

D. School 109

Chapter 109 - PhD

Today's ceremony was mainly to issue degree certificates for students who graduated this semester. Lu Qiujian and his classmates were in their junior year. I don't know why they were also asked to attend.

The number of students in Princeton is not very large, so it takes almost no time to issue the degree certificate; "Wow, isn't that Gardson? Haha, I didn't expect to find such a large bachelor uniform!" Then, looking at the lively Patrice, he pointed to the center of the Princeton Tigers on the stage and laughed.

"President Tillman should be distressed for a while!", Lu Qiujian also made a joke; Sure enough, when Gardson came to the stage to receive his bachelor's certificate, he almost bent his waist to ninety degrees. Standing on tiptoe, this was enough to dial the black tassel on his bachelor hat from right to left, bending into a degree-granting ceremony.

Under the degree, the tassel hangs in the middle of the front right side of the brim of the degree cap worn by the wearer; after obtaining the degree, the tassel hangs in the middle of the front left side of the brim. At the degree conferring ceremony, after the principal (or the chairman of the school degree evaluation committee) awarded the degree, the graduate's tassel was dialed from the right side of the hat to the left side, indicating that the graduate had learned something and could fly.

Graduates with different academic backgrounds have different tassel colors. The Ph.D. cap tassel is red, the Master's cap tassel is dark blue and black, the Bachelor's degree cap is black, and the principal's cap tassel is yellow.

At the same time, the colors of the degree robe are also different. The doctoral robe is black and red, the master degree robe is blue and dark blue, the bachelor degree robe is all black, the tutor degree robe is red and black, and the principal robe is All red; the six sides of the drape trimming according to the text, science, industry, agriculture, medicine and military are pink, silver gray, yellow, green, white and red.

Seeing the joyful expression of Gardson on the stage, Patrice was also infected. "Gardson's dress today looks more impressive than he looks in a jersey!"

"You will have it next year, and I will have it too, but unfortunately we can't participate in each other's graduation ceremony! I wish you good luck first!", Lu Qiujian patted him on the shoulder.

“I will probably not be able to attend your bachelor’s degree awarding ceremony next year! But I will definitely attend your doctoral degree awarding ceremony!”, Alphos said aside, “I think you will probably be better than all the students in our class Earn a doctorate earlier! “

“It’s not about it, it’s about it!” Samuelson also came together. “I think you can get a doctorate in up to two years! In fact, according to your academic level, it is enough to get a doctor now! So it takes two years but it takes time to go through the process! “

“Ha, thank you for your blessing! I will send you an invitation when the time comes, but the ticket can be borne by you!”, Lu Qiujian whispered with them.

Soon the degree-granting ceremony was nearing completion. President Tillman delivered the certificate to the last doctoral student; the strange thing was that there were no more people waiting on the stage to receive the certificate, but she still had a volume of degree certificate on hand. And a red fringed doctor hat.

“Did that unlucky guy forget today’s day?” Alphos looked at the doctor’s hat with a yearning look.

“Lv Qiu from the Mathematics Department is invited to the stage!” President Tillman turned his attention to the area of the Mathematics Department.

what? Call me to power? What is this for? Lv Qiujian came to the stage with doubts, and his suit was particularly striking against the background of a pile of academic robes.

“What a naughty kid!”, Principal Tillman smiled and took up the doctor’s hat. “I had been looking forward to the report for a long time, but now it seems that I can’t see it on the Princeton campus! This is not for you to hide, but it seems that they all disagree! “, President Tillman’s eyes turned to Mathematics professors such as Wiles.

“Yeah, but I haven’t graduated yet? I didn’t have enough credits for a Ph.D. degree!” When I talked about my doctoral awarding ceremony, I didn’t expect to get a doctor’s cap so quickly. What’s going on?

Of course, he also thought that Princeton might award him an honorary degree by cracking Poincare’s conjecture, but now it seems that President Tillman wants to give him an official degree, which is

PhD-Philosophiae-Doctor in everyone's mouth. , Ph.D. in Philosophy, now also generally refers to academic research-type doctorate.

"The way to get PhD is not only to earn enough credits!", President Tillman puzzled him. "There are also ways to dissertate doctoral thesis. Students mainly exchange thesis with their tutors during their studies. Students' academic-level papers are submitted and the degree will be awarded after the defense is passed! "

At this point she smiled, "I believe that your paper on Poincaré's conjecture is definitely beyond the level of a doctor, so although there is no reply, the degree evaluation committee unanimously agreed to grant you a PhD degree; it is a small step away Exception, but I believe everyone will not object! "

At this time, there was a warm applause from the audience Those students and professors who had completed the degree-giving ceremony seemed to want to express their support for the school decision in this way.

"Thank you, thank you!", Lv Qiujian lowered his head and asked Principal Tillman to put on a doctor hat for himself, and then took the bachelor's robe on himself.

"Handsome boy!", President Tillman praised him and issued an invitation at the same time, "After you finish your studies at Beijing Normal University, you are always welcome to teach at Princeton, and here will always slip out of a place for you!"

"If I plan to come to the United States in the future, then Princeton will be my only choice!", Lu Qiujian can only answer so tactfully at this moment.

"On behalf of the Princeton Degree Evaluation Committee, I officially awarded Lu Qiujian PhD degree!" President Tillman handed the degree certificate to Lu Qiujian. After taking it, he quickly lowered his head and asked President Tillman to put the tassel on his doctor's cap Dial from the right side of the hat to the left.

After the ceremony was completed, Lu Qiujian stepped down with warm applause and returned to the crowd of mathematics department; Patrice immediately came over with a warm hug, "Lu, you are so enviable! Congratulations!"

"Well, the flight ticket was saved!" Alfors said while applauding.

Samuelson shook his head, "I just said that you only need to spend up to two years to get a doctorate, but now it seems that I underestimate you!", He stretched out his left hand and looked at the wrist watch , "It is less than twenty minutes before I say that sentence, and you have got your doctorate
