

## Constellation 861

Chapter 861: -Military Merit exchange book (1)

...

The gold-tier warrior asked Li Hao and the others to go back to the city Lord's mansion.

But at this moment, he was still working on the city gate, so Li Hao wasn't in a hurry. The three of them walked toward the camp.

North City.

When Li Hao's group of three arrived, there were already guards at the gate. The last time they had come, the entire camp had been deathly silent. This time, it seemed to have recovered a little.

Not only were there guards, Li Hao and the others also saw Hong Luan on duty in the distance.

When Li Hao's group of three walked to the side of the iron fence, the fence automatically opened.

Bang! Bang!

The soldiers on guard pounded their chests with their right hands, as if they were excited to welcome the enthusiasm of the triumphant Warriors.

Li Hao and the other two were used to it and followed suit.

The three of them entered the North City.

Li Hao thought for a moment and said, "let's go to the Armory. Maybe we'll get something there. There's a silver warrior there, but he's pretty good. I asked him last time, but he didn't give me any response. I wonder if his attitude will be better this time."

The North City was huge and had many buildings. However, as new soldiers, the three of them did not dare to wander around. They knew where the Armory was.

As the three of them walked forward, they encountered some more soldiers on the way, all of whom quickly saluted.

This time, apart from the red hou, there seemed to be some black hou as well.

Li Hao's group of three felt a little strange ...

Previously, there was no black Phoenix here.

But now ... Why did hei Teng appear?

Had it been there before, or had the city been unsealed a little more after this battle, and some soldiers had enough energy to be revived?

Li Hao was inclined to the latter.

This was because there hadn't been any guards before this. It was clear that other than the four great guards, the other black Vatican members had probably all gone silent.

Heaven battling city's military camp was very large. When the heaven battling Army was stationed here, perhaps millions of people lived here. Of course, the city might just be one of the rotating camps, the territory of the reserve army.

The three of them walked for almost ten minutes before they arrived at the Armory.

Li Hao had been here before.

However, Hong Yitang and his partner had never been here before. They had received their bronze and black armor directly from the recruitment Hall. They were not as important as the silver armor.

At this moment, there were a few more black-armored soldiers outside the Armory.

When they saw the three of them, they all bowed.

Li Hao was even more surprised. This meant that many black phoenixes in the military camp had really recovered.

He didn't know if it was a good thing.

The three of them entered the Armory and walked forward. A moment later, Li Hao saw the silver-tier warrior in the distance, and the other party also saw Li Hao. Before Li Hao even arrived, he could already hear the familiar fluctuations.

"Getting in through the back door, not bad!"

The silver-tier warrior seemed to know what was going on outside. "The eight great families are the eight great families after all. The people from the protector clans are still powerful. Although you're weak, you're still not bad!"

Li Hao was speechless!

This guy must have been a Chatterbox when he was alive. He was also a guy who deserved a beating.

However, this guy's words were quite interesting. It felt like his intelligence wasn't low, even slightly higher than the three silver outside the city.

"How should I address you, senior?"

Li Hao stepped forward and said politely, even though this guy's words were a bit annoying.

"Reserve 9th Division Supply Division Deputy Director Zhang Liang!"

The silver-tier warrior seemed to be a little proud. The officer of the supply department was wearing silver-tier armor. It was hard to tell who was of a higher rank between him and a Regiment commander like Li Hao.

Li Hao felt that he seemed to be quite intelligent. He didn't even stammer when he spoke.

Of course, he was also more enthusiastic than the last time.

He didn't beat around the bush and directly asked, "Director Zhang ..."

"Vice Director!"

"....."

Li Hao was speechless.

"Deputy Director Zhang, we've obtained some military merits, but we don't know how to use them. Can you give us some advice?"

"Military merits ... This is good stuff!"

Zhang Liang seemed a little emotional as he said, "Heaven battling city values military merits, and the entire human race values military merits! The system of military merits is extremely important, and in times of war, the system of military merits has even become the mainstream system of the human race."

"There are many uses for military merits. You're all newbies and didn't participate in the new army Training. Otherwise, you'd know the importance of military merits!"

"I'll briefly explain the uses of military merits. First, exchange for cultivation treasures. Second, exchange for money. Third, accumulate military merits and be promoted. Fourth, exchange for Dao enlightenment opportunities, which is to find a strong person to explain martial arts to you. Fifth ... I've forgotten!"

This guy was also very interesting. He didn't feel that it was inappropriate to forget about him, so he directly said it out. "My memory is damaged, so I can only remember some things. But I remember that military merits have other uses. I might remember them in the future."

Li Hao and the others listened and nodded slightly. They had the same idea as before.

"Then can I exchange for it here now?" Li Hao asked hurriedly.

"Sure!"

Zhang Liang said directly, "actually, the exchange of military merits is usually not here. It's in the military merits Exchange Hall deeper in. However, it's quiet there now. According to the war regulations, once some of the institutions are paralyzed, the military supplies Department will also take on some responsibilities. So, you can exchange it at my place temporarily."

Military merits Exchange Hall?

Li Hao and the other two were a little surprised. There was a special organization that corresponded to military merits. The heaven battling Army's system was very perfect.

Moreover, there were many war regulations that could keep the heaven battling Army from being paralyzed.

Zhang Liang continued, "but I have to remind you that many things are already gone. There is no way to replenish them. They can't be exchanged for now!" Also, I'm just a Deputy Director, so some of the things need the director's signature before I can exchange for them. "

Chapter 862: -Military Merit exchange book (2)

...

“Where’s the division Chief?”

“The division Chief ... Is dead.”

“Originally, the division Chief and I were in charge of this place. However, the division Chief was getting old and couldn’t stand the loneliness, so he insisted on leaving the city ... And then he died. Although I can take over some of his duties, I haven’t been appointed by the higher-ups, so heaven battling city is silent now. Otherwise, I would have been promoted!”

Alright!

Li Hao was also speechless, but he quickly said,“Then what can I exchange for?”

“How many military merits?” Zhang Liang glanced at him.

“More than 100 points ...”

“Not bad!”

“To be able to accumulate so many military merits in the first battle, even if it’s doubled, it’s already not bad!” Zhang Liang’s voice reverberated.

After saying that, he threw out a small booklet,“See for yourself! These are all items that can be exchanged for with less than 1000 military merits. There are a few exchange books, but the higher-grade ones are useless. You can exchange them with me after you’ve finished reading them! But remember, there are some things that may not be there. ”

“I understand, thank you!”

Zhang Liang didn’t reply anymore. Instead, he returned to his seat. At this moment, he was no different from those dead soldiers. He didn’t move at all. It was only at this moment that one could feel that ... These people were really dead.

This was a Dead City, and there were no living people.

.....

Li Hao and the other two walked to the side and sat down. The three of them were very curious, but unfortunately, Nan Quan couldn’t do anything even if he was curious. He scratched his ears and cheeks in regret and said,“If I had known earlier, I would have learned some ancient characters too. Damn it, I can’t understand anything!”

He regretted it to death!

