version.

When he created the Chaos Constellation Scripture, he used this scripture as a reference.

He had early on discovered that this scripture was a complete set, including attributes like metal, wood, water, fire, earth, lightning, and ice.

As for whether there were other attributes, he wasn't sure.

But just the connection between these attributes provided him with a lot of insights.

He speculated that the person who created these scriptures probably wanted to start from the easy and progress to the difficult. They initially created single scriptures, moving from low-level to high-level, and finally, merged them.

Whether the other person succeeded in the fusion, Wang Teng didn't know, but these techniques greatly inspired him.

Now, he wanted to push the Chaos Constellation Scripture to the heaven stage. This cosmos stage Star Earth Scripture came just in time.

However, the thought of collecting scriptures for the other attributes made Wang Teng feel a bit annoyed.

There were so many of them!

Everything depended on luck.

There were many legacies in the Universal Hall, and encountering the Star Earth Scripture in the very first one suggested the possibility of finding corresponding legacies ahead. Perhaps there were more fortuitous encounters awaiting Wang Teng.

Retracting his thoughts, he glanced at the other two domain attribute bubbles.

The Earth Domain, with a total of only 110 attribute points, was not particularly abundant, but it was better than nothing.

Wang Teng's domain was at the seventh rank. Further advancement wasn't an easy task. It required gradual progress.

Then, he looked at the star in front of him, hesitated for a moment, and decided against it. There were many legacy stars here, and there was no need to grab onto one recklessly.

Focusing too much on collecting attributes from one star might attract the attention of the president and others.

Moreover, he estimated that he wouldn't stay in this Grand Universe Hall for too long and needed to make the most of his time.

With these thoughts in mind, Wang Teng swiftly moved towards another star.

These stars had their differences. The previous one, with a faint yellow halo inside, was undoubtedly the legacy of an earth-element martial warrior.

The current star emitted a gentle blue halo, unmistakably representing the legacy of a water-element martial warrior.

Following the same procedure, Wang Teng condensed his spiritual power into a staff and fiercely thrust it forward.

Boom!

After a resounding roar, a unique force swept out. Unlike the previous time when he was shaken away, this time he staunchly withstood the impact, remaining steadfast in his position.

## Chapter 2183: You Can Get Attributes From Everything! Star Formula Scripture! (2)

Attribute bubbles dropped and he picked them up.

Water Element Scripture (heaven stage)\*1000

Water Domain\*20

Water Domain\*30

...

Wang Teng shook his head with a hint of disappointment, then without lingering, he rushed towards another distant legacy star.

"What is this little guy doing?" The god-stage martial warrior enveloped in flames furrowed his brow, puzzled.

"He should be searching for a suitable inheritance for himself," The god-stage martial warrior surrounded by lightning casually remarked.

"Searching them one by one like this, how long will it take him? It would be better to head directly to deeper areas," The god-stage martial warrior said in a somewhat exasperated tone.

"This little guy's actions are often perplexing, but in the end, it seems he's not wasting his time," the president mused.

"President, are you perhaps a bit too optimistic about this little guy?" The god-stage fire-element martial warrior questioned.

"Hahaha..." The president laughed. "How about we make a bet?"

"Oh, what are we betting on?" The god-stage fire-element martial warrior showed a surprised expression. He was intrigued.

The president rarely made bets with anyone, so this occasion was a rare opportunity, and he couldn't afford to miss it.

Besides, the president was well-known for possessing many valuable items. Any small wager would likely make them envious.

The lightning god-stage martial warrior also became interested and looked toward the president.

"I have two Blood Dragon Wood here. I bet he will obtain a god-stage legacy. If I lose, these Blood Dragon Wood will be yours." The president revealed two peculiar blood-red plants in his hands.

The two god-stage martial warriors were astounded. The two blood-red plants emitted a strong blood aura, their trunks resembling that of a true dragon, with a majestic and twisted appearance.

"Blood Dragon Woods? It's said that these trees grow by bathing in dragon blood, and the medicinal liquid extracted from them contains the essence of dragon blood. President, you're going all out, offering two of them at once," The fire god-stage martial warrior remarked.

"The legacy of a god-stage martial warrior? President, you're quite ambitious. He's only at the cosmos stage. How can he obtain a god-stage legacy?" The lightning god-stage martial warrior shook his head.

"What will you two bet against me?" The president remained unfazed, merely smiling.

"I don't have many treasures equivalent to the Blood Dragon Wood on me." The fire god-stage martial warrior pondered for a moment, then hesitated as he said, "How about this Five-Colored Soil?"

"Five-Colored Soil!" The president was surprised. He nodded and continued, "Five-Colored Soil can cultivate eternal level and above plant life, making it quite a rare treasure."

"It's my turn." The lightning god-stage martial warrior chuckled, producing an item and saying, "This is Thunder Tribulation Elixir, refined from the calamity lightning. It has a tempering effect, beneficial for cultivators beyond the eternal stage."

"Thunder Tribulation Elixir!" The president and the fire god-stage martial warrior stared at the liquid in astonishment.

This was an exceedingly rare substance!

Thunder Tribulation Elixir only formed during lightning calamities, and not every lightning calamity produced it. The chances were very slim.

Generally, only those at the universe stage or above who attracted calamity lightning would yield Thunder Tribulation Elixir, and its efficacy was also related to the strength of the calamity lightning.

The stronger the calamity lightning, the more potent the Thunder Tribulation Elixir born from it.

Moreover, only powerful lightning-element martial warriors could extract it.

The god-stage martial warrior's Thunder Tribulation Elixir was obviously refined from a calamity lightning, and as a god-stage being, what he produced was not to be underestimated.

"Well done. This item would indeed be of great help to us." The fire god-stage martial warrior nodded. "I didn't expect you to be willing to bring it out this time."

"If the president is willing to offer treasures like Blood Dragon Woods, and your Five-Colored Soil isn't ordinary either, how could I be unwilling to bring out this Thunder Tribulation Elixir? I can endure a bit more hardship during the next calamity lightning if needed." The lightning god-stage martial warrior replied.

"Let's see if he can get the god-stage legacy," the president smiled and said.

...

Within the Grand Universe Hall, Wang Teng sped swiftly, his pace considerably faster than before. Racing through, his spiritual power condensed into successive "sticks," fiercely stabbing toward the legacy stars.

He had now mastered the three principles of farming attributes!

Fast, accurate, ruthless!

Without any hesitation.

After a day of diligent efforts, he had finally plundered over a hundred legacy stars, reaping quite a fruitful harvest.

At this point, he had gathered all five elemental attributes of the Star Formula Scripture.

The legacy stars in the Grand Universe Hall indeed held these Star Formula Scriptures, living up to his expectations.

Unfortunately, he hadn't come across any Star Formula Scriptures with special attributes yet, leaving him somewhat frustrated.

Boom!

Wang Teng thrust his spiritual power "stick" into an enormous and dazzling star, and immediately, a surge of impact swept over him, knocking him back.

"Such formidable impact!" Wang Teng was astonished. This impact was much stronger than before.

At this moment, several massive attribute bubbles dropped down, and Wang Teng's eyes lit up. His spiritual power swept out, immediately picking them up.

Star Lightning Scripture (cosmos stage)\*1500

Star Lightning Scripture (cosmos stage)\*2000

Lightning Domain\*300

Lightning Domain\*200

Origin of Lightning\*10

...

"Star Lightning Scripture!" Wang Teng's eyes lit up.

Speak of the devil. After finding attributes for so long, Wang Teng finally encountered a Star Formula Scripture with a special attribute.

Moreover, the domain attributes seemed to be significantly more abundant than the previous legacy stars.

There was even the Origin of Lightning. This wasn't something a heaven-stage legacy constellation could have.

"A universe-stage legacy star." Wang Teng looked at the legacy star and immediately noticed some discrepancies, feeling a bit surprised.

Previously, the legacy stars he encountered were all at the heaven stage, and compared to this one, they were noticeably smaller.

He couldn't help but halt his steps and look around. Soon, he discovered several legacy stars that were obviously larger and more dazzling than the heaven stage ones.

Without any hesitation, Wang Teng quickly rushed towards those universe stage stars.

Without a doubt, he would get more attributes from the universe-stage legacy stars.

"Huh!" When Wang Teng approached one of the universe stage legacy stars, he couldn't help but be stunned, exclaiming, "This is a legacy star of the Light element."

He immediately became interested. He controlled his spiritual power "stick" more cautiously this time and fiercely stabbed it.

He was much more careful this time, poking and immediately retreating, avoiding the peculiar fluctuations that swept out from the legacy star.

Attribute bubbles fell.

Get them!

Star Light Scripture (cosmos stage)\*1600

Star Light Scripture (cosmos stage)\*1800

Light Domain\*500

Light Domain\*300

Origin of Light\*20

...

"Star Formula Scripture! It looks like I'm quite lucky. I have another Star Formula Scripture, and it's a rare light element scripture." Wang Teng was surprised and elated.

Simultaneously, as the remaining attribute bubbles merged into Wang Teng's consciousness, related insights emerged.

He had never received this light element Star Formula Scripture before. This time, he received the cosmos stage Star Formula Scripture directly. He was extremely lucky.

Simultaneously, as the remaining attribute bubbles merged into Wang Teng's consciousness, related insights emerged.

Light Domain!

Origin of Light!

Wang Teng suddenly felt that his Light Domain seemed to have broken through a certain barrier, reaching a new level.

Light Domain: 400/5000 (fifth rank)

His Light Domain had already reached the pinnacle of the fourth rank, and it had finally advanced to the fifth rank.

The formidable power of the Light Domain was beyond doubt. During the battle with Tai Beisha, her use of the Light Domain was quite impressive. Initially, Wang Teng's Light Domain was inferior to hers, but now, he felt that the difference wasn't that significant.

Next time, if he were to battle Tai Beisha again, his Light Domain would be enough to surprise her.

Besides that, there was the Origin of Light!

Wang Teng already had the Origin of Light, and the additional 20 attribute points this time further enhanced his understanding.

Wang Teng couldn't help but hesitate. Should he continue poking this legacy star?

After all, this was the light element. It was hard to come by.

In the end, he sighed and gave up the idea. Instead, he rushed towards the next universe-stage legacy star.

One by one, the surrounding universe-stage legacy stars were quickly sheared by Wang Teng. In addition to Lightning and Light elements, he also obtained an ice-element Star Formula Scripture. Counting them, he now possessed eight Star Formula Scriptures.

"I still lack Poison and Wind elements. I wonder if there are any here." Wang Teng furrowed his brow, scanning his surroundings.

These two types of inheritance stars were not common, especially the poison-element legacy star. Wang Teng had yet to come across one.

## **Chapter 2184: Wang Teng's Wind Talent Is The Strongest? (1)**

Wang Teng was extremely curious about the Star Formula Scripture.

He really wanted to know what would happen if he could collect all the scriptures.

Coincidentally, Wang Teng encountered the Star Formula Scriptures in the legacies of the Grand Universe Hall this time. If he didn't harvest all the scriptures, it would be a shame to waste such a great opportunity.

As he moved forward, his gaze swept the surroundings. He activated the Real Eye, prioritizing the search for poison and wind-element legacy stars.

Suddenly, his gaze condensed as he spotted a distant legacy star emitting a faint, ghostly green light.

It was far away, almost at the limit of his line of sight.

Without hesitation, Wang Teng instantly rushed towards it. Time was of the essence, and there was no room for delay.

In an instant, he arrived in front of the legacy star, which radiated a faint ghostly green light. His spiritual power condensed into a "stick" and thrust forward.

Boom!

Ripples of ghostly green waves spread from the inheritance star, shaking the surroundings. Within the fluctuations, a potent toxic force was present.

If it weren't for a poison-element martial warrior, they probably couldn't withstand the impact of such a toxic force.

Therefore, the choice of legacy stars, including their stage, was a crucial consideration for martial warriors.

Not everyone was like Wang Teng, for whom the choice of legacy stars had almost no impact.

For instance, this legacy star contained the legacy of a universe-stage martial warrior.

The toxic force contained within would have a significant impact on ordinary cosmos-stage martial warriors and even heaven-stage martial warriors. However, Wang Teng, with his Demon Lotus Poison Body, did not need to worry about this toxic force.

The only thing he needed to endure was the terrifying impact.

The impact generated by a universe-stage legacy star was enough to send him flying.

So, Wang Teng didn't resist directly. Instead, he evaded until the impact nearly disappeared, then proceeded to collect the attribute bubbles.

Standing at a distance, Wang Teng watched as attribute bubbles dropped from the legacy star. His eyes gleamed and he released his spiritual power immediately to collect them.

Star Poison Scripture (cosmos stage)\*2000

Star Poison Scripture (cosmos stage)\*1700

Poison Domain\*120

Poison Domain\*100

Origin of Poison\*500

...

"Star Poison Scripture! It's here!" Wang Teng was elated.

After searching for a long time, he finally found a legacy star that gave him the Star Poison Scripture. It wasn't easy.

Wang Teng felt elated.

At the same time, in his mind, an image of a figure seated in meditation appeared, practicing the Star Poison Scripture.

Wang Teng noticed that these scriptures were not exceptionally profound compared to the universe stage and eternal stage scriptures he had acquired.

However, they possessed unique characteristics that set them apart.

What made them particularly valuable was the interconnection between each scripture, something that higher-level techniques lacked.

Fortunately for Wang Teng, the Star Poison Scripture attribute dropped from this legacy star carried a substantial attribute value of 3,700 points. This allowed him to master the scripture from the foundation to the specialized level in one fell swoop.

Additionally, there were some poison domain attributes. While Wang Teng had already mastered several poison domains, including a mixed poison domain, most were at the third rank. Among them, the purest Poison Domain had reached the seventh rank, making further improvements challenging.

The attribute value dropped by this universe-stage legacy star was not substantial since Wang Teng had only scratched the surface. He had not truly obtained the corresponding legacy.

