CRAZY PLEASURE

Chapter 2471 Sister In Heat:>>7

There's no clever way to say it. My sister and I fucked a lot that summer.

We had all the restless passion of a pair of new lovers, with the bonus of our attraction being completely fucking wrong. It was an insane combination, multiplied in ferocity by the closeness the two of us had always shared. Monica crept into my bed many times after our first

I don't know how long we carried on like that, but it was long enough to completely miss the hikers who came at us from the far side of the trail. Monica was fumbling with my belt when we heard the snap of the twig. Both our heads whipped to the side to see a man and a woman, their expressions probably mirrors of our own, wide-eyed in shock. They w

It was late, and the minutes passed slowly. Midnight had been long ago, it seemed, and yet the night remained in that timeless hollow that are the wee morning hours. The lamp beside me was burning low and I flipped the page of my textbook, shifting ever so slightly. Against my chest, Monica stirred, and for a moment the words became gibberish and

"I know you will," she said, wiggling her hips. My soft cock still clung to her labia. She pushed her mouth deeper into my ear canal, and lowered her voice. "How about this is just the way it is for us? We can see whoever we want...but you and me...this is just how we love each other."

"That can't-" I started.

She shushed me. "You don't have to fuc

This is how it happened.

It was my last year of grad school and I was working my ass off. Sure, I was tense, but I had a great sense of purpose. My professors, on the whole, liked me, and as hard as their courses were I always did pretty well. Of course, blowing off steam was an integral part of that. Without that safety valve, I might have explode

I watched her chat with him like a machine, plugging in all the courtesies that were due and precisely working her way up from the personal to the academic to the brass tacks of her mission. It was cold, it was clinical, it was all bullshit, but it was bullshit that Stephanie used like a precision instrument. I wouldn't have been surprised if he'd

"Of course."

I scooted forward on the cushions, my thighs hugging her hips, and reached for her as she held her hair in place. My fingers dug into her supple skin. I marveled at how soft and smooth she felt, how every touch called forth memories and how the scent of her still stirred in me a longing to explore her. Time passed in thoughtless caress

When you add it all up and take a look at it, a lot of life - my life, anyway - is fairly boring. When you're a kid, a lot of your free time is taken up by school and doing or avoiding homework. When you're an adult, most of your time is taken up by just work. And then there's also a ton of hours when you have to sleep, plus a helluva lot of time d

She turned a little red and quickly glanced down the hall. Our mother was still talking, oblivious. She sighed, and gave me a sidelong glare. "So?"

It was my turn to sigh, and I went back to the fridge for a beer. Since our father passed away the year

before, my sister and I did our best to visit our mother on the weekends that we could spare. Some

"I..." I said. This was not good.

"It's a little tight," she admitted, turning around and wiggling her butt at me. The floofy white ribbon on the back, whatever it's called, ruffled provocatively. "But do you think Brodie will like it?"

"I think his wife's going to have a heart attack."

"Oh good!" she said, clapping her hands together. "That's one