Li Hao and Hong Yitang both wanted to laugh, but Hong Yitang was actually helpless. He knew some ancient characters, but not much. If he really encountered a book that was written in ancient characters ... He wouldn’t be able to understand it either.

How sad!

On the other hand, Li Hao had been learning from Yuan Shuo for two years and knew almost all of them. After all, his only mission during those two years was to learn these things. Two years was enough for him to learn a language.

Moreover, the ancient language and the modern Language were not completely without similarities.

“It’s actually not that difficult. You can learn it if you spend some time. ”

The southern Fist couldn’t be bothered with him, what was he showing off for!

Li Hao also opened the book.

Military Merit exchange book.

He opened the first page. Because the top shelf only had treasures worth 1000 military points, the first page of the book was probably the one with the highest value.

Hong Yitang and the others couldn’t understand it, so Li Hao could only read it out.””A company commander needs 1000 military merits to be promoted to Regiment commander!”

“.....”

Hong Yitang was stunned. After a while, he was speechless.”A thousand points? You get 10 points for killing one dawn light, but you need to kill 100 dawn lights to be promoted to guild leader? You’re just joking!”

Li Hao thought for a moment and said,”a rising light with 10 points and a three suns with 1 point.””Above rising light” might be 100 points. You just need to kill 10 people above rising light ... I think that the regiment commander from back then might have been above rising light if he was still alive! So, for those who want to become a Regiment commander, killing 10 people of the same level might be difficult, but you have to know that the 9th Regiment only has 12 regiments ... I think it’s normal. ”

The two of them thought about it and felt that it was normal.

That was true!

In other words, li haobai had picked up 1000 military credits!

Previously, Hong Yitang was still thinking of getting some silver for himself, but it seemed like that was not possible.

Li Hao continued.”Heavenly Golden Lotus. 1000 military credits for one. Each flower has eight petals. It has the miraculous effect of nurturing mental energy.”

Hong Yitang’s eyes moved and he suddenly said,””Heavenly Golden Lotus?”

“Right!”

“I’ve read about the thing that Cang Mountain obtained last time in ancient books. It’s the sky Golden Lotus!”

“.....”

Li Hao was also stunned. He still had a flower petal and a lotus seed that he had yet to use.

That’s the heavenly Golden Lotus?

With four powerful demons guarding it, this thing actually appeared in the military Merit list. Moreover, it was quite expensive, only 1000 military merits for one ... If one had eight petals, then one petal would only be 125 military merits ... In that case, after killing so many people this time, he had actually only gotten a one-petal flower?

Li Hao’s heart moved, but he didn’t say anything. He continued,“”The three saber techniques in the series, violent blood explosion, Emperor slaying heavenly saber, and immortal vanquishing divine saber, are worth 1000 merit points.”

“.....”

The moment he read it, Li Hao didn’t think of anything. Hong Yitang was a little surprised and speechless.“This ... If I remember correctly, frenzied sword is practicing manic explosion, right?”

There was actually a complete set of saber techniques here.

The so-called “series” meant that one could complete the first book, then the second, and then the third. Each book represented a stage.

Hong Yitang’s eyes flickered.“Frenzied sword is only cultivating the first series. Now, his combat strength is close to the peak of three suns and Sunglow. However, it can be seen that he is a little lacking in the later series. If he can get this series of saber techniques ... It will be fun. Perhaps he can quickly complete the cultivation of the second series and enter the third series ...”

The ancient book was now an item of exchange. Of course, this was an archaeological ruin.

“Help me see if there’s any secret manual on sword techniques,” Hong Yitang said hurriedly.

Li Hao looked at it carefully and flipped through it. After a long while, he said,“”I don’t think there are many sword skills. There’s a set of will and sword as one. It’s probably related to sword skills, but it requires 500 military points to exchange for it.”

Hong Yitang didn’t say anything else, but Nanquan hurriedly said,“”What about the fist technique?”

Chapter 863: Military Merit exchange book (3)

...

The ancient fist technique also had great reference value.

They could even cultivate it directly. Of course, these people walked their own paths. If they obtained it, they would use it as a reference instead of using it immediately.

Li Hao hurriedly looked through it. “I do have a fist technique. Bloody Lion King fist. 800 military credits!”

“.....”

The two of them didn't say a word. F \* ck, so expensive!

However, since it was expensive, it was definitely not bad. Otherwise, with a Regiment commander only worth 1000 military credits, it would be too terrifying if these secret skills could easily cost hundreds or thousands.

There were secret manuals on the military Merit list, but there weren't many. It seemed that the military was more unified, so as to avoid everyone having different cultivation techniques, which was not conducive to cooperation.

Most of them were resources.

For example, Li Hao saw a treasure that wasn't expensive.

“Spirit accumulation fruit. It nourishes one's spirit. 10 military merits for one.”

Spiritual power was a saying from the ancient people. In the current martial arts, divine intent was used to replace spiritual power. There were some differences between the two, but they were also very similar.

This kind of treasure that could nurture one's divine will only cost 10 military merits. Li Hao was tempted after taking a look at it.

He just didn't know if there were any!

Then, Li Hao took another look and suddenly said,“There are also energy stones on it. I don't know if they're divine energy stones. Cultivation energy stones cost 10 military merits per set. I wonder how much this one is.”

“Is there anything else?”

“For example, a technique to nourish the five internal organs?” Hong Yitang thought for a while.

Li Hao scratched his head.“I can't tell. There are other manuals, but the names ... They are all very arrogant. Look at the ones that behead Immortals and gods. How can you tell anything? if it weren't for the word 'saber technique' at the end, I wouldn't even know that it's a saber technique.”

There seemed to be quite a few secret skills on it, but all of them had very impressive names.

Li Hao glanced at it, but sometimes he couldn't tell what it was for.

Most importantly, military merits were highly sought after.

“Forget it, why don't we go ask the director of the military supplies Department ...” Hong Yitang exhaled.

Li Hao's heart moved. He nodded and walked toward Zhang Liang.“Deputy Director Zhang, I don't really understand this military merits record. Are there any techniques that can help one nourish their five internal organs?”

“Nourishing the five internal organs?”

Zhang Liang was a little surprised, "why do you need this?" I can see that your spiritual power has already appeared, and you've long passed the stage of cultivating your five internal organs ..."

Li Hao was stunned. What did he mean?

Zhang Liang continued, "the spiritual power is showing. It's not weak. Your five internal organs should be very strong. What do you want this for?"

Li Hao felt a little strange. "No... Deputy Director Zhang, you mean that the ancients first cultivated the five internal organs, then the divine intent ... Which is mental power?" he quickly said.

"Isn't this the case in your era?"

"No!"

Alright, Zhang Liang wasn't too surprised. His voice fluctuated as he said, "The cultivation system in each era might not be the same. Maybe your cultivation system is different from ours. In your case, ordinary cultivation methods of the five internal organs might not be useful. However ... It's not like there are no similarities in martial arts!"

Zhang Liang seemed to be recalling something. After a moment, he said, "Strengthening the five internal organs might not be of much use to you. My memory is damaged and I can't judge your specific situation, but there's a cultivation technique that can be used. It's not very helpful in strengthening the five internal organs, but it can connect the five internal organs and connect them. In this way, you can strengthen one organ and five organs!"