Lastly, there was the Origin of Poison, with significantly more points than the previously acquired power of origin, totaling 500 points. Perhaps it was due to Wang Teng's lower level of the power of poison origin.

Origin of Poison 1100/10000 (first-rank)

Wang Teng didn't pay too much attention to these enhancements. After collecting everything, he continued searching for the legacy stars that suited his needs.

In another dimension of the Grand Universe Hall, three god-stage entities stood silently in place, their gazes seemingly penetrating the space, observing Wang Teng's figure navigating the starry expanse.

For the better part of the day, they remained nearly motionless. A brief moment for them akin to a few breaths in their extended lifetimes.

However, Wang Teng's every move caught their interest, especially since the ultimate outcome of their bet hinged on it.

The three treasures at stake were far from ordinary, and losing would undoubtedly leave them feeling the pinch for a considerable time.

The president lightly stroked his graying beard, a faint smile playing on his lips, exuding an air of confidence.

The other two god-stage entities also found their spirits uplifted, as, so far, Wang Teng had only been lingering among universe-stage legacy stars. He was still a considerable distance from the god-stage legacies the president had mentioned.

"President, you're probably going to lose. My Thunder Tribulation Elixir can be saved now." The lightning god-stage figure remarked with a cheerful smile.

"Securing the acknowledgment of a legacy isn't as easy as you think. It seems he understands his limitations. If he can't subdue even a universe-stage legacy, how can he aspire to conquer a god-stage one?" the fire god-stage presence added.

"Don't be in a hurry! It's still early," The president said with a faint smile.

The two god-stage entities exchanged surprised glances. Even at this point, the president maintained an air of confidence, leaving them genuinely astonished.

"However, we should give him a fixed time. Otherwise, he might keep dragging it out." The president shook his head and transmitted his voice directly into Wang Teng's ears, "Wang Teng, you only have three days. If you can't find your legacy within three days, you must leave!"

## **Chapter 2185: Wang Teng's Wind Talent Is The Strongest? (2)**

...

On the other side, Wang Teng was shocked.

"Damn it! I knew it."

He expected this but he couldn't help but complain when he knew that there were only three days.

The president was so stingy!

Couldn't they give him a few more days with so many legacies?

Wang Teng's heart was bleeding.

But regardless of his complaints, Wang Teng dared not express them. He could only accelerate his search with a sense of resignation.

When Wang Teng focused all his attention on finding wind-element legacy stars, he finally made some progress.

This took him half a day.

During this period, Wang Teng found a total of four wind-element legacy stars, each of which he probed with his spiritual power.

The first two wind-element legacy stars were heaven-stage stars, dropping heaven-stage scripture attributes, and corresponding domain attributes.

The latter two were universe-stage legacy stars, dropping universe-stage scripture attributes, and some domain and origin attributes.

But not a single one was the Star Formula Scripture he was looking for.

"Why don't I have any luck?" Wang Teng furrowed his brows, feeling a bit frustrated.

Adding the previous half-day, he had already wasted a day.

With only two days left, finding a suitable legacy in this vast array seemed uncertain.

Wang Teng took a deep breath. Wind-element legacy stars were hard to come by. After half a day of searching, he found only four. He decided to give it another three hours. He might have to give up if he couldn't find a suitable wind-element legacy star with the Star Formula Scripture within that time frame.

Next, he would have to search for a genuine legacy, rather than wasting time here.

Wang Teng increased his speed to the maximum, swiftly traversing the starry expanse.

In just over two hours, he had delved deep into the starry space, encountering numerous legacy stars along the way, including some universe-stage ones.

But he could only cast a reluctant glance at them and move on without looking back.

These were not the wind-element legacy stars he was searching for.

"Hahaha!" The lightning god-stage presence burst out laughing when he saw this scene. "This little guy seems to be frightened. Look at him, not daring to waste any more time."

"If we don't pressure him a bit, he probably would still be wandering around in front," the president said.

"What is this little guy doing exactly? Just now, I saw him using his spiritual force to probe all the legacy stars of various attributes. Yes, that's right, probing!" The fire god-stage martial warriors gave a strange look. After a moment of contemplation, he found a word to describe Wang Teng's actions.

"Probing?" The lightning god-stage martial warrior was stunned. He hadn't paid attention to these details, merely thinking that Wang Teng was investigating the legacy stars.

Even the president, hearing the word used by the fire god-stage martial warrior, had his hand trembling slightly, almost pulling out a tuft of his beard.

Probing?

What a good use of this word!

It sounded indecent.

"Do you guys not think so?" The fire god-stage martial warrior asked.

"It does seem a bit like that," The lightning-element god-stage martial warrior speculated. "Perhaps this is his unique way of investigation? It's just a bit peculiar."

The fire god-stage martial warrior chuckled. Was it just a bit peculiar? It was downright special.

Who would use probing to investigate something?

"Let's not bother with what methods he uses. He has been searching for so long. Has he still not found a suitable inheritance?" The fire god-stage martial warrior frowned.

"Judging by the looks of it, it seems that universe-stage legacies might not satisfy his appetite," the lightning god-stage martial warrior said, his gaze flashing slightly.

"Could he be aiming for eternal-stage legacies?" The fire god-stage martial warrior pondered.

He didn't think that Wang Teng would look for the legacy of a god-stage martial warrior. Even though Wang Teng's talent was indeed impressive, the difference in strength was always there. It would be absurd for a cosmos-stage warrior to obtain a god-stage legacy, pure nonsense.

The president remained silent throughout, wearing a faint smile, calmly watching Wang Teng.

He was also eager to see what Wang Teng could achieve.

Could he create another miracle?

...

Huh?!

At a certain moment, Wang Teng's figure suddenly halted, coming to an abrupt stop.

A dazzling wind-element legacy star appeared before his eyes. The intense azure glow was so vivid that he could almost see it clearly without resorting to using his Real Eye.

The eternal-stage legacy star!

This was, at the very least, an eternal-stage legacy star!

He took a deep breath, cautiously approaching, like a thief preparing to steal a bird's egg.

For some reason, he felt a slight excitement.

Perhaps it was the first time encountered an eternal-stage legacy star, and he had no idea what would happen if he gave it a "poke."

"Huh?"

At the moment Wang Teng discovered the eternal-stage legacy star, the three god-stage presences couldn't help but let out a surprised sound.

"He found an eternal-stage wind-element legacy star! This little guy is quite lucky," said the fire god-stage martial warrior said.

"After searching for so long, he finally found an eternal-stage legacy star. I thought he could only find universe-stage legacy stars," the lightning god-stage martial warrior remarked.

"You underestimate him. This little one's talent is not limited to this extent," the president suddenly said.

"Oh?" The two god-stage martial warriors were surprised.

"Generally speaking, the higher the talent, the easier it is to sense corresponding attribute legacy stars. While Wang Teng's talent is comprehensive, there should still be variations. It's impossible for him to find high-level legacy stars for every attribute. If that were the case, it would be too incredible," the fire god-stage martial warrior analyzed.

"That's right. No matter how talented you are, it's impossible for all your talents to be so powerful." The lightning god-stage martial warrior nodded.

He agreed with the fire god-stage martial warrior on this matter.

Wang Teng having talents across all elements was already extraordinary, but if every talent were exceptionally powerful, it would transcend the realm of being extraordinary.

"I initially thought his talents in the lightning and fire elements were the strongest, but now it seems his talent in the wind element might be the most potent," the fire god-stage martial warrior said, his eyes flashing subtly.

"That's not necessarily true," the president chuckled.

"You're placing too much confidence in him." The two god-stage entities sighed with a wry smile.

They had noticed that whenever they pointed out Wang Teng's flaws, the president would come out to counter their opinions.

It seemed he was more protective of this young man than his real disciples.

Of course, it wasn't that they lacked confidence in Wang Teng. They were just being realistic.

"Let's continue observing," the president said with a meaningful glint in his eyes.

...

Wang Teng approached the colossal blue star, taking a deep breath and preparing himself. If anything went wrong, he would immediately retreat.

An eternal-stage legacy star was undoubtedly not easy to deal with.

Wang Teng took a deep breath, controlled his spiritual power, and fiercely poked it out. With a resounding boom, a tremendously formidable wave emanated from the legacy star.

"Damn it!"

Wang Teng's figure flickered, attempting to dodge the terrifying shockwave, but he was a step too late.

This legacy star belonged to the wind element, and the unique Force it contained naturally possessed the characteristics of wind Force.

That is... speed!

A shockwave swept through like a fierce wind, violently blasting Wang Teng away. He retreated a distance of ten thousand meters before coming to a stop.

"The eternal-stage legacy star is so powerful!" Wang Teng's expression changed. He didn't dare to underestimate it.

He just wanted to get some attribute bubbles but he faced such a tremendous counterforce. Obtaining the legacy within would likely be extremely challenging.

"Hahaha..."

The two god-stage martial warriors burst out laughing when they saw this scene.

Seeing Wang Teng suffer made them inexplicably happy.

This guy was quite audacious, and this time, he had finally met his match!

Unaware of the three god-stage beings mocking him behind his back, Wang Teng's gaze was completely drawn to the attribute bubbles dropped by the eternal-stage legacy star.

These bubbles were significantly larger than the ones dropped by the previous universe-stage legacy stars, clearly indicating their substantial content.

However, Wang Teng felt a bit regretful. The eternal-stage legacy star was too high-level so it probably wouldn't drop a cosmos-stage Star Formula Scripture.

Nevermind!

Pick them up first, then think about it.

He shook his head, choosing not to dwell on it. He picked up the enormous attribute bubbles.

Nine Heavens Imperial Wind Scripture\*3000

Nine Heavens Imperial Wind Scripture\*2500

Star Wind Scripture (cosmos stage)\*2200

...

"Oh my god" Wang Teng's eyes widened. This was a huge gain!

## **Chapter 2186: Chronicles of Time! (1)**

Wang Teng was astounded by the attribute bubbles dropped by the eternal-stage wind-element legacy star.

Nine Heavens Imperial Wind Scripture!

This was an eternal-stage wind-element scripture!

As the attribute bubbles merged into his consciousness, a humanoid figure materialized.

This figure possessed intricate cyan meridians coursing through its body. An astonishing cyan Force enveloped his body like a nine-headed dragon.

Wang Teng was enlightened.

He swiftly grasped the essence of this eternal-stage wind-element scripture—the Nine Heavens Imperial Wind Scripture.

Nine Heavens Imperial Wind Scripture (eternal stage): 5500/8000 (foundation)

However, the 5,500 attribute points only allowed Wang Teng to attain a foundation-level mastery. To further advance, he needed either to continue accumulating points or allocate blank attribute points.

What caught Wang Teng by surprise was the second scripture, the one he had been seeking relentlessly—the Star Wind Scripture.

Another figure appeared in Wang Teng's mind, demonstrating the cultivation of this cosmos-stage scripture.

Compared to the Nine Heavens Imperial Wind Scripture, this scripture was merely cosmos stage and naturally inferior, yet Wang Teng felt a sense of delight.

He searched high and low for the scripture, but here it was.

After searching tirelessly and finding nothing, he unexpectedly discovered this scripture within the eternal-stage legacy star.

Perhaps the formidable martial warrior who left behind this eternal-stage legacy once dedicated himself to mastering the Star Wind Scripture.

At this moment, Wang Teng had essentially collected all the Star Formula Scriptures for each attribute, leaving only the Dark Force.

As the last scripture, Wang Teng's joy was unparalleled, surpassing even that of acquiring the Nine Heavens Imperial Wind Scripture.

He couldn't help but anticipate the fusion of these Star Formula Scriptures, but he knew the timing was not right.

Therefore, he reluctantly set the matter aside, planning to thoroughly study these cosmos-stage scriptures after returning.

Besides scriptures, there were domain attributes too.

This time, the domain attribute gave Wang Teng a pleasant surprise.

The actualization phase!

The wind domain he got from this eternal-stage legacy star was an actualization phase domain.

There were 8,500 points of attributes in total. It was a substantial amount.

Wind Domain: 2500/4000 (fourth-rank actualization phase)

Wang Teng's wind domain was originally an ordinary domain and it was at the fourth rank. However, with the recent acquisition of the actualization phase domain, it leaped to the fourth rank too, instantly aligning with the normal wind domain.

Obtaining a new actualization phase domain filled Wang Teng with great joy, recognizing the immense superiority of an actualization phase domain over a regular one.

Wang Teng could now confidently affirm that only universe-stage powerhouses wielded actualization phase domains. Most heaven-stage martial warriors, in contrast, were only capable of commanding normal domains.

Then, there was the Origin of Wind. There were 700 points of it!

Origin of Wind: 8300/10000 (first-rank)

Wang Teng's grasp of the Origin of Wind was formidable, approaching the pinnacle of the first rank. He might soon break through to the second rank.

Finally, there were 15 points of eternal matter attributes.

While the attribute value wasn't particularly high, the eternal matter was a special material possessed only by eternal-stage powerhouses. Wang Teng had acquired a small amount through his assistance in refining the Yin-Yang Dragon Essence Pill for two eternal-stage experts in a previous endeavor.

Unexpectedly, this time he obtained it directly from the eternal-stage legacy star. It was a significant and unexpected gain.

As the eternal matter melded into Wang Teng's inner cosmos, it seemed to fuse with his soul, adding a unique characteristic to his spiritual essence.

After sensing it briefly and noting no significant changes compared to the last time, he regretfully dismissed the matter and moved on.

"Well then, I've finally collected all the Star Formula Scriptures. Now, it's time for me to seek the true legacy I need." Wang Teng cast a glance at the eternal-stage legacy star before slowly drifting backward.

While the legacy before him was not bad, he could only choose one. Naturally, he couldn't afford to squander such an exceptional opportunity on a mere eternal-stage legacy.

Disdainful!

If he was going to seek, he would seek the best.

His goal was the god-stage legacy!

It had to be admitted that in this regard, the president had a remarkably profound insight. He foresaw early on that Wang Teng would opt for a god-stage legacy.

This time, Wang Teng didn't rush to search. The previous questing process had made him realize a crucial issue.

