## Chapter 1 - Night flight

“Yangyang, do n’t mix up with the messy people after you arrive in the United States. My dad and I have some savings. You do n’t have to worry about tuition and living expenses. We have worked hard all our lives, but we are pointing to you to stay in the United States after graduation, and then pick us I’ve enjoyed it in the past! “On a Boeing 747 flight from Beijing to New York, a middle-aged woman said to the little girl next to her with a strong focus. The little girl responded a little bit and did n’t seem to put her mother’s words In my heart.

The direct flight from Beijing to New York takes more than ten hours. It is still too early to go to bed before going to sleep. Many people are looking around with nothing to do. In 2002, studying abroad was not an easy task. The words of middle-aged women quickly attracted the attention of middle-aged men sitting across the aisle. He exclaimed and asked, “The little girl is amazing! At a young age, he went to study in the United States. The kid is much stronger! “

“Oh, look at what you said.” A flower bloomed on the middle-aged woman’s face immediately, and when she reached her age, she would have a face. What could make her happier than her child’s praise What? I looked back and caressed the child’s hair, “But Yangyang hasn’t had to worry about us since he was a child. This time she applied for it herself!”

“The little girl blames Wen Jing. At first glance, she is a sensible child. Don’t you know which university to go to?” The conversation between the two has attracted the attention of several rows of passengers. The middle-aged man quickly asked everyone’s concern. topic of.

“State University of New York!” The middle-aged woman’s voice was a little louder, and she once again gained the envy of many people. After talking about her modesty, “The school is not very good, it is still worse than Harvard!” “

“New York is a metropolis! A university that can use New York as its name must be amazing!” The middle-aged man consciously brought the naming rules of Chinese universities to the United States. “How can the status of New York University in the United States and Beijing Normal University be in China?” Roughly the same!”

“This foreign matter is sometimes not the same as China, but I heard that New York University is ranked relatively high in the United States!”, Middle-aged women glanced at the seat next to Lu Qiujian, if he Zhiqu can just give the seat near the aisle to itself, the journey is boring, and it is just a good show with the person opposite.

Lv Qiujian held a copy of the original English version of “The Scattering Theory of Autonomous Functions”, which was very interesting, and did not pay any attention to the eyes of middle-aged women.

“State University of New York ranks well in the US.” Passengers in the front row also participated in their discussions. “Especially the campuses of Buffalo, Stony Brook, Binghamton and Albany are the strongest. A world-class good university! “

It ’s like saying that someone sleeps and someone sends a pillow. There ’s no happier thing than knowing what to do when you want to toast. Then the

middle-aged woman untied her seat belt and stood up, saying, "Yes, yes, my girl It's at the Albany campus! What are you doing? You know so much! "After looking at it, I glanced at Lu Qiuqian.

"I am a reporter from Education Daily. I went to New York for a business trip this time!" He smiled and gave everyone the strength of the State University of New York at Albany. "Albany can also be ranked in the top 100 in the United States, many of which are majors. They are all top-notch in the United States! The School of Nanotechnology and Engineering is the first in the world, and the Business School is one of the strongest comprehensive business schools in the Northeast of the United States ... "

The strongest comprehensive strength made the light of the middle-aged woman's face more intense. She automatically ignored the two words in the northeast and one, and nodded again and again, "This is my business girl's school to read!", And then glanced for the third time Lu Qiuqian, wondering why the young people nowadays are so ignorant, wondering if they are talking to him.

"Why did this little brother go to the United States?", The reporter comrade saw the book in the hand of Lu Qiuqian, following the aunt's eyes. The full English cover and the thick design of the academic work aroused his curiosity. heart.

"Oh, I also went to study in the United States!", Lu Qiuqian closed the book and answered quietly.

"Eh, you also go to the United States to study! Is that university?" The little girl known as Yangyang leaned out from behind her mother and looked at Lu Qiuqian curiously, only to see that he was thin and handsome. It looks like sitting and is almost as tall as mother's standing. I'm afraid it's more than one meter and eighty-five.

“Oh, Princeton! Not far from New York.”, Lu Qiuqian politely smiled at the little girl.

“Ah! Princeton!” After hearing the name of Lv Qiuqian, the little girl screamed, just like the Han and Han people saw starry eyes when they saw long-legged Oba.

“Is this school great?” Her mother looked at her strangely, “In that city?”

“In a small town between New York and Philadelphia!” Yang Yang hurriedly answered his mother’s question and immediately turned to Lu Qiuqian. “How did you apply for it? What major?”

“It turned out to be a country school!”, Her mother mumbled, and in her concept, the powerful universities can only exist in large cities, such as Mizuki University and Beijing Normal University in the Imperial City, and the incubation of the magic city. Egg University, Jiaotong University, the school rushed to the town is about the same as XX Vocational and Technical College!

“I recommend the school to exchange students in the Mathematics Department of Princeton.” Lu Qiuqian seemed to have heard nothing from a middle-aged woman. She felt secretly in her heart. For this place, has not spent much time in recent months.

“Oh, Princeton is not a country school. This school’s ranking has been hovering in the top ten in the world for a long time. Last year and this year, it pressed Harvard to rank first in the country!” “Especially the Department of Mathematics, has ranked first in the world for several consecutive years!”

Middle-aged women open their mouths without speech, after all, she can understand the gap between the top 100 and the first in the United States. Putting it in China is the gap between their provincial normal university and Beijing Normal University. But after a long battle in the office, she would not

easily admit defeat, and soon found a new direction of attack. “Huh, what can you do with readings? My daughter reads finance, but will go to Wall Street to make big money in the future!”

“Mom!”, The little girl is almost ashamed to raise her head. Whether it is Merrill Lynch or Morgan Stanley, which big company will reject the graduate of Princeton Mathematics? She will be able to find an internship position in a small company when she graduates.

“Can’t say that! Now many fund managers on Wall Street have graduated from the Department of Mathematics!”, The reporter comrade once again showed his broad knowledge, “I know there is a man named Li Yanxiu, who was from the Department of Mathematics of the Chinese University of Science and Technology in 87 After graduating, he came to Wall Street and soon created a unique investment analysis method with his mathematics, allowing his company to earn hundreds of millions of dollars in pure profits every year. I heard that his annual dividends are tens of millions of dollars. As a unit. “

“What awesome! It’s not your child!” After the fatal blow to the reporter, the middle-aged woman sat on her seat and turned her head, and the cabin returned to quiet.