Li Hao's heart skipped a beat. Strengthening one organ was equivalent to strengthening five organs?

This ... Was good stuff!

"Director Zhang ..."

"Vice Director!"

"Oh, oh, oh. Deputy Director Zhang, can this cultivation technique be changed?"

"It should be possible. I don't really remember. Go and look for the and have a look. Break down the barriers of the five internal organs and build five energy transmission bridges. This way, the five internal organs will circulate. Strengthening one internal organ will strengthen the five internal organs!"

At this moment, Hong Yitang and the other man also rushed forward. They were both excited.

They had never heard of the "five bridges building method," but it could actually break through the barriers of the five internal organs?

At this moment, the two of them were extremely nervous, afraid that they would not have enough military merits.

Li Hao also quickly looked through it. After a while, he saw the name of the secret manual, and the price ... Was not expensive!

"Only 30 military merits?"

Li Hao was a little surprised. He had thought that it would cost hundreds or even thousands!

No wonder he didn't see it at the front. It was not expensive at the back.

"It's not expensive to begin with!"

Zhang Liang explained, "this technique is actually just a normal cultivation technique. Under normal circumstances, some Academies back then would provide it for free. However, not everyone in the military is a student of the Academy. In order to respect the Academy's copyright, the military charges a fee. In fact, there's another point. If you stay in the military for three years, this technique is also free ... You can stay in the military for three years before changing it. It's free!"

"....."

Everyone was speechless. Forget it, we don't want to exchange for it three years later.

"Is it difficult to practice this?" Li Hao asked hurriedly.

"I don't know. It wasn't difficult back then, but the cultivation system of the present and the past is different. The three of you, with your spiritual power, shouldn't have weak five internal organs, but it just so happens that your five internal organs are weak. Looking at you, there's even a saying that your five internal organs are unbalanced ... I don't understand your system either."

He really didn't understand. After all, although everyone cultivated ancient techniques, they would make some modifications. Some ancient techniques were actually not suitable to be used immediately. After using them, there would often be some problems.

According to this person, the divine intent that they had displayed should be very powerful and shouldn't be worrying about their five internal organs. However, the five internal organs were the biggest problem for cultivators today!

Chapter 864: -Military Merit exchange book (4)

...

"The five bridges construction method is peaceful and doesn't involve any specific cultivation methods. It might be very suitable for you guys. If you think of a way to strengthen your organs, it can save you a lot of time."

Everyone hurriedly nodded!

Yes!

That's right!

Li Hao was also a little excited. If he had this and gave it to his teacher, his teacher might be able to come up with a new cultivation technique very soon. He felt that it would be of great reference value.

"That ... Can this cultivation technique be taught to outsiders?"

"....."

Zhang Liang seemed to be looking at Li Hao. After a long time, he said, "In the past, cultivation methods could not be privately passed on. Under normal circumstances, there was no need for it either. All major martial arts universities had it, and so did the military ... The reason for the fee was also to respect the creator! When they create techniques, they need some encouragement, some encouragement, some respect ... However, this era no longer belongs to us. As long as we don't spread it randomly, it's fine to spread it in small areas. "

"Then, the three of us ..."

"You three can 't!"

"....."

Everyone was stunned.

Zhang Liang continued, "you're all from the military. You can't teach him in private. You have to exchange for it. If the person you're teaching enters the military, he'll have to pay a fee. Of course, if he doesn't come, then there's no problem."

The three of them were speechless. So, we still have to pay more?

If they wanted to change, everyone had to change?

On the other hand, it was not a big problem to teach them outside, because the military would not care about the outside world, and they could not do so.

But the three of them would be controlled!

At this moment, Hong Yitang also hurriedly transmitted his divine intent. "Will this cultivation technique break the superpower lock?"

"What?"

"Super Lock!"

"I don't understand what you're talking about."

Zhang Liang replied directly, "the present is different from the past. Perhaps even the physical body has changed. I don't understand some of your terms." "However, I've already said that the five bridges building method is neutral and peaceful. You can try it out and use it as a reference. As for the other combat techniques, it's best not to exchange for them, because they might be completely useless!"

This guy doesn't know anything about super locks!

Li Hao was a little surprised. Didn't the ancient people have super locks?

At this moment, the three of them set this as their exchange target. Li Hao said, "The cultivation energy stone costs 10 military merits per set. How much is one set?"

"You got 10 crystals before, so that's one set!"

Li Hao was stunned for a moment, and then he was ecstatic!

You must be joking!

A pure divine power Stone was only worth one military Merit?

F \* ck!

It's so cheap!

No, it didn't seem too cheap to kill a three suns for a little Military Merit.

In comparison, the previous high price seemed to be cheap.

Li Hao hurriedly took out a divine power Stone and said, "This is the one. One pill is only one military point. One pill is at least equivalent to 10 pills!"

Nan Quan's eyes flickered. He looked at Li Hao, then at Zhang Liang, and quickly calculated. This was equivalent to 1 military point for 10 pills. He had 120 military points. After using 30 military points for the five bridges building method, he could use the rest to exchange for this. He could at least exchange for 900 pills. Of course, this was referring to the ones they usually used.

He still owed 3000 stones!

At this moment, Zhang Liang looked at Nanquan. "This one ... Shouldn't you think of a way to exchange for a military position? Black-armored soldiers had very low authority. If you exchange it for the position of company commander, there will be some benefits. It will require 100 military merits!"

Nan Quan was stunned. After a while, he gritted his teeth. "100 military merits for the company commander? I ..."

I only have 120 points!

I want to exchange for the five bridges building method, but it's already 30 points. If I exchange it for military points, it won't be enough!

He couldn't help but ask, "what's the benefit of being a company commander?" I don't feel anything ..."

Other than the armor being a little stronger, he really didn't care too much about it.

Zhang Liang was puzzled, "you didn't feel it?" "Let's not talk about the strength of the armor. As a company commander, you can lead 100 soldiers. If these 100 people make a contribution, as the company commander, you can get some additional military merits as a reward. This is the first reason! "Secondly, your salary will increase. As a soldier, you will only get one cultivation stone a month. A company commander will get three, and a Regiment commander will get ten. You can come and collect them at the end of each month ..."

"If Southern boxing is uninterested, then I might as well exchange it directly. 100 military merits can be exchanged for 100 pills. Two more pills a month, that'll take four years to make up for.

He wasn't too interested. The next moment, Zhang Liang said, "As a company commander, you have the right to use 100 Black armors and can activate 100 Black armors. However, the person who activates them must go through the military's review. As long as there's no problem with the person, you are free to choose!"

“.....”

Nanquan was stunned for a moment.

“Deputy Director Zhang, you mean ... As the regiment commander, I can recruit my own troops?” Li Hao was slightly stunned.

“Yes, I can!”

“Yes.” Zhang Liang nodded but added, “however, you’ll have to pass the inspection of the military department’s inspection guard.”

Li Hao’s heart skipped a beat. “Deputy Director Zhang ...” He said, “I actually have 100 Black daggers ... That ... That was when the East Gate guards were destroyed. I ...”