It seemed that these stellar constellations of legacies required talent for sensing. One couldn't simply search aimlessly.

In the beginning, there were too many legacy stars, making sensing unnecessary since they were everywhere. Wang Teng, eager to explore all the possibilities, naturally didn't bother with such details.

However, after searching for quite some time and finding only one eternal-stage legacy star, Wang Teng suddenly became aware of the problem.

If he continued searching, he might not be able to find a god-stage legacy star.

If even eternal-stage legacy stars were so rare, finding a god-stage one would be an even greater challenge.

Wang Teng closed his eyes, pondering for a moment. Despite having various talents, he could only choose one—a decision had to be made.

His consciousness involuntarily delved into the attributes board to review his talents.

The various Force talents needed no elaboration. They were the most common talents.

More notably, there were physique talents.

Wang Teng possessed numerous physique talents, among them the potent and promising Demon Lotus Poison Body, the Spiritual Wood Divine Physique, the True Dragon Battle Physique, and many others.

However, the two most formidable talents were likely the time and space talents!

## **Chapter 2187: Chronicles of Time! (2)**

A glint flashed in Wang Teng's eyes.

It remained unknown whether the Grand Universe Hall housed legacies related to time and space.

If there was, that would be great. There was no better legacy than time and space.

The opportunity to enter the Grand Universe Hall was exceedingly rare, and Wang Teng was uncertain when the next chance would present itself. He had to seize the moment.

"What is Wang Teng doing?" The fire god-stage martial warrior observed the scene, unable to suppress his curiosity.

"He seems to be uninterested in this wind-element eternal-stage legacy," the lightning god-stage martial warrior hesitated for a moment before responding.

"He doesn't want a wind-element eternal-stage legacy?" The fire god-stage martial warrior was speechless. He couldn't decide if Wang Teng was overestimating himself or if his courage was commendable.

If he missed this legacy, there was no guarantee he would find a better one next time.

In the end, Wang Teng decided to attempt sensing with his time talent first. Time talents were exceptionally rare, and if he could obtain a corresponding legacy, it would be the most significant gain of this endeavor.

Should he acquire a legacy related to time talent, he would no longer crudely wield time power. Instead, he could systematically utilize the power of time.

With closed eyes, he activated his time talent. Peculiar ripples emanated from his body, spreading outward.

Thankfully, the three god-stage entities were not present in this spatial region. Otherwise, they would have been profoundly shocked.

The extraordinary fluctuations emanating from Wang Teng's body at this moment were none other than the power of time.

A cosmos-stage martial warrior, unexpectedly wielding the power of time.

This was something not even a god-stage martial warrior dared to imagine.

Before long, Wang Teng furrowed his brows. He couldn't sense anything.

"Is it because my time talent is too weak?"

Moreover, if it followed the developmental pattern of his space talent, even reaching the perfected state would only transform the time talent into a first-rank Time Physique.

He couldn't help but speculate in his mind. Obtaining the time talent was exceedingly rare. Currently, his attribute points were just over a thousand, and reaching the perfected state of the time attribute required ten thousand points.

Moreover, if it followed the developmental pattern of his space talent, even reaching the perfected state would only transform the time talent into a first-rank Time Physique.

Therefore, his time talent was still too weak.

This could be one reason.

"Or is it because the distance is too far?" Wang Teng rubbed his chin, pondered for a moment, then charged deeper into the starry expanse.

Regardless, he had to search and explore. Giving up without trying was something he couldn't accept.

Wang Teng was fervently eager for a legacy related to the time talent.

To save time, he simultaneously activated his space physique. Waves of spatial fluctuations emanated from him, spreading into the surroundings.

Both talents were active, sensing simultaneously.

He refrained from activating other talents—not because he didn't want to but because he couldn't.

Activating too many talents at once would undoubtedly hinder his judgment. Since Wang Teng had decided to seek legacies related to time and space, he couldn't afford to expend too much energy on other talents. It was easy to lose focus.

In Wang Teng's quest, time slowly passed once again, and a day elapsed.

During this time, he encountered several eternal-stage legacy stars: one related to the earth element, another to the wood element, and the third to the metal element.

In terms of value, they might not surpass the wind-element legacy he first encountered.

In the vast expanse of the starry sky, these constellations shone like individual stars, radiating dazzling brilliance.

Wang Teng, however, showed no attachment and moved past them without hesitation.

Of course, since he encountered them, he couldn't resist seizing the opportunity to gain some benefits.

Wang Teng received some scriptures, domains, origins, and eternal matter attribute bubbles through his probing attempts.

"It seems he's truly searching for a god-stage legacy!" The fire god-stage figure remarked upon witnessing this scene.

"Do you think he can find it?" The lightning god-stage martial warrior nodded and smiled.

"It's hard to say. It depends on his talents and luck. God-stage legacies are situated in the deepest regions, and they have no fixed locations. It's challenging to locate them," the fire god-stage martial warrior explained.

"Even if he finds one, it doesn't guarantee he can subdue it. God-stage legacies are extremely difficult to conquer." The lightning god-stage martial warrior glanced at the president and continued, "Regardless of how you look at it, Wang Teng's chances of obtaining a god-stage legacy are quite slim."

"It's alright. If I lose, I'll give you the two Blood Dragon Wood," the president smiled and replied.

The two god-stage powerhouses revealed a hint of satisfaction. The Blood Dragon Wood was theirs.

However, they were unaware of what kind of legacy Wang Teng was truly seeking.

If it were an ordinary god-stage legacy, with Wang Teng's talent, he could find it with a bit of time.

Three hours passed.

Wang Teng abruptly halted his movement, his gaze fixated on a specific spot, a faint hint of excitement glimmering in his eyes.

He sensed it!

After searching for so long, he finally felt the presence of a time-element legacy.

The Grand Universe Hall truly did not disappoint. It even housed a time legacy. How remarkable!

Without hesitation, Wang Teng rushed toward the designated location.

Although he sensed the existence of the time legacy, the distance should not be close. It was merely a faint feeling.

After about one or two minutes, a peculiar legacy star appeared in Wang Teng's eyes, silently floating in the profound void, devoid of any extraneous stars in its vicinity.

"This star..." Wang Teng frowned.

It was too small!

The radiance was also extremely feeble.

A stellar inheritance of this size could never be a god-stage legacy, at most, it might be a heaven-stage legacy.

Wang Teng felt a twinge of regret, mixed with a sense of resignation. At the same time, a hint of apprehension accompanied him as he approached the diminutive legacy star.

## **Chapter 2188: Chronicles of Time! (3)**

Activating the Real Eye, Wang Teng examined the legacy star. It displayed a nearly transparent quality, devoid of any distinct color. However, faint streams of luminescence shimmered within, and intricate and enigmatic runes entwined its surface, emanating exceptionally peculiar vibrations.

These runes, even to Wang Teng, a rune grandmaster with an extensive knowledge of ancient symbols, appeared unprecedented.

"Could this be the legendary Time Runes?" Wang Teng murmured to himself.

Taking a deep breath, he refrained from dwelling on the thought. Pondering now served little purpose.

These runes were the materialization of enlightenment. Even if he tried to exploit the situation, he couldn't obtain Time Runes. Thinking about it was futile.

"It should be a heaven-stage time legacy!" After scrutinizing the legacy star for a while, Wang Teng made his judgment.

Heaven-stage time legacy!

In terms of level, it was a bit low, but being a time legacy made it incredibly rare and precious.

If it were any other warrior with time talents, they might choose to directly accept the inheritance. However, Wang Teng had another option.

Get some attribute bubbles!

In doing so, he might not be able to acquire the complete legacy, but at least he could obtain a portion of it, which was better than nothing.

"The legacy star..."

In another spatial domain, the president and the two god-stage beings experienced a slight tremor in their hearts. Their expressions showed a subtle change.

Naturally, they recognized the legacy star as a time-related one.

Such inheritances were exceedingly rare throughout the entire Grand Universe Hall.

But, the question was, why was Wang Teng there?

Was this a coincidence?

Or did he look for it himself?

If Wang Teng had sought it out himself, it would be intriguing.

"Could it be that Wang Teng possesses... the Time Talent?" The fire god-stage martial warrior fell into silence for a moment before uttering the words "Time Talent."

As if those two words carried an unimaginable weight!

After speaking, he couldn't help but chuckle, but the amusement seemed tinged with a hint of awkwardness.

What if Wang Teng truly had the Time Talent?

"There is no relevant information in this regard." The president stared at Wang Teng in that spatial domain, shaking his head after a moment.

"It's unlikely. Time Talents appear once in several epochs," the lightning god-stage martial warrior remarked.

Even though they were reluctant to believe it, at this moment, they all focused their gazes on Wang Teng, waiting to see what choice he would make.

If he chose this legacy star, it would be a hundred percent confirmation that Wang Teng possessed a Time Talent.

If he didn't choose it, further investigation would be needed.

In the next moment, a gleam flashed in Wang Teng's eyes. His spiritual power condensed into a "staff," stabbing out fiercely.

Bang!

Unlike before, a profoundly dull sound emanated from the time legacy star. He felt as if his spiritual power had plunged into a quagmire, difficult to extricate himself from.

An invisible fluctuation spread slowly. While lacking the terrifying impact from before, Wang Teng's expression changed drastically. His pupils vibrated intensely. Without hesitation, he directly employed the Space Flash, disappearing from his original position and reappearing several kilometers away.

The space around the time legacy star suddenly distorted, and time... became chaotic!

Wang Teng, still with lingering fear, gazed at that area. If he hadn't sensed the terrifying fluctuation in advance due to his Time Talent, he would probably have been deeply ensnared in the chaotic time zone by now.

Time, at any moment and under any circumstances, was an extremely formidable and mysterious domain that must never be underestimated.

Even god-stage beings would find themselves in a difficult situation when trapped in such a chaotic time zone.

"This kid is playing with fire!" The fire god-stage martial warrior frowned.

"He seems to have avoided it in advance." The lightning god-stage martial warrior stared at Wang Teng with piercing eyes.

The fire god-stage martial warrior and the president noticed this too. There was a sharp glint in their eyes.

"Could it be that he truly possesses the Time Talent?" This thought simultaneously crossed the minds of the three uncontrollably.

Several attribute bubbles appeared around the time legacy star. Wang Teng felt excited but refrained from hastily collecting the bubbles.

The time fluctuation in that area had not completely dissipated, and his spiritual power would be greatly affected upon entering.

After ten minutes, the time fluctuation in that area finally completely dissipated. Wang Teng carefully sensed it and then confidently extended his spiritual power to collect the attribute bubbles.

Time Domain\*800

Time Domain\*600

...

## **Chapter 2189: Using Such A Method Is Truly Despicable! (1)**

The attribute bubbles from the time-element legacy star entered Wang Teng's body. His eyes lit up.

Good stuff!

This time, he hit the jackpot.

Although it was only a heaven-stage legacy, the attribute bubbles dropped from it seemed to Wang Teng to far surpass the eternal-stage legacies he encountered before.

He even felt that the eternal-stage wind-element legacy star was not as valuable as this time legacy star.

Of course, it was a matter of personal preference.

It didn't mean that the value of the wind-element legacy was lower. If it was a wind-element martial warrior, the eternal-stage wind-element legacy would naturally be more valuable to them, and the time legacy would be useless.

Wang Teng took a deep breath, calming his emotions a bit, and then looked at the attributes board.

First was the Chronicles of Time!

After this attribute bubble merged into Wang Teng's mind, profound insights emerged, like condensed mysterious runes, imprinted in his memory.

Wang Teng instantly gained enlightenment.

The Chronicles of Time wasn't a scripture or battle skill. Instead, it was the insights into time left behind by the person who created this legacy. It summarized the thoughts and ideas from the person's cultivation process.

With the insights from the Chronicles of Time, Wang Teng could avoid many detours in his cultivation. Simultaneously, his mastery of the power of time would become more adept, not as rudimentary as before.

The same technique, when executed before and after obtaining the Chronicles of Time, would undoubtedly be different.

Now, with the insights from the Chronicles of Time, if Wang Teng used the power of time, he could not only save time but also accelerate the speed of his execution. No matter how you looked at it, it was a good thing.

Chronicles of Time: 2200/5000 (foundation)

Unfortunately, there were only 2,200 points of attributes so Wang Teng could only reach the foundation stage.

Next was a battle technique.

As the attribute bubble merged into Wang Teng's mind, a humanoid figure appeared. This figure was extraordinary, standing in the void, emanating an indescribable aura. Although he stood there, it seemed like he wasn't there at all. There was a kind of illusion, an unreal feeling as if there was a discontinuity between the previous second and the next.

Suddenly, the figure made a move. He had no weapon in his hand, just using his palm as a blade, lightly slashing towards the empty space in front.

It was an unremarkable palm, even a bit ethereal, without any apparent force.

However, as this palm was executed, ripples appeared in the space in front, and an invisible blade swept through. Suddenly, a planet in front disintegrated.

The disintegration wasn't due to a massive impact causing an explosion; instead, it was a material breakdown, as if the time on that planet was... reversed!

Yes, reversed!

All the substances on that planet returned to an extremely primitive state, leading to its ultimate collapse.

The scene ended, and the humanoid figure disappeared.

Wang Teng remained stunned in place, unable to recover for a long time. The image of the planet disintegrating lingered in his mind.

"Gasp!"

After a moment, he finally came to his senses. He couldn't help but inhale a cold breath, and his eyes were filled with shock.

"Reverse Slash! Reverse the flow of time, causing the target to disintegrate. Can such an attack be blocked?" Wang Teng murmured to himself, finding it hard to imagine that such an attack truly existed.

He had once experimented with reversing time to heal wounds, but it came at the cost of some damage to the essence of life and soul.

According to his previous experiments, if he wanted to unleash the terrifying power seen in the recent scene, his essence of life and soul probably wouldn't be sufficient.

He would collapse before even executing the strike.

However, after obtaining this battle technique named Reverse Slash, Wang Teng discovered that he had seemingly been using the wrong approach all along.

While utilizing the power of time would indeed subject his body to erosion by time, there was a way to avoid it and prevent the erosion from being too severe.

Both the Chronicles of Time and this Reverse Slash contained detailed records of this knowledge.

Clearly, this was the most valuable experience!

"This is fantastic!" Joy lit up Wang Teng's eyes, and he murmured to himself, "With the Chronicles of Time and this time-element battle technique, I can at least use the power of time to launch attacks without worrying about consuming too much essence of life and soul."

His Origin Of Life and Origin Of Soul were already much stronger than ordinary cosmos-stage martial warriors, reaching the limit of the cosmos stage. Moreover, he could replenish them by picking up attributes, making the "consequences" much smaller than those of other time-element martial warriors in the past.

Reverse Slash (heaven stage): 500/5000 (foundation)

Unfortunately, Wang Teng only received 500 points. It was too little.

This battle technique, Reverse Slash, requires a whopping 5,000 attribute points just to reach the foundation level, indicating that it was not that easy to master.

Furthermore, this battle technique was categorized as heaven-stage, and its rank was not considered high.

Perhaps it was because of this that the legacy before him was designated as a heaven-stage legacy.

Such a level implies one thing. While the martial technique was undoubtedly powerful, it might not cause significant harm to those much stronger than oneself.

If an eternal-stage martial warrior acted, he might be able to resist the power of time of this battle technique.

Wang Teng shook his head, no longer dwelling on such thoughts. What he had now was already sufficient. Given his current strength, thinking about eternal-stage abilities was too far-fetched.

As long as he remained prudent, it was unlikely that eternal-stage martial warriors would attack him.

## **Chapter 2190: Using Such A Method Is Truly Despicable! (2)**

Such beings have their dignity and wouldn't aimlessly target a cosmos-stage martial warrior.

Even if they belonged to hostile factions, it wouldn't be practical for an eternal-stage figure to directly confront a cosmos-stage martial warrior.

"But the name of this martial technique seems a bit hasty," Wang Teng remarked, glancing at the attributes board.

Reverse Slash! It was appropriate but the style was lacking.

It appeared that the predecessor, much like himself, was not particularly skilled in naming things.

The last two attribute bubbles were the Time Domain.

This was an extremely rare attribute bubble.

Among the domains Wang Teng currently possessed, there was no domain related to time. Obtaining the power of such a domain was truly a pleasant surprise.

Immediately, the relevant insights fused into his mind, rapidly enhancing his mastery of the Time Domain.

Time Domain: 400/2000 (second-rank)

Wang Teng was surprised. He hadn't expected that his insights into the Time Domain would surpass the first rank, reaching the second rank.

Considering that his Space Domain was currently at the first rank.

His Time Domain actually caught up.

Although time and space were considered the two most powerful laws in the universe, mastering time proved to be more challenging than space to some extent.

Otherwise, why would there be relatively more powerhouses who mastered space than time?

After his Time Domain reached the second rank, Wang Teng's understanding of time improved significantly.

However, he discovered that using the Time Domain consumed more terrifying amounts of power of time and caused even more severe erosion to his Origin Of Soul and Origin Of Life.

Only by increasing the rank could he potentially reduce some of the backlash.

Of course, this meant that when using the same methods, the higher the mastery of the domain, the lower the backlash.

However, generally speaking, as the mastery of the domain increased, the techniques employed would also become more powerful, leading to a more formidable backlash.

It was all relative.

In essence, everything depended on the individual's ability to withstand the level of backlash.

Despite the lengthy explanation, it only took a short moment. After collecting the attribute bubbles, Wang Teng turned his gaze back to the time-element legacy star, contemplating for a few moments.

With such a good opportunity, why not pick a few more bubbles?

Just a few more, it wouldn't waste too much time.

At this moment, it seemed as if a voice was constantly repeating in Wang Teng's mind, urging him to stay and continue collecting the attributes.

So... Wang Teng decided to stay.

Bang!

Since he decided to stay, Wang Teng wasted no time. He condensed his spiritual power into a "stick" and fiercely stabbed at the time-element legacy star.

The power of time spread from the star, permeating the surroundings.

Attribute bubbles emerged one after another.

Wang Teng directly picked them up without examining them closely. he continued stabbing.

Thud! Thud! Thud...

Continuous sounds echoed. The time-element legacy star got harassed by Wang Teng continuously.

[○ · `Д´ · ○]

"What is this guy doing?" The lightning god-stage martial warrior exclaimed.

"He didn't accept the legacy but keeps stabbing it like that. Is he playing?" The fire god-stage marital warrior said with bewilderment.

Even the president had a stream of black lines on his head, unable to comprehend Wang Teng's unusual operation.

At their level, not understanding the actions of a cosmos-stage martial warrior was truly embarrassing.

The three god-stage presences dared not disclose what was happening here.

Wang Teng "stabbed" for about a dozen times. The attribute bubbles dropping from the time-element legacy star became fewer, but he continued his persistent "stabbing."

He was a professional at farming attribute bubbles!

However, the time-element legacy star no longer gave him the opportunity. The surrounding space suddenly fluctuated, and the star directly escaped.

Wang Teng: ...

Time-element legacy star: I can run away!

"You deserve it!" The lightning god-stage martial warrior spat out the words uncontrollably when he saw this scene.

Even he thought Wang Teng went overboard, allowing a rare and precious time-element legacy star to escape. Was this something a person would do?

"In that case, we can't tell if he has the Time Talent or not." The fire god-stage marital warrior frowned.

"Let it be, there's no need to insist. If he truly possesses a talent for time, he will expose it sooner or later. What we need to do is keep an eye on him, ensuring he doesn't fall prematurely. Such a genius belongs to our Seventh Stellar Academy. It's truly fortunate, hahaha," the president said, laughing heartily and appearing quite pleased.

"That's true. Regardless, he is a member of our Seventh Stellar Academy," the two god-stage entities agreed.

"Hehe, with this young man, when the time comes for the Seven Stellar Academies to compete, our Seventh Stellar Academy will surely rise. It seems like there's something to look forward to in this generation." The lightning god-stage martial warrior chuckled.

"In the past competitions, our Seventh Stellar Academy has always been at the bottom. How unfortunate," the fire god-stage marital warrior remarked.

"Having only him is not enough." The president shook his head. "I hope he becomes the disruptor in our Seventh Stellar Academy, stirring up the other students."

"Oh?" The two god-stage entities expressed surprise, then nodded in admiration.

"President, you're thinking ahead."

...

Wang Teng looked at the empty void before him. The time-element legacy star had long vanished without a trace, leaving him somewhat speechless.

Did it have to run away like that?

It made him look like some unforgivable villain.

All he did was "stab" it a few times.

Full of grievances, Wang Teng shook his head regretfully and glanced at the attributes board.

Chronicles of Time: 3000/10000 (well-versed)

Reverse Slash (heaven stage): 4100/10000 (well-versed)

Time Domain: 500/3000 (third-rank)

Fortunately, the harvest was good. Because he stabbed it a few more times, all three types of attribute values increased by one level.

Without dwelling on it further, Wang Teng, after choosing a direction, swiftly dashed towards a distant location.

Earlier, when he sensed the time-element legacy star, he also sensed the presence of space legacy stars somewhere in the distance.

There were two of them!

He sensed two space-element legacy stars just now.

These two stars were in different directions, but generally speaking, both were on the route Wang Teng was currently taking—one on the left and one on the right.

He decided to head towards the right space-element legacy star first.

The one he sensed on the other side seemed to be more intense, and the better things should be saved for later.

Soon, Wang Teng arrived at his destination.

A peculiar legacy star appeared before his eyes. This star was entirely silver-white, and judging by its size, it should belong to the cosmos stage.

"Cosmos stage!" Wang Teng rubbed his chin, preparing to give it a "poke" first.

He congregated his spiritual power and stabbed it out. With a loud bang, a powerful space fluctuation swept out.

Wang Teng was much calmer than when he encountered the time-element legacy star. With a flicker, he disappeared from his original position.

He had no problem resisting cosmos-stage space fluctuations.

But, there was no need for him to forcefully endure it.

As the attribute bubbles fell, Wang Teng's spiritual power rushed into the still lingering spatial fluctuation, retrieving the attribute bubbles.

Chronicles of Space\*1300

Chronicles of Space\*1600

Space Domain\*100

Space Domain\*80

...

Several attribute bubbles merged into Wang Teng's body, transforming into insights that he absorbed.

"Chronicles of Space?!" Wang Teng's expression turned strange.

Chronicles of Time, Chronicles of Space, how many chronicles are there? These are high-level insights. Can you be a little more serious?

Chronicles of Space: 2900/3000 (foundation)

There were 2,900 points of attributes in total. It was only enough for Wang Teng to reach the foundation stage.

The problem was that the foundation stage required 3,000 attribute points, just 100 points short. Wasn't this tempting him to continue poking the star?

Damn it!

Wang Teng looked at the other attribute bubbles. He received 180 points of Space Domain. It wasn't a lot.

But, considering that this was only a cosmos-stage legacy star, it was already impressive that the other party could grasp the domain.

Space Domain: 980/1000 (first-rank)

Wang Teng: ...

Are you kidding me?

System, you must be kidding, right?

He felt utterly powerless to complain. The Space Domain just reached the critical point, lacking only 20 attribute points to break through to the second rank.

Was it really a coincidence?

He couldn't believe that there was no foul play involved.

## **Chapter 2191: We Underestimated This Little Guy's Decisiveness! (1)**

"In such a case, I'll go along with your wishes!"

With a fierce and determined glare, Wang Teng directed his spiritual power toward the space-element legacy star before him, forcefully thrusting it out.

If he was going to reap, he might as well do it thoroughly.

Boom! Boom! Boom!

A series of explosions echoed as Wang Teng's spiritual power jabbed at the star and attribute bubbles kept dropping.

In no time, Wang Teng found himself stunned in place.

The space-element legacy star was gone!

It ran away!

It ran away again!

Without a word, with a flicker of spatial fluctuations, it vanished without a trace.

Wang Teng didn't know what to say anymore. He cursed under his breath and glanced at the attributes board.

Chronicles of Space: 3300/5000 (well-versed)

Space Domain: 1300/2000 (second-rank)

Both attributes had ascended by a level, and Wang Teng felt reasonably satisfied. At least his efforts were not in vain.

Without further hesitation, he swiftly dashed toward the location of another space-element legacy star.

"He found a space-element legacy star!"

The two god-stage martial warriors were taken aback to see Wang Teng actually locating a space-element legacy star.

Just moments after finding the time-element legacy star, he found a space-element one.

What kind of talent did this little guy possess?

Or did he truly possess some special means to locate the corresponding legacy stars?

The two formidable figures from the stellar academy were now genuinely puzzled.

Mainly because Wang Teng didn't go to accept the legacy but kept poking legacy stars, leaving them utterly baffled.

After some time, Wang Teng found another constellation space-element legacy star.

This left the two god-stage martial warriors exchanging glances, even more convinced that Wang Teng must have some special means to locate these legacy stars.

Mind you, whether it was the time constellation legacy star or the space-element legacy star, they were all extremely rare. Other martial warriors might come across one, and that would be considered very fortunate. However, Wang Teng had found so many, leaving people with plenty to ponder.

"A universe-stage space-element legacy star!" Wang Teng's eyes slightly lit up. He was genuinely surprised.

Without hesitation, he began to poke it.

Boom!

An extremely terrifying spatial fluctuation instantly rippled out, prompting Wang Teng to swiftly dodge and reappear in the distance.

Several attribute bubbles emerged from within the legacy star, hovering in the surroundings.

Get them!

Wang Teng silently exclaimed in his mind as his spiritual power reached out, picking them up one by one.

Chronicles of Space\*4500

Chronicles of Space\*3800

Space Domain\*2000

Space Domain\*2200

Origin of Space\*700

Origin of Space\*600

...

"I can't believe it! What a huge harvest!" Wang Teng's eyes widened slightly, utterly surprised by the abundance of gains this time.

The universe-stage legacy star was terrifying!

Wang Teng couldn't help but sigh at the unexpected windfall. Then, he turned his attention to the changes in the attributes board.

However, when he saw the first attribute value, he couldn't help but feel a bit speechless.

It was the Chronicles of Space again!

Why couldn't he get a specific scripture or battle technique?

Wang Teng felt a bit helpless, but before he could ponder more, relevant insights immediately emerged in his mind. Astonishingly, these were insights from within the Chronicles of Space.

He suddenly realized that the insights gained from this Chronicles of Space were much more profound than before.

Despite both being Chronicles of Space, the insights were different.

In an instant, Wang Teng gained some enlightenment.

The Chronicles of Space was probably the insights of a space-element martial warrior, just presented in this particular form.

Chronicles of Space (universe stage): 6600/10000 (specialized)

Wang Teng glanced at the attributes board, somewhat surprised.

This time, the "Chronicles of Space" had the words "universe stage" added to it, indicating a clear connection between the two. Now, this universe-stage Chronicles of Space seemed to replace the previous Chronicles of Space obtained from the cosmos-stage legacy.

Furthermore, Wang Teng's mastery of the Chronicles of Space had progressed from well-versed to specialized, instantly advancing to a higher level.

His proficiency in controlling spatial energy became extremely adept, making future applications of spatial power more fluid.

Next was the Space Domain attribute, and this time, he unexpectedly gained a substantial 4,200 points.

Space Domain: 500/4000 (fourth-rank)

As a result, Wang Teng's Space Domain jumped from the second-rank to the fourth-rank. It rose two levels.

Wang Teng was overjoyed; this time, he truly struck gold. Even the Space Domain had advanced so much.

Finally, there was the Origin of Space attribute, totaling 1,300 points, a considerable amount.

This was the power of laws of origin, one of the most challenging to comprehend among various origin laws.

Although Wang Teng had already grasped the Origin of Space, it wasn't much—only 630 points of attribute value. This time, he gained more than he did in the previous encounter in the Chaotic Uncharted, a whopping 1,300 points of attribute value.