“I understand!” Zhang Liang said calmly. However, those who were out of the city and captured would have their access rights removed. They would only be an ordinary set of defensive armor and would not be connected to the entire military system! As the regiment commander, you have the authority to activate 1000 sets of armors. However ..... Those who possess the armors must meet the requirements of the military headquarters “investigation!”

What conditions?

“Is the investigation difficult?” Li Hao asked excitedly.

“It’s not that difficult. First, the heaven battling Army temporarily doesn’t accept energy path cultivators. There’s another energy path Army, but they’re not in the same system as us! Second, the body must be strong, and the sick must not be accepted! Third, they had to go through the inspection of the reception tower to prevent the invasion of the heretics! Fourth, you will need to participate in the recruit training. The few of you can temporarily skip it because the recruit training system is paralyzed and needs time to restart. When you recruit new recruits, you will need to wait until the recruit training system reopens ... You entered through the back door, and the two of them obtained the guest authority ... Or the person you accepted also obtained the guest authority, so you can also avoid the recruit training.”

Chapter 865: Military Merit exchange book (Part 5)

...

“That’s the key?” Li Hao hurriedly asked.

“Right!”

He explained, “not everyone can get this key, you need to be upright!” If your heart isn’t right, you won’t be able to get it. Even if you see it, you won’t be able to get it ...”

Nanquan was stunned.

My heart is very upright!

Li Hao and Hong Yitang both glanced at him. This man ... Had bad intentions?

Southern Fist was extremely speechless!

Zhang Liang also looked at him with empty eyes. "The so-called upright heart ... Means that you have no hostility towards heaven battling city ... The welcoming Pavilion has such an assessment system."

Li Hao couldn't help but say, "you can also show what you're thinking? Besides ... To be honest, we came here to seize the treasure. How can Hong Yitang get it?"

Here, he directly called out her name.

Hong Yitang glanced at him with a half-smile.

Zhang Liang continued, "snatching treasures doesn't mean that you're hostile. It's only human nature to be curious about ancient ruins. It was only human nature to want to gain some benefits. However, those who are filled with greed and desire for heaven battling city can not be recognized!"

Li Hao still didn't quite understand it, but he did get a general idea. Desire!

The restraint of desire!

Hong Yitang seemed to have restrained some of his desires, so he got it. As for the southern style ... His desires were too strong, so he didn't get it!

At this moment, Li Hao didn't ask any more questions. After thinking for a while, he said, "I want to exchange for the five bridges construction method and 10 spirit accumulation fruits ..."

That would be 130 military merits.

Li Hao, on the other hand, had 186 military merits in total. He wanted to exchange the rest for divine power stones.

It was equivalent to more than 500 ordinary divine power stones.

"It's said that the energy in the city is insufficient," he could not help but ask. "Why are there still divine power stones at the military supplies Department?"

Zhang Liang glanced at him and said, "the energy we need ... Is not this!" Let's put it this way, it was the energy of life! The stronger one was, the more abundant it was! "Actually ... We didn't need it at first. Killing people to revive the city isn't what we're after. We didn't need to do this because we had The Guardian monster plant ... But now that general Huai has fallen silent, the divine energy stones you mentioned are just energy stones. We actually still have them, but we're already dead. We don't have enough life force to activate some formations and systems ..."

Li Hao didn't quite understand. Heaven battling city didn't lack these energies, but another special energy.

General Huai?

Could it be that he was talking about the big tree outside the city?

Tree demon?

The passage they had passed through was the inside of a tree.

“Then I’ll exchange the rest of my military merits for energy stones!”

Since Li Hao had made his decision, Hong Yitang was also very straightforward. “I want a copy of the five bridges building method and 11 spirit accumulation fruits!”

He had 140 military merits. As for the divine power Stone, he did not need it.

Nan Quan’s face was filled with confusion. He wanted to be promoted, so it should be useful ... But ...

He also wanted the treasure!

“Can military merits be transferred?” Li Hao asked.

“Yes, I can!”

Zhang Liang continued, “it’s not possible for normal soldiers. A company commander can reward a soldier with some military merits in the form of a mission. Similarly, a Regiment commander can reward his subordinates with some military merits in the form of a mission ... However, it must be checked by the inspection guard to prevent any private transactions of military merits. It’s an insult to military merits. Once it’s found, all military merits will be confiscated, and there’s a possibility of punishment!”

Li Hao glanced at Southern Fist. Seeing that he was hesitating, he could only say, “Can I reward this soldier with 10 military merits for protecting me?”

“You can try to use the silver Dagger to issue this mission. If the inspector passes the examination, then you can do it! If you don’t pass ... Then there’s no other way.”

“Will they confiscate my military merits?”

“First time. New recruits. Probably not.”

Alright. Li Hao looked at Southern Fist and said, “martial uncle he, I’ll try to reward you with 10 military credits. Black Phoenix’s level is too low. You should change your military profession and the five bridges building method.”

Nan Quan grinned and hurriedly nodded.

Li Hao studied it for a while and tried to issue a mission. After waiting for the inspection of the inspector, he said, “Then, if I want to become a general ... How many military credits do I need to get in the Golden armor?”

“Not much, just 10000 points will do!”

“.....”

Li Hao wanted to cry. He had lost 10000 military points, no, 9000 military points!

Originally, as a member of the eight great families, he could have been given the rank of general, but because he was too useless, that gold warrior directly demoted him!

At this moment, Hong Yitang asked, “Can I exchange the water of the spring of life?”

"I could have done it in the past!"

As he spoke, Zhang Liang shook his head. "It's impossible now. General Huai has fallen into silence and can't provide any more. Even in some places in the city, there are only a few remnants. For example, Furong yard, which you stayed in before, is just a few remnants!"

Hong Yitang felt a little regretful. He then thought of the storage ring he had picked up. Other than the three large divine power stones, there was also a small bottle of liquid. He suspected that it was the water of the spring of life.

Now, it seemed that this thing might be out of print!

Why ... Could he pick it up?

It wasn't as if there was no one in the city. Although they were all dead, couldn't they see their storage rings?

Zhang Liang didn't say anything else. After waiting for a while, Li Hao received a message that he had passed the review.

As for the southern Fist, he was also overjoyed. He had obtained it!

He actually wanted to change the divine power Stone, but after thinking about it, he decided to change his military position first, because he remembered that there were still people outside!

If he wanted to earn money, there was still a chance.

It would be more convenient for him to change his military position first. At least, he could contact Li Hao directly instead of Hong Yitang.

.....

After a while, Zhang Liang entered the warehouse.

A moment later, he walked out and handed the three of them something each. "The spirit accumulation fruit is stored in the storage ring, so it's definitely still effective. But after all, many years have passed, so its effect might be weaker. Actually, it won't be of much help to you guys, but it should be effective."

"Don't rush to use the five bridges construction method. Read it first and understand its meaning before trying it out."

Then, he looked at Li Hao and Hong Yitang. "The two of you should work hard. Although the military supplies Department is not a specialized exchange organization, there is still a sword technique that is very suitable for the two of you! The [sky piercing sword Scripture] was also one of the best in the past. It was created by a top figure in the early days ..."