Origin of Space: 1930/10000 (first-rank)

Unfortunately, he didn't acquire any space scriptures or battle techniques, leaving Wang Teng somewhat disappointed.

Wang Teng looked at the universe-stage legacy star in front of him, hesitating. Should he accept this legacy?

Time was running out. The delay earlier had left him with less than a day. If he couldn't find a higher-level space-element legacy star, he would be at a significant loss.

He couldn't afford to act recklessly now. If he probed carelessly again and the current space-element legacy star disappeared, he might not be able to retrieve it.

Feeling a bit helpless, Wang Teng ultimately decided to search once more. He was unwilling to settle for a universe-stage legacy star, even if it was a space one.

## **Chapter 2192: We Underestimated This Little Guy's Decisiveness! (2)**

Then he left directly to search for other legacy stars.

"He doesn't even want the universe-stage space-element legacy star? Does he really possess space talent?" The fire god-stage martial warrior asked.

"He has space talent," the president unexpectedly revealed, smiling. "But his decisive abandonment of this universe-stage legacy still surprises me. It seems, as I suspected, he is aiming for a god-stage legacy."

"President, you knew about it already?" The lightning god-stage martial warrior asked in surprise.

"Yes, he once used his space talent. It's not much of a secret." The president nodded.

The two god-stage martial warriors were speechless. The president had known all along, yet he watched them speculate, seemingly for his own amusement.

"He truly is a space talent. This young man's talent is exceptional," the lightning god-stage martial warrior remarked, his gaze flashing.

The fire god-stage martial warrior nodded in agreement. A martial warrior with a powerful physical body and the bonus of space talent was already extraordinary, a rarity in the world.

"Even so, I still don't believe he can obtain a god-stage legacy." The fire god-stage martial warrior shook his head.

The president was now somewhat uncertain. It seemed that if Wang Teng was indeed seeking a god-stage legacy related to space, the difficulty would undoubtedly increase.

For ordinary god-stage legacies related to the five elemental forces, the president believed Wang Teng might have a chance. However, a god-stage legacy focused on space was exceptionally rare, and finding it was far from guaranteed.

"I recall there aren't many space legacies in the Grand Universe Hall, right?" The lightning god-stage martial warrior asked.

"Yes." The president nodded. "There's only one god-stage space legacy!"

The lightning god-stage martial warrior and the fire god-stage martial warrior fell into silence, their gazes converging on Wang Teng.

Only one. Could he find it?

...

Wang Teng raced through the void, almost reaching his maximum speed as he dashed toward the depths of this spatial expanse.

He believed that if there were god-stage legacies, they must be located in the deepest part of the Grand Universe Hall.

The surrounding starry sky gradually became more profound, turning pitch black, devoid of any stars, and completely void of light.

In such an environment, even perception seemed incredibly difficult.

Frowning, Wang Teng activated the fourth-rank Space Physique to its utmost. Waves of spatial energy emanated from him, forming a vast net that extended in all directions.

As time passed, the remaining time grew shorter, leaving only half a day.

"Could it be that there is no god-stage space-element legacy?"

Wang Teng's brows furrowed deeper and deeper.

During his ascent of the staircase in the Godslayer Sword Scripture, he had gained the Godslayer Sword Scripture.

This was a divine-level space-element battle technique.

In terms of heritage, the Great Qian Academy was undoubtedly inferior to the Stellar Academies.

In theory, the Stellar Academies should not lack god-stage legacies.

Unfortunately, the facts were apparent.

Wang Teng couldn't help but sigh. If things didn't work out, he might have to give up. He didn't have time to waste anymore. Perhaps it was his fate to seek god-stage legacies related to other Forces instead.

He activated various elemental talents and swiftly headed in a direction.

An hour later, he suddenly came to a halt.

He felt it!

It seemed to be a lightning-element legacy star.

In his perception, there appeared to be a massive star in the void ahead, radiating a dazzling light.

This radiance was even more intense than the eternal-stage legacy stars he had encountered earlier.

This must be a god-stage legacy!

The lightning-element god-stage legacy was an excellent choice too.

Without hesitation, Wang Teng rushed towards it.

However, after flying thousands of meters, he suddenly stopped. A subtle movement in his heart made him gaze skeptically at another section of the void.

It was as if something there was calling out to him!

Wang Teng's Space Physique remained active. He felt a restless sensation in his body as if it wanted to rush in that direction.

But this was just an impulse. He didn't sense the presence of any legacy there, and it seemed quite distant.

It wasn't like the lightning-element god-stage legacy. Wang Teng could already feel the scorching heat before he got close to it.

This feeling was undeniable.

The lightning-element god-stage legacy was right in front of him!

On the contrary, the impulse from the other side was filled with uncertainty.

Wang Teng suddenly found himself in a dilemma.

"Didn't he discover the lightning-element god-stage legacy? Why did he stop?" The fire god-stage martial warrior was surprised.

"This kid is quite lucky!" The president's expression was peculiar.

"President, did you see something?" The lightning god-stage martial warrior asked curiously.

Within the Grand Universe Hall, the president's authority surpassed theirs. What they couldn't see, the president might still be able to.

Hence the question.

"You'll see." The president shook his head. His gaze had never left Wang Teng, and he was curious about which choice Wang Teng would ultimately make.

...

In the void, Wang Teng hesitated for a moment, then gritted his teeth and rushed towards the unknown.

He raced madly through the void, covering quite a distance. Now, he could only follow his instincts. Otherwise, he couldn't perceive anything at all.

Time passed bit by bit— one hour, two hours...

The sensation became increasingly intense, but time continued to dwindle.

"Why haven't I arrived yet?" Wang Teng felt a bit frantic. The distance was beyond his expectations. He had been flying for so long and still had yet to reach. Could it be that his intuition was wrong?

But now that he had come this far, going back to find the god-stage lightning-element legacy star was no longer an option. He could only grit his teeth and continue flying forward.

Boom!

Wang Teng immediately activated his Space Flash and Light Bolt skills. His body turned into a streak of light, flickering in the void—sometimes disappearing, sometimes reappearing—swiftly traversing through space.

"The time is running out. This kid is getting anxious!" The fire god-stage martial warrior shook his head.

"If the time runs out, and he still hasn't found the corresponding legacy, will you really let him leave?" The lightning god-stage martial warrior asked.

This was an extremely rare opportunity. If he missed it like this, it would be a pity.

Wang Teng was a talent they had high hopes for. If he failed to obtain a legacy in the Grand Universe Hall, it would be a significant loss of opportunity.

The president set the time limit, and if it needed changing, it could be changed. It all depended on the president.

"It's his own choice. No one can be blamed," the president said casually. "The growth of a genius is more challenging, with many more trials than an ordinary warrior. If he can't overcome such trials, it only means his temperament is not enough."

"There are gains and losses. If he wants a better legacy, he must be prepared to get nothing," the fire god-stage martial warrior added.

"Alright, you two seem to be taking it lightly." The lightning god-stage martial warrior shook his head.

He was an impulsive person while the president and the fire god-stage martial warrior were more rational.

Unaware of the exchange between the president and the two god-stage martial warriors, Wang Teng only had one thought at this moment—find it, find that legacy, or he wouldn't be content.

There was only one hour left.

Wang Teng's speed had reached its maximum, and in the void, only the lingering afterimage of a streak of light could be seen.

He had become the sole light in this pitch-black void.

Until a faint starlight appeared in front!

In this dim void, that speck of starlight was extremely eye-catching!

Wang Teng shuddered, an uncontrollable joy surging from the depths of his heart, almost spreading through his entire consciousness.

He saw it!

He finally saw it!

It was indeed a god-stage legacy star!

As the distance shortened, the starlight in front gradually enlarged, transforming into a colossal, silver-white, radiant celestial body.

Alright, it's you!

Wang Teng couldn't help but burst into laughter. His eyes shimmered with a brilliant light, and with almost no hesitation, his figure turned into a streak of light and plunged into that legacy star.

Boom!

A terrifying roar echoed, the void trembled, and the colossal celestial body suddenly erupted with endless radiance, as if it wanted to illuminate the entire void.

In an instant, everything seemed to freeze.

Invisible spatial fluctuations swept through, and the massive silver-white celestial body vibrated continuously as if welcoming Wang Teng's arrival.

The president and the two god-stage martial warriors widened their eyes slightly, completely unprepared for the fact that Wang Teng would rush into the legacy star without a moment's hesitation.

"This is too impulsive!" The fire god-stage martial warrior sighed.

"Is he not afraid of being rebounded and killed by this legacy star?" The legacy stars asked.

"Phew!" The president let out a sigh, smiling bitterly. "We underestimated this young man's decisiveness!"

## **Chapter 2193: Wang Teng Didn't Find A Master? The Gathering Of The Judges! (1)**

Ten days flew by in the blink of an eye!

The Seventh Stellar Academy's Grand Disciple Acceptance Ceremony had come to a close. Many talented students were accepted as disciples by the academy's formidable figures, embarking on the challenging path of cultivation.

Don't think that becoming a disciple guarantees an easy life. On the contrary, even harsher trials await them.

The methods of these academy powerhouses were no joking matter.

Strict masters create outstanding disciples!

To uphold their prestige, the academy instructors could be exceedingly strict with their teachings.

Of course, those students without masters had it even tougher. They could only rely on themselves and risk their lives to gain experience.

Half a year ago, almost all students were practicing within the academy. Now, they must venture outside, undertake various missions, experience life and death situations. This was the best and fastest way for them to improve.

Warriors need to undergo challenges. Staying in the stellar academy for practice would only make them weak.

Whether it was a student who had a master or a student who didn't, there would always be one person's whereabouts that caught their attention.

His significance was vastly different.

He single-handedly suppressed all the geniuses of the Seventh Stellar Academy, rightfully earning the title of the strongest freshman!

Unconsciously, many people regarded him as the leader of the new generation, even a spiritual guide.

This was something he had earned!

Few dared to challenge him, and most could only admire him.

Even those who didn't want to admit it had to acknowledge his achievements. They could only plan in secret, as he was currently in the spotlight.

Many people treated it as their target.

Others considered him the leader of the new generation, an inspiration, and perhaps even a legend in the making.

With a target, they could go further.

At the same time, a piece of news spread from within the academy.

"Wang Teng doesn't have a master!"

This piece of news shocked many, leaving them surprised and puzzled.

With Wang Teng's talent, how could he possibly not have a master?

This doesn't make sense!

Moreover, wasn't he taken away by the president in the end? Why wouldn't he have a master?

"It must be fake!"

Many questioned the authenticity of this news, thinking that someone was trying to smear Wang Teng and undermine his reputation.

"Who is spreading rumors?"

"How can the president not have a master!"

"Yeah, our president's talent far surpasses everyone. It's impossible for him not to have a master!"

"Our academy's president took him away. He might become the president's disciple. Stop being bitter, shut your stinking mouths."

...

The members of the Constellation Society were infuriated. They wished they could find the person who spread the rumor and let everyone know his evil intention.

"He hasn't found a master!"

"The president didn't take in a disciple either!"

But, at this moment, even Yuan Mu stood up and spoke up.

Many were astonished, finding it hard to believe that Wang Teng did not find a master.

"Is that true?"

"No way!"

The members of the Constellation Society didn't believe him. With their leader's talent, even if he couldn't become the disciple of a god-stage martial warrior, he could become an eternal-stage ruler's disciple. Why didn't anyone accept him as their disciple?

At the same time, Yue Qiqiao, Wu Yan, Yu Yunxian, and the others came back with news that Wang Teng didn't have a master.

They brought back confirmation that Wang Teng indeed had not taken a master. This information came directly from their instructors.

The members of the Constellation Society were dead silent. Their president didn't acknowledge anyone as his master!

If it were just hearsay from outsiders, they might not have believed it, but coming from individuals like Yue Qiqiao, Wu Yan, Yu Yunxian, and others, they had no choice but to accept it.

"How did this happen? Why didn't the president take him in?" Someone asked.

But the answer they received from Yue Qiqiao, Yu Yunxian, and the others was two words — "Don't know!"

The members of the Constellation Society were disappointed. Wang Teng, who was ranked first on the Freshmen Leaderboard and had conquered the Spiritual Hollow Mountain, had inexplicably chosen not to have a master. It was a reality they found hard to accept.

"Hahaha..."

Upon hearing this news, the members of the Qingyan Society erupted into joyous laughter, reveling in their malicious delight.

The relationship between the Qingyan Society and Wang Teng had always been tense. Despite Wang Teng's outstanding performance on the Spiritual Hollow Mountain, the fact that he did not have a master now significantly reduced the perceived threat. This was precisely what the members of the Spiritual Hollow Mountain wanted to see.

"Hmph, a talented individual who doesn't have a master. Let's see how long your arrogance lasts." Ruan Banlian sneered with a hint of resentment in her eyes.

"Now that he doesn't have a master, I do not need to be cautious. It's time to employ those methods," Feng Qingyan said indifferently.

"Make it quick. I can't wait to see him fall from grace," Ruan Banlian added with a cold tone.

...

"That fellow doesn't have a master!" Shi Tianyun and Shen Yanfeng were elated.

During their ascent of the Spiritual Hollow Mountain, their performance in the final moments left much to be desired, and many eternal-stage martial warriors did not take them as disciples. However, their talents were commendable, and eventually, they found two eternal-stage marquesses.

If Wang Teng had a master, their current situation wouldn't have mattered much. However, with Wang Teng not having a master, their advantages became more apparent.

Perhaps they could now resolve the issue of that contract.

"Wang Teng didn't acknowledge anyone as his master!" Wan Dong and the others blinked.

They were still under the influence of the poison, and if Wang Teng had a god-stage martial warrior as his master, they wouldn't dare use other means. However, with Wang Teng not having one, everything changed.

## **Chapter 2194: Wang Teng Didn't Find A Master? The Gathering Of The Judges! (2)**

"I will ask for help from a friend who ranks among the top 100 heaven-stage martial warrior ranking. I don't want to be controlled by poison forever," Cob declared.

Gikdor, Wu Cheng, Dong Lei, and the others kept quiet. Their expressions kept changing.

"Do you still expect him to show mercy?" Cob sneered as he observed their reactions.

"Cob, even if he doesn't have a master, our lives are still in his hands. Are you sure it won't be a problem?" Wu Cheng asked.

"If he wants to continue staying in the Stellar Academies, he needs to learn how to compromise. I don't believe that he can do anything to me in the Stellar Academies," Cob said firmly.

"That's not necessarily true. Considering his personality, do you think he would be afraid?" Dong Lei suddenly spoke up.

"Hmph, even if he's not afraid, what does it matter? Although he's a monstrous talent, can he compare to the geniuses on the top 100 list?" Cob huffed disdainfully, then turned and walked away. His voice echoed from a distance, "If you want to be his dogs, I won't stop you, but I will never submit."

"Ridiculous!" Wu Cheng and the others' expressions turned sour. Cob's words were harsh, hitting them directly in their emotional wounds.

Wan Dong turned and left silently.

"I still think we shouldn't act recklessly," Gikdor spoke after a moment of silence.

"I agree," Dong Lei hesitated for a moment and nodded, "And I feel there's something suspicious about Wang Teng not having a master."

"Oh?" Gikdor and Cob looked at her in surprise.

"A woman's sixth sense," Dong Lei said.

Gikdor: ...

Wu Cheng: ...

The news that Wang Teng didn't have a master spread far and wide, stirring various reactions among the people.

Given Wang Teng's immense reputation as the strongest freshman, many eyes were on him.

The fact that he didn't have a master was a significant piece of news with far-reaching implications.

At the same time, there was another question that intrigued many.

Where did Wang Teng go?

Since the day he was taken away by the dean on the summit of the Spiritual Hollow Mountain, Wang Teng had not reappeared.

Since he didn't acknowledge the president as his master, where did he go?

This question remained unknown to everyone except the president and the two god-stage martial warriors.

The Academy Arbitration Association!

Seven figures appeared at the highest level of the Arbitration Association.

The seven judges gathered again!

And this time, they convened for the same person, Wang Teng!

It had to be admitted that since the establishment of the Academy Arbitration Association, Wang Teng was the only new student who could mobilize them in such a way.

"What brings us all together again?" The Judge seated in the third chair spoke.

"Do you remember what happened half a year ago?" the Seventh Judge asked indifferently.

"Half a year ago? What happened half a year ago?" The Fourth Judge inquired.

"The freshman named Wang Teng. Initially, we offered him a position as an associate council member, but he rejected it," the Seventh Judge said casually.

"Wang Teng!" The Judges immediately remembered this name.

"He didn't accept the associate council member position?" The Fifth Judgment smiled with interest.

"He didn't report to the Academy Arbitration Association half a year ago," the Seventh Judge stated.

"He seems to be a tough one." The Sixth Judge chuckled.

"If he didn't accept it, then so be it. Why gather us for such matters? Can't the lower ranks handle it?" The Second Judge said indifferently.

"The issue is that he has now claimed the top spot on the Freshmen Leaderboard and even ascended to the summit of the Spiritual Hollow Mountain," the Seventh Judge continued.

"The summit of the Spiritual Hollow Mountain!"

The rest of the Judges were instantly surprised, and their gazes fell on the face of the First Judge.

Sitting in the first chair, the First Judge, who had been resting with closed eyes, suddenly opened his eyes. A peculiar light flashed in his eyes as he looked at the Seventh Judge, his voice slowly echoed.

"You say he ascended to the summit of the Spiritual Hollow Mountain?"

"That's right!" The Seventh Judge calmly affirmed. "You may not be aware of this as you are not within the academy, but this matter is widely known among the people of the Seventh Stellar Academy."

"Intriguing," the First Judge murmured to himself.

"Never thought that after so many years, there would still be someone able to reach the summit of the Second Judge." The Second Judge pondered, looking at the First Judge.

"Speaking of which, when you ascended the Spiritual Hollow Mountain back then, did you unravel the mysteries of the mountain?"

The other judges looked over. They were curious too.

"I can't say," the First Judge said.

The other judges were disappointed.

"After Wang Teng ascended to the summit of the Spiritual Hollow Mountain, he disappeared for a very short period!" The Seventh Judge suddenly dropped a bomb.

"What!?" The First Judge was about to close his eyes, no longer interested in the matter. However, upon hearing the Seventh Judge's words, he widened his eyes again.

"Disappeared!" The other judges were equally astonished.

"Why did he disappear?" The Third Judge asked in surprise.

"I don't know." The Seventh Judge looked at the First Judge as if expecting to find the answers from him.

The First Judge furrowed his brow, full of confusion, evidently not knowing the details. Back then, he had only managed to discern some clues and had not truly encountered the phenomenon.

"It seems that this Wang Teng has an extraordinary fate," the Second Judge remarked meaningfully after a brief silence.

"After his return, our president and the two true gods took him away. No one knows where he went. Shortly afterward, news spread from the academy that no one had accepted him as a disciple," the Seventh Judge explained.

"No one accepted him as a disciple?" The other judges were astounded.

"Considering Wang Teng's talent, it's impossible for no one to accept him as a disciple." The Third Judge expressed doubt.

"That is the most intriguing part of the story," the Sixth Judge added.

"I recall that upon reaching the summit of the Spiritual Hollow Mountain, one could enter the Grand Universe Hall and choose a legacy," the Second Judge mentioned.

"Indeed!" The First Judge confirmed.

He was the only one who managed to enter the Grand Universe Hall because he reached the peak of the Spiritual Hollow Mountain.

"It seems that Wang Teng also entered the Grand Universe Hall," the Third Judge said with a touch of envy. "We just don't know what kind of legacy he received."

"First Judge, can you finally reveal what legacy you obtained back then?" The Second Judge inquired.

"An eternal-stage legacy!" The First Judge replied calmly.

"An eternal-stage legacy!" The other judges were taken aback.

"It appears you were already far ahead of us at that time," the Second Judge remarked meaningfully, looking at the First Judge.

"What kind of legacy do you think Wang Teng will get?" The Fourth Judge asked.

"At most, an eternal-stage one!" The Fifth Judge stated.

"Yes, with his talent, he should be able to obtain an eternal-stage legacy," the Second Judge nodded.

"So, what do you think of Wang Teng's arrangement?" There was a strange look in the Seventh Judge's eyes as he changed the topic.

"Are there any other instructions from the academy's higher-ups?" The Second Judge inquired.

"Not at the moment," replied the Seventh Judge.

"The current issue is how we should handle the placement of Wang Teng," the Fourth Judge stated.

"Since the academy hasn't provided specific instructions, we will stick to the original decision," the Fifth Judge calmly said. "Being an associate council member is sufficient for a new student."

"That settles it!" The Seventh Judge declared.

He didn't deviate from the original decision.

The gathering of the seven Judgments to discuss this matter was merely a formality according to the rules of the Academy Arbitration Association.

"The councilor assessment is approaching," the Sixth Judge suddenly remarked.

"With his ability, it's too early for him to participate in the councilor assessment. Let him be a council associate member first," the Seventh Judge said.

"Wang Teng doesn't accept the invitation. Forcing him into this role might lead to trouble," the Third Judge frowned.

"And many strong individuals from your Seventh Stellar Academy are probably keeping an eye on him. This matter is no longer so simple," the Second Judge added.

"He's just a freshman. Even if his talent is indeed remarkable, it shouldn't lead the academy's strong figures to intervene in our affairs at the Academy Arbitration Association. This has never happened before," the Fourth Judge chuckled.

"It's hard to say." The Second Judge shook his head.

"Since opinions are not unanimous, let's put it to a vote," the Third Judge proposed.

"Alright!"

The judges agreed.

After a round of voting, the results quickly emerged.

Only the First Judge opposed, surprising the other judges.

The Fourth and Sixth Judge chose to support the decision of the Seventh Judge, while the rest abstained.

In the end, the Seventh Judge won with two votes.

"Then let's stick to the original decision." The Seventh Judge's lips curved slightly.

The other judges didn't say more, their figures disappearing from their seats.

## **Chapter 2195: Spatial Sight! (1)**

The Grand Universe Hall.

In the profound depths of the vast void, a massive silver-white star quietly floated.

Three figures abruptly appeared not far from this star.

"It's about to end!"

The president looked at the silver-white star and opened his mouth.

"I never expected him to obtain a god-stage legacy!" The fire god-stage martial warrior remarked with a complex expression.

"What's more, it's the legacy of a space-element god-stage martial warrior. This is the only one in the Grand Universe Hall." The lightning god-stage martial warrior shook his head and sighed.

"Stop pretending, you two. We made a bet, and it's time to settle it." The president chuckled.

The expressions of the two god-stage martial warriors stiffened. They felt a bit frustrated. Since Wang Teng received a god-stage legacy, they lost their bet.

Whether it was the Five-Colored Soil that the fire god-stage martial warrior took out or the Lightning Tribulation Elixir that the lightning god-stage martial warrior took, they were both rare treasures. It was enough to make the two god-stage martial warriors' hearts ache for a long time.

The two god-stage martial warriors felt a bit reluctant, but they couldn't renege on the bet. In the end, they took out their respective bets and handed them over to the president.

"Good, good!" The president laughed heartily. He was extremely pleased as he accepted the items amidst the somewhat reluctant gazes of the two god-stage martial warriors.

"This kid, why did he have to be so different?" The fire god-stage martial warrior said helplessly.

"Yeah, he could have just taken an eternal-stage inheritance. Why such grand ambitions?" The lightning god-stage martial warrior also expressed his frustration.

"Hahaha..." The president couldn't help but burst into laughter.

It was amusing to see the two god-stage powerhouses grumbling about a junior having such exceptional talent. If this were to be known by others, it would undoubtedly be a source of great amusement.

While the three were conversing, the silver-white star in front of them suddenly trembled, catching their attention.

Boom!

A thunderous roar echoed as terrifying spatial fluctuations radiated from within the silver-white star.

The president and the two god-stage beings remained remarkably composed, standing calmly only tens of meters away from the silver-white star.

The intense spatial ripples emanated from the star, sweeping over them, but they were completely unscathed. There was not a hint of disturbance in the space around them.

This was the ability of a god-stage martial warrior. With their mastery of space, the feeble force of space couldn't affect the spatial stability around them.

Amidst the thunderous sound, the silver-white star slowly contracted.

The surface radiance subdued, revealing intricate runes within it.

Crack...

These runes formed chains, entwining around the black-haired young man at the center.

Boom!

The next moment, all the runes completely shattered, transforming into a myriad of starlight, vanishing into the void.

The radiance of the entire silver-white star also entirely retracted. The black-haired young man within the star finally slowly opened his eyes. Two silver-white beams shot out from his eyes, piercing through the depths of the void.

This light was strange as if it could penetrate space, appearing instantaneously at unimaginable distances.

It took a while for the radiance in the young man's eyes to gradually recede. However, his pupils still maintained an extremely peculiar silver-white color, emitting an ultimate sense of coldness and majesty.

"Hmm!" the two god-stage martial warriors lightly exclaimed, observing Wang Teng's eyes, and their eyes gradually revealed a hint of surprise.

"His eyes underwent a transformation, allowing him to see through space," the president said.

The two god-stage beings nodded. They naturally also saw the clues and became increasingly astonished.

"What great fortune! I never expected that the abilities of that Space True God from years ago to pass down in this manner." The fire god-stage martial warrior sighed.

"For Wang Teng to gain the recognition of this legacy, his space talent must be extraordinary." The lightning god-stage martial warrior remarked.

At this moment, Wang Teng's eyes gradually returned to their original state, no longer displaying the previous silver-white color. He looked at the president and the two god-stage martial warriors, slightly stunned. Immediately, he walked over and respectfully saluted.

"Presidents! Elders!"

"Wang Teng, you surprise us. You managed to get the god-stage space legacy," the president stroked his beard and said.

"You're flattering me. I'm just lucky," Wang Teng replied humbly.

"I'm not praising you. We saw the entire process of you searching for the legacy. This isn't luck." The president chuckled.

Wang Teng scratched his head, looking a bit shy.

"Hahaha..." The president and the two god-stage martial warriors burst out laughing when they saw his reaction.

"Wang Teng, you are indeed outstanding. Among the many geniuses I've encountered, you are undoubtedly the first." The fire god-stage martial warrior patted Wang Teng on the shoulder, sincerely praising him.

Wang Teng was genuinely surprised.

"Ambitious but not reckless. Once you make a choice, you are decisive. To put it simply, not everyone can achieve this." The lightning god-stage martial warrior nodded in agreement.

Wang Teng didn't know what to say anymore. He even felt a bit overwhelmed. The president and these two god-stage elders were speaking so kindly, praising him incessantly, making him feel a bit awkward.

"Wang Teng, do you know what will happen if you hesitate when you see the god-stage legacy?" The president asked.

"There wasn't much time left. If I had hesitated any longer, I'm afraid I would have missed this legacy," Wang Teng replied.

"That's right. You were very close to missing it. Just a bit more hesitation, and you would have missed this legacy," the president said.

"It seems my luck is quite good," Wang Teng couldn't help but feel fortunate. If he had been a little slower at that time, he might have truly missed out on this legacy.

## **Chapter 2196: Spatial Sight! (2)**

"In this regard, you do have quite good luck." The president chuckled.

Wang Teng grinned. He felt like the president was unusually happy. His smile was exceptionally bright.

"Let's go. Since you've obtained the legacy, it's time to leave," the president said.

Before Wang Teng could react, he felt a sudden blur, and in an instant, he disappeared from where he stood.

Almost instantly, he found himself standing on solid ground. The scene before him was none other than the square of the Grand Universe Hall.

Wang Teng's eyes showed surprise. The True Gods' methods were truly incredible. This teleportation speed was even faster than his.