Hong Yitang's eyes suddenly lit up.

"You might have ... Heard of it?" Zhang Liang looked at him with his empty eyes.

Hong Yitang didn't try to hide it. He nodded. "Yes, but I didn't manage to get this secret technique. It's said that the person who created it was an unrivaled existence even during the ancient civilization."

“Of course!”

Zhang Liang nodded, and his voice seemed to carry a hint of admiration and respect. “He was an invincible existence. Even though it was only an early version of his cultivation technique, if you could get your hands on it ... It would be of unparalleled benefit to sword cultivators like you! Back then, the Li family’s Sword Saint also received his guidance ...”

He looked at Li Hao. “Revered sword is also an invincible existence. However, in his earlier years and later, he received a lot of guidance from the owner of the ‘sky-piercing sword technique’. If you can get it ... It will be of great help to you!”

Li Hao’s mind wandered. His ancestor had also received guidance from the owner of this sword technique?

What kind of person was that?

“My ... My li clan’s ancestor, was he very powerful back then?” he could not help but ask.

“Of course!”

“Compared to the one who was nominated for heaven battling city?”

Zhang Liang was silent for a moment and shook his head. “I don’t know. We didn’t spar in the later stage. However, in the early stage, venerable the sword was definitely stronger. In the later stage, venerable the sword left for a period of time ... And he also improved ... To us, it’s too far away!”

Seeing that he couldn’t give an explanation, Li Hao didn’t ask any further.

He actually wanted to ask more, but Zhang Liang was getting impatient. “Let’s stop here!”

“Don’t. How many military merits does that Sword Art cost?”

“It’s not expensive, ten thousand points!”

“.....”

Go to hell!

Li Hao almost wanted to curse him to death. Then what the hell are you saying!

It’s so expensive, why don’t you just stop talking about it? you can only get ten thousand points by killing ten thousand three suns, what a joke! 1

Chapter 866: -great harvest (3)

...

Walking out of the military supplies Department, Li Hao had an additional book on him, “five bridges building method.”

There were 10 fruits in one bottle, but they couldn't be opened. Once they were opened, they had to be used. If they were used for too long, they might expire soon. If they weren't in the storage ring, they might have turned to dust.

There were also 46 small stones that were very transparent. They could not be compared to ordinary divine power stones.

Nanquan and Hong Yitang also received the booklet. Apart from the booklet, Hong Yitang also exchanged for the spirit accumulation fruit. Nanquan, on the other hand, had nothing. As for his promotion, he had to go to the recruitment Hall to exchange for a bronze seal.

The bronze chariots were temporarily not distributed here.

At this moment, the three of them were flipping through the booklet.

After flipping through it for a while, Southern Fist sighed.

Read the ancient text!

'Damn it, it's so embarrassing if I can't read the secret manual.'

Uncomfortable.

That's right, after looking around, he still couldn't tell what it was.

Hong Yitang, on the other hand, understood a little and fell into deep thought.

Li Hao flipped through the book. It was an interesting theory. It was said that it could be a cultivation method, but it wouldn't increase one's strength. What was interesting was that this method ... Was very rare for Li Hao.

Wuqiao ...

The five heaven and earth bridges were built between the five internal organs, allowing the five internal organs to form a big circulation and become one. Just this theory alone was very interesting. Moreover, it was written in the book that this was a basic cultivation method from back then.

This meant that everyone was training during the ancient civilization.

But what Li Hao was thinking now was, what about the SuperLock?

Also ... The books said that the construction of the five bridges was a form of energy communication ... Was the bridge a superpower lock?

The Super Lock had five organs.

Li Hao had no idea how to build a bridge, but after looking at it, he felt that the Super Lock could be used as a key to communicate with the five internal organs.

"Uncle Hong, do you think it's possible to connect the five internal organs with the Super Lock like the iron chain Bridge?"

Hong Yitang shook his head. "I don't know. The ancient civilization's system isn't exactly the same as ours. The current system is unique. It developed on its own and was supplemented by generations of martial masters. Perhaps it might not be comparable to the ancient civilization system, but ... It actually had its own unique points! For example, the divine intent of martial masters. It is difficult and simple to possess the divine intent upon stepping into the universe master stage ... In the ancient civilization system, it is actually very difficult to manifest the divine intent. Not to mention, you're like your teacher, who completed the cultivation of five divine decrees in one go."

The ancient and modern systems were different, and Li Hao had some understanding of them. After reading for a while, he nodded and said, "It's very meaningful to learn from, but it might not work. However, we can give it a try. If it really works, it will be a great thing for us!"

Hong Yitang nodded as well. Nan Quan was a little anxious as he said, "Um ... Can you translate it for me? It's quite expensive. I can't understand it and it's all wasted."

He had obtained a book.

Li Hao laughed. "When we have time. Although there aren't many words, I'm worried that I'll make mistakes if I translate it now. Some terms in the present and ancient times are different. I'll have to refer to other ancient books before I can translate it for you. I can't just translate it directly. Otherwise, there'll be some discrepancies."

Alright!

The southern Fist could only wait. He was even more determined to learn and read. This was too tragic!

Passing by the recruitment Hall, Nan Quan went in to collect his armor.

A moment later, Nan Quan changed into a set of copper armor and was very satisfied. On Li Hao's side, there were also some changes. There was some new data in the armor. The original soldier He Yong had now become the second company's commander!

"I'm finally an official!" Nan Quan was overjoyed.

After all, he was a company commander, a Centurion. If he did not get promoted, he would be a little depressed. Being a soldier was really uncomfortable.

As for the 100 military merits he had spent, he no longer had any complaints.

In terms of defense and comfort, the copper armor was much better than the black Phoenix.

The black armor couldn't withstand the attacks of the three suns and the rising light. It could even be easily torn apart by the rising light. However, the copper armor could still be shaken by the rising light, but it was much more difficult to tear it apart.

Previously, a copper miasma had been killed in order to stop Xu Feng, but they had all self-destructed, and Xu Feng couldn't break the copper miasma with one strike.

And this was under the condition that the soldiers had all died long ago.

With an existence like Nanquan wearing a bronze armor, it was probably impossible for Xuguang to break his bronze armor.

After collecting their equipment, the three of them walked out.

Before he could go far, the sound of armor suddenly rang out from behind him. A red hou appeared, but compared to the red hou from before, the one behind him was more vibrant in color.

The newcomer quickly caught up to the three of them and sent out a special fluctuation. "Regiment commander li, are you guys leaving the camp?"

"Yes,"

Li Hao nodded.

"According to the war regulations, you are still new recruits and have not completed the new recruit training. Unless it is an emergency battle mission, you can not leave!"

"....."

The three of them were stunned. What did he mean?

We can't leave?

At this moment, Li Hao also thought of something. "That ... If I leave the city, will there be an explosion?"

"Yes, I am!"

"....."

"It's not just you. Even the armor of a company commander will explode!"

"....."

Nan Quan was not happy anymore. His face was blank. If I had known earlier, I wouldn't have been promoted!