"Wang Teng, although we haven't taken you as a disciple, if you encounter any problems in your cultivation or troubles you can't solve, you can come to us."

The president's voice echoed in Wang Teng's ears, but there was no sign of the president himself.

Wang Teng looked around. The president and the two god-stage beings had quietly left without him noticing.

The president's voice dissipated gradually, and Wang Teng, with a slight joy in his heart, bowed toward the sky.

To receive such a promise from the president indicated that his master held quite a bit of weight.

Wang Teng didn't know that he helped the president to win the bet against the other two god-stage beings. That was why he was elated and offered him help.

Of course, one of the reasons was because they had high hopes for Wang Teng.

As a member of the Stellar Academies, they naturally hoped that Wang Teng could go even further.

...

Without lingering any further, Wang Teng left the Grand Universe Hall square. The place was now empty. Everyone had left, and the Grand Disciple Acceptance Ceremony had long concluded.

It was somewhat nostalgic. Among the strong individuals of the Stellar Academies, he was the only one who hadn't taken a master, and instead, he found a master from an unknown origin.

After leaving the square, Wang Teng took out his universe-level spacecraft and flew toward the residence area for cosmos-stage students.

In no time, the spaceship returned to Wang Teng's estate. Stepping out of the spaceship, he descended from the sky.

Back in the estate, Cao Jiaojiao, upon learning the news, emerged from the cultivation chamber.

"Has the Grand Disciple Acceptance Ceremony ended?"

She had been alone in the estate, unable to leave, but she could access some information through the internal network. Hence, she knew about the Grand Disciple Acceptance Ceremony.

"It's over!" Wang Teng nodded.

"I saw many people discussing it on the internal network, saying that you don't have a master?" Cao Jiaojiao hesitated for a moment and asked.

"Who said I don't have a master?" Wang Teng was surprised.

"I don't know where it came from at first. Later, a guy named Yuan Mu came out to confirm it, and many people from your Constellation Society also confirmed it," Cao Jiaojiao said.

Wang Teng's expression was strange. He asked Round Ball to open the internal network and check some of the information.

He couldn't help but find it amusing. It turned out that these people thought he didn't have a master!

Hmph!

He even saw quite a few sarcastic comments. It seemed that many people were very pleased about the fact that he didn't have a master.

Unfortunately for them, they were destined for disappointment.

Wang Teng couldn't help but stroke his chin, a wicked curve forming at the corner of his mouth. He had no intention of clarifying the situation. He would let these people continue to misunderstand.

Observing his expression, Cao Jiaojiao instantly knew that Wang Teng definitely had a master, and the master he chose wasn't ordinary. Those people were in for an unpleasant surprise.

"Your cultivation has improved quite a bit," Wang Teng remarked, looking at Cao Jiaojiao.

"Yeah," Cao Jiaojiao nodded. The Stellar Academies had an abundant of Forces, making it very conducive to cultivation. Even though she couldn't leave the estate, practicing here was much easier than outside.

"Well done. Keep up the good work!" Wang Teng praised, then headed towards the house.

A hint of joy involuntarily appeared in Cao Jiaojiao's eyes, even though she didn't realize it. Pleased by Wang Teng's praise, a trace of excitement unknowingly fluttered in her heart.

"I'm exhausted. Come and serve me for a bath," Wang Teng said.

Cao Jiaojiao's pretty face immediately stiffened.

——Skip 5,000 words here——

When Wang Teng walked out of the bathroom. He felt refreshed, and much of the fatigue that had clung to his body had dissipated.

The Grand Disciple Acceptance Ceremony was an exhausting experience for him. Climbing two mountains consecutively, both physically and mentally, imposed a significant burden. Even during the ascent of the second mountain, his spirit had nearly reached the point of collapse.

After that, he was brought to the Grand Universe Hall to choose his legacy. To get more attributes, he searched for all kinds of legacy without stopping. He almost died from exhaustion.

Fortunately, the harvest this time was extremely abundant!

His hard work had not been in vain.

Entering the cultivation room, Wang Teng sat cross-legged, prepared to take stock of this fruitful journey.

First and foremost, he had gained a master!

This master seemed to be a super powerhouse, but the extent of their strength remained unclear to him.

Wang Teng took out the token his master gave him and scrutinized it. The patterns on it were extremely peculiar, but he couldn't discern their meaning. Helplessly, he put it away.

"Too bad I can't speak to him anymore!" Wang Teng said dejectedly. He then stroked his chin and continued, "But it's still good. With the president and the others, even if it's not as close as having a personal master, occasionally getting their help should be fine. Hmm, I need to strike a balance and not be too presumptuous."

"Sigh, after all, they're not my masters."

Wang Teng sighed uncontrollably.

Afterward, he stopped dwelling on it and turned his attention to himself. Compared to external forces, his own strength was the most crucial. Redirecting his thoughts, he glanced at the attributes board, and a slight smile formed at the corners of his mouth.

## **Chapter 2197: Spatial Sight! (3)**

The three Origins of Universe his master gave him pushed him to the limit of the cosmos stage. This was an unimaginable benefit.

Without his master's assistance, he would have to think of a way to reach his limit when he broke through in the future.

Doing so would undoubtedly increase the difficulty significantly.

The Origin of Universe was incredibly precious. It was refined from a destroyed universe in the Cosmic Uncharted.

If it were not for his master, Wang Teng would probably find it very difficult to obtain such treasures.

In addition, he acquired various legacies in the Grand Universe Hall, including nearly a complete set of cosmos-stage Star Formula Scriptures.

Wang Teng closed his eyes, and the scriptures immediately appeared in his mind for comparison.

He found that these scriptures could indeed be integrated.

However, this integration was different from his Chaos Constellation Scripture. It wasn't a complete fusion. Instead, it seemed to form a kind of cycle.

Also...

"This set of scripture seems to have some deficiencies!" Wang Teng opened his eyes, a glint of light shimmering in them. He mused to himself, "Is it lacking a Dark Force scripture? Hence the discontinuity when reaching the Light Force scripture?"

Wang Teng's mastery of Forces was too comprehensive, allowing him to notice the issue at a glance.

Normal martial warriors might not notice this problem.

Of course, for an ordinary martial warrior, the integration of this set of scriptures was unnecessary. At most, it could serve as a foundation for cultivating multiple Forces simultaneously.

However, this scripture provided many insights for Wang Teng and was quite helpful for him in creating the heaven-stage Chaos Constellation Scripture.

"If I can create the Star Dark Formula, could it compensate for the shortcomings in this Star Formula Scripture?" Wang Teng pondered, unable to suppress a laugh.

After all, he was not the predecessor who created this set of Star Formula Scripture. It wasn't so easy to create a dark attribute scripture rooted in the same origin as this one, based on the foundations laid by his predecessors.

This idea was somewhat wishful thinking.

Shaking his head, Wang Teng shifted his gaze to the gains from the space legacy.

Space god-stage legacy!

It was the last inheritance Wang Teng obtained, bringing him immense benefits beyond imagination.

First, there was the rise in his Space Physique.

After obtaining this inheritance, the power within greatly benefited his Space Physique significantly advancing its capabilities.

Space Physique: 1200/500000 (fifth-rank)

Fifth-rank!

Wang Teng's Space Physique, initially at the fourth rank, had now ascended to the fifth rank. It rose by one rank.

He felt that his perception of spatial power had become more sensitive, achieving a deeper resonance with spatial forces. Moreover, he found it easier to comprehend the laws of space.

Wang Teng extended his hand, strands of spatial power emerging around his fingers.

They swiftly spun, forming a small spatial vortex that distorted the surrounding space. A dark, spatial portal appeared.

"It feels... quite effortless!" Wang Teng smiled faintly. The prowess of the fifth-rank Space Physique was indeed remarkable. With his current mastery of spatial power, he might not even need to worry about the spatial restrictions imposed by universe-stage martial warriors. He could break through them.

Next, he glanced at another attribute, and a surge of ecstasy welled up within him.

Spatial Sight: 1000/10000 (real stage)

This was an ability he acquired from the legacy, somewhat akin to Space Physique, representing another facet of his spatial talent.

However, this talent manifested in his eyes.

Spatial Sight possessed various abilities, with the simplest being the power to unleash spatial attacks through the eyes. Taking advantage of the element of surprise, it could emit a powerful spatial light wave, demonstrating formidable destructive capabilities that few could withstand.

This seemed to be an excellent way to sneak an attack on someone!

Moreover, it had other capabilities, such as teleportation. By focusing attention on an object, it could initiate spatial transfers.

The transferred objects were not limited to lifeless ones.

In critical moments, this move could be used to create unexpected troubles for enemies.

For example, during a battle, suddenly shifting an opponent's teammate into the line of their attacks would make others bear the damage.

He felt a little excited just thinking about it.

But, why did he always think about these sneaky tactics?

Wang Teng felt a bit speechless. Shaking his head, he thought about other potential uses.

This move seemed like it could also be employed for rescue purposes.

Yes, rescuing!

When a companion faced danger, this technique could be used to shift them out of harm's way.

## **Chapter 2198: My Situation Is Special! (1)**

What?

Wang Teng nodded, feeling quite clever. He could use his abilities for both deceptive and altruistic purposes, pushing his capabilities to the extreme.

At this moment, his hands felt a bit itchy... no, his eyes felt a bit itchy.

He activated Spatial Sight and a radiant silver light flashed. His irises transformed into a dazzling silver hue.

With spatial power circulating within him, his gaze fell upon several objects in the corner of the cultivation room.

Swoosh!

Those objects instantly vanished from their original positions... well, half of them disappeared!

The other half remained in place!

The separated interface was smooth and flat.

"Uh..." Wang Teng's expression turned slightly awkward. It was his first time using it, and he hadn't quite mastered it.

Fortunately, it wasn't a human undergoing the experiment. Otherwise, the person would be split into two. It was quite terrifying to imagine.

It seemed like this innate ability needed more experimentation. Failing at a critical moment would be embarrassing.

Well, he should find some enemies to test it out on at some point.

Then, he gathered Ice Force in his palm, forming an icy mirror, and checked his eyes.

"Oh my, how did I end up looking like this!"

Wang Teng was surprised as he observed his pupils. When he activated his Real Eye, at most, his eyes gained a golden glow. However, with Spatial Sight, his entire pupils turned silver-white, altering his entire aura.

He carefully observed his eyes. The transformation was not just a simple shift to silver-white but resembled diamonds with a facet-like structure, incredibly dazzling and brilliant. It looked extraordinarily strange, unlike human pupils.

"Tsk, my eyes are getting weirder and weirder." Wang Teng couldn't help but click his tongue in amazement.

Besides the aforementioned two functions, the Spatial Sight had another magical ability — Space Opening!

As the name suggested, he could open an independent space within the eyes, which could be used for storage and even concealing a person within it.

It was an excellent method for escaping.

However, when facing an extremely powerful opponent with a highly sensitive spatial perception, escaping might not be feasible.

This ability was somewhat similar to the principles of Space Fragment and the small world of universe-stage martial warriors.

The only difference was the location of the space.

One was within the body, and the other was within the eyeballs.

Opening a space within the eyeballs, even with the talent of Spatial Sight, was extremely risky. One small mistake and the eyes could explode... into goo!

"The size of the space opened by Spatial Sight is related to the space power. With my current fifth-rank Space Physique, I should be able to open a relatively sizable space,"

Wang Teng muttered to himself, "Fortunately, I obtained the legacy, greatly enhancing my mastery of spatial power. I should be able to open a space smoothly."

He decided to give it a try since having an additional open space would undoubtedly be beneficial.

Wang Teng closed his eyes and reviewed the insights left by the true god-stage legacy regarding opening space. These were the experiences of that god-stage entity in opening space initially, saving him a lot of trouble and potential danger.

After a moment, Wang Teng took a deep breath. He mobilized the spatial power within his body, slowly channeling it towards his eyes.

The spatial power circulated within his eyes, allowing them to adapt to the presence of spatial power. He then gradually increased the concentration of spatial power within his eyes until they felt saturated.

This preparation step took several hours. The eyes were delicate, and even though Wang Teng's eyes possessed various abilities, making them much stronger than an ordinary person's, they were still one of the most vulnerable parts of the body. Thus, he dared not take any risks.

Once prepared, Wang Teng steeled himself and forcefully directed the spatial power within his eyes toward a specific point.

Boom!

A thunderous sound echoed, accompanied by intense pain. Wang Teng's eyes involuntarily shed tears of blood.

"What the heck!" Wang Teng couldn't help but curse. It was way more painful than he expected. The legacy didn't mention that!

However, at this moment, he couldn't afford to dwell on the pain. He could only frantically mobilize spatial power and continue to charge towards that focal point.

Boom! Boom! Boom!

A series of explosions echoed incessantly, and Wang Teng's eyes were undergoing brutal torment. The excruciating pain almost killed him.

He tightly shut his eyes, and his eyelids trembled incessantly.

Blood tears flowed, nearly flooding his cheeks. It was a tragic sight.

Time passed slowly. The cultivation room turned silent.

At some point, Wang Teng's eyes stopped shedding blood tears, and his eyelids ceased their trembling as if the intense pain had subsided.

"This is so painful!"

Wang Teng slowly opened his eyes, gritting his teeth. The silver-white irises even showed a hint of bloody red.

But soon, a smile appeared on his face, followed by hearty laughter.

"Success!"

Wang Teng was in high spirits.

The process went much smoother than he had imagined. Although he endured significant pain in the middle, the outcome was positive, and no unexpected issues arose.

In the next moment, his figure vanished from the original spot, reappearing in another spatial realm.

"What's this?" Round Ball materialized on the side, scrutinizing the surroundings in astonishment. "Did you create a space with your Spatial Sight?"

"That's right!" Wang Teng nodded and sized up his surroundings.

This newly created space was much smaller than his Space Fragment, almost only one percent of their size. Nevertheless, Wang Teng was very satisfied.

## **Chapter 2199: My Situation Is Special! (2)**

He had an extra space. What more could he ask for?