However, since Hong Luan had chased after them, she naturally didn't come for this. Hong Luan once again sent out a fluctuation, "Our division commander just sent us an order. The three of you are not cultivators of our era, nor are you ordinary recruits. Now that heaven battling city is almost silent, you may not be able to complete your training if you stay here,"

Chapter 867: great harvest (2)

...

"So, division commander asked me to tell commander li that if you want to leave heaven battling city, remember to go to the mission Hall and accept an out-of-city Mission. Although these missions have long expired, you can still accept some. It's even better if they expire, as you can stay outside indefinitely ... But you can't directly leave heaven battling city, or else you will be labeled as a rebel army ... At that time, you will be in big trouble!"

Teacher?

Li Hao thought of the gold-tier warrior. He was the one who demoted him!

Otherwise, he might have been at the same level as him.

In that case, that person must be the master of the 9th Division.

The division commander was a gold rank, and the one in the city Lord's mansion was also a gold rank. What about the garrison commander?

Could there be other armors above gold?

They had to accept a mission before they could leave heaven battling city. If it wasn't for the other party's reminder, they would have run away, which would have been troublesome.

"I know," Li Hao said hurriedly. "Where is the mission Hall?"

"Do you guys want to go now? If you're going, I can take you there. "

"Let's go and take a look!"

Hong Ling didn't say anything more and led the group deeper into the forest.

Li Hao and the others also had a chance to observe.

The field, the military camp, the small building ...

It was very simple, but the place was very large. The ground was paved with a special kind of stone, which was the same as the ground outside, but it felt stronger.

Li Hao took a few steps and couldn't help but say, ""Is this the headquarters of the heaven battling Army?"

"No, this is the 9th Division. In the depths was the military headquarters of the reserve guards. Heaven battling city was only for reserve guards to guard. "The other legions are stationed in other places. The frontline legions will only come back for a rotation when they need to rest ..."

In the depths ...

Li Hao and the others looked into the distance, but they couldn't see anything in the darkness.

In that case, was there still a commander-level powerhouse in this city?

"Is the commander of the guards in the city?"

"I don't know. The military won't reveal their whereabouts to us ... We haven't seen each other for many years. Maybe they've left, or maybe they're dead."

At this moment, Nan Quan couldn't help but ask, ""Back then, when the others left, you guys stayed here and didn't leave?"

"No, our mission is to defend heaven battling city and protect the city's residents,"

"Then ..."

“Are all the residents dead?” Nan Quan asked hesitantly.

“Yes, some of them died of old age, and some of them left.”

“Are there any other cities nearby?”

“.....”

Hong Luan seemed to be reminiscing, but she also seemed to be thinking if she could reveal any information. After a long while, she replied, “There are! The eight protector clans will build eight cities in the land of the Silver Moon and form a satellite gate!”

“...Stargate?”

The few of them quickly asked, but Hong Luan replied, “I’ve lost my memory. I’ve already forgotten what a Stargate is!”

Did he really forget, or did he not say it?

At this moment, Li Hao thought of the silver Blizzard city’s stone gate. Could this be the Stargate?

These ancient people knew a lot.

The greatest wealth of heaven battling city was not resources, but the information provided by these dead people, including some cultivation systems of the ancient civilization, which were worth studying and referencing.

The eight protector clans had eight cities and satellite gates.

In other words, Silver Moon had seven more cities?

Also, was this place called Silver Moon since ancient times?

Li Hao was a little confused. Silver Moon was the name of Silver City and Whitemoon city, so why was this person also called Silver Moon?

“This place has always been called Silver Moon?”

Hong Yitang also asked.

Hong Luan’s voice fluctuated, “this is the land of the Silver Moon, of course it’s called the Silver Moon!” This part of the starry sky is called the Silver Moon ... Because the moon here is silver ... And is especially beautiful!”

The few of them were stunned. Silver?

No!

The moon in the sky was a little red. Where did the silver come from?

Li Hao was in a daze. This place was called the Silver Moon, not the Silver Moon.

Hong Luan led them for a while and arrived outside a large hall.

Li Hao suddenly said, "the 9th Division used to have 11 regiments, which means 11000 people. 1000 people have been destroyed. There are still 10000 people left ... 3000 outside the city. Are there 7000 people here?"

Red armor remained silent.

"Can't you tell me?" Li Hao couldn't help but ask.

"No... It's you ... Who said that you would exterminate a thousand people ... Wrong! They're all dead. "

Hong Luan calmly said, "it's just that the ten balls can't hold on anymore. We're all dead!" Apart from that, the 9th Division has more than 11000 people. There's also the division headquarters, military supplies Department, inspection guard, teaching department, training department ... The 9th Division has a total of 15000 people. "

One division, over 15000 people!

"How many divisions are there in total?"

" 10, full team!"

In other words, a reserve army consisted of about 150000 people.

Terrifying!

And right now, they were only in the 9th Division.

"That's right," Nan Quan said. "Heaven battling Army has millions of people, but this heaven battling city ... Is very small!"

This city was probably the size of Silver City.

"It's just shrunk. "

"Due to the lack of energy, in order to strengthen the defense, heaven battling city has shrunk a lot. Originally, heaven battling city's radiation range was very large, but the heaven battling city you see now is the folded version. At the peak of heaven battling city, it could accommodate fifty million people and one million soldiers. Within the city, general Huai was in charge of radiation, and twelve monster plant generals were in charge of expanding and providing energy. They could control heaven battling city to fly and fight at any time ..."

Speaking of this, Hong Luan pointed to the front, "Let's not talk about this anymore. Let's just forget about the past. Today, heaven battling city ... Is only this big! We've arrived at the mission Hall. Please go in and receive your missions. There should be people here. Today, we revived some dead soldiers ..."

Chapter 868: great harvest (3)

...

Li Hao and the others were dumbfounded!

A huge city with a population of 50 million, and the city could even fly to fight ... F \* ck!

This ... Was still a city?

Also, the city could shrink?

It can be folded?

The more he knew, the smaller he felt!

Heaven battling city was simply a divine tool!

The few of them walked into the mission Hall in a daze.

The so-called Mission Hall was just a lot of Windows. There were so many of them, but at this moment, they saw ... They saw some windows that were empty. There seemed to be red silk in some Windows, but they were all lying on the ground as if they had died.

Only a few Windows were still flashing, indicating that they were operating.

At a glance, there were only three or four windows, but there were at least a hundred here.

It seemed that the city had not been completely restored. It was only because many people had died today that a part of its functions had been activated.

They walked towards a window that was shimmering with light.

Inside, a Red Kite was among them. When he saw Li Hao, he suddenly stood up. "Guild leader!"

Salute!

Without waiting for Li Hao's reply, the other party sat down, and his eyes flickered. "Guild leader, are you here to accept the mission?"

Li Hao wasn't used to it, but he still nodded. "Yes, I want to take on a mission to get out of the city, the kind that has no time limit ... Are there any more missions I can take on now?"

"There are some missions. They haven't been canceled because it's been a long time. They might have been forgotten, or they might still be in operation ..."

After a few robotically-replied replies, the other party quickly showed Li Hao a screen-like device. "Commander Li, the three missions here meet your requirements. You can choose one!"

Li Hao looked over.

"Mission 1: heaven battling city is running out of life force. The world has collapsed, and all eight cities have lost contact. Head to the other seven cities, open up the life communication system, and restore the communication between the eight cities. Obtain the support of life force. Reward: 100000 military credits!"

"Mission two: find the entrance of the forbidden Sea and seal off the seawater channel. Reward: 10000 military points."

“Mission 3: lost contact with Star Island and Star Town. It is suspected that the island has fallen. Quickly head to Star Island, investigate the situation, and restore contact. Star town’s energy mine must not fall into the enemy’s hands ... Reward: 10000 military merits.”

Li Hao looked at it and blinked. Star Island?

Cang Mountain?

Damn, so many familiar names.

The star dynasty and the current Cang Mountain ... Were they related to what was recorded in these ancient words?

“Where is the sky Star Island?” he couldn’t help but ask.

“Deep in the ocean!”

“Yes,” Hong Luan, who had issued the mission, replied, “the star Island is an important energy base. There’s a huge energy mine under the jurisdiction of the star Town! They were responsible for providing energy stones to heaven battling city and several other major cities. During the chaos, we lost contact in the early stages. We’ve sent people to investigate, but we’ve all lost contact. Perhaps ... We’ve been attacked by the enemy!”

Nan Quan didn’t understand at first, but now he was slightly stunned. “Sky Star Island ... Sky Star Town ... Is this Island ... Big?”

“Very big!”

Red Kite continued, “it possesses a huge mineral vein and has sufficient energy. It’s also responsible for pacifying the sea area. It has a Garrison of 100000 soldiers and is a military town. If you accept this mission ... It actually doesn’t matter anymore. Of course, if you can find some clues ... Even if it’s useless, you’ll still be rewarded with corresponding military merits after you return.”

But Hong Yitang didn’t care about this. He said hurriedly, “I remember ancient records saying that the Skygold Lotus lives in the forbidden Sea, right?”

“Right!”

As soon as he said this, the three people’s eyes moved.

The valley of the broken mountain!

There, they found a heavenly Golden Lotus. Li Hao didn’t understand it at first, but he immediately looked at the second mission. What did it mean?

Was that broken Mountain Valley the mouth of the reversed guzzle?

So, the lake was actually seawater?

“What’s the forbidden Sea?”

Li Hao asked in a hurry.

“Ocean!”

Nonsense!

Li Hao was speechless. Hong Luan continued, “it’s a forbidden ocean left behind by the fall of the strongest experts in ancient times. Their blood dripped into the ocean.” It has the ability to corrode everything. However, when the human King conquered the world later on, the forbidden Sea has already been suppressed. However, there are still some corrosive effects left ...”

“Which mission would you like to take on, commander li?”

“Can I accept all three?”

“.....”

Hong Luan didn’t say anything. After checking, she continued, “Sure!”

Li Hao also held a little hope ... Maybe he could complete the mission?

It didn’t cost money to accept the mission anyway, so he just had to accept it.

Soon, three missions appeared on Li Hao’s armor.

There was no time limit.

The candidates for the mission were the three of them. All members of the 12th Regiment were dispatched!

After accepting the quest, Li Hao and the others actually wanted to ask for more details, but the other party closed the window directly. Li Hao was speechless. Did the window open for a while for them?

.....

“This city probably hasn’t recovered yet. There’s not enough energy.”

Hong Yitang walked out of the hall and looked back. He sighed and said, “Sky Star Island ... I’m now suspecting if the sky Star Empire has obtained some inheritance from the sky Star Island. Could their black armored Army be the armor left behind by the garrison of the sky Star Town? If that’s the case ... Is the central region ... An Island?”

When he heard this, Nan Quan also sighed. “Maybe! Sky Star Island ... Sky Star dynasty ... Was it such a coincidence? Energy ore veins ... It’s a pity that even if there were, they’re gone now!”

Chapter 869: great harvest (3)

...

“However, if the ruins of Heavenly Star Town are still here ... It’s surrounded by a huge mineral vein, and the mineral vein they’re talking about must be a really big mineral vein. Otherwise, how can IT support the consumption of big cities like heaven battling city? There must be a lot of them ... I feel like the royal

family has a lot of divine power stones, but they didn't seem to have explored the ruins much. Could it be that ... They have obtained this city?"

"If that's the case, we still have a lot of divine energy stones. The imperial family's power might be even more terrifying than what I've seen!" Nan Quan gasped.

The Heavenly Star Town was the garrison that was in charge of guarding the island and providing energy stones.

How many reserves did a city like this have?

As long as it was placed in the storage ring, there might not be much energy lost. Just thinking about it was terrifying.

"Also, there are actually seven more cities ... Li Hao, you're rich!"

Li Hao glanced at Southern Fist and helplessly said, "What do I get rich from?"

"Your Li family might have a city, no, there must be a city ... If you find it, Won't You Be rich? Here, you're still an outsider, but in your own city, you're the Crown Prince!"

Li Hao rolled his eyes.

Without strength, if there were armored warriors in the Li family's city, Li Hao felt that he might end up the same. He would be sent flying with a punch and then be given a comment that he couldn't do anything!

At this moment, the three of them felt that they had gained some knowledge.

Yes, they all felt that everything they had seen in the past was too small.

A city that could accommodate 50 million people, could fly, and could fight, with millions of soldiers, and this was only one of the eight cities. The weakest soldiers in this city might have the strength of a warrior of thousands.

Now, the other party was comparable to a hundred, but in the past, he was at least a thousand, right?

One city would have a million soldiers like this, and eight cities would have eight million soldiers!

With the addition of some small cities ... It was simply unimaginable how strong they were.

They did not use divine power stones. Instead, they used mineral veins to calculate. There were mines here and there ...

Listen, what's a heroic spirit?

Nan Quan also sighed, "if possible, I really want to see the glory of the ancient civilization!" With my strength, if the system in the ancient civilization wasn't so rigid, it shouldn't be a problem for me to get a silver rank, right?"

"....."

“Are you sure?” Hong Yitang asked faintly. When these silver grade captains resurrected, they were all close to the peak of the rising light and were in the transformation period. This is without flesh and blood, without a physical body. How strong do you think they were back then?”

Alright!

“I’ve unlocked the superpower lock, so I won’t be any weaker than them!” Nan Quan thought to himself.

I hope so!

“Alright, there’s no point in talking about this now. Let’s go out. There’s still a division commander in the military camp. We’d better stay away from him. Otherwise, he might kill us with a punch if he’s unhappy!”

After that, the three of them walked out of the military camp.

.....

At the door, the Black Panther was waiting. It didn’t go in just now, and the soldiers on guard didn’t let it in either.

It seemed that this dog didn’t belong to the military system. The benefits it had obtained before might have been given by someone else.

They left the military camp.

Li Hao looked at the two of them and asked, “where are we going now?” Should I go to the city Lord’s mansion to take a look? I wonder if that gold-tier elite has returned ... He’s called me over, and I don’t know if he’ll give me any benefits or a punch. ”

He was still a little scared after being punched earlier.