Besides, this Space Fragment could continue growing, and it's not fixed in its current size. There was no need to worry about it being too small.

"Did you get this ability from the legacy?" Round Ball asked.

It was present when Wang Teng received the legacy. However, the president and the two god-stage martial warriors were present so it didn't dare to appear.

Hence, it knew clearly that Wang Teng had obtained the legacy.

He didn't expect the god-stage space legacy to be so amazing, granting Wang Teng a unique innate ability.

"Well, yes, but it's also because I possess the Space Physique. Otherwise, I wouldn't be able to activate the Spatial Sight," Wang Teng explained.

Round Ball nodded, acknowledging the rarity of space talent. It was not something one could attain solely through a legacy. Wang Teng's ability to activate the Spatial Sight likely stemmed from his innate space talent. In this light, everything began to make sense.

"I didn't know that the Spatial Sight is so amazing." Round Ball exclaimed, "Your talent is becoming increasingly formidable."

"There's no 'strongest,' only 'stronger.' You'll realize that what I have now is just the beginning," Wang Teng remarked.

"...You're something!" Round Ball rolled its eyes. Space Physique was already considered one of the top talents in the universe. Anything stronger would seemingly transcend the cosmos.

However, it didn't bother to argue. The more it contested, the more enthusiastic Wang Teng became. It wasn't going to give him the satisfaction.

"With this spatial ability, I won't need to rely on Space Fragments everywhere. Those fragments are my secret garden, not to be accessed by just anyone," Wang Teng explained.

"You've cultivated so many precious herbs in your Space Fragment. It would be a pity if they were accidentally destroyed," Round Ball remarked.

"Indeed," Wang Teng nodded. He and Round Ball then exited the space.

Wang Teng was extremely satisfied with the three abilities of the Spatial Sight. The convenience of using them with just a glance was beyond comparison.

Was there a talent or skill more convenient and user-friendly than this?

In addition to the enhancements in Space Physique and Spatial Sight, Wang Teng gained numerous scriptures, battle techniques, and insights into the origins and domains from the god-stage space-element legacy.

Wang Teng was surprised by the scripture.

The Godslayer Sword Scripture!

That's right, the scripture he received in the legacy was the Godslayer Sword Scripture he received when he climbed the stairs in the Great Qian Empire.

This revelation led Wang Teng to entertain some speculations—could there be some connection between the ancestor of the Great Qian Empire and the Stellar Academies?

Godslayer Sword Scripture (First Stance Slaying God): 6000/10000 (foundation)

Godslayer Sword Scripture (Second Stance Void Shatter): 5000/10000 (foundation)

The Godslayer Sword Scripture consisted of a total of nine forms, with Wang Teng having previously mastered the first form, Slaying God. Now, within the legacy, he gained unexpected joy by comprehending the second form, Void Shatter.

After all, if left to Wang Teng's own devices, it would require a considerable amount of time to gradually comprehend.

As splendid as god scriptures were, they weren't easily cultivated.

Many geniuses, upon obtaining a god scripture, would spend a lifetime contemplating it, and even then, understanding it fully was not guaranteed.

The name of the second form, Void Shatter, may not resonate as loudly as the first, but its power was not to be underestimated.

With a single sword strike, the fabric of space shattered, leaving the opponent with nowhere to hide.

If struck, the enemy, along with the space they occupied, would utterly disintegrate—a truly terrifying prospect.

Wang Teng nodded. This technique was undoubtedly a killer move and the strongest among all the divine skills he currently possessed.

Even the fourth sword of the Twelve Swords of Tyrant and the third move of the God Slayer Sword Scripture might not be his match.

With this move, Wang Teng now held an ace of overwhelming strength.

Even without using his Endless Tornado, this technique alone could contend with many opponents far beyond Wang Teng's current capabilities.

Next, Wang Teng looked at the Space Domain and the Origin of Space attributes. These two attributes increased tremendously.

Space Domain: 1200/5000 (fifth-rank); 600/2000 (second-rank actualization phase)

Origin of Space: 6550/10000 (first-rank)

His Space Domain rose from the fourth rank to the fifth rank. It rose by a level but its power was many times stronger.

A fifth-rank space domain was almost on par with a sixth-rank or seventh-rank five-element domain!

Wang Teng was pleasantly surprised that his Space Domain had reached the actualization phase too. What's more, it was at the second rank.

The comprehension of the actualization phase meant that Wang Teng had taken another step forward in the Space Domain, enhancing the potency he could unleash.

The power of laws of origin also experienced a considerable boost. Initially hovering around a modest 1,000 to nearly 2,000 points, it now surpassed 6,500 points, inching closer to the pinnacle and not far from breaking through the second rank'.

It was worth noting that the laws of the origin of space were more challenging to comprehend compared to other law forces. The significant improvement this time was a clear advantage gained from the legacy of the true god.

Indeed, he had struck it big this time.

Choosing a god-stage legacy was undoubtedly the correct decision!

Wang Teng couldn't help but marvel at the wisdom of his choice.

Fortune favors the bold.

This legacy came without any inherent danger, and if he couldn't dare to risk such an opportunity, then he might as well be squandering it.

In the future, encountering situations with immense peril but accompanied by tremendous opportunities, would he not be even more cautious?

The benefits of a god-stage legacy were apparent. In the end, the last acquisition that left Wang Teng quite satisfied was the attribute of the Spiritual Hollow Mountain.

In Wang Teng's eyes, this attribute was not inferior to an ordinary god-stage legacy.

Wang Teng mastered the art of constructing the Spiritual Hollow Mountain, making it an excellent choice whether for forging weapons or employing it directly as a spiritual assault.

Regardless of the chosen application, the construction of the Spiritual Hollow Mountain was no simple task.

However, when Wang Teng ascended the Spiritual Hollow Mountain, he had already collected all the runes on its surface. He now possessed complete knowledge of all the runes associated with the Spiritual Hollow Mountain. With his proficiency in handling it, he could easily construct it with a bit of time.

This was not an insurmountable task.

"Speaking of which, if I use the Spiritual Hollow Mountain to forge weapons, it doesn't necessarily have to be shaped like a mountain, right?" Wang Teng stroked his chin, silently contemplating.

The outward appearance shouldn't have too much influence.

As a blacksmith with his own thoughts, Wang Teng believed that aesthetics were merely superficial.

Previously, he had transformed the Thunder Seal into the Lightning Slap. Who knows, maybe this time he could turn the Spiritual Hollow Mountain into the Spiritual Hollow Slap?

However, for now, it was just a passing thought. The materials needed to forge the Spiritual Hollow Mountain were highly specialized, requiring various attributes to meet specific criteria. A simple lightning attribute wouldn't suffice.

When Wang Teng forged the Lightning Slap, aside from the main material, the dark weight luminary gold, he also used various lightning-attributed materials.

The materials required for the Spiritual Hollow Mountain were even more complex and unexpected. Wang Teng planned to visit the academy's mountain forging section later to see if he could exchange the necessary materials.

Apart from these significant gains, there isn't much else to mention—just some scattered scriptures, battle techniques, and domains. There was no need to dwell on those.

Wang Teng let out a faint sigh, feeling quite content.

"Wang Teng, Yue Qiqiao, and the others are looking for you." At that moment, Round Ball's voice came through.

"Looking for me?" Wang Teng paused for a moment, then smiled, "Seems like it's about the disciple matter."

"Probably, everyone is quite concerned about you," Round Ball remarked.

"Let them in. I'll be waiting for them in the living room," Wang Teng said as he walked out of the cultivation room.

"Alright!" Round Ball opened the gate through the estate's intelligent system, allowing Yue Qiqiao and the others to enter.

When Wang Teng came to the living room, Yue Qiqiao, Yu Yunxian, Boret, and the other talents who joined later, including Wu Yan, Tai Beisha, Baichuan Liu, and many others, came too.

"Please sit." Wang Teng smiled and gestured for everyone to take a seat. He then asked, "Have all of you found a master?"

"We've all found masters. What about you?" Yue Qiqiao furrowed her brow. As the president of the Constellation Society, whether or not Wang Teng had found a master was of great significance.

"My situation is a bit special. Don't worry about me," Wang Teng replied with a casual smile.

"Really?" Yue Qiqiao asked.

Wu Yan, Tai Beisha, and the others looked at him in surprise. A special situation? How special was it?

## **Chapter 2200: A Terrifying Number Of Materials! The Academy Arbitration Association Assessment! (1)**

"Of course," Wang Teng said, feeling a bit amused as Yue Qiqiao still seemed somewhat skeptical.

"Why didn't any strong individuals from our academy take you as their disciple?" Boret couldn't help but ask.

"It's hard to say," Wang Teng replied.

"Does it have something to do with your disappearance at the top of the Spiritual Hollow Mountain?" Wu Yan suddenly spoke up.

"Ah, didn't expect you to be quite clever." Wang Teng glanced at him, chuckling.

Wu Yan was speechless.

What do you mean by "didn't expect"?

Did you think I was stupid?

Others were also curious. Did his disappearance at the top of the Spiritual Hollow Mountain have something to do with it?

"After you disappeared at the top of the Spiritual Hollow Mountain, where did you go?" Yue Qiqiao couldn't help but ask.

"It's not something I can disclose." Wang Teng adopted a mysterious expression, shaking his head.

Everyone was speechless, but there was nothing they could do. If Wang Teng didn't want to say, they couldn't press him further.

"It seems we worried for nothing. You must have had some other fortuitous encounter," Yue Qiqiao looked at Wang Teng, her eyes flickering.

Wang Teng smiled.

"Do we need to spread this news? Many people outside have heard that you don't have a master, and some are getting restless," Yue Qiqiao said.

"No need to spread it. Let it be like this," Wang Teng pondered for a moment and replied.

"Alright," Yue Qiqiao nodded. She naturally followed Wang Teng's decision on this matter.

With the assurance that everything was fine on Wang Teng's end, the atmosphere relaxed, and the group began to engage in casual conversation.

Wang Teng learned about their disciple situations from the others. These talents had chosen excellent mentors. Wu Yan, Tai Beisha, Baichuan Liu, and Boret all had eternal-stage rulers as their masters, and the caliber of their mentors was top-notch.

Yue Qiqiao, Wade, and the others had acknowledged eternal-stage martial warriors as their masters so they could receive good guidance too.

"Yuan Mu has an eternal-stage ruler as his master?" Wang Teng was surprised.

He found it unexpected that with Yuan Mu's talent, there wasn't a true god willing to take him as a disciple.

"Yes," Yue Qiqiao nodded and explained, "Several eternal-stage rulers were vying to take him as their disciple, but no true god stepped forward. In the end, Yuan Mu could only choose one eternal-stage ruler as his master."

"You should have seen his dissatisfied look at that time." Wade grinned.

"Oh? How dissatisfied was he?" Wang Teng laughed.

"He practically had it written on his face. But if he doesn't relent, those eternal-stage rulers might not be willing to take him as a disciple in the end," Wade said.

"With his pride, he probably never thought about taking an eternal-stage ruler as his master. Too bad things didn't go as he wished," Wang Teng commented.

"It's probably because of his poor performance in the end. The true gods want not only talent but also a good character. Yuan Mu is too proud," Yu Yunxian spoke up.

"Yeah, when true gods take disciples, having talent alone isn't enough. The character also needs to be exceptional. Yuan Mu is too arrogant," Wu Yan nodded and added, "But this way, we don't have to fear him. We also have eternal-stage rulers as our masters, who knows who will have the last laugh in the end."

As the conversation came to an end, Wu Yan couldn't help but cast a glance at Wang Teng. This guy remained an enigma.

Wu Yan couldn't discern what opportunities he had truly gained in the end.

For some reason, having an eternal-stage ruler as his master didn't give Wu Yan any sense of superiority.

Before long, everyone departed. They had their cultivation plans and couldn't afford to waste time.

Wu Yan remained obedient. After losing to Wu Yan on the Spiritual Hollow Mountain, he joined the Constellation Society willingly without any complaints or resentment.

However, when Wang Teng heard that Wan Dong and the others did not join the Constellation Society, he sneered. It seemed these people were still not being honest.

Nevertheless, Wang Teng wasn't in a hurry to deal with them. In the future, they would naturally realize the meaning of regret.

Wang Teng was extremely confident in the demon lotus poison he had planted. Unless an eternal-stage powerhouse intervened, it was impossible to completely eradicate it.

Instead of returning to the cultivation room, Wang Teng contemplated for a moment and then took out his spacecraft. He headed for the Smithery Volcano.

The Smithery Volcano was the volcano used by the academy's blacksmiths for refining. It was not far from the Alchemy Volcano.

You could say that they were within the same region.

The spaceship quickly arrived at the Smithery Volcano, and Wang Teng walked out from the spacecraft, descending towards the destination.

The Smithery Volcano was designed similarly to the Alchemy Volcano. Halfway up the mountain, there was a grand hall responsible for handling various affairs.

The usage rights for the volcanoes were divided based on the blacksmith's level, numbered from one to nine. The first three volcanoes were designated for blacksmiths below the master level, while the fourth to sixth were available for grandmaster blacksmiths.

Considering Wang Teng's current blacksmithing proficiency, which had essentially reached the later stages of the grandmaster level, he directly descended to the sixth Smithery Volcano.

He then headed towards the administrative grand hall halfway up the mountain.

Many people recognized Wang Teng. After the Grand Disciple Acceptance Ceremony, he became quite famous. Almost everywhere he went, people recognized him.

His reputation was not inferior to those long-established geniuses within the academy!

Upon seeing Wang Teng, many were surprised, wondering why he had come to the Smithery Volcano. Was he here to have weapons forged?

It wasn't impossible. Many warriors sought skilled blacksmiths here to craft custom weapons.

Before he entered the grand hall, a burly young man, accompanied by several others, walked out. Upon spotting Wang Teng, he momentarily froze and then his eyes lit up.

"Junior Brother Wang Teng!"

"Erm... who are you?" Wang Teng looked at the muscular young man in front of him and asked curiously.