These guys were very strong.

Even in death, he was still very strong.

When he was alive, he could probably kill him with one punch.

“Let’s go and take a look!”

Hong Yitang looked at the turtle Tower in the distance and said, “The last time we came here, we actually obtained some benefits. Everyone had some gains. After we entered the city Lord’s mansion, we took some ancient books and some things that we didn’t know the use of ... It was only after we seized someone’s turtle seal that we angered that person. The flying guy was killed.”

Last time, they had entered the city Lord’s mansion.

This time, he wanted to go over and take a look openly.

As for Li Hao, as a member of the eight great families, the previous tour guide had also said that people from the eight great families could go directly to the city Lord’s mansion and receive some courtesy.

After some consideration, Li Hao decided to take a look.

There were still many places in this city that he had yet to explore.

However, the city Lord's mansion was the place he was most curious about.

The three people and one dog started to walk in that direction. The Black Panther was a little awkward and unwilling. It didn't want to go there. That side was so scary!

However, Li Hao insisted on going, so Heibao had no choice but to follow.

.....

City Lord's mansion.

The city Lord's mansion of heaven battling city was just beside the turtle Tower. It occupied a very large area, and the gate of the mansion was wide open.

When Li Hao's group of three walked over, Li Hao couldn't help but raise his head and glance at the turtle Tower to the side. This tower had a huge turtle carved on it, and its shell was shimmering with light. This was the source of light that illuminated the entire ancient city.

As soon as the three of them arrived, three silvers suddenly walked out of the city Lord Mansion.

"Regiment commander li!"

The leader of the group greeted Li Hao. His tone seemed to be more emotional, and he even smiled.

"Let's go to the East Gate to defend first. Commander Li, you're done with your work, so come over and have a chat!"

"Oh?" Li Hao was stunned. Then, he was overjoyed. "Commander Jiang, you're all fine?"

"Of course!"

The three Regiment commanders were the regiment commanders who had previously been stationed at the East Gate. Li Hao had originally thought that after they recovered, the regiment commander would be completely annihilated, just like last time. However, these three were actually still alive ... Well, it might not be right to be alive, but these three were actually fine. It was really surprising.

Chapter 870: great harvest (3)

...

The seventh Regiment's leader's tone seemed to have a hint of a smile, which was not there before. "We'll be leaving first, you guys go in. The security Bureau's director Wang is waiting for you inside."

"Director?"

"Yes, the guard Department responsible for the daily safety of heaven battling city is the one you saw before. The military is usually not in charge of this, so he's in charge of it. After the city Lord and the others left, he's in charge of this place ..."

At this moment, Li Hao finally understood!

It turned out that the Golden Warrior was not the city Lord, but an existence similar to the Secretary of the inspection Division.

After a comparison, everyone understood.

And the 9th Division's master was probably someone like Huang Yu, or even a little lower, like Hu dingfang and the others?

And the person inside was someone like Kong Jie.

As for who had a higher status, they were both gold. Li Hao could not tell.

The three of them considered for a moment. Just as they were about to enter, a voice came from inside. "Li Hao, you can come in!"

Nan Quan rolled his eyes while Hong Yitang laughed. He didn't force them and stood at the door, not going in.

Li Hao was a little nervous, but he still walked in.

He crossed the square in front of him and walked forward.

A moment later, an open hall appeared. Inside, a golden statue was sitting, and a large seal was placed on the table in front of him. Li Hao looked at it from the corner of his eye and saw that it looked like a turtle. Perhaps ... This was the black turtle seal?

The gold-tier warrior's eyes had a golden glow. It was hard to tell if he really had eyes, but it was quite scary.

"Time is merciless. The Li family of the past, after the sword Saint, has also declined ..."

Li Hao was speechless and didn't know what to say.

The gold-tier warrior didn't say much and quickly said, "Originally, heaven battling city was already completely dead, and after a few years, it would probably be completely destroyed! However, a few years ago, someone seemed to have broken some sort of taboo, allowing some energy to infiltrate Silver Moon, which had already become a barren desert ... We've actually recovered some of our consciousness, and heaven battling city has been reopened. "

The rise of superpowers!

Li Hao now understood why Silver Moon had become a barren land. It was probably because these ancient cities had absorbed its energy, resulting in very little mysterious energy.

"If it was completely dead, we wouldn't have thought much about it. But since it's resurrected, we still want to do something."

The security Director seemed to be looking at Li Hao. "As someone with the bloodline of the eight great protector clans and with the starry sky sword in hand, I don't want to tell you about any responsibilities or obligations ... Times have changed, so it doesn't matter. Each era has its own mission. We have our

mission, and you ... You have your mission! It's not your responsibility to restore your glory and fight the firmament again. It's up to you!"

"However, since you've come to heaven battling city by chance ... I would like to ask you for a favor. Of course, I will give you some compensation and reward."

"Please speak, general!" Li Hao finally spoke.

"Not general ... Forget it, you can call me whatever you want."

The security chief continued, "the eight protector clans have eight inherited ancient weapons!" These ancient weapons would not be broken. They must still be there! The starry sky sword in your hand is one of them, and there are seven other pieces. One of them was lost in heaven battling city, and six of them were taken away by the descendants of the eight great clans in other cities ..."

"If it's possible, I hope you can collect these ancient weapons."

Li Hao asked curiously, what are these ancient weapons used for? Other than being powerful ..."

"It's a key ... Of course, it doesn't have much to do with you. "

What are you saying? I have the starry sky sword, right?

How did it not matter?

"General, do you mean that I should collect these ancient weapons and hand them over to you?"

"No need,"

"Just lend it to me for a while, I'll return it to you after this!" The security Director said slowly.

"There's no rush," he said. "Countless years have passed. It's just a thought."

Li Hao was stunned for a moment. After thinking for a while, he suddenly said, "General, do you know that there's an eight-trigram array and a stone gate ..."

The police Director seemed to have fallen into a dead silence.

"That place ... You saw it?"

"Right!"

"A!"

After a sigh, the security Director said, "It seems like ... He really didn't come back!"

"Putting aside the eight trigrams Formation, there's not just one stone gate, but eight. I'm not too sure what's behind the stone gate, city Lord might know, but I do know that behind the stone gate, there may be some inheritances left behind by some of the eight great families "powerhouses. In our era, every time an outstanding seed from the eight great families appears, we will send it in to obtain some benefits."

"Of course, it's hard to say now, it's too long ago!"

“Your starry sky sword has not been unsealed,” he said. “That’s good. You can’t use it even if it’s unsealed. It’s good like this. Stone gate ... If you see the Li family’s stone gate, don’t rush in. You’re too weak. After you go in, you might be in trouble!”

“As for the eight trigrams Formation ... You shouldn’t explore it now. It’s too dangerous. You could easily lose your life!”

“And don’t try to unseal it ...” He added.

“That’s a seal?”

Li Hao was startled. “But now, someone has destroyed the eight great families’ inheritance. Except for me, everyone else is dead. I also saw that the seven lines of the eight trigrams Formation are all controlled by one person!”
